Gregory Barker: To ask the Secretary of State for Trade and Industry what his Department's estimate is of the lowest marginal capital cost to a housing developer of integrating *(a)* a micro wind turbine and *(b)* a solar hot water system in a new build house. [54060]

Malcolm Wicks: The information is as follows.

(a) It is not possible to give a figure for micro wind turbine on a house at this early stage of technology development.

(b) Under the current Clear skies Programme installations across social housing developments have resulted in an installed cost of approx of £1,600 per system, larger developments could see greater reductions.

Gregory Barker: To ask the Secretary of State for Trade and Industry what steps his Department is taking to promote the uptake of building-integrated solar photovoltaics. [54061]

Malcolm Wicks: We have already funded PV installations to the tune of £29 million pounds through our major PV demonstration programme and £10 million through the large scale and domestic field trials. We have seen a number of successes from the programme such as a growing number of renewable installations at a variety of scales, the install base increasing significantly, costs reducing and recent investments in manufacturing capacity in solar power in the UK.

The Department plans to continue its support for photovoltaics and other building scale renewables through a new low carbon buildings programme (LCBP), which is due to start in April this year.

The DTI has also put effort into removing a number of barriers to the deployment of very small generators, such as PV. These include reduction of VAT to 5 percent. for professionally installed systems, a new PV annex to planning policy guidance note (PPG22), simplified connection agreements to the local network (G77 and G83/1) and installer training and accreditation schemes. In addition, the Government have amended the renewables obligation to enable very

small generators like PV to accumulate their production over a year, rather than a month, so as to qualify for ROCs.

Gregory Barker: To ask the Secretary of State for Trade and Industry what his Department's estimate is of the marginal capital cost to a commercial developer of installing a solar photovoltaic facade in place of conventional prestige facade materials. [54062]

Malcolm Wicks: The cost to a developer of using PV as a façade material instead of conventional façade materials will depend on what the PV is being used to replace. The following table gives a comparison of costs/m^2 of different façade/building envelope materials.

	Costs/m^2
Brick cavity wall	£60
Timber cladding	£100
Permarock wall cladding	£100
Steel rainscreen	£200
Glazed cladding	£350
Terracotta cladding	£350-£400
Stone	£850-£1,500
Tile roof	£30
PV rainscreen cladding	£600
PV integrated curtain walling	£800
PV rooftile systems	£500-£650

So where it is being used to replace prestige façade materials like granite or marble, PV facades can be cheaper, though there will be some learning required to understand the fixing details which will impact on cost. Generally, however it is more costly to use PV when compared to most façade materials used today.

PV will deliver the following electrical outputs/m^2:

	Annual electrical output/demand (Wh/m^2)
Quality PV array ideally situated	100,000
Office use	40,000–80,000
Dwelling	25,000–50,000

The value of the electrical output is not sufficient to make PV cost-effective when used as a material to replace most facades. NB displaced electrical costs will vary according to electrical use and client type. Offices are like to pay anywhere from £0.02-£0.05/kWh, where as dwellings pay around £0.09/kWh for imported grid electricity. The value of the exported electricity is typically £0.02/kWh. Offices will utilise all PV generation on site. Dwellings may export to percent.

The marginal extra cost to a developer where installing PV is therefore anywhere from £0/m^2 to £600/m^2.

Shareholder Executive

Mr. Duncan: To ask the Secretary of State for Trade and Industry what the status is of the contract of employment of the Chief Executive of the Shareholder Executive; what recent discussions he has had with the Chief Executive on the contract running its full course; and if he will make a statement. [53998]

Barry Gardiner: Contrary to some press reports particularly in the *Daily Mail* and *The Daily Telegraph* Richard Gillingwater is still in his job. There is no truth in the rumours that he has resigned; he looks forward to continuing in the post of Chief Executive of the Shareholder Executive and continues to be highly rated by his employers—Cabinet Office and DTI. Richard's contract runs until September and it is simply too early to start considering its renewal.

Mr. Duncan: To ask the Secretary of State for Trade and Industry whether the Chief Executive of the Shareholder Executive was asked to appoint Lord Birt to the board of Urenco. [53999]

Barry Gardiner: No. The Chairmanship of Urenco is not a Government appointment.

Mr. Duncan: To ask the Secretary of State for Trade and Industry what the Government's policy is for appointing directors to *(a)* the board of Urenco and *(b)* boards of companies for which the shareholder executive has responsibility; and if he will make a statement. [54000]

Barry Gardiner: The Government only have a one-third stake in Urenco which is held through BNFL. Decisions about appointments to the board of the company are taken by BNFL jointly with their fellow shareholders (the Dutch Finance Ministry and E.On/RWE).

The policy on appointments to the boards of other companies for which the shareholder executive has responsibility will vary according to the size of the shareholding. Where the Government have a majority shareholding, appointments are made strictly in line with the procedures laid down by the Office of the Commissioner for Public Appointments (OCPA). Where the Government do not have a controlling shareholding and the appointments are not subject to OCPA, we nevertheless insist that the fundamental principle of UK public appointments should still apply and appointments be made purely on merit. BNFL advise that the appointment of the Urenco chairman was consistent with this approach.

Mr. Duncan: To ask the Secretary of State for Trade and Industry what the arrangements are for his Department to review decisions made by the Shareholder Executive about appointments to boards related to its shareholding responsibilities; and if he will make a statement. [54007]

Barry Gardiner: Appointments made by the Shareholder Executive to the boards of businesses or non-departmental public bodies within its portfolio are subject to scrutiny under the procedures laid down by the Office of the Commissioner for Public Appointments (the OCPA code).

Mr. Duncan: To ask the Secretary of State for Trade and Industry if he will make a statement on Government plans for Urenco over the next five years. [54005]

Barry Gardiner: Consistent with the 2003 Strategy Review of BNFL, the results of which were announced to the House on 11 December 2003, *Official Report*, columns 92–93WS, BNFL's investment in Urenco is being managed for value.

Mr. Duncan: To ask the Secretary of State for Trade and Industry what discussions the Government has had with the *(a)* Dutch and *(b)* German Governments on appointments to the board of Urenco. [54008]

Barry Gardiner: The Shareholder Executive has had no discussions, other than confirming to the Dutch Government that it regarded the appointment of the Chairman of the board of Urenco as a matter for the board of Urenco.

Trust Regulation

Mr. Austin Mitchell: To ask the Secretary of State for Trade and Industry whether trusts operated by UK-domiciled companies are registered and regulated in the UK. [50990]

Mr. Timms: I have been asked to reply.

There is no central register for trusts in the UK. To the extent that trustees may engage in particular activities which fall within a regulated sphere, those activities may be regulated by the appropriate body, for example, the Financial Services Authority or the pensions regulator. Private trusts are neither registered nor regulated. Trustees are bound by the terms of the individual trust document and their duties and responsibilities as set out in law.

UK Trade and Investment

Mrs. Villiers: To ask the Secretary of State for Trade and Industry what total efficiency savings were achieved by UK Trade and Investment in 2004–05; and whether these count towards current efficiency savings targets. [52814]

Ian Pearson: Efficiency savings of £850,000 were delivered in 2004–05 on UK Trade and Investment's programme funding stream. These do not count towards the £11 million efficiency savings on this funding stream that are required under UK Trade and Investment's current spending review settlement, which runs from 2005–06 to 2007–08.

Waste Electrical and Electronic Equipment Directive

Gregory Barker: To ask the Secretary of State for Trade and Industry what plans he has to implement the Waste Electrical and Electronic Equipment Directive within the recycling industry; and whether these plans will be affected by his Department's review on progress of the implementation of the Directive. [53623]

Malcolm Wicks: The Government are required to implement the Waste Electrical and Electronic Equipment Directive and fully intends to do so. The Review will aid implementation by identifying the best way to proceed.

Gregory Barker: To ask the Secretary of State for Trade and Industry what plans he has to publish the review of the implementation of the Waste Electrical and Electronic Equipment Directive; and if he will make a statement. [53624]

Malcolm Wicks: The Review is focusing on setting out revised proposals for ensuring a fair and balanced implementation of the WEEE Directive. Once the Review has concluded and a way forward has been identified, my department will produce a formal consultation paper as quickly as possible, along with draft regulations, guidance, and a revised timetable for implementation.

Gregory Barker: To ask the Secretary of State for Trade and Industry what representations he has received regarding the implementation of the Waste Electrical and Electronic Equipment Directive; and if he will make a statement. [53626]

Malcolm Wicks: I refer the hon. Member to the reply I gave on 9 February 2006, *Official Report*, columns 1373–74W.

Wind Farms (Northumberland)

Mr. Beith: To ask the Secretary of State for Trade and Industry if he will list the applications for wind-farm developments in Northumberland which have been submitted to his Department for decision. [53098]

Malcolm Wicks: The following is the information requested:

Middlemoor, North Charlton

Ray Moor, Kirkwhelpington

TRANSPORT

Biofuels

Mr. Holloway: To ask the Secretary of State for Transport what measures the Government is implementing to achieve the 2010 target for biofuels of 5 per cent. of road fuel sold. [54428]

Dr. Ladyman: I refer the hon. Member to my answer of 27 February 2006, *Official Report*, column 157W, given to the right hon. Member for East Yorkshire (Mr. Knight).

East Coast Main Line

Ms Diana R. Johnson: To ask the Secretary of State for Transport if he will make a statement on track access to the East Coast Main Line between London and Hull. [53005]

Derek Twigg: Network Rail is currently researching a Route Utilisation Strategy (RUS) for the East Coast Main Line (ECML). The RUS will investigate the medium to long term optimal allocation of capacity on the ECML. The consultation document for the RUS is due to be published later this year.

The Office of Rail Regulation (ORR) has announced a provisional decision to grant additional access to the East Coast Main Line to Hull Trains. The ORR is holding a hearing on 6 March 2006 to listen to representations concerning this decision.

Integrated Kent Franchise

Gregory Barker: To ask the Secretary of State for Transport what representations he has received from Govia regarding the recent award of the Integrated Kent Franchise. [52455]

Derek Twigg: Officials at the Department of Transport have been holding regular meetings with Govia representatives to ensure a smooth introduction of the new Integrated Kent Franchise that is due to commence on 1 April 2006.

Metrolink Network (Manchester)

Mark Hunter: To ask the Secretary of State for Transport what discussions he has had in the past six months with Greater Manchester passenger transport authority on the proposed expansion of the Metrolink network in Greater Manchester. [52488]

Derek Twigg: My right hon. Friend the Secretary of State for Transport has had a number of discussions with members of Greater Manchester passenger transport authority. Expansion of the Manchester Metrolink network is one of the issues that has been discussed in the context of the wider transport needs of Greater Manchester and the North West.

Private Finance Initiative

Chris Grayling: To ask the Secretary of State for Transport what proportion of the Highways Agency budget was spent on payments to private finance initiative contractors in the last period for which figures are available. [50582]

Dr. Ladyman: The Highways Agency spent 4.5 per cent. of its annual budget on payments to PFI contractors in 2004–05.

Road Maintenance

Chris Grayling: To ask the Secretary of State for Transport what the average spending per mile on road maintenance was by the Highways Agency in each region in each of the past 10 years. [52655]

Dr. Ladyman: Over the last 10 years, the Highways Agency has spent the following on road maintenance per network mile. Information on a regional basis is not available.

	Spending per mile (£)
1995–96	75,100
1996–97	64,800
1997–98	76,800
1998–99	98,200
1999–2000	114,300
2000–01	120,100
2001–02	121,300
2002–03	148,100
2003–04	150,700
2004–05	159,000

Following the publication of the Integrated Transport and Roads White Papers in 1998, trunk road maintenance was identified as the Government's highest priority for investment in strategic roads. This is reflected in the increase in spending on trunk road maintenance from 1998–99. There is now no backlog of trunk road maintenance.

Chris Grayling: To ask the Secretary of State for Transport what the average change to local funding for road maintenance was for the additional cost of maintaining detrunked roads in each of the past eight years. [52737]

Dr. Ladyman: The detrunking programme announced in "A New Deal for Transport in England" (1998) (Cm 3950) started in 2001–02. In recognition of the extra costs that would be incurred by local highway authorities taking over responsibility for detrunked routes, the Government gave a commitment to ensuring that detrunking would be accompanied by a fair transfer of resources. It was agreed with the Local Government Association (LGA) that the most effective way of ensuring that authorities were provided with resources for the routine maintenance of detrunked routes would be by means of an annual special grant. This was intended to be a transitional distribution method, and it remains the Government's policy that detrunked roads will, in due course, be incorporated into the Revenue Support Grant system. Capital support has been through the issue of SCAs (Supplementary Credit Approvals) to 2003–04 and from 2004–05 SCERs (Supported Capital Expenditure (Revenue)).

The following resource and capital funding has been made available to local highway authorities:

£ million

	Revenue (maintenance of roads grant determination)			*Capital*
Financial year	*Previous detrunking*	*New detrunking*	*Total*	*SCA/ SCE(R)s*
2001–02	—	4.074	4.074	4.230
2002–03	5.469	10.647	16.116	10.772
2003–04	19.179	7.190	26.368	28.472
2004–05	28.206	4.927	33.133	31.552
2005–06	35.367	1.181	36.548	45.016

Note:
New detrunking refers to the roads detrunked that year which receive a proportion of the grant set out in the Maintenance of Roads Grant Determination depending on the actual date of detrunking.

Chris Grayling: To ask the Secretary of State for Transport what proportion of the road network has been detrunked in each of the last 10 years. [52659]

Dr. Ladyman: The policy of transferring non-core trunk roads (detrunking) to local highway authorities was first set out in the White Paper "A New Deal for Transport" published in July 1998. The aim has been to transfer some 3,200 km (30 per cent.) of the trunk road network (as it was in April 1999) to local authorities in a phased programme. To date more than 80 per cent. (around 2,628 km) of the programme has been completed since April 2001.

The annual progress of the detrunking programme has been:

	Kilometres
2001–02	450
2002–03	1,100
2003–04	580
2004–05	380
2005–06	118

Train Service Usage Data

Dr. Murrison: To ask the Secretary of State for Transport what account is made of passengers travelling on *(a)* Rover tickets, *(b)* Britrail passes and *(c)* other concessions and non-specific tickets when compiling train service usage data. [54457]

Derek Twigg: Rail usage data is published in "National Rail Trends" by the Office of Rail Regulation including Rover tickets, Britrail passes and other concessionary tickets. Copies of the publication are available in the Libraries of the House.

Railway Stations (Smoking)

Dr. Kumar: To ask the Secretary of State for Transport (1) how many train stations in *(a)* England and *(b)* the Tees Valley do not have a no smoking policy on uncovered areas of the station; [53526]

(2) what guidelines the Department has set for smoking policies in *(a)* uncovered sections of train stations and *(b)* bus stops. [53527]

Derek Twigg: The Department for Transport does not hold information about smoking policies at individual stations. Under the Railways Act 1993 as amended, train operating companies may regulate smoking in railway carriages and at their stations. It is a matter for the train operators to decide whether, and where, to permit smoking. The Department for Transport has not provided any guidelines on smoking policies at railway stations or at bus stops.

Workplace Parking

Chris Grayling: To ask the Secretary of State for Transport pursuant to the answer of 7 February 2006, *Official Report*, column 1082W, on workplace parking, which Minister is responsible for joint work between his Department and the Treasury on the feasibility of a new tax or levy on workplace parking. [51900]

Dr. Ladyman: There is no joint work currently under way between the Department for Transport and the Treasury on the feasibility of a new tax or levy on workplace parking.

TREASURY

Carbon Dioxide Emissions

Mr. Greg Knight: To ask the Chancellor of the Exchequer whether he plans to base an increased percentage of car taxes on carbon dioxide emissions by 2010; what research he has evaluated on the merits of this policy; and if he will make a statement. [52440]

John Healey: The carbon emission based graduated vehicle excise duty (VED) system applies to all cars registered on or after 1 March 2001. Carbon emission data for all vehicles registered before then is not available. The Chancellor keeps all taxation policy under review, and considers relevant economic, social and environmental factors in deciding future policy. Any changes will be announced in the context of the Chancellor's Budget statement.

Children's Trust Funds

Mr. Stewart Jackson: To ask the Chancellor of the Exchequer what the take-up of children's trust funds is in the Peterborough constituency; how many of these are low-income families; and what proportion of the total take-up this represents. [54353]

Mr. Ivan Lewis: Child trust fund information at constituency level would be available only at disproportionate cost. UK-wide information on the number of child trust fund vouchers issued and the number of accounts opened are published on the HMRC website at http://www.hmrc.gov.uk/stats/child_trust_funds/child-trust-funds.htm

Information about accounts opened by low-income families, once available, will be published alongside other annual CTF statistics. The first set of annual CTF statistics will be published later this year.

Consumer Protection

Lorely Burt: To ask the Chancellor of the Exchequer what assessment the Department has undertaken of the performance of the Financial Services Authority in meeting its statutory requirement to protect consumers. [54335]

Mr. Ivan Lewis: The Financial Services Authority (FSA) has statutory responsibility to promote public understanding of the financial system and to secure the right degree of protection for consumers. The FSA's annual report, which is laid before Parliament, explains how this statutory remit has been met.

Air Passenger Duty

Lady Hermon: To ask the Chancellor of the Exchequer how much revenue has been generated by domestic air tax on flights between Northern Ireland and the rest of the United Kingdom in each of the last five years. [54231]

Dawn Primarolo: Revenue figures for air passenger duty are collected for the UK as a whole and are not broken down by devolved region. Historical APD revenue can be found in Air Passenger Duty Bulletin published by HM Revenue and Customs and available on UK Trade Info Website:

www.uktradeinfo.com/index.cfm?task=statindex.

Financial Advice

Lorely Burt: To ask the Chancellor of the Exchequer what assessment the Department has made of the impact on consumer protection of the availability of independent advice on financial products. [54328]

Mr. Ivan Lewis: The Government have established a system of consumer protection that regulates financial services through the Financial Services Authority (FSA), the Financial Ombudsman Service, and the Financial Services Compensation Scheme.

The FSA regulates the provision of financial advice for most types of investments, mortgages and general or protection insurance. It also provides impartial information to consumers through its website, helpline and publications.

Historical Wrecks

Robert Key: To ask the Chancellor of the Exchequer what financial benefit the Government will receive from profits made on the salvage contract for HMS Sussex. [53453]

Mr. Ivan Lewis: The Government prefers not to speculate on the value likely to be realised, as much will depend on the quantity, quality, rarity and other aspects of any coins and goods recovered that are subsequently sold.

Details of the Government's share of any profits have been disclosed on the Ministry of Defence's Disposal Services Agency's website, www.edisposals.com. A copy of the Partnering Agreement Memorandum, setting out the main provisions of the Licence Agreement, and a copy of a Synopsis of the Archaeological Requirements contained within the Licence Agreement were placed in the Library of the House on 25 November 2002.

HM Revenue and Customs

Mr. Gale: To ask the Chancellor of the Exchequer pursuant to the answer of 27 June 2005, *Official Report*, column 1288W, on HM Revenue and Customs (chairman), what effect the six measures agreed with the chairman of HM Revenue and Customs have had on the efficiency of the tax credit system; and what steps he is taking to reduce the backlog of disputed tax credit overpayments awaiting a decision. [53694]

Dawn Primarolo: For an update on progress on the six measures and processing of disputed overpayments, I refer the hon. Gentleman to my evidence to the Treasury Sub-Committee of 26 October 2005 and 1 February 2006.

Lisbon Agenda

Keith Vaz: To ask the Chancellor of the Exchequer what discussions he has had with his European counterparts on the European Commission's annual progress report on the Lisbon Agenda; and if he will make a statement. [54001]

John Healey: European Union Finance Ministers discussed the Commission's annual progress report on 14 February in the context of an orientation debate ahead of the spring European Council. Discussions between Ministers in the Economic and Financial Affairs Council are routinely reported by written ministerial statement.

National Insurance

Mr. Byers: To ask the Chancellor of the Exchequer if he will abolish the Class 2 National Insurance contributions in respect of those self-employed people living abroad. [51534]

Dawn Primarolo *[holding answer 14 February 2006]:* Payment of Class 2 contributions by workers living abroad is intended to allow workers to be able to qualify for some contributory benefits (such as incapacity benefit and maternity allowance) on their return to the UK in addition to the basic state pension.

Oil Companies

Harry Cohen: To ask the Chancellor of the Exchequer if he will assess the merits of introducing a windfall tax on oil company profits; and if he will make a statement. [54461]

Dawn Primarolo: In pre-Budget report 2005 the Chancellor announced a package of changes to North sea oil taxation to make sure that the North sea tax regime strikes the right balance between oil producers and consumers, by promoting investment and ensuring fairness for taxpayers. As part of this announcement the Chancellor committed to no further increases in North sea oil taxation for the lifetime of this Parliament.

Online Gambling

Mr. Moss: To ask the Chancellor of the Exchequer what measures are being taken to collect tax from offshore online, mobile and interactive gaming companies who advertise in the UK for business. [53891]

John Healey: UK gambling duties are only levied on operators based in the UK. Operators based offshore are not liable for UK gambling duties, but are liable for the relevant duties in the jurisdiction where they are based. Normal UK corporation tax rules also apply.

The 2005 National Audit Office report on gambling duties noted that the reform of betting duty in 2001

> "has reversed the trend of bookmakers moving their telephone and internet operations offshore which was increasingly threatening gambling duty revenue."

Personal Allowances

Mr. Andrew Turner: To ask the Chancellor of the Exchequer what estimate he has made of the cost to public funds, assuming no changes in behaviour, *(a)* including and *(b)* excluding changes to tax credits and benefits of increasing personal allowances in increments of £1,000 to twice their current level. [52640]

Dawn Primarolo *[holding answer 16 February 2006]:* The following table provides the total costs of increasing personal allowances in increments of £1,000.

Cost of changing personal allowances in 2005–06

Personal allowance				Cost	
Age under 65 (£)	*Age 65 to 74 (£)*	*Age 75 and over (£)*	*Blind person's allowance (£)*	*Excluding benefits adjustments[1] (£ million)*	*Including benefits adjustments[1,2] (£ million)*
[3]4,895	[3]7,090	[3]7,220	[3]1,610	—	—
5,895	8,090	8,220	2,610	6,370	6,240
6,895	9,090	9,220	3,610	12,370	12,150
7,895	10,090	10,220	4,610	18,030	17,760
8,895	11,090	11,220	5,610	23,500	23,180
9,895	12,090	12,220	6,610	28,410	28,060

[1] These are the total costs (not incremental costs) of changing the personal allowances to those indicated in the table.
[2] Increasing the personal allowance increases net incomes, after income tax. In some cases, this may have the impact of reducing entitlement to other benefits (for instance housing benefit), and hence reducing the cost of the option.
[3] Current.

These estimates assume that the threshold for national insurance contributions remains unchanged.

Entitlement to some tax credits is based on gross income, and therefore would be unaffected by these changes. Estimates of the cost of changing the personal allowances excluding benefits adjustments are based on the 2003–04 Survey of Personal Incomes projected forward to 2005–06. The estimates were adjusted for benefits changes using the Department's tax and benefit model (IGOTM) based on the 2003–04 Family Resource Survey and projected forward to 2005–06.

The figures exclude any estimate of behavioural response, which could be significant given the scale of some of the changes.

Recycling

Keith Vaz: To ask the Chancellor of the Exchequer what estimate he has made of the worth of the recycling industry in the UK to the UK economy in each of the past five years. [54320]

John Healey: The Treasury has made no estimate of the worth of the recycling industry in the UK. However, an estimate can be derived from the Annual Business Inquiry survey published by Office for National Statistics. Based on this survey, turnover and gross value added for businesses involved in the recycling industry are shown in the following table:

£ million

	Turnover	*Gross value added*
2000	3,111	816
2001	3,522	984
2002	3,847	1,037
2003	4,156	1,095
2004	5,262	1,484

Research and Development Tax Credits

Dr. Cable: To ask the Chancellor of the Exchequer what circumstances trigger an investigation by his Department into possible fraudulent claims by companies for research and development tax credits; and if he will make a statement. [50917]

John Healey: Claims to R&D tax credits, along with other elements of companies' tax computations or returns, are subject to a process of risk assessment. When significant risks are identified they are pursued through a variety of interventions, one option being the opening of an inquiry into the company return or claim.

The procedures and circumstances under which inquiries are conducted are published in HMRC's Enquiry Manual.

If, as a result of an inquiry, a return or claim is found to be incorrect and, as a result of this, insufficient tax has been paid, or an excessive amount of tax credit claimed, steps will be taken to recover the tax due. Interest will be charged and penalties will be considered where appropriate.

Where serious fraud is identified the Department will adopt its normal civil or criminal investigation procedures.

Tax Credits

Mr. Laws: To ask the Chancellor of the Exchequer how many employers have been contacted by staff from HM Revenue and Customs in relation to instances of suspected tax credit fraud. [44998]

Dawn Primarolo *[holding answer 24 January 2006]:* My written answer of 18 January 2006, *Official Report*, columns 1357–58W, set out that, as a result of identity fraud uncovered by HMRC, they would write to all whose names had been stolen for the purpose of fraudulent claims. HMRC has been working with DWP and Network Rail to advise those staff members affected. As part of the process of correcting the records, HMRC is informing individually all those whose identities were used in fraudulent claims that made it into payment.

HMRC will also shortly be writing to the remaining individuals who, according to investigations to date, have been victims of an identity theft unconnected to a specific employer. These letters inform them that their records have been corrected and highlight sources of advice on how to minimise the risks of identity fraud in the future. I can assure the House that genuine claimants will not be financially disadvantaged in respect of their tax credit claims.

Mr. Davidson: To ask the Chancellor of the Exchequer what checks are in place to ensure that individuals from other EU countries who are claiming tax credits are resident in the UK for the duration of their claim. [45328]

Dawn Primarolo: The Tax Credit Act 2002 section 3 (3) and (7) provides a general requirement for residency in the UK for tax credit eligibility purposes (unless prescribed exceptions apply). HMRC have a range of checks in place to determine the overall risk of a claim—both pre and post payment—and intervene where they suspect a claim may be wrong or fraudulent.

Mr. Stewart Jackson: To ask the Chancellor of the Exchequer how many cases of forged tax credits resulting in prosecution have been reported to Jobcentre Plus in Peterborough in the last 12 months. [50733]

Dawn Primarolo: There have been no cases of forged (fraudulent) tax credit claims resulting in a prosecution relating to Jobcentre Plus in Peterborough in the last 12 months.

Mr. Carmichael: To ask the Chancellor of the Exchequer whether tax credit call centre staff have been given guidance on handling calls from tax credit claimants whose awards have suddenly stopped and where identity fraud is suspected; and if he will make a statement. [51458]

Dawn Primarolo: HMRC Contact Centre staff have been provided with guidance for handling cases where identity or other fraud is suspected. It would not be appropriate to put details of that advice into the public domain.

Mr. Dodds: To ask the Chancellor of the Exchequer what the total amount awarded in tax credits in Northern Ireland was in each of the last two years. [54151]

Dawn Primarolo: Average numbers of in-work families, and their tax credit entitlement, by constituency, based on final family circumstances and incomes for 2003–04 are published in "Child and Working Tax Credits. Finalised Awards 2003–04 Geographical Analysis." This publication is available on the HMRC website at: http://www.hmrc.gov.uk/stats/personal-tax-credits/cwtc-geog-stats.htm This does not include out of work families receiving child tax credits.

Similar figures for 2004–05 are due to be published in May 2006.

Dan Norris: To ask the Chancellor of the Exchequer how many residents of Wansdyke constituency were in receipt of *(a)* child benefit, *(b)* child tax credit and *(c)* working tax credit in the latest period for which figures are available. [54404]

Dawn Primarolo: The number of families receiving child benefit by constituency, at August 2004, is available in the HMRC publication "Child Benefit Statistics. Geographical Analysis August 2004", which can be found on the HMRC website: http://www.hmrc.gov.uk/stats/child_benefit/geographical.htm Figures for August 2005 are due to be published in spring 2006.

Estimates for 2003–04 of the number of in-work families with tax credits awards by constituency, including information on overpayments and underpayments, based on final family circumstances and incomes for 2003–04 are published in "Child and Working Tax Credits. Finalised Awards 2003–04 Geographical Analysis." This publication and provisional estimates for the number of in-work families by constituency with tax credit awards as at selected dates in 2004–05 are available on the HMRC website at: http://www.hmrc.gov.uk/stats/personal-tax-credits/cwtc-geog-stats.htm

Mr. Laws: To ask the Chancellor of the Exchequer what estimate he has made of the number of telephone calls *(a)* made to, and *(b)* picked up by, the tax credits helpline in November; how many of these were (i) engaged and (ii) abandoned; and if he will make a statement. [35688]

Dawn Primarolo: The number of calls *(a)* made to, and *(b)* picked up by, the tax credits helpline in November; how many of these were (i) engaged and (ii) abandoned made to in November 2005, were as follows:

November 2005	*Calls in thousands*
Received[1]	1,588
Handled[2]	1,523
Engaged[3]	3
Abandoned[4]	65

[1] Where the caller selected an option from the call steering menu and was put in a queue to speak to an adviser
[2] Where the caller spoke to an adviser.
[3] Call attempts where the caller received an engaged tone.
[4] Where the caller selected an option from the call steering menu and was put in a queue to speak to an adviser but the call was terminated before the caller spoke to an adviser.

Tobacco

Keith Vaz: To ask the Chancellor of the Exchequer (1) how much has been raised in tax revenue from tobacco products in each of the past five years; [53847]

(2) what the rate of tax on tobacco products was in each of the last 10 years. [53848]

Mr. Ivan Lewis: The rates of excise duty and the duty receipts for tobacco products can be found in the HM Revenue and Customs "Tobacco Bulletin", which is available from a HM Revenue and Customs website address at:

http://www.uktradeinfo.co.uk/index.cfm?task=bulltobac

HM Revenue and Customs do not collect data on VAT from individual goods and services.

Mr. Fallon: To ask the Chancellor of the Exchequer what estimate he has made of the net tax revenue effect of the amendments to the Health Bill in respect of smoking passed by the House on 14 February 2006. [54104]

Dawn Primarolo: The Government take all factors into account when forecasting tax revenues, including changes in consumption resulting from Government measures to reduce smoking prevalence. The Government will be publishing an updated forecast of tobacco tax revenues in the Budget as usual.

UK Film Production

Mr. Jack: To ask the Chancellor of the Exchequer if he will list the titles of those films which have claimed the tax reliefs designed to promote the production of UK films since 1997. [54268]

Dawn Primarolo: This information cannot be provided, as it is confidential to individual taxpayers who have claimed such relief on their tax returns.

Valuation Office Agency

Mr. Pickles: To ask the Chancellor of the Exchequer if he will list foreign trips made by representatives of the Valuations Office Agency at public expense in each of the last three years; and what the *(a)* purpose and *(b)* destination was in each case. [49810]

Dawn Primarolo: Regarding the cost of foreign visits, I refer the hon. Member to the answer given, to the hon. Member for Meriden (Mrs. Spelman), on 19 January 2006, *Official Report*, column 1502W. The additional information now requested could be provided only at disproportionate cost.

The expertise of the Valuation Office Agency, in the field of property valuation, is respected around the world. The Valuation Office Agency receives a number of requests to provide advice to overseas Governments, to assist in the training of the staff employed by overseas Government valuation agencies and to share its expertise in the valuation of particular types of property. Sometimes these requests involve Valuation Office Agency staff providing advice to delegations visiting the United Kingdom from other countries, sometimes they involve Valuation Office Agency staff travelling abroad.

WALES

Olympic Games

David Simpson: To ask the Secretary of State for Wales what representations he has made within Government about securing benefits to Wales from the 2012 Olympics. [53628]

Mr. Hain: The Government have made clear that hosting the Olympic games should have a positive impact in terms of regeneration, investment and tourism, and that benefits should be spread across the whole of the UK.

The Welsh Assembly Government have established a Wales Steering Group, made up of key stakeholders in public, private and voluntary sectors to maximise the potential sporting, economic, social and cultural benefits to Wales that will arise from the London Olympic and Paralympic games. I fully support those efforts.

Clean Coal Technology

Dr. Francis: To ask the Secretary of State for Wales what recent discussions he has had with the *(a)* Secretary of State for Trade and Industry and *(b)* Welsh Assembly Government on increasing the use of clean coal technology in the coal industry in Wales. [53717]

Mr. Hain: I have regular discussions with Cabinet and Assembly colleagues about the opportunities that clean coal technologies could provide to UK's future energy mix.

In Wales, new technology is already being used to mitigate the environmental impact of coal. The coal-fired power stations at Uskmouth and Aberthaw are either already utilising or plan to fit flue gas desulphurisation, which reduces pollutants from coal fired power stations. Tower colliery is also making use of captured coal methane to generate electricity. The Government also support research to explore how carbon emissions from coal might be reduced or even eliminated in the longer term.

Government funding worth £35 million has been announced for the demonstration of carbon abatement technologies (CAT) such as carbon capture and storage. The DTI expect to receive proposals from industry for projects in late spring 2006.

In addition to this, CAT projects have been included as part of the November 2005 call for R&D proposals under the DTI's Technology programme supporting collaborative R&D. Around £13 million is being made available for energy based technologies with some of this being allocated to successful CAT projects.

Departmental Staff

Kate Hoey: To ask the Secretary of State for Wales what plans his Department has to change the London allowance of its staff; and if he will make a statement. [50000]

Mr. Hain: The Wales Office does not pay staff a London allowance, and there are no plans at present to change this.

Railway Stations (Disabled Access)

Dr. Francis: To ask the Secretary of State for Wales what discussions he has had with *(a)* rail companies, *(b)* the Disability Rights Commission in Wales and *(c)* Ministers in the Welsh Assembly Government on improvements to disabled access to rail stations in Wales. [53611]

Nick Ainger: I have regular meetings with Welsh Assembly Government colleagues and I have recently met senior managers of First Great Western, Virgin Trains and Arriva Trains Wales when access for the disabled was one of the matters discussed. Arriva Trains Wales manage 235 stations in Wales and I understand that the majority are accessible for customers with disabilities including wheelchairs. Following a disability audit of their stations, I understand that Arriva will be liaising with disability groups to prioritise the results.

The Government have announced a £370 million Access for All fund, specifically to deliver a programme of access improvements across the rail network over the next 10 years. Towards the end of March, my right hon. Friend the Secretary of State for Transport will be publishing details of how this fund will be targeted.

Wales (Overnight Visits)

David Simpson: To ask the Secretary of State for Wales how many *(a)* nights he has stayed overnight and *(b)* days he has spent in Wales on official business in each month since taking up his post. [53627]

Mr. Hain: Due to disproportionate costs, this information is not available for the period October 2003 to May 2005 in the format requested.

Since taking up my post as Secretary of State for Wales and Northern Ireland in May 2005 I have spent 62 days in Wales on official business.

In addition to the time spent in Wales, the Parliamentary Under-Secretary of State and I undertake Wales business in Parliament and in the Wales Office at Gwydyr House, London.

WORK AND PENSIONS

Benefits

Mr. Ruffley: To ask the Secretary of State for Work and Pensions what the claimant on-flow rates to *(a)* incapacity benefit and *(b)* severe disablement allowance were in each of the last 15 years. [50723]

Mrs. McGuire: Incapacity benefit was introduced in April 1995. The first full year for which figures are available is 1996. The available information is in the following table.

Incapacity benefit (IB) and severe disablement allowance (SDA) on-flows; Great Britain

	IB/SDA	*IB*	*SDA*
1996	1,001,500	957,700	43,800
1997	981,500	937,100	44,400
1998	850,300	824,600	25,700
1999	816,100	793,200	22,900
2000	792,800	768,800	24,000
2001[1]	763,800	751,800	12,000
2002	727,400	724,600	2,800
2003	709,100	706,600	2,500
2004	675,000	672,900	2,100
2005 (part)[2,3]	441,600	440,100	1,500

[1] New commencements to SDA ceased in April 2001. Some commencements still appear after this date due to the case being re-built. This occurs when the case is removed from the system for amendment and then subsequently replaced with a new date of commencement.

[2] Figures for 2005 only include the three available quarters; February, May and August and are not comparable with previous years.

[3] Figures for the latest year do not include some late notifications and are subject to major changes in future quarters. For illustration purposes, total commencements for May 2004 increased by 18 per cent. in the year following their initial release.

Notes:

1. Numbers are rounded to the nearest 100.
2. Numbers are based on a 5 per cent. sample, and are therefore subject to a degree of sampling variation.
3. Annuals figures have been created by adding quarterly data for February, May, August and November.
4. Incapacity benefit (IB) figures include IB credits-only cases.

Source:

DWP Information Directorate, 5 per cent. sample data.

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions how many employees of *(a)* his Department and *(b)* the agencies for which he is responsible were primarily engaged in administering paper-based methods of benefit claims in each year since 1997. [51990]

Mrs. McGuire: The information requested is not available.

The Department for Work and Pensions, including Jobcentre Plus, keeps staffing records by grade and location, but not by job role.

Mr. Keetch: To ask the Secretary of State for Work and Pensions what estimate he has made of the number of incapacity benefit claims which have been turned down on the basis of insufficient national insurance contributions (NIC) as a result of delays in updating NIC records. [52679]

Mrs. McGuire: There is no indication that the delay in updating national insurance contributions records has impacted on the number of incapacity benefit claims that have been disallowed.

Lynne Jones: To ask the Secretary of State for Work and Pensions pursuant to the answer of 13 February 2006 to Question 44203, whether he plans to withhold incapacity benefit from any person deemed unfit for work by their own medical practitioner but who has yet to be examined under the personal capacity assessment arrangements. [53116]

Mrs. McGuire: There are no plans to withhold benefit from a person where the GP has decided that they should refrain from work due to incapacity. Benefit continues to be paid while the GP/Consultant supplies medical evidence and until the Personal Capability Assessment has been applied.

Call Centres

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions what *(a)* national and *(b)* local targets have been set for call centre performance in pension centres; and what has been the performance against such targets over the last two years. [54235]

Mr. Timms: The information requested can be found in The Pension Service Annual Report and Accounts for 2003–04 and 2004–05, which are held in the Library.

Carers Benefit Regulations

Tim Loughton: To ask the Secretary of State for Work and Pensions what assessment he has made of the effect of the carers' benefit regulations on young carers aged 16–21 years who want to continue in education or begin training. [51523]

Mrs. McGuire: Carer's allowance is an income maintenance benefit for people aged 16 or over who regularly provide at least 35 hours of care per week for a severely disabled person who receives an attendance allowance, or the equivalent rates of the disability living allowance care component or a constant attendance allowance paid under the industrial injuries disablement benefits scheme or the war disablement pension scheme. The allowance is not income-related and entitlement does not depend on the payment of national insurance contributions, but it is not available to people in work who have earnings of more than £82 per week net of a range of allowable expenses. To avoid duplicate provision from public funds, it is not payable when a carer is receiving another non-income-related benefit or a training grant to maintain their income which is paid at the same or higher weekly rate.

Subject to these entitlement and payment rules, carer's allowance is available to young carers aged 16 to 21 years who undertake training or part-time education. However, it is not available to those in full-time education involving 21 hours or more of supervised study a week. This is because young people aged 16 or over who remain in full-time non-advanced education are regarded as financially dependent on their parents who can receive child benefit and child tax credits, whilst support for those who choose to undertake full-time advanced education is provided by the student support system rather than by social security benefits.

Departmental Recruitment

Mrs. Villiers: To ask the Secretary of State for Work and Pensions how many job advertisements were placed by his Department *(a)* in total, *(b)* in print newspapers and magazines and *(c)* on a recruitment website in each year since 1997; and at what (i) total and (ii) average cost in each case. [50753]

Mrs. McGuire: This information is not collected centrally in the Department.

Departmental Staff (Time-limited Contracts)

Jim Cousins: To ask the Secretary of State for Work and Pensions how many of his staff are employed on time limited contracts in each *(a)* region and *(b)* country; and what percentage of total staff in each (i) region and (ii) country this represented in the last year for which figures are available. [45546]

Mrs. McGuire *[holding answer 25 January 2006]:* The number of staff employed by the Department who are employed on time limited (fixed term) contracts in each region and country together with the percentage of total staffing is in the following table.

Region/country	*Fixed term contract staff*	*Percentage of total staff in region/country*
East Midlands	76	1.3
East of England	98	1.7
London	67	0.6
North East	577	4.6
North West	207	0.9
South East	93	1.2
South West	64	0.9
West Midlands	273	2.7
Yorkshire and the Humber	189	1.5
Scotland	301	2.3
Wales	290	4.3
Total DWP	2,235	1.9

Note:
Figures are full-time equivalent, are point in time as at 30 November 2005 and are consistent with Office for National Statistics definitions.

Disability

Dr. Cable: To ask the Secretary of State for Work and Pensions how many registered disabled people there were in each quarter since 1997; and if he will make a statement. [53903]

Mrs. McGuire: Estimates based on data from the Family Resources Survey show there are 10.1 million disabled people in Great Britain, including people with limiting longstanding illnesses, of whom 4.6 million people are over State Pension Age and 700,000 are children. Everyone included in these estimates would meet the definition of disability in the Disability Discrimination Act.

In addition, each local authority is required by law to maintain a register of disabled people living within its area, for the purposes of planning and providing appropriate social services; however, registration is entirely voluntary therefore the information held does not accurately represent the prevalence of disability.

The available information is in the table.

Number of registered disabled people in Great Britain in the years shown

	Total (million)
1997–98	1.8
1998–99	1.8
1999–2000	1.9
2000–01	1.8
2001–02	1.7
2002–03	1.7
2003–04	1.6

Notes:
1. The figures in the table relate to people registered with local authorities under the National Assistance Act. For the purposes of this Act, disabled people are defined as "persons who are blind, deaf, or dumb, or who suffer from mental disorder of any description, and other persons aged 18 or over who are substantially and permanently handicapped by illness, injury, or congenital deformity". This definition is separate from that used for the purposes of the Disability Discrimination Act.
2. The implementation of the Disability Discrimination Act 1995 repealed various sections of the Disabled Persons (Employment) Act 1944, including sections related to the register of disabled persons.

Source:
Family Resources Survey

Disability Living Allowance

Mr. Drew: To ask the Secretary of State for Work and Pensions whether it is his policy to send letters to those on disability living allowance to inform them that, as they have it paid directly to a bank, their pension will now be paid in a similar manner; and what measures have been put in place for those with a visual impairment who are receiving their pension in this way. [42250]

Mrs. McGuire: The administration of disability living allowance is a matter for the Chief Executive of the Disability and Carers Service, Mr. Terry Moran. He will write to the hon. Member with the information requested.

Letter from Terry Moran:

You asked the Secretary of State for Work and Pensions, whether it is his policy to send letters to those on disability living allowance to say that as they have it paid directly to a bank their pension will now be paid in a similar manner rather than by giro; and what measures have been put in place for those with a visual impairment who are receiving their pension in this way.

The Minister for Disabled People, Anne McGuire MP, promised you a substantive reply from the Chief Executive of the Disability and Carers Service.

As a result of the drive to reduce the number of disability living allowance and attendance allowance customers paid by cheque, an exercise was undertaken to pay disability living allowance and attendance allowance into a bank or building society account already being used for payment of other benefits.

Following this change a letter is sent to the customer or their representative advising that the way we pay benefits is changing and that we would now pay into the account into which their benefits were already being paid. For customers identified as having a visual impairment this letter would be provided in either large print or Braille.

I hope this is helpful.

Housing Benefit

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions what estimate he has made of the number of people in the UK aged under 25 years claiming housing benefit which is insufficient to cover the housing rent they are paying. [54228]

Mr. Plaskitt: The information is not available in the format requested.

As at May 2004, the most recent available figures, 36,000 claimants in Great Britain who were under 25 years of age received housing benefit at a rate less than their eligible rent.

Danny Alexander: To ask the Secretary of State for Work and Pensions pursuant to the answer of 2 February 2006, *Official Report*, column 664W, on housing benefits, how many claimants he estimates would benefit from raising the standard rate of housing benefit and council tax benefit earned income disregards from £5 per week to £10 per week. [54435]

Mr. Plaskitt: The number of claimants who would benefit from raising the standard rate of housing benefit and council tax benefit earned income disregards from £5 to £10 per week is estimated to be 90,000.

Notes:

1. The estimate is rounded to the nearest 10,000 and is for Great Britain.

2. This impact is estimated using the Department's Policy Simulation Model, which is based on data from the 2003–04 Family Resources Survey, uprated to 2005–06 prices, benefit rates and earnings levels, and is calibrated to latest published forecasts on HB recipients with earnings.

3. Results are subject to sampling and reporting errors and estimation assumptions, and are therefore indicative only. No behavioural changes are assumed.

Danny Alexander: To ask the Secretary of State for Work and Pensions pursuant to the answer of 1 February 2006, *Official Report*, column 590W, on benefits, how many households were *(a)* made subject to a delayed non-dependant deduction and *(b)* exempt from the non-dependant deduction regime as a result of the changes introduced in October 2003 following the introduction of the pension credit. [54445]

Mr. Timms: The information requested is not available.

Incapacity Benefit

Mr. Ruffley: To ask the Secretary of State for Work and Pensions what recent estimate he has made of the number of *(a)* males and *(b)* females aged (i) 18 to 29, (ii) 30 to 39, (iii) 40 to 49 and (iv) 50 to 59 years claiming incapacity benefit; and what estimate he has made of the number of males aged 60 to 65 years claiming incapacity benefit. [43341]

Mrs. McGuire: The information is in the table.

Incapacity benefit (IB) and severe disablement allowance (SDA) claimants by duration and gender: Great Britain, May 2005

	All	Female	Male
Total caseload (aged 16 to 65)	2,784,000	1,166,000	1,617,900
All aged 18 to 65	2,749,700	1,142,100	1,607,500
18 to 29	316,000	139,400	176,700
30 to 39	486,000	205,000	281,000
40 to 49	667,000	314,800	352,200
50 to 59	944,400	466,900	477,500
60 to 65	336,300	16,100	320,200

Notes:

1. Figures are rounded to the nearest hundred. Totals may not sum due to rounding.

2. 'Claimant" figures include all IB/SDA claimants, including IB credits only cases.

Source:

Work and Pensions Longitudinal Study 100 per cent. data.

Mr. Ruffley: To ask the Secretary of State for Work and Pensions how many individuals who would otherwise qualify for incapacity benefit are affected by *(a)* whole and *(b)* partial withdrawal of benefit owing to their receipt of an occupational pension; and what the total annual benefit foregone from this clawback was in each of the last five years. [44428]

Mrs. McGuire: No information is available on the number of incapacity benefit claimants whose entitlement is reduced to nil by virtue of the amount of their occupational pension.

The information on the numbers and total estimated annual incapacity benefit foregone for those with reduced entitlement by virtue of the amount of their occupational pension is in the table.

Incapacity benefit claimants whose benefit is reduced by virtue of the amount of occupational pension in payment and associated annual benefit foregone.

	Claimants (Thousand)	Annual incapacity benefit foregone (£ millions, 2005–06 prices)
2001–02	4	5
2002–03	13	17
2003–04	22	29
2004–05	28	39

Notes:

1. Numbers are rounded to the nearest hundred and expenditure to the nearest million.

2. Figures have only been supplied for four years because occupational pensions were first taken into account against incapacity benefit entitlement in April 2001.

Source:

DWP Information Directorate 5 per cent. sample, Work and Pensions Longitudinal Study 100 per cent. data and DWP medium term expenditure tables.

John Cummings: To ask the Secretary of State for Work and Pensions how many *(a)* men and *(b)* women

in receipt of incapacity benefit owing to mental health conditions are aged (i) 20 to 29, (ii) 30 to 40, (iii) 41 to 49, (iv) 50 to 60 and (v) 61 to 65 years. [48414]

Mrs. McGuire: The available information is in the table.

Incapacity benefit (IB) and severe disablement allowance (SDA) claimants in Great Britain with a primary diagnosis in the "mental and behavioural disorders" group of diagnoses; August 2005

	All persons	Men	Women
All Ages	1,089,100	609,200	479,900
Under 20	21,200	10,700	10,600
20 to 29	168,500	95,700	72,800
30 to 40	289,000	172,000	117,000
41 to 49	261,600	137,600	123,900
50 to 60	293,400	146,900	146,600
61 to 65	46,300	43,000	3,400
Over 65	9,000	3,400	5,700

Notes:
1. Figures are rounded to the nearest hundred. Totals may not sum due to rounding.
2. 'Claimant" figures include all IB and SDA, including IB credits only cases.
3. All diagnoses are coded using the International Classification of Diseases, 10th Edition, published by the World Health Organisation.

Source:
DWP Information Directorate, Work and Pensions Longitudinal Study 100 per cent. data.

Mr. Ruffley: To ask the Secretary of State for Work and Pensions how many claimants of incapacity benefit attended face-to-face medical examinations pursuant to *(a)* an initial own occupation test and *(b)* an initial personal capability assessment in each of the last three years; and how many claims were terminated as a result. [49969]

Mrs. McGuire: The information is not available in the form requested.

The total number of claimants of incapacity benefit and severe disablement allowance who were medically examined is shown in the following table.

September to August each year:	Examinations
2002–03	524,894
2003–04	467,256
2004–05	483,084

Notes:
1. Volumes include severe disablement allowance cases which cannot be identified separately.
2. Figures include initial and subsequent examinations.

The number of allowance and disallowance decisions given to applicants for incapacity benefit after referral to medical services, including cases where a medical examination was necessary to make a decision, are shown in the following table.

Incapacity benefit (IB) applicants/ recipients	Total IB disallowed	Disallowed on personal capability assessment	Disallowed on own occupation test	Allowed after referral to medical services
1 April 2002 to 31 March 2003	181,680	172,570	9,110	700,305
1 April 2003 to 31 March 2004	188,740	180,735	8,005	634,760
1 April 2004 to 31 March 2005	181,995	175,090	6,905	594,335

Notes:
1. Figures include "Did not attend" and "Failure to return questionnaire'.
2. Figures have been rounded to the nearest five.
3. Figures may not correspond to totals due to rounding.
4. Figures include initial and subsequent examinations.

Source:
Figures are from 100 per cent. counts of adjudication decisions entered on the benefit computer system and will exclude a small number of clerically held cases.

Mr. Ruffley: To ask the Secretary of State for Work and Pensions how many face-to-face medical examinations have been conducted in each of the last three years in relation to claimants who have been in receipt of incapacity benefit for *(a)* 0 to six months, *(b)* six to12 months, *(c)* 12 to 24 months, *(d)* 24 to 36 months, *(e)* 36 to 48 months, *(f)* 48 to 56 months and *(g)* over 56 months; and how many resulted in the termination of a claim. [49977]

Mrs. McGuire: The information is not available in the form requested. Details of the number of claims which were terminated following application of the Own Occupation Test or the Personal Capability Assessment, by duration of their incapacity benefit or severe disablement allowance claim, are set out in the following table.

Incapacity benefit (IB)/severe disablement allowance (SDA) claims terminating following the application of the own occupation test (OOT) or the personal capability assessment (PCA)

Thousand

		Months						
	Total	Up to six	Six to 12	12 to 24	24 to 36	36 to 48	48 to 56	Over 56
1 September 2002 to 31 August 2003	102.6	25.3	31.2	17.1	10.3	5.8	2.8	10.1
1 September 2003 to 31 August 2004	102.0	22.9	35.5	14.3	10.2	6.4	2.8	9.8
1 September 2004 to 31 August 2005	110.7	22.0	37.1	16.2	12.0	7.0	3.5	12.9

Notes:
1. Figures are shown in thousands and rounded to the nearest 100. Totals may not sum due to rounding.
2. "Claimant" figures include all incapacity benefit and severe disablement allowance (including incapacity benefit credits only cases).
3. Information is collected quarterly. The figures for the latest quarter do not include any late notifications and are subject to major changes in future quarters.
4. Information on face-to-face medical examinations is not available from our 5 per cent. samples.

Source:
Information Directorate, 5 per cent. samples.

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions how many current incapacity benefit claimants will have reached the aged of 65 years by 31 September 2018. [51955]

Mrs. McGuire: The estimated number of those currently claiming incapacity benefit or severe disablement allowance who will have reached the age of 65 years by 31 September 2018 is 1,153,700.

Dr. Cable: To ask the Secretary of State for Work and Pensions what estimate he has made of the number of people who will be transferred from incapacity benefit to pensions in each of the next 10 years; and if he will make a statement. [53900]

Mrs. McGuire: We estimate the number of incapacity benefit claimants (both payment and credits-only cases) that will transfer from claiming incapacity benefit to receiving retirement pension in each of the next 10 years is 60,000.

Note:

Estimate is rounded to the nearest 10,000 cases.

Parliamentary Questions

Mr. Hancock: To ask the Secretary of State for Work and Pensions when he will answer question 31033 from the hon. Member for Portsmouth, South tabled on 21 November 2005. [43878]

Mrs. McGuire: A reply was given to the hon. Member on 14 February 2006, *Official Report*, column 1948W.

Pension Liabilities

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions if he will estimate the net present value of accrued pension liabilities in respect of *(a)* present and *(b)* former employees of his Department and its predecessors. [52119]

Mrs. McGuire: The Principal Civil Service Pension Scheme is an unfunded multi-employer defined benefit scheme and individual Departments' pension liabilities are not available. The Cabinet Office Civil Superannuation Resource Accounts for 2004–05 showed that the total pension liability at 31 March 2005 was £84.1 billion. The value of pension liabilities was assessed as follows:

Liabilities for current members still contributing to the scheme—£37 billion

Deferred pensions and contingent pensions for dependants in respect of members no longer contributing—£12.7 billion

Current pensions for members and contingent pensions for dependants—£34.4 billion

As a result of a change in the discount rate used for calculating pension liabilities with effect from 1 April 2005, the total pension liability at 1 April 2005 increased by £10.6 billion to £94.7 billion.

Pensions

Gregory Barker: To ask the Secretary of State for Work and Pensions how many people have taken up the stakeholder pension scheme since its introduction; and how much the average personal and employee contribution is. [23138]

Mr. Timms *[holding answer 28 October 2005]:* 2,622,160 stakeholder pensions have been sold in the period 6 April 2001 to 30 September 2005. Average individual contributions to stakeholder pensions in the tax year 2003–04, broken down by status, are in the following table. I also refer the hon. Member to my answer of 14 December to his question (37530) with regard to average annual employer and individual contributions.

Status of individual	*Average contribution (£)*
Employees	1,290
Self employed	1,990
In receipt of a pension	2,580
Child	1,400
Full-time education	1,700
Carer	2,020
Unemployed	2,280
Other	1,780
Total[1]	1,430

[1] Average annual contribution by individual in the 2003–04 tax year.

Source:

Personal and stakeholder pensions. Number of individuals contributing and average contribution by status and earned income. HM Revenue and Customs Table 7.10

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions what recent estimate he has made of the number of registered stakeholder pension schemes that have no members. [54467]

Mr. Timms: The information is not available in the format requested.

Based on data from the Employers Pension Provision Survey 2003, which was conducted shortly after the introduction of stakeholder pensions, it is estimated that in 2003:

(a) some 35 percent. of all companies provided access to stakeholder pension schemes (including companies with fewer than five employees who are not required to provide access to a stakeholder pension), and

(b) three quarters (75 percent.) of employer designated schemes had no members contributing.

Statutory Sick Pay

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions what the average period of payment of statutory sick pay was for all claimants of statutory sick pay in each of the last five years for which figures are available. [51986]

Mrs. McGuire: Statutory sick pay (SSP) provides a measure of earnings replacement for employees unable to work because of short-term sickness. The SSP scheme is administered and paid for by employers, who have a statutory liability to pay SSP for up to 28 weeks to any employee incapable of work under their contract of service for four or more days in a row and who satisfy the qualifying conditions.

Information regarding the average length of payment of SSP is not available as it is not collected centrally.

Sunbeds

Mrs. James: To ask the Secretary of State for Work and Pensions whether all local authorities in England

have received guidance from the Health and Safety Executive regarding the inspection of sunbed tanning retail outlets. [53105]

Mrs. McGuire: No. Inspection guidance has not been formally issued by HSE to local authorities. Relevant Industry guidance (INDG209) however is available on the HSE website and has been cited by the Chartered Institute of Environmental Health Officers in their "tool kit" for skin care, published in 2004.

Mrs. James: To ask the Secretary of State for Work and Pensions how many accidents involving sunbeds were reported to local authorities in England in each year since 1995. [53107]

Mrs. McGuire: Information in the form requested is not held by the Health and Safety Executive (HSE). Reports to local authorities about accidents are made under the same regulations and reporting system as those made to HSE. The information recorded does not include codes for specific pieces of equipment such as sunbeds or tanning facilities.

It would only be possible to identify accidents at such facilities through an incident by incident analysis of the descriptions provided by notifiers. This would require a disproportionate diversion of resources.

Mrs. James: To ask the Secretary of State for Work and Pensions what recent discussions he has had with local authorities in England regarding the operation of sunbed tanning facilities in local authority leisure centres; and what representations has he received from local authorities regarding health issues associated with their use. [53110]

Mrs. McGuire: Neither I nor the Health and Safety Executive have not received any representations from local authorities regarding health issues associated with sunbed use within their leisure centres.

No discussions have been held with the local authority sector as a whole on this matter.

Written Answers to Questions

Wednesday 1 March 2006

INTERNATIONAL DEVELOPMENT

Millennium Development Goals

8. **Mr. Khabra:** To ask the Secretary of State for International Development if he will make a statement on progress towards meeting the millennium development goals in Asia. [53965]

Mr. Thomas: Good progress is being made overall in Asia to reduce the number of people living in extreme poverty, and the region is on track to meet this target by 2015. Progress on other Millennium Development Goals is uneven. Areas of particular concern are the high rates of maternal mortality, the spread of HIV and AIDS, the quality of and access to education, especially for girls, and the need to improve access to sanitation.

Tuberculosis

9. **Nick Herbert:** To ask the Secretary of State for International Development what measures he plans to take to ensure that measures to combat tuberculosis in developing countries are made a priority at the G8 St. Petersburg summit in July. [53966]

Mr. Thomas: At the launch of the Global Plan to stop tuberculosis for 2006-15 in Davos, the Chancellor called for the G8 formally to designate tuberculosis a top priority at St. Petersburg in July, and urged G8 member countries to pledge to the Global Plan.

As always the UK will work through all available channels in the lead up to the G8 summit. We will encourage other G8 partners to ensure that tuberculosis control is addressed as part of the comprehensive package of measures agreed at Gleneagles, so that developing countries can make faster progress towards the Millennium Development Goal targets.

International Aid

10. **Mr. Andrew Turner:** To ask the Secretary of State for International Development what steps he is discussing with his Commonwealth counterparts on using international aid to promote good governance. [53967]

Hilary Benn: At the Commonwealth Heads of Government Meeting in Malta in November 2005 the Heads of Government reaffirmed their commitment to good governance. At the heart of the organisation is the Harare Commonwealth Declaration which sets out the shared commitment to good governance, human rights and democracy. To deliver these objectives the Commonwealth administers four Peace and Democracy Programmes: Good Offices for Peace, Democracy and Consensus Building, Rule of Law and Human Rights. Discussion has focused on learning from the experiences of member states on what works.

Yemen

11. **Keith Vaz:** To ask the Secretary of State for International Development what assistance will be given to Yemen in 2006-07 to help it combat the spread of tuberculosis. [53968]

Mr. Thomas: The current prevalence of TB in Yemen is 1.5 per 1,00 people. The Government of Yemen runs a National Tuberculosis Programme aiming to eliminate TB in the country.

The UK has committed £59 million until 2008 to the Global Fund to Fight AIDS, TB and Malaria. Since January 2002 the fund has approved US$735 million for TB control, and $6.1 million is being spent in Yemen between 2005 and 2010.

DFID has committed £ million, between 2005 and 2008, to the global Stop TB Partnership which has provided support to good quality TB drug access in Yemen. The UK also provides core funding to the World Health Organisation (£2.5 million in 2005–06) which among other things, works to fight TB in Yemen.

Keith Vaz: To ask the Secretary of State for International Development if he will make a statement on his Department's work in the Republic of Yemen. [52706]

Mr. Thomas: Yemen is the only low-income country in the middle east, with social indicators reflecting very low levels of human development—female primary school enrolment and completion rates and adult illiteracy rates are among the worst in the world, as are infant and maternal mortality rates. With a population of 20 million the poverty levels are high—10.7 percent. of population below US$1 a day and 45 percent. below US$2 a day.

DFID's support to Yemen goes back to 1997 with a £2 million per year programme focusing on strengthening economic and financial management. DFID extended the programme in 2003 also to include work on education and health, and opened an office in Yemen in 2004. DFID has increased its programme in Yemen from £2.5 million in 2001-02 to £12.5 million in 2005-06.

The Government of Yemen's 3rd five year development plan for poverty reduction (DPPR) is due to be finalised in the next few months. DFID will support the implementation of this and encourage a more effective, harmonised donor response through a joint donor framework for action. This will help donors achieve focus and prioritisation in their work.

This approach has given DFID the time to focus our engagement in strategic areas that we believe will bring about positive change; for example, supporting improvements in public financial management and improving aid harmonisation.

The current DFID programme includes support for basic education (with the aim of expanding access to quality basic education, focussing on the inclusion of girls), maternal and neonatal health (improving health services and health sector planning and policy making), community development through a social fund, support to elections reform, improved donor harmonisation and alignment, public financial management, and the

development of the new development plan for poverty reduction. DFID is also exploring options for working with the Yemen Government on improving access to justice for the poorest.

The Yemen Government have recently announced a package of reforms to improve governance, and DFID are supporting the development and implementation of these through all of our work, through our dialogue with Government, and through our funding.

DFID is drafting its country assistance plan for Yemen detailing our development strategy in the country over the next three years which will be published in September 2006.

Clean Water

12. **Dr. Vis:** To ask the Secretary of State for International Development if he will make a statement on the provision of clean water within development policy. [53970]

Mr. Thomas: DFID is committed to helping achieve the Millennium Development Goal (MDG) target of halving the proportion of people without access to safe water by 2015. Our programmes are focussed on sub-Saharan Africa and parts of Asia, where achieving the target will be most difficult.

Our strategy was set out in the 2004 DFID Water Action Plan, and updated in my World Water Day speech in March 2005. We publish regular updates of progress; these can be found on our website at: www.dfid.gov.uk. The last was in August 2005 and the next is due at the end of March 2006.

Pakistan

13. **Mrs. Cryer:** To ask the Secretary of State for International Development if he will make a statement on the reconstruction work in Pakistan following the earthquake. [53971]

Hilary Benn: The Government are doing everything possible to help Pakistan recover from the earthquake.

DFID is one of the largest bilateral donors for reconstruction, and we committed £70 million for reconstruction at the Donors' Conference last November. We are one of the "group of seven" large donors working collaboratively with the Government of Pakistan to help meet the challenge of recovering from the earthquake.

Middle East

14. **Rosie Cooper:** To ask the Secretary of State for International Development what alternative channels of funding to the Palestinians are being considered should Hamas refuse to renounce violence and recognise Israel. [53972]

Hilary Benn: The Government fully supports the statements by the Quartet and the European Union on 30 January. We support the Quartet in urging measures to facilitate the work of the current caretaker Government to stabilise public finances. Future assistance to any new Palestinian Government will be reviewed against that Government's commitment to the principles of non-violence, recognition of Israel, and acceptance of previous agreements and obligations, including the roadmap. Subject to that review it is too early to say what channels of funding to the Palestinians might be appropriate.

Africa

Mark Simmonds: To ask the Secretary of State for International Development what steps he is taking to reduce corruption in sub-Saharan Africa. [49080]

Hilary Benn: Corruption is both a symptom and a cause of poor governance. DFID supports a wide range of governance reforms to prevent, detect and take action against corruption. For example, DFID is helping countries to reform their judicial system in the Democratic Republic of Congo, Kenya, Malawi, Nigeria and Sierra Leone. DFID also supports public financial management reforms in Ghana, Kenya, Malawi, Mozambique, Rwanda, Sierra Leone, Tanzania, Uganda and Zambia. DFID also provides technical and financial support to dedicated anti-corruption commissions in Sierra Leone, Uganda, Nigeria and Zambia. DFID also helps civil society hold African governments to account for the proper use of public resources. For example, DFID supports the international NGO Transparency International and its country chapters.

In addition, African countries are working together to tackle corruption regionally as well as in their countries. For example, DFID is helping the East and Southern Africa Anti-Money Laundering Group (ESAAMLG) to build capacity in the region to prevent and detect money-laundering.

Both developed and developing countries must play their part to reduce corruption in Africa. In 2005 at Gleneagles, G8 countries committed to a set of actions at home to help stop corruption in Africa. DFID is working with other Government Departments to meet these commitments in the UK. For example, secondary legislation is now in place to enable the UK to ratify the UN convention against corruption, the first global anti-corruption standard. We expect to ratify imminently.

Burma

John Bercow: To ask the Secretary of State for International Development how much financial support the British Government have given to *(a)* the National Coalition Government of the Union of Burma, *(b)* the Federation of Trade Unions—Burma, *(c)* the Democratic Voice of Burma, *(d)* the Assistance Association for Political Prisoners and *(e)* the National Council for the Union of Burma in each of the past three years. [52207]

Mr. Thomas: The British Government have not provided financial support to any of these five organisations during the past three years.

John Bercow: To ask the Secretary of State for International Development how much of his Department's annual budget for Burma has been spent on consultants in each of the past three years; how much each consultant has received; and what projects each undertook. [52209]

Mr. Thomas: DFID's annual budget for Burma was:

	Amount (£)
2002-03	7,020,000
2003-04	3,720,000
2004-05	6,007,000

Between 2002 and 2004, DFID issued three contracts to the Institute for Health Sector Development to co-ordinate an HIV/AIDS national response. Expenditure was as follows:

		Amount (£)
a.	2002-03	71,943
b.	2003-04	110,763
c.	2004-05	Nil

John Bercow: To ask the Secretary of State for International Development what assessment the Government has made of whether the European Commission is abiding by the EU common position on Burma regarding humanitarian assistance. [52211]

Mr. Thomas: The Government have made no formal assessment. DFID officials maintain a regular dialogue with the European Commission in their drawing up of programmes for assistance to Burma. The Commission is fully aware of the need for these to be consistent with the Common Position.

John Bercow: To ask the Secretary of State for International Development what discretionary aid budget is available to the British ambassador to Burma. [52212]

Mr. Thomas: The British ambassador to Burma has the management of a discretionary aid budget covered by the small grants scheme (SGS). The 2005-06 financial year budget is £110,000 and will be used to fund civil society organisations working on sectors such as health, education, income generation and water.

John Bercow: To ask the Secretary of State for International Development how much the Government have spent on projects *(a)* promoting democracy and *(b)* supporting internally displaced people in Burma in the last five years. [52466]

Mr. Thomas: Support to increase prospects for a successful transition to a democratic society is one of the four objectives of DFID's country strategy for Burma and is core to all our work. While DFID does not fund projects which explicitly promote democracy, in all our programmes we constantly seek opportunities to strengthen local civil society, support poor people's participation in local decision making, build local accountability and transparency, address conflict and encourage discussion and debate, in order to increase the prospects for change.

DFID provides direct assistance to displaced people in Burma through support to ICRC's work with conflict affected populations. Since 2000 DFID has provided total funding of £2.3 million to ICRC (this also includes support for ICRC's prison visits). However, several other DFID funded projects, including through local NGOs, also include displaced populations among their recipients.

Vera Baird: To ask the Secretary of State for International Development how much the UK spent on supporting internally displaced people in Burma in 2004-05. [54446]

Mr. Thomas: It is not possible to specify how much DFID support to Burma was spent on internally displaced people during 2004-05. In the financial year 2004-05 DFID provided £0.5 million to International Committee of the Red Cross (ICRC), of which approximately 80 per cent. is attributable to work with conflict-affected populations. In addition, several other projects funded by DFID which provide assistance through local-level NGOs (for example, on health care) include an indeterminate percentage of displaced people among their recipients.

Angola

Mark Simmonds: To ask the Secretary of State for International Development whether British non-governmental organisations are working in the province of Cabinda; and if he will make a statement. [53859]

Hilary Benn: To our knowledge there are no British non-governmental organisations (NGOs) working in the province of Cabinda.

DFID's programme in Angola does however work quite closely with a wide range of NGOs across the different elements of our programme. For example, in our humanitarian activities we are supporting Medecins Sans Frontieres to improve primary and secondary healthcare services in Bie and Uige provinces (£547,850). To promote peace and democracy we have provided £765,812 to the Electoral Institute of Southern Africa (EISA) to educate citizens on their role in the electoral process. We fund the Luanda Urban Poverty Programme (LUPP), a coalition of local and international NGOs which works to reduce urban poverty (£8.9 million). On HIV and AIDS, we support programmes to raise awareness of HIV and AIDS, offer voluntary counselling and testing, and market condoms through the BBC World Service Trust, Medecins Sans Frontieres, Population Services International and GOAL (over £2.5 million). To ensure continued peace and stability in Angola we also support a number of peacebuilding projects through Christian Aid, the African Centre for the Constructive Resolution of Disputes (ACCORD) and the Centre for Common Ground, totalling over £2 million.

Mine action is still required in Angola and we currently support projects in partnership with Mines Advisory Group (MAG) and the HALO Trust. We are providing MAG with £1 million over the period 2005–07 for road and bridge demining in Mexico province and HALO Trust with £400,000 in 2005–06 for road clearance in Cuando Cubango province. Angola will remain a focus country for DFID mine action funding for the foreseeable future. We are working to strengthen Angolan Disabled People's Organisations through World Vision (£274,705).

NGOs have a vital role to play in the lead up to the elections planned for September 2006 and afterwards, both in terms of democratic development and in supporting the achievement of the Millennium Development Goals.

Mark Simmonds: To ask the Secretary of State for International Development whether UK *(a)* multilateral and *(b)* bilateral aid is spent in the province of Cabinda; and if he will make a statement. [53860]

Hilary Benn: UNICEF and the World Health Organisation both work in Cabinda. DFID supports this through our core contributions. As core resources are unearmarked it is not possible to assess the extent to which this expenditure can be attributed to DFID. No other multilateral, including the European Commission and the World Bank have programmes in Cabinda.

There is bilateral expenditure in Cabinda, through two channels. DFID provides additional bilateral support to UNICEF, which works in all 18 of Angola's provinces including Cabinda (over £4 million in the past three years). In 2005 UNICEF spent a total of $20 million in Angola, just over US$1 million was in Cabinda province, supporting education, health, and water and sanitation programmes. In addition DFID, together with the FCO and the MOD, is supporting peace building in Cabinda using funds from the Africa Conflict Prevention Pool (£40,000 this year). Young people representing civil society organisations in Cabinda are being given the opportunity to do work placements with human rights, democratisation or peace building organisations in South Africa. The intention is that the expertise obtained in these important areas will be reinvested in peace building efforts in Cabinda.

Climate Change

Mark Lazarowicz: To ask the Secretary of State for International Development what steps he is taking to ensure that his policies contribute to international efforts to tackle climate change. [53969]

Mr. Thomas: DFID takes the issue of climate change very seriously, not least because developing countries will be worst affected by it. We are helping developing countries collect data on the range and type of climate-related changes that are likely to take place in coming years. We are helping developing country planners to interpret that data, so that they can make informed decisions about how best to respond.

We are also working with others, in particular the World Bank and other multilateral development banks, to increase investment in lower carbon energy, so that we can make progress towards reducing the greenhouse gas emissions.

Departmental Projects

Mr. Sheerman: To ask the Secretary of State for International Development what assessment he has made of the environmental effects of projects supported through his Department. [53867]

Mr. Thomas: The Department for International Development (DFID) recognises that environmental assessment is critical to ensuring environmental sustainability in international development policy, planning and operations.

All DFID's development initiatives with a spend of more than £1 million are subject to environmental screening, which is also applied to projects of less than £1 million where there is a likelihood of significant environmental impacts. Where appropriate, screening is followed by a more comprehensive appraisal and assessment for policies, plans and programmes. The procedures, and guidance on the screening process, are detailed in DFID's Environment Guide (2003), which is available on the Department's public website www.dfid.gov.uk

Departmental Staff

Dr. Cable: To ask the Secretary of State for International Development how many people were employed by his Department in each of the last 12 months for which data is available; and how many and what percentage of posts were vacant in each region in each month. [51173]

Mr. Thomas: Staff numbers are collated on a quarterly basis, and the following data relating to UK based civil servants are taken from our official returns to the Cabinet Office during the last 12 months.

UK-based civil servants

Staff-in-post	*East Kilbride*	*London*	*Overseas*
31 March 2005	560	910	460
30 June 2005	550	920	440
30 September 2005	550	870	450
31 December 2005	560	860	450

The following data relates to staff appointed in our offices overseas on local terms and conditions of service. We are not required to publish these figures in civil service statistics.

SAIC

Staff-in-post	*Overseas*
31 March 2005	990
30 June 2005	960
30 September 2005	910
31 December 2005	920

While the number of unfilled posts can fluctuate over the year, we normally run with a vacancy rate of approximately 5 per cent. at any time.

Mike Penning: To ask the Secretary of State for International Development whether any *(a)* employee of his Department, *(b)* person engaged by his Department as a consultant and *(c)* paid advisor to his Department is a Member of the House of Lords; and if he will make a statement. [52893]

Mr. Thomas: No employee of or paid adviser to the Department for International Development is a Member of the House of Lords. DFID has no current high value consultancy contracts (over £100,000) with any Member of the House of Lords. Data on low value

consultancy contracts let by DFID Departments and overseas offices under delegated budgets is not held centrally. Our inquiries of delegated budget holders has identified only one such contract, in which the DFID Office in Malawi engaged a Member of the House of Lords as a consultant in 2006 to advise on penal reform.

Mr. David Hamilton: To ask the Secretary of State for International Development how many staff of his Department are employed by the Department in Scotland; and at which locations. [53035]

Mr. Thomas: The latest published return to the Office for National Statistics, for the quarter ending 31 December 2005, shows 558 staff based in DFID's Headquarters in East Kilbride.

Development (Remittances from Abroad)

Mr. Drew: To ask the Secretary of State for International Development what assessment he has made of the role of remittances from abroad in assisting development and poverty reduction; what studies he has commissioned on the impact of such remittances; and how such research has influenced aid strategies. [50044]

Mr. Thomas: DFID is active in assessing the role of remittances in development and poverty reduction, and uses the resulting findings to inform its aid programming.

In general, studies indicate that remittances reduce poverty in developing countries. For example:

Recent research from Guatemala and the Philippines show that remittances reduce the level, depth and severity of poverty. Households receiving remittances were found to spend around 50 percent. more than households with no remittances.

In Bangladesh, remittances from internal migration can represent the majority of household income. Households receiving remittances have higher nutritional and health status, higher levels of educational investment, and pools of money available for emergencies.

At the level of the economy, research suggests that remittances provide valuable foreign exchange for developing countries, and strengthen the balance of payments situation. Unlike other financial flows, remittances are counter cyclical, thus alleviating macroeconomic shocks. Remittances can also provide investment capital for economic activity, contributing to economic growth. Where remittance flows are saved rather than spent, they provide a higher deposit base for the banking system, which is necessary for economic growth.

DFID has funded a number of studies and also analyses relevant research by other organisations such as the World Bank. DFID funded a study in 2003 on remittances to developing countries in general which found a positive poverty reduction role for remittances. This finding was supported by DFID studies in 2004 and 2005 in Nigeria, Ghana and Bangladesh. DFID funded a household survey in the UK amongst the Bangladeshi community last year, which explored the impact on recipients of remittances to Bangladesh. DFID has recently commissioned a wider household survey to better understand the volume and value of remittance flows from key ethnic minority communities within the UK, and their impact on respective recipient countries.

DFID also funded a study to determine the contribution of UK based diasporas to development and poverty reduction. The study noted wider benefits from remittances and other forms of assistance from diasporas and migrant communities. These benefits were in the form of relief from war and disaster and in post war reconstruction (e.g. Somalia, Sri Lanka), and in education and health. .

DFID has used this research to design aid strategies in reducing barriers to remittance flows and further enhance their developmental impact. In particular, DFID has initiated remittance country partnerships programmes with Bangladesh, Nigeria and Ghana. These partnerships include work to extend access to remittances to poorer and more rural people, encourage greater competition and lower remittance prices, and improve data. This will be achieved by working with the private sector to extend access and outreach, and working with central banks and government, to address regulatory, data, competition and consumer issues.

In terms of work in the UK, DFID has recently set up a taskforce comprising of banks and money transfer companies, in order to lower remittance prices and improve the services they provide to low income migrants. The taskforce will implement recommendations from a public/private sector working group report that DFID launched late last year.

DFID has also initiated a website (www.sendmoneyhome.org) for those wishing to send remittances to developing countries from the UK. This provides easily available comparative information on remittance prices and providers. The aim is to improve choice and stimulate competition, leading to lower prices and a better service for low income migrants.

Drought/Food Security

John Bercow: To ask the Secretary of State for International Development what steps are being taken by his Department *(a)* to reduce the risks associated with drought and *(b)* to improve food security within the developing world. [52194]

Mr. Thomas: We will publish our Disaster Risk Reduction policy in March. We are committed to give greater priority to risk reduction measures. This can include, for example, supporting the development of drought resistant crops, improving water supply and reducing dependency on rain-fed agriculture.

In addition to providing support for food relief in life threatening situations, we are tackling chronic hunger by supporting the development of national safety nets that better deliver timely, adequate and guaranteed transfers of cash and/or food to the poorest. These programmes protect livelihoods and safeguard against destitution by helping people to keep their key assets—like land and livestock—through periods of hardship and crisis. For example, we have now provided a total of £43 million to Ethiopia's safety net. This has helped take five million people out of year-on-year emergency assistance.

We are also working with partners including the European Community and the United States to ensure that comprehensive food security strategies are

addressed in the poverty reduction strategies of various chronically food insecure countries in Africa including Ethiopia, Kenya, Zambia and Malawi.

Global Fund

Andrew George: To ask the Secretary of State for International Development what recent assessment he has made of the *(a)* amount and *(b)* proportion of the Global Fund to Fight AIDS, Tuberculosis and Malaria which has been employed (i) to advertise vacancies which arise, (ii) to appoint staff to manage its affairs, (iii) to employ external consultants and external companies to assist with its work, (iv) to promote and publicise its work and engage in public relations work and (v) on projects in developing countries. [53285]

Mr. Thomas: According to the financial data provided by the Global Fund Secretariat, total expenditure in 2005 was US$1.586 billion. Of this US$1.524 billion (or 96.1 percent.) was for grants to projects in developing countries, and US$62 million (or 3.9 percent.) was for operating expenses.

The total expenditure of US$1.586 billion comprised:

(i) US$0.4 million (or 0.03 percent.) for advertising vacancies of staff posts;

(ii)US$24.7 million (or 1.56 percent.) for staff costs;

(iii)US$23.9 million (or 1.5 percent) for external consultants and external companies to assist with the fund's work, of which US$19.2 million (or 1.2 percent.) was for in-country oversight services provided by "Local Fund Agents";

(iv) US$1.6 million (or 0.1 percent.) for communication services and materials including printing, translation, PR, photography and video production; (costs of staff engaged in these activities and included in (ii) above were US$0.9 million);

(v) US$1,524.0 million (or 96.1 percent.) for grants to projects in developing countries; and

the remaining US$11.4 million (or 0.7 percent.) was employed for office rent, utilities, supplies, equipment, travel and meetings.

The proportion of operating costs as a ratio of total expenditure fell in 2005 compared with 2004, from 4.9 per cent. to 3.9 per cent. The UK's line as a board member is that Secretariat costs should be kept to a level congruent with the Global Fund acting solely as a financing instrument.

Andrew George: To ask the Secretary of State for International Development what assessment he has made of whether the Global Fund to Fight AIDS, Tuberculosis and Malaria has an adequate complement of core staff to carry out its duties to donor and recipient countries. [53286]

Mr. Thomas: Core staff are needed to ensure the Global Fund to Fight AIDS, Tuberculosis and Malaria (GFATM) fulfils its mandate: raising money, disbursing funds and reporting to the board and other stakeholders on how that money has been used. In addition staff are required to ensure the Global Fund works effectively with others in tackling these three diseases.

Each year the Secretariat proposes appropriate numbers of staff to fulfil its duties. The Board's Finance and Audit Committee reviews this and makes a recommendation to the board. The UK's line as a board member is to ensure that staffing levels are fit for purpose.

In 2005 the Secretariat comprised 199 staff members including 150 fixed-term posts (contracts up to two years) and 49 short-term positions (contracts up to 11 months). The use of short-term contracts gives flexibility to adjust the numbers and skills mix of staff efficiently. At the twelfth meeting of the Global Fund's Board in December 2005, the Secretariat proposed an increase in staff numbers from 199 to 252 in 2006. The Secretariat argued that the Secretariat has been asked to devote more time to collaboration with partners at country and global levels, and that staffing levels were insufficient. After discussing whether savings could be made from more efficient processes, the board approved the proposed 2006 operating expense budget.

Mark Simmonds: To ask the Secretary of State for International Development how many *(a)* generic and *(b)* brand-name drugs have been approved for use in schemes financed by the Global Fund to Fight AIDS, Tuberculosis and Malaria; and if he will make a statement. [48947]

Mr. Thomas: The Global Fund to Fight AIDS, Tuberculosis and Malaria does not currently collect this data.

The Global Fund's procurement policy specifies that resources may be used to procure any medicines that appear in national or the World Health Organization standard treatment guidelines (STGs) or essential medicines lists (EMLs). Unlisted products may be procured only if the principal recipient of the grant states a specific rationale for doing so in its proposal to the Global Fund.

Uganda

John Bercow: To ask the Secretary of State for International Development what recent discussions he has had with the Government of Uganda regarding the conservation of Lake Victoria. [52196]

Hilary Benn: I have not had any such discussions, but the most important conservation issue that currently affects Lake Victoria is the rapid fall in water levels. This is in part due to an extended period of drought in the region. In addition, the release of water from Lake Victoria for power generation has recently been in excess of the amounts set out in a formula agreed with the Government of Egypt. The fall in the level of the lake has already had consequences for the agricultural sector and transportation.

The Government of Uganda have re-assessed the extraction of water from Lake Victoria for power generation. Although the country faces a serious energy shortfall, it has agreed with the Government of Egypt and with development partners in Kampala, including the UK, to revert to the agreed formula for the extraction of water immediately. However, lake levels will only begin to rise when the drought ends.

DFID has invested £5.75 million in the Nile Basin Initiative, which is a multi country agreement and programme to manage sustainably the resources of the greater Nile Basin, including Lake Victoria. DFID's support for this initiative is specifically helping to establish arrangements for improved management of water resources in all Uganda's lakes. A separate DFID project has helped Uganda's Department of Fisheries

improve the management of fisheries resources in Lake Victoria. DFID is helping the government develop an environmental and natural resources sector investment plan which includes the protection of wetlands around the shores of Lake Victoria and the regulation of the discharge of pollutants.

Mozambique

Dr. Francis: To ask the Secretary of State for International Development if he will make a statement on his Department's activities in Mozambique. [53714]

Hilary Benn: DFID is the largest bilateral donor in Mozambique. Our aid framework for 2005-06 is £55 million, two thirds of which is provided as Poverty Reduction Poverty Support used to fund Government of Mozambique priorities as set out in the PARPA (Mozambique's Poverty Reduction Strategy). In addition, DFID has a large sectoral programme in the areas of health, education, infrastructure and HIV and AIDS. We also fund key central reform processes, including public financial management and public sector reform, and have a number a programmes with civil society. More information about DFID's programme in Mozambique is available on DFID's website at http://www.dfid.gov.uk/countries/africa/mozambique.asp

Namibia

Dr. Francis: To ask the Secretary of State for International Development if he will make a statement on his Department's activities in Namibia. [53712]

Hilary Benn: The focus of DFID's bilateral programme in Namibia has been on developing livelihoods for the poor in the centre and north of the country. In the past five years DFID's Namibia programme in 2004-05 was £1.2 million.

The UK also supports development programmes in Namibia through multilateral bodies, in particular through our contribution to the European Commission (EC) of which our share of total assistance to Namibia is 14 per cent.

DFID also supports a wide range of HIV prevention and care initiatives in Namibia through the Southern Africa Development Community (SADC). This programme operates in Botswana, Swaziland, Namibia and Lesotho. Namibia should also benefit from a current pipeline programme with UNICEF, which will focus on the care and support of orphans and vulnerable children. This £18 million/three year programme will operate in Angola, Lesotho, Botswana, Namibia, South Africa and Swaziland.

There are several other regional programmes outlined in DFID's Regional Plan for Southern Africa that may benefit Namibia. The priority areas identified in the Plan are peace and security, resilient livelihoods and growth, jobs and equity. The Plan will be launched on 28 February 2006.

Pension Liabilities

Mr. Philip Hammond: To ask the Secretary of State for International Development if he will estimate the net present value of accrued pension liabilities in respect of *(a)* present and *(b)* former employees of his Department and its predecessor. [52111]

Mr. Thomas: The Principal Civil Service Pension Scheme is an unfunded multi-employer defined benefit scheme and individual departments' pension liabilities are not available. The Cabinet Office: Civil Superannuation Resource Accounts for 2004-05 showed that the total pension liability at 31 March 2005 was £84.1 billion. The value of pension liabilities was assessed as follows:

	£ billion
Liabilities for current members still contributing to the scheme	37
Deferred pensions and contingent pensions for dependants in respect of members no longer contributing	12.7
Current pensions for members and contingent pensions for dependants	34.4

As a result of a change in the discount rate used for calculating pension liabilities with effect from 1 April 2005, the total pension liability at 1 April 2005 increased by £10.6 billion to £94.7 billion.

Relief Aid

Keith Vaz: To ask the Secretary of State for International Development what factors his Department takes into account when deciding how much relief aid is offered to disaster areas; and if he will make a statement. [52705]

Mr. Thomas: DFID responds to emergencies based on an analysis of humanitarian need. At the onset of a disaster, DFID seeks information from humanitarian agencies and contacts on the ground to establish the extent of humanitarian need. DFID may also send its own assessment personnel to affected areas. The decision to respond and the scale of DFID's response is weighed up against a number of considerations: the extent of unmet needs, the coping capacity of affected countries, the response of other donors and the value that a DFID response could add to the overall effort.

Renewable Energy

Mr. Sheerman: To ask the Secretary of State for International Development what steps have been taken by his Department to support renewable energy projects in developing countries. [53868]

Mr. Thomas: Improved access to affordable and reliable energy supplies and services is essential for developing countries to increase their economic growth and achieve the UN millennium development goals.

We welcomed the decision in 2004 by the World Bank Group to increase its annual lending for renewable energy and energy efficiency by an average of 20 per cent. per year, over the five years to 2010. The World Bank is scaling up its financial support for renewable energy and energy efficiency and announced in December 2005 a rise to $299 million for the year to June 2005, compared to an average of $209 million per annum over the previous three years. These figures

exclude large hydropower projects and exceed their commitment. We are working with the Bank to see if a higher level of such investments can be achieved.

DFID has provided £10 million for energy research projects, mostly over the past eight years, of which about £3.6 million was spent on the development and promotion of renewable energy, especially for rural communities. This has included a wide range of technologies such as wind, small hydropower, solar and biomass.

DFID is working with international networks such as the global village energy partnership (GVEP) and the EU energy initiative (EUEI) to promote access to affordable energy services, drawing on the full menu of technology options, including renewable energy.

We have supported the creation of a new €220 million EU energy facility, which will invite calls for proposals later this year. This grant fund aims to improve access to reliable and affordable energy, especially in Africa, and is encouraging viable renewable energy proposals.

Solomon Islands

Andrew Mackinlay: To ask the Secretary of State for International Development if he will make a statement on his Department's *(a)* work and *(b)* expenditure in the Solomon Islands. [54277]

Mr. Thomas: DFID no longer has direct bilateral programmes in the Pacific, but our high commissions administer a Small Grants Scheme. This has provided nearly £100,000 for projects in the Solomon Islands in the last two years. DFID continues to provide assistance to the Solomon Islands through the EC. The UK also contributes significant indirect funding to the region through the World Bank, Asian Development Bank and United Nations agencies.

The 9th European development fund (EDF) covering the period 2003-09, has an allocation to the Solomon Islands of €21.15 million or £13.8 million; the UK share of this is some £1.75 million. The focus of the 9th EDF is sustainable rural development and community development, with a micro-projects programme and a capacity building and institutional strengthening programme as key elements. The EDF also provides resources under the STABEX mechanism, which provides compensation for adverse fluctuations in earnings from agricultural and mineral commodities. These have been allocated to education, transport, agriculture, forestry and rural development.

United Nations Population Fund

Mr. Amess: To ask the Secretary of State for International Development what representations *(a)* Ministers and *(b)* officials have made about the decision of the Bush Administration not to fund the United Nations Population Fund; and if he will make a statement. [52536]

Mr. Thomas: There have been no representations directly by DFID Ministers or officials to the United States in response to the decision by the Bush Administration in July 2002 to withhold $34 million funding from the United Nations Population Fund (UNFPA) based on claims that the fund supported coercive abortion in China.

At the Executive Board in September that year several other donors including the UK announced support for UNFPA, and signalled an increase in their contribution to UNFPA. The UK is providing £80 million core support to UNFPA over its four year funding framework from 2004-05 to 2007-08. We reiterated our support for UNFPA at the Executive Boards in June 2005 and January 2006 when the UK said

> "let us state unequivocally that in our view, UNFPA's activities in China, as in the rest of the world, are in strict conformity with the unanimously adopted Programme of Action of the International Committee on Population and Development (ICPD)".

A State Department team that investigated UNFPA-supported projects in China submitted a report in May 2002, explaining they found no evidence that UNFPA had knowingly supported or participated in the management of a programme of coercive abortion or involuntary sterilisation in the People's Republic of China. UNFPA has also publicly stated that it has never, and will never, be involved in coercion in China or any part of the world. The Fund is a staunch supporter, and promoter, of the human rights-based approach to family planning.

In the same year DFID supported a study tour for three UK MP's to visit China to study its population and reproductive health policies and UNFPA's work in China. The team was made up of my hon. Friend the Member for Calder Valley (Chris McCafferty), the hon. Member for Gainsborough (Mr. Leigh) and the hon. Member for North Norfolk (Norman Lamb). Their report concluded that UNFPA was a force for good, and a copy was placed in the Library of the House.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Burma

John Bercow: To ask the Secretary of State for Environment, Food and Rural Affairs what advice her Department has given to the Heritage Lottery Fund regarding sourcing timber from Burma. [52218]

Mr. Morley: The Department has published general guidance on procuring timber from legal and sustainable sources and this has been drawn to the attention of the Heritage Lottery Fund. This general guidance makes no specific mention of Burma.

The Heritage Lottery Fund did receive an inquiry, from a trade journal, related to Burmese teak. The Central Point of Expertise on Timber (CPET), a helpline service set up by my Department, advised the Heritage Lottery Fund not to approve any timber that did not meet the Government's criteria for legality. CPET further advised that it was not then possible to say how a particular source of timber would match up against the Government's requirements until a suppler submitted specific evidence for assessment.

Carbon Emissions

Greg Clark: To ask the Secretary of State for Environment, Food and Rural Affairs what information the Government publish on carbon dioxide emissions from each type of fuel; and what emission factors are used to calculate these figures. [53750]

Mr. Morley *[holding answer 27 February 2006]:* The most recent estimates of carbon dioxide emissions by type of fuel are published in Defra's statistics Digest in table 5: Estimated emissions of carbon dioxide (CO_2) by UNECE source category, type of fuel and end user: 1970-2003 (http://www.defra.gov.uk/environment/statistics/globatmos/download/xls/gatb05.xls). These data will shortly be updated to contain the emissions from the 2004 greenhouse gas inventory.

Emissions data aggregated according to fuel type are also published annually under contract to Defra in the Common Reporting Format (CRF) tables of the UK's greenhouse gas inventory. Tables1.A(a)s1 to Tables1.A(a)s4 provide sectoral background data for energy from Fuel Combustion Activities—emissions according to the Intergovernmental Panel on Climate Change (IPPC) fuel class are listed. These can be found at the National Atmospheric Emissions Inventory (NAEI) website: http://www.naei.org.uk/report_link.php?report_id=317.

Carbon emission factors used in the UK greenhouse gas inventory are also accessible through the NAEI website and are directly available via http://www.airquality.co.uk/archive/reports/cat07/0509161441_energy_background_data_uk_2005_v1.1.xls.

Greg Clark: To ask the Secretary of State for Environment, Food and Rural Affairs how much *(a)* shipping fuel and *(b)* aviation fuel included in table 1.1 of the Digest of United Kingdom Energy Statistics is excluded from the calculation of UK carbon dioxide emissions. [53751]

Mr. Morley *[holding answer 27 February 2006]:* The following table shows the estimate of fuel consumption in million tonnes, from both domestic and international shipping and aviation for 2004, the latest year for which carbon dioxide calculations for the UK greenhouse gas inventory are available. Under internationally agreed guidance, emissions from international shipping and international aviation are not included in the greenhouse gas inventory; this amounts to 1.83 million tonnes of fuel from international shipping and 10.52 million tonnes of fuel from international aviation being excluded.

Fuel consumption (million tonnes)

	Activity	
	Shipping	*Aviation*
International	1.83	10.52
UK domestic	1.36	1.40
Total	3.20	11.91

Note that the estimates of international and UK domestic fuels do not add to the total estimate of fuels due to rounding.

The data are derived from table 3.4 of the Digest of United Kingdom Energy Statistics which presents details on the supply and demand of petroleum products according to fuel type, rather than from the more aggregate table 1.1.

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the carbon emissions resulting from *(a)* the generation of heating for buildings and *(b)* the powering of air conditioning in buildings in a town of average size. [52582]

Mr. Morley: An estimate of annual carbon emissions for the town of Swindon in 2003 due to the generation of heating for buildings is 81 thousand tonnes of carbon (ktC/yr). For powering of air conditioning in buildings the corresponding estimate is 3.6 ktC/yr.

These estimates are based on national models of energy use in the non-domestic building stock developed by the Building Research Establishment under contract to Defra.

Gregory Barker: To ask the Secretary of State for Environment, Food and Rural Affairs what the percentage contribution of *(a)* non dwelling buildings and *(b)* dwellings to the UK's total annual carbon emissions was in each year between 1997 and 2005. [54066]

Mr. Morley: The following table shows carbon emissions for non-domestic buildings and for housing as a percentage of total UK carbon emissions for the years 1997 to 2004, the latest year for which data are available.

	Carbon emissions from non-domestic buildings as a percentage of total UK carbon emissions	*Carbon emissions from housing as a percentage of total UK carbon emissions*
1997	13.8	25.2
1998	13.5	25.8
1999	13.2	25.4
2000	13.5	25.8
2001	14.0	26.6
2002	13.1	26.6
2003	13.2	26.5
2004	13.3	26.5

The figures are based on the Digest of UK Energy Statistics energy consumption data and estimates of energy use in building stock by the Building Research Establishment under contract to Defra.

Chinese Mitten Crabs

Dr. Kumar: To ask the Secretary of State for Environment, Food and Rural Affairs what her Department's assessment is of the potential impact of the influx of Chinese mitten crabs in British waterways on the environment; and what plans her Department has to tackle the problem. [53531]

Jim Knight: The Chinese mitten crab has been recorded along the east coast of Britain, including the River Thames, the Thames estuary, and the Humber, Medway, Tyne, Wharfe and Ouse rivers.

Where this species has become established it has displaced crayfish and other native crabs. It has damaged estuary banks by burrowing, and it can cause erosion of soft sediment banks. This could create future problems for our flood defences.

English Nature, Scottish Natural Heritage, the Scottish Association of Marine Sciences (SAMS), the Marine Biological Association of the UK, the Joint Nature Conservation Committee, and the Natural History museum are working to investigate the ecological impacts of this species, and any appropriate control methods.

The Natural History museum is taking forward additional work on UK distribution, case studies to inform a UK action plan, and disseminating information more widely.

Climate Change

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the quantification of the relationship between global dimming and the measureable effect of climate change; and if she will make a statement. [52580]

Mr. Morley: It is not possible at this stage to quantify with accuracy the relationship between global dimming and climate change because of the large uncertainty in the magnitude of the cooling effect of sulphate aerosols, the main contributor to global dimming.

A recent study funded by the Department, which was published in the journal *Nature* last December, suggested that the cooling effect of anthropogenic aerosols could be larger than previously estimated. If confirmed, these results suggest the likelihood of a larger impact of increasing CO_2 emissions on the climate system, adding urgency to our need to cut greenhouse gas emissions.

Estimating the size of the cooling resulting from aerosols is an ongoing and crucial research activity. The Department continues to fund research in order to determine the size of the aerosols' cooling effect and what overall implications there are for forecasts of future global warming.

Peter Law: To ask the Secretary of State for Environment, Food and Rural Affairs what factors have affected the timescale for publication of the revised climate change strategy. [50220]

Mr. Morley: The timetable for publication of the revised UK Climate Change Programme has been extended to allow us to take full account of the outcome of a number of other pieces of ongoing work including the energy efficiency innovation review and gives us more time to take forward commitments made in the 2005 pre-Budget report.

The revised timetable also fits more closely with the timetable for developing phase II of the EU emissions trading scheme enabling us to take into greater consideration the level of the cap for the second phase of the EU ETS which is occurring in parallel to the Climate Change Programme Review.

Correspondence

Clare Short: To ask the Secretary of State for Environment, Food and Rural Affairs when the Minister of State for Climate Change will reply to the letter of 11 January from the right hon. Member for Birmingham, Ladywood, on behalf of Ladywood Furniture Project. [51723]

Mr. Morley: I apologise for the delay in replying to my right hon. Friend's letter. A response will be issued shortly.

Energy Efficiency

Sir Robert Smith: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the cost per kilowatt hour to energy suppliers relating to the Energy Efficiency Commitment scheme. [51400]

Mr. Morley: In addition to Defra's own current analysis of carbon savings and costs and benefits, we have recently commissioned an independent consultant to evaluate the Energy Efficiency Commitment 2002–05. Preliminary results show that the cost effectiveness from a supplier's perspective was about 0.7 pence per fuel-standardised lifetime-discounted kilowatt hour of saved energy including indirect costs, or 0.5 pence per fuel-standardised lifetime-discounted kilowatt hour excluding indirect costs. It is estimated that for every £1 spent by the energy suppliers, householders have benefited by over £9 from energy efficiency improvements in terms of reduced bills and increased comfort. More details will become available when both evaluations are published shortly.

English Nature

Mr. Stewart Jackson: To ask the Secretary of State for Environment, Food and Rural Affairs what the current staffing establishment is at English Nature in Peterborough; and what projected staffing numbers are over the next five years. [54354]

Jim Knight: There are currently 397 English Nature staff based in Peterborough (including 23 in the area team for Bedfordshire and Cambridgeshire).

From October 2006 (subject to the Natural Environment and Rural Communities Bill passing successfully through Parliament) English Nature, the environment activities of the Rural Development Service and the Countryside Agency's Landscape, Access and Recreation division will come together to form Natural England. It is anticipated that Natural England will have an office in Peterborough, the number of staff based there will be a matter for the board of Natural England.

Fuel Poverty

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs whether the Government are on course to meet its fuel poverty commitments in 2010; and if she will make a statement. [53227]

Mr. Morley: Substantial progress has been made towards achieving our target of eradicating fuel poverty in vulnerable households in England, as far as reasonably practicable, by 2010. The number of vulnerable households in fuel poverty in England fell from four million in 1996 to one million in 2003, a decrease that was due to increasing household incomes, lower fuel prices and increased domestic energy efficiency.

However, recent rises in energy prices will have had an adverse affect on progress. We are continuing to analyse the impact of these rises and the implications for the level of resource that will be necessary to meet our target. This process will continue over the period of the Energy Review, which is due to conclude later this year.

The Government remains committed to achieving our targets. To underline this commitment, it was announced in the 2005 pre-Budget report that an additional £300 million would be made available to tackle fuel poverty across the UK over the 2005–08 period. In England, this means that total fuel poverty funding over the same period will exceed £800 million.

Ministerial Travel

Mr. Peter Ainsworth: To ask the Secretary of State for Environment, Food and Rural Affairs if she will list the occasions on which *(a)* she has and *(b)* each of her Ministers have visited (i) Brussels and (ii) Paris in the last two years; and what the (A) purpose and (B) means of transport to and from the United Kingdom was on each occasion. [45877]

Margaret Beckett: *[holding answer 26 January 2006]:* Since 1999 the Government have published an annual list of Cabinet Ministers' visits overseas costing more than £500. The list provides details of the date, destination, purpose and costs of individual visits made by Cabinet Ministers.

Information relating to the period 2003–04 and 2004–05 is available in the Library of the House. Information for the year 2005–06 will be published as soon as it is ready after the end of the financial year.

DEFRA Ministers visited Brussels and Paris on the following occasions in 2004–05:

Elliot Morley

Date	*Destination*	*Propose of visit*	*Transport*
2 March 2004	Brussels	Environment Council	RAF/Scheduled flight
19–20 April 2004	Paris	OECD Three Year Meeting of Environment Ministers	Eurostar

National Parks

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to increase the *(a)* number and *(b)* area of National Parks. [54539]

Jim Knight: The eight National Parks in England, together with the Norfolk and Suffolk Broads (the Broads) cover around 8 per cent. of the English landscape.

Government expects to receive shortly the Inspector's report of the inquiry which has been held into the possibility of creating a new national park in the South Downs.

Oil Storage Regulations

Colin Challen: To ask the Secretary of State for Environment, Food and Rural Affairs if she will amend the Control of Pollution (Oil Storage) (England) Regulations 2001 to provide for the requirements contained therein to be made equivalent to the requirements contained in the draft Water Environment Oil Storage (Scotland) Regulations 2006. [52264]

Mr. Morley: The Control of Pollution (Oil Storage) (England) Regulations 2001 had a four-year phased implementation period and came fully into effect on 1 September 2005. The drafting of similar regulations for Scotland has drawn upon the experience in England and sought to simplify and improve the requirements for oil storage.

The aim of both sets of regulations is to reduce the number of oil pollution incidents. When information on the number of oil pollution incidents in England and their causes, following full implementation of the regulations, becomes available in 2007, the Environment Agency will undertake a review of the effectiveness of the 2001 regulations. That review will also take into account the approach adopted in drafting the Scottish regulations.

Population Increase Impacts

Mr. Chope: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment her Department has made of the impact of the projected increases in the population of England upon *(a)* water resources, *(b)* the countryside and *(c)* the environment. [50792]

Mr. Morley *[holding answer 13 February 2006]:* In England and Wales, water resources are the responsibility of the Environment Agency, which produced in 2001 "Water Resources for the Future". This strategy document considers four different future scenarios for water use, based on the "Environmental Futures' framework from the DTI's Foresight programme. Annual updates to the strategy keep it up-to-date. For example, the 2004 update draws from water company projections of water use that take account of population increase. Water Resources for the Future also considers demand from increased housing, which is to some extent associated with population increase. Increases in housing might also be expected to impact on rural areas and the environment. In 2004 Defra published the Entec report, "Study into the Environmental Impacts of Increasing the Supply of Housing in the UK", which was partly driven by anticipated population increase. The ODPM also have an interest in housing supply increases, through their work on buildings and sustainable communities. Defra's Horizon Scanning and Futures team is currently preparing the groundwork for a study on the environmental impacts of increasing population. T his work will look at impacts on both urban and rural environments. Other elements of Defra's work include human population growth as a component: for example, population increase is factored into our air quality and emission projections.

Warm Front Scheme

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs how many households have received funding from the Warm Front scheme since 2000. [53222]

Mr. Morley: Between the launch of the Warm Front scheme in June 2000 and the end of December 2005, the number of households assisted by the Warm Front scheme is 1.1 million.

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs how many households which have received funding from the Warm Front scheme since 2000 were classed as fuel poor. [53223]

Mr. Morley: We do not collect specific data on the fuel poverty status of Warm Front recipients. The eligibility criteria for Warm Front are specifically designed to use

receipt of one of a number of qualifying benefits as an indication that a particular householder may be vulnerable and so at risk of fuel poverty.

Households not in receipt of a qualifying benefit at the time of application are offered a benefit entitlement check, which is designed to provide both the potential of increasing household income and to establish eligibility of households to benefit from measures under Warm Front.

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what average reductions in energy bills there have been in households which have received funding from Warm Front. [53224]

Mr. Morley: The average yearly saving for homes assisted by Warm Front is around £147.

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs how many homes assessed under Warm Front received a benefits entitlement assessment in each year since 2000; and how many followed up their check and claimed benefits.[53225]

Mr. Morley: Benefit entitlement checks (BECs) were introduced as part of the Warm Front scheme in October 2003.

The Warm Front scheme offers these checks to potential customers to establish if they could be eligible for a Warm Front grant through receipt of a qualifying benefit they do not currently claim.

Details of the number of checks offered and those applicants later returning to receive assistance from the scheme are shown in the following table:

	Number of benefit entitlement checks offered	*Number of benefit entitlement checks completed*	*Number of checks resulting in identification of Warm Front qualifying benefits*	*Number of applicants who applied to Warm Front after a successful benefit entitlement check*
2003–04 (from October 2003)	2,725	2,253	900	593
2004–05	38,649	17,097	5,175	2,213
2005–06[1] (to 31 January 2006)	47,881	17,072	5,788	2,540
Total	89,255	36,422	11,863	5,346

[1] The figures for the current year include checks offered to those households where measures installed did not raise the energy efficiency rating of the property to a level above SAP 65. These checks have been offered since June 2005.

It is recognised that, some applicants who complete a BEG may go on to claim a benefit but not apply to the scheme. Warm Front do not collect data on such circumstances .

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make an assessment of the effectiveness of the Warm Front scheme with reference to recent energy price rises; and if she will make a statement. [53226]

Mr. Morley: Recent energy price rises pose several considerable challenges for our fuel poverty targets. The Government remains committed to achieving these targets.

There are a range of schemes and policies in place that will help to tackle fuel poverty. To strengthen our ability in this regard, it was announced in the 2005 pre-Budget report that an additional £300 million would be made available to tackle fuel poverty across the UK over the 2005-08 period.

The Warm Front scheme was revised last year to provide a wider range of assistance to those households at risk of fuel poverty and so raise the energy efficiency of those properties to a level at which there will be minimal risk of fuel poverty.

Water Efficiency

Mr. Hollobone: To ask the Secretary of State for Environment, Food and Rural Affairs what discussions she has had with the Office of Water Services on linking a reduced-rate water supply and sewerage infrastructure charge to water efficiency measures. [53836]

Mr. Morley *[holding answer 27 February 2006]:* The Water Saving Group was set up so that for the first time all of the main water industry stakeholders could work together in practical ways to promote the efficient use of water in households. It is the first Government-led high level group of its kind promoting collaborative work on water efficiency. Its action plan, agreed at the first meeting last October, includes a workstream which is looking at developing incentives for companies to improve the promotion of water efficiency.

Ofwat is leading this work. One of the options that it is considering is investigating the feasibility of using differential infrastructure charges, to encourage developers to install water efficient appliances in new developments. It will report on all of the options it has developed at the next meeting of the Water Saving Group in May.

Water Shortages

Gregory Barker: To ask the Secretary of State for Environment, Food and Rural Affairs what plans her Department has to tackle water shortages in the South East *(a)* during 2006 and *(b)* over the next 10 years. [53602]

Mr. Morley: Any projected shortage in water supply this year will be addressed though the relevant water company's drought plan. Drought plans contain mechanisms which trigger a range of actions to be initiated at different times as a drought develops. One of the actions may involve applying to my Department for drought orders in order to restrict non-essential uses of water.

For longer term planning water companies maintain 25 year water resource plans which seek to reconcile supply with anticipated demand. These water resource plans are produced voluntarily every five years at present but will become a statutory requirement under the provisions of the Water Act 2003. My Department is currently consulting on the exercise of the new powers in respect of statutory water resource plans.

Gregory Barker: To ask the Secretary of State for Environment, Food and Rural Affairs what representations she has received regarding water shortages in the south-east; and if she will make a statement. [53622]

Mr. Morley *[holding answer 28 February 2006]:* We have received a number of representations about the implications for water supply of the continuing drought in the south-east. The Environment Agency has produced a "Drought prospects 2006", explaining the likely consequences of a continuing rainfall deficit and recommending action by water companies and the public. This report is available on request from the agency (telephone 0207 863 8710) or from its website www.environment-agency.gov.uk.

TREASURY

Child Trust Fund

Alistair Burt: To ask the Chancellor of the Exchequer how many claims for the Child Trust Fund have been received from parents after the death of a newly born child. [54562]

Mr. Ivan Lewis: 1,004 requests for payment of the Child Trust Fund in child death cases have been received.

Deregulation

Mr. Hayes: To ask the Chancellor of the Exchequer if he will make a statement on the UK share of assessed gains to be made through deregulation as set out in the European Commission's annual report on competitiveness. [53221]

Barry Gardiner: I have been asked to reply.

The Government support the view that lower regulatory burdens help deliver growth.

The estimates in the Commission's 2004 Competitiveness Report relate to the euro zone. However, a recent study by the OECD shows that lower levels of regulation have contributed to accelerated growth in the UK by stimulating business investment and promoting innovation and technological catch up.

OECD data also shows that the UK is the second least restrictive OECD country, only marginally behind Australia, in terms of economic and administrative regulation.

The Government have launched one of the most radical reform programmes in the world to ensure administrative and other burdens arising from regulations are minimised. At the EU level, we are working hard with the EU Institutions and member states to deliver better regulation as a driver for economic reform.

Insurance Premium Tax

Gregory Barker: To ask the Chancellor of the Exchequer (1) what plans he has to prosecute companies being investigated for underpayment of insurance premium tax; and if he will make a statement; [54176]

(2) how many companies are being investigated for underpayment of insurance premium tax; and if he will make a statement. [54177]

Mr. Ivan Lewis: The accuracy of insurance premium tax declarations are routinely assured as part of HM Revenue and Customs' (HMRC) risk based compliance strategy. In cases of underpayment and evasion HMRC have a number of measures available to them including the use of financial penalties and criminal prosecution.

Gregory Barker: To ask the Chancellor of the Exchequer pursuant to his answer of 9 February 2006, *Official Report*, column 1395W, whether the insurance companies to which he refers are authorised by the Financial Services Authority; and how many insurance companies were involved. [54314]

Mr. Ivan Lewis: All UK insurance companies are authorised by the Financial Services Authority.

The investigation of the allegations to which I referred in my reply did not uncover the underpayment of insurance premium tax by any insurance companies.

Legal Services Commission

Dr. Cable: To ask the Chancellor of the Exchequer what assessment he has made of the implications for the Government's financial inclusion strategy of the decision by the Legal Services Commission to withdraw funding for specialist support and advice on debt; and if he will make a statement. [54717]

Mr. Ivan Lewis: As part of the Government's strategy to tackle financial exclusion it has established a Financial Inclusion Fund of £120 million. It was announced in June 2005 that £45 million of this fund has been allocated to DTI to increase the provision of face-to-face debt advice and £6 million to the Legal Services Commission to pilot mechanisms of debt advice outreach for those who do not normally present themselves to debt advisers.

Tax Credits

Mr. Hepburn: To ask the Chancellor of the Exchequer (1) how many recipients of tax credits in *(a)* the Jarrow constituency, *(b)* South Tyneside, *(c)* Tyne and Wear, *(d)* the North East and *(e)* the UK are involved in disputes relating to overpayment of benefit; [51945]

(2) how many people in *(a)* the Jarrow constituency, *(b)* South Tyneside, *(c)* Tyne and Wear, *(d)* the North East and *(e)* the UK receiving tax credits have been involved in disputes relating to overpayment of benefit in each year since their inception; and how many of these disputes have been resolved. [51946]

Mr. Frank Field: To ask the Chancellor of the Exchequer (1) how many completed TC846 forms have been received by HM Revenue and Customs requesting that it reconsider its decision to recover an overpayment of tax credits in each month since April 2003; and in what proportion of these requests the decision has been taken by HM Revenue and Customs to write off the overpayment. [54162]

Dawn Primarolo: Information about disputes relating to overpayments of tax credits is not available at constituency level.

For information about disputed tax credits overpayments to November 2005, I refer the hon. Member to the answers I gave the hon. Member for Yeovil (Mr. Laws) on 19 January 2006, *Official Report*, columns 1496-97W and on 6 July 2005, *Official Report*, column 437W.

There were around 23,500 disputed tax credit overpayments received in December 2005 and around 28,000 in January 2006. The number of overpayments successfully disputed, that is, where the overpayment was written off in full or in part, was around 1,500 in December 2005 and around 2,500 in January 2006. The figures for overpayments written off do not directly relate to those that were received in the same month.

Terrorist Groups (Financial Assets)

Mr. Hoban: To ask the Chancellor of the Exchequer what the total value was of *(a)* financial assets and *(b)* non-financial assets of (i) Northern Ireland terrorist, (ii) fundamentalist Islamic, (iii) Basque separatist and (iv) other organisations, broken down by cause frozen by the Treasury in each year since 1997. [54754]

Mr. Ivan Lewis: Assets with a total value of nearly £80 million have been frozen in the UK, as associated with Al-Qa'ida, the Taliban or other terrorist causes, although a large proportion was returned to the Government of Afghanistan. The legislation does not permit us to publish the analysis at the level of detail requested.

163 organisations have been designated under the Terrorism Order 2001 and the Al-Qa'ida and Taliban Order 2002. Of these, we judge six are Northern Ireland terrorist groups, 140 are Islamic and one is Basque. A consolidated list of individuals and entities subject to UK financial sanctions is available from the Bank of England website at http://www.bankofengland.co.uk/publications/financialsanctions/current/index.htm

Freezing action also prevents the flow of funds to listed individuals and entities. Asset freezing is part of the Government's overall strategy to create a hostile environment for terrorism and safeguard financial systems. A value cannot easily be put on those wider effects.

VAT

Mr. Weir: To ask the Chancellor of the Exchequer (1) pursuant to his answer of 20 December 2005, *Official Report*, column 2808W, on VAT, how much has been paid in each parliamentary constituency under the grant schemes; [48231]

(2) pursuant to his answer of 20 December 2005, *Official Report*, column 2808W, on VAT, which grant schemes are available to those *(a)* over 60 years and *(b)* on specified benefits; [48232]

(3) pursuant to his answer of 20 December 2005, *Official Report*, column 2808W, on VAT, how many successful applications there have been for each of the grant schemes, broken down by parliamentary constituency. [48233]

Dawn Primarolo: The reduced rate of VAT applies to the installation of security goods, such as locks, bolts, security chains and spy holes for people aged 60 or over, and for those in receipt of certain benefits, allowances or tax credits, when the work is funded by a public grant scheme which has as one of its objectives the funding of the installation of energy-saving materials in the homes of those persons.

These grant schemes may be funded by the UK Government, the devolved administrations, the European Community, a local authority, or under any arrangement approved by the Gas and Electricity Markets Authority or the director general of electricity supply for Northern Ireland. HM Revenue and Customs and the Treasury do not operate any such grant scheme or collect any data relating to applications or payments made under the various eligible grant schemes.

TRANSPORT

A3 (Hindhead)

Mr. Hancock: To ask the Secretary of State for Transport what his timetable is for making a decision on the proposals for a twin tunnel at Hindhead on the A3; and if he will make a statement. [55537]

Dr. Ladyman: We are currently considering the Inspector's report into the A3 at Hindhead following the public inquiry which was held last year. We are also considering the South East region's advice on the priority it attaches to this scheme within the indicative funding allocation for major transport schemes in the South East. An announcement on the way forward will be made later in the year.

British Transport Police

Mr. Dismore: To ask the Secretary of State for Transport if he will take steps to enable the merger of the British Transport Police operating within London with the Metropolitan Police Service; and if he will make a statement. [53507]

Derek Twigg: My right hon. Friend informed the House on 14 February 2006 that, pursuant to his statement to the House laid on 11 October 2005, the Department is undertaking a review of the British Transport Police and will announce its conclusions in due course.

Bus Travel Concessions

Rosie Cooper: To ask the Secretary of State for Transport (1) how much funding the Government are providing to Lancashire county council to provide free bus travel for *(a)* older and *(b)* disabled persons in West Lancashire; [53387]

(2) what estimate he has made of the funding required to fund free off-peak travel for *(a)* older and *(b)* disabled persons on buses in West Lancashire. [53388]

Ms Buck: The Government are providing an extra £350 million for 2006-07 through the Formula Grant system. There is general agreement that there is enough

additional money overall for the local authorities. The extra funding is unhypothecated; therefore the funding for concessionary fares it is not separately identified.

Departmental Estate

Mr. Lancaster: To ask the Secretary of State for Transport what *(a)* land and *(b)* property his Department owns in the North East Milton Keynes constituency. [53183]

Ms Buck: Details of land and property owned by the Department in the North East Milton Keynes constituency are set out as follows.

The Highways Agency, an Executive Agency of the Department for Transport, own three areas of land near Milton Keynes. These consist of (1) land at Byron Lodge, Cranfield Road, Milton Keynes, (2) land adjacent to the M1 River Ouzel and (3) land at Brooklands adjacent to the M1 at Milton Keynes.

Departmental Staff

Mike Penning: To ask the Secretary of State for Transport whether any *(a)* employee of his Department, *(b)* person engaged by his Department as a consultant and *(c)* paid advisor to his Department is a Member of the House of Lords; and if he will make a statement. [52896]

Ms Buck: The Department has no record of any employees, consultants or paid advisors being Members of the House of Lords.

Disabled Pensioners (Transport)

Mr. Harper: To ask the Secretary of State for Transport what funding is available for disabled pensioners to subsidise transport cabs if public transport is not suitable. [53660]

Ms Buck: Local authorities may introduce schemes offering subsidised taxi travel for disabled people. The provision and funding of such schemes are entirely at the discretion of individual local authorities who set their own eligibility criteria.

GNER

Chris Grayling: To ask the Secretary of State for Transport who in his Department is handling senior level contacts with GNER. [54919]

Derek Twigg: Management of the delivery of the GNER franchise is carried out by a dedicated Franchise Management team within the Department's Rail Service Delivery Directorate, which is part of the DfT rail group headed by the Director General.

Monorails

Mr. Ellwood: To ask the Secretary of State for Transport what steps he is taking to promote monorails in towns in England. [54284]

Derek Twigg: It is the responsibility of local authorities to determine their transport needs and develop the most appropriate solution in each case. Innovative proposals from local authorities could be considered for funding through the Department's major schemes programme.

Motorway Signage

Mr. Spellar: To ask the Secretary of State for Transport what procedures are followed by the Highways Agency to ensure that electronic signs on motorways are providing current information. [54773]

Dr. Ladyman: Variable message signs (VMS) are set by operators working in the Highways Agency's national traffic control centre (NTCC) and regional control centres (RCCs) and currently by police control offices (PCOs) until all functions are transferred to the RCCs. This is scheduled to be completed by autumn 2006.

NTCC continually monitors conditions on the motorway and trunk road network in England, receiving information from detection equipment on the network and from stakeholder partners and others. VMS messages are then set to provide information to drivers about real-time conditions.

There are seven RCCs which monitor conditions on the motorway and trunk road network within their regions of England and allocate resources such as traffic officers to manage incidents. They set messages on VMS for safety reasons, to inform drivers and to assist with incident management. Incidents (and VMS settings) are monitored from control rooms and messages displayed on VMS are reviewed and removed as necessary.

VMS messages are also set by an automated system which uses information from the motorway incident detection and automated signalling (MIDAS) system. MIDAS works from loops in the road surface, which detect slow moving or stationary traffic. The automated message system then sets messages to warn drivers and to protect the backs of queues. This safety system has been shown to save 13 percent. of tail-end collisions. Messages are automatically cancelled as traffic flows return to normal.

Network Rail

Mr. Hancock: To ask the Secretary of State for Transport if he will make it his policy to ensure that Network Rail's inventory of assets owned is publicly available. [53589]

Derek Twigg: Network Rail has a licence condition to establish and maintain information about its assets (the "asset register"). Network Rail is accountable to the Office of Rail Regulation for this and plans to allow access for third parties within the industry to data which they need.

Nuclear Fuel/Waste

Lynne Featherstone: To ask the Secretary of State for Transport how many times *(a)* nuclear fuel and *(b)* nuclear waste has passed through (i) the Hornsey and Wood Green constituency and (ii) Greater London by (A) road and (B) rail in each of the last five years; and if he will make a statement. [54630]

Dr. Ladyman: Information is only available on shipments of irradiated nuclear fuel flasks from nuclear power stations to Sellafield. Because of the nature of the

railway network it is likely that shipments from power stations in south east England will have passed through London.

The total number of flasks shipped from these power stations (Bradwell, Sizewell and Dungeness) during the last five years were:

	Number
2001	220
2002	203
2003	121
2004	222
2005	165

A single train may carry several flasks.

Information is not available on how many of these shipments passed through the Hornsey and Wood Green constituency as the route chosen is an matter for the rail operator.

Pension Liabilities

Mr. Philip Hammond: To ask the Secretary of State for Transport if he will estimate the net present value of accrued pension liabilities in respect of *(a)* present and *(b)* former employees of his Department and its predecessor. [52108]

Ms Buck: The Principal Civil Service Pension Scheme is an unfunded multi-employer defined benefit scheme and individual Departments' pension liabilities are not available.

Railway Stations

Mr. Hancock: To ask the Secretary of State for Transport if he will list the railway stations in Hampshire which *(a)* do not have (i) waiting rooms and (ii) toilets and *(b)* are inaccessible under disability discrimination legislation; what steps are being taken to improve the position in each case; and if he will make a statement. [50497]

Derek Twigg: The following stations in Hampshire do not have waiting rooms and toilets and have steps to some of the platforms.

Beaulieu Road;
Bedhampton;
Botley;
Bursledon;
Grateley;
Hamble;
Lymington Pier;
Overton;
Portchester;
Rowlands Castle;
Shawford.

South West Trains, the station operator, currently complies with all its Franchise Agreement station facilities obligations and expects to continue to do so until the end of the franchise in February 2007.

The Invitation to Tender for the South Western Franchise will require bidders to present their plans for improvements at stations throughout the franchise.

Spending Review (Efficiency Targets)

Mrs. Villiers: To ask the Secretary of State for Transport how much is expected to be saved as a result of meeting the civil service work force reductions targets for his Department set out in the 2004 Spending Review; and whether these savings count towards the agreed efficiency target for his Department set out in the review. [52793]

Ms Buck: The Department has a target to reduce headcount by 700 full-time equivalents (FTEs) by 2007–08. The central Department will reduce headcount by 200 FTEs, which is expected to yield efficiency gains of £10.7 million in 2007–08. DVLA will reduce headcount by 500 FTEs which will contribute to the Driver, Vehicle and Operator Group's target to deliver £70 million of economy and efficiency savings by 2007–08.

Mrs. Villiers: To ask the Secretary of State for Transport how much of the agreed efficiency target for his Department set out in the 2004 Spending Review is to be cashable; and under what budget headings these cashable efficiency savings will be re-spent. [52834]

Ms Buck: At least 50 per cent. of the Department's agreed efficiency target of £785 million will be cashable.

The cashable savings due to be released through the efficiency programme were allocated across departmental expenditure following the SR04 spending settlement. There is no direct link to individual budget headings.

Mrs. Villiers: To ask the Secretary of State for Transport what the target level of employment expressed as full-time equivalents is in his Department by April 2008, in order to meet his Department's civil service work force reductions target set out in the 2004 Spending Review. [52852]

Ms Buck: The target level of employment for the Department for Transport and executive agencies (excluding the Office of Rail Regulator, DfT staff in the Government Offices and the Government Car and Despatch Agency) for April 2008 is 17,981 full-time equivalent staff.

The figure for April 2008 takes into account the planned reduction of 200 full-time equivalents (FTEs) in the centre of the Department for Transport and the reduction of 500 FTEs in DVLA.

Mrs. Villiers: To ask the Secretary of State for Transport what total efficiency savings were achieved by his Department in 2004–05; and whether these count towards the agreed efficiency target for his Department set out in the 2004 Spending Review. [52857]

Ms Buck: The Department achieved efficiency gains of £288.3 million in 2004–05. These gains contribute to the Department's Spending Review 2004 target to achieve £785 million of efficiency gains by 2007–08.

Mrs. Villiers: To ask the Secretary of State for Transport what baseline figures he is using for assessing progress on his Department's targets to

(a) improve roads procurement in local authorities, *(b)* increase tax collection by the Driver and Vehicle Operator Group and achieve efficiencies through transactional services and other areas within the Driver and Vehicle Operator Group, *(c)* restructure and reform his Department and its support services and *(d)* deliver efficiencies as a result of Transport for London's plans and from local authority spending; what progress has been made towards these targets to date; and what the total efficiency savings achieved to date are for these targets. [52932]

Ms Buck: The 2004 baseline figure for improving roads procurement in local authorities is equal to the local authority 2004–05 highways budget. As it is the decision of the local authorities how they divide their budget and only local authorities who choose to claim highways efficiencies calculate baselines, a precise baseline covering all local authority roads spend is unavailable. In 2004–05, the Highways Agency Local Authority Roads workstream achieved efficiency gains of £27 million.

The baseline for increasing tax collection by the Driver, Vehicle and Operator Group is based on the roadside survey of vehicle excise duty evasion carried out in 2003. The level of evasion was recorded at 4.8 per cent. In 2004–05 the level of evasion was 3.2 per cent. This decrease resulted in £77 million of efficiency gains.

The 2004 baseline for efficiencies through transactional services and other areas in the Driver, Vehicle and Operator Group is £723 million. This area generated efficiencies of 24.7 million in 2004–05.

The baseline for reforming the Department and the Shared Services Programme is £228 million.

The baseline for efficiencies resulting from Transport for London's (TfL) business plan is £2.25 billion. It was set in 2004-05. The baseline for efficiencies as a result of improvements in London Underground running and capacity from Public private partnerships (PPP) is £1 billion of the total TfL baseline from 2003–04. Due to the start date of the PPP contracts in December 2002 and April 2003, the most appropriate baseline for measuring these gains is 2003–04. In 2004–05 TfL realised efficiency gains of £119 million. An additional £46 million efficiency gains were realised as a result of improvements in London Underground running and capacity from PPPs.

The baselines for efficiencies resulting from local authority non-roads spending (excluding TfL) is equal to the total local authority 2004-05 budget for this sector. It is the decision of local authorities how they divide their budget and only local authorities that choose to claim efficiencies in the non-roads spend area calculate baselines. This means a precise baseline covering all local authority non-roads spend is unavailable. In 2004–05, the local authority non-roads workstream (excluding TfL) generated £19 million of efficiency gains.

Baselines and the basis for determining them were agreed with the Gershon Review Team.

Mrs. Villiers: To ask the Secretary of State for Transport what interim targets he has set for achieving *(a)* the agreed efficiency target for his Department and *(b)* the civil service work force reductions targets for (i) gross reductions in posts, (ii) net reductions in posts and (iii) relocations for his Department, as set out in the 2004 Spending Review; what the baseline figures are against which these interim targets are assessed; on what dates they will take effect; and by what dates these interim targets are intended to be met. [52944]

Ms Buck: The Department has a Spending Review 2004 target to achieve £785 million of efficiency gains by 2007-08. The Department has not established interim targets.

The Department has a target to reduce headcount by 700 full-time equivalents (FTEs) by 2007–08 relative to the 2004 baseline.

The Department has a target to relocate 60 posts out of London by 2010.

The Department continually monitors and reviews progress towards the 2007–08 efficiency target across the Efficiency Programme.

Transport Infrastructure Projects

Chris Grayling: To ask the Secretary of State for Transport if he will list the transport infrastructure projects on which his Department has carried out feasibility studies since 1997. [43362]

Ms Buck: For transport infrastructure projects, a range of appraisal information including assessments using the New Approach to Transport Appraisal system apply to all schemes submitted to the Department for funding. Appraisal will cover the practicality of a scheme and this may involve a specific feasibility study. The Department does not hold a comprehensive record of all of the infrastructure projects where a specific study on feasibility was undertaken. Often this work would be undertaken by the scheme promoter, such as a local authority, and compiling a list of such feasibility studies would be prohibitively expensive.

Some particular rail projects where feasibility studies since 1997 were conducted by the Strategic Rail Authority, now part of the Department, were: The North South High Speed Line, Cross London Feasibility Study and The Future use of Waterloo International. The Government laid out its strategy for the future of the Air Transport industry in the Air Transport White Paper. This contains details of the supporting studies used in developing it, and can be found at: www.dft.gov.uk/stellent/groups/dft_aviation/documents/divisionhomepage/029650.hcsp

Transport Project Funding

Chris Grayling: To ask the Secretary of State for Transport if he will list the guarantees the Government have provided to outside organisations for loans which have been used to fund transport projects. [46128]

Derek Twigg: Government have provided the following guarantees in relation to financing the construction of the Channel Tunnel Rail Link:

Government guaranteed bonds issued by London and Continental Railways (LCR).

interest hedging arrangements entered into by LCR.

payments of Track Access Charges by Eurostar to LCR.

Government also provide credit support arrangements for borrowing by Network Rail.

DEFENCE

Afghanistan

Dr. Julian Lewis: To ask the Secretary of State for Defence whether the counter-terrorism role of Operation Enduring Freedom will continue to be discharged in Southern Afghanistan after the counter-insurgency role of NATO's International Security Assistance Force comes into operation there. [52769]

Mr. Ingram: Operation Enduring Freedom will continue to discharge its counter-terrorist role in Southern Afghanistan after the NATO-led International Security Assistance Force expands into that area. NATO's Operational Plan contains clear command arrangements to co-ordinate and, where necessary, deconflict efforts within the two missions.

Dr. Julian Lewis: To ask the Secretary of State for Defence whether his Department has received representations from the Army requesting more *(a)* combat troops, *(b)* helicopters and *(c)* artillery than have been allocated for the proposed deployment to Southern Afghanistan. [52770]

Mr. Ingram: No. The force package that the UK will send to Southern Afghanistan meets the requirements identified by the relevant military planning staffs and has been fully endorsed by the chiefs of staff.

Dr. Julian Lewis: To ask the Secretary of State for Defence what military assessment he has received of the probable consequences of using military power to suppress opium production in Southern Afghanistan. [52771]

Mr. Ingram: As we have consistently made clear, tackling the opium trade in Afghanistan will require a broad and multi-faceted counter-narcotics strategy, under Afghan leadership, including development of legal rural livelihood opportunities for farmers and targeting of the traffickers by Afghan forces. UK troops deployed to Southern Afghanistan as part of the International Security Assistance Force (ISAF) can support Afghan counter-narcotics efforts, by helping to provide the secure environment in which the rule of law can be applied and the economy can be developed and diversified. The Afghan Government should then be able to build popular support for its efforts to eradicate the drugs trade.

Caribbean Naval Patrols

Dr. Julian Lewis: To ask the Secretary of State for Defence for how many months in each year since 1997 there has been a Royal Navy destroyer or frigate on anti-drugs patrol in the Caribbean; and what future schedule has been prepared for this role. [54015]

Mr. Ingram: Since 1997, there has been a Royal Navy destroyer or frigate deployed on tasking in the Caribbean area for the following months per year:

	Months
1997	12
1998	11
1999	11
2000	10
2001	10
2002	5
2003	9
2004	10
2005	9

In 2006, we plan to provide coverage throughout the core hurricane season (July to October inclusive) and from early 2007 the introduction of an improved force generation process will enable us to resume year-round attribution of a destroyer or frigate to Caribbean tasks.

Defence Industrial Strategy

Mr. Gerald Howarth: To ask the Secretary of State for Defence if he will make a statement on his Department's supply chain strategy within the Defence Industrial Strategy. [54418]

Mr. Ingram: The supply chain strategy is currently being developed. The intention is to construct a clearer understanding of the defence supply base, its capabilities and technologies, sources of innovation and areas of potential vulnerability.

Departmental Estate

Mr. Gerald Howarth: To ask the Secretary of State for Defence if he will make a statement on the future of RAF Wyton. [54342]

Mr. Ingram: A number of studies are currently under way but have not yet reported, whose outcomes may effect the future of RAF Wyton. One of these is to explore options for the collocation of the Defence Logistics Organisation (DLO) and the Defence Procurement Agency (DPA). A decision on DLO/DPA collocation is not expected before spring 2006, and will be subject to Trades Union consultation.

Departmental Finance

Mr. Harper: To ask the Secretary of State for Defence from which public corporations his Department received a receipt from a *(a)* dividend payment and *(b)* equity withdrawal in financial years 2004-05; what the value of each receipt was; and whether receipts were (i) appropriated in aid of his Department and (ii) submitted to the Consolidated Fund. [53668]

Mr. Ingram: During the financial year 2004-05, the Department received a dividend payment and equity withdrawal from QinetiQ (then a self financing public corporation). The income received was:

(a) Dividend payment (on redeemed preference shares 2003-04): £5.759 million.

(b) Equity withdrawal (redemption of preference shares): £48.543 million.

Both were appropriated in aid of the Department.

Notification of this income was provided in Note 10 of the Departmental Annual Report and Accounts 2004-05, a copy of which is available in the Library of the House.

Mr. Harper: To ask the Secretary of State for Defence what the value was of receipts from asset sales that were *(a)* appropriated in aid of his Department and *(b)* submitted to the Consolidated Fund in financial year 2004-05. [53669]

Mr. Ingram: The Department received a total of £366.9 million from asset sales, in the financial year 2004-05. Of this, £213.7 million was appropriated in aid of the Department and £153.2 million surrendered as excess Appropriations in Aid to the Consolidated Fund.

Electromagnetic Pulse Weapons

Mr. Gerald Howarth: To ask the Secretary of State for Defence what steps his Department is taking to ensure that measures are in place to counter the effects of an electromagnetic pulse weapon used against UK forces in the field. [54373]

Mr. Ingram: I refer the hon. Member to the answer I gave on 9 July 2003, *Official Report*, column 808W, to the hon. Member for South-East Cornwall (Mr. Breed).

Fleet Air Defence

Dr. Julian Lewis: To ask the Secretary of State for Defence if he will list the main air defence assets which will be available to the fleet in the years between the withdrawal of the Sea Harriers and the entry into service of the joint combat aircraft. [54016]

Mr. Ingram: The backbone of the fleet's ability to defend itself from air attack in the years between the withdrawal of the Sea Harrier in March 2006 and the entry into service of the joint combat aircraft, will continue to be provided by destroyers. At present, this is achieved using the eight Type 42 destroyers equipped with the medium range Sea Dart surface to air missile system. Destroyers of the Daring Class will gradually replace the Type 42 destroyers. These new ships will be armed with the Principal Anti Air Missile System, enhancing the fleet's capability to counter the most sophisticated aircraft and anti-ship missiles in the world.

The fleet's close range air defence capability will continue to be provided by Type 22 and Type 23 Frigates equipped with the Seawolf point defence missile system. Additional air defence capability will also come from a combination of close-in weapon (gun) systems, such as GOALKEEPER and PHALANX, and decoys.

Airborne Early Warning Sea King helicopters will provide the long range detection of airborne contacts.

Joint Combat Aircraft

Dr. Julian Lewis: To ask the Secretary of State for Defence what assessment he has made of the implications for the operational capabilities of the joint combat aircraft of United States refusal to include Rolls-Royce engines in its design. [54017]

Mr. Ingram: The United Kingdom has supported the continuation of F136 as a competitive alternative to the F135 and as a through life risk reduction measure for the JSF programme. However, JSF is being designed so that the F135, Pratt and Whitney and F136, General Electric/Rolls-Royce engines would have been fully interchangeable, so the UK's requirements for JSF will continue to be met by the F135 alone if the United States decides to stop development of the F136 due to budget pressures. Our preference, however, was for the dual engine approach and strong representation was made to the US administration supporting this.

Missile Systems

Mr. Gerald Howarth: To ask the Secretary of State for Defence what plans he has for future upgrades to UK missile systems; and what plans he has to develop a strategy to incorporate emerging technologies into existing weapons systems. [54425]

Mr. Ingram: A number of upgrades to missile systems are planned to meet emerging requirements. These include incremental technology insertion programmes to upgrade the RAF's Storm Shadow missiles, and the Royal Navy's and Seawolf missiles.

Our approach to incorporating emerging technologies into existing weapons systems will be taken forward as part of the wider work to develop a co-ordinated strategy for complex weapons.

Niche Technologies

Mr. Gerald Howarth: To ask the Secretary of State for Defence what steps his Department is taking to assist the development of niche technologies through small and medium-sized enterprises. [54415]

Mr. Ingram: As part of the Defence Industrial Strategy, the Ministry of Defence is working with industry and universities to identify sources of innovation and to identify where technologies of vital strategic importance are located. We recognise that we must work together more effectively with industry (including small and medium-sized enterprises) and universities, to stimulate innovation and exploit research and technology to meet defence needs. Specifically, we are developing a better understanding of the innovation process and mapping out the technology trees for major capabilities, systems and platforms.

MOD has placed at least an estimated 10 per cent. by value of its extramural research and development contracts with SMEs in recent years as laid out in the Small Business Research Initiative (SBRI) performance figures for 2003-04 and 2004-05 a copy of which is in the Library of the House. This exceeds the SBRI target for Government Departments of at least 2.5 per cent.

Royal Ordnance Sites

Mr. Hoyle: To ask the Secretary of State for Defence which trade unions are involved in the proposed closure of Royal Ordnance sites; and which sites are under discussion. [53370]

Mr. Ingram: The trade unions involved with the BAE Systems Land Systems (BAES LS) rationalisation are AMICUS, Prospect, GMB and T and G.

The focus of these discussions is a matter between the trade unions and the company.

Standing Naval Tasks

Dr. Julian Lewis: To ask the Secretary of State for Defence if he will list the standing naval tasks carried out by the Royal Navy in each year since 1997 and those scheduled for discontinuation. [54014]

Mr. Ingram: The Royal Navy conducts a variety of naval tasks, either as standing strategic, home or overseas commitments, or as enduring contingent operations overseas. Except where stated, the tasks listed below have been maintained from 1997:

Standing Strategic Tasks:

Strategic Deterrent

Hydrographic and Oceanographic Survey

Standing Home Commitments:

Fleet Ready Escort

Mine Counter Measures Route Surveys

Fishery Protection

Northern Ireland Operations— task ended April 2005

Search and Rescue

Standing Overseas Commitments:

Defence and Security of Gibraltar, Falkland Islands and Cyprus Sovereign Base Areas

Atlantic Patrol Task (North)—formerly West Indies Guardship

Atlantic Patrol Task (South)—formerly South Atlantic Guardship

Standing NATO Naval Forces—combination of former Maritime Groups

Five Power Defence Arrangement—each year except 1998

Contingent Operations Overseas:

Op Telic (The Gulf)—formerly Op Armilla

Op Calash (Arabian Sea and Horn of Africa)—formerly Op Armilla

Arabian Gulf Ready Tanker

None of these tasks are scheduled for discontinuation.

Warships

Dr. Julian Lewis: To ask the Secretary of State for Defence what the planned out of service dates are for *(a)* HMS Illustrious, *(b)* HMS Ark Royal and *(c)* HMS Ocean. [54013]

Mr. Ingram: On present plans the out of service dates are as follows:

HMS Illustrious—2012.

HMS Ark Royal—2013.

HMS Ocean—2018.

TRADE AND INDUSTRY

Biomass Conversion

Norman Baker: To ask the Secretary of State for Trade and Industry what research he has *(a)* commissioned and *(b)* evaluated to assess the direct transformation of biomass into hydrogen. [52591]

Malcolm Wicks: The DTI commissioned two reports in 2004 in relation to hydrogen: "Hydrogen Energy Support in the UK" and "A Strategic Framework for Hydrogen Energy Activity in the UK". These reports have been published on the Department's website. The second report identified six potential hydrogen energy chains for the use of hydrogen as a transport fuel. One route is to produce hydrogen biomass (with optional carbon capture and storage).

On 15 June 2005, I announced the Government's response to the second report "A Strategic Framework for Hydrogen Energy Activity in the UK" which included a funding package of £15 million over four years for a UK wide hydrogen and fuel cell demonstration programme. The details of the demonstration scheme is currently being developed, and requires EC State Aid approval.

Basic research in universities is supported through the UK Research Councils. The EPSRC is funding two relevant SUPERGEN consortia:

1. The SUPERGEN biological fuel cell consortium. This was announced in December 2005. This is a £2 million investment over four-year period. This is a consortium of teams from six universities aims to achieve major advances in a technology that potentially produces electricity directly from sustainable biological materials and air, in devices known as biological fuel cells. The Consortium programme involves a combination of expertise drawn from the research areas of microbiology, enzymology, electrochemistry, materials science and computational modelling. A "Biofuel Cells Industrial Club" is to be formed, with industrial partners active in water management, porous materials, microbiology, biological catalysis and fuel cell technology.

2. SUPERGEN UK Sustainable Hydrogen Energy (UKSHEC): part of its remit is to advance the scientific understanding of the biological generation of sustainable hydrogen. UKSHEC was established in 2003 and will continue until 2007.

In addition the following projects were funded by EPSRC:

(i) The project "Unmixed reforming of vegetable oil for hydrogen production" investigated the viability of vegetable oil as the fuel for a novel steam reforming process. This project was completed in December 2004.

(ii) The project "Sustainable biohydrogen production" investigated optimising hydrogen yields from biomass by continuous fermentative processes operating on mixed microflora on any substrate. This project was completed in October 2004.

Blue Skies Initiative

Dr. Francis: To ask the Secretary of State for Trade and Industry how many homeowners have received grants from the Blue Skies Initiative since its inception; and if he will make a statement. [55194]

Malcolm Wicks: Under the Clear Skies initiative of the 6,860 homeowners that have been accepted for a grant 5,458 homeowners have so far claimed and received it.

Business Plans

Gregory Barker: To ask the Secretary of State for Trade and Industry if he will place a copy of the

(a) Natural Environment Research Council and *(b)* Centre for Ecology and Hydrology business plans in the Library. [52250]

Barry Gardiner *[holding answer 27 February 2006]:* The Natural Environment Research Council (NERC) Delivery Plan for 2005-08 and proposed Centre for Ecology and Hydrology Business Plan are currently available on the NERC website http://www.nerc.ac.uk.

Centre for Ecology and Hydrology Research

Gregory Barker: To ask the Secretary of State for Trade and Industry (1) what the Government's plans are for closing the Centre for Ecology and Hydrology research sites in the next 10 years; and what representations he has received on this; [52048]

(2) what evidence the Natural Environment Research Council presented to his Department as a basis for its decision to close four Centre for Ecology and Hydrology research sites; and what assessment he has made of this evidence; [52051]

(3) what guidance the Natural Environment Research Council (NERC) was given before its board decided to close *(a)* Winfrith, South Dorset and *(b)* other NERC research facilities. [52058]

Barry Gardiner: The Centre for Ecology and Hydrology (CEH) is wholly owned by the Natural Environment Research Council (NERC), and decisions on its future are the responsibility of NERC. The science budget allocation to NERC has doubled since 1997, demonstrating our commitment to maintaining the quality of environmental, research in the UK. NERC is responsible for determining the details of how this funding is allocated to specific activities. NERC is currently considering the input from a wide consultation with stakeholders on proposals to place CEH onto a sustainable financial footing, and decisions are expected to be taken by NERC Council in March.

Officials from the Office of Science and Technology attend the meetings of NERC Council as observers; these meetings have included discussions concerning the future of CEH. Following NERC Council in December 2005, NERC issued a Statement of Intent regarding the future of CEH, accompanied by a copy of the CEH Business Plan containing the rationale for NERC's proposals.

The Department has received a number of letters from Members of Parliament, trade unions, environmental organisations, members of the public and others, about NERC's proposal to restructure CEH.

Gregory Barker: To ask the Secretary of State for Trade and Industry how many ecologists were represented on the Executive Board of the National Environment Research Council during each discussion of the most recent Centre for Ecology and Hydrology business plan. [52061]

Barry Gardiner: The science budget allocation to the Natural Environment Research Council (NERC) has doubled since 1997, demonstrating our commitment to maintaining the quality of environmental research in the UK. NERC is currently considering the input from a wide consultation with stakeholders on proposals on how the Centre for Ecology and Hydrology (CEH) can contribute to this on a sustainable basis.

NERC Council is the governing body of NERC. Three members of Council are ecologists and another member has expertise in ecological toxicology. All were present at recent Council discussions of the CEH business plan.

Compensation Claims

Mr. Amess: To ask the Secretary of State for Trade and Industry if he will bring forward legislation to extend the period in which compensation may be sought from a builder for poor workmanship; and if he will make a statement. [54201]

Mr. Sutcliffe: The Supply of Goods and Services Act 1982 provides the consumer with basic rights which apply to most contracts for services. It requires a trader—such as a builder, who agrees to carry out a service, to carry out that service with reasonable care and skill. Complaints can be brought to court up to six years later. A consumer may also have a claim in negligence. The basic period in which to bring a claim is the same, however in the case of a hidden defect the consumer may claim within three years after discovering the defect (provided that not more than 15 years have elapsed since the work was done). This extended period was introduced in 1986 and there are no plans to make any changes.

Cricket World Cup

Norman Lamb: To ask the Secretary of State for Trade and Industry what UK Trade and Investment's budget is for the proposed market visit to the Caribbean in 2006 to allow small and medium-sized businesses to pursue opportunities created by the forthcoming Cricket World Cup in 2007; and what proportion of the budget is for direct financial aid to businesses that may wish to take advantage of the scheme. [53328]

Ian Pearson: Under UK Trade and Investment's Market Visit Support scheme, there are no market visits planned to the Caribbean for the remainder of the financial year 2005–06. For the financial year 2006–07 commencing 1 April, UKTI's regional teams are developing their plans for market visits in line with their trade development responsibilities. At present one market visit to the Caribbean is under consideration where a budget of £6,500 has been proposed to support around 10 small and medium enterprises.

In addition, Coventry and Warwickshire Chamber of Commerce, as part of the West Midlands EU funded ERDF project, is taking a group of companies to Barbados, St. Lucia and Jamaica from 17–24 April 2006, as part of a structured export development programme, to investigate specific export opportunities, some of which are linked to the Cricket World Cup. The entire EU funding available will go direct to small and medium sized enterprises in the West Midlands objective 2 area. UKTIs involvement is to provide International Trade Advisers to support the companies in their preparation and to help them follow up any opportunities identified.

Debt

Dr. Cable: To ask the Secretary of State for Trade and Industry what assessment he has made of the implications for the Department's work on responsible lending and personal indebtedness of the decision by the Legal Services Commission to withdraw funding for specialist support and advice on debt; and if he will make a statement. [54718]

Mr. Sutcliffe: The Legal Services Commission has decided not to continue funding for specialist support, as from July 2006.

DTI recognises that second tier support for debt advisors can contribute to ensuring responsible lending and tackling over-indebtedness. However, the Government has decided to focus its funding on direct advice provision. DTI administers the £45 million project for face-to-face debt advice, provides funding for National Debtline and supported the launch of the new Debt Advice Helpline pilot on 27 February. We will continue to collaborate with other Departments on their debt advice projects and work with the sector to encourage sustainable funding for debt advice from a broad range of sources.

Miners' Compensation

John Mann: To ask the Secretary of State for Trade and Industry what discussions his Department has had with *(a)* the Law Society and *(b)* the Legal Services Ombudsman about breaches of regulation 4 of the conditional fee regulations with regard to miners' hearing loss claims. [54851]

Malcolm Wicks: The Department, to date, has had no such discussions with either the Law Society or the Legal Services Ombudsman.

John Mann: To ask the Secretary of State for Trade and Industry on how many occasions in cases from Bassetlaw residents solicitors' costs have been partially refused due to breach of regulation 4 of the conditional fee regulations for miners' hearing loss claims to Government. [54852]

Malcolm Wicks: This information is not readily available. Miners' hearing loss claims are not schemed so solicitors' costs for each claim are dealt with on their own merits. Concerns relating to a breach of regulation 4 of the conditional fee regulations would be raised as part of the negotiations on the appropriate level of costs for any given claim.

John Mann: To ask the Secretary of State for Trade and Industry which solicitors have had costs partially refused due to breach of regulation 4 of the conditional fee regulations for miners' hearing loss claims to Government. [54853]

Malcolm Wicks: This information is not readily available. Miners' hearing loss claims are not schemed so solicitors' costs for each claim are dealt with on their own merits. Concerns relating to a breach of regulation 4 of the conditional fee regulations would be raised as part of the negotiations on the appropriate level of costs for any given claim.

John Mann: To ask the Secretary of State for Trade and Industry on what date the Government's insurers first refused to pay part of solicitors' costs due to breach of regulation 4 of the conditional fee agreement regulations. [54854]

Malcolm Wicks: The Department has always refused to meet solicitors' costs in full where there has been a breach of regulation 4 of the conditional fee agreement (CFA) regulations. The CFA regime was introduced in 2000 but breaches of regulation 4 have become more common in relation to miners' hearing loss claims since 2004.

Natural Environment Research Council

Gregory Barker: To ask the Secretary of State for Trade and Industry how many members of the Natural Environment Research Council Executive board were ecologists when the decision to close the facility at Winfrith, South Dorset, was taken. [52251]

Barry Gardiner *[holding answer 27 February 2006]:* The science budget allocation to the Natural Environment Research Council (NERC) has doubled since 1997, demonstrating our commitment to maintaining the quality of environmental research in the UK. NERC is currently considering the input from a wide consultation with stakeholders on proposals on how the Centre for Ecology and Hydrology (CEH) can contribute to this on a sustainable basis.

NERC Council is the governing body of NERC, and decisions on these proposals are expected to be taken by NERC Council in March. Three members of Council are ecologists and another member has expertise in ecological toxicology.

Gregory Barker: To ask the Secretary of State for Trade and Industry what the scientific qualifications are of each of the National Environment Research Council Executive board members. [52063]

Barry Gardiner: The governing body responsible for decisions at the Natural Environment Research Council (NERC) is NERC Council. Details of members of NERC Council, including relevant scientific qualifications, expertise and research interests, are available on the NERC website at http://www.nerc.ac.uk/secretariat-council/.

Newspapers

Dr. Pugh: To ask the Secretary of State for Trade and Industry (1) what representations he has received on anti-competitive practices in the newspaper wholesale and distribution sector; [54466]

(2) what representations he has received about regional monopolies in newspaper distribution. [54482]

Mr. Sutcliffe: Competition issues associated with newspaper distribution arrangements have been the subject of extensive public consultation in recent years.

Between June 2003 and early 2004, the Government consulted on proposals concerning the treatment of exclusions and exemptions from competition law—including vertical agreements such as those relating to newspaper and magazine distribution. A copy of the consultation document may be found on

the DTI website at www.dti.gov.uk/ccp/consultpdf/modconsult1.pdf Section 4 of that consultation document dealt with vertical agreements and the question of whether the order made in 2000 excluding vertical agreements from prohibition under UK competition law should be repealed. Parties from the newspaper and magazine supply chain were among those that submitted views to the consultation. The Government's response may be found on the DTI website at www.dti.gov.uk/ccp/consultpdf/compmodresp.pdf (section 7).

In 2004, following repeal of the domestic exclusion for vertical agreements, a number of industry parties sought advice from the Office of Fair Trading (OFT) on the continued compatibility with competition law of agreements relating to the distribution of newspapers and magazines and requested the OFT recommend a new block exemption to cover such agreements. The OFT received representations from across the newspaper and magazine supply chain about the operation of the market. A number of the parties that made representations to the OFT wrote separately to DTI Ministers expressing their views. The OFT published its preliminary opinion on the matter in May 2005 for consultation. A copy can be found on the OFT website at www.oft.gov.uk/NR/rdonlyres/F7299676-BAAC-439B-A5A7-2A7AB3191B50/0/oft450.pdf The OFT received a number of further representations which it has since been considering. Again, a number of the parties that made representations to the OFT have written separately to DTI Ministers expressing their views. Ministers have also received letters on the matter from a number of hon. Members writing on behalf of constituents and from a small number of private individuals.

I understand the OFT intends to outline the next steps in this case in the near future.

Post Offices

Huw Irranca-Davies: To ask the Secretary of State for Trade and Industry what *(a)* types and *(b)* levels of subsidy have been given to the rural post office network in (i) Wales, (ii) Ogmore constituency and (iii) the Bridgend County Borough area in each year since 1997; and what the average annual income of a rural post office from each such subsidy was in each year. [54904]

Barry Gardiner: This is an operational matter for Post Office Ltd. Alan Cook the Managing Director has been asked to reply direct to my hon. Friend.

Huw Irranca-Davies: To ask the Secretary of State for Trade and Industry how many post offices in *(a)* Ogmore constituency, *(b)* the Bridgend County Borough area and *(c)* the Rhondda Cynon Taff County Borough area are designated (i) rural, (ii) urban and (iii) other. [54905]

Barry Gardiner: This is an operational matter for Post Office Ltd. (POL). The Chief Operating Officer, David Miller has been asked to reply direct to my hon. Friend.

Power Generation

Mr. Grogan: To ask the Secretary of State for Trade and Industry what estimate he has made of *(a)* the amount of biomass which will be co-fired with coal at power stations between (i) April 2005 and March 2006 and (ii) April 2006 and March 2007, *(b)* the resultant level of carbon dioxide emissions in each period and *(c)* the carbon dioxide emissions which would result from firing solely with coal in each period. [54209]

Malcolm Wicks *[holding answer 27 February 2006]:* The Renewables Obligation requires generators to provide Renewable Obligation Certificates (ROCs) as evidence that 5.5 per cent. of their electricity supply has been generated from eligible renewable sources in the period from April 2005 to March 2006 and 6.7 per cent. in the period from April 2006 to March 2007. ROCs issued for co-firing biomass with fossil fuel can be used as evidence for 25 per cent. of a supplier's obligation for the period from April 2005-March 2006 and 10 per cent. of a supplier's obligation for the period from April 2006 to March 2007.

The Department does not make estimates of the amount of biomass co-fired with coal in the periods mentioned. A publication (available by entering reference URN 05/1159 at www.dti.gov.uk/publications) in August 2005 from the Co-firing of Biomass at UK Power Plant project under the DTI's Carbon Abatement Technologies Programme indicated potential maximum co-firing levels of 4.4TWh in the period from April 2005-March 2006 and 2.2TWh from April 2006-March 2007 based on the caps set by the Renewables Obligation.

The precise carbon dioxide savings will depend on the level of fossil-fuel substitution, the nature of the biomass and the operating conditions of the fossil-fuel generating station.

Average figures for carbon dioxide emissions from power generation given on the DTI Energy Statistics website are 910g/kWh for coal-fired generation and 360g/kWh for gas-fired generation. The Renewables Innovation Review indicated net carbon dioxide emissions for a range of biomass fuels of 22-45g/kWh.

Science Infrastructure

Mr. Byers: To ask the Secretary of State for Trade and Industry if he introduce a process by which reviews of the science infrastructure are in future subject to a form of public inquiry. [54034]

Barry Gardiner *[holding answer 27 February 2006]:* Science infrastructure is funded by the DTI through a number of routes. Universities are funded directly via the Science Research Investment Fund. Other investments are channelled through the Research Councils, who fund infrastructure both within the university sector and within their own institutes. Councils can also draw on the centrally-held Large Facilities Capital Fund for the largest new capital projects. The Research Councils or individual universities and research institutes are responsible for taking decisions on investments in science including new scientific infrastructure. Each Research Council has mechanisms for ensuring decisions are taken impartially in the best interests of the UK scientific community, overseen by a governing Council. The Department organises periodic prioritisation exercises carried out by the Research Councils to inform on the allocations of

the Large Facilities Capital Fund. All the decisions and processes of the Department and the Research Councils are subject to scrutiny by the National Audit Office.

Sunday Trading

Mr. Stewart Jackson: To ask the Secretary of State for Trade and Industry when the independent report on the cost-benefit analysis of amending the Sunday trading legislation will be published. [54814]

Mr. Sutcliffe: Our intention is to publish the independent cost-benefit analysis on the impact of further liberalisation of Sunday trading in spring 2006.

Wind Turbines

Mr. Spellar: To ask the Secretary of State for Trade and Industry what work is being undertaken to test the feasibility of straight-bladed vertical-axis wind turbines. [54774]

Malcolm Wicks: None.

This is primarily a matter for wind turbine manufacturers.

MINISTER FOR WOMEN

Child Care Support

Mr. Bone: To ask the Minister for Women and Equality if the Government will take steps to increase support for women who do not work and who look after their children at home. [52314]

Meg Munn *[holding answer 15 February 2006]:* Government have introduced a variety of measures to support parents and carers in various aspects of their lives. These include a range of benefits and increased access to pensions that have and will continue to benefit many women.

Many non-working mothers have benefited substantially from measures introduced by the Government since 1997, such as tax credits. Child tax credit provides support to families with children, which is payable alongside child benefit to the main carer (usually the mother), regardless of whether they are in work or not. Budget 2005 announced a commitment to increase the child element of child tax credit at least in line with average earnings up to and including 2007–08. From April the child element of child tax credit will be worth up to £1,765 a year for each child.

Also the introduction of Home Responsibilities Protection (HRP) and the state second pension have both been successful in helping women who care for their children full-time to secure a better income for their retirement. Around 1.8 million of the 1.9 million carers who will benefit from the state second pension are women.

We have made progress in the support offered to parents and are committed to improving this wherever possible.

EDUCATION AND SKILLS

Adult Education

John Bercow: To ask the Secretary of State for Education and Skills if she will list schools which offer parents access to adult and family learning opportunities. [53597]

Phil Hope: The information requested is not available. However a baseline survey of 3,300 maintained schools published in September 2005 showed that 85 per cent. of nursery schools, 59 per cent. of primary schools and 58 per cent. of secondary schools were offering some form of adult education (including family learning and parenting courses). We will have more details following the 2006 schools' census exercise.

Beacon Colleges

Mr. Oaten: To ask the Secretary of State for Education and Skills (1) whether an upper limit has been set on the number of Beacon colleges in any one area; [54822]

(2) what the criteria are for colleges to obtain Beacon status; and if she will make a statement. [54823]

Bill Rammell: The overall aim of the Learning and Skills Beacon arrangements is to help improve quality across the learning and skills sector as a whole. Colleges and other providers are awarded Beacon status both to recognise their excellence and to ensure the spread of quality nationally.

There is a four stage selection process for Beacon status, as set out on the Department's Beacon website www.beaconstatus.org:

First, providers are assessed against inspection-related criteria.

Secondly, the LSC and the Department consider the candidate providers, in terms of provider type and region, so as to ensure that there is a reasonable geographical spread and mix by type of provider, thus enabling the maximum impact on the quality of the sector as a whole. There is no upper limit on the number of Beacons in any one area.

After taking account of the first two stages, individual providers are invited to submit proposals on how they will assist improvement and reform nationally. These are considered by an independent advisory panel consisting of a number of key organisations in the sector.

Finally, the Minister of State for Lifelong Learning, Further and Higher Education makes decisions on the award of Beacon status.

Children and Family Court Advisory and Support Service

Mr. Stewart Jackson: To ask the Secretary of State for Education and Skills how many cases are waiting to be allocated to a caseworker in the Children and Family Court Advisory and Support Service (CAFCASS); and what the average length of time was for allocation of new cases to a caseworker in each CAFCASS region in the last year for which figures are available. [51160]

Maria Eagle: This is a matter for the Children and Family Court Advisory and Support Service (CAFCASS). Anthony Douglas, the CAFCASS chief executive, has written to the hon. Member with this information and a copy of his reply has been placed in the House Library.

Letter from Anthony Douglas, dated 27 February 2005:

Written Response to Parliamentary Question 51160

I am writing to you in response to the above Parliamentary Question that you put to the Secretary of State and Education and Skills.

It is my responsibility, as CAFCASS Chief Executive, to reply to this particular Parliamentary Question.

At 30 November 2005 (our most recent data collection point), 275 or 2.5% of our public law cases were unallocated. Public law includes applications for local authority care and supervision orders and applications for adoption. At 30 November 2005, 1419 or 16.5% of our private law reports were unallocated. This figure is a snapshot provided on a monthly basis. Private law includes applications for parental responsibility, residence and contact, where parents have been unable to reach agreement and Rule 9.5 cases under the Family Proceedings Rules (1991), in which a child involved in a private law case is represented by a Guardian ad Litem. Of the private law reports unallocated, 326 or 3.8% were unallocated less than 10 weeks before filing date, which is our performance indicator agreed with Government for private law.

The allocation of cases, particularly in private law, is now under review as part of our *Every Day Matters* consultation programme, which has been focusing on all aspects of our professional strategy and performance. A key shift will be towards an early intervention model in those cases, which will benefit most from that. We also now have dispute resolution schemes in place in our local teams, and families who can benefit from this service now receive a prompt and timely service.

Both our public and private law performance on allocation in 2005/6 is within our key performance indicator targets of 3% and 4% of cases respectively being unallocated.

We do not collect data for the average length of time for the allocation of new cases to a caseworker by region, though I keep overall performance by region and local teams under constant review through the work of the CAFCASS Performance Board which meets monthly.

I would like to add that CAFCASS is committed to providing a quality service to all its users. CAFCASS believes that the welfare of the child is paramount and any decisions made about a child's future must reflect this principle. This means we give priority to situations in which children face most distress or instability.

Higher Education

Mr. Gauke: To ask the Secretary of State for Education and Skills what measures she has taken to improve procurement in the higher education sector; and what savings have been made as a consequence. [53433]

Bill Rammell: This Government are committed to improving efficiency and value for money in education. The Government are working with the higher education sector by:

working in partnership with the Higher Education Funding Council for England (HEFCE);

working with consortia on strategic sourcing projects;

identifying where the wider education sector can benefit from the procurement developments in the higher education sector.

We will be measuring efficiency gains from a range of specific initiatives which contribute to our Gershon efficiency target, including those in the higher education sector. These are set out in our Efficiency Technical Note at www.dfes.gov.uk/publications/docs/DfES%20Efficiency%20Technical%20Note.doc In most cases, the gains are recyclable at the front line into other activities rather than being clawed back by the Department. The Department is reporting progress towards our overall efficiency target through existing departmental reporting processes. We reported progress towards our target in the Department's autumn performance report and will report further progress in the departmental annual report which we expect to publish in April.

Internet Access

Dan Norris: To ask the Secretary of State for Education and Skills what measures her Department is taking to ensure children at school are unable to access inappropriate material on the internet. [54390]

Phil Hope: The British Educational Communications and Technology Agency (Becta) on behalf of the Department established the Becta Accreditation of Internet Services to Education scheme as part of the wider strategy to address internet safety in education. The scheme enables schools to purchase services from accredited suppliers that meet and maintain specific standards in content filtering and service performance. It is open to commercial internet service providers (ISPs) and many public bodies such as Regional Broadband Consortia (RBCs) and local authorities (LAs).

Schools should have an effective range of technological solutions as part of their strategy when safeguarding children from harmful content on the internet. However, it is also necessary for schools to develop their own individual internet safety polices based on their local requirements. Becta has provided a range of advice and guidance to schools and local authorities to help support this. Specifically, schools can access guidance relating to internet safety issues at http://www.becta.org.uk/schools/esafety

Research and Development

Keith Vaz: To ask the Secretary of State for Education and Skills what discussions she has had with her European counterparts on the issue of raising research and development spending; and if she will make a statement. [53849]

Barry Gardiner: I have been asked to reply.

The European Union has set itself an ambitious and challenging objective to increase its investment in research and development towards 3 per cent. of GDP by 2010.

In the context of the Competitiveness Council on 28 and 29 November 2005, European Ministers agreed Council conclusions on the subject of "More Research and Innovation—Investing for Growth and Employment". These conclusions point to a shared political commitment to increase spending on R and D and detail a range of measures that may be required at the level of the member states and of the European Community to facilitate that increase. These measures may include public spending at the European level (the

seventh R and D framework programme, improved access to finance for private-sector investments, identification of regulatory obstacles to innovation and improvements to the mobility and careers of researchers.

Safeguarding Children

Sir George Young: To ask the Secretary of State for Education and Skills when she expects to reply to question 45243 tabled by the hon. Member for North West Hampshire for answer on 23 January, on safeguarding children. [50129]

Ruth Kelly: I responded to the right hon. Member on 13 February 2006, *Official Report*, column 1570W.

Skills Training

Mr. Jenkins: To ask the Secretary of State for Education and Skills how many people aged *(a)* 30 to 39 years, *(b)* 40 to 49 years and *(c)* 50 years and over received skills training in (i) Staffordshire and (ii) Tamworth constituency in each year since 1997. [53423]

Phil Hope: The following table shows the numbers of non-academic long courses of more than 24 weeks duration undertaken in Tamworth and in Staffordshire by academic years and for the age bands requested.

	Tamworth			*Staffordshire*[1]		
	30-39	*40-49*	*50+*	*30-39*	*40-49*	*50+*
1997/98	813	547	348	11,605	8,465	6,374
1998/99	846	578	368	11,511	8,635	6,862
1999/2000	811	554	405	10,984	8,201	7,458
2000/01	763	626	492	11,416	8,957	8,727
2001/02	827	681	648	11,814	9,489	10,027
2002/03	824	728	808	9,186	7,610	8,157
2003/04	748	602	667	9,098	7,733	8,275
2004/05	782	672	646	8,659	7,493	7,266

[1] Figures for Staffordshire include Tamworth. The other Staffordshire constituencies are Burton, Cannock Chase, Lichfield, Newcastle-under-Lyme, South Staffordshire, Stafford, Staffordshire Moorlands, Stoke-on-Trent Central, Stoke-on-Trent North, Stoke-on-Trent South, Stone.

Source:

Individual Student Record 1997/98 to 2001/02 and Individual Learner Record 2002/03 to 2004/05.

Specialised Diplomas

John Bercow: To ask the Secretary of State for Education and Skills which specialised diplomas will be available in 2008 for pupils aged 14 years. [53498]

Phil Hope: The specialised diplomas available for teaching to young people aged 14 years and upwards in September 2008 will be in ICT, Engineering, Health and Social Care, Construction and the Built Environment and Creative and Media.

Student Loans Company

Tim Farron: To ask the Secretary of State for Education and Skills when the Inland Revenue last updated the Student Loans Company on debt repayments by graduates in the UK. [54902]

Bill Rammell: HM Revenue and Customs (HMRC, formerly Inland Revenue) regularly updates the Student Loans Company (SLC) as annual returns from employers are processed. These updates are on a monthly basis and the SLC last processed information from HMRC on 10 February.

University Pay

Ben Chapman: To ask the Secretary of State for Education and Skills what recent representations she has received regarding levels of remuneration for university teaching staff. [52653]

Bill Rammell: The Department has received correspondence about university staff pay. However, as universities are autonomous they are responsible for determining their own academic and administrative affairs, including deciding what to pay their own staff. Pay and conditions of service are subject to negotiations between employers, their staff and their representative trade union bodies. The Government plays no part in this.

HEALTH

"Fuel for Living"

Mr. Lansley: To ask the Secretary of State for Health pursuant to the answer of 31 January 2006, *Official Report*, column 481W, on young people (culinary ability), what the *(a)* actual and *(b)* planned expenditure is on the free recipe guide "Fuel for Living". [51873]

Caroline Flint: The "Fuel for Living" recipe booklet is part of the 5 A DAY Campaign, which provides information and practical advice to improve the diet. The booklet targets the young independent group of 16 to 24-year-olds, who have a lower than average intake of fruit and vegetables so there is a need to provide information and help to improve their diet.

The actual cost of developing the booklet was £42,370, which includes design and artwork, research, expert input and agency fees. The printing and production cost for one million copies was £59,555.

Alcohol-related Illness (Thames Valley)

Mr. Lancaster: To ask the Secretary of State for Health how many incidences of alcohol-related illness there have been in the Thames Valley health authority in each year since 1997. [53179]

Caroline Flint: The number of people being treated for alcohol-related illnesses in the Thames Valley strategic health authority are shown in the following table.

Counts of finished consultant episodes and patients for selected[1] alcohol related diseases

Table 1: F10, K70 or T51 recorded in any of the diagnosis fields (primary or any of the secondary fields)

	All diagnosis count of episodes	
	Finished consultant episodes	*Patient counts*
1997–98	3,376	2,399
1998–99	3,305	2,352
1999–2000	3,578	2,483
2000–01	3,759	2,433
2001–02	3,905	2,528
2002–03	3,661	2,334
2003–04	4,626	2,853
2004–05	5,825	3,429

Table 2: F10, K70 or T51 recorded in the primary diagnosis field.

	Primary diagnosis	
	Finished consultant episodes	*Patient counts*
1997–98	1,198	890
1998–99	1,135	826
1999–2000	1,141	835
2000–01	1,193	818
2001–02	1,244	897
2002–03	1,272	827
2003–04	1,379	950
2004–05	1,704	1,116

[1] Alcohol related diseases defined as following ICD-10 codes:
F10: Mental and behavioural disorders due to use of alcohol.
K70: Alcoholic liver disease.
T51: Toxic effect of alcohol.
Strategic health authority of residence = Thames Valley NHS Hospitals, England 1997–98 to 2004–05.

Notes:

1. Finished consultant episode (FCE)

An FCE is defined as a period of admitted patient care under one consultant within one healthcare provider. Please note that the figures do not represent the number of patients, as a person may have more than one episode of care within the year.

2. Patient counts

Patient counts are based on the unique patient identifier hospital episode statistic identification(HESID). This identifier is derived based on patient's date of birth, postcode, sex, local patient identifier and national health service number, using an agreed algorithm. Where data are incomplete, HESID might erroneously link episodes or fail to recognise episodes for the same patient. Care is therefore needed, especially where duplicate records persist in the data. The patient count cannot be summed across a table where patients may have episodes in more than one cell.

3. All diagnosis count of episodes

These figures represent a count of all FCE's where the diagnosis was mentioned in any of the 14 (seven prior to 2002–03) diagnosis fields in a HES record.

4. Diagnosis (primary diagnosis)

The primary diagnosis is the first of up to 14 (seven prior to 2002–03) diagnosis fields in the hospital episode statistics (HES) data set and provides the main reason why the patient was in hospital.

5. Secondary diagnoses

As well as the primary diagnosis, there are up to 13 (six prior to 2002–03) secondary diagnosis fields in HES that show other diagnoses relevant to the episode of care.

6. Ungrossed data

Figures have not been adjusted for shortfalls in data, that is the data are ungrossed.

Hospital Episode Statistics, Health and Social Care Information Centre

Aspartame

Mr. Lancaster: To ask the Secretary of State for Health what research her Department has *(a)* carried out and *(b)* commissioned to establish whether the artificial sweetener aspartame is carcinogenic. [52464]

Caroline Flint: The Government have commissioned several reviews of the safety and carcinogenicity of aspartame.

Aspartame was first reviewed in 1982 by the United Kingdom's committee on toxicity (COT), a committee of independent experts who advise the Government on the safety of food chemicals. New data on aspartame was reviewed by COT in 1992 and by the committee on the carcinogenicity (COC) in 1996. COT was satisfied that aspartame was acceptable for use in food and COC considered there was no link between brain tumours and aspartame.

At the request of the Food Standards Agency (FSA), in 2001, the European Commission's Scientific Committee on Food revisited its previous safety assessment of aspartame and concluded that there is no evidence to suggest a need to revise the outcome of their earlier risk assessment.

In response to new findings on the potential carcinogenicity of aspartame published by the Ramazzini Institute the FSA commissioned a review by COC. The Committee made initial observations on the

data and will be undertaking a further review of more detailed data from the study in March 2006. The FSA will forward the COC advice to the European Food Safety Authority (EFSA), which is undertaking a full evaluation of the study in the context of previous safety data. EFSA hopes to complete its evaluation by May 2006.

Audiology Services

Peter Bottomley: To ask the Secretary of State for Health when she expects a patient referred to Worthing Hospital for an audiology test leading to a hearing aid to receive the aid within *(a)* 80, *(b)* 50, *(c)* 20 and *(e)* six weeks. [48203]

Caroline Flint: The information requested is not held centrally. However, I understand from the Surrey and Sussex Strategic Health Authority that they recognise that the waiting time for the assessment and fitting of digital hearing aids in the Worthing area is too long. The Worthing and Southlands Hospital National Health Service Trust continues to work with its primary care trust partners to develop options to bring this waiting time down.

BCG Vaccination

Mr. Redwood: To ask the Secretary of State for Health what estimate she has made of the savings made since the policy of free tuberculosis vaccinations administered in schools came to an end. [44116]

Caroline Flint: Funding for immunisation services including the Bacille Calmette Guerin (BCG) vaccination programme, form part of the annual allocation to primary care trusts (PCTs). PCTs are responsible for the management of those monies and running of immunisation programmes. As a result of the changes to the BCG vaccination programme, PCTs will re direct monies to reflect how the BCG programme will be implemented within their PCT.

Anne Main: To ask the Secretary of State for Health what guidance her Department issues to people who are not eligible for a free BCG vaccination concerning attendance at universities and travel *(a)* abroad and *(b)* to cities with a high incidence of tuberculosis. [47205]

Caroline Flint: There has never been a departmental recommendation that Bacille Calmette Guerin (BCG) should be available prior to attendance at a university. If a university requires this vaccination as a condition of entry, then it is the responsibility of the institution to provide it.

BCG vaccination prior to travel abroad is only recommended for individuals under the age of 35 years of age, who are not tuberculin positive if they will be living and working in a country with a high incidence of tuberculosis (TB) (40/100,000 or greater) for more than one month. In these circumstances, it should be the responsibility of individuals.

Individuals over the age of 12 months living in, or moving into an area of the United Kingdom where there is an incidence of TB (40/100,000 or greater) is not on its own, an indication for BCG vaccination.

Dr. Murrison: To ask the Secretary of State for Health what steps she has taken to *(a)* inform parents of her Department's change in BCG vaccination for children policy and *(b)* assess the effectiveness of her information strategy. [54500]

Caroline Flint: The Chief Medical Officer announced changes to the Bacille Calmette Guerin (BCG) programme via a letter to the medical profession and primary care trusts on 6 July 2005. In support of these changes an updated leaflet, fact sheet, and poster were produced and sent directly to the groups listed above. All of these resources were aimed at raising awareness of tuberculosis (TB), and also informing health professionals and the general public alike, of the changes to BCG policy. All these resources were also made available to order free of charge via the Department's publications line.

The 6 July 2005 policy changes also meant that the tuberculin skin test was given in a different way, with the Mantoux test replacing the Heaf test. The Department produced a flip chart and DVD for training purposes. These were made available to order free of charge via the Department's publications line and sent directly to all TB clinics. Following these changes, the Department held a meeting of immunisation co-ordinators who are responsible for implementation of the BCG programme within their localities. The public information materials were shared with the co-ordinators and their views obtained.

The Department has also carried out public awareness testing on matters relating to TB and its control, and all information materials on TB and BCG are pre-tested with members of the public.

Mr. Francois: To ask the Secretary of State for Health how much her Department spent on BCG vaccinations for secondary school children in *(a)* 1997 and *(b)* 2005. [51659]

Caroline Flint *[holding answer 14 February 2006]:* The information as currently requested is not available.

Mr. Francois: To ask the Secretary of State for Health (1) how many school children received BCG vaccinations in schools in *(a)* 1997 and *(b)* 2005; [51660]

(2) what estimate she has made of the annual number of school children who will be given BCG vaccinations in schools under the revised vaccination system; how many were inoculated in the last year of the previous system; and if she will make a statement. [51661]

Caroline Flint *[holding answer 14 February 2006]:* The number of Bacille Calmette Guerin (BCG) immunisations carried out each year and by age group since 1994–95 is published in the statistical bulletin, "NHS Immunisation Statistics, England: 2004–05", a copy of which is available in the Library.

The change in policy announced by the chief medical officer on 6 July 2005, states that children who would otherwise have been offered BCG vaccination through the schools programme will now be screened, tested and vaccinated if appropriate. It is therefore the responsibility of the primary care trusts to arrange suitable screening opportunities outside of the school setting.

Blood Products

Jim Cousins: To ask the Secretary of State for Health what conclusions were reached in the review of departmental papers on self-sufficiency in blood products. [54569]

Caroline Flint: The report, "Self Sufficiency in Blood Products in England and Wales" was published on 27 February 2006. The report contains an executive summary, which includes the main conclusions of the review. Copies of the report are available in the Library and is available on the Department's website at:

www.dh.gov.uk/assetRoot/04/13/09/35/04130935.pdf.

Breast Cancer

Steve Webb: To ask the Secretary of State for Health what assessment her Department has made of the possible effects of the *(a)* use of oral contraception and *(b)* alcohol consumption on the risks of breast cancer. [47989]

Ms Rosie Winterton *[holding answer 2 February 2006]:* The evidence for an increased risk of breast cancer in women who use oral contraceptives (OCs) has been under constant review by the Medicines and Healthcare products Regulatory Agency, in conjunction with the independent expert advisory committee the Commission for Human Medicines.

In studies, a slightly higher number of cases of breast cancer were diagnosed in women who were OC users than in women of the same age who were not. The most important factor for this increased risk was found to be the age at which women stopped using oral contraceptives—the length of time for which women used OCs was less important. In women who stopped using oral contraceptives, their increased risk of having breast cancer diagnosed disappeared after 10 years.

Currently available evidence suggests that for every 10,000 women who use oral contraceptives for up to five years, the number of cases of breast cancer that would be diagnosed for up to 10 years after stopping OCs is as shown in the table.

Age at stopping OCs	*Number of cases of breast cancer in 10,000 women who have never used OCs*	*Number of breast cancers in 10,000 women after five years OCs use and up to 10 years after stopping*
25 years	16	17.5
30 years	44	48.7
35 years	100	111
40 years	160	181
45 years	230	262

However, even at these higher ages the increase in risk, attributable to OCs, for individual women remains very low.

Like all effective medicines, OC is not without side effects and it is very important that both prescribers and women are fully aware of these potential side effects when considering which method of contraception is the most appropriate for individuals.

The Committee on Carcinogenicity of Chemicals in Food, Consumer Products and the Environment made a statement on alcohol consumption and risk of developing breast cancer in women in November 2004, which is available on the Department's website at:

www.advisorybodies.doh.gov.uk/coc/alco04.htm.

The committee both evaluated all the available published research on the association between alcohol consumption and breast cancer and commissioned some specialist research to aid in reaching a conclusion. The committee concluded that it is "prudent to assume that drinking alcoholic beverages may result in breast cancer in women".

Chlamydia

Anne Main: To ask the Secretary of State for Health what assessment she has made of the progress of the chlamydia 2007 objective; and if she will make a statement. [48352]

Caroline Flint: The White Paper, "Choosing Health: Making healthier choices easier", a copy of which is available in the Library, announced an accelerated timetable to achieve national roll out of the National Chlamydia Screening Programme (NCSP) by 2007.

The NCSP provides opportunistic screening for genital chlamydia infection and is aimed at all sexually active women and men aged between 16 and 24-years-old attending a variety of health and non health care settings in England.

We have rolled out the screening programme successfully to 25 per cent. of primary care trusts and we expect to see national screening begin in April 2006. This is well ahead of the 2007 target.

Dentistry

Steve Webb: To ask the Secretary of State for Health on what basis recently-opened dental practices will be paid under the proposed dental contract; and if she will make special arrangements for recently-opened specialist orthodontist practices where payments are concentrated at the end of the course of treatment. [43373]

Ms Rosie Winterton *[holding answer 19 January 2006]:* Where a dental practice has opened since the start of the October 2004—September 2005 reference period, it is for primary care trusts locally to agree an appropriate contract value and a corresponding level for annual services.

Guidance on agreeing appropriate contract values for specialist orthodontist practices was published in February and is available on the Department's website at:

www.dh.gov.uk/assetRoot/04/13/03/20/04130320.pdf.

Farley's Rusks

Mr. Drew: To ask the Secretary of State for Health if she will make a statement on the recent decision of the Food Standards Agency (FSA) to withdraw a consignment of Farley's rusks; and how many other products have been withdrawn by the FSA over the last 12 months. [52077]

Caroline Flint: Farley's withdrew a consignment of rusks which were contaminated with a pesticide, chlorpropham, at levels which exceeded maximum concentrations set by the Processed Cereal-based Foods and Baby Foods for Infants and Young Children (England) Regulations 2003. The levels found were not a health concern for infants but they were illegal.

Under European Commission regulations, it is the responsibility of the company concerned to initiate a product withdrawal and notify both their customers and the Food Standards Agency (FSA). Where appropriate, the FSA would then consider issuing a food alert. There were 84 food alerts issued by the FSA from 1 February 2005 until 1 February 2006. 67 of these were food alerts for information and involved product withdrawal. The other 17 were food alerts for action and required the relevant local authority to perform further investigation or enforcement in addition to the withdrawal.

Fiscal Incentives

Mr. Lansley: To ask the Secretary of State for Health pursuant to her annual lecture to the Faculty of Public Health, delivered on 16 November, if she will make a statement on the effectiveness of using fiscal incentives to change consumer behaviour in order to promote public health. [31100]

Caroline Flint: Our thinking on fiscal incentives in order to promote public health is at an early stage. However, we recognise that they can form part of the social marketing approach that can be used to incentivise people to change their behaviour and choose a healthier lifestyle.

Fruit and Vegetable Consumption

Andrew Rosindell: To ask the Secretary of State for Health what steps the Government are taking to promote the consumption of more fruit and vegetables. [52405]

Caroline Flint: The Department's 5 A DAY programme, school fruit and vegetable scheme (part of the 5 A DAY Programme) and healthy start all promote increased consumption of fruit and vegetables. For example, under the school fruit and vegetable scheme, nearly 2 million four to six-year-olds in local education authority maintained infant, primary and special schools throughout England receive a free piece of fruit or vegetable every school day. Over 550 organisations are licensed to use the 5 A DAY logo and it currently appears on over 700 fruit and vegetable products in shops and restaurants. The new healthy start scheme offers qualifying families vouchers to exchange for fresh fruits and vegetables as well as milk.

Websites, publicity material and guidance have also been provided to help support people to increase their fruit and vegetable consumption.

Health Action Zones

Mr. Lansley: To ask the Secretary of State for Health what assessment her Department has made of the effectiveness of health action zones. [49550]

Caroline Flint: In 2000, the Department commissioned an evaluation of the 26 health action zones (HAZ) that were set up in 1998 and 1999. The evaluation included an analysis of how HAZs sought to tackle inequalities in health.

The findings were published in "Health Action Zones: Partnerships for health equity", Barnes et al (2005), London: Routledge, copies of which have been placed in the Library.

Health White Paper

Mr. Lansley: To ask the Secretary of State for Health when she plans to launch the high-profile campaign to encourage people to contribute to the drive for a fitter Britain by 2012, described in paragraph 2.99, of the White Paper, Our Health, Our Care, Our Say; what resources she plans to provide in support of the campaign; which organisations are designing the campaign; and if she will make a statement. [49523]

Caroline Flint: The Department will work with partner organisations, including Sport England and the London Olympic Games organising committee, to maximise opportunities for people to take part in recreational and health promoting activities. A high profile campaign will be developed building on the health strategies of England, Scotland, Wales and Northern Ireland. The Department is working with the Department of Culture Media and Sports to realise the wider health benefits that the United Kingdom can reap from holding the Olympic Games in London and the proposed campaign will fit closely with this work and support the realisation of the Olympic Games health legacy. Funding for development of the campaign will be allocated in due course as part of the normal process for deciding on central programme funding.

Mr. Lansley: To ask the Secretary of State for Health where exercise-on-prescription pilots have been carried out as described in paragraph 2.93, of the White Paper, Our Health, Our Care, Our Say, what estimate she has made of the costs to the NHS of issuing exercise-on-prescription; and what evidence was used to inform the judgment in paragraph 2.93 of the White Paper that exercise-on-prescription pilots have often been successful. [49524]

Caroline Flint: During the "Your health, your care, your say" consultation, exercise referral schemes were found to be popular with the public. The Fitness Industry Association estimates that there are over 600 schemes in England.

A number of studies have looked at exercise on prescription projects. The health technology assessment, "Promoting physical activity in South Asian Muslim women through exercise on prescription" published in 2002 estimated that there had been between 150 and 200 exercise on prescription pilots or projects since 1990 and shows that these were often considered to be successful. An evaluation undertaken by the Oxford School for Healthcare Research at Oxford Brookes University

identified the positive benefits of two green gym pilot schemes attended by people recommended by health service professionals. The Exercise Referral Systems: National Quality Assurance Framework commissioned by the Department and published in 2001 stated that exercise referral programmes may incur initial higher resource costs, but may be more cost-effective in the longer term if higher risk patients can reduce their risk of morbidity and mortality.

An assessment of four commonly used methods to increase physical activity in primary care, including exercise referral schemes, is currently being undertaken by the National Institute for Health and Clinical Excellence. The findings currently out to consultation, are broadly supporting the effectiveness of exercise on referral at increasing physical activity levels in the short-term.

Heroin

Tim Loughton: To ask the Secretary of State for Health how many children have died from illness related to taking heroin in each of the last five years. [51758]

Caroline Flint *[holding answer 14 February 2006]:* Two deaths of children aged under 16 in which heroin has been implicated have been recorded in England during the last five years for which figures are available. The breakdown for each year as requested is shown in the table.

	Number of deaths
2000	0
2001	2
2002	0
2003	0
2004	0

The figures are those reported to St. George's University of London. Figures on deaths in children due to the longer-term consequences of heroin abuse are not available centrally.

Influenza

Mr. Ian Austin: To ask the Secretary of State for Health pursuant to the answer to question 15379, on influenza, what assessment she has made of the relationship between the influenza virus and the rise of the angiotensin II chemical in the lung. [41092]

Caroline Flint: Following the outbreak of severe acute respiratory syndrome, it was reported that this infection led to raised levels of angiotensin II in the lungs.

However, we are not aware of any relationship between a rise of angiotensin II chemical in the lung and influenza virus.

Mr. Ian Austin: To ask the Secretary of State for Health pursuant to the answer to question 15379, on influenza, what assessment she has made of whether the angiotenism II chemical caused by the body's response to acute respiratory distress syndrome could be triggered by the influenza virus. [41094]

Caroline Flint: Acute respiratory distress syndrome (ARDS) is not a specific disease but rather an acute lung dysfunction, a type of lung failure that is associated with a variety of conditions such as pneumonia, shock and trauma. Influenza infection in its most severe form could result in acute respiratory distress syndrome (ARDS). The production of angiotenism II chemical would be a normal body reaction in such a situation.

Mr. Ian Austin: To ask the Secretary of State for Health pursuant to the answer to question 15379, on influenza, if the Department will *(a)* commission and *(b)* evaluate research on the relationship between (i) angiotensin-blocking drugs used to treat high blood pressure, (ii) angiotensin-converting enzyme 2 and (iii) the prevention of acute respiratory disease syndrome. [41817]

Caroline Flint: Some preliminary international research in this area has already taken place and has produced some findings that may have implications for the treatment of any disease that generates an immune mediated response leading to lung failure. However, the work is laboratory based, the body of evidence small, and the findings not conclusive. Additional work and scientific scrutiny will be required before any possible impact on clinical practice.

Mr. Ian Austin: To ask the Secretary of State for Health pursuant to the answer to question 15379, on influenza, on what *(a)* advice and *(b)* evidential basis the Department decided that there was no logical basis for examining the effect of blood pressure treatments on influenza. [41818]

Caroline Flint: Opinions were sought from members of the flu subgroup of the joint committee on vaccination and immunisation (JCVI). They were not aware of any current research, specifically involving patients, in this area. However, the JCVI Flu sub-group continue to keep under review any new developments in the treatment of influenza.

Hugh Bayley: To ask the Secretary of State for Health what estimate she has made of the percentage of pensioners who received an NHS influenza injection in 2004–05 who subsequently contracted influenza in that year. [52531]

Caroline Flint: Data on the occurrence of influenza-like illness in vaccinated individuals have not been collected, therefore it is not possible to say what proportion of vaccinated individuals in this age group subsequently developed influenza.

Dan Norris: To ask the Secretary of State for Health how many residents of Wansdyke constituency have received free influenza vaccinations in each of the last 10 years. [54392]

Caroline Flint: Influenza vaccine uptake data is collected by primary care trusts (PCT), and are not broken down by constituencies. As Bath and North East Somerset PCT commissions health services for Wansdyke, the number of people aged 65 and over, who received their free influenza vaccinations in this PCT, from 2000 is shown in the table. Earlier data is not available as data collection for influenza vaccinations only started in 2000.

	Rate of uptake (percentage)
2000–01	[1]67
2001–02	[1]65
2002–03	70
2003–04	74
2004–05	71
2005–06	[2]74

[1] Data for Somerset health authority. PCTs set up from 2002.
[2] Provisional 2005–06 data.

Mr. Lansley: To ask the Secretary of State for Health pursuant to her oral statement of 22 November 2005, *Official Report*, columns 1371–72, on seasonal influenza vaccine supplies, what form the review of the seasonal influenza vaccination programme will take; who will undertake the review; what the time scale for the review will be; and what options for changing the seasonal influenza vaccination programme are being considered. [33275]

Caroline Flint: We are in the process of appointing independent assessors to carry out the review. Once complete, the review will submit its recommendations to the Department, which will consider and approve the findings for publication.

MMR Vaccine

Mr. Hancock: To ask the Secretary of State for Health (1) what recent assessment she has made of the take-up of the MMR vaccine in *(a)* Hampshire and *(b)* England; and if she will make a statement; [51564]

(2) what percentage of children have received the MMR vaccination in each *(a)* primary care trust, *(b)* local authority and *(c)* electoral ward in Hampshire in each of the last three years. [51616]

Caroline Flint: Immunisation data by primary care trust, strategic health authorities and nationally are published annually in the statistical bulletin, "NHS Immunisation Statistics, England", copies of which are available in the Library and on the Department's website. Data is not available by local authority or by electoral ward. Data for the last three years is available on the Department's website at:

2002–03—www.dh.gov.uk/assetRoot/04/08/10/09/04081009.pdf

2003–04—www.dh.gov.uk/assetRoot/04/09/95/77/04099577.pdf

2004–05—www.dh.gov.uk/assetRoot/04/11/96/50/04119650.pdf

MSRA

Mr. Hancock: To ask the Secretary of State for Health how many MSRA cases there were in each hospital in *(a)* Hampshire and *(b)* out-of-county hospitals which receive significant numbers of patients from Hampshire in each of the last three years; and if she will make a statement. [53653]

Caroline Flint: The best available information is from the mandatory methicillin resistant *Staphylococcus aureus* (MRSA) blood stream infections surveillance which started in April 2001 and covers acute trusts in England. The number of reported MRSA blood stream infections for acute trusts within Hampshire is shown in the table. The table also includes the Salisbury Healthcare National Health Service Trust which receives out-of-county patients from Hampshire.

Number of reported blood stream infections (bacteraemias)

NHS trust	April 2002 to March 2003	April 2003 to March 2004	April 2004 to March 2005
North Hampshire Hospitals NHS Trust	13	20	13
Isle of Wight Healthcare NHS Trust	16	8	15
Portsmouth Hospitals NHS Trust	105	105	95
Southampton University Hospitals NHS Trust	53	62	75
Winchester and Eastleigh Healthcare NHS Trust	13	18	15
Salisbury Healthcare NHS Trust	17	21	13

Source:
Health Protection Agency

Nutrition/Health Claims

Sarah Teather: To ask the Secretary of State for Health what communication her Department has had with other EU member states about the process for submitting claims to the community register under the proposed EU regulation on nutrition and health claims made on foods; what the outcomes of these discussions were; and if she will make a statement. [54488]

Caroline Flint: Member states are focused on the continuing negotiations more than on the detailed application of future requirements. Nevertheless, officials of the Food Standards Agency will continue informally to engage with representatives to influence a consistent and proportionate approach to compiling lists of specific health claims for submission to the European Commission.

Sarah Teather: To ask the Secretary of State for Health what appeals mechanism exists for claims which are *(a)* not accepted on to the community register and *(b)* prior approved under article 14 of the proposed EU regulation on nutrition and health claims made on foods. [54489]

Caroline Flint: There is no formal appeals mechanism in the current draft of the proposed European Union regulation on nutrition and health claims made on foods.

Sarah Teather: To ask the Secretary of State for Health what her proposals are for the process of submitting claims to the community register under the proposed EU nutrition and health claims made on foods regulation; when her Department will begin the required consultation process; and if she will make a statement. [54490]

Caroline Flint: The Food Standards Agency (FSA) will be undertaking this work on behalf of the Government, and has been discussing informally with industry stakeholders the potential criteria for the submission of the United Kingdom input into the future community list of health claims other than those referring to the reduction of disease risk. The FSA expects to consult publicly on its plans in the coming weeks and in good time to meet the deadlines in the regulation, which is still under negotiation.

Obesity

Dr. Naysmith: To ask the Secretary of State for Health pursuant to the answer of 13 July 2005, *Official Report*, column 1142W, on obesity, what assessment her Department has made of the role of the independent sector, including Slimming World and validated programmes such as slimming on referral in providing effective behaviour change programmes. [40299]

Caroline Flint: The White Paper, "Choosing health" included the following commitment, later confirmed in the delivery strategy published in March 2005:

> "The independent sector may have a key role in providing effective behaviour change programmes in ways that are more acceptable than traditional NHS care to some groups of patients. We will test this as part of a procurement for a 'year of care' for diabetic patients".

Planning is under way on how to test and evaluate the year of care approach. If successful, the lessons could then be applied to other long-term conditions.

It is also for primary care trusts, as local commissioners and providers of services, to determine the most appropriate methods to deliver health care to their populations. Decisions are based on clinical need and effectiveness, as well as local circumstance, drawing on the available evidence and resources, including the independent sector. The National Institute for Health and Clinical Excellence has been commissioned to prepare definitive guidance on the prevention, identification, management and treatment of obesity due in early 2007.

Mr. Hurd: To ask the Secretary of State for Health how many primary school pupils in *(a)* England, *(b)* London, *(c)* the London Borough of Hillingdon and *(d)* the constituency of Ruislip-Northwood have been identified as (i) overweight and (ii) obese in the latest period for which figures are available. [52284]

Caroline Flint: The data is not available in the format requested. The main source of data on the prevalence of obesity and overweight is the Health Survey for England (HSE). The sample size of the Health Survey does not allow figures to be produced at the level of London boroughs or parliamentary constituencies. For children aged two to 10, national and Government office region (GOR) figures are presented using the national body mass index (BMI) percentile classification.

The information available is shown in two tables, using the estimated obesity and/or overweight prevalence results of the HSE for 2001, 2002 and 2003. The national level data presented is the most recent available, and shows overweight and obesity prevalence among children. Data at GOR level is only available for obesity prevalence. GOR data provided is the most recent available and use combined information from the 2001 and 2002 surveys.

Overweight and obesity prevalence among children aged two to 10, England, 2001–03

Percentage

Aged 2–10 with valid BMI	*2001*	*2002*	*2003*
Obese	13.1	15.5	13.7
Overweight including obese	27.9	28.5	27.7
Bases (weighted) aged 2–10	2,129	4,154	1,774
Bases (unweighted) aged 2–10	1,893	3,984	1,733

Note:
Prevalence based on the United Kingdom national BMI percentile classification.

Obesity among children under 11, 2005 Department of Health and the Health and Social Care Information Centre

Keith Vaz: To ask the Secretary of State for Health how many *(a)* men and *(b)* women her Department estimates to be overweight, broken down by ethnic group. [52700]

Caroline Flint: The main source of data on the proportion of adults who are overweight broken down by ethnic group is the health survey for England (HSE). The most recent data on the proportion of adults who are overweight, broken down by ethnic group (where possible), comes from the HSE 2004 headline results.

The available data is shown in the table.

Percentage of adults overweight (BMI over 25 kg/m^2) by minority ethnic group and general population, England 2004 Aged 16 and over with valid height and weight measurements

	Black Caribbean	*Black African*	*Indian*	*Pakistani*	*Bangladeshi*	*Chinese*	*Irish*	*General Population*
Men (percentage)	67.4	61.8	53.2	55.5	44.4	36.8	67.1	66.5
Women (percentage)	64.5	69.8	55.2	62.3	50.8	24.9	58.0	57.1
Bases (weighted)								
Men	380	291	798	336	143	135	1,574	39,244
Women	500	344	921	387	153	136	2,008	39,803

Percentage of adults overweight (BMI over 25 kg/m^2) by minority ethnic group and general population, England 2004 Aged 16 and over with valid height and weight measurements

	Black Caribbean	*Black African*	*Indian*	*Pakistani*	*Bangladeshi*	*Chinese*	*Irish*	*General Population*

Men	317	297	482	346	330	307	420	2,444
Women	459	332	546	391	353	308	555	3,135

Source:
Health Survey for England 2004: The Health of Minority Ethnic Groups—headline tables.

Keith Vaz: To ask the Secretary of State for Health what assessment her Department has made of the main health concerns related to obesity. [52702]

Caroline Flint: The Department recognises the effect of obesity on disease conditions in children and adults, as shown in summary research evidence reported by the National Audit Office, the World Health Organisation, the Health Select Committee, and the 2003 Health Survey for England. Obesity is an important risk factor for a number of chronic diseases such as heart disease, stroke, some cancers, and type two diabetes. In addition, obese people are more likely to suffer from a number of psychological problems such as low self-image and confidence, social stigma, reduced mobility and a poorer quality of life.

Keith Vaz: To ask the Secretary of State for Health what steps she has taken to meet the Government targets to reduce levels of obesity in England. [52703]

Caroline Flint: Tackling obesity is a key priority for the Government. In July 2004, a public service agreement target has been set to halt the year-on-year rise in obesity among children aged under 11 by 2010 in the context of a broader strategy to tackle obesity in the population as a whole.

The Department has a range of ongoing initiatives to tackle obesity in both children and adults. The National Institute for Health and Clinical Excellence (NICE) has been commissioned to prepare definitive guidance on the prevention, identification, management and treatment of obesity due in early 2007. Pending NICE guidance, tools are being developed to support the national health service in tackling obesity including an obesity care pathway for both adults and children, a weight loss guide and an obesity toolkit. Guidance on measuring children's height and weight was published on 11 January 2006. An obesity social marketing campaign is being developed to be launched in the autumn of 2006, mainly targeting children and their parents.

In addition, specific action on diet and physical activity includes healthy start, school food, food in hospitals/prisons/armed forces, work on salt, fat and sugar, promotion of foods especially to children, five a day, local exercise action pilots, football and health, pedometers, and sustainable travel towns.

Parliamentary Questions

Steve Webb: To ask the Secretary of State for Health when she expects to answer the question tabled on 16 January by the hon. Member for Northavon, on dental practices, ref 43373. [55014]

Ms Rosie Winterton: A reply was given on the 1 March 2006.

Pesticides

Mr. Drew: To ask the Secretary of State for Health whether she has accepted the recommendation of the Advisory Committee on Pesticides in relation to systematic surveillance of chronic diseases linked to pesticide exposure. [52078]

Caroline Flint: The Department will be contributing to the Government response to the Royal Commission on Environmental Pollution's report, "Crop Spraying and the Health of Residents and Bystanders", which is being co-ordinated by the Department for Environment, Food and Rural Affairs.

Departmental officials have been discussing with the pesticides safety directorate and the Health Protection Agency issues of common interest with respect to the report. Officials are awaiting advice from the committee on toxicity of chemicals in food, consumer products and the environment, which will be considered in addition to the recommendations given by the advisory committee on pesticides before a response is published.

Post-exposure Prophylaxis

Mr. Burstow: To ask the Secretary of State for Health what progress her Department has made in ensuring every *(a)* sexual health clinic and *(b)* accident and emergency unit is able to offer post-exposure prophylaxis to patients; and if she will make a statement. [48477]

Caroline Flint: The development of services for people with HIV and other sexually transmitted infections continues to be undertaken within the context of devolving decisions about the allocation of resources to strategic health authorities and primary care trusts (PCTs). This provides new freedoms and responsibilities for the commissioning and prioritisation of health care to local health bodies that are closest to the people they serve, and best placed to respond to their needs.

To support them, however, the Department funded The Medical Foundation for AIDS and Sexual Health to produce the "Recommended Standards for NHS HIV Services", published in 2003. This states that:

> "the NHS should make non-occupational PEP available to all who need it and develop protocols for provision".

These standards were disseminated to PCT sexual health leads in England.

Improving access to and awareness of post exposure prophylaxis (PEP) also forms part of our broader, national, sexual health policy and HIV prevention

work, which targets those most at risk of infection. We have funded the Terrence Higgins Trust to do national awareness-raising of PEP for men who have sex with men, which is the group most at risk of HIV transmission occurring in the United Kingdom.

Prevenar

Keith Vaz: To ask the Secretary of State for Health at what price her Department expects to secure Prevenar for the NHS; and what steps have been taken to ensure security of supply. [49683]

Caroline Flint: The contract that has been agreed provides for sufficient vaccine for the routine programme and the catch-up and includes penalty clauses to ensure security of supply. The manufacturer is confident that it can provide the necessary quantities of vaccine.

Sexual Health

Sandra Gidley: To ask the Secretary of State for Health how many people accessed genito-urinary medicine clinics in each of the last five years. [54216]

Caroline Flint: Data on the number of people accessing genito-urinary medicine (GUM) clinics in England are not held centrally. The table shows the number of diagnoses made and other services provided at GUM clinics in England for males and females between 2000 and 2004. The data represent the number of first attendances for each condition or item of service provided in each quarter.

Number of diagnoses and other items of service provided (work load) at genitor-urinary medicine (GUM) clinics in England by sex: 2000–04

	Male	*Female*	*Total*
2000			
Total diagnoses	260,283	309,021	569,304
Total work load	272,499	300,780	573,279
Total	532,782	609,801	1,142,583
2001			
Total diagnoses	276,971	330,724	607,695
Total work load	323,168	349,994	673,162
Total	600,139	680,718	1,280,857
2002			
Total diagnoses	294,942	348,738	643,680
Total work load	403,244	427,869	831,113
Total	698,186	776,607	1,474,793
2003			
Total diagnoses	313,482	359,749	673,231
Total work load	657,583	718,256	1,375,839
Total	971,065	1,078,005	2,049,070
2004			
Total diagnoses	330,789	367,164	697,953
Total work load	750,358	804,402	1,554,760
Total	1,081,147	1,171,566	2,252,713

Notes:
1. Total diagnoses: only the first diagnosis of a condition is recorded for each patient in every quarter. This category includes all A, B, C and E KC60 codes
2. Total work load: only the first presentation of a condition is recorded for each patient in every quarter. This category includes all D, P and S KC60 codes

Source:
KC60 Returns

Sandra Gidley: To ask the Secretary of State for Health what the take-up rate has been for the chlamydia screening test pilot scheme launched in 2005 in conjunction with Boots; and how many samples *(a)* have been returned and *(b)* tested positive. [54217]

Caroline Flint: As of 15 February 2006 the total kits issued is 11,261 with samples returned currently running at 5,267. The number of positive results is 531.

Sandra Gidley: To ask the Secretary of State for Health what the waiting times for an appointment at a genito-urinary medicine clinic in England were in *(a)* 2004 and *(b)* 2005, broken down by primary care trust. [54219]

Caroline Flint: Waiting times data for genito-urinary medicine clinics in England in 2004 and 2005 by primary care trust area of residence has been placed in the Library.

Sandra Gidley: To ask the Secretary of State for Health pursuant to the Answer of 26 January 2006, Official Report, column 2340W, if she will provide a breakdown of the number of cases of *(a)* chlamydia, *(b)* gonorrhoea, *(c)* syphilis, *(d)* genital warts and *(e)* genital herpes diagnosed in genito-urinary medicine clinics in England from 1997 to 2004 by primary care trust area. [54440]

Caroline Flint: The available data breaking down the number of cases of chlamydia, gonorrhoea, syphilis, genital warts and genital herpes has been published on the Health Protection Agency's website at: www.hpa.org. uk/infections/topics_az/hiv_and_sti/epidemiology/dataresource.htm.

Data are presented by strategic health authority and are only available from 2000.

Sugar

Mr. Ancram: To ask the Secretary of State for Health what studies have been *(a)* commissioned and *(b)* evaluated by her Department on the potential dangers to health from the inclusion of sugar in foodstuffs; and if she will list make a statement. [42626]

Caroline Flint: The Department has not commissioned any recent research. A useful summary of relevant research is contained in the article "Dietary Effects on Dental Disease" published in volume four of the journal Public Health Nutrition (pages 569–91).

Although sugars are not directly related to the development of cardiovascular disease or diabetes, increased consumption could increase the intake of food energy. Energy intake in excess of energy expended can lead to obesity. In predisposed people, foods high in sugar could have undesirable metabolic effects such as elevation of blood glucose and insulin concentrations. Furthermore, sugar is the most important cause of tooth decay.

Telecommunications Masts

Keith Vaz: To ask the Secretary of State for Health (1) whether her Department has commissioned follow-up work to the Stewart Report on the health effects of mobile telephone masts; [52694]

(2) if she will make a statement on Government policy concerning the health effects of 3G base stations. [52695]

Caroline Flint: The Stewart Report in 2000 comprehensively reviewed the scientific literature and concluded that

"the balance of evidence to date suggests that exposures below [international] guidelines do not cause health effects to the general population".

More recently, "Mobile Phones and Health 2004", reiterated the Stewart Report's conclusions noting that

"there is a lack of hard information showing that the mobile phone systems in use are damaging to health."

Both the above reports, however, recommended a precautionary approach to the use of mobile phone technology pending the availability of more robust scientific research results. The reports are available on the Health Protection Agency's radiation protection division's (HPA-RPD) website at www.hpa.org.uk/radiation.

The HPA-RPD periodically evaluates the worldwide scientific research relating to mobile phone technology and health including that relevant to new and emerging technologies such as third generation (3G) mobile phones. In response to the Stewart Report recommendations, the independently managed Mobile Telecommunications and Health Research (MTHR) programme is supporting a number of studies into the possible health effects of mobile phone technology in general and these are described on the MTHR website at www.mthr.org.uk. Following the results of Dutch research, in 2003, on 3G base station exposures apparently showing a health effect, the MTHR programme decided to support work at the University of Essex into the symptoms experienced by 3G base station exposures on volunteers. Similar studies of 3G exposures are also being replicated in other countries.

All mobile phones and base stations in this country comply with international guidelines that are based on comprehensive reviews of the scientific literature. Measurements undertaken by both the HPA and by Ofcom (www.ofcom.org.uk) have consistently shown that exposures to radio signals from base stations, including those from 3G stations, are lower than the international guidelines.

Tuberculosis

Dr. Murrison: To ask the Secretary of State for Health (1) what guidance was issued by her Department to *(a)* parents, *(b)* health care professionals and *(c)* primary care trusts about recent changes for BCG vaccination schedules; and on what dates the guidance was issued; [51804]

(2) what tuberculosis public awareness initiatives her Department has sponsored since January 2002; and if she will publish the assessment of the impact of the initiatives. [51805]

Caroline Flint *[holding answers 15 February 2006]:* Information resources in support of the Bacillus Calmette-Guerin (BCG) immunisation programme have been available for many years. Since January 2002 the Department has produced a leaflet in support of the BCG vaccination school campaign, entitled 'A guide to BCG and TB for school years 5–9' and a BCG factsheet. In October 2003, the Department produced a leaflet entitled 'BCG and your baby' to be given to parents when their babies were given BCG vaccine. All of these resources were available free from the Department's publications line and on the www.immunisation.nhs.uk website.

The Department produced a leaflet, factsheet, poster and information card in support of World Stop TB day in March 2005, working in partnership with the charity TB Alert. These resources were sent to general practitioner surgeries, community pharmacies, NHS Direct and walk-in centres, and tuberculosis (TB) clinics and nurses. The Department also created a web page on www.immunisation.nhs.uk with information on TB.

The chief medical officer announced changes to the BCG programme via a letter to the medical profession and primary care trusts on 6 July 2005. In support of these changes an updated leaflet, factsheet, and poster were produced and sent directly to the aforementioned groups. All of these resources were aimed at raising awareness of TB, and also informing health professionals and the general public alike, of the changes to BCG policy. All these resources were also made available to order free-of-charge via the Department publications line.

The 6 July 2005 policy changes also meant that the tuberculin skin test was given in a different way, with the Mantoux test replacing the Heaf test. The Department produced a flip chart and DVD for training purposes. These were made available to order free-of-charge via the Department publications line and sent directly to all TB clinics. Following these changes, the Department held a meeting of immunisation co-ordinators who are responsible for implementation of the BCG programme within their localities. The public information materials were shared with the co-ordinators and their views obtained.

The Department has also carried out public awareness testing on matters relating to TB and its control, and all information materials on TB and BCG are pre-tested with members of the public.

Daniel Kawczynski: To ask the Secretary of State for Health what factors underlay the decision to end vaccinations for tuberculosis for children in low-risk areas. [51835]

Caroline Flint: The Joint Committee on Vaccination and Immunisation (JCVI) has regularly reviewed the Bacille Calmette Guerin (BCG) vaccination programme. After reviewing all available scientific and epidemiological data the JCVI recommended that it is now time to stop that national schools' based programme in favour of selective vaccination of high-risk infants and other groups.

Children who would otherwise have been offered BCG vaccination through the schools programme will now be screened, tested and vaccinated if appropriate. It is therefore the responsibility of the primary care trusts to arrange suitable screening opportunities outside of the school setting.

Tuberculosis Inoculation (Shrewsbury and Atcham)

Daniel Kawczynski: To ask the Secretary of State for Health if she will reverse the decision to stop the tuberculosis inoculation programme for children in Shrewsbury and Atcham constituency. [52646]

Caroline Flint: Since the introduction of the Bacille Calmette Guerin (BCG) schools programme in 1953 the epidemiology of tuberculosis has changed from a disease of the general population to one predominantly affecting high-risk groups. The new recommendations are aimed at delivering an improved targeted risk based programme. The widespread introduction of targeted BCG vaccination means that the majority of children at high risk of tuberculosis will now be vaccinated in early life.

FOREIGN AND COMMONWEALTH AFFAIRS

Arms Exports Controls

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with his counterparts at the G8 on arms exports controls and the case for a binding international treaty. [55506]

Dr. Howells: In 2005 the G8 Leaders agreed that the

"development of international standards in arms transfers . . . would be an important step toward tackling the undesirable proliferation of conventional arms".

We are now taking this agenda forward with a number of international partners (including individual G8 members) by building support for an international treaty on the trade in all conventional arms. We will continue this work during 2006 with the aim of securing the start of a formal process at the earliest opportunity.

Guantanamo Bay

Ms Abbott: To ask the Secretary of State for Foreign and Commonwealth Affairs what response he has made to the recent UN report on the Guantanamo Bay Detention Camp. [54608]

Dr. Howells: The Government have made clear publicly and privately that it regards the circumstances under which detainees continue to be held in Guantanamo as unacceptable, and that the current use of the Guantanamo Bay detention facility is an anomaly that should be brought to an end sooner rather than later. We will continue to do so. It is important to remember, however, the circumstances which led to Guantanamo Bay. Nearly 3,000 people were killed during the terrorist attacks on 11 September 2001.

International Arms Trade Treaty

Mr. Keetch: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government are taking to engage constructively with *(a)* Russia, *(b)* the USA, *(c)* India, *(d)* Egypt and *(e)* Israel on the development of an international arms trade treaty; and if he will make a statement. [55190]

Dr. Howells: The Government are committed to pursuing a treaty on the international trade in all conventional arms. We believe that such a treaty needs to include a wide range of signatories, including the world's major arms exporters. We are engaging with other countries at various levels, including in Ministers' contacts with their counterparts, through specific events, direct expert-level talks and our network of overseas Posts. Most recently a cross-Whitehall team visited Moscow to discuss the initiative with their Russian counterparts. This work will continue, including in further contacts with Russia, and with the USA, India, Egypt and Israel, with the aim of building the consensus needed for the start of a formal process at the UN at the earliest opportunity.

Mr. Keetch: To ask the Secretary of State for Foreign and Commonwealth Affairs what cross-departmental discussions have taken place to ensure a co-ordinated and coherent approach towards promoting an international arms trade treaty; and if he will make a statement. [55192]

Dr. Howells: There is cross-departmental commitment to promoting an international treaty on the trade in all conventional arms. Two cross-departmental working groups, one at working level and one at Director General level, meet regularly to discuss this work. The groups, chaired by the Foreign and Commonwealth Office, include representatives of the Department for International Development, Ministry of Defence and Department for Trade and Industry. The senior level group also includes representatives from Cabinet Office. Other Departments will be involved as necessary.

Iraq

Mr. Rob Wilson: To ask the Secretary of State for Foreign and Commonwealth Affairs how much was spent on armoured civilian vehicles by his Department for operation in Iraq between April 2003 and December 2005; and how many such vehicles were purchased by his Department in that period. [54292]

Dr. Howells: The total amount spent on armoured civilian vehicles by the Foreign and Commonwealth Office (FCO) for operation in Iraq between April 2003 and December 2005 was £11,637,500. The number of vehicles purchased by the FCO within that period was 133.

Mr. Rob Wilson: To ask the Secretary of State for Foreign and Commonwealth Affairs what the cost to his Department was of *(a)* preparing and *(b)* deploying (i) Civil Service and (ii) non-Civil Service (A) UK and (B) non-UK personnel to Iraq between April 2003 and December 2005; and what the salary costs of personnel in each category were. [54295]

Dr. Howells: The scope of this question is considerable and would involve officials in research that would be disproportionate to the costs involved in providing an answer.

Kurdish Region

Bob Spink: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will visit the Kurdish region of Iraq during the next 12 months. [54783]

Dr. Howells: My right hon. Friend the Foreign Secretary and I maintain regular contacts with political leaders from all communities in Iraq, including the Kurds. During his 20–21 February visit to Iraq, my right hon. Friend the Foreign Secretary met, among others, President Talabani, the Kurdistan Regional Government President Barzani, Foreign Minister Zebari and Planning Minister Saleh. Security considerations preclude me from announcing specific plans for Ministerial travel in advance, but we will continue to visit Iraq in the next year, and to stay in close touch with its political leaders.

Rendition

Mr. Clegg: To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has asked the United States authorities how many individuals have been rendered by the US via the UK since 1997. [54920]

Dr. Howells: I refer the hon. Member to the written answer given to him on 6 February 2006, *Official Report*, columns 784–85W, by my right hon. Friend the Foreign Secretary.

Spending Review (Efficiency Targets)

Mrs. Villiers: To ask the Secretary of State for Foreign and Commonwealth Affairs how much is expected to be saved as a result of meeting the civil service work force reductions targets for his Department set out in the 2004 Spending Review; and whether these savings count towards the agreed efficiency target for his Department set out in the review. [52799]

Mr. Straw: The Foreign and Commonwealth Office's (FCO) annual savings from reductions in the civil service work force is expected to be £15 million by 31 March 2008. This will count towards the agreed efficiency target for the FCO set out in 2004 Spending Review.

Mrs. Villiers: To ask the Secretary of State for Foreign and Commonwealth Affairs how much of the agreed efficiency target for his Department set out in the 2004 Spending Review is to be cashable; and under what budget headings these cashable efficiency savings will be re-spent. [52827]

Mr. Straw: By 31 March 2008, the Foreign and Commonwealth Office's (FCO) annual efficiency savings will total £86.7 million of which £44.8 million will be cashable. These savings will enable the FCO to operate within the financial budgets set in 2004 Spending Review and to reprioritise its resources, enabling additional expenditure in such areas as combating Afghan Drugs, Counter Terrorism and Engaging the Islamic world.

Mrs. Villiers: To ask the Secretary of State for Foreign and Commonwealth Affairs what the target level of employment expressed as full-time equivalents is in his Department by April 2008, in order to meet his Department's civil service work force reductions target set out in the 2004 Spending Review. [52846]

Mr. Straw: The target level of full-time equivalents and UK based staff in the Foreign and Commonwealth Office (FCO) by 31 March 2008 is 6,245. This includes increases in the number of staff providing services directly to the public, namely Consular and Entry Clearance, that are fully funded by fees paid by users of those services e.g. through the purchase of visas and UK passports. Demand for these services, and hence the income derived from them, is increasing and this enables the FCO to employ more staff to meet the demand. These increases have been agreed with HM Treasury.

Mrs. Villiers: To ask the Secretary of State for Foreign and Commonwealth Affairs what total efficiency savings were achieved by his Department in 2004–05; and whether these count towards the agreed efficiency target for his Department set out in the 2004 Spending Review. [52863]

Mr. Straw: In 2004–05, the Foreign and Commonwealth Office achieved £6.6 million of efficiency savings counting towards the targets set out in the 2004 Spending Review. The agreed target for 2004–05 was £4.7 million.

Mrs. Villiers: To ask the Secretary of State for Foreign and Commonwealth Affairs what baseline figures he is using for assessing progress on his Department's targets to *(a)* rationalise back office functions, *(b)* reduce the overall paybill, *(c)* increase productivity through delivering improved ICT, *(d)* improve the efficiency of procurement practices, *(e)* rationalise back office functions, change procurement practices and reduce the overseas estate of the British Council and *(f)* rationalise back office functions and change procurement practices of the BBC World Service; what progress has been made towards these targets to date; and what the total efficiency savings achieved to date are for these targets. [52925]

Mr. Straw: The Foreign and Commonwealth Office (FCO) (excluding BBC World Service and British Council) has a number of discrete efficiency projects for each of the business areas mentioned in the question, each of which has its own data sources. Details of the FCO's efficiency projects including baselines are set out in the FCO's Efficiency Technical Note published on our website: http://www.fee.gov.uk/Files/KFile/EfficiencyTechnicalNote_2005.pdf. Overall efficiency targets for 2004–05 were met (£6.6 million against a target of £4.7 million), and the FCO is on track to meet its target of £38.7 million for 2005–06.

The efficiency targets for the BBC World Service, agreed as part of the 2004 Spending Review, were £5.5 million for 2005–06 and £7.3 million annually for 2006–07 and 2007–08. The target for 2005–06 is forecast to be achieved. Individual savings targets have been identified for 2006–07.

The British Council has an efficiency target of £13 million to be achieved by the end of 2007–08. These savings are tracked from a baseline of 2004–05. Current plans indicate that savings of £5 million targeted for 2005–06 are on track to be delivered.

NORTHERN IRELAND

Bovine TB

Mr. McGrady: To ask the Secretary of State for Northern Ireland how many Northern Ireland cattle herds that, when first tested for bovine tuberculosis (BTB) in each year between 2003 and 2005, had animals

identified as possible carriers of BTB which were given inconclusive status; and how many such herds had animals proved positive after a second test. [54618]

Angela E. Smith: The number of cattle herds in Northern Ireland that, when first tested for bovine tuberculosis (BTB) in 2003, 2004, and 2005, had animals interpreted as having inconclusive status was 3,849, 4,078 and 3,807 respectively. The number of these herds that had animals deemed positive after a second test was 555 in 2003, 523 in 2004 and 376 in 2005.

Cival Servants (Hospitality)

Mark Durkan: To ask the Secretary of State for Northern Ireland what approval and oversight mechanisms are in place for the acceptance of hospitality from the private sector by senior Northern Ireland civil servants. [53256]

Angela E. Smith: The principles on the receipt of hospitality by a NI civil servant, including senior civil servants, which are set out in the Northern Ireland civil service pay and conditions of service code, clearly state that where a civil servant has any doubts about the propriety of accepting gift or benefit, it should be refused.

Each of the NI Departments and the Northern Ireland Office has departmental hospitality guidelines based on these principles. In addition each Department maintains records for the acceptance of hospitality by all staff, including senior civil servants.

The guidelines on the receipt of hospitality by NI civil servants are currently under review, including approval and monitoring arrangements. When finalised these guidelines and arrangements will apply consistently across all NI Departments.

Departmental Staff

Mike Penning: To ask the Secretary of State for Northern Ireland whether any *(a)* employee of his Department, *(b)* person engaged by his Department as a consultant and *(c)* paid advisor to his Department is a Member of the House of Lords; and if he will make a statement. [52903]

Mr. Woodward: The Northern Ireland Office do not employ any *(a)* employees within the Department, *(b)* persons engaged by the Department as consultants and *(c)* paid advisors to the Department who is a Member of the House of Lords.

Digital Hearing Aids

Dr. McCrea: To ask the Secretary of State for Northern Ireland how many patients were awaiting the supply of new digital hearing aids in each of the health and social services board areas on the last date for which figures are available. [46337]

Mr. Woodward *[pursuant to the reply, 31 January 2006, Official Report, c. 387W]:* I am now able to provide the information.

The number of people in each of the Health and Social Services Board areas who were waiting for a digital hearing aid to be fitted is shown in the following table. Information is in respect of the position at 30 September 2005 (the latest date for which such information is available across all Board areas).

Health and Social Services Board	*Number of people waiting for a digital hearing aid to be fitted*
Eastern	1,011
Northern	272
Southern	1,437
Western	552
Northern Ireland total	3,272

Farm Land

Mr. McGrady: To ask the Secretary of State for Northern Ireland what assessment he has made of the accuracy of his Department's estimates of the amount of land owned by farmers in the *(a)* flat and *(b)* mountain regions of Northern Ireland. [54617]

Angela E. Smith: Land in NI is categorised under three classifications namely lowland (LL), disadvantaged area (DA) and severely disadvantaged area (SDA). The introduction of DARD's new computerised mapping system, the Geographical Information System (GIS), provides accurate information relating to land parcels in terms of both their location, size and classification. This year the GIS has enabled DARD to compare land classification with the original disadvantaged area map agreed with the EU in the 1980s and amend classifications where these were incorrect.

Illegal Drugs

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how many people have been convicted of offences involving the importation and distribution of illegal drugs into Northern Ireland in each of the last five years. [53073]

Mr. Hanson: The following table provides statistics for calendar years 2000 to 2004 for the number of convictions for importing, distributing and all other drug-related offences. 'Distribution' has been interpreted as supply of controlled drugs and possession with intent to supply. Figures for 2000 and 2003 are not directly comparable to those for 2004 due to the differing data sources and collation methods. Further explanation of this is provided in the footnotes.

Table 1: Convictions for drug related offences 2000–04

	2000	*2001*	*2002*	*2003*	*2004*
Importing	3	0	0	0	2
Distributing	188	148	109	106	235
Other	458	322	306	392	n/a
Total	649	470	415	498	n/a

n/a = not available.

Notes:

1. Figures for 2000–03 are sourced to the Northern Ireland Office and are based on a principal offence rule. Thus only where illegally importing or distributing drugs is the most serious offence tried at a court sitting, will that individual be counted in the above table.
2. 2004 figures are sourced to the Public Prosecution Service. Figures may include offenders who have been convicted of other more serious offences. However where one offender has been

convicted of several offences of illegally importing or distributing drugs as part of the same criminal case, only the most serious of these is recorded.

Lisanelly Barracks

Mark Durkan: To ask the Secretary of State for Northern Ireland what plans the Government have to consult with the community and stakeholders in Omagh about the future of the Lisanelly Barracks site in Omagh. [53202]

Mr. Hain: The hon. Gentleman will be aware that, subject to the maintenance of an enabling environment, Lisanelly Barracks will close no later than 1 August 2007 as part of the revised Normalisation Programme.

Arrangements exist through the Northern Ireland Administration (NIA) to ensure that the MOD is aware of all public sector interest in their sites as they become available. Lisanelly Barracks is freehold and MOD will offer the site at market value to the NIA for first refusal. If it is not required by the NIA, the site will be offered for sale to the wider public sector through a Clearing House, run by the Valuation and Lands Agency, again at market value. If no interest is expressed through these routes the site may, depending on the circumstances, be offered to the former owner. Only after that process would the site be advertised and sold on the open market.

At this stage it is too early to predict what consultation will take place on the site's future.

Prisoners

Lady Hermon: To ask the Secretary of State for Northern Ireland what the average annual cost of housing *(a)* female and *(b)* male prisoners in Northern Ireland has been over the last five years. [53170]

Mr. Woodward: The Northern Ireland Prison Service reports the annual cost of housing prisoners in Northern Ireland, as measured by cost per prisoner place. Cost per prisoner place is calculated by dividing service-wide operating costs by the number of staffed prisoner places available for accommodation.

Until June 2004 female prisoners were housed on the Maghaberry site and since then they have been housed at the Hydebank Wood site. In both locations female prisoners and male offenders have shared common capital, staffing and administration costs.

The Prison Service does not separately report cost per prisoner place by sex. The average service-wide cost per prisoner place over the last five years was:

	£
2004–05	85,935
2003–04	81,426
2002–03	68,999
2001–02	71,475
2000–01	74,580

Until 2002–03 Government accounting required costs to be recognised on a cash basis. From 2003–04 costs are calculated on a resource basis. With resource accounting introducing capital charges such as depreciation and cost of capital, NIPS cost per prisoner place increased significantly in 2003–04.

Prisons

Mr. Peter Robinson: To ask the Secretary of State for Northern Ireland what the cost per prison place was in each prison in Northern Ireland in *(a)* 1995, *(b)* 2000 and *(c)* 2005. [53001]

Mr. Woodward: The figure for 1994–95 is based on cost per prisoner, as opposed to cost per prisoner place on which the figures for 1999–2000 are based. The cost per prisoner is calculated by dividing the net operating costs by the average number of prisoners. The cost per prisoner place is calculated by dividing the net operating cost by the number of staffed prisoner places. The cost per prisoner for 1994–95 was calculated on a cash basis. Thereafter the cost per prisoner place measurement was established, first on a cash basis (until 2002–03) then on a resource basis.

The Northern Ireland Prison Service calculates these costs on a service-wide basis so figures are not available for individual establishments. Outturns are as follows:

Cost per prisoner—1994–95

	£ (cash basis)
Northern Ireland Prison Service	74,447

Cost per prisoner place

£

	1999–2000 (cash)	2004–05 (resource)
Northern Ireland Prison Service	77,749	85,935

Prosecutions

David Simpson: To ask the Secretary of State for Northern Ireland how many people were convicted of polluting waterways in Northern Ireland in each of the last 10 years. [36547]

Angela E. Smith: The records held by the Environment and Heritage Service of Department of the Environment on convictions for water pollution offences relate to the year in which the offences were committed. Convictions are in some cases against companies rather than people. The number of convictions imposed by the courts to date for incidents over the last ten years are as follows:

Year in which pollution offences occurred	Total number of convictions
1996	107
1997	75
1998	88
1999	67
2000	60
2001	95
2002	95
2003	107
2004	48
2005	6

[1] Plus 15 cases pending
[2] Plus 29 cases pending
[3] Plus 59 cases pending

The totals in the table relate to outcomes where either a fine, a conditional discharge or an absolute discharge was imposed. All are convictions.

Racial Hostility Offences

Mark Durkan: To ask the Secretary of State for Northern Ireland how many penalties for offences motivated by hostility towards a person's race have been increased since the Criminal Justice (No. 2) (Northern Ireland) Order 2004 made provisions for increased penalties. [53357]

Mr. Hanson: The information is currently not systematically recorded as requested. Court sentences are logged as substantively as finally pronounced in court without the impact of all of the aggravating and mitigating factors that may have had a bearing on individual disposals. However, the Government will be working with enforcement and prosecution authorities to explore how a mechanism could be put in place to collect this information.

Recyled Paper

David Simpson: To ask the Secretary of State for Northern Ireland what percentage of paper used in printed publications in each of the last 10 years by each Department in Northern Ireland was from recycled sources. [53144]

Angela E. Smith: The information sought by the hon. Member could only be provided at disproportionate cost. Each Northern Ireland Department is aware that communicating effectively with target audiences through printed publications must be balanced with the need to ensure that minimum levels of wastage are incurred, including the use of recycled paper. Officials in the Office of the First Minister and Deputy First Minister are currently conducting a review of practice across Departments, since October 2005, on the printing and distribution of Government publications to ensure that appropriate measures are being taken to ensure value for money.

Road Tolls

Mr. Peter Robinson: To ask the Secretary of State for Northern Ireland whether he plans to implement toll payments for road usage in Northern Ireland. [52992]

Mr. Woodward: The Chief Executive of Roads Service (Dr. Malcolm McKibbin) has been asked to write to the hon. Gentleman in response to this question.

Letter from Dr. Maclcolm McKibbin, dated 28 February 2006:

You recently asked the Secretary of State for Northern Ireland a Parliamentary Question about whether there are plans to implement toll payments for road usage in Northern Ireland.

As this issue falls within my responsibility as Chief Executive of Roads Service, I have been asked to reply.

You may be aware that the Regional Transportation Strategy (RTS) for NI 2002–12, whose strategic direction and underlying principles were endorsed by the Assembly in July 2002, contains no proposals to introduce road tolling in Northern Ireland. This position remains, however, the RTS did contain a commitment to monitor the impacts of fiscal demand management measures, such as congestion charging. This is reflected in both the Belfast Metropolitan Transport Plan and the Regional Strategic Transport Network Transport Plan, launched by the Minister in November 2004 and March 2005 respectively, where commitments are given to review this position, in the light of experience in other parts of the UK, during the period of the Plans.

Roads Service is continuing to monitor developments in the use of road user charging in Great Britain. In the last two years, for example, officials have been actively involved in the development of the Department for Transport's (DfT) Road Pricing Feasibility Study and in the out workings of Her Majesty's Revenue and Customs' Lorry Road User Charging proposals.

The DfT Road Pricing Feasibility Study recommended that a series of pilot local, or regional, road pricing schemes as the best way to test the various approaches to congestion charging. The DfT's Transport Innovation Fund (TIF) will be the basis for pump priming such schemes in England. We will wait with interest to see what sort of schemes may evolve from the TIF.

You may be aware that the Secretary of State, in his speech to the Fabian Society on 31 January 2006, stated

"I will ... be ensuring that Northern Ireland is fully signed up to the work being done in other parts of the UK on congestion charging and road pricing to help tackle congestion and reduce traffic pollution."

Roads Service is continuing to engage with the Department for Transport and the County Surveyors' Society to ensure this commitment is addressed.

I hope this information is helpful

Schools

Mr. Dodds: To ask the Secretary of State for Northern Ireland what the *(a)* enrolment numbers and *(b)* number of unfilled places are in each (i) Irish medium school and (ii) integrated school in Northern Ireland. [54132]

Angela E. Smith: The following tables show the enrolment number and number of unfilled places for each school in the Irish Medium and integrated sectors.

Irish Medium Schools

School ref.	*School name*	*Approved enrolment number*	*Unfilled places*
1016647	Bunscoil Mhic Reachtain	87	34

CI*—Established as Controlled Integrated School
CI-T—Transformed Controlled Integrated School
GMI—Established as Grant Maintained Integrated School

Mr. Dodds: To ask the Secretary of State for Northern Ireland how much money has been allocated for the development of curriculum materials for *(a)* Irish medium schools and *(b)* integrated schools by the Department of Education in each of the last 10 years. [54136]

Angela E. Smith: *(a)* The Department of Education provided funding for the development of Irish medium curricular materials on an annual basis up to 1999–2000.

	£
1995–96	31,000
1996–97	34,000
1997–98	33,000
1998–99	120,000
1999–2000	235,000

For subsequent years, the Department of Culture, Arts and Leisure provided funding to Foras na Gaeilge, the Irish Language Agency who have a statutory remit to promote the Irish language and who develop Irish curriculum materials. Information is not readily available to assess how much of this was spent on the development of curricular materials.

The Department of Education made one-off allocations for Irish medium curriculum materials of £86,000 in 2003–04 and £67,000 in 2005–06.

Under Common Funding for schools from April 2005, allocations to Irish-medium Post-primary schools and Units includes 25 per pupil to support the development of curricular materials. In 2005–06 this funding totalled £13,100. For primary Irish-medium schools and Units, a per pupil element of £100 is included in the formula allocations. However this level of funding reflects that these schools are required to teach English as an additional curricular requirement at Key Stage 2. It is not therefore possible to disaggregate the totality of funding provided to these schools for curricular materials development.

(b) Nil. Integrated schools do not receive specific funding for the development of curricular materials.

Telecommunications Masts

Mr. Peter Robinson: To ask the Secretary of State for Northern Ireland what assessment he has made of the merits of a holistic planning overview of planned and scheduled planning applications for telecommunications masts in Northern Ireland. [52991]

Angela E. Smith: Prevailing planning policy, which is set out in Planning Policy Statement (PPS) 10 'Telecommunications', attaches considerable importance to keeping the numbers of radio and telecommunications masts, and the sites for such installations, to a minimum, consistent with the efficient operation of the network. Therefore it has not been considered necessary to conduct a holistic planning overview of planned and scheduled planning applications for telecommunication masts.

Toxic Sludge

Mr. Peter Robinson: To ask the Secretary of State for Northern Ireland what assessment he has made of the level of illicit dumping of toxic sludge along the border with the Republic of Ireland. [52968]

Angela E. Smith: The Environment and Heritage Service (EHS) investigates all reports of unauthorised waste disposal in Northern Ireland under the terms of the Waste and Contaminated Land (Northern Ireland) Order 1997. EHS has not identified, on the basis of these investigations, a widespread problem of illegal disposal of toxic sludge along the border with the Republic of Ireland. There is currently one active investigation into a County Armagh site close to the border. Prosecution files have been prepared regarding two additional sites at which sludge wastes from the Republic of Ireland were deposited. Residues arising from illegal diesel laundering operations are dealt with by local government, or other statutory agencies such PSNI or HM Revenue and Customs. EHS records indicate that 170 tonnes of illegal fuel laundering waste were re-consigned for authorised disposal since January 2003. Most originated from the Armagh, and Newry and Mourne council areas.

Mr. Peter Robinson: To ask the Secretary of State for Northern Ireland what assessment he has made of the environmental implications of toxic sludge being dumped on agricultural land. [52979]

Angela E. Smith: The Waste Licensing Regulations (Northern Ireland) 2003 permit the spreading of certain commercial sludges on agricultural land, providing that activity results in benefit to agriculture. These activities are assessed and authorised by the Waste Management and Contaminated Land Unit, of the Environment and Heritage Service (EHS) and would not be permitted if there were deemed to be a risk of adverse environmental impact. Any unauthorised disposal of commercial sludge causing environmental damage would be investigated with a view to prosecution. EHS is not aware of a wide-spread problem in this respect, although prosecution files are being prepared regarding four incidents.

Mr. Peter Robinson: To ask the Secretary of State for Northern Ireland how much the disposal of toxic waste dumped on roads in Northern Ireland has cost in each of the last three years, broken down by constituency. [52980]

Angela E. Smith: The Environment and Heritage Service does not have a statutory duty to remove waste from public roads, and therefore, does not hold information specifically on costs arising from such waste disposal. Such work is carried out by the Department for Regional Development's Roads Service, or, if relating to material in lay-bys or the roadside, by the relevant district council or their contractors.

The Department of the Environment will need to obtain information from Roads Service and each of the 26 district councils. It is expected that it will take several weeks to obtain and collate this information and I shall write to the hon. Gentleman when this has been completed. A copy of the letter will be placed in the Library.

Waste Management

David Simpson: To ask the Secretary of State for Northern Ireland what discussions he has had with Ministers in the Republic of Ireland regarding illegal dumping in Northern Ireland of waste from the Republic of Ireland. [53138]

Angela E. Smith: Discussions on illegal cross-border waste are focused at ministerial and official level.

I met with Ministers Cullen and Roche during my time as Environment Minister and had detailed discussions on a number of waste issues.

As a result of these meetings, Northern Ireland and the Republic of Ireland set up two cross-border working groups covering unauthorised waste activities and the transfrontier shipment of wastes. These seek to stem the flow of unauthorised waste across the border into Northern Ireland through co-ordinated and consistent enforcement. The groups complement each other and have helped to co-ordinate the work of the relevant regulatory bodies in Northern Ireland and Republic of Ireland.

David Simpson: To ask the Secretary of State for Northern Ireland what estimate he has made of the *(a)* total amount and *(b)* average amount per household of domestic waste produced in Northern Ireland in each of the last 10 years. [53152]

Angela E. Smith: The Department of the Environment does not hold data prior to 1998. The following table covers the period from 1998 to date, and sets out the total amount of household waste and the average collected. The latter figure incorporates all waste removed from households, including recyclables.

Some surveys were conducted by calendar years, and others by financial. Future surveys will be undertaken by financial year.

The overall household recycling rate in Northern Ireland has grown from 10 per cent. in 2002 to 18.9 per cent. in 2004–05.

	Total household waste (million tonnes)	*Average household waste collected per household (tonnes/year)*
1998–99	0.866	1.45
1999–2000	0.831	1.38
2001	0.878	1.42
2002	0.902	1.40
2003	0.898	1.37
2004–05	0.919	1.36

Mr. Peter Robinson: To ask the Secretary of State for Northern Ireland how much each district council has received to date via waste management grants. [53066]

Angela E. Smith: The following table shows the composite of all waste management grants paid to district councils to date since grant aid commenced in 2001.

The bulk of grant aid has been paid through the Waste Management Grant Scheme (WMGS). In addition, grant aid has been provided to support schools recycling initiatives along with support for the disposal of fridges and end of life vehicles.

The figure excludes grant aid committed to councils that has not yet been drawn down.

Direct payments to arc21, the waste management group for the eastern region are shown separately, as up to March 2005 contributions from its 11 participating members were paid directly by the Department from their WMGS allocation.

Council	*Total*
Antrim	1,082,008

CULTURE, MEDIA AND SPORT

Broadband

Gregory Barker: To ask the Secretary of State for Culture, Media and Sport what plans she has to fund publicity campaigns encouraging the take-up of broadband in *(a)* East Sussex and *(b)* England. [18716]

Alun Michael *[holding answer 17 October 2005]:* I have been asked to reply.

DTI and DEFRA produced a CD-ROM "A New Way to Live, Work and Play" last year. It contains hundreds of stories and examples of the benefits people around the UK have gained from broadband. The CD-ROM was sent to parish councils, rural community councils, regional development agencies, devolved administrations, intermediary organisations and other interested parties. The material is also available via the DTI website. There has also been regional activity around the UK promoting broadband and take-up.

A new initiative from the Cabinet Office was launched in autumn 2005 to give users confidence using the Internet, under the title "Get Safe Online".

Within East Sussex, "Broadband East Sussex" has been funded by Government and involves Access East Sussex, BT, The Education Authority, The South East England Development Agency (SEEDA), Sussex Enterprise, East Sussex Economic Partnership and the Learning and Skills Council.

Broadband coverage for the South East region stands at 99.9 percent. Coverage for the UK stands at 98.8 per cent.

DEPUTY PRIME MINISTER

Councillors (Pensions/Income)

Mrs. Spelman: To ask the Deputy Prime Minister pursuant to the answer of 14 December 2005, *Official Report*, column 1964–1965W, on councillors (pensions/income), on what date the Department of Transport, Local Government and the Regions issued the press release on the proposals for consultation on pensions for councillors. [42600]

Mr. Woolas: The press release consultation covering documents on allowances and pensions for councillors was published on 12 September 2001. A further consultation on proposed amendments to the Local Government Pension Scheme was carried out on 23 December 2002 following the Government's response to the Transport, Local Government and Regional Affairs Select Committee's Report on 'How the Local Government Act 2000 is Working' (Command Paper 5687).

Student Accommodation

Tim Farron: To ask the Deputy Prime Minister if he will estimate the number of students living in accommodation provided by *(a)* registered social landlords and *(b)* universities in 2005–06. [50813]

Bill Rammell: I have been asked to reply.

For *(a)* Based on figures from the three most recent Survey(s) of English Housing (for 2002–03, 2003–04 and 2004–05) it is estimated that there were, on average over the three year period, 140,000 full-time students living in Registered Social Landlord (RSL) accommodation. This total comprises 75,000 students aged 16–18 and 65,000 aged 19 or more. These figures include students at school who were living at home in their parents' RSL accommodation.

For *(b)* the latest figures from the Higher Education Statistics Agency (HESA) show that, in 2004–05, around 193,000 students on full-time undergraduate courses were living in accommodation described as "Institution maintained properties".

Traffic Enforcement Staff

Tom Brake: To ask the Deputy Prime Minister how many *(a)* traffic enforcement officers, *(b)* traffic wardens and *(c)* council parking attendants have been operating in each police authority area in each year since 2002–03. [51730]

Paul Goggins: I have been asked to reply.

The available statistics are given in the table. Information on council parking attendants is not collected centrally.

Police officers 'traffic' function includes staff who are predominantly employed on motor-cycles or in patrol vehicles for the policing of traffic and motorway related duties. This includes officers employed in accident investigation, vehicle examination and radar duties. This also includes staff who are predominantly employed to support the traffic function of the force including radar, accident investigation, vehicle examination and traffic administration. Also included are those officers working with hazardous chemicals and those administrative staff predominantly serving the internal needs of the traffic function of the force and those officers/staff in supporting roles.

Traffic Wardens[1] by police force area—2003 to 2005

Total	6,902	6,706	7,104

[1] Staff with multiple responsibilities (or designations) are recorded under their primary role or function. The deployment of police officers is an operational matter for individual chief constables.
[2] This table contains full-time equivalent figures that have been rounded to the nearest whole number. Because of rounding, there may be an apparent discrepancy between the totals in this table and totals in similar published tables. Full-time equivalent includes those on career breaks or maternity/paternity leave.
[3] Data quality may be an issue with this force. Kent did not provide data for 2003–04.

Urban Task Force 2005

Mrs. Spelman: To ask the Deputy Prime Minister what response he has made to Lord Rogers's 2005 Urban Task Force's observations in relation to *(a)* the Thames Gateway regeneration scheme governance and *(b)* the Government's regeneration programme. [42606]

Yvette Cooper: On 22 November 2005 the Urban Task Force, chaired by Lord Rogers, launched its report "Towards a Strong Urban Renaissance" reviewing progress to date on delivering the original task force vision set out in 1999 in its previous report "Towards an Urban Renaissance". It is an independent report based on the personal experience of the Urban Task Force members on the ground, designed to "stimulate public debate and encourage new thinking".

This new report acknowledges that there have been some notable successes, and that English cities are very different places from the post-industrial centres of unemployment and failing public services of 20 years ago. The report also identifies challenges to the continuation of the urban renaissance and provides recommendations on steps necessary to strengthen the progress already made.

The Office of the Deputy Prime Minister has welcomed the task force's new report as a useful contribution to our ongoing work on urban design and the cities and regional policy agenda, and will take full account of the report's recommendations in the context of other research and analysis undertaken by the Office of the Deputy Prime Minister and elsewhere. For maximum effectiveness any new approaches must also be integrated with policy developments emerging from, for example, the December 2005 EU Ministerial informal, the Government response to Kate Barker's review of Housing Supply and the consultation on the draft PPS3 document and the Code for Sustainable Homes.

CONSTITUTIONAL AFFAIRS

Central Court of Appeal

Mr. Amess: To ask the Minister of State, Department for Constitutional Affairs how many appeals have been heard at the Central Court of Appeal in each year since 1997; and how many times *(a)* three and *(b)* two judges sat in each year to hear such cases. [49177]

Ms Harman: The following table shows the number of appeals against conviction and sentence[1] heard by the Court of Appeal Criminal Division in each year since 1997. Figures are not available showing the number of times that the court has sat since 1997 in constitutions of two and three judges, except at disproportionate cost.

	Number of appeals heard[1]
1997	8,730
1998	8,471
1999	7,720
2000	7,348
2001	6,609
2002	7,310
2003	7,003
2004	6,909
2005	6,106

[1] Excludes all other hearings e.g. applications for leave to appeal.

Departmental Consultants

Keith Vaz: To ask the Minister of State, Department for Constitutional Affairs if she will list the consultancy firms which have been employed by her Department since its formation. [54097]

Bridget Prentice: My Department was formed in June 2003. A list of the consultancy firms that provided services in 2003–04 and 2004–05 is set out as follows.

Information on current consultancy contracts is not held centrally but is collected annually at financial year-end and could be provided at this time only at disproportionate cost.

Legal Aid

Mr. Peter K[illegible]: To ask the Minister of State, Department for Co[illegible]utional Affairs in how many cases funded by legal aid the claimant won their case in court in each of the last 10 years. [54205]

Bridget Prentice: The information requested is not readily available and could be provided only at disproportionate cost.

Voting Rights

Ms Diana R. Johnson: To ask the Minister of State, Department for Constitutional Affairs what the rationale is for allowing those patients detained under the Mental Health Act 1983 who are eligible to vote under the Representation of the People Act 2000 to vote by post or proxy but not in person at a polling station. [53246]

Ms Harman: The 2000 Act extended voting rights in relation to such persons. Previously they could not register to vote from a mental hospital. The current provisions, implemented under the Representation of the People Act 2000, do restrict a person liable to be detained under section 7 of the RPA 1983, to voting by post or proxy.

The good reasons in support of the current provisions include for example, whether there would be a question as to whether it would be appropriate for any particular patient at the time of an election to be given leave from hospital to vote at a polling station.

WORK AND PENSIONS

Benefits

Helen Goodman: To ask the Secretary of State for Work and Pensions pursuant to the answer of 9 February 2006, *Official Report*, column 1458W, on benefits, whether departmental staff other than those in the Jobcentre Plus division make home visits to benefit *(a)* claimants and *(b)* recipients; and if he will make a statement. [52224]

Margaret Hodge: As set out in the reply to my hon. Friend's question on 9 February 2006, *Official Report*, columns 1458–59W, home visits are carried out by Jobcentre Plus and the Pension Service. The Disability and Carer Service also commissions home visits but these are carried out for them by Jobcentre Plus and the Pension Service, in accordance with a Partnership Agreement between the two services.

Mr. MacNeil: To ask the Secretary of State for Work and Pensions how much was budgeted for council tax benefit in *(a)* England, *(b)* Scotland and *(c)* Wales each year since 1991–92; and what forecasts have been made for future years. [53173]

Mr. Plaskitt: The available information is in the following tables.

Council tax benefit by country

£ million (Nominal terms)

	England	*Wales*	*Scotland*	*Total*
1997–98[1]	1,988	97	241	2,326
1998–99[1]	2,150	110	298	2,557
1999–2000[1]	2,175	110	277	2,561
2000–01[1]	2,198	118	334	2,650
2001–02[1]	2,356	128	347	2,831
2002–03[1]	2,530	139	356	3,026
2003–04[1]	2,883	154	350	3,387
2004–05[1]	3,095	165	370	3,629
2005–06[1]	3,199	178	410	3,786
2006–07[2]	3,503	191	412	4,106
2007–08[2]	3,801	213	447	4,461

Council tax benefit by country

£ million (Real terms, 2005–06 prices)

	England	*Wales*	*Scotland*	*Total*
1997–98[1]	2,391	117	289	2,797
1998–99[1]	2,521	128	349	2,999
1999–2000[1]	2,500	127	318	2,945
2000–01[1]	2,495	134	379	3,007
2001–02[1]	2,608	142	384	3,134
2002–03[1]	2,716	150	382	3,248
2003–04[1]	3,015	161	366	3,541
2004–05[1]	3,168	169	378	3,715
2005–06[1]	3,199	178	410	3,786
2006–07[2]	3,419	186	402	4,007
2007–08[2]	3,614	202	425	4,241

[1] Estimate.
[2] Forecast.

Notes:

1. Expenditure by country has been taken from information held in spreadsheet form by the Department for Work and Pensions, available from 1997–98. The information is not available for years 1991–92 to 1996–97.
2. The country figures are consistent with the total council tax benefit for Great Britain. They are an estimate of money which will be spent in each financial year which was shown in departmental reports after each Budget, except for 1997–98 when the Budget was on 2 of July 1997 (see note 3.). The figures shown are not actual expenditure. Expenditure is available on the DWP internet site.
3. The 2006–07 and 2007–08 figures are forecast and consistent with the pre-Budget report 2005.

Source:

Departmental reports and underlying data, and benefit expenditure tables.

Justine Greening: To ask the Secretary of State for Work and Pensions what estimate the Government has made of the mortality rate of existing incapacity benefit claimants in each year up to 2016; and if he will make a statement. [54982]

Mrs. McGuire: The Department does not explicitly make projections about the mortality rate of existing incapacity claimants.

However, we do have historical information on those leaving incapacity benefit due to death; in the year to February 2005, the number was 28,100.

Justine Greening: To ask the Secretary of State for Work and Pensions what estimate the Government has made of the number of existing incapacity benefit claimants who will reach state retirement age in each year up to 2016; and if he will make a statement. [54983]

Mrs. McGuire: Information is not available in the format requested. The number of those currently claiming incapacity benefit who could reach state retirement age in each year to 2016 is in the table.

People claiming incapacity benefit as at 31 August 2005 who could reach state retirement age in each year to 2016

	Number
2006	115,800
2007	118,200
2008	110,100
2009	105,000
2010	79,400
2011	77,800
2012	79,200
2013	68,300
2014	65,100
2015	60,200
2016	57,700

Notes:
1. Figures are rounded to the nearest hundred.
2. 'Claimant' figures include all incapacity benefit (IB) claimants, including IB credits only cases.
3. Figures do not include severe disablement allowance (SDA) as claimants can remain entitled to SDA past state retirement age.
4. These figures take no account of claimants who may flow on or off the benefit in the future.
5. A woman born before 6 April 1950 attains pension age when she reaches the age of 60. For women born between 6 April 1950 and April 1955 'Equalisation rules' have been applied to gradually raise the pension age. A Woman born after 5 April 1955 attains pension age when she reaches the age of 65.

Source:
DWP Information Directorate, Work and Pensions Longitudinal Study 100 per cent. data.

Financial Assistance Scheme

Michael Gove: To ask the Secretary of State for Work and Pensions whether provision will be made for pensioners who receive Financial Assistance Scheme payments to receive increases *(a)* as they get older and *(b)* to take account of the cost of living increases. [54602]

Mr. Timms: Payments will not increase with age nor be index-linked. This allows the available funds to be spread more widely and benefit more people.

Post Office Closures

Mrs. Dorries: To ask the Secretary of State for Work and Pensions how many branches of the Post Office there were in the county of Bedfordshire in each year since 1997; and if he will make a statement. [54847]

Barry Gardiner: I have been asked to reply.

This is an operational matter for Post Office Ltd. Alan Cook the Managing Director has been asked to reply direct to the hon. Member.

Statutory Sick Pay

Mr. Ruffley: To ask the Secretary of State for Work and Pensions how many own occupation tests were conducted pursuant to the Social Security (Incapacity for Work) Miscellaneous Amendments Regulations 1999 in relation to those claiming statutory sick pay in each of the last three years. [53736]

Mrs. McGuire: The available information is in the table.

Own occupation tests completed for statutory sick pay and statutory maternity pay

	Number
2003	79
2004	123
2005	88

Sure Start

Mr. Stewart Jackson: To ask the Secretary of State for Work and Pensions if he will list visits made by Ministers in his Department to Sure Start schemes and facilities in each parliamentary constituency in England and Wales in the 12 months to 5 May 2005; what was the cost to public funds of each visit; and if he will make a statement. [53765]

Mrs. McGuire: I can confirm that there have been no visits made by any of my Ministers to Sure Start schemes or facilities in England or Wales in the 12 months to 5 May 2005.

HOME DEPARTMENT

Alcohol-related Prosecutions

Rosie Cooper: To ask the Secretary of State for the Home Department how many prosecutions have been brought for *(a)* sales of alcohol to under age children under the Licensing Act 2003 and *(b)* crime and disorder associated with pubs and clubs in West Lancashire since November 2005. [53393]

Hazel Blears: The Licensing Act 2003 came into force on 24 November 2005. Data from the court proceedings database held by the Office for Criminal Justice Reform for 2005 will be available in autumn 2006.

Penalty notices for disorder may be issued for nine Licensing Act 2003 offences. Provisional figures for notices issued since November 2005 will be available in March 2006.

Rosie Cooper: To ask the Secretary of State for the Home Department how many offenders were found guilty of *(a)* drunken and disorderly behaviour and *(b)* drunken and aggravated disorderly behaviour in (i) England and (ii) West Lancashire in each year since 1997. [53394]

Paul Goggins: Data from the court proceedings database held by the Office for Criminal Justice Reform on the number of offenders found guilty for drunkenness and drunkenness with aggravation in Lancashire police force area and England 1997–2004 are given in the table. It is not possible to identify those convicted in West Lancashire, as the data are not collected at this level of detail. Court statistics for 2005 will be available in autumn 2006.

The penalty notice for disorder scheme was brought into effect in all police forces in England and Wales during 2004. Under the scheme the police are able to issue persons committing specified minor offences with a fixed penalty notice. No admission of guilt is required and payment of the penalty discharges all liability for the offence. In 2004 25,591 penalty notices were issued in England and 2,869 in Lancashire police force area for the offence of being drunk and disorderly.

Provisional data for 2005 to the end of September shows that 24,150 penalty notices were issued in England and 3,362 in Lancashire police force area for this offence. It is not possible to identify those issued in West Lancashire, as the data are not collected at that level of detail. The aggravated offence is not included in the scheme.

Number of offenders found guilty at all courts for offences relating to drunkenness, Lancashire police force area and England 1997 to 2004[1]

	Lancashire police force area		*England*	
	Drunkenness, simple[2]	*Drunkenness with aggravation*[3]	*Drunkenness, simple*[2]	*Drunkenness with aggravation*[3]
1997	224	1,237	3,333	22,474
1998	216	1,319	3,710	23,864
1999	182	1,444	3,134	22,764
2000	247	1,682	2,579	22,078
2001	181	1,815	2,424	21,468
2002	177	1,643	2,201	22,741
2003	74	1,574	1,999	23,893
2004	38	675	1,674	17,550

[1] These data are on the principal offence basis.
[2] Includes offences under S.12 Licensing Act 1872, Sporting Events (Control of Alcohol etc) Act 1985 SS.1(4), 1 A(4), 2.(2) and S.12 Criminal Justice and Police Act 2001
[3] Includes offences under S.91 Criminal Justice Act 1967,8.12 Licensing Act 1872, S.174 Licensing Act 1964, S.9(4) Late Night Refreshment Houses Act 1969, S.28 London Hackney Carriage Act 1843J SS.101(1)*(a)*/*(b)*, (4) & (5) Merchant Shipping Act 1995, S.2 Licensing Act 1902 and S.61 Town Police Clauses Act 1847.

Animal Welfare

Mr. Amess: To ask the Secretary of State for the Home Department how many *(a)* charges, *(b)* investigations and *(c)* prosecutions there have been under (i) the Animals (Cruel Poisons) Act 1962, (ii) the Abandonment of Animals Act 1960, (iii) the Docking and Nicking of Horses Act 1949, (iv) the Cockfighting Act 1952, (v) the Breeding and Sale of Dogs (Welfare) Act 1999, (vi) the Protection of Animals Act 1934, (vii) the Protection of Animals Act 1911 and (viii) the Performing Animals (Regulation) Act 1925 in the last 10 years. [53337]

Fiona Mactaggart: Data is not available for the number of defendants charged with, or investigated for offences relating to animal cruelty.

Data held by the Office for Criminal Justice Reform on the number of prosecutions made for offences relating to animal cruelty, is provided in the following table.

Number of defendants prosecuted for offences relating to animal cruelty in England and Wales, 1994–2004[1]

Offence description	*Offence Act*	*1994*	*1995*	*1996*	*1997*	*1998*	*1999*

[1] All data given refer to the principal offence only.

Antisocial Behaviour

Mr. Wills: To ask the Secretary of State for the Home Department how the Government plan to improve help for parents in Swindon whose children are involved in antisocial behaviour. [52918]

Hazel Blears: Parenting is a core element of the Respect programme and is essential for creating a strong society based on mutual respect. Over the next two years we will invest an additional £52 million to start a national programme of change in the way that public services respond to parents.

Nationally all local authorities will receive funding through the roll-out of children's centres and extended schools—a key aim within this being to improve parenting provision. The Respect programme will also include investment in early intervention measures to support vulnerable children and young people and their families, including pathfinders which develop leading practice in supporting parents.

A further £28 million of new funding will be used to set up intensive family support programmes and provide parenting support to the most difficult families. To support parenting professionals a National Parenting Academy will be established to ensure that they have the necessary skills to delivery high quality parenting support.

Swindon is one of the Government's action areas, committed to tackling antisocial behaviour and the Respect Task Force will continue to support local practitioners who are tackling antisocial behaviour and delivering parenting programmes locally.

Mr. Jenkins: To ask the Secretary of State for the Home Department what steps he plans to take to publicise action taken to tackle antisocial behaviour to members of the public in Tamworth. [53450]

Hazel Blears: Our approach to tackling antisocial behaviour has been to prioritise what matters to our communities—empowering people and local agencies to play an active role in establishing and reinforcing the boundaries of what is acceptable. Publicising actions taken to tackle antisocial behaviour is a key element of this work.

As a result of the Crime and Disorder Act Review, the new Police and Justice Bill proposes to create the power to develop national standards for all Crime and Disorder Reduction Partnerships (CDRPs). These will, among other things, ensure that all CDRPs consult and engage with their communities on a regular and on-going basis. National standards will be developed in the coming months. This issue was also covered in more detail in the Government's Respect Action Plan. We want to make sure that we build on good practice and promote a dialogue between local people and local services by ensuring that CDRPs hold regular "face the people" briefings—question and answer sessions open to the public, media and community groups. This should ensure that the public are made aware of actions that are being taken locally to tackle antisocial behaviour in their communities.

Dan Norris: To ask the Secretary of State for the Home Department how many antisocial behaviour orders have been issued in *(a)* Bath and North East Somerset and *(b)* South Gloucestershire in each year since 1998. [54402]

Hazel Blears: Antisocial behaviour orders (ASBOs) introduced under the Crime and Disorder Act (1998) were made available to the courts from one April 1999. From commencement up to one June 2000 data were collected on aggregate numbers only by police force area. A table giving annual data broken down by the local government authority area in which prohibitions are imposed within ASBOs (since one June 2000) is available on the Crime Reduction website at www.crimereduction.gov.uk. This table gives data up to 30 June 2005 (latest available).

Mr. Carmichael: To ask the Secretary of State for the Home Department if he will list the research studies which have been *(a)* conducted and *(b)* commissioned by the Anti-Social Behaviour Unit in the last 12 months; and how many of these studies have been subject to peer review by (i) the Home Office Research, Development and Statistics department and (ii) external academies. [54071]

Mr. Charles Clarke: The Anti-Social Behaviour Unit have commissioned the following projects in the last 12 months:

1. An evaluation of work carried out by ENCAMS to reduce criminal damage. The early stages have been reviewed by the Home Office Research and Statistics department (RDS).

2. A survey of the use of powers to tackle antisocial behaviour amongst Crime and Disorder Reduction Partnerships (CDRP) areas which was undertaken by RDS.

3. Trailblazer perceptions survey which is continually reviewed by RDS.

4. It's Your call which was reviewed by RDS.

The following projects are RDS-led and have been endorsed by the Anti-Social Behaviour Unit:

1. An assessment of the effectiveness of antisocial behaviour orders (ASBOs). This will be peer reviewed by external academics.

2. Evaluation of new powers to remove graffiti from street furniture.

3. Drivers of perceptions of antisocial behaviour.

4. National data collection exercise on dispersal orders.

Cautions (Recidivism Rates)

John Hemming: To ask the Secretary of State for the Home Department what plans his Department has to conduct research into recidivism rates for people issued with cautions. [52373]

Fiona Mactaggart: There are currently no agreed plans for conducting research into the recidivism rates for people issued with cautions.

Information on re-offending is published annually to monitor the target to reduce re-offending for offenders dealt with by the National Offender Management Service (NOMS). The re-offending target for juveniles includes re-offending for young offenders given reprimands or final warnings and these rates are published annually. The most recent data are available on-line in Home Office OLR 08/05: 'Juvenile reconviction: results from the 2003 cohort' http://www.homeoffice.gov.uk/rds/onlinepubs1.html.

The corresponding target for the adult population does not include cautions, only those offenders starting community penalties or being discharged from prison.

Charity Collection Fraud

Angela Watkinson: To ask the Secretary of State for the Home Department what steps he has taken to tackle bogus charity door-to-door collectors. [53237]

Paul Goggins: The Charities Bill, which is currently before Parliament, will establish a new licensing scheme for public charitable collections. As now, local authorities and the police will be responsible for enforcement of the scheme. Unlike now, local authorities will have full details of all the legitimate collection activity that is taking place in their area, making it easier for them to identify and deal with bogus collections. The new scheme builds on existing sanctions, with the addition of two new offences. When these new measures are implemented we will explore with relevant authorities how we can raise awareness and encourage best practice in tackling bogus collections and enforcing the new scheme.

Charity Commission

Mrs. Villiers: To ask the Secretary of State for the Home Department how much is expected to be saved as a result of meeting civil service workforce reductions targets in the Charity Commission. [52808]

Paul Goggins: The total cumulative savings expected to be made as a result of meeting civil service workforce reductions targets by the Charity Commission are at least £2.25 million by March 2008 arising from a reduction of 50 in its full time equivalent posts.

Mrs. Villiers: To ask the Secretary of State for the Home Department what the target level of employment expressed as full time equivalents is in the Charity Commission for April 2008. [52815]

Paul Goggins: The current target level of employment for the Charity Commission for April 2008 is 525 full time equivalents.

Mrs. Villiers: To ask the Secretary of State for the Home Department what total efficiency savings were achieved by the Charity Commission in 2004–05; and whether these count towards current efficiency savings targets. [52818]

Paul Goggins: The total efficiency savings achieved by the Charity Commission in 2004–05 amounted to £0.2 million and contribute to the Commission's target for the 2004 Spending Review period.

Mrs. Villiers: To ask the Secretary of State for the Home Department how much of efficiency savings targets for the Charity Commission are to be cashable; and under what budget headings these cashable efficiency savings will be re-spent. [52832]

Paul Goggins: The Charity Commission's efficiency savings target includes £2.2 million that is cashable. This is generated from back office savings and will be offset against continuing operational activities, and new front line priorities emerging from the forthcoming Charities Bill.

Mrs. Villiers: To ask the Secretary of State for the Home Department what targets he has set for the Charity Commission to achieve *(a)* efficiency savings and *(b)* Civil Service workforce reductions. [52946]

Paul Goggins: The Charity Commission, as a non-Ministerial Government Department, agrees its efficiency savings and workforce reduction targets directly with HM Treasury.

The Commission's targets are:

Cumulative non-cashable savings of £2.025 million;

Cumulative cashable savings of £2.2 million;

A reduction in head count of 50 full time equivalent staff.

Child Protection

Bob Spink: To ask the Secretary of State for the Home Department what assessment he has made of *(a)* the time taken to (i) investigate and (ii) charge individuals under child protection legislation and *(b)* the safeguards during investigations for the communities in which individuals under investigation (A) live and (B) work; and if he will make a statement. [49572]

Paul Goggins: I refer the hon. Gentleman to my answer of 14 February 2006, *Official Report*, column 1963W for part *(a)*.

On part *(b)* there are a number of safeguards for communities during these investigations. The Government guidance for local agencies dealing with

child protection, 'Working Together to Safeguard Children' (1999), makes clear that they should consider the needs of other children who may be affected, (e.g. siblings and other children in contact with alleged abusers), when planning how inquiries should be handled and deciding what action is needed.

More recently, The Sexual Offences Act 2003 provided for risk of sexual harm orders (RoSHOs) which are civil, preventative orders that the police can apply to a magistrates court for in respect of a person over the age of 18 who, on at least two occasions, has engaged in sexually explicit conduct or communication with a child or children under the age of 16. The defendant may or may not have a conviction for a sexual or any other offence. The order may contain any prohibitions that the court considers appropriate but typically would include prohibitions on unsupervised contact with children.

In November 2005 the Department for Education and Skills published guidance on dealing with allegations of abuse against teachers and other staff, which was developed in co-operation with the Home Office and Crown Prosecution Service. The guidance is intended to provide effective protection for children, but at the same time to support school staff by ensuring that cases are dealt with as fairly and quickly as possible. It includes indicative target time scales for different parts of the process.

The Government plans to extend this approach to cover people who work with children in other settings. Implementation will be overseen by the Local Safeguarding Children Boards, to be set up in all local authority areas by April 2006. The guidance can be found at: www.dfes.gov.uk/teachernet/childprotection

Closing the Gap

Mr. Drew: To ask the Secretary of State for the Home Department what the evidential basis was for the statement in Closing the Gap that police restructuring will assist the delivery of policing in rural areas. [47497]

Hazel Blears: Closing the Gap was informed by a confidential national assessment of police forces carried out by Her Majesty's Inspectorate of Constabulary. The assessment was conducted against standards for the delivery of protective services which were agreed with ACPO and piloted in a number of forces. The forces included both metropolitan and rural forces to give a representative sample and to ensure that standards were applicable to both.

The national assessment was that no force achieved the highest standard overall, and only the two largest forces (in terms of officers) were rated as demonstrating significant proactive capability overall. On the basis of their analysis, which addressed the delivery of policing in all existing forces, HMIC recommended a reconfiguration to strategic forces of 4,000 or more officers as the "best business solution".

The primary focus of restructuring is to improve the delivery of policing in all areas and to effectively protect the public. The creation of strategic forces with improved capacity and resilience will help to safeguard local policing by reducing the need to abstract officers from neighbourhood policing teams, and by allowing for greater investment to pro-actively address some of the level 2 criminality which in turn can impact on local neighbourhoods. This will improve the policing service to all communities, both rural and non-rural.

Common Land

Alison Seabeck: To ask the Secretary of State for the Home Department what discussions he has had with the Secretary of State for Environment, Food and Rural Affairs on possible measures to prevent the nuisance use of by-ways and common land. [52345]

Hazel Blears: Home Office Ministers and officials regularly discuss environment-related crime and antisocial behaviour. These discussions have led to a number of legislative changes to tackle the dumping of waste and the gating of highways and by-ways affected by crime and antisocial behaviour.

Community Engagement (Policing)

Mr. Hoyle: To ask the Secretary of State for the Home Department if he will make a statement on the effectiveness of the use of *(a)* community beat officers and *(b)* community support officers in the Chorley constituency. [52622]

Hazel Blears: Deployment of officers to each basic command unit (BCU) in lancashire is an operational matter for the chief constable. A report by Her Majesty's Inspectorate of Constabulary on the southern BCU in Lancashire, which includes Chorley, was published in May 2005 and is on the HMIC website at: http//inspectorates.homeoffice.gov.uk/hmic/methodologies/.

The report acknowledges this BCU's strong commitment to community beat policing and confirms that the community support officers working within the BCU are appropriately deployed, working alongside community beat managers and relevant partner agency staff on high visibility patrol and quality of life and public reassurance initiatives.

Crime

Mr. Randall: To ask the Secretary of State for the Home Department what recent estimate he has made of the levels of *(a)* violent crime, *(b)* car crime, *(c)* robbery and *(d)* burglary in Uxbridge constituency; and if he will make a statement. [53640]

Hazel Blears: Uxbridge comes within the Hillingdon crime and disorder reduction partnership (CDRP) area. The available information for the Hillingdon CDRP is given in the table.

Recorded crime in the Hillingdon crime and disorder reduction partnership area, 2004–05

Offence	*Number of offences*
Violent crime	6,782
Domestic burglary	2,056
Robbery	593
Vehicle crime	4,812

Dr. Cable: To ask the Secretary of State for the Home Department what assessment he has made using the

Home Office Trends in Crime model of the impact on crime rates of *(a)* economic and *(b)* demographic changes in each year since 1995; and if he will make a statement. [53898]

Hazel Blears: The Home Office Trends in Crime model is an empirical model which attempts to explain annual changes in recorded crime in England and Wales by reference to annual changes in a number of economic, demographic, and criminal justice variables. It has been developed by joint external and internal research effort with the purpose of providing the Home Office with a tool for identifying those determinants of crime that are both within and outside of its control.

The model is robust, but highly aggregated. As such it cannot account for all the factors that impact on crime rates. It has nonetheless demonstrated that economic and demographic factors have been important determinants of changes in crime over time.

The model has not been used to attribute annual changes in crime to each of the explanatory variables. However, the model predicts that, if other factors remain constant, a permanent 1 per cent. increase in the growth rate of consumption expenditure reduces the growth rate of crime by about 1.7 per cent. On a similar basis, an increase of 1 per cent. in the growth rate of the proportion of young males in the population would increase the growth rate of crime by about 0.5 per cent.

Dr. Cable: To ask the Secretary of State for the Home Department what changes have been made to the Home Office Trends in Crime model in the last year; and if he will make a statement. [53899]

Hazel Blears: The Trends in Crime model is a forecasting tool developed by the Home Office with the purpose of providing a mechanism to quantify the autonomous determinants of crime using time series data from 1950 to 2004. The model attempts to explain annual changes in recorded crime by annual changes in a combination of economic, socio-demographic and criminal justice variables for the jurisdiction of England and Wales.

Separate models have previously been estimated for five disaggregated property recorded crime types: total burglary, total robbery, theft of and from a vehicle and theft from a shop. These models have been recently updated with no major changes.

New models have been developed for three additional crime types: total theft, criminal damage and violence against the person. These models are currently awaiting peer review.

Coverage of recorded crimes in the Trends in Crime model now accounts for approximately 70 per cent. of total recorded crime.

Criminal Cases Review Commission

Mr. Amess: To ask the Secretary of State for the Home Department how much the Criminal Cases Review Commission received in grant aid in each year since 1997. [47398]

Fiona Mactaggart: The amount of grant in aid received by the Commission each year since 1997 is shown in the following table.

	£
1997–98	4,303,977
1998–99	4,517,134
1999–2000	5,530,000
2000–01	5,415,000
2001–02	6,525,000
2002–03	7,000,000
2003–04	7,800,000
2004–05	5,750,000

Mr. Amess: To ask the Secretary of State for the Home Department pursuant to the answer of 7 February 2006, *Official Report*, column 1094W, if he will place in the Library a list of the cases where *(a)* convictions have been found to be unsafe and *(b)* sentences have been found to be unfair. [53087]

Fiona Mactaggart: Since its inception, the commission had reviewed 7,590 cases by 31 December 2005, including 308 cases which had been referred to the appeal courts. 252 of the 308 referred cases had been heard by the appeal courts which had quashed 156 convictions and reduced 22 sentences. The breakdown by year is set out in the following table.

	Cases not referred	*Convictions referred*	*Sentences referred*	*Convictions quashed by appeal courts*	*Sentences reduced appeal courts*
1997–98	299	10	1	9	1
1998–99	461	27	4	17	1
1999–2000	979	33	3	23	2
2000–01	1,065	41	4	18	4
2001–02	1,164	36	2	26	2
2002–03	952	32	3	28	1
2003–04	871	26	4	18	3
2004–05	780	35	10	12	7
1 April to 31 December 2005	711	29	8	5	1

Deactivated Weapons

Greg Clark: To ask the Secretary of State for the Home Department how many incidents of violent crime using a deactivated weapon were recorded in each year since 1997–98. [54112]

Hazel Blears: Data for recorded crime involving specific types of imitation firearms in England and Wales have been only collected centrally since April 2004. In 2004–05 police recorded one violent offence that involved a deactivated weapon.

Death Statistics

Tim Loughton: To ask the Secretary of State for the Home Department how many people were killed by people diagnosed with a mental illness in *(a)* 2004 and *(b)* 2005. [48068]

Hazel Blears: Available data are in the form of currently recorded homicides where the apparent circumstances of the offence involved a mentally disturbed suspect and were published in table 2.06 of "Violent Crime Overview, Homicide and Gun Crime 2004/05" (HOSB 02/06). Based on information held on 28 November 2005, there were 40 victims in 2003–04 and 30 in 2004–05 where the suspect was considered to be mentally disturbed.

Departmental Catering Budget

Andrew George: To ask the Secretary of State for the Home Department how much and what proportion of his Department's catering budget was spent on fair trade produce in the last period for which figures are available. [49912]

Mr. Charles Clarke: Figures for the entire Home Office estate are not collated centrally. However, at the Department's new headquarters building our facilities manager has estimated that approximately £123,000 was spent on refreshments, primarily provided for meetings with visitors, which were fair trade (Rainforest Alliance/Fairtrade) products since moving in, in early 2005. This represents 25 per cent. of the total of such spending. There were in excess of 130,000 visitors recorded during this period.

Andrew George: To ask the Secretary of State for the Home Department what his Department's policy is on the procurement of fair trade produce for consumption on its premises. [49922]

Mr. Charles Clarke: The Home Office is fully aware of the Government's commitment to support ethical trading wherever possible and provides fair trade tea and coffee as standard refreshments at meetings at some of its key buildings.

In addition a range of fair trade products is available for staff to purchase at some restaurants and cafes on the Home Office estate.

On the public sector prison service estate, prison shops in some establishments sell a small range of fair trade products to prisoners and certain fair trade items are supplied for prisoner catering.

Departmental Recruitment

Mrs. Villiers: To ask the Secretary of State for the Home Department how many job advertisements were placed by his Department *(a)* in total, *(b)* in print newspapers and magazines and *(c)* on a recruitment website in each year since 1997; and at what (i) total and (ii) average cost in each case. [50744]

Mr. Charles Clarke: The information requested is not held centrally and to provide a breakdown as requested could be supplied only at disproportionate costs.

Departmental Staff

Dr. Cable: To ask the Secretary of State for the Home Department how many people were employed by *(a)* HM Prison Service Agency, *(b)* the Criminal Records Bureau, *(c)* the Forensic Science Service, *(d)* the Assets Recovery Agency, *(e)* the Medical Healthcare Products Regulatory Agency, *(f)* the Food Standards Agency, *(g)* the UK Passport Agency and *(h)* his Department in each region in each of the last 12 months for which information is available; and how many and what percentage of posts were vacant in each region in each month. [51319]

Mr. Charles Clarke: The available information is too detailed to be set out in this answer but I will arrange for it to be placed in the House Library. In some cases it has not been possible to provide all the information requested without incurring disproportionate costs, or because data is not collected centrally in the form requested.

DNA Database

Damian Green: To ask the Secretary of State for the Home Department whether there is a target for the number of DNA records to be held in the National Register by December; and if he will make a statement. [47480]

Fiona Mactaggart: There are no targets for the number of persons with a DNA profile on the National DNA database each year, but the Home Office has produced an estimate of the number of persons from England and Wales with a DNA profile held on the database in each year until 2012.

The estimated number of persons from England and Wales who will be recorded on the National DNA database by 31 March 2007 is 3,305,564.

Domestic Violence

Rosie Cooper: To ask the Secretary of State for the Home Department what plans the Government have to improve the services offered to women seeking refuge from domestic violence in West Lancashire. [53383]

Fiona Mactaggart: The Government office for the north west (GONW) ensures that the National Domestic Violence Delivery Plan is linked to the improvement of service provision for women experiencing domestic violence across Lancashire. The Government office also ensures that local partnerships consider domestic violence as part of their negotiation of crime reduction targets with local partnerships.

West Lancashire is currently seeking to recruit a Domestic Violence Co-ordinator by April of this year and domestic violence is a strategic theme in West Lancashire's 2005–08 Crime and Drugs Strategy, one of the outcomes of which is the development of a Domestic Violence Strategy for the district as well as an increase in the reporting of DV incidents.

West Lancashire has received £7,000 domestic violence funding for the last two years and has also contributed part of its Building Safer Communities Funding towards domestic violence. West Lancashire will be part of the Lancashire County Council Local Area Agreement from April 2006 and, within the

Stronger Safer Communities Block, there are two domestic violence outcomes: (1) to increase the number of domestic violence incidents recorded by the police, and (2) to assess the overall provision and effectiveness of local authority services designed to help victims of DV and prevent further occurrences.

Specialist domestic violence courts are being rolled out across Lancashire as part of the Specialist Domestic Violence Court Programme. As a result, Lancashire Strategic Domestic Violence Management Group have been commissioned by Government Office for the North West to undertake a complete gap analysis of all service provision to adults and children who may experience domestic violence with an action plan being drawn up in March 2006 to ensure improvements are made.

Drug Intervention Programme

John Bercow: To ask the Secretary of State for the Home Department in how many cases in the Drug Intervention Programme *(a)* handling stolen goods, *(b)* attenuated acquisitive crime and *(c)* begging was the trigger for a drugs test in 2004–05. [44095]

Paul Goggins: The following table gives a breakdown of drug tests successfully conducted for 2004–05.

In Schedule six to the Criminal Justice and Court Services Act 2000 (as amended by the Criminal Justice and Court Services Act 2000 (Amendment) Order 2004 (S.I. 2004/1892), an offence under section 1(1) of the Criminal Attempts Act 1981 is a trigger offence if committed in respect of an offence under any of the following provisions of the Theft Act 1968-section one (theft), section eight (robbery), section nine (burglary), section 15 (obtaining property by deception), and section 22 (handling stolen goods).

Attempted crimes, begging and persistent begging became trigger offences from 27 July 2004.

Trigger	*Total number of tests*
Handling stolen goods (excluding attempted handling)	1,468
Acquisitive crime (excluding attempted crimes)	40,829
Acquisitive crime (excluding attempted crimes)	39,431
Attempted crimes	1,398
Begging	1,014
Persistent begging	30

Drug Offences

David Davis: To ask the Secretary of State for the Home Department how many children were *(a)* arrested, *(b)* prosecuted and *(c)* imprisoned for (i) drugs offences and (ii) Class A drugs offences in each of the last five years. [47721]

Fiona Mactaggart: The number of children (persons aged between 10 and 17) arrested for drug offences in England and Wales is shown in table A. Data collected centrally cannot be broken down by drug class type.

Table A: Number of children aged 10 to 17 arrested for drug offences in England and Wales, 2000–01 to 2004–05

	Number of arrests
2000–01	16,000
2001–02	17,600
2002–03	19,500
2003–04	18,100
2004–05	14,500

Note:
Includes estimates as not all forces have been able to supply information to the detail required.

Drugs

Mr. Malins: To ask the Secretary of State for the Home Department if he will make a statement on the extent to which the voluntary sector is used for and involved in the provision of treatment of problematic drug users. [44648]

Caroline Flint: I have been asked to reply.

Recorded on the national drug treatment monitoring system, 930 of the 1,306 agencies, which includes young people services, involved in the delivery of drug treatment are within the voluntary sector.

Drug action teams or other local partnerships oversee the commissioning of drug treatment and develop their plans in close consultation with voluntary sector providers.

Elder Abuse

Mr. Sheerman: To ask the Secretary of State for the Home Department what systems are in place among law enforcement agencies to *(a)* record and *(b)* respond to cases of elder abuse. [53863]

Hazel Blears: The information is as follows.

(a) Elder abuse is not a recorded offence category and incidents of elder abuse could be recorded under various offence categories (e.g. serious wounding, common assault, harassment, criminal damage etc). Elder abuse, depending on the specific nature of the incident, can be classified as domestic violence.

Although domestic violence is also not a recorded offence category, police forces are asked to 'flag' domestic violence incidents as they are assessed on their pro-active response to domestic violence incidents through the Police Performance Assessment Framework (PPAF).

(b) "No Secrets", jointly published by the Department of Health and the Home Office in 2000, provides a complete definition of abuse and a framework for councils to work with the police, the NHS and regulators to tackle and prevent abuse occurring. It was the product of a multi-agency steering group, led by the Department of Health, with the full co-operation of the Home Office, the Association of Chief Police Officers, the Association of Directors of Social Services, the voluntary sector and academic bodies. The aim of No Secrets is to ensure that key local agencies, particularly but not solely health, social services and the police, are able to work together to protect vulnerable adults from abuse, by developing local multi-agency

policies and procedures. No Secrets gives local councils the lead for development of adult protection committees. A copy is available in the Library.

External Consultants

Mrs. Villiers: To ask the Secretary of State for the Home Department how much his Department has paid since 2004 to external consultants who had previously been employed by the Department in any capacity within the previous five years. [41200]

Mr. Charles Clarke: Information on whether external consultants have previously been employed by the Department in any capacity is not held centrally. To obtain this information and the total cost of employing such consultants would incur disproportionate cost.

Faith Communities Capacity Building Fund

Lynne Jones: To ask the Secretary of State for the Home Department whether a fund analogous to the Faith Communities Capacity Building Fund exists from which non-religious belief groups may receive grant money. [54260]

Paul Goggins: The Government are investing in a number of funds to support capacity building in the voluntary and community sector:

£80 million in the ChangeUp programme to improve the support available to front line voluntary and community sector organisations. Investment is being made at national, regional and local level and is focused on infrastructure organisations within the voluntary community sector.

£125 million in Futurebuilders fund which is investing in front line VCS public service delivery schemes in priority service areas of health and social care; crime; community cohesion; education and learning; and support for children and young people.

In addition, as part of the implementation of the recommendations within the Russell Commission report the Government are investing £1 million in a programme to build the capacity of voluntary and community sector organisations to involve more young volunteers. 45 national, regional and local organisations have been awarded funding and there will be a programme of training and support offered across England.

Any VCS organisation that can satisfy the criteria for any of the above programmes would be eligible to apply for that programme.

Firearms

Anne Main: To ask the Secretary of State for the Home Department how many arrests have been made in each year since 1997 for possession of firearms; and how many gun-related incidents have been recorded in each of those years. [54477]

Hazel Blears: Available information on arrests for possession of firearms following searches of persons or vehicles under section 1 of the Police and Criminal Evidence Act 1984 can be found in table PA of the Home Office Statistical Bulletin 21/05 "Arrests for Recorded Crime (Notifiable Offences) and the Operation of Certain Police Powers under PACE, England and Wales, 2004/05".

Table 3.01 of the Home Office Statistical Bulletin "Violent Crime Overview, Homicide and Gun Crime, 2004/05"shows the number of notifiable crimes recorded by the police in England and Wales in which firearms (including air weapons) were reported to have been used.

Both bulletins are available on the Home Office website www.homeoffice.gov.uk/rds/hosbpubs1.html.

Anne Main: To ask the Secretary of State for the Home Department what estimate he has made of the number of illegally held firearms in England and Wales. [54478]

Hazel Blears: There are no reliable estimates of the number of firearms held illegally.

Fireworks

Rosie Cooper: To ask the Secretary of State for the Home Department how many penalty notices have been issued in relation to the illegal use of fireworks in *(a)* West Lancashire and *(b)* the Lancashire police force area since the relevant legislation was introduced. [53392]

Hazel Blears: Offences under the Fireworks Regulations 2004 (made under section 11 of the Fireworks Act 2003) for breach of the national fireworks curfew, the illegal possession of category four fireworks and the possession by a person under 18 of an adult firework attract penalty notices for disorder, as well as the offence of throwing fireworks. The offence of throwing fireworks has been included in the penalty notice for disorder scheme since it was introduced nationally during 2004. The offences under the Fireworks Regulations 2004 were brought into the scheme with effect from 11 October 2004. The numbers of penalty notices issued by Lancashire police force area for 2004 and provisional data from January to September 2005 are provided in the table. It is not possible to identify the number of Penalty Notices for Disorder issued in West Lancashire police force area as centrally available data is not broken down to that level of detail.

Number of Penalty Notices for Disorder issued for fireworks offences, Lancashire police force area 2004 and January–September 2005

	Throwing fireworks	*Breach of fireworks curfew*	*Possession of a Category 4 firework*	*Possession by under 18 of adult firework*
2004	14	2	—	1
January-September 2005 (provisional)	11	1	1	1

Source:
RDS—Office for Criminal Justice Reform

Fraud (Bank Accounts)

Mr. Hoban: To ask the Secretary of State for the Home Department what assessment he has made of the level of fraud involving *(a)* basic bank accounts and *(b)* current accounts. [53600]

Hazel Blears: Information is not collected centrally on the level of fraud involving basic bank accounts and current accounts.

Freedom of Information

Bob Spink: To ask the Secretary of State for the Home Department what total sum has been received by his Department for the provision of information under the Freedom of Information Act 2000 in its first year of operation. [48497]

Mr. Charles Clarke: The total sum received by the Department for the provision of information under the Freedom of Information Act is zero.

The Freedom of Information Act allows for public authorities to determine when the cost of processing a request will exceed the appropriate limit, which for central Government are set at £600 and for the wider public sector £450.

Further information on the FOI fees regime can be found on the DCA website at http://www.foi.gov.uk/feesguide.htm.

Graffiti

Anne Snelgrove: To ask the Secretary of State for the Home Department what plans he has to extend the powers of local authorities to remove graffiti from private property. [52689]

Hazel Blears: Defacement Removal Notices as introduced by the Antisocial Behaviour Act 2003 (and amended by the Clean Neighbourhoods and Environment Act 2005) will be commenced on 6 April 2006. This provision enables a local authority to serve a defacement removal notice on the owner of street furniture or property owned by a statutory undertaker when they have failed to remove graffiti or fly-posting.

There are no plans to extend this to cover private domestic property.

HM Inspectorate of Constabulary

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department which major investigations have been inspected by HM Inspectorate of Constabulary since 1997. [49129]

Hazel Blears: HMIC reported on the investigation by Cambridgeshire Constabulary into the murders of Jessica Chapman and Holly Wells on 4 August 2002.

Home Detention Curfew Scheme

David T.C. Davies: To ask the Secretary of State for the Home Department how many people convicted of *(a)* gun crimes and *(b)* drug crimes were released (i) on licence, (ii) on the Home Detention Curfew Scheme and (iii) early, having not reached their sentence expiry date, in each of the last five years. [45844]

Fiona Mactaggart: Information on numbers of those convicted of gun crimes who were released from prison establishments is not available centrally. An indication of the number of releases of those convicted of drugs offences can be found in tables 7.2 of the Home Office Statistical Bulletin: Offender Management Caseload Statistics 2004, a copy of which can be found in the House of Commons Library. This shows the number of sentenced receptions each year.

The number of people sentenced for drugs offences who were released under the Home Detention Curfew Scheme between the years 2001 and 2005, as recorded on the Prison Service IT system, is provided in the following table.

Drug offenders released under the Home Detention Curfew Scheme 2001–05

	Number
2001	2,213
2002	2,669
2003	2,777
2004	2,427
2005	2,530

Notes:

1. These statistics are based on information recorded on the central Prison Service IT system at 9 February 2006. Further updates and amendments may be made to records on this system in future resulting in revised figures.
2. Offence recorded on Prison Service IT system.

Investigations suggest that around 5 per cent. of offence types recorded on this system do not relate to the offence for which they were released on HOC but relate to offences committed after release from prison and before the licence expiry date for their sentence.

Identity Cards

Lynne Jones: To ask the Secretary of State for the Home Department pursuant to the statement by the Parliamentary Under-Secretary of State during the debate on the Identity Card Bill, 13 February 2006, *Official Report*, column 1209, whether the set-up costs for the Identity Card Scheme are included in the £584 million annual cost over 10 years of the scheme. [53754]

Andy Burnham: £584 million is the average annual cost of issuing passports and identity cards to British nationals and operating an identity verification service over a 10-year period. This includes charges for the depreciation and amortisation of capital assets purchased during the set-up of the scheme. Additionally, not all assets required to set up and deliver the scheme will be purchased up front, some will be charged by regular payments over time, and these charges are also included in the figure of £584 million.

However, final decisions as to which assets are purchased up front and what components are delivered through ongoing service charges can only be formalised following the conclusion of the forthcoming procurement process.

Identity Fraud

David Wright: To ask the Secretary of State for the Home Department whether he plans to change the operation of the deed poll system in order to prevent identity fraud. [53881]

Andy Burnham: There are no plans to make any changes to the deed poll process, but we are working with a range of public and private sector organisations to reduce identity fraud. We have introduced a range of measures to tackle identity related crime which are set out at www.identitytheft.org.uk

There are a number of ways in which an individual can change his or her name, of which deed poll is one. A name is one element of a person's identity, but there are others such as date of birth, address and, with the development of technology, biometric information which can uniquely identify an individual. We are committed to reducing identity fraud and this is one of the reasons why we want to establish a national Identity Cards Scheme. The scheme will utilise biometrics and provide people with a highly-secure means of protecting their identity.

Internet (Terrorism)

Mr. Ellwood: To ask the Secretary of State for the Home Department (1) if he will make a statement about progress being made to prevent internet service providers based abroad using the web to promote terrorism; [54287]

(2) when he last met ICANN (Internet Corporation For Assigned Names and Numbers) to discuss the monitoring of the internet to prevent communication between terrorist organisations. [54288]

Hazel Blears: I have had no recent meetings with ICANN (Internet Corporation for Assigned Names and Numbers). However, we continue to co-operate with internet service providers in the UK and abroad to tackle websites that promote terrorism both generally and in relation to specific sites. We are also working closely with international partners in a number of for a including the EU, UN, G8 and OSCE.

Juvenile Offenders

Mr. Stewart Jackson: To ask the Secretary of State for the Home Department how many crimes were committed by juvenile offenders in *(a)* Peterborough constituency and *(b)* the Cambridgeshire area in each quarter since 2001; how many cautions were issued in relation to such cases; and how many children in the Peterborough city council area (i) were convicted, (ii) were in local authority care, (iii) received a reprimand, (iv) received a final warning and (v) were found guilty in each year. [52324]

Hazel Blears: Data held by the juvenile offenders reprimanded, given final warnings, prosecuted, and found guilty of all offences in Cambridgeshire police force area, are provided in the following table. Figures are presented for the years 2001–04. Statistics on court proceedings for 2005 will be published in autumn 2006. It is not possible to separately identify Peterborough as the data are not collected at this level of detail. DfES has advised that for the period 2001 to 2004, the number of looked-after children in Peterborough, were as follows, 355 for 2001, 325 for 2002, 335 for 2003 and 325 for 2004.

Number of juvenile offenders (aged 10 to 17) reprimanded and given final warnings[1], prosecuted[2], and found guilty[3] of all offences in Cambridgeshire police force area—2001 to 2004[4]

Year/quarter	Reprimand[1]	Final warning[1]	Prosecuted[2]	Found guilty[3]
2001	769	241	1,334	29
Q1	223	57	334	236
Q2	226	67	309	227
Q3	171	57	363	249
Q4	149	60	328	217

Number of juvenile offenders (aged 10 to 17) reprimanded and given final warnings[1], prosecuted[2], and found guilty[3] of all offences in Cambridgeshire police force area—2001 to 2004[4]

Year/quarter	Reprimand[1]	Final warning[1]	Prosecuted[2]	Found guilty[3]
2002	681	221	1,431	967
Q1	200	49	333	239
Q2	179	88	376	243
Q3	154	45	375	243
Q4	148	39	347	...42
2003	625	249	1,442	1,077
Q1	136	59	381	269
Q2	187	50	325	247
Q3	155	66	383	282
Q4	147	74	353	279
2004	770	342	1,200	927
Q1	170	86	321	249
Q2	169	97	286	210
Q3	211	83	287	219
Q4	220	76	306	249

[1] Under the Crime and Disorder Act 1 998 cautions were replaced for juveniles with reprimands and final warnings.
[2] Prosecuted at magistrate's courts.
[3] Found guilty at all courts.
[4] All data given refer to the principal offence only.

Life Sentences

David T.C. Davies: To ask the Secretary of State for the Home Department what the shortest amount of time served by a prisoner sentenced to life imprisonment before he or she were released on licence was in each year between 1999 and 2004. [53773]

Fiona Mactaggart: The information requested, as recorded on the Prison Service IT system, is provided in the following table.

Shortest time served[1] by a prisoner sentenced to life before they were released on licence, by year of release

Year of release	Shortest time served (years)[2]
1999	2.0
2000	3.0
2001	2.1
2002	2.5
2003	1.2
2004	2.3

[1] Calculated using the centralised prisons IT system.
[2] Time served under sentence.

Magic Mushrooms

Paul Flynn: To ask the Secretary of State for the Home Department at what point after the implementation of the Drugs Act 2005 the advice given by the Talk to Frank helpline in relation to the status of unprepared magic mushrooms was changed. [54039]

Paul Goggins: The change under the Drugs Act 2006 in relation to magic mushrooms came into effect on 18 July 2005. Prior advice was provided to the Talk to Frank helpline advisers on 14 July 2005.

Manslaughter

Rosie Cooper: To ask the Secretary of State for the Home Department what the *(a)* minimum and *(b)* maximum sentence is for manslaughter; and what the sentencing guidelines are for that offence. [54262]

Fiona Mactaggart: The maximum sentence for manslaughter is life imprisonment; there is no minimum sentence.

There are no statutory sentencing guidelines for the offence. However, the Sentencing Guidelines Council issued a guideline "Manslaughter by Reason of Provocation" on 28 November 2005, and there several Court of Appeal guidelines for the offence of manslaughter.

Muslim Groups (Consultations)

Kerry McCarthy: To ask the Secretary of State for the Home Department what steps he has taken to ensure that, in his Department's ongoing dialogue with faith groups and representatives of British Muslims on issues relating to community cohesion and counter-terrorism, the views of the Somali community are adequately represented. [44137]

Paul Goggins: The Government are committed to engaging with all sections of all faith communities.

Dialogue has been established with representatives from the Somali community at local, regional and national level.

The nine ministerial visits which took place after the London bombings played an important part in informing Government of the steps needed to prevent extremism and improve community cohesion. Representatives from the Somali communities in Birmingham, Bolton, Leicester and Manchester were actively involved in these discussions with Ministers.

Further opportunities for dialogue have been taken, including a recent visit to Ealing and Hounslow by my ministerial colleague, the member for Harrow East, who met representatives from the local Somali community.

The Government will continue to improve and develop its relationship with the Somali community so as to ensure that the views of this community are fully represented.

Muslim Prisoners

David T.C. Davies: To ask the Secretary of State for the Home Department what steps he is taking to ensure that prisoners who are Muslim are offered halal food. [52034]

Fiona Mactaggart: Establishments are required to offer a range of meals that enable prisoners to make preferred choices, including meals suited to their ethnic and religious needs. Muslim prisoners must be offered an appropriate daily main meal choice. The policy emphasises the concept of prisoner choice and requires meal options to be displayed in prominent locations. The Prison Service continues to have discussions with key advisers, including Muslim leaders, representatives from the Halal Food Authority and the Prison Service Muslim Advisor about halal food requirements.

National Offender Management Service

Mr. Llwyd: To ask the Secretary of State for the Home Department whether he expects there will be a protocol or memorandum of agreement with the National Assembly for Wales to facilitate the delivery of the National Offender Management Service in Wales. [49051]

Fiona Mactaggart: Proposed governance arrangements for the National Offender Management Service in Wales form part of the consultation to implement 'Joining Together in Wales: an Adult and Young People's Strategy to Reduce Re-offending'. The proposed arrangements reflect the partnership approach that the Home Office has with the Welsh Assembly Government and do not refer to the need for a protocol or memorandum of agreement.

Mr. Llwyd: To ask the Secretary of State for the Home Department what developments he expects the *(a)* Prison and *(b)* Probation Service to make under the National Offender Management Service in the next (i) six months and (ii) three years. [49063]

Fiona Mactaggart: I set out my expectations for both the Prison and Probation Services in the NOMS five year strategy—Reducing Re-offending and Reducing Crime, which was issued on 9 February 2006. Copies are in the Library and the Vote Office. The strategy states:

By 2007 we will have:

Laid out our plans for contestability in a detailed prospectus

Introduced legislation to set up probation trusts

Set out our strategy for the prison estate

Ensured that offender management roll out is well under way

Introduced the new short prison sentence of custody plus.

By 2009 we will have:

Introduced day fines

Completed the roll out of offender management to all offenders

Made 'going straight' contracts an integral part of working with offenders

A better IT system for managing offenders with the current OASys system fully integrated into C-NOMIS

Legislated for a new sentencing framework for juveniles.

Dr. Evan Harris: To ask the Secretary of State for the Home Department what evidence he has assessed on the impact of commissioning of probation services on standards at an operational level. [50061]

Fiona Mactaggart: The introduction of service level and contractual arrangements into the custodial sector of the National Offender Management Services following the introduction of competition is estimated to have delivered performance improvements within the range of 3.0 per cent. to 8.5 per cent. The introduction of commissioning and contestability in the provision of probation services is expected to deliver operational performance improvements comparable to those achieved in the custodial sector.

Mr. Austin Mitchell: To ask the Secretary of State for the Home Department what the job descriptions are of *(a)* regional offender managers and *(b)* their staff under the National Offender Management Service arrangements. [50237]

Fiona Mactaggart: The job description for the post of Regional Offender Manager was contained in the information pack sent to all prospective candidates in the summer of 2004. A copy of the information pack has been placed in the House of Commons Library for members to read. Each Regional Offender Manager is profiled to have eight members of staff, including the

ROM. In recognition of their additional workload, the offices of the South East and Welsh ROMs have been allocated an additional post. The job descriptions of these staff members are a matter for individual ROMs.

Mr. Austin Mitchell: To ask the Secretary of State for the Home Department what funds have been allocated to regional offender managers under the National Offender Management Service arrangements, broken down by area served by each manager; and how many staff are employed by each manager. [50239]

Fiona Mactaggart: The budget given to each Regional Offender Manager in the financial year 2005–06 ranges between £456,314 and £654,506. These figures are dependent on profiles reflecting the differing needs and requirements of each region, and cover staff and office management costs.

Each Regional Offender Manager is profiled to have eight members of staff, including the ROM. In recognition of their additional workload, the offices of the South East and Welsh ROMs have been allocated an additional post.

Mr. Anthony Wright: To ask the Secretary of State for the Home Department how many staff are employed by the National Offender Management Service, broken down by region; and how many will be employed in 2006–07. [52075]

Fiona Mactaggart: At December 2005, 49,600 staff were employed by NOMS, of whom 47,000 (mainly staff employed in prisons) were employed outside NOMS headquarters. In addition, 20,000 national probation service staff are employed in the regions, though they are not directly employed by the National Offender Management Service.

As part of the Government's commitment to reduce numbers of staff at the centre of the civil service, the National Offender Management Service is currently reviewing its headquarters function and will be finalising plans for future deployment of staff shortly.

Dr. Kumar: To ask the Secretary of State for the Home Department when he expects the National Offender Management Service to be fully operational. [53352]

Fiona Mactaggart: The NOMS five year strategy "Protecting the Public and Reducing Re-offending" sets out the timetable for change; copies of this are in the Library and the Vote Office. Chapter 6 details this timetable, the substantial progress which we expect to make and our longer term aims.

Mr. Letwin: To ask the Secretary of State for the Home Department what the total cost of *(a)* regional offender managers and *(b)* supporting staff within the National Offender Management Service was in 2005–06. [53632]

Fiona Mactaggart: It is not possible to confirm the total staffing costs of each Regional Offender Manager's (ROM's) office for the year 2005–06 before the financial year has ended. However, the budget given to each Regional Offender Manager in the financial year 2005–06, which included staff costs, ranged between £456,314 and £654,506. Every ROM will come within budget this financial year.

National Probation Directorate

Mr. Anthony Wright: To ask the Secretary of State for the Home Department what plans he has to give the National Probation Directorate the responsibility for appraising the proposals outlined in the discussion paper "Restructuring Probation to Reduce Re-offending". [53890]

Fiona Mactaggart: Senior officials in the National Probation Directorate (NPD) were involved in the development of the proposals set out in the consultation paper "Restructuring Probation to Reduce Re-offending". NPD is a directorate of NOMS, and the Director of NPD sits on the NOMS Board which has responsibility for overseeing the development of the proposals both prior to and following the consultation.

National Terrorist Financial Investigation Unit

Mr. Wallace: To ask the Secretary of State for the Home Department what the personnel establishment is of the National Terrorist Financial Investigation Unit; and what the personnel establishment is projected to be by 2010. [44713]

Mr. Charles Clarke: It is established policy not to comment on the breakdown of resources in relation to national security.

Operation Trident

Anne Main: To ask the Secretary of State for the Home Department what criteria he has established with which to assess the effectiveness of Operation Trident. [54475]

Hazel Blears: The establishment of criteria for assessing the effectiveness of Operation Trident is a matter for the Metropolitan Police Authority and the Commissioner of Police of the Metropolis.

Parenting Orders

Mr. Carmichael: To ask the Secretary of State for the Home Department what evaluation has been conducted of parenting orders; and if he will make a statement. [54149]

Mr. Charles Clarke: Parenting is strongly relevant to juvenile antisocial and criminal behaviour and can be associated with increased risk or it can be a factor which protects children and young people from being involved in such behaviour.

There is evidence, particularly from the United States, that parenting interventions which include the improvement of parenting skills can be effective in reducing antisocial and criminal behaviour.

An independent evaluation of the Youth Justice Board's parenting programme included parents who were subject to parenting orders. This evaluation, published in 2002, found that most parents valued the parenting programmes they had undertaken and wished they had received such support earlier. The study observed a reduction in offending but the lack of a comparison group meant that this could not be attributed to parenting programmes.

Youth Offending Teams have adapted programmes underpinned by evidence of effectiveness and some have developed their own programmes based on such evidence. Since 2002 the Youth Justice Board has introduced an effective practice quality assurance review process as part of a management system to improve the quality and volume of parenting interventions being delivered by Youth Offending Teams.

The requirement for further research into the impact of parenting programmes is currently being considered.

Parliamentary Questions

Mr. Wallace: To ask the Secretary of State for the Home Department when he will answer Questions *(a)* 32177 and *(b)* 32176 tabled by the hon. Member for Lancaster and Wyre on 22 November 2005. [42538]

Hazel Blears: I replied to the hon. Member on 14 February 2006, *Official Report*, column 1988W.

Parole

David Simpson: To ask the Secretary of State for the Home Department how many convicted murderers released on parole in each of the last 15 years have subsequently committed murder. [53125]

Fiona Mactaggart: The data are not available in the form requested, but the following may be relevant.

Data on reconvictions of life licensees were published in 1997 in "Life Licensees—reconvictions and recalls by the end of 1995: England and Wales" (Home Office Statistical Bulletin 2/97).

The report shows that of 1,691 life licensees first released between 1972 and 1994, 66 were reconvicted of a grave offence (including murder or manslaughter) by the end of 1995. 19 of the 66 related to life licensees who were reconvicted for homicide and who had an original conviction for homicide.

David Simpson: To ask the Secretary of State for the Home Department how many convicted rapists released on parole in each of the last 15 years have subsequently been convicted of rape. [53128]

Fiona Mactaggart: The data are not available in the form requested.

Information on re-offending is published annually by the Home Office for the monitoring of the target to reduce re-offending. These reports show re-offending for a range of offences, including sexual offences (as a group, rape is not separately identified) and burglary, but the figures do not separately identify those offenders who were released on parole and do not give a full analysis of the types of subsequent offences. The most recent data for adults are available at www.homeoffice.gov.uk/rds/pdfs05/hosb2505.pdf.

Rosie Cooper: To ask the Secretary of State for the Home Department how parole boards are constituted; and against what criteria a decision to release a prisoner is made. [54263]

Fiona Mactaggart: This is a matter for the independent Parole Board. I understand that a parole panel would consist of three members. The board also consider other types of cases and the panels for these may be constituted differently. Each parole decision is based upon the evidence of a paper dossier and all decisions, whether to award or refuse parole, are taken against the criteria set out in the Secretary of State for the Home Department's Directions to the Parole Board under section 32(6) of the Criminal Justice Act 1991.

Passports

Lynne Jones: To ask the Secretary of State for the Home Department (1) what the annual cost of the Passport Agency Support System was in the latest year for which figures are available; [53755]

(2) what records are held on an individual in the Passport Agency Support System. [53756]

Andy Burnham: The Passport Application Support System (PASS) contains the personal data provided by the individual on the application form, the progress history of the application, and details of the passport issued, as shown on the personal data page of the passport.

Thus, the personal details held on the system are:

(1) applicant's name,

(2) gender,

(3) date of birth,

(4) town and country of birth,

(5) the names, dates of birth and places of birth of both parents (in most cases),

(6) details of naturalisation or registration certificates where appropriate,

(7) address and other contact details,

(8) name and passport number of countersignatory,

(9) passport number,

(10) issuing authority,

(11) dates of validity,

(12) the photograph displayed on the passport,

(13) the signature displayed on the passport,

(14) nationality.

In addition, the full progress history of an application is held on the system. This would include information such as the date the record was created, the date the issue of a passport was authorised as well as any notes made by UKPS staff during the consideration of the application.

A complete copy of the application form is also stored on the system. Supporting documents provided by applicants to verify information provided may also be scanned into the record and since December 2003, all completed forms reporting lost, stolen or recovered passports have been stored on the database.

The system also holds information about all passports issued to a person under the same name. Furthermore, since September 2004, when an applicant has applied for a renewed passport and has changed their name, PASS automatically adds notes linking the new and previous passport records.

The UK Passport Service has an outsourced PFI contract with Siemens Business Services, a component part of which is to provide support and maintenance to PASS. The contract provides for per transaction charges which also includes receipt, cashiering and data

capture of all passport applications, therefore it is not possible to separate the amount relevant solely to the system costs.

Andrew Rosindell: To ask the Secretary of State for the Home Department how many people were prosecuted for making fake passports in the UK in each of the last seven years. [53779]

Andy Burnham: The data held by the Office for Criminal Justice does not enable offences relating to making fake passports to be separately identified from other forgery offences under the Forgery and Counterfeighting Act 1981.

Mr. Carmichael: To ask the Secretary of State for the Home Department how much has been spent to date on preparation for the inclusion of fingerprint biometrics in passports. [54067]

Andy Burnham: During 2004–05 the UK Passport Service undertook a large scale biometric trial to test processes and record customer experience during enrolment and verification of facial, iris and fingerprint biometrics. The cost of this trial was £1.5 million. It is not possible to specify separately the element of this cost relating to fingerprints.

Police

Mr. Oaten: To ask the Secretary of State for the Home Department what representations he has received from *(a)* the Courts Service, *(b)* the Crown Prosecution Service, *(c)* the National Probation Directorate and *(d)* criminal justice boards about the proposed re-organisation of police forces in England and Wales; and if he will place copies in the Library. [37753]

Fiona Mactaggart: The Courts Service, Crown Prosecution Service, National Offender Management Service and the Office for Criminal Justice Reform (which supports and co-ordinates the work of Local Criminal Justice Boards) have been included in the central team working on restructuring throughout the review process. Officials from these agencies have contributed to the consideration of amalgamation proposals on a case-by-case basis. Proposals for mergers therefore take into account the views of these partners on the viability and operability of a reorganised policing landscape in these localities.

Mrs. Gillan: To ask the Secretary of State for the Home Department what remit the National Policing Improvement Agency will have in respect of the police forces in Wales. [53013]

Hazel Blears: Under the provisions of clause one and schedule one to the Police and Justice Bill, the National Policing Improvement Agency (NPIA) will assist and support all forces in England and Wales in the provision of an improved policing service.

Mr. Stewart Jackson: To ask the Secretary of State for the Home Department when he next plans to review the level of funding for police community support officers in Cambridgeshire; and if he will make a statement. [53719]

Hazel Blears: Under the Neighbourhood Policing Fund (NPF) we are making £88 million available in 2006–07 and £340 million available in 2007–08 to help forces increase the number of police community support officers (PCSOs) to 24,000 by 2008. We are currently considering proposals from forces for NPF funding and we will be confirming force allocations shortly.

We have made it clear that we will sustain the investment in PCSOs beyond 2008. In the longer term we propose to include funding for PCSOs in the general police funding.

Mary Creagh: To ask the Secretary of State for the Home Department how many police community support officers have been introduced in *(a)* Wakefield, *(b)* Wakefield Metropolitan District Council and *(c)* West Yorkshire since the scheme began; and what assessment he has made of the impact of the community support officers on crime and antisocial behaviour. [54280]

Hazel Blears: West Yorkshire Police recruited its first police community support officers (PCSOs) in 2002–03. The table sets out the number of PCSOs in the West Yorkshire Police for each year since 31 March 2003. Information has only been collected at Basic Command Unit (BCU) level since June 2005. The deployment of PCSOs to the Wakefield Area BCU is an operational matter for the chief constable.

"A National Evaluation of Community Support Officers" (Home Office Research Study 297) was published on 25 January. A copy of the report has been placed in the Library. PCSOs have been well received by the public. They are helping to restore respect in local communities by providing reassurance and tackling antisocial behaviour and low level crime.

West Yorkshire police and Wakefield district division community support officer numbers

As at 31 March	*West Yorkshire police—total number of community support officers*	*Wakefield district division—community support officers*[1]
2003	70	n/a
2004	265	n/a
2005	394	41
2005[2]	433	n/a

n/a = not available.
[1] Community support officer BCU strength collected once a year and was collected and published for the first time for the period ending 30 June 2005.
[2] September 2005.

Grant Shapps: To ask the Secretary of State for the Home Department to which organisations other than the police the National Police DNA database is made available. [41877]

Andy Burnham: Information on the National DNA Database (NDNAD) can only be used for the prevention or detection of crime, the investigation of an offence, the conduct of a prosecution or the identification of a deceased person or of the person from whom a body part came.

Within the UK the Serious Organised Crime Agency is the only organisation, other than the police, to which information on the NDNAD is made available.

Requests from international law enforcement authorities for a search of the NDNAD are channelled through Interpol. These are only processed where it is clear that the request complies with the restrictions on use. In addition, a risk assessment on the dissemination

of the information is made which will take into account the justification and proportionality of disclosure of the information. If cleared for processing a one-off speculative search of the database is made and information fed back via Interpol.

Mr. Stewart Jackson: To ask the Secretary of State for the Home Department what the cost was at current prices of policing per head of population in Cambridgeshire in *(a)* 1997–98, *(b)* 2004–05 and *(c)* 2005–06; and how much of this funding came from (i) council tax, (ii) police grant, (iii) national business rate, (iv) revenue support grant and (v) other funding sources in each year. [53806]

Hazel Blears: The information is set out in the following table.

We do not distribute grant to police authorities purely on the basis of population. The police funding formula uses a range of socio-demographic data to reflect reasonably the relative needs of each authority. Grant allocations also take into account the relative resources of each authority. Grant allocations are stabilised by damping changes to limit year-on-year variations.

Cost of policing per head of population in Cambridgeshire

£

	Per head of population (real terms)				
	(i) Council tax	*(ii) Home Office Police Grant*	*(iii) National non-domestic rates*	*(iv) Revenue Support Grant*	*(v) Other funding sources*[1]
1997–98	19.98	58.43	23.16	15.29	10.80
2004–05	45.57	65.03	13.62	23.85	25.31
2005–06	46.37	66.17	15.87	22.19	22.60

[1] Figures of 'other' income provided by Cambridgeshire police.

Notes:

1. Real terms at 2004–05 prices using GDP deflator at 23 December 2005.
2. Other funding for 2004–05 and 2005–06 include Home Office specific grants.

Mr. Jenkins: To ask the Secretary of State for the Home Department how many police officers there were in *(a)* Tamworth constituency, *(b)* the borough of Tamworth, *(c)* Trent Valley division and *(d)* Staffordshire in each year since 1997. [53403]

Hazel Blears: The available information is provided in the table. Statistics by constituency and borough are not collected centrally.

Police officer strength in Trent Valley and Staffordshire, (1997–2005)

Full-time equivalent

As at 31 March	*Trent Valley*[1]	*Staffordshire*[2]
1997	—	2,211
1998	—	2,292
1999	—	2,238
2000	—	2,170
2001	—	2,129
2002	—	2,133
2003	—	2,202
2004	392.3	2,266
2005	429.1	2,280

[1] All officers FTE including staff on career breaks or maternity/paternity leave.

[2] All officers FTE less staff on career breaks or maternity/paternity leave

Note:

NB force were unable to provide BCU figures in 2003

Mr. Jenkins: To ask the Secretary of State for the Home Department how many police community support officers have been introduced in *(a)* Tamworth constituency, *(b)* the borough of Tamworth, *(c)* Trent Valley division and *(d)* Staffordshire since the scheme began; and what assessment he has made of the impact of community support officers on crime and antisocial behaviour. [53404]

Hazel Blears: Information relating to *(a)* Tamworth constituency and *(b)* the borough of Tamworth are not collected centrally.

Information relating to the number of full-time equivalent police community support officers (PCSOs) in each police force area have been collected by RDS since 2003. As at 31 March 2003 Staffordshire did not have any PCSOs. Seven PCSOs were introduced by 31 March 2004, this increased by 56 giving a total of 63 PCSOs as at 31 March 2005. This figure decreased to 62 as at 30 September 2005.

Information on the number of PCSOs in basic command units (BCU) has only been collected since June 2005. The Trent Valley BCU had 15 PCSOs on 30 June 2005. Information is not collected on the number of PCSOs for either Tamworth constituency or borough. Deployment of PCSOs within Trent Valley division is an operational matter for the divisional commander and I am told that details of their deployment is set out in the Staffordshire police website.

"A National Evaluation of Community Support Officers" (Home Office Research Study 297) was published on 25 January. A copy of the report has been placed in the Library of the House and shows that PCSOs have been well received by the public. They are helping to restore respect in local communities by providing reassurance and tackling antisocial behaviour and low level crime.

Mrs. Gillan: To ask the Secretary of State for the Home Department what assessment he has made of the financial position of the pension schemes of police forces in Wales. [51026]

Hazel Blears: At present, all police forces in England and Wales pay pensions to retired officers from their general funding. This arrangement suffers from volatility and does not enable the cost of pensions in payment to be kept separate from operating costs.

With effect from April 2006, a new system of financing police pensions will be introduced in England and Wales, based on officers' contribution and a new employer contribution that will be paid by the police authority into a separate pensions account. Any shortfall in the account will be met by central Government, which will also receive any surplus. The new system will protect police forces' operational capability by ensuring that any future rise in the cost of pensions as a result of increased numbers of pensioners will not be paid for at the expense of policing.

BEST COPY AVAILBLE

Ms Abbott: To ask the Secretary of State for the Home Department what steps have been taken to review the practice of police officers conferring before writing up their versions of an incident. [53323]

Hazel Blears: I understand from the Association of Chief Police Officers (ACPO) that they and the Independent Police Complaints Commission (IPCC) have agreed the need for a joint review of the post incident procedures in relation to firearms incidents. The terms of reference for the review will be agreed shortly and will take account of both the IPCC and police experience of these investigations.

Mr. Andrew Turner: To ask the Secretary of State for the Home Department to what extent *(a)* the Metropolitan police and *(b)* other police forces are funded for the policing of major (i) commercial and (ii) non-commercial events; what Government funding for these purposes was identifiable for each force in the last year for which figures are available; and what the Government's policy is on achieving equity in the provision of policing between the Metropolitan and other force areas. [54282]

Hazel Blears: The Government allocate general grant to each police authority based on their relative needs and resources, damped to avoid excessive variation between years. Within the grant formulae, provision is made for a special payment to the Metropolitan police in recognition of its national and capital city functions.

Police authorities and Chief Officers are expected to manage the policing of special events within the resources available to them and to make reserve provision as necessary. Police authorities have powers under the Police Act 1996 to charge for special police services. Where charging is inappropriate and policing requires an extraordinary level of expenditure for which the Authority cannot reasonably provide, the Home Secretary may consider a request for special grant.

Special grants of £39.2 million have been made so far in 2005–06 and are set out in the table.

Force	*Major incidents*	*Amount (£ million)*
Lincolnshire	Operation Barrage fraud investigation	0.4
Hampshire	Trafalgar 200	0.5
Lancashire	Conservative Party Conference 2005	1.4
Sussex	Labour Party Conference 2005	3. 6
Staffordshire	Darley Oaks animal rights protest	0.3
Nottinghamshire	Extensive murder investigations	1.0
Thames Valley	Oxford University animal rights protest	2.0
Metropolitan	Policing following London bombings July 2005	30

Prisoners

Philip Davies: To ask the Secretary of State for the Home Department how many televisions have been purchased by the Prison Service for the use of offenders in each of the last eight years. [52068]

Fiona Mactaggart: The following table details the number of television sets purchased by the Prison Service in the last three years following the introduction of a central contract and includes all those purchased for use in cells. The data does not include sets purchased outside the contract or those purchased from the contractor for use in other parts of the Prison Service estate. The cost of in-cell television sets is recovered from prisoners who are on the enhanced incentive and privileges scheme. There is therefore no cost to the public purse.

Table showing the number of in-cell television sets purchased by HM Prison Service between 2003–04 and 2005–06

Financial year	*Number of televisions*
2003–04	1,471
2004–05	15,753
2005–06	9,155

Mr. Holloway: To ask the Secretary of State for the Home Department how many *(a)* full-time and *(b)* full-time equivalent literacy and numeracy teachers were employed by the prison service in each of the last five years for which figures are available. [54936]

Fiona Mactaggart: I refer my colleague to the response given to the hon. Member for Rutland and Melton (Mr. Duncan), on 26 January 2006, *Official Report*, column 2364W.

Mr. Stewart Jackson: To ask the Secretary of State for the Home Department how many *(a)* minors and *(b)* adults normally resident in Peterborough are serving custodial sentences. [53702]

Fiona Mactaggart: Information is not recorded centrally on the home address of prisoners in England and Wales. Information is, however, held on the court that a prisoner is committed to or sentenced at.

On 30 November 2005 there were 750 sentenced prisoners held in prison establishments in England and Wales who were sentenced at courts in Cambridgeshire, as recorded on the Prison Service IT system. 730 of these were adults or young adults (i.e. aged 18 and above) and 20 were juveniles (i.e. aged less than 18).

Mike Penning: To ask the Secretary of State for the Home Department how much money is being held in trust for prisoners. [52548]

Fiona Mactaggart: At 31 January 2006, a total of £8,865,202 was held by the Prison Service on behalf of prisoners.

Prisons

Mr. Khan: To ask the Secretary of State for the Home Department how many ex-prisoners from HMP Wandsworth are participating in resettlement projects. [18114]

Fiona Mactaggart: This information is not held centrally and can be obtained only at disproportionate cost.

Mr. Bellingham: To ask the Secretary of State for the Home Department what plans he has to review the arrangements for prisoners being released before completing their sentence; and if he will make a statement. [44378]

Fiona Mactaggart: The arrangements for the early release of prisoners are kept under constant review. At the present time there are no plans to amend to existing arrangements.

Mr. Bellingham: To ask the Secretary of State for the Home Department how many offenders have been released from prison in each region *(a)* in total and *(b)* on the basis of a paper dossier prepared by the Probation Service in the last 12 months; and if he will make a statement. [44379]

Fiona Mactaggart: In the year ending 31 December 2004, 85,700 prisoners were released from prisons in England and Wales.

Prisoners serving a determinate sentence of four years or over who are due to be released under the provisions of the Criminal Justice Act 1991 can apply for parole at the halfway point of sentence and prisoners serving a life sentence and who have served their tariff may apply for early release. In all such cases, reports are prepared by the probation service, for consideration by the Parole Board. In the year ending 31 March 2005, 3,997 prisoners on whom the probation service had prepared reports were released.

This information is not readily available on a regional basis and to provide it would incur disproportionate costs.

The probation service also provide reports on the home circumstances of offenders being assessed for release on home detention curfew, of whom there were 19,314 in the period 1 January-31 December 2004.

Mike Penning: To ask the Secretary of State for the Home Department what his policy is on introducing healthy eating into prison tuckshops as *(a)* an incentive and *(b)* a punishment. [52563]

Fiona Mactaggart: Access to the prison shop is an incentive. The role of the prison shop is to provide additional facilities for prisoners with which they voluntarily spend their earnings and/or private cash. Contractors have recently begun to respond to requests for low salt and sugar items. These will begin to be made available to prisoners by June 2006.

Rosie Cooper: To ask the Secretary of State for the Home Department how many prisoners underwent treatment for drugs dependence in *(a)* West Lancashire constituency, *(b)* Lancashire and *(c)* England and Wales in each of the past five years. [53395]

Fiona Mactaggart: Figures for prisoners undergoing drug treatment are given in the following table.

There are no recorded figures prior to 2001–02. Figures for programme completion were not collected prior to 2004–05. There are no prisons in the West Lancashire constituency.

	2001–02	*2002–03*	*2003–04*	*2004–05*
Lancashire[1]				
CARATs	1,599	1,664	1,777	2,241

Completions	—	—	—	4,902

[1] HMP Garth, HMP Kirkham, HMP Lancaster Castle, HMP Lancaster Farms, HMP Preston, HMP Wymott

David T.C. Davies: To ask the Secretary of State for the Home Department what guidance is given to prisons on the purchase of halal meat. [53774]

Fiona Mactaggart: The purchase of all meat and poultry products is from nationally contracted-suppliers and all halal meat and poultry products are certified as such. Comprehensive and robust specifications are in place together with stringent policy and practice. Certificates are reissued when the supply chain is revised. A multi-disciplinary team has been established to address issues of provenance. The team includes Muslim leaders, representatives from the Halal Food Authority, the Prison Service Muslim Advisor and representatives from Prison Service Contracts and Procurement Unit, and Prison Catering Services.

Mr. Carmichael: To ask the Secretary of State for the Home Department how much money the Prison Service receives each year as a result of charges imposed on prisoners' phone calls. [54054]

Mr. Charles Clarke: The Prison Service receives a commission on each £1 pinphone credit purchased by prisoners. The value of this commission is commercial in confidence to the Prison Service and is not disclosable under the exemption set out in section 43 of the Freedom of Information Act 2000 on commercial interests.

David Simpson: To ask the Secretary of State for the Home Department on how many occasions members of the Pagan Federation have been granted chaplaincy visits in prisons in England and Wales in each of the last 10 years; and what safeguards are in place to ensure that no practice detrimental to wellbeing or public decency is permitted. [53050]

Fiona Mactaggart: Visits by chaplains of all faith traditions are arranged locally by prison establishments, and information is not recorded to show the number of visits made. Prisoners are free to practise their religion within the constraints of good order and discipline. The Prison Service Order on Religion (4550) provides instructions and guidance to prisons, and includes specific information on the practice of paganism. A copy is in the House Library.

Private Finance Initiative

Mr. Philip Hammond: To ask the Secretary of State for the Home Department pursuant to the answer of 30 June 2005, *Official Report*, column 1672W, on Private Finance Initiative, (1) what the total value is of assets and liabilities for each of the listed private finance initiatives and public private partnerships that are recorded on the Government Balance Sheet; [16121]

(2) what proportion of assets and liabilities for each of the listed private finance initiatives and public private partnerships is recorded on the Government Balance Sheet. [16126]

Mr. Charles Clarke *[pursuant to the reply, 30 June 2005, Official Report, c. 1672W]:* On Private Finance Initiative, the table lists the total value of assets and liabilities for each of the listed private initiatives and public private partnerships that are recorded "on" the Government Balance Sheet. The audited figures appear in the Home Office 2004–05 Resource Accounts.

£ million

Commissioning body/project name	*Assets*	*Liabilities*
Youth Justice Board/STC Cookham Wood (Medway)	21.1	4.9
Youth Justice Board/STC Hassockfield	10.8	5.9
Youth Justice Board/STC Rainsbrook (Onley) Expansion	16.7	5.0
Youth Justice Board/STC Oakhill Expansion	23.0	22.7
STC HMP and YOI Ashfield/HMPS (Pucklechurch)	26.7	21.4
Prison Service/HMP Altcourse	68.3	59.3
Prison Service/HMP Ashford	53.0	46.6
Prison Service/HMP Dovegate	62.3	56.4
Prison Service/HMP Forest Bank	45.9	41.2
Prison Service/HMP Lowdham Grange	25.6	19.6
Prison Service/HMP Pare	46.9	32.2
Prison Service/HMP Peterborough	70.0	64.4
Prison Service/HMP Rye Hill	39.5	34.5

The balance sheet treatment of PFI/PPPs are determined by an independent auditor following United Kingdom Generally Accepted Accounting Practice, in accordance with Financial Reporting Standards issued by the independent Accounting Standards Board (ASB).

Probation Service

Mr. Bellingham: To ask the Secretary of State for the Home Department in what circumstances a violent offender would be released from prison without *(a)* consultation with the police and *(b)* supervision; and if he will make a statement. [44388]

Fiona Mactaggart: The police are routinely informed, approximately 28 days ahead, of the release of all prisoners.

The police are partners in Multi-Agency Public Protection Arrangements (MAPPA), which are statutory arrangements, operated by criminal justice and social care agencies to manage serious sexual and violent offenders and protect the public. The police are therefore consulted on the management of violent offenders who pose a high risk of serious harm, generally those serving a sentence of 12 months and over.

All fixed-term prisoners, regardless of their offence, serving 12 months or more, all fixed-term prisoners aged under 22 years at the point of release and all prisoners serving a life or equivalent sentence must undergo statutory supervision upon release. The only exception is the very small number of prisoners released at the end of their custodial term under the provisions of the Criminal Justice Act 1967.

Mr. Llwyd: To ask the Secretary of State for the Home Department how the *(a)* Probation and *(b)* Prison Service in Wales will be managed to establish an environment capable of delivering offender management and the Wales Reducing Re-offending Action Plan. [49060]

Fiona Mactaggart: The Director of Offender Management Service Wales has responsibility for supporting both the delivery of Offender Management in Wales and implementing 'Joining Together in Wales: an Adult and Young People's Strategy to Reduce Re-offending'. There has already been full involvement of the probation and prison services in developing these area within the Welsh context. The National Offender Management Service in Wales will continue to develop close working links with both services and other key partners to ensure their successful implementation.

Table B shows the number of children prosecuted and sentenced to immediate custody. For the purposes of this response the total number prosecuted consists of those dealt with at court, being cautioned or receiving other penalties (which includes informal warnings).

Table B: Number of children aged 10 to 17 prosecuted and sentenced to immediate custody for drug offences in England and Wales, 2000 to 2004

	Prosecuted		*Sentenced to immediate custody*	
	All drug offences	*Class A drug offences*	*All drug offices*	*Class A drug offences*
2000	7,470	262	73	5
2001	8,950	374	93	50
2002	9,730	323	57	31
2003	10,090	305	85	49
2004	9,390	371	80	50

Notes:

1. Data relates to children aged between 10 and 17 years old.
2. Prosecutions data refers to number dealt with at court, cautioned or receiving other penalties.

Protective Police Custody

Mr. Oaten: To ask the Secretary of State for the Home Department on how many occasions individuals have been taken into protective police custody in each of the last five years. [32867]

Mr. Charles Clarke: This information is not held centrally and could not be obtained without incurring disproportionate costs.

Public Order

Mr. Wills: To ask the Secretary of State for the Home Department how many fixed penalty notices for being drunk and disorderly were issued in Swindon between *(a)* 12 November 2004 and 24 December 2004 and *(b)* 12 November 2005 to 24 December 2005. [52267]

Hazel Blears: It is not possible to identify the number of penalty notices for disorder issued in Swindon because centrally available data is not broken down to that level of detail.

Mr. Hands: To ask the Secretary of State for the Home Department how many unauthorised demonstrations have taken place in Parliament Square since the Serious and Organised Crime and Police Act 2005 came into effect. [50736]

Paul Goggins: The Metropolitan Police have informed me that, since 1 August 2005, there have been 10 occasions in Parliament Square and Whitehall where protests have continued after the police advised protesters that their demonstrations were unauthorised.

Mr. Hands: To ask the Secretary of State for the Home Department what assessment he has made of the effectiveness of the Serious and Organised Crime and Police Act 2005 in preventing unauthorised demonstrations in Parliament Square; and if he will make a statement. [50737]

Hazel Blears: Since the provisions of the Serious Organised Crime and Police Act 2005 came into force the vast majority of demonstrations around Parliament Square have been authorised. The Metropolitan police tell me that there were 118 authorised demonstrations in Parliament Square and Whitehall from 1 August 2005 to 31 January 2006. There were 10 unauthorised demonstrations in the same area where the police took further action.

Mr. Hepburn: To ask the Secretary of State for the Home Department how many people have been arrested for drunk and disorderly behaviour in *(a)* Jarrow constituency, *(b)* South Tyneside, *(c)* Tyne and Wear, *(d)* the North East and *(e)* England and Wales in each year since 1997. [51948]

Hazel Blears: The information requested is not available centrally.

Public Protection Arrangements

Mrs. Cryer: To ask the Secretary of State for the Home Department (1) how many people are covered by multi-agency public protection arrangements for level *(a)* one, *(b)* two and *(c)* three, broken down by probation area; [53445]

(2) how many individuals were covered by multi-agency public protection arrangements under each of the three levels on the latest date for which figures are available, broken down by probation area. [52877]

Fiona Mactaggart: The Responsible Authority for the multi-agency public protection arrangements (MAPPA) comprises the chief officers of police, probation and the prison service in each area of England and Wales. It is required under statute to publish an annual report describing the operation of these arrangements locally and as part of this to publish data as to the number of offenders considered under the arrangements. The latest data available is from the annual reports for 2004–05 and has been published by areas. It is also available through the National Probation Service website: http://www.probation.homeoffice.gov.uk/output/page4.asp

The following table shows a breakdown of the number of offenders considered under the three levels of risk management within MAPPA for each area.

Number of people managed by MAPPA at Level 1, 2 and 3

Area	*MAPPA Level 3*	*MAPPA Level 2*	*MAPPA Level 1*	*Total*
Avon and Somerset	7	378	751	1,136
Bedfordshire	10	55	352	417
Cambridgeshire	3	95	460	558

Wiltshire	6	89	410	505
Total	1,478	11,288	31,826	44,592

Racial and Religious Hatred Bill

Mr. Spellar: To ask the Secretary of State for the Home Department when he expects to issue a consultation document on guidance for the police on the provisions contained in the Racial and Religious Hatred Bill. [54092]

Paul Goggins: We intend to begin discussions with stakeholders on the Home Office guidance to accompany the Racial and Religious Hatred Act 2006 in the near future.

Respect Action Plan

Mr. Wills: To ask the Secretary of State for the Home Department how much each local authority will receive to offer support to parents under the Respect action plan. [52916]

Hazel Blears: Parenting is a core element of the Respect programme and is essential for creating a strong society based on mutual respect. Over the next two years we will invest an additional £52 million to start a national programme of change in the way that public services respond to parents.

Nationally all local authorities will receive funding through the roll-out of children's centres and extended schools—a key aim within this being to improve parenting provision. The Respect programme will also include investment in early intervention measures to support vulnerable children and young people and their families, including pathfinders which develop leading practice in supporting parents.

A further £28 million of new funding will be used to set up a national network of intensive family support programmes. Intensive family support projects will be available in areas where they are needed. They will provide intensive parenting support to the most problematic families that are targeted by the projects.

To support parenting professionals a National Parenting Academy will be established to ensure that they have the necessary skills to delivery high quality parenting support.

Further announcements on these projects will be made shortly.

Mr. Carmichael: To ask the Secretary of State for the Home Department whether the reduction in non-car/race-related criminal damage offences cited in the Respect Action Plan is statistically significant. [54069]

Mr. Charles Clarke: The non-car/non-race related data in the Respect Action Plan is based on recorded crime statistics. Recorded crime statistics use administrative data rather than sampling data, therefore statistical significance tests are not appropriate.

Secure Training Centres

Ms Keeble: To ask the Secretary of State for the Home Department which department or agency is responsible for conducting security checks on staff employed at secure training centres. [53255]

Fiona Mactaggart: All staff employed in secure training centres are subject to a security check conducted by the Criminal Records Bureau. Because of the nature of the work, the check is in the form of an enhanced disclosure.

Ms Keeble: To ask the Secretary of State for the Home Department which department or agency is responsible for drawing up guidelines for the use of restraint of young people in secure training centres. [53088]

Fiona Mactaggart: The Physical Control in Care Training Manual was compiled by the Prison Service College. The restraint techniques set out in the manual for use, where necessary, in secure training centres are approved by the Home Secretary.

Sex Offenders

Mrs. Cryer: To ask the Secretary of State for the Home Department how many persons were on the sex offenders register on the latest date for which figures are available; and how many of those are on the register for life. [52876]

Paul Goggins: Part 2 of the Sexual Offences Act 2003 requires all offenders who have received a conviction or caution for certain sexual offences to notify personal information to the police and, subsequently, to keep the police informed of: any changes to those details; any period of seven days spent at another address, and any intention to travel overseas for three days or more. The period of time that an offender must comply with these requirements (the "notification period") is calculated by reference to whether the offender received a caution or conviction for the offence and, if the latter, the disposal received. For example, any offender who receives 30 months or more imprisonment in respect of a relevant offence will become subject to the notification requirements for "an indefinite period"; i.e. the rest of his life.

The Multi-Agency Public Protection Arrangements (MAPPA) annual reports include statistics on the number of offenders who are subject to the notification requirements. The 2004–05 reports state that on 31 March 2005 there were 28,994 registered sex offenders living in the community. Statistics are not held centrally for the number of such offenders who are required to comply with the notification requirements indefinitely.

Mrs. Cryer: To ask the Secretary of State for the Home Department how many people are on the Sex Offenders Register; and how many of those are on for life. [53444]

Paul Goggins: Part two of the Sexual Offences Act 2003 requires all offenders who have received a conviction or caution for certain sexual offences to notify personal information to the police and, subsequently, to keep the police informed of: any changes to those details; any period of seven days spent at another address; and any intention to travel overseas for three days or more. The period of time that an offender must comply with these requirements (the "notification period") is calculated by reference to whether the offender received a caution or conviction for the offence and, if the latter, the disposal received. For example, any offender who receives 30 months or more imprisonment in respect of a relevant offence will become subject to the notification requirements for "an indefinite period", i.e. the rest of his life.

The Multi-Agency Public Protection Arrangements (MAPPA) annual reports include statistics on the number of offenders who are subject to the notification requirements. The 2004–05 reports state that on 31 March 2005 there were 28,994 registered sex offenders living in the community. Statistics are not held centrally for the number of such offenders who are required to comply with the notification requirements indefinitely.

Slave Trade Abolition

Mrs. Ellman: To ask the Secretary of State for the Home Department when his Department's working party on the commemoration of the abolition of the slave trade last met; and what conclusions it reached. [51762]

Paul Goggins: The Home Office Advisory Group on Slavery was established to assist with the development of the Government's plans to mark 2004 as the UN year to commemorate the struggle against slavery and its abolition. It last met in October 2004. The group also

began a discussion about how most usefully to mark the 200th anniversary of the abolition of the slave trade in the British empire in 2007.

Work on the arrangements for the bicentenary are being taken forward by an Advisory Group, chaired by the Deputy Prime Minister, which had its first meeting on 19 January this year.

Special Constables

Mr. Jenkins: To ask the Secretary of State for the Home Department how many special constables have been recruited in *(a)* the Trent Valley division, *(b)* Staffordshire and *(c)* England and Wales since the beginning of the scheme. [53411]

Hazel Blears: Home Office specific grants to forces under the Special Constabulary Capacity Building Scheme began in January 2004. In the year 1 April 2004–31 March 2005, 102 special constables were recruited by Staffordshire constabulary, with 3,636 special constables recruited in England and Wales.

Figures for the Trent Valley division are not collected centrally.

Mr. Jenkins: To ask the Secretary of State for the Home Department what average number of hours per week was worked by a special constable in *(a)* the Trent Valley Division, *(b)* Staffordshire and *(c)* England and Wales in each year since the beginning of the scheme. [53412]

Hazel Blears: Special constables are volunteers and the hours individual specials work varies. Data on hours worked by special constables is collected by police force area; figures are not collected centrally for Trent Valley Division. Available information on the average number of special constable hours per week are given in the following table.

Forces not providing data are Avon and Somerset, Cambridgeshire, Cleveland, Derbyshire, Durham, Greater Manchester, Humberside, Lancashire, Merseyside, Metropolitan Police, North Wales, North Yorkshire, Nottinghamshire, South Wales, Suffolk, Surrey, Sussex, Thames Valley and West Midlands.

Because of a force data revision, the average figure for the 24 forces differs from that given in the answer to my hon. Friend on 22 February 2006, *Official Report*, column 102W.

Hours

	2003–04	*2004–05*
Staffordshire	1,496	1,627
24 forces providing data	18,074	19,877

Mr. Jenkins: To ask the Secretary of State for the Home Department what funding his Department has allocated to the special constables scheme in each year it has been running in *(a)* the Trent Valley Division, *(b)* Staffordshire and *(c)* England and Wales. [53451]

Hazel Blears: Funding is being made available to forces to help them develop their capacity to recruit, retain and manage their special constables. Grant payments are awarded at force, rather than basic command unit, level and details of the first two years of the funding scheme are shown as follows. Allocations for 2006–07 are currently being considered.

£

	Staffordshire	*England and Wales*
2004	39,817	2,044,054
2005	29,757	2,473,009

Suicide Bombers

Anne Main: To ask the Secretary of State for the Home Department what advice he has given *(a)* police officers and *(b)* the general public on identifying potential suicide bombers; and if he will make a statement. [54272]

Hazel Blears: Operational policing guidance is a matter for the relevant chief constable. As for the general public, the message in awareness campaigns is to be alert to and report any suspicious behaviour or activity to the police or other relevant authority.

Supervision Orders

Mrs. Cryer: To ask the Secretary of State for the Home Department how many individuals were the subject of supervision orders under the Criminal Justice Act 2003 and previous legislation in each of the four designated tiers on the latest date for which figures are available. [52875]

Fiona Mactaggart: At the end of September 2005, there were some 134,200 people being supervised by the Probation Service under court orders. This includes those sentenced to orders under the Criminal Justice Act 2003 and previous legislation.

Guidance about taking decisions was only issued in July 2005 and information on the numbers of orders falling within each supervision tier is not currently reliable.

Mrs. Cryer: To ask the Secretary of State for the Home Department how many individuals have been the subject of supervision orders under the Criminal Justice Act 2003 and previous legislation in each of the four designated tiers; and what estimate he has made of how many additional trained probation officers will be needed to ensure that standards set are met over the next five years. [53443]

Fiona Mactaggart: At the end of September 2005 there were some 134,200 offenders being supervised by the Probation Service under court orders. This included those sentenced under the Criminal Justice Act 2003 and those sentenced under the previous legislation. We do not as yet have reliable national figures for the number of offenders supervised at each of the four offender management tiers.

The number of probation staff expressed as full time equivalents increased from 13,968 in 1997 to 20,138 at the end of September 2005. This is a very significant increase. To meet the resource needs of the Probation Service under the new sentencing framework of the 2003 Act, most of the provisions of which were implemented in April 2005, Probation Officer numbers rose from

6,376 in September 2004 to 6,529 by September 2005 and are projected to rise again to 7,244 by September 2007. By this time the new custodial sentence of Custody Plus will be in operation, completing implementation of the new sentences. Current Probation Officer projections go as far as September 2009 and a figure of 7,344 by that date. Numbers of the more junior practitioner grade of Probation Service Officer are also increasing significantly.

Tail Docking

Mr. Drew: To ask the Secretary of State for the Home Department how many people have been *(a)* prosecuted and *(b)* convicted for illegal tail docking of dogs in each of the last five years. [52231]

Fiona Mactaggart: It is not possible to identify offences involving the docking of dogs' tails on the Court Proceedings Database held by the Office for Criminal Justice Reform.

Terrorists (Detention)

Andrew Selous: To ask the Secretary of State for the Home Department if he will list the police forces which made individual recommendations to his Department on the extension of the maximum pre-charge detention period for suspected terrorists. [30337]

Hazel Blears: The content of the Terrorism Bill was discussed with the Metropolitan police, which has lead responsibility for terrorism matters, and the Association of Chief Police Officers (ACPO), which speaks on behalf of all police forces in England and Wales.

Under-age Drinking

Mr. Wills: To ask the Secretary of State for the Home Department if he will increase the penalty for shopkeepers who sell alcohol to young people who are underage. [48358]

Hazel Blears: The Licensing Act 2003 increased the maximum penalty for selling alcohol to persons aged under18 from a level three fine (maximum £1,000) to a level five fine (maximum £5,000) with effect from 24 November 2005.

This offence is also included in the penalty notice for disorder scheme which enables the police to issue fixed penalty notices for specified offences subject to a penalty of either £50 or £80. Sale of alcohol to underage persons was added to the scheme with effect from 1 November 2004 and made liable to the higher tier penalty of £80. The Respect Action Plan, launched on 10 January this year, announced that this level of penalty is to be raised to £100 later this year.

Violent Crime

Mr. Frank Field: To ask the Secretary of State for the Home Department how many *(a)* murders, *(b)* manslaughters, *(c)* attempted murders, *(d)* rapes, *(e)* burglaries and *(f)* other acts of violence against the person there have been in each constituency in England and Wales since 2001 that have been solved using records of DNA samples taken from suspects who had previously been arrested but not convicted of an offence. [48440]

Hazel Blears: Information on the number of serous crimes such as murder, manslaughter and rape that have been detected using DNA profiles taken from suspects who had previously been arrested, charged but not convicted of an offence is not collected by the Home Office as detections are achieved through integrated criminal investigation and not by forensic science alone. Information is available on the number of DNA profiles taken from suspects that have provided the police with an intelligence link that has been used to identify the possible offender and assist in criminal investigations.

Since the amendment to the Police and Criminal Evidence Act 1984 in May 2001, which enabled the police to retain DNA samples taken from persons who have not been convicted of an offence, about 200,000 DNA samples have been retained that would previously have had to be destroyed. From these, approximately 8,493 profiles of individuals have been linked with crime scene stains, involving 13,964 offences. These offences include 114 murders, 55 attempted murders, 116 rapes, 68 sexual offences, 119 aggravated burglaries and 127 of the supply of controlled drugs.

This information is not available by parliamentary constituency; nor for other crime types such as burglaries and other acts of violence against the person.

Paul Rowen: To ask the Secretary of State for the Home Department if he will make a statement on violent crime in Greater Manchester; and what steps he has taken to address the problem. [52389]

Hazel Blears: The Government are currently taking forward a very full range of work which will continue to reduce violent crime.

Within Greater Manchester, Manchester, Bolton and Salford are involved in the Tackling Violent Crime Programme (TVCP) which works intensively with practitioners in a number of local areas, particularly tackling alcohol-related crime and domestic violence, with a view to identifying, developing, disseminating and embedding good practice.

As part of the TVCP and the associated Alcohol Misuse Enforcement Campaign (AMEC) Manchester Crime and Disorder Reduction Partnership has undertaken a number of initiatives aimed at reducing alcohol related violent crime. High profile police patrols were conducted in hotspot areas such as the city centre to coincide with the changes in the licensing laws. Greater Manchester police are currently placing emphasis on early intervention of low level disorder, in particular through issuing fixed penalty notices, with a view to preventing disorder escalating. Multi-agency visits to licensed premises, test purchases and the nationally recognised Best Bar None scheme have also successfully been undertaken to reduce underage sales of alcohol, breaches of licence conditions and alcohol related violent crime.

The action plan developed to tackle problems with alcohol in Heywood in Rochdale over 100 days began on 2 February 2006 and is an example of the multi-agency partnership approach to tackling crime and disorder.

Voluntary Sector Regulation

Mr. Andrew Turner: To ask the Secretary of State for the Home Department pursuant to the Answer to the hon. Member for Kettering from the Minister for the Cabinet Office, of 7 November 2005, *Official Report*, column 535W, when he will respond to the Better Regulation Task Force report on regulating the voluntary sector. [54229]

Paul Goggins: The Government welcomes the Better Regulation Task Force report "Better Regulation for Civil Society", recognises its potential for bringing genuine benefits to voluntary and community organisations, and will respond shortly.

Women Police Constables

Philip Davies: To ask the Secretary of State for the Home Department (1) which police forces in England and Wales refer to women police constables as WPCs; [52071]

(2) what criteria are used in deciding whether women police constables are called WPCs or PCs; who makes the decision; what changes there have been in policy on the issue in the last five years; whether it is normal practice to consult affected personnel; and if he will make a statement. [52073]

Hazel Blears: The information requested is as follows:

(1) The title "WPC" is not used in any police force in England and Wales.

(2) Police forces in England and Wales do not differentiate between male and female officers when using rank or role identification. Although there is no explicit policy on the use of the term "WPC", police forces increasingly discontinued its use over a number of years. The British Association for Women in Policing and Police Federation have been influential in highlighting barriers facing women in the service and seeking to remove these. The removal of unnecessary gender labels supports deployment based on skills and experience rather than gender.

All police roles are open to both women and men. Gender is relevant when it comes to searching individuals; otherwise, it is an officer's skill, ability, knowledge and experience which are relevant.

Young Offenders

David Davis: To ask the Secretary of State for the Home Department what *(a)* the capacity and *(b)* the population is of each young offender institution. [42162]

Mr. Charles Clarke: The information requested, as recorded on the Prison Service IT system, is provided in the following table.

Capacity and actual population of young offender institutions as at 30 June 2005

Establishment	*In use certified normal accommodation*	*Operational capacity*	*Total population*	*Young persons*	*Adults*

Note:
The table does not include establishments that hold adults only; where the site is split between young persons and adults, the capacity of the whole establishment is shown and remand, sentenced, young adults, juveniles, males and females are included.

Mr. Davey: To ask the Secretary of State for the Home Department what the levels of re-offending by young offenders were in each year between 2001–02 and 2005–06. [53008]

Fiona Mactaggart: The most recent data on re-offending are published in 'Juvenile reconviction: results from the 2003 cohort, RDS OLR 08/05'. The report, which covers 2001 to 2003, is available on-line at http://www.homeoffice.gov.uk/rds/onlinepubs1.html.

Youth Justice Board

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how much funding the Youth Justice Board received in 2004–05 for the Intensive Supervision and Surveillance Programme for young offenders. [53997]

Fiona Mactaggart: The Youth Justice Board received £29.6 million to fund the Intensive Supervision and Surveillance Programme for 2004–05.

TREASURY

Economic Growth (Shropshire)

16. **Mark Pritchard:** To ask the Chancellor of the Exchequer what assessment he has made of economic growth in Shropshire in 2004–05; and if he will make a statement. [55132]

John Healey: The ONS has not yet published economic growth figures for local authorities for 2004–05. However, the latest figures show the West Midlands was the second fastest growing region in the UK between 2003–04 after the North East, and that between 1997 and 2003 the Shropshire economy has grown by 37 per cent. Unemployment levels are also close to record lows, and the employment rate well above the national average of 74.3 per cent.

Welfare to Work Policies

17. **Mr. Tom Harris:** To ask the Chancellor of the Exchequer what assessment he has made of the economic effects of the welfare to work policies. [55133]

Dawn Primarolo: Since 1998, the new deal has helped over 1.6 million people into work, including 630,000 young people, 250,000 unemployed adults, and 500,000 lone parents. New deal for disabled people and pathways to work have now helped over 120,000 incapacity benefit claimants into work. Independent research has shown the effectiveness of welfare to work policies, with the new deal for young people alone having estimated benefits to the economy of up to £500 million a year, and each additional job achieved through new deal for lone parents resulting in an economic gain to society of £4,400.

Employment (Northern Region)

18. **Mr. Neil Turner:** To ask the Chancellor of the Exchequer what measures he is taking to achieve full employment in the three northern regions. [55134]

Dawn Primarolo: The Government's measure to achieve full employment in the three northern regions are built on a platform of macro-economic stability, continued investment in the new deal, investment in skills and training, and policies to make work pay. These policies have led to near record levels of employment in those regions.

Unemployment

19. **Siobhain McDonagh:** To ask the Chancellor of the Exchequer what assessment he has made of the effect on the economy of the change in unemployment since 1997. [55135]

John Healey: In 1997, unemployment was over 2 million. Since then employment has risen by more than 2.3 million and unemployment has fallen by over half a million. Unemployment is now close to record lows last seen in the 1970s and it has also fallen in every region and country in the UK.

Pensioner Household Incomes

20. **Helen Goodman:** To ask the Chancellor of the Exchequer what steps he plans to take to increase pensioner household incomes. [55137]

Mr. Ivan Lewis: This Government believe that a fair society guarantees security in old age and ensures that all pensioners can share in rising national prosperity and continue to play an active part in society.

Government measure have increased pensioner income directly through the basic state pension, pension credit, winter fuel payments and through additional age-related payments to help pensioners with council tax and other living expenses. The incomes of pensioner households have also been improved indirectly through reductions in the cost of public services such as free local area bus travel, prescriptions and eye tests for those over 65, and free TV licences for those over the age of 75.

Personal tax and benefit changes mean that the average pensioner household will be £26 a week better off in 2006–07. The poorest 10 per cent. of pensioners will be £42 a week better off in 2006–07 than they would have been under the 1997 system.

Tonnage Tax

21. **Gwyn Prosser:** To ask the Chancellor of the Exchequer what recent discussions he has had with the Department for Transport on the review of the tonnage tax. [55138]

Dawn Primarolo: The Chancellor of the Exchequer does from time-to-time hold meetings with the Secretary of State for Transport to discuss a range of subjects.

Tax Credits

23. **Mr. Ruffley:** To ask the Chancellor of the Exchequer what recent representations he has received on levels of overpayment of tax credits. [55140]

Dawn Primarolo: The Government receive a number of representations on tax credits, including the level of overpayments. The pre-Budget report included a package of measures to make the tax credits system work better for families, providing more certainty over their tax credits award, while maintaining flexibility to respond to falls in income and changes in circumstances. These changes should contribute towards a reduction in the level of overpayments.

Mr. Quentin Davies: To ask the Chancellor of the Exchequer what his latest estimate is of the cost to public funds of errors in the tax credit system. [42174]

Dawn Primarolo: Costs to public funds arising from errors in the tax credit system are included in HMRC's accounts, and losses and write-offs are specifically disclosed. I refer the hon. Gentleman to the Department's latest published accounts, available at

http://www.hmrc.gov.uk/about/annual_reps.htm and, in particular, part two of the report of the Comptroller and Auditor General on those accounts.

Mr. Dodds: To ask the Chancellor of the Exchequer how many people in Northern Ireland have been awarded tax credits who had income of *(a)* £10,000 to £19,999, *(b)* £20,000 to £29,999, *(c)* £30,000 to £39,999 and *(d)* £40,000 to £50,000. [54152]

Dawn Primarolo: Final income data are currently available only for 2003–04. Table 2.9 of "Child and Working Tax Credits Statistics. Finalised awards. 2003–04" shows the average, taken over 2003–04, of the number of in-work families in each band of income used to calculate tax credit entitlement and with positive finalised 2003–04 awards. This document can be found at www.hmrc.gov.uk/stats/personal-tax-credits/cwtc-annual-0304.pdf. The figures for Northern Ireland appear in the following table:

Thousand

Income level	*Average number of in-work families in Northern Ireland in each band of income*
Under £10,000	40
£10,000 to £19,999	32
£20,000 to £29,999	31
£30,000 to £39,999	21
£40,000 to £50,000	10
Over £50,000	3
Total	137

Note:
Figures are based on a sample of cases, and subject to sampling uncertainty. Some families were not required to report their 2003–04 incomes unless it could make a difference to the value of their award. Others failed to report these incomes. All families not reporting 2003–04 incomes appear in the table according to their 2001–02 incomes.

Gershon Review

24. **Mr. Evennett:** To ask the Chancellor of the Exchequer if he will make a statement on progress on the implementation of the Gershon review of public sector efficiency. [55141]

Mr. Des Browne: I refer the hon. Gentleman to the answer I gave the hon. Member for Enfield, Southgate earlier today.

Child Benefit

Alistair Burt: To ask the Chancellor of the Exchequer how many claims were made for child benefit after the death of *(a)* a child and *(b)* a newly born child in the last year for which figures are available. [54561]

Dawn Primarolo: In 2005, about 3,300 child benefit claims were reduced or stopped following the death of a child. No figures are readily available of which such claims were received after the death, or which such children were newly born.

Child Trust Fund

Mr. Sarwar: To ask the Chancellor of the Exchequer what steps he plans to take to encourage greater take-up of Child Trust Fund vouchers by those parents who have not done so to date. [55004]

Mr. Ivan Lewis: I refer the hon. Gentleman to the answer I gave on the floor of the House earlier today to the hon. Member for Livingston.

Debt Relief

Sir Peter Soulsby: To ask the Chancellor of the Exchequer what progress he has made on 100 per cent. bilateral and 100 per cent. multilateral debt relief for the poorest countries. [53201]

Mrs. Betty Williams: To ask the Chancellor of the Exchequer what recent discussions he has had with international Finance Ministers on tackling world debt. [52663]

Mr. Ivan Lewis: At the G8 meeting in Moscow Finance Ministers called for full implementation of commitments made on the multilateral debt relief initiative, aid effectiveness, and increasing resources for development. They supported the decision by the IMF Board to implement 100 per cent. debt relief for 19 countries and encouraged the World Bank and African Development Bank to finalize urgently all necessary steps for implementation.

Russia also announced that it will be providing 100 per cent. debt relief to the heavily indebted poor countries. With this step forward the G8 are now all providing additional debt cancellation on the bilateral debts of HIPCs.

The UK has also proposed going further than the existing list of HIPC countries to extend relief to all low-income countries that can use the debt service savings effectively for poverty reduction. The UK is paying 10 per cent. of the share of the debt interest payments of the eligible non- HIPC countries.

Green Taxes

Norman Baker: To ask the Chancellor of the Exchequer what proportion of tax income came from green taxes in *(a)* 1997 and *(b)* 2005. [55139]

John Healey: The information requested on the green taxes (landfill tax, Climate Change Levy and Aggregates Levy) is given in the following table.

	Environmental taxes[1] as percentage of net taxes and social security contributions
1997–98	0.12
2004–05	0.41
2005–06 (projected)	0.41

[1] Landfill tax, climate change levy and aggregates levy cash receipts
Source:
HM Revenue and Customs

Income Statistics

Mr. Stewart Jackson: To ask the Chancellor of the Exchequer what the income per head in the Peterborough constituency was in each of the last five years. [54913]

Dawn Primarolo: Information on the mean and median of total income by constituency can be found in table 3.15 "Total Income by Parliamentary

Constituency" on the HM Revenue and Customs internet website. http://www.hmrc.gov.uk/stats/income_distribution/menu-by-year.htm#315.

The information is available only for 2002–03 and 2003–04.

Inheritance Tax

Mr. Stewart Jackson: To ask the Chancellor of the Exchequer how many residents in the Peterborough constituency paid inheritance tax in each of the last five years. [54912]

Dawn Primarolo: Figures for estates paying inheritance tax are not available at local levels.

Office for National Statistics

Adam Afriyie: To ask the Chancellor of the Exchequer what steps have been taken to ensure that the Register for Births, Marriages and Deaths will not suffer from inaccuracies as a result of the Office for National Statistics' decision to move it to India. [54796]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Karen Dunnell, dated 2 March 2006:

As Registrar General, I have been asked to reply to your recent Parliamentary Question concerning the steps taken to ensure that the Register for Births, Marriage and Deaths will not suffer from inaccuracies as a result of work being undertaken in India. (54796)

The Office for National Statistics has entered a contract with Siemens Business Services to digitise records for birth, marriage and death information held by the Registrar General for purposes of producing certified copies of the entry on request.

The records that are going to be digitised are copies of the birth, marriage and death records held by the Registrar General for England and Wales at the General Register Office. The original records, which are the entries in registers held locally around the country at register offices, are not being sent to India.

Information in civil registration records is accessible by any person within the legal frame work that governs the issue of certified copies of entries in birth, marriage and death registers (certificates). Digitisation of these records will not change the position. Access will continue to only be via certificates.

The Registrar General is sent a certified copy of all entries made in registers of live-births, still-births, marriages and deaths. These form the central archive of civil registration records in England and Wales and for many years have been microfilmed by the Registrar General for the purposes of producing certificates on request. A digital image will be created in the UK from these microfilmed records. These images will be encrypted to ensure they cannot be accessed illegally and sent electronically to India.

Some fields will be data-captured by operators based in India, fully supported by sophisticated computer techniques including character recognition software and look up tables of English and Welsh names and place names.

There will be strict security and audit controls built into the process including physical security of data and vetting of staff. Once these fields and images have been subjected to rigorous data quality and validation checks, the images and data will be returned to the UK for further validation and quality assurance before acceptance testing is undertaken by General Register Office staff based in Southport. Once the General Register Office has accepted the digitised records, all images and data records held on off-shore computers will be deleted. The size of the contract to carry out the digitisation of these records required the Registrar General to follow rules governing public procurement in the European Union and therefore advertise for tenders via the Official Journal of the European Union (OJEU). We have ensured that an open and competitive tender was carried out where the short-listed suppliers were selected after a transparent and thorough evaluation. The OJEU process does not allow for the General Register Office to restrict contract work to be carried out only in the UK.

The General Register Office will continue to issue certificates and therefore staff will continue to be employed to carry out this work. The digitisation of civil registration records will enable certificates to be supplied more efficiently and provide improved services for customers.

Population (West Lancashire)

Rosie Cooper: To ask the Chancellor of the Exchequer what assessment he has made of the accuracy of the most recent population figures provided by the Office for National Statistics for West Lancashire. [52777]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Karen Dunnell, dated 27 February 2006:

As National Statistician, I have been asked to reply to your question about what assessment of the accuracy of the most recent population figures provided by the Office for National Statistics has been made for West Lancashire. (52777)

Population estimates are calculated using an internationally respected methodology. Further information can be found in the detailed methodology guide "Making a population estimate in England and Wales". This is published here: http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=575

It is becoming increasingly difficult to estimate the size of the population because of changes in society, which include increased mobility and different living arrangements. The decennial Census provides a benchmark against which national and sub-national population estimates can be assessed. Substantial work has been done on the difference between mid-year population estimates and the 2001 Census. This work is summarised in the final report of the 2004 Local Authority Population Studies, which can be found here: http://www.statistics.gov.uk/downloads/theme_population/LAStudy_FullReport.pdf

These studies confirmed that the 2001 Census had worked well in most areas, including West Lancashire, but there were a few cases where the adjustment for under-enumeration was not able to adjust sufficiently for exceptional circumstances. This work, together with revised international migration estimates, accounted for a large proportion of the initial 1.1 million difference between mid year estimates and the Census; reducing the difference to a little over 0.2 million

In addition, extensive annual quality assurance is undertaken in order to ensure the accuracy of the annual mid-year estimates. Quality assurance starts with detailed checking of the source data used in the components of change (birth, deaths, etc.). Procedures are then in place to ensure that these data sources are correctly processed when deriving the estimates. The calculated national and sub-national estimates, for all 376 local authorities in England and Wales, are then subject to a further set of quality assurance procedures before they are published. These procedures include reviews of sex ratios and age profiles, comparisons of change over time, and comparisons of fertility and mortality rates. Substantial effort has already been undertaken, in recent years, to improve the quality assurance of population estimates.

ONS is also now investing substantially in a project to Improve Migration and Population Statistics (IMPS). (More information on this project can be found at: www-statistics.gov.uk/IMPS). The key aims of this project are to reduce the size of the difference between the 2011 Census results and the mid-year estimates and to better understand any difference that does remain. As part of this project, we are developing a data comparator tool to enable us to compare the annual mid-year estimates against a range of administrative sources. This work is ongoing and the results will

inform our understanding of the accuracy of the mid-year population estimates. The tool was trialled in the mid-2004 population estimates, which were published in August 2005.

Another strand of the IMPS project is a review of the quality assurance procedures that are currently in place for population estimates. One of the aims of this review is to assess what improvements can be made to existing procedures, and determine whether additional quality assurance is required.

ONS also produces population projections for each local authority area. The methodology used in the production of the subnational population projections is an established and recognised methodology. Subnational population projections undergo extensive quality assurance before publication. In addition, local authorities and health authorities are consulted on the first year of migration assumptions used as the baseline trend for migration.

Population estimates and projections are supplied to the QDPM, I understand that ODPM make checks to ensure that the data as provided by the ONS have been correctly entered into their calculations for allocating Formula Grant to local authorities. Otherwise, they do not make any assessment of accuracy of the data supplied, as this responsibility lies with the ONS.

Public Sector Pensions

Peter Bottomley: To ask the Chancellor of the Exchequer if he will estimate total public sector pension liabilities on the basis of discount rates of *(a)* inflation plus 3.5 per cent., *(b)* inflation plus 2.8 per cent., *(c)* the yield on AA-rated corporate bonds and *(d)* the yield on long-term government debt. [48202]

Mr. Laws: To ask the Chancellor of the Exchequer what he estimates the unfunded public service pension liability to have been at 31 March 2005. [48345]

Mr. Philip Hammond: To ask the Chancellor of the Exchequer what the aggregate net present value of public sector pension liabilities is, using a discount rate equivalent to the current yield on long-dated indexed linked Government debt at 31 January 2006; and what the estimated value of funds accumulated under funded schemes was at 31 January 2006. [50777]

Mr. Des Browne: I refer the hon. Members to the answer I gave on the Floor of the House earlier today to the hon. Member for Ludlow (Mr. Dunne).

Tax Yield (Businesses)

Mr. Holloway: To ask the Chancellor of the Exchequer what estimate he has made of the taxation yield from *(a)* small and medium sized businesses, *(b)* large businesses and *(c)* business taxes in total in each year since 1997. [54737]

Dawn Primarolo: Figures for corporation tax payable by companies are provided in Table T11.3 of HM Revenue and Customs Statistics, published on the internet. The latest table includes information for each tax year between 1997–98 and 2003–04 (see link): http://www.hmrc.gov.uk/stats/corporate_tax/11_3_oct05.pdf.

A breakdown between small and medium sized and large businesses is not available; however, the table does provide a breakdown of profits chargeable to corporation tax at the main rate and at the small companies' rate.

Taxpayers

Mr. Milburn: To ask the Chancellor of the Exchequer how many taxpayers there were in *(a)* England, *(b)* Scotland, *(c)* Wales and *(d)* Northern Ireland in each year since 1992–93. [54643]

Dawn Primarolo: The estimated number of income taxpayers by country can be found on National Statistics table 2.2 'Number of income taxpayers, by country' on HM Revenue and Customs' website: http://www.hmrc.gov.uk/stats/income_tax/table2-2.xls.

Mr. Lancaster: To ask the Chancellor of the Exchequer how many people in Milton Keynes paid *(a)* income tax and *(b)* the top rate of income tax in each of the last eight years. [54669]

Dawn Primarolo: Information on the number of taxpayers by unitary authority and by constituency can be found in tables 3.14 "Total income by borough and district or unitary authority" and 3.15 "Total Income by Parliamentary Constituency" on the HM Revenue and Customs internet website. http://www.hmrc.gov.uk/stats/income_distribution/menu-by-year.htm#315.

Information on the number of taxpayers by unitary authority is available for the years 1999–2000 to 2003–04 while similar information by constituency is available for the years 2002–03 and 2003–04 only.

A breakdown by tax bands is not available because the sample sizes for marginal rates at these levels of geography are very small and demonstrate a large variability year on year.

Valuation Office Agency

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the answer of 9 February 2006, *Official Report*, column 1398W, on the Valuation Office Agency, how many full-time equivalent staff *(a)* are employed by the agency and *(b)* were employed in each year since 1997–98. [54555]

Dawn Primarolo: I refer the hon. Member to the answer given to the hon. Member for Meriden (Mrs. Spelman) on 11 November 2005, *Official Report*, column 777W. As at 1 February 2006 the Valuation Office Agency employed 4,918 staff.

Mr. Pickles: To ask the Chancellor of the Exchequer whether the Valuation Office Agency has access to data held within the National Land and Property Gazetteer. [54556]

Dawn Primarolo: Yes.

PRIME MINISTER

Departmental Staff

Mike Penning: To ask the Prime Minister whether any *(a)* employee of his office, *(b)* person engaged by his office as a consultant and *(c)* paid adviser is a member of the House of Lords; and if he will make a statement. [52745]

The Prime Minister: For these purposes my office forms part of the Cabinet Office. I refer the hon. Member to the answer given to him by my hon. Friend the Parliamentary Secretary for the Cabinet Office (Mr. Murphy) on 27 February 2006, *Official Report*, column 51W.

TRANSPORT

Railway Crime Incidents (Swansea)

Mrs. James: To ask the Secretary of State for Transport how many railway crime incidents were reported to the British Transport Police in the Swansea area in 2004–05; and if he will make a statement. [53112]

Derek Twigg: There were 402 notifiable and 435 non-notifiable offences recorded by the British Transport Police (BTP) within the area covered by BTP's Swansea police station during the financial year 2004–05.

The Home Office introduced a National Crime Recording Standard (NCRS) that all police forces across England and Wales were required to adopt from 1 April 2002. The NCRS had the effect of increasing the number of recorded crimes by an average of 22 per cent. in all forces in England and Wales. BTP adopted this standard on 1 April 2002. The principle of NCRS is that if, on the balance of probability, a crime has been committed it is recorded as a crime. The standard has made crime recording more victim-focused.

Railway Track

Chris Grayling: To ask the Secretary of State for Transport how many miles of railway track have been replaced in each of the past 20 years; what the average age was of the replaced track; and what proportion of the rail network the replacement track represented. [52656]

Derek Twigg: This is an operational matter for Network Rail and I have asked them to reply directly to the hon. Member.

Violent Offences (Public Transport)

Chris Grayling: To ask the Secretary of State for Transport pursuant to his answer to the hon. Member for Meriden of 8 December 2005, *Official Report*, column 1467W, on violence against passengers, how many victims of *(a)* wounding, *(b)* robbery, *(c)* harassment, *(d)* common assault, *(e)* sexual offences and *(f)* murder were recorded by the British Transport Police in each year since 1998–99. [48270]

Derek Twigg: The information is as follows:

	1998–99	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*2003–04*	*2004–05*
Wounding	207	217	193	212	222	231	263
Robbery	2,209	2,456	2,700	3,408	2,304	2,590	2,081
Harassment	1,675	1,671	1,889	1,964	2,391	3,175	4,112
Common Assault	2,571	3,020	3,048	3,066	3,609	3,935	4,140
Sexual Offences	1,214	1,113	1,040	1,054	1,032	1,156	1,245
Murder	3	4	4	3	2	1	3

ENVIRONMENT, FOOD AND RURAL AFFAIRS

National Farmers Union

Mr. Liddell-Grainger: To ask the Secretary of State for Environment, Food and Rural Affairs how many private meetings Ministers in her Department have had with the National Farmers Union in the last three years; and what the date was of each such meetings. [55271]

Jim Knight: My right hon. Friend the Secretary of State for Environment, Food and Rural Affairs and Ministers in this Department meet external stakeholders, including the NFU, regularly as business warrants.

Water Leakage

Mr. Holloway: To ask the Secretary of State for Environment, Food and Rural Affairs what steps the Government are taking to encourage the water companies to reduce leakage in the water infrastructure. [54429]

Mr. Morley: Water companies are under a duty to develop and maintain an efficient and economical system of water supply. Since 1996 Ofwat has assessed water company performance against leakage targets that balance the needs of customers and the environment. This approach has resulted in a reduction in leakage of around 29 per cent. since its peak in 1994–95. Most water companies are now at their economic level of leakage which is the level of leakage at which it would cost more to make further reductions than to produce water from another source.

CULTURE, MEDIA AND SPORT

Ministerial Visits

Mr. Hands: To ask the Secretary of State for Culture, Media and Sport what official business she undertook on her new year visit to Tunisia. [55246]

Tessa Jowell: None.

Voluntary Organisations (Compact Agreements)

Dr. Francis: To ask the Secretary of State for Culture, Media and Sport with which voluntary organisations her Department has a formal national Compact agreement. [50270]

Mr. Caborn: I refer my hon. Friend to the answer given to him by my hon. Friend the Under-Secretary of State for the Home Department (Paul Goggins) on 27 February 2006, *Official Report*, column 107W.

EDUCATION AND SKILLS

Child Care Provision

Mrs. Maria Miller: To ask the Secretary of State for Education and Skills how many child care places have closed in each year since 1980, broken down by type. [50797]

Beverley Hughes *[holding answer 15 February 2006]:* We are unable to provide figures for annual closures of childcare places for the period prior to 1998, and cannot provide details of closures of places with child minders for years prior to 2001.

The numbers of places closing each year from 1998 onwards are as shown in the following table:

	Full daycare	*Out of school*	*Child minder*
1999–2000	35,513	25,852	n/a
2000–01	39,056	38,319	n/a
2001–02	7,556	12,967	36,454
2002–03	12,130	23,905	62,210
2003–04	7,627	18,490	33,437
2004–05	65,577	72,222	62,972

The net increase in the stock of each of these types of child care between 1999/2000 and 2004/05 is 253,775 full daycare places, 215,439 out of school places and 11,163 child minder places.

Children's Information Services

John Bercow: To ask the Secretary of State for Education and Skills when she expects the remit of the Children's Information Services to be extended to provide information for parents of children up to of age 19 years. [53573]

Beverley Hughes: Clause 12 of the Childcare Bill, currently before Parliament, would place an extended duty on English local authorities to provide information on services, facilities or publications which may be of benefit to parents, prospective parents, children and young persons in their area. Children and young persons include all persons up to their 20th birthday. The Bill builds on the current duty in section 118A of the School Standards and Framework Act 1998, as amended by section 149 of the 2002 Education Act, to provide information on the provision of child care and related services. Authorities fulfil the duty by running children's information services (CISs). Many CISs are already making good progress in extending their services. We will encourage local authorities to move towards ensuring their information services provide the facilities envisaged in the Bill, so that, subject to parliamentary approval, the full service is ready when the duty comes into force, which is planned for April 2008.

John Bercow: To ask the Secretary of State for Education and Skills if she will make a statement on the draft guidance on information sharing for all practitioners who work with children, young people and families. [53579]

Beverley Hughes: Consultation on the draft cross-Government information sharing guidance for practitioners working with children, young people and families ran from 23 August to 15 November 2005. A total of 257 responses was received from a wide range of statutory and voluntary bodies and professional and representative organisations. We also consulted with children and young people themselves. We are now refining the guidance in the light of comments we have received and intend to publish the revised guidance in the spring.

Lifelong Learning

Mr. Gauke: To ask the Secretary of State for Education and Skills what progress has been made in introducing a new accountability system for *(a)* funding, *(b)* planning, *(c)* monitoring, *(d)* audit and *(e)* inspection arrangements for (i) colleges and (ii) other educational providers in the lifelong learning sector. [53536]

Bill Rammell: The Learning and Skills Council (LSC) has a statutory responsibility to plan and fund high quality education and training to deliver Government's priorities and targets for post-16 learning and skills. The LSC's "agenda for change" published in August 2005 set out proposals for a programme of radical transformation in response to the challenge of developing an effective, efficient and dynamic learning and skills sector. Their proposals, including those for simplifying funding and streamlining data collection and monitoring, have been well received by colleges and other providers in the sector. We have made significant progress by reducing the audit burden on colleges through abolishing the detailed end-year funding claim and reconciliation for most institutions. In addition, the inspectorates introduced a lighter touch inspection regime last year which will further reduce bureaucracy for providers. Building on "Success for All" and responding to the challenges set out by Sir Andrew Foster in "Realising the Potential" the Government will soon be publishing their own proposals for reforming the sector.

National Service Framework

John Bercow: To ask the Secretary of State for Education and Skills if she will make a statement on the implementation of the National Service Framework for Children, Young People and Maternity Services. [53576]

Beverley Hughes: The National Service Framework for Children, Young People and Maternity Services is a key element for delivering the Government's Every Child Matters agenda. It will help to deliver the five outcomes: being healthy and staying safe, enjoying and achieving, making a positive contribution and achieving economic well being. The NSF is a 10-year programme and by 2014 we expect health, social care and education services to have met the standards set out in it.

Procurement Policy

Mr. Gauke: To ask the Secretary of State for Education and Skills what measures she has taken to improve procurement in the children, young people and families sector; and what savings have been made as a consequence. [53417]

Beverley Hughes: This Government are committed to improving efficiency and value for money in education and has taken a number of steps to achieve this in the children young people and families sector, including:

Identifying best practice in children's services commissioning

Working in partnership with Regional Centres of Excellence on areas of joint interest

Developing interactive guidance on best practice in procurement.

We will be measuring efficiency gains from a range of specific initiatives which contribute to our Gershon efficiency target, including those in the children, young people and families sector. These are set out in our Efficiency Technical Note at www.dfes.gov.uk/publications/docs/DfES%20Efficiency%20Technical%20Note.doc. In most cases, the gains are recyclable at the frontline into other activities rather than being clawed back by the Department. The Department is reporting progress towards our overall efficiency target through existing departmental reporting processes. We reported progress towards our target in the Department's Autumn Performance Report and will report further progress in the Departmental Annual Report which we expect to publish in April.

Student Bankruptcies

Sarah Teather: To ask the Secretary of State for Education and Skills how many undergraduate students declared themselves bankrupt in London in 2005. [54707]

Bill Rammell: 48 borrowers with publicly owned student loans, whose awarding local authority is in London, have so far informed the Student Loans Company that they became bankrupt in calendar year 2005. There may be delays between borrowers becoming bankrupt and notifying the Student Loans Company, therefore this figure could increase in future.

Figures separately identifying borrowers who took out loans as undergraduates from those who took out loans to fund postgraduate initial teacher training courses, are not available.

The Higher Education Act 2004 included provisions to prevent student loans being written off on discharge from bankruptcy. However bankrupt borrowers continue to benefit from the same non-commercial loan terms as other borrowers, with subsidised interest rates and no obligation to repay if their annual income is below £15,000.

Sure Start

Mr. Gauke: To ask the Secretary of State for Education and Skills what assessment she has made of changes in the Foundation Stage Profile results for Sure Start Local Programme areas in the last three years. [52393]

Beverley Hughes: At the end of each school year (beginning in 2003) my Department collects the Foundation Stage Profile results from each of the 150 English local authorities. Using postcode data we identify the results of those children living in Sure Start Local Programme Areas.

Overall national summary data for FSP was first published in 2003 as 'Experimental Statistics' and in 2004 as 'National Statistics'. However, a background of ongoing improvements to teacher assessment and moderation make it very difficult to draw meaningful statistical judgements about the progress made in Sure Start areas in the last three years. The dataset for 2005 is not strictly comparable with the results in earlier years. My Department considers that the 2005 figures represent the most robust baseline against which progress in Sure Start areas can be effectively monitored. The figures for 2005 are shown in the tables.

Percentage of children achieving each scale score in the 13 assessment scales of the Foundation Stage Profile in all areas in England[1], 2005

	Number of points achieved (percentage)[2]

[1] Aggregation of LEA level results.
[2] The number of points achieved does not necessarily represent a straight progression through the scale. For example, 11 per cent. of children in all areas achieved 6 points in PSE: DA. This does not mean that they have necessarily achieved all the points from 1–6 as it is possible they could have achieved, for example, point 7 but not point 3.
[3] A scale score of 0 indicates where it has not been possible to record an assessment.
[4] A scale score of 1–3 indicates working towards the Early Learning Goals.
[5] A scale score of 4–7 indicates working within the Early Learning Goals.
[6] A scale score of 8–9 indicates achieving all of, or working beyond the Early Learning Goals.
[7] A scale score of 6 or more indicates working securely within the Early Learning Goals.

BEST COPY AVAILBLE

Our assessment of the available results shows that national movements in attainment over the last three years have also been reflected in Sure Start areas. There does however continue to be a gap in achievement between areas of disadvantage and the national average and this is why £538 million has been made available for capital investment and £487 million for revenue investment in children's centres services, focussing on the most deprived areas.

The final figures on the Foundation Stage Profile in England were published in Statistical First Release 03/2006 "Foundation Stage Profile 2005: National Results (Final)" on February 16, a copy of which is available on my Department's website www.dfes.gov.uk/rsgateway/.

Derek Wyatt: To ask the Secretary of State for Education and Skills what assessment she has made of the management costs imposed by local authorities for the administration of Sure Start. [54083]

Beverley Hughes: From April 2006 revenue funding for Sure Start local programmes will be paid through local authorities as part of the General Sure Start Grant instead of to the individual local programmes as at present. These new arrangements will allow authorities to make savings on administration costs.

University Places

Mr. Laws: To ask the Secretary of State for Education and Skills what proportion of university places in England have been taken up by pupils from each *(a)* socioeconomic class and *(b)* income decile in each year since 1978–79. [41444]

Bill Rammell: The available figures on the social background of students obtaining places on full-time undergraduate courses in the UK are shown in the following tables; information on the family income of these students is not held centrally. The figures are limited to students who applied to full-time undergraduate courses via the various application organisations, and they do not therefore cover part-time students nor those full-time students who apply directly to higher education institutions.

Since 1994, figures have been published by the Universities and Colleges Admissions Service (UCAS). In previous years, figures were published separately by the Universities Central Council on Admissions (UCCA), which covered applicants to universities funded by the Universities Funding Council (UGC), and the Polytechnics Central Admissions System (PCAS), which covered the polytechnics and higher education colleges. UCAS, UCCA and PCAS all published figures for institutions in the UK, and PCAS did not collect details of social background prior to 1991.

Accepted applicants to universities in the UK by social class

	1980	*1981*	*1982*	*1983*	*1984*
Total accepted students	78,939	74,514	72,634	69,631	71,768
of which, percentage from[1]:					
I Professional	22.6	24.9	24.2	23.6	22.3
II Intermediate	47.3	49.5	49.4	49.0	48.6
IIIN Skilled non-manual	10.7	8.5	8.9	8.7	10.0
IIIM Skilled manual	14.2	12.3	12.3	11.9	12.0
Partly skilled	4.2	3.9	4.3	5.7	6.0
Unskilled	1.1	1.0	1.0	1.0	1.0

	1985	*1986*	*1987*	*1988*	*1989*
Total accepted students	76,181	76,896	78,344	80,496	87,013
of which, percentage from[1]:					
I Professional	21.0	20.4	20.3	21.0	20.7
II Intermediate	48.1	48.2	48.0	48.1	49.2
IIIN Skilled non-manual	10.4	10.7	11.1	11.0	10.9
IIIM Skilled manual	12.7	12.5	12.9	12.5	12.1
Partly skilled	6.6	6.9	6.6	6.3	6.1
Unskilled	1.2	1.2	1.1	1.1	1.1

	1990	*1991*	*1992*	*1993*
Total accepted students	99,377	106,717	117,976	127,476
of which, percentage from[1]:				
I Professional	19.6	19.3	21.1	20.3
II Intermediate	50.1	50.0	45.7	45.5
IIIN Skilled non-manual	11.0	11.4	11.8	11.9
IIIM Skilled manual	11.9	11.9	13.7	14.6
Partly skilled	6.4	6.4	6.4	6.4
Unskilled	1.0	1.0	1.3	1.4

[1] Proportions are based on students who provided details of their background, and exclude non-respondents. Between 1980 and 1982, the social class distribution was based on a 10 per cent. sample of students; in later years all students were required to provide the data. Up until 1984 social class was collected only for students with A levels.

Universities and Colleges Admissions Service (UCAS).

University Students

Jim Cousins: To ask the Secretary of State for Education and Skills pursuant to the answer to the hon. Member for South Holland and The Deepings (Mr. Hayes) of 2 February 2006, *Official Report*, columns 690–91W, on university students, what percentage of students from socio-economic classes four to seven there were in each higher education institution in the north east in 2003–04. [54627]

Bill Rammell: Information for higher education institutions is published by the Higher Education Statistics Agency (HESA) in the annual publication "Performance Indicators in Higher Education". The latest available figures on the percentage of young full-time first degree entrants from National Statistics—Socio Economic Classes (NS-SEC) 4, 5, 6 and 7 are shown in the table.

Percentage of young full-time first degree entrants from National Statistics—Socio Economic Classes 4–7 at HE institutions in the north east 2003/04

HE institution	Number of young full-time first degree entrants	Percentage with known data	Percentage from NS-SEC 4–7[1]
University of Durham	3,480	92.9	15.8
University of Newcastle upon Tyne	3,595	91.6	20.9
University of Northumbria at Newcastle	4,050	82.6	31.2
University of Sunderland	2,355	83.5	39.0
University of Teeside	2,285	77.7	41.4

[1] 4: small employers and own account workers;
5: lower supervisory and technical occupations;
6: semi-routine occupations;
7: routine occupations.
Source:
Higher Education Statistics Agency (HESA) 'Performance Indicators in HE'

Voluntary Organisations (Compact Agreements)

Dr. Francis: To ask the Secretary of State for Education and Skills with which voluntary organisations the Department has a formal national Compact agreement. [50264]

Beverley Hughes: I refer my hon. Friend to the reply given by my hon. Friend the Parliamentary Under-Secretary of State for the Home Office on 27 February 2006, *Official Report*, column 107W.

SCOTLAND

Arbuthnott Commission

Mr. Hood: To ask the Secretary of State for Scotland what the costs of the Arbuthnott Commission Report were; and if he will make a statement. [53724]

David Cairns: The full costs of the Arbuthnott Commission are expected to be in the region of £245,000 but cannot be established until all final invoices have been received.

Mr. Hood: To ask the Secretary of State for Scotland if he will list the membership of the Arbuthnott Commission; and what remuneration was paid to each member for serving on the Commission. [53725]

David Cairns: Membership of the Arbuthnott Commission is set out in their report, a copy of which was sent to all hon. Members with a Scottish constituency. No member of the Arbuthnott Commission received remuneration, however, they were entitled to claim for relevant travel and expenses associated with their work.

Mr. Hood: To ask the Secretary of State for Scotland what discussions he has had with Scottish Executive Ministers on the Arbuthnott Commission Report; and if he will make a statement. [53726]

David Cairns: My right hon. Friend and I have regular discussions with Scottish Executive Ministers on a range of matters. The Report makes 24 recommendations, some of which are for the Government, some for the Scottish Executive and others for the Electoral Commission.

Electricity Pylons

Mr. Pickles: To ask the Secretary of State for Scotland whether the erection of new electricity pylons in Scotland as it affects *(a)* energy and *(b)* planning policy is a (i) reserved and (ii) devolved matter. [56155]

David Cairns: Installation of a high-voltage transmission line requires consent under Section 37 of the Electricity Act 1989. In Scotland functions under s.37 were executively devolved in 1999 and are exercised by Ministers of the Scottish Executive.

Solvent Abuse

Mr. MacDougall: To ask the Secretary of State for Scotland what discussions he had with the Department of Trade and Industry on consumer protection measures to protect the public in Scotland from solvent abuse. [54178]

David Cairns: My right hon. Friend and I regularly meet ministerial colleagues to discuss a wide range of issues. The UK Government as well as the Scottish Executive are committed to tackling the continuing problem of solvent abuse and increasing awareness of the problem.

TRADE AND INDUSTRY

Commonwealth Day

Daniel Kawczynski: To ask the Secretary of State for Trade and Industry if he will make Commonwealth Day a national holiday. [55940]

Mr. Sutcliffe: The Government receives a variety of suggestions for new or different bank holidays. However, it is not possible to please everyone as to who or what should be celebrated. Unlike Northern Ireland, where St Patrick's Day is a bank holiday, bank and public holidays in Great Britain do not, by tradition, commemorate particular individuals, events, or institutions, other than those associated with Christmas and Easter. The present pattern of bank holidays is well established and accepted, and we have no current plans to change the arrangements.

Public School Fees

Mr. Liddell-Grainger: To ask the Secretary of State for Trade and Industry if he will make a statement on the recent statement of objections by the Office of Fair Trading on exchange of information by public schools on fees charged. [55397]

Mr. Sutcliffe: The Office of Fair Trading (OFT) is the United Kingdom's independent competition regulator. It has a duty to investigate and address anti-competitive conduct and enforce competition law. It has investigated the exchange of information between independent schools about the fees they charge. On 27 February 2005, the OFT issued a statement that they have agreed in principle to accept a proposal from the Independent Schools Council Steering Group for an ex-gratia payment from the schools concerned to be made which would bring the investigation to an end.

This is a matter for the Office of Fair Trading. The Government has no substantive role in individual cases.

Voluntary Organisations (Compact Agreements)

Dr. Francis: To ask the Secretary of State for Trade and Industry with which voluntary organisations the Department has a formal national Compact agreement. [50269]

Alan Johnson: I refer my hon. Friend to the answer given on 27 February 2006, *Official Report*, column 107W by my hon. Friend the Parliamentary Under Secretary of State at the Home Office.

Weights and Measures

Mr. Spellar: To ask the Secretary of State for Trade and Industry pursuant to the answer of 19 December 2006, *Official Report*, column 2324W, on full pint legislation, when he expects to publish proposals for consolidating and simplifying the weights and measures provisions relating to food. [54788]

Mr. Sutcliffe: The timing of the consultation on a new Order, consolidating and simplifying the weights and measures provisions relating to food, remains dependent on the progress of discussions in the European Council and Parliament of the Commission's proposals on specified quantities.

DEFENCE

Apache Helicopters

Mr. Hancock: To ask the Secretary of State for Defence pursuant to the answer of 7 February 2006, *Official Report*, column 1079W, on Apache helicopters, what original date was set for the provision of a full complement of *(a)* Apache helicopters, *(b)* fully trained pilots and *(c)* fully trained engineers; what the current target date is in each case; and if he will make a statement. [51883]

Mr. Ingram: The original contract delivery date for the final Apache helicopter was January 2004. This was changed to April 2004 to incorporate System Enhancements into those aircraft remaining to be delivered and achieved. The Retrofit Programme for those aircraft already delivered in the earlier part of the contract was originally due to be completed in June 2005, but is now due to complete in March 2006.

The planned date for the provision of a full complement of Apache pilots was July 2006. The Army Air Corps is halfway through the conversion programme of pilots to the Apache helicopter and the full establishment is now expected to be reached in 2010. However, we expect all three Apache Regiments to be combat ready, with sufficient pilots in each Regiment, by December 2008. This level of manning will enable each Regiment to deploy on operations.

The planned date for full manning of Apache helicopter engineers is July 2007 and we expect this date to be met.

Congestion Charge

Mr. Lancaster: To ask the Secretary of State for Defence what steps he is taking to minimise the number of his Department's vehicles entering the London congestion charge zone. [54886]

Mr. Touhig: Departmental policy requires that all travel is arranged in the most cost-effective manner. The congestion charge is only one of the factors that would be taken into account when deciding the most economical mode of transport.

Mr. Lancaster: To ask the Secretary of State for Defence how much his Department has paid for vehicles entering the London congestion charge zone in each year since it was introduced; and how much of that sum is accounted for by *(a)* military vehicles, *(b)* white fleet and *(c)* privately-owned vehicles. [54887]

Mr. Touhig: Military vehicles are exempt from congestion charges. 'White Fleet' (administrative vehicles) and privately-owned vehicles used for MOD business journeys are liable for congestion charges, but records of congestion charge payments made by the Department are not held centrally and could be provided only at disproportionate cost.

Defence Contracts

John Smith: To ask the Secretary of State for Defence what proportion of defence contracts were awarded to BAE Systems in *(a)* 2002–03, *(b)* 2003–04 and *(c)* 2004–05; what the value was in each case; and how many were won through competitive tenders. [54098]

Mr. Ingram: Based on data derived centrally from the Defence Bills Agency database, the following table details by value the proportion of contracts, and those won in competition, awarded directly to BAE Systems and their subsidiaries. The database represents the vast bulk of payments to the Ministry of Defence contractors but excludes local imprest accounts, contracts placed on behalf of other Government Departments, collaborative contracts placed through European Government Agencies and those awarded by MOD's trading fund agencies.

Financial year	£ billion (a) Total MOD contracts	£ billion (b) BAES contracts	Percentage Proportion (b) to (a)	£ billion (c) Competitive tenders	Percentage Proportion (c) to (b)
2002–03	15.835	1.120	7	0.493	44
2003–04	11.978	0.562	5	0.012	2
2004–05	12.650	0.573	5	0.116	20

Departmental Finance

Mr. Harper: To ask the Secretary of State for Defence what the value was of receipts from *(a)* royalties, *(b)* compensation and insurance receipts and *(c)* sales of licences that were (i) appropriated in aid of his Department and (ii) surrendered to the Consolidated Fund in each financial year since 1997–98. [53667]

Mr. Ingram: The majority of receipts from royalties and sales of licences are managed by the Ministry of Defence's Intellectual Property Rights Group, and arise from the use of crown copyright, patents and trade marks and database rights. Receipts for the period 1997–98 to 2004–05 are detailed in the table:

	£ thousand
1997–98	298
1998–99	156
1999–2000	130
2000–01	56
2001–02	36
2002–03	14
2003–04	109
2004–05	292

It is possible that other receipts arising from royalties and sales of licences have been received within other areas of the Department; however, this information is not readily identifiable and could only be provided at disproportionate cost.

Receipts from compensation and insurance claims are collated through the Ministry of Defence's Directorate of Safety and Claims which has published Annual Reports for the years requested, copies of which have been placed in the Library of the House.

All receipts were appropriated in aid of the Department.

Dog Training

Tony Baldry: To ask the Secretary of State for Defence (1) whether the armed forces use electric shock collars to train their dogs; [52385]

(2) what training methods each of the armed forces uses to train dogs; and what training devices each employs. [52386]

Mr. Ingram: Dog training within the Armed Forces is conducted at the Defence Animal Centre. Training is supervised and conducted in progressive stages, and the dogs are trained wearing either a plain leather collar or a high visibility harness with a rope or leather lead. Training is reward-based, including verbal praise, physical play or a combination of the two. No devices (such as electric shock collars) are used in the evaluation, training or retraining of Service dogs.

Historical Wrecks

Robert Key: To ask the Secretary of State for Defence for what reasons the Government authorised Odyssey Marine Exploration to undertake salvage work on the wreck of HMS Sussex. [53452]

Mr. Ingram: Odyssey Marine Exploration independently located the site and requested a licence to undertake an archaeological excavation with a view to recovering the cargo. A multi-departmental Project Board concluded that there was a danger of the site being subject to illicit salvage. Having considered Odyssey's competence in deep ocean archaeological excavation the Board concluded that it was preferable to manage the project in co-operation with the finder, ensuring that the site was excavated responsibly and to the fullest possible extent in accordance with good archaeological practice.

Injured Personnel

Mr. Harper: To ask the Secretary of State for Defence how many people were awarded a war pension in each of the past five years, broken down by the type of injury and illness for which they were awarded. [53658]

Mr. Touhig *[holding answer 27 February 2006]:* The information is not held in the format requested.

However, we can provide the number of cases where an ongoing war pension was awarded in each of the past five years for the twelve month period 1 October to the following 30 September.

	New pensions awarded
2000–01	2,585
2001–02	2,440
2002–03	1,965
2003–04	1,800
2004–05	1,670

Joint Military Exercises

Mr. Ancram: To ask the Secretary of State for Defence what joint training exercises have been conducted between the Royal Air Force, Army and Royal Marines with their equivalent counterparts in the armed forces of Pakistan since January 2002; and in what type of terrain these exercises were conducted. [55111]

Mr. Ingram: Since January 2002 exercise opportunities with Pakistani armed forces have been limited. The Army and Royal Air Force have had no interaction. Royal Navy units operating in the Indian Ocean do have regular contact, both for operations and training. The Joint Warfare Staff in the Permanent Joint Headquarters conducted an Overseas Joint Operations Planning Course in the Pakistani Joint Services HQ in Islamabad over the period 6 to 10 February 2006. It was attended by 47 officers from all three armed services. The course did not include a field phase.

Leaf Class Tankers

Mr. Hancock: To ask the Secretary of State for Defence how many *(a)* officers and *(b)* crew are carried on each Leaf class tanker. [55540]

Mr. Ingram: The complement for each of the four Leaf class tankers is set out in the following table:

Ship	*Number of officers*	*Number of ratings*
RFA Bayleaf	15	42
RFA Brambleleaf	15	42
RFA Orangeleaf	15	42
RFA Oakleaf	14	22

Mr. Hancock: To ask the Secretary of State for Defence which Leaf class tankers are available; and at what notice in each case. [55541]

Mr. Ingram: All four Leaf class tankers are available for tasking by Fleet and all are at a high readiness state.

Military Training

Mr. Hayes: To ask the Secretary of State for Defence how many UK citizens under 45 years of age have undertaken basic military training. [53268]

Mr. Touhig: Data regarding the number of UK citizens under 45 years of age who have under taken basic military training, are not held centrally.

Mine Clearance

Mr. Gerald Howarth: To ask the Secretary of State for Defence what assessment his Department have made of the use of unmanned surface vehicles in mine clearance. [54375]

Mr. Ingram: During war fighting operations minefields are breached rather than cleared, to maintain our tempo and freedom of manoeuvre. On non-war fighting operations comprehensive mine clearance is generally undertaken by humanitarian organisations, rather than the armed forces. Unmanned surface vehicles have some utility in such mine clearance, and humanitarian deminers use unmanned flails as part of the process. However this is still followed up with hand clearance for complete assurance that the area is clear.

Within our armed forces, Royal Engineer Explosive Ordnance Disposal teams use the Redfire remotely controlled vehicle to deal with mines that have strayed out of minefields in the Falklands. Our future armoured minefield breaching vehicle, Trojan, and the Terrier engineer vehicle also have a capability to be fitted for remote operation during minefield breaching operations.

Navigation Data

Mr. Gerald Howarth: To ask the Secretary of State for Defence if he will place in the Library copies of documents *(a)* DCI 305/4, *(b)* the GPS Office charter and *(c)* DIN 2005DIN08–013 relating to global positioning satellite systems. [54378]

Mr. Ingram: The DCI and DIN requested are being withheld because their release would be likely to prejudice the security of our armed forces. The GPS Office Charter contains information which, if released, may compromise international relations. This is being reviewed and I will write to the hon. Member when the review has been completed.

Nuclear Deterrent

Lynne Featherstone: To ask the Secretary of State for Defence what discussions he has had with *(a)* Ministers and *(b)* officials from other Departments on the renewal of the British nuclear deterrent; and if he will make a statement. [54577]

John Reid: No decisions have yet been taken on any replacement for Trident although these are likely to be required in the current Parliament. Preparatory work is being undertaken by officials in a number of departments on possible options for the future of the UK's nuclear deterrent. Ministers have not yet received advice on this issue.

QinetiQ

Lynne Jones: To ask the Secretary of State for Defence (1) what the maximum number of employees of QinetiQ with experience of acquisitions and mergers was *(a)* before and *(b)* after the sale of 34 per cent. of its shares; [54897]

(2) what acquisitions were bought by QinetiQ *(a)* before and *(b)* after the sale of 34 per cent. of its shares. [54898]

John Reid: This is an operational matter for the company; questions should be referred to the chief executive at the following address:

Graham Love
Chief Executive
QinetiQ Limited
Cody Technology Park
Building Al
Ively Road
Farnborough
Hampshire
GUI4 OLX

RMP Buildings (Chichester)

Mr. Tyrie: To ask the Secretary of State for Defence whether decisions have been taken about the future use of the land and buildings until recently occupied by the Royal Military Police in Chichester; and if he will make a statement. [54745]

Mr. Touhig: Rousillion Barracks is surplus to Ministry of Defence (MOD) requirements for police use. Although we are still considering wider defence uses for the site, it is likely that it will come forward for disposal. Indeed, the site has already been exposed on the English Partnerships' (EP) Register of Surplus Public Sector Assets. While EP do not wish to acquire the site, we have opened discussions with them (as well as with other stakeholders) as they wish to work with MOD in relation to the sale of an adjacent hospital site.

Sea Harriers

Mr. Gerald Howarth: To ask the Secretary of State for Defence what representations he has received from the Indian Government concerning the possible purchase of surplus UK Sea Harriers; and if he will make a statement. [54348]

Mr. Ingram: The Indian navy has recently expressed an interest in acquiring up to eight surplus Sea Harrier FA2 aircraft for use as training aircraft in support of the existing Indian navy Sea Harrier FRS51 fleet. Discussions between the UK Ministry of Defence and the Indian navy are continuing.

Security

Lynne Featherstone: To ask the Secretary of State for Defence what assessment he has made of the likely impact on UK security of future depletion of natural resources; and if he will make a statement. [54578]

Mr. Ingram: The Ministry of Defence continually assesses threats, challenges and opportunities for UK security as part of its planning process.

Increased competition for limited natural resources is one factor which could contribute to conflict both within and between states. This and other dimensions of the security challenge are dealt with in Chapter 2 of the 2003 Defence White Paper—"Delivering Security in a Changing World" (Cm 6041–1).

INTERNATIONAL DEVELOPMENT

Afghanistan

Peter Law: To ask the Secretary of State for International Development what assessment he has made of the merits of the Afghan poppy crop being bought by richer nations and converted into morphine for medical uses; and what assessment his Department has made of alternative agricultural options for Afghan poppy farmers. [52427]

Hilary Benn: The Afghan Government has expressed its opposition to licit cultivation of opium. The Afghan Minister for Counter Narcotics, Habibullah Qaderi has said recently:

> "The poor security situation in the country means there can simply be no guarantee that opium will not be smuggled out of the country for the illicit narcotics trade abroad. Without an effective control mechanism, a lot of opium will still be refined into heroin for illicit markets in the west and elsewhere. We could not accept this."

The UK agrees that licensing opium cultivation in Afghanistan for medical use is not a realistic solution to its drug problem, not least because it risks a high level of diversion of licit opium into illegal channels. The production of opium is also contrary to the Constitution of the Islamic Republic of Afghanistan.

It is also unlikely that licit Afghan opium would be economically viable as Afghanistan could not compete with countries currently producing licit opium such as Australia, France and Spain. Legalisation is against the approach set out in the Afghan Government's internationally endorsed national drug control strategy. Some progress in reducing illegal cultivation is being made but it will take time and will take even longer if farmers and traffickers believe that the ban on cultivation is open to challenge.

Agriculture dominates the Afghan economy. Previously Afghanistan was a major exporter of horticulture and livestock products. However, 25 years of war and civil conflict and the recent drought have

seriously affected Afghanistan's agriculture sector. Developing this sector is critical for economic growth, poverty reduction and for tackling opium poppy cultivation. Although no other crop can compete with poppy in terms of economic return to farmers, there are several promising and profitable legal alternatives.

DFID leads the British Government's efforts to develop alternative livelihoods to opium production in Afghanistan. In financial year 2005–06, we are spending over £45 million for this purpose. This is an almost tenfold increase on the amount spent in 2003–04. In financial year 2006–07 spending is expected to continue at similar levels. A proportion of this funding will continue to be specifically targeted on improving agricultural opportunities for Afghan farmers. This includes research to help identify, test and implement new crops and technologies. Examples include improvements in health and husbandry for livestock, apricot drying, honey bee keeping, and the introduction of fruit tree nurseries and greenhouses for vegetable production. DFID has also jointly funded with United States Agency for International Development a $25 million nationwide programme to increase access to seeds and fertiliser for over 500,000 farmers for alternative crops.

At the same time as developing agricultural opportunities, DFID is also promoting the development of non-farm alternative livelihoods by supporting national programmes of the Government of Afghanistan which are helping to increase access to credit and improve infrastructure for farmers to transport their produce to markets.

Andrew Rosindell: To ask the Secretary of State for International Development if he will make a statement on his Department's activities in Afghanistan. [52734]

Hilary Benn: The Department for International Development is working with the Afghan Government and the rest of the international development community to rebuild the country and reduce poverty. DFID has provided over £300 million in bilateral support since September 2001. At the London conference on Afghanistan on 31 January, we committed a further £330 million over the next three years, as part of a wider UK pledge of some £500 million. In addition to this, DFID provides support to Afghanistan through multilateral channels including the European Community, the United Nations and the World Bank.

Following the launch of the Afghan Government's National Development Framework in April 2002 donors were asked to focus on specific areas of Afghanistan's reconstruction needs. DFID's focus recently has been on building the capacity of the Afghan Government's institutions, supporting better economic management and promoting sustainable livelihoods. The Afghan Government have recently completed their Interim Afghanistan National Development Strategy (IANDS). DFID and other donors are considering how to realign our programmes behind this new strategy.

Further information on DFID's current programme can be found in the "Interim Strategy for Afghanistan" 2005–06 placed in the Libraries of the House, or on DFID's website at www.dfid.gov.uk/countries/asia/afghanistan.asp

Angola

Jeremy Corbyn: To ask the Secretary of State for International Development what progress has been made on the establishment of a donors conference for Angola; and if he will make a statement. [54169]

Hilary Benn: Over the past few months, the Government of Angola has indicated that the time has passed for a traditional donors' conference where donors pledge resources. At the same time, some members of the international community as well as members of the Angolan Government have suggested that a partners' conference would be more appropriate at this stage in the country's reconstruction and development.

The main outcomes of such as event would be to secure a closer working relationship between the Government of Angola and the international community on development objectives: a formal agreement to continue open dialogue including on issues such as governance and transparency and further steps to improve aid effectiveness.

DFID and the FCO have agreed to consult the World Bank, the International Monetary Fund (IMF) and the other bilateral donors in Angola about their interest in a partners' conference involving government, donors, the private sector and civil society. These consultations have only recently started and have not yet reached any clear conclusions

Auditing

Mark Simmonds: To ask the Secretary of State for International Development what assessment he has made of the effectiveness of *(a)* the Auditor-General and his Department and *(b)* the internal departmental auditing mechanisms in (i) Ethiopia, (ii) Ghana, (iii) Kenya, (iv) Mozambique, (v) Rwanda, (vi) Tanzania, (vii) Uganda, (viii) India, (ix) Pakistan and (x) Vietnam. [53851]

Hilary Benn: DFID has conducted fiduciary risk assessments in all 10 countries, in advance of agreeing commitments of poverty reduction budget support or other types of aid. These assessments involve an analysis (with recommendations for strengthening where appropriate) of the partner countries' public financial management and accountability systems—including the effectiveness of their auditors-general and other control mechanisms such as internal audit. In assessing audit systems we consider factors such as the independence of the auditor and resources available to carry out audits; the scope and nature of the audit work; standards used, timeliness of reports and follow up actions taken.

Further analyses of fiduciary controls in Ghana, Uganda, Mozambique, Pakistan and India have been carried out this financial year by the UK National Audit Office (NAO) and DFID's own internal audit department as part of routine audit work. Additionally, at the request of the Kenyan Auditor General, DFID provided consultant support to review the functioning of the Kenya National Audit Office.

Darfur

John Bercow: To ask the Secretary of State for International Development what estimate he has made

of the number of people who are residing in internally displaced persons' camps in Darfur; and what estimate he has made of the number who have access to humanitarian assistance. [52195]

Hilary Benn: In Darfur 1.8 million people are residing in internally displaced persons' camps. The UN estimates that it currently provides humanitarian assistance to 77 per cent. of these. Inaccessibility of the remaining 23 per cent. is due to increasing insecurity in Darfur, particularly in West Darfur, over the last couple of months.

In addition to these internally displaced persons (IDPs) a further 1.8 million people who live outside the camps are in need of humanitarian assistance. These people are even more vulnerable to access disruption caused by insecurity.

The priority is to continue to provide for people in and outside camps who are in need of assistance and protection, and to find a political solution that will allow people to return home and rebuild their lives. During my visit to Sudan on 21–22 February, I talked to the AU about how the UK and others could assist AMIS in improving security and pressed the Government to put forward proposals for a negotiated political agreement in Abuja.

Democratic Republic of the Congo

Keith Vaz: To ask the Secretary of State for International Development what recent discussions he has had with his EU counterparts on the distribution of aid in the Democratic Republic of the Congo. [53165]

Hilary Benn: EU members states and the European Commission are partners with DFID in the Democratic Republic of the Congo (DRC). The European Commission is the second biggest donor in the DRC (€227 million in 2005) after the World Bank. France, Belgium, the Netherlands, Sweden and Germany also have aid programmes in the DRC. The EC, France, Belgium, Germany and the UK are all developing new plans for development assistance to the DRC over the course of 2006. We are working together to try and ensure that our activities are complementary.

Given the extent of humanitarian and development needs, the international community has given insufficient aid to the DRC. I wrote to Kofi Annan on 8 February welcoming the launch of the 2006 UN action plan for the DRC, which made clear the level of unmet need in the country, and asked donors to give $681 million in support of humanitarian programmes. The UK has pledged £60 million over two years to this plan, and encouraged European and other donors to contribute significant funds as well.

In my letter to Kofi Annan, I also stressed the importance of meeting all needs, no matter where poor people are or the cause of their suffering. The east of the DRC, which has suffered most from the conflict, has traditionally benefited more from development and humanitarian assistance than other regions, but there are other areas of the country with equal or greater needs that also need support. The UN action plan seeks to address humanitarian needs across the country, irrespective of geographical location and cause. We are working with the UN, European and other counterparts to achieve this. There is also recognition among the donor community that urgent humanitarian and longer term development needs in the DRC should be addressed in parallel.

Jeremy Corbyn: To ask the Secretary of State for International Development what monitoring of the use of UK aid to the Democratic Republic of the Congo is undertaken by his Department; and if he will make a statement. [54167]

Hilary Benn: Monitoring of the use of UK aid to the Democratic Republic of Congo is conducted in accordance with standard DFID procedures that apply across all of the Department's programmes. For our bilateral aid, organisations implementing projects on behalf of DFID are required to submit regular, usually quarterly, financial and narrative reports on their activities. In addition, projects over £1 million require a full review to be undertaken at least annually with recommendations for actions to maximise impact and a final completion report, including the lessons learned to inform future work. Regular monitoring by DFID staff, who remain closely in touch with partner organisations throughout the duration of a project, is also an important part of the monitoring process.

All multilateral agencies have their own internal monitoring and evaluation systems and DFID's work on reforming the international system has included helping to strengthen these systems to deliver results at a country level. An example is DFID's use of the Multilateral Effectiveness Framework to assess the performance of multilateral agencies and make recommendations for improvement. The UK has a seat on the board of multilateral organisations, and is therefore involved in multilateral decision making including the development and review of country strategies and programmes.

DFID also works jointly with multilateral agencies on many projects. DFID in the DRC works with multilateral agencies and other bilateral donors on justice, infrastructure, humanitarian, police, governance, HIV/AIDS and social sector projects. Working together in this way enables DFID to design, monitor and evaluate these programmes jointly with other donor organisations.

One of the most important ways in which we monitor multilateral agencies' work is through daily discussion, sharing information and ideas between DFID staff in DRC and partners in the European Commission, World Bank, International Monetary Fund and United Nations, on both the development of their overall strategies for DRC and the implementation of individual programmes.

Developing Countries

Mr. Bone: To ask the Secretary of State for International Development what assessment he has made of the impact of EU agricultural policies on people in developing countries; and if he will make a statement. [54451]

Hilary Benn: The Government acknowledge the damaging impact that dumping and trade-distorting subsidies have on developing countries, particularly on their agriculture. We fully support the commitment made at the WTO Doha ministerial meeting in 2001,

which agreed that agriculture negotiations would aim to achieve: substantial improvements in market access; reductions of, with a view to phasing out, all forms of export subsidies; and substantial reductions in trade-distorting domestic support.

On export subsidies, there was progress at the World Trade Organisation (WTO) ministerial held in Hong Kong in December. It was agreed that export subsidies would be completely eliminated by 2013, subject to movement in other areas of the negotiations. The UK wanted the end date to be 2010, but there will be frontloading and substantial reductions in these particularly damaging subsidies early in the implementation period.

The package of reforms to the EU's common agricultural policy (CAP) agreed in June 2003 and May 2004 mark a significant shift in the EU's agricultural policy. The decoupling of subsidies from production should connect European farmers much more closely to the market and have real impacts on reducing excessive production, which results in dumping and harms developing countries. The Government will continue to push for further reform of the EU's agricultural policy and I welcome the fact that the EU Commission has reaffirmed its commitment to ensuring that the EU plays a full and constructive role in the WTO agriculture negotiations.

The Doha Development Agenda represents an important opportunity to make a significant contribution to reducing global poverty. The UK Government are working to achieve an outcome that delivers real gains for developing countries, including the poorest. These gains should include improved participation by developing countries in the world trading system, through substantially increased market access for developing countries and the dismantling of trade-distorting agricultural subsidies by industrialised countries.

Iraq

Mr. Rob Wilson: To ask the Secretary of State for International Development how much his Department spent on reconstruction in Iraq between April 2003 and December 2005. [53852]

Hilary Benn: DFID spent £290 million in humanitarian and reconstruction assistance in Iraq between April 2003 and December 2005. DFID also provides 19 per cent. of European Community development funding: the EC spent €518 million on humanitarian and reconstruction assistance to Iraq between 2003 and 2005.

Mr. Rob Wilson: To ask the Secretary of State for International Development how much was spent on armoured civilian vehicles by his Department for operation in Iraq between April 2003 and December 2005; and how many such vehicles were purchased by his Department in that period. [54293]

Hilary Benn: Between April 2003 and December 2005, DFID purchased 42 armoured vehicles, to enable staff to safely carry out our humanitarian and reconstruction activities in Iraq. The total cost of these vehicles was £2,732,000.

Mr. Rob Wilson: To ask the Secretary of State for International Development what the cost to his Department was of *(a)* preparing and *(b)* deploying contracted (i) civil service and (ii) non-civil service (A) UK and (B) non-UK civilian personnel to Iraq between April 2003 and December 2005; and what the salary costs of these staff were in this period. [54296]

Hilary Benn: Between April 2003 and December 2005, DFID spent £210,000 preparing DFID civil servants and consultants for deployment to Iraq. This covers pre-deployment hostile environment training, plus necessary equipment such as satellite phones, body armour, flak jackets and helmets. Our records do not disaggregate this figure between our own staff and project consultants or between UK and non UK personnel.

DFID civil servants working on the Iraq programme in this period have cost £4.4 million. This includes salaries, overseas allowances, transfer costs and travel. Of this amount, £3 million was disbursed on salaries. Again, our records do not disaggregate these costs between those staff working in London and those working in Iraq, or between UK and non UK personnel.

Most non-civil service personnel deployed to Iraq are engaged not individually, but through bigger contracts to implement projects. The total cost to DFID of all consultancy contracts in Iraq during this period was £31.4 million. Our records do not disaggregate this figure between fees, reimbursables and programme costs, or between preparation and deployment costs. Consultants receive fees rather than salaries, so it may be helpful to know that the average fees paid for a consultant working for DFID in Iraq are between £700 to £1,250 a day.

In addition to the above costs, DFID also meets essential life support costs for all DFID staff and consultants who work in or visit Iraq. This includes security, transport, medical services, food and accommodation; we expect to disburse £55 million on this life-support between April 2003 and the end of the current financial year, ending 31 March 2006. This support is necessary and integral to the effective delivery of the humanitarian and reconstruction programmes that we run.

Mauritius

Dr. Francis: To ask the Secretary of State for International Development if he will make a statement on his Department's activities in Mauritius. [53713]

Hilary Benn: DFID does not have a bilateral programme in Mauritius. Our development assistance to Mauritius is primarily channelled through our contributions to the EC and UN programmes there. The UK contributes 12.7 per cent. to the European Development Fund, which delivers funds to ACP countries, including Mauritius. The EC has allocated 43 million euros for development activities in Mauritius between 2001 and 2007.

In addition, the UK provides limited support through a small grants scheme, amounting to £60,000 this year, for which the Foreign and Commonwealth Office is responsible.

Middle East

Mr. Jim Cunningham: To ask the Secretary of State for International Development (1) what alternative channels of funding to the Palestinians are being considered should Hamas refuse to renounce violence and recognise Israel; [53484]

(2) what assessment he has made of the effect of the Palestinian election on international funding for Palestinian development; [53483]

(3) what review of the country assistance plan for Palestinians is being made in light of Hamas's success in the Palestinian elections; [53486]

(4) what assessment he has made of private sector initiatives as a means of sustaining international aid to the Palestinians. [53485]

Hilary Benn: The Government fully support the statements by the Quartet and the European Union on 30 January. We support the Quartet in urging measures to facilitate the work of the current caretaker government to stabilise public finances. Future assistance to any new Palestinian Government will be reviewed against that Government's commitment to the principles of non-violence, recognition of Israel, and acceptance of previous agreements and obligations, including the roadmap. Subject to that review it is too early to say what channels of funding to the Palestinians might be appropriate.

The Chancellor of the Exchequer has launched an initiative to identify how private sector development and growth can contribute to sustained peace in the region. DFID supports this initiative and, in collaboration with the World Bank, is providing expertise on private sector development.

Parliamentary Accountability

Hugh Bayley: To ask the Secretary of State for International Development what action the Government are taking to support the capacity of *(a)* parliaments, *(b)* parliamentarians and *(c)* parliamentary officials in (i) the Middle East, (ii) north Africa and (iii) central and eastern Europe to (A) hold Governments to account and (B) improve the effectiveness of public expenditure; and if he will make a statement. [54100]

Hilary Benn: The Government's support to parliaments in the Middle East, North Africa, and Central and Eastern Europe is provided through DFID and the Foreign and Commonwealth Office (FCO), and through the European Commission's external assistance budget, 17 per cent. of which is attributed to DFID. Our programmes help parliaments to hold their Governments to account, monitor public expenditure and represent constituency and public interest.

Programmes in the Middle East and North Africa

The FCO's Engaging with the Islamic World (EIW) Programme has funded over 50 projects in North Africa and the Middle East since 2003. The programme places a special emphasis on support for internal political and economic reform in Arab countries, and works either with host Governments or with established and respected non-governmental organisations (NGOs). The programme has supported projects to build the capacity of parliaments, parliamentarians and parliamentary officials in the Middle East and North Africa region, up to a value of approximately £1.7 million. These have included an £85,000 project in Jordan with a focus on women parliamentarians, and a £191,000 parliamentary development project in Bahrain.

In Yemen, DFID is supporting a public financial management reform programme which aims to strengthen parliament's oversight of the budget preparation process. So far, DFID has committed £200,000 for the programme's design phase.

Programmes in Central and Eastern Europe

In Russia, DFID has established a Donor Secretariat with funding of £550,000, as part of a joint DFID-World Bank Trust Fund on Public Administration Reform. The Secretariat works with the Russian Parliament to help strengthen its capacity to tackle corruption and ensure effective public expenditure management, in accordance with international best practice on accountability and transparency.

In Bosnia Herzegovina, DFID is providing training and guidance to help all parliamentarians to understand and contribute to the budgeting process, and to strengthen the role of the Parliamentary Assembly Finance Committee. This training is provided through our Medium Term Expenditure Framework project, whose total budget is £1.6 million.

In Ukraine, DFID's development programme includes work on training parliamentarians and parliamentary officials in legislative drafting techniques to ensure clear, transparent and non-discretional laws. Over the period 2000-03, DFID ran a £1.5 million Local and Regional Government Institutional Strengthening Programme, aimed at improving the effectiveness of public expenditure. The project worked in close co-operation with the Ukrainian Parliament Budgetary Committee to support development of the Budget Code approved by the Ukrainian Parliament in 2001. In 2005 DFID provided £100,000 for a follow-up project which has continued our work on refining the application of the Budget Code.

In Moldova, the FCO's Global Opportunities Fund is helping parliamentarians in Moldova to scrutinise proposals for harmonisation with EU legislation.

In Georgia, DFID has committed £400,000 to help build civil society's capacity to analyse public finances; this project may include building the capacity of parliamentary committees to oversee public expenditure.

Programmes covering both regions

The Westminster Foundation for Democracy (WFD) is a Non-Departmental Public Body which was set up by the FCO in 1992, and is funded primarily by an annual £4.1 million grant from the FCO. The WFD works with the political parties in the House of Commons to promote political party development in Central and Eastern Europe, Anglophone Africa, the Middle East and North Africa. It also funds projects which support parliaments and other organisations involved in political development in these regions. Currently the WFD is developing a programme of activities for a network of reform-minded parliamentarians.

The Foreign and Commonwealth Office arranges many visits to the UK for parliamentarians from the Middle East, North Africa and central and eastern Europe, as part of its Sponsored Visits Programme.

The EC's Technical Assistance and Information Exchange Instrument (TAIEX) provides assistance to parliamentarians in Central and Eastern Europe through seminars and study visits. The European Commission is extending TAIEX to cover European Neighbourhood Partnership Initiative (ENPI) countries in Eastern Europe, North Africa and the Middle East.

South Africa

Dr. Francis: To ask the Secretary of State for International Development if he will make a statement on his Department's activities in South Africa. [53711]

Hilary Benn: DFID supports the Government of South Africa in three priority areas: growth, jobs and equity; HIV/AIDS and vulnerability; and governance, democracy and service delivery.

DFID's work on growth, jobs and equity helps to access poor people to South Africa's formal economy so that they can benefit from the resources which are already available (in areas such as land, and finance) but from which they are currently excluded. It also helps South Africa translate the growth in its economy into jobs. Secondly, work on HIV/AIDS and vulnerability helps South Africa to tackle its growing HIV/AIDS pandemic, through supporting a range of partners (National and Provincial Governments, civil society groups and the private sector) across a range of activities from prevention, through care, support and treatment to mitigating the impacts of HIV on communities and society. Following the crop failures and resulting hunger which hit Southern Africa in late 2002, and DFID's response of providing more than £150 million in food aid, DFID SA took on a new role of developing a longer term regional response to food insecurity in Southern Africa. Work on this, along with work on social protection issues, has been incorporated into our work on HIV/AIDS, under a broader vulnerability theme. Thirdly, DFID's work on governance, democracy and service delivery helps South Africa deliver quality public services in an equitable way to all citizens. A particular focus has been reform and capacity building of provincial and local government to strengthen their delivery of basic services, including education and health. Our bilateral budget for South Africa in 2006–07 is £23 million.

DFID is launching a Regional plan for Southern Africa on the 28 February 2006. The Regional plan will tackle cross boundary issues in growth, jobs and equity; resilient livelihoods; and peace/security. Examples of areas where DFID plans to support work under the Regional plan include trans-boundary water management; transport infrastructure; customs border posts; treatment and prevention of infectious diseases in the region.

Spending Review (Efficiency Targets)

Mrs. Villiers: To ask the Secretary of State for International Development what baseline figures he is using for assessing progress on his Department's targets to reduce *(a)* the total number of civil service posts by 170 and *(b)* the number of in country posts by 124; what progress has been made towards these targets to date; and what the total efficiency savings achieved to date are for these targets. [52938]

Hilary Benn: In December 2005 DFID agreed a revised Efficiency Technical Note which contains baseline figures for all its efficiency targets. The Technical Note is available to the public on DFID's website (http://www.dfid.gov.uk/pubs/files/efficiency-technical-note.pdf).

The baseline figure for the total number of civil service posts was 1,780 in April 2004, and for in-country posts the baseline was 1,162 in April 2004. However there have been a number of subsequent definitional changes which have increased this initial baseline.

DFID remains on course to meet its home civil service target of 1,610 by March 2008 and its intermediate target for March 2006 of 1,820.

The reduction in our in-country posts to 950 by March 2008 has already been achieved.

These savings are part of DFID's overall administration cost efficiency gain which will amount to £20 million by the end of 2007–08.

Tsunami

Mr. Paterson: To ask the Secretary of State for International Development from which budget his Department's donation to the tsunami relief effort was taken. [54037]

Hilary Benn: Of the £75 million pledged, £20 million was drawn from DFID's crisis response budget, £30 million from DFID's general reserve, and a further £25 million from the Government's central reserve.

WORK AND PENSIONS

Carers (Housing Benefit)

Mr. Todd: To ask the Secretary of State for Work and Pensions what provision is made for the accommodation needs of carers in housing benefit assessments. [32554]

Mr. Plaskitt: Housing benefit is paid to help meet the rental liability on the dwelling that the claimant occupies as their home. Housing benefit rules restrict the amount of rent for which help is available to reasonable levels, taking into account the size of the claimant's household. The determination of reasonable rent takes account of the individual needs and circumstances of the claimant and their household. In general, no account will be taken of those carers for whom the claimant's dwelling is not their home.

Child Support

Mr. Frank Field: To ask the Secretary of State for Work and Pensions how many child support cases on the CS2 system were assessed under a default maintenance decision in each year since 2003. [52729]

Mr. Plaskitt *[holding answer 27 February 2006]:* The administration of the Child Support Agency is a matter for the Chief Executive. He will write to the right hon. Member with the information requested.

Letter from Stephen Geraghty:

In reply to your recent Parliamentary Question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions; how many child support cases on the CS2 system were assessed under a default maintenance decision in each year since 2003.

The number of new-scheme applications resulting in an initial default maintenance decision per year is presented in the table, attached.

I hope you find this helpful.

Number of applications resulting in an initial default maintenance decision, per year

	Number of calculations performed	*Number of default maintenance decisions*	*Default maintenance decisions as a % of total calculations performed*
2003	56,500	4,000	6
2004	97,000	4,000	4
2005	119,500	2,500	2

Notes:

1. Since the new-scheme became operational in March 2003, information for 2003 covers the period of March-December. Data for 2004 and 2005 covers the full calendar year.

2. Figures are rounded to the nearest 500 and percentages to the nearest per cent.

Ben Chapman: To ask the Secretary of State for Work and Pensions how many *(a)* internal and *(b)* external legal advisers have been consulted by the Child Support Agency since August 2005 over the case of Mr. Edward Saul; what the total cost of this advice has been; and if he will make a statement. [53830]

Mr. Plaskitt: The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Stephen Geraghty. He will write to the hon. Friend with the information requested.

Letter from Stephen Geraghty:

In reply to your recent Parliamentary Question about the Child Support Agency, the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions You asked the Secretary of State for Work and Pensions how many *(a)* internal and *(b)* external legal advisers have been consulted by the Child Support Agency since August 2005 over the case of Mr. Edward Saul; what the total cost of this advice was; and if he will make a statement.

As details about individual cases are confidential I have written to you separately about this case.

Mr. Laws: To ask the Secretary of State for Work and Pensions what plans he has for Child Support Agency staff numbers for the period 2005 to 2008; and if he will make a statement. [21857]

Mr. Plaskitt: The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Stephen Geraghty. He will write to the hon. Member with the information requested.

Letter from Stephen Geraghty:

In reply to your recent Parliamentary Question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions what plans he has for Child Support Agency staff numbers for the period 2005 to 2008.

Child Support Agency staffing at the end of December 2005 was 10,649 full time equivalents (FTE). The plans for staff numbers up to 2008 can be seen in the table.

Date as at 31 March:	*Planned CSA Staffing (FTE[1])*
2006	11,371
2007	10,782
2008	9,590

[1] Full time equivalent (FTE) converts staff numbers to express the hours part-time staff are contracted to work as a proportion of full-time hours.

We are planning to increase staffing levels in the CSA to support the delivery of the Operational Improvement Plan. Some of the additional posts will be filled by redeploying staff from other parts of the department where staffing levels are reducing.

No other part of the department will have to make additional headcount reductions as part of our staffing plans for the CSA.

While our plans do include a temporary increase in CSA staffing, the Agency's headcount target for March 2008 remains unchanged from that already included in the department's wider efficiency plan to reduce departmental staffing levels by 30,000 between March 2004 and March 2008.

I hope you find this response helpful.

Mr. Laws: To ask the Secretary of State for Work and Pensions how many and what proportion of applications were cleared by the Child Support Agency because *(a)* a maintenance calculation was made and a payment arrangement put in place, *(b)* good cause was established and *(c)* the parent with care was subject to a reduced benefit direction, in each quarter of the last five years for which information is available. [40484]

Mr. Plaskitt: The administration of the Child Support Agency is the matter for the chief executive. He will write to the hon. Member with the information requested.

Letter from Stephen Geraghty:

In reply to your recent Parliamentary Question about the Child Support Agency, the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, how many and what proportion of applications were cleared by the Child Support Agency because *(a)* a maintenance calculation was made and a payment arrangement put in place *(b)* good cause was established and *(c)* the parent with care was subject to a reduced benefit direction in each quarter over the last five years where the information is available.

Such information as is available is provided in the attached table.

The attached table shows the number and proportion of old scheme cases that were cleared due to assessments and reduced benefit decisions (RBDs) between July 2001 and March 2003, and also the breakdown requested for new scheme cases between April and December 2005.

From the available management information, I am not able to say how many old scheme cases were cleared as a result of being identified as claiming good cause, or to provide numbers for the period between April 2003 and March 2005 for the new scheme or for the old scheme from April 2003 to present.

I hope you find this helpful.

Number and proportion of cases cleared by different methods in each quarter for the period July 2001 to March 2003 and April 2005 to June 2005

	July to September 2001	*October to December 2001*	*January to March 2002*	*April to June 2002*	*July to September 2002*	*October to December 2002*	*January to March 2003*
Total clearances	92,000	112,000	113,000	96,000	101,000	87,000	81,000
Of which:							
Assessed	24,000	30,000	31,000	28,000	28,000	24,000	22,000
Assessed (Percentage)	26	26	28	29	28	28	27
RBD	2,000	2,000	2,000	2,000	2,000	1,000	2,000
RBD (Percentage)	2	2	2	2	2	2	2
Other	66,000	80,000	80,000	67,000	72,000	62,000	58,000
Other (Percentage)	71	72	71	70	71	71	71

	April to June 2005	*July to September 2005*	*October to December 2005*
Total clearances	86,000	81,000	88,000
Of which:			
Old scheme	9,000	6,000	5,000
New scheme	77,000	75,000	84,000
Of which (new scheme only)			
Calculation and collection schedule	28,000	29,000	32,000
Calculation and collection schedule (Percentage)	36	39	38
RBD	1,000	1,000	1,000
RBD (Percentage)	2	1	2
Good Cause	2,000	1,000	2,000
Good Cause (Percentage)	2	2	2
Other	46,000	44,000	49,000
Other (Percentage)	60	58	58

Notes:

1. An old scheme application is defined as cleared if the case is closed or a maintenance assessment has been carried out. In addition, an application is also counted as cleared if the parent with care (PWC) is identified as claiming good cause or the PWC is subject to a reduced benefit decision. This differs slightly to the definition of a new scheme clearance (see below) and figures from the two schemes will therefore only be broadly, and not directly, comparable.

2. A new scheme application is defined as cleared if the case is closed or a maintenance assessment has been carried out and a maintenance collection schedule set up. In addition, an application is also counted as cleared if the parent with care (PWC) is identified as claiming good cause, or the PWC is subject to a reduced benefit decision, or is identified as being a change of circumstance to an existing application, as opposed to a new one.

3. The figure for "other" clearances on the old scheme (July 2001 to March 2003) includes those cases cleared because the PWC has been identified as claiming good cause, or the case has been closed, or the case has been cleared for any other reason. It is not possible to identify figures for good cause separately.

4. The figure for "other" clearances on the new scheme (April to December 2005) includes those cases cleared because the case has been closed, or the application has been identified as a change of circumstance to an existing application.

5. Figures have been rounded to the nearest thousand, and percentages to the nearest 1 per cent. Components may not sum to totals due to rounding.

Mr. Devine: To ask the Secretary of State for Work and Pensions how many people were employed by the Child Support Agency in each year between 2000 and 2005. [44017]

Mr. Plaskitt: The administration of the Child Support Agency is a matter for the chief executive, Mr. Stephen Geraghty. He will write to the right hon. Friend with the information requested.

Letter from Stephen Geraghty:

In reply to your recent Parliamentary Question about the Child Support Agency, the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, how many people were employed by the Child Support Agency in each year between 2000 and 2005.

The attached Table below contains the number of full time equivalent staff in post in the months requested. The figures include fixed-term appointments and temporary staff, but not Northern Ireland staff (who are part of the Northern Ireland Civil Service).

I hope this is helpful.

Period	*Full-time equivalent staff (Cabinet Office mandate methodology)*	*Full-time equivalent staff (ONS methodology)*
31 March:		
2000	8,729	—
2001	9,555	—
2002	10,691	—
2003	11,256	—
2004	10,819	11,037
2005	9,784	9,985
31 December:		
2005	10,466	10,649

Notes:

1. Cabinet Office mandate methodology excludes staff on nil pay, maternity leave and staff on reduced pay due to sickness.

2. The Office for National Statistics (ONS) has introduced standard definitions for use in the calculation of all public sector employment statistics. In line with other public sector organisations DWP has now implemented the ONS definitions. The ONS definition includes staff previously excluded, e.g. staff on maternity leave.

3. Historical data using this definition is now available backdated to February 2004, the baseline for the Department's efficiency challenge.

Miss McIntosh: To ask the Secretary of State for Work and Pensions for what reason he has not published the review of the Child Support Agency undertaken by the chief executive and completed in December 2005. [50242]

Mr. Plaskitt: Last year the Agency chief executive, Stephen Geraghty, undertook a review of the Agency's operations. A summary of his findings have been made available on the Department's website.

The Secretary of State has announced a redesign of the child support system—to be led by Sir David Henshaw and an Operational Improvement Plan to improve the Agency's performance. Copies of the terms of reference and Operational Improvement Plan are in the Library and have been made available on the Department's website.

Housing Benefit

Stephen Williams: To ask the Secretary of State for Work and Pensions how many people were in receipt of housing benefit in the most recent period for which figures are available; how many had their housing benefit paid directly to a landlord. [54010]

Mr. Plaskitt: As at May 2004, the most recent figures for which a breakdown is available, there were a total of 3,879,000 households in Great Britain in receipt of housing benefit.

Of these, 1,808,000 were local authority tenants entitled to rent rebates. A further 1,328,000 were tenants of Registered Social Landlords and 744,000 were tenants of private landlords, entitled to rent allowance.

Of the rent allowance cases, 1,218,000 of the tenants of Registered Social Landlord and 417,000 tenants of private landlords had their benefit paid directly to the landlord or their agent.

Danny Alexander: To ask the Secretary of State for Work and Pensions how many housing benefit claims in 2004–05 were subject to each rate of non-dependant deduction. [54436]

Mr. Plaskitt: The information is not available in the format requested; as some claimants have more than one non-dependent and the rate of deduction is determined by the non-dependant's status.

The available information on the numbers of each type of deduction is in the table.

Housing benefit non-dependants by deduction type: Great Britain, May 2004

	Number
Housing benefit claims attracting non-dependant deductions	130,000
Total non-dependants (all categories)	140,000
of which:	
In remunerative work	
Gross income <£97	9,000
Gross income £97–£143.99	9,000
Gross income £144–£185.99	11,000
Gross income £186–£246.99	9,000
Gross income £247–£307.99	6,000
Gross income £308 and over	14,000
Not receiving IS/JSA(IB) nor working.	32,000
Receiving IS/JSA(IB); not in work.	48,000
On Government Training Allowance; not in work.	[1]1,000

[1] Figures under 2,500—subject to a high degree of sampling variation and should be used only as a guide to the situation.

Notes:
1. The data refers to benefit units, which may be a single person or a couple.
2. The caseload figures are rounded to the nearest thousand. Totals may not sum to rounding.
3. Housing benefit figures exclude any Extended Payment cases.

Source:
Housing Benefit and Council Tax Benefit Management Information System, Annual 1 per cent. sample, taken in May 2004.

Incapacity Benefit

Mr. Crabb: To ask the Secretary of State for Work and Pensions how many people with a learning disability claimed incapacity benefits in each year since 1997. [50062]

Mrs. McGuire: The information is not available in the format requested.

Figures for those incapacity benefit (IB) and severe disablement allowance (SDA) claimants with a primary diagnosis within the diagnoses groups that include learning difficulties are in the table.

Incapacity benefit and severe disablement allowance claimants in Great Britain, by certain diagnoses

	Pervasive development disorders	*Specific development disorders of scholastic skills*
August		
1997	100	12,000
1998	300	17,400
1999	600	21,100
2000	800	25,000
2001	1,100	28,700
2002	1,400	31,800
2003	1,700	35,100
2004	2,200	38,800
2005	2,700	42,400

Notes:
1. Figures for the years 1997 to 1998 have been produced using the 5 per cent. data and have been rated up proportionally using the Great Britain WPLS 100 per cent. IB/SDA totals.
2. Figures are rounded to the nearest hundred.
3. "Claimant" figures include all IB and SDA (including IB credits only cases).
4. All diagnoses are coded using the International Classification of Diseases, 10th Edition, published by the World Health Organisation.

Source:
DWP Information Directorate, 5 per cent. Samples from 1997 to 1998 and Work and Pensions Longitudinal Study 100 per cent. data thereafter.

National Insurance Numbers

Mr. Frank Field: To ask the Secretary of State for Work and Pensions how many temporary national insurance numbers have been allocated in each year since 1997. [55300]

Mr. Plaskitt: None; the Department does not issue temporary national insurance numbers.

Parliamentary Questions

Mr. Wallace: To ask the Secretary of State for Work and Pensions when he intends to answer questions *(a)* 19191 and *(b)* 19192 tabled by the hon. Member for Lancaster and Wyre on 18 October. [29684]

Mrs. McGuire: A reply, linking both questions was given to the hon. Member on 6 December 2005, *Official Report*, column 1196W.

Mr. Boswell: To ask the Secretary of State for Work and Pensions when he will reply to *(a)* Question 38218, on security of data, tabled on 13 December 2005 and *(b)* Question 30081, on over-paid benefits, tabled on 15 November 2005, by the hon. Member for Daventry. [47622]

Mrs. McGuire *[holding answer 2 February 2006]:* Replies were made to the hon. Member for both the questions as follows:

(a) 38218 on 13 February 2006, *Official Report*, column 1674W;

(b) 30081 on 6 February 2006, *Official Report*, column 860W.

Pensions

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions how many staff were employed by *(a)* the Pension Service in the UK and *(b)* each pension centre at the end of each of the last 18 months for which figures are available. [54234]

Mr. Timms: The following table shows the amount of staff in The Pension Service for each of the last 18 months. Information is not available by pension centre.

Month	*Numbers of total TPS Staff*[1]
August 2004	17,428
September 2004	16,955
October 2004	16,651
November 2004	16,539
December 2004	16,520
January 2005	16,970
February 2005	16,848
March 2005	16,189
April 2005	15,870
May 2005	15,792
June 2005	15,540
July 2005	15,242
August 2005	15,014
September 2005	14,859
October 2005	14,756
November 2005	14,686
December 2005	14,600
January 2006	14,482

[1] Full-time equivalent.

The above figures are based on Mandate calculation up to and including November 2005 and reflect full-time equivalent staff numbers. From December 2005 the figures are based on the Office for National Statistics methodology.

The Office for National Statistics (ONS) has introduced standard definitions for use in the calculation of all public sector employment statistics. The revised definition includes staff on certain types of paid leave such as paid maternity leave and paid sick leave previously excluded. In line with other public sector organisations, DWP has implemented the new ONS definitions, internally, from November, although this definition was used in reporting DWP staffing figures to ONS for the Quarter 3 Public Sector Employees Survey published on 13 January 2006.

CABINET OFFICE

Office for Public Service Reform

Mr. Heald: To ask the Chancellor of the Duchy of Lancaster whether he has abolished the Office for Public Service Reform; and if he will make a statement. [55299]

Mr. Jim Murphy: The work previously being undertaken by the Office for Public Service Reform is now being taken forward elsewhere in the Cabinet Office.

LEADER OF THE HOUSE

Parliamentary Questions

Mrs. Hodgson: To ask the Leader of the House what proposals he has received for a system for tabling parliamentary questions during recess. [54156]

Mr. Hoon: Members may already table questions during recesses, by post or via the e-tabling system. Questions are published in one or more blue notice papers which appear towards the end of each recess.

I have received representations from colleagues on both sides of the House seeking an extension of this system, including the answering of questions during recesses.

Scottish Grand Committee

Mr. Hood: To ask the Leader of the House how many Scottish Grand Committee meetings were held in each year since 1990; and if he will make a statement. [53727]

Nigel Griffiths: The figures for meetings of the Scottish Grand Committee, by parliamentary session, are as follows:

	Scottish Grand Committee
1989–90	5
1990–91	8
1991–92	2
1992–93	8
1993–94	7
1994–95	11
1995–96	14
1996–97	6
1997–98	9
1998–99	4
1999–2000	4
2000–01	1
2001–02	5
2002–03	3
2003–04	0
2004–05	0
2005–06[1]	0

[1] To date.

Meetings of the Committee are arranged as appropriate in discussion with all parties.

Sitting Hours

Mr. Bone: To ask the Leader of the House how many hours the House of Commons has sat this Parliament; and what proportion of those hours was spent considering private Members' Bills. [54450]

Mr. Hoon: Up to and including 16 February, the House has sat for 830 hours 40 minutes in the current session. Of this time, 28 hours and 50 minutes (approximately 3.5 per cent.) has been spent on private Members' Bills (not including 10 minute rule motions).

NORTHERN IRELAND

Agriculture and Rural Development (Appeals)

Mr. McGrady: To ask the Secretary of State for Northern Ireland whether the decisions of the independent panel which deals with appeals against decisions made by the Department of Agriculture and Rural Development are binding. [55175]

Angela E. Smith: The independent Grants and Subsidies' Panel makes a formal recommendation to the Minister for Agriculture and Rural Development. Their recommendation is not binding and the final decision rests with the Minister.

Mr. McGrady: To ask the Secretary of State for Northern Ireland what are the *(a)* remit and *(b)* powers of the independent panel which deals with appeals against decisions made by the Department of Agriculture and Rural Development; and if he will make a statement. [55176]

Angela E. Smith: The remit of the independent Grants and Subsidies Panel is to review decisions made by the Department of Agriculture and Rural Development against the relevant European and UK legislation and to consider whether the Department's decision is consistent with this. The panel is asked to reach a conclusion and to make a formal recommendation to the Minister for Agriculture and Rural Development on their findings. The power to make the final decision in respect of appeal cases rests with the Minister for Agriculture and Rural Development.

Antisocial Behaviour Orders

Lady Hermon: To ask the Secretary of State for Northern Ireland pursuant to the answer of 6 February 2006, *Official Report*, column 897W, on antisocial behaviour orders, which councils sent officers for training in *(a)* June and *(b)* January and February 2005; and which policing divisions sent personnel for training in January and February 2005. [54507]

Mr. Hanson: All 26 councils sent officers for training in January and February 2005. All councils, with the exception of Armagh and Castlereagh, sent officers for training in June 2005.

All 29 PSNI District Command Units sent personnel for training in January and February 2005.

Child Support Agency

Mark Durkan: To ask the Secretary of State for Northern Ireland how many letters from hon. Members to the Child Support Agency in Northern Ireland did not receive a full answer within 21 working days in the last 24 months. [54996]

Mr. Hanson: The Agency received 29 queries from Northern Ireland hon. Members in the last 24 months. Thirteen of these received a full response within the Agency's target of 20 working days. Fifteen received an interim response within 20 days and a full response within 30 days. One response is outstanding.

Compensation Claims

Mr. Dodds: To ask the Secretary of State for Northern Ireland how many claims for compensation were lodged against his Department arising out of terrorist incidents at *(a)* the Royal group of hospitals, *(b)* the Mater hospital, *(c)* the Ulster hospital and *(d)* the City hospital between 1995 and 1998; and what the outcome was in each case. [54122]

Mr. Hanson: The chief executive of the Compensation Agency has advised me that it is not possible to ascertain from the Agency database any meaningful information regarding the motive behind any incident which gave rise to a claim. If however the hon. Gentleman wishes to follow up on this he may wish to make more specific inquiries with the chief executive of the Compensation Agency who will be pleased to help him.

Consultant Radiologists

Dr. Alasdair McDonnell: To ask the Secretary of State for Northern Ireland what plans his Department has *(a)* to review the training and *(b)* to conduct retraining of consultant radiologists in relation to breast cancer following recent incidents of misdiagnosis; and what funding is available for this initiative. [54598]

Mr. Woodward: The Department is awaiting the findings of an independent investigation by the HPSS Regional Quality and Improvement Authority (RQIA), which is expected in early March 2006. These findings, along with those of the recently published Report on a Review of Breast Imaging, will inform the Department's decision as to whether a full review of Consultant Radiologists training is required, and the possible funding requirements.

Disabled Parking

Mr. Peter Robinson: To ask the Secretary of State for Northern Ireland pursuant to the answer of 27 January 2006, *Official Report*, column 1257W, on disabled parking, where the revenue raised by these fines was allocated. [52981]

Bridget Prentice: I have been asked to reply.

Revenue collected through fines incurred by disabled parking offences is allocated to the Consolidated Fund and paid to HM Treasury.

Domestic Rates

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what estimate he has made of the average percentage change per household in regional and district combined domestic rates in each of the council areas in Northern Ireland for 2006–07. [52515]

Angela E. Smith: Estimates of the overall domestic rates in each of the council areas are not available at the moment as not all councils have set their rates for

2006–07. It is expected that this information will be available shortly after the 15 February when all councils should have struck their rates. This information will be placed in the Library when available.

Mr. Pickles: To ask the Secretary of State for Northern Ireland how much was raised in net revenue from domestic rates in Northern Ireland in each year since 1997–98; and what the estimate is for 2005–06. [54544]

Angela E. Smith: The net amount collected from domestic rates for each of the years from 1997 to 2004–05 and the estimated net amount that will be collected for 2005–06 are set out in the following table.

	£ million
1997–98	166.5
1998–99	182.5
1999–2000	201.9
2000–01	222.9
2001–02	244.5
2002–03	271
2003–04	299.1
2004–05	328.4
2005–06	361.2

Mr. Pickles: To ask the Secretary of State for Northern Ireland what estimate he has made of the annual net revenue to be raised from domestic rates in Northern Ireland following rates revaluation. [54545]

Angela E. Smith: The revaluation of domestic properties in Northern Ireland, from rental (NAV) to capital value based approach, will operate from 1 April 2007. The revaluation exercise, in itself, is a revenue neutral one, with the sole purpose of redistributing the rating burden between households in a fairer way.

The priorities and budget 2006–08 proposed a 6 per cent. increase in the domestic regional rate for 2007–08, this will constitute an estimated £270 million in domestic regional rate revenue.

Revenue from domestic district rates cannot be estimated as this will be a result of the district rate increases determined by the district councils in February 2007.

Home Start

Mr. McGrady: To ask the Secretary of State for Northern Ireland pursuant to the answer of 6 February 2006, *Official Report*, column 900W, on Home Start, whether indicative funding allocations to the Home Start project for the 2005–06 financial year are available. [54616]

Mr. Woodward: DHSSPS has allocated approximately £45,000 funding for Home Start in Northern Ireland to assist its administration for the 2005–06 financial year. The Home Start programme is mainly delivered in Northern Ireland through HSS Trusts and Surestart. The total funding allocation for 2005–06 will not be available until the end of the financial year. I will write to the hon. Gentleman with the information as soon as it is available and place a copy in the Library.

Industrial De-rating

Mr. Pickles: To ask the Secretary of State for Northern Ireland what estimate he has made of the change in net revenue following the termination of industrial de-rating in Northern Ireland. [54546]

Angela E. Smith: The removal of industrial de-rating commenced on 1 April 2005 and will be phased out over seven years.

The following table displays the percentage of rate liability and the estimated regional revenue, using the announced 3.3 per cent. increases in the non-domestic regional rates.

	Rate liability (percentage)	*Estimated regional revenue (£ million)*
2005–06	15	6
2006–07	25	10
2007–08	35	15

These figures will be revised as properties, occupiers and associated valuations change.

Beyond 2007–08 revenues will be determined by the non-domestic rate increases established by priorities and budget.

District rate revenue can only be estimated for 2005–06 as future years depend on district rate increases decided annually. The estimated district rate revenue for 2005–06 is £4 million.

Invoices (Non-payment)

David Simpson: To ask the Secretary of State for Northern Ireland what the total amount of credit lost to each Department in Northern Ireland through failure to pay invoices within the stated deadline was in each of the last 10 years. [53187]

Angela E. Smith: This information can be provided only at disproportionate cost.

Knife Amnesty

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will introduce in Northern Ireland a knives amnesty along the lines of that operating in England and Wales; and if he will make a statement. [53169]

Mr. Hanson: As I indicated in my public statement on 9 February I am currently looking at a scheme that will allow the public to surrender knives in Northern Ireland. In particular I am considering together with the relevant agencies, the legal ramifications of such a scheme and wish to take advice before making any further public announcement.

The Government are committed to tackling knife crime in Northern Ireland. We are working very closely with the police and other agencies to put in place a comprehensive programme to deal with this serious issue. In addition changes will be made to the legislation governing the sale of knives through the violent Crime Reduction Bill.

Knife Crimes

Mr. Dodds: To ask the Secretary of State for Northern Ireland (1) what discussions he has had with the Police Service of Northern Ireland on tackling knife crimes; and what steps he is taking to tackle knife crime; [54129]

(2) whether he plans to introduce a knives amnesty for Northern Ireland. [54130]

Mr. Hanson: As I indicated in my public statement on 9 February I am currently working in partnership with the police to devise a comprehensive strategy to tackle knife crime. In addition to changes in the legislation governing the sale of knives through the Violent Crime Reduction Bill, we are considering an education package for young people and a public information campaign. The police will also take forward an enhanced enforcement strategy for dealing with knife crime.

I am also considering a scheme that will allow the public to surrender knives in Northern Ireland. In particular I am considering together with the relevant agencies, the legal ramifications of such a scheme and wish to take advice before making any further public announcement.

Lisanelly Barracks

Mark Durkan: To ask the Secretary of State for Northern Ireland what assessment he made of the merits of including the Lisanelly barracks site in Omagh in the Reinvestment and Reform Initiative; and if he will make a statement on the proposals for the site. [53248]

Angela E. Smith: The Reinvestment and Reform Initiative (RRI) announced in May 2002 included an arrangement whereby some former security sites transferred to the Northern Ireland Executive free of charge for economic and social regeneration. There is no scope to include sites that are additional to requirements under this RRI arrangement as the Ministry of Defence's policy is to dispose of such sites at market value.

Lisanelly barracks is owned by the Ministry of Defence and any proposals for the site are the responsibility of the Secretary of State for Defence. Officials in Defence Estates, a division within MOD with responsibility for the disposal of the Lisanelly barracks, are currently considering arrangements for the disposal of the site.

Multiple Sclerosis

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland when each of the multiple sclerosis patients waiting to commence *(a)* beta interferon and *(b)* glatiramer in the Southern Health Board area was placed to the waiting list. [55888]

Mr. Woodward: Personal patient information such as the date an individual is placed on a waiting list cannot be provided without a patient's consent. However, the number of Southern Health and Social Services Board patients waiting for disease modifying treatment for MS and the time band within which they were placed on the waiting list is detailed in the table. The decision as to which disease modifying product a patient receives is not determined at the time they are placed on the list.

Dates	*Number of patients*[1]
1 August-31 October 2004	2
1 November 2004–31 January 2005	2
1 February-3 April 2005	3
1 May-31 July 2005	2
1 August-31 October 2005	6
1 November 2005–31 January 2006	2

[1] Information at 31 January 2006

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many multiple sclerosis patients have commenced beta interferon or glatiramer treatment in the Southern Health Board area in each of the last five years. [55889]

Mr. Woodward: The number of patients, resident in the Southern Board area that have commenced beta interferon or glatiramer treatment in each of the last five years is shown in the table:

	Number of patients commencing beta interferon/glatiramer treatment in Southern Board area
2001	16
2002	12
2003	25
2004	13
2005	6

Royal Group of Hospitals HSS Trust

Post-primary Education Consultation

Sammy Wilson: To ask the Secretary of State for Northern Ireland if the Government will extend the final submission date for the public consultation on post-primary education to take account of the recent postal strike in Belfast. [55103]

Angela E. Smith: I have looked at this very carefully to ensure that no-one will be disadvantaged.

Parts of Belfast and the rest of Northern Ireland were unaffected by the recent postal dispute. I understand that, following the end of the dispute, post is being delivered as normal, alongside the work to clear the backlog. If the backlog is not cleared by the closing date of 7 March, the Department of Education will accept postal responses received after that date until the backlog is cleared. The situation is being kept under review.

During the dispute the Department of Education issued a number of response booklets to members of the public with addresses in the affected areas. As they were

unlikely to have been delivered, the Department issued duplicates after the dispute ended so that those involved could return them by 7 March.

I would encourage all who wish to respond to the consultation to submit their comments by the closing date.

Renewable Energy

Mr. McGrady: To ask the Secretary of State for Northern Ireland what percentage of electricity was obtained from renewable energy sources by public sector buildings in Northern Ireland in *(a)* 2003, *(b)* 2004 and *(c)* 2005. [54586]

Angela E. Smith: The percentage of electricity from renewable energy sources obtained by public sector buildings in Northern Ireland for the years in question is as follows:

Year ending	*Percentage*
31 March 2003	7
31 March 2004	24
31 March 2005	28

Speeding Fines

Mr. Peter Robinson: To ask the Secretary of State for Northern Ireland how many speeding fines in Belfast's *(a)* East, *(b)* South, *(c)* West and *(d)* North district command units remained unpaid in the last year for which figures are available. [53071]

Mr. Woodward: The information requested is as follows:

Speeding fines for the period 1 January to 31 December 2005 which remain unpaid

District Command Unit	*Number of unpaid speeding fines*
East Belfast	467
South Belfast	170
West Belfast	101
North Belfast	317

Tourism

Mr. Peter Robinson: To ask the Secretary of State for Northern Ireland how many new jobs were created in the tourism sector in Northern Ireland in each of the last 10 years. [53064]

Angela E. Smith: Information on the number of jobs created in the tourism sector is not available. However, figures from the Quarterly Employment Survey (QES) can be used to estimate the net change in employee jobs. Latest figures from the September 2005 QES estimated that there were 51,290 employee jobs in sectors related to tourism and leisure activities in Northern Ireland. This represented a net increase of 950 jobs from the figure for September 2004.

The number of employee jobs in the tourism and leisure sector in Northern Ireland in each of the last 10 years and the net increase/decrease from the previous year is shown in the following table.

Number of employee jobs in tourism and leisure[1] in Northern Ireland at September each year 1996 to 2005 and the net increase/decrease from previous year

	Number of employee jobs	*Net increase/ decrease from previous year*
September 1996	35,850	+2,070
September 1997	38,500	+2,650
September 1998	43,340	+4,840
September 1999	44,950	+1,600
September 2000	47,050	+2,110
September 2001	48,490	+1,430
September 2002	49,900	+1,410
September 2003	49,270	-630
September 2004	50,350	+1,070
September 2005	51,290	+950

[1] The standard industrial classification (SIC) codes which are taken to comprise the tourism and leisure sector and their description are as follows: 551 Hotels; 552 Camping Sites and Other Provision of Short-Stay Accommodation; 553 Restaurants; 554 Bars; 633 Activities of Travel Agencies and Tour Operators, Tourist Assistance Activities not Elsewhere Classified; 925 Libraries, Archives, Museums and Other Cultural Activities; 926 Sporting Activities; 927 Other Recreational Activities.

Note:
Figures are rounded to the nearest 10 and may not sum due to rounding.

HEALTH

Alzheimer's Disease

Dr. Stoate: To ask the Secretary of State for Health what assessment has been made of the *(a)* safety and *(b)* efficacy of memantine for use with moderately severe to severe Alzheimer's disease patients; and if she will make a statement. [51627]

Jane Kennedy: Memantine was approved for marketing throughout the European Community in May 2002 under the brand names Axura and Ebixa for the treatment of patients with moderately severe to severe Alzheimer's disease. This regulatory approval was based on evidence of satisfactory product quality, safety and efficacy and that the benefit/risk profile of the product was favourable when treating this disease.

The approval process was carried out by teams of experts within the European Committee for Proprietary Medicinal Products under a community regulatory procedure and lead by experts from Spain and Portugal.

Guidance from the National Institute for Health and Clinical Excellence on memantine and other drugs for treating Alzheimer's disease is expected to be issued later this year.

Dr. Stoate: To ask the Secretary of State for Health whether the method of measuring quality of life undertaken by the National Institute for Health and Clinical Excellence for patients with Alzheimer's disease is based on a scale that has been validated for use in people with dementia. [51628]

Jane Kennedy: The National Institute for Health and Clinical Excellence (NICE) uses a standardised and validated generic (non-disease specific) method for its technology appraisals in order to make direct comparisons between outcomes of various treatments for patients with different health problems.

The methods NICE follows for developing its guidance are set out in its "Guide to the Methods of Technology Appraisals", and consults regularly on these methods with stakeholders including organisations representing health care professionals and patients. The guidance is available on NICE'S website at www.nice.org.uk.

Joan Walley: To ask the Secretary of State for Health what the Government's policy is on the provision of drug treatments on the NHS for those in the early stages of Alzheimer's disease. [52320]

Jane Kennedy: The National Institute for Health and Clinical Excellence (NICE) issued guidance to the national health service in January 2001 on the use of three drugs—Aricept, Exelon and Reminyl for the treatment of mild to moderate Alzheimer's disease. NICE recommended that these three drugs should be made available to the NHS as one component of the management of people with mild to moderate Alzheimer's disease.

NICE'S consultation on revised draft guidance following a routine review of the effectiveness of these drugs ended on 13 February and they are now in the process of considering the responses. Until NICE issues final guidance to the NHS, the original 2001 guidance on anti-dementia drugs remains extant.

Ambulance Staff (Abuse)

Mr. Stewart Jackson: To ask the Secretary of State for Health how many violent incidents there have been involving staff of the East Anglian Ambulance Service in the course of their duties in each of the last five years. [54356]

Ms Rosie Winterton: A table outlining the estimated number of reported violent incidents collected by the Department for 2000–01, 2001–02, 2002–03 for each strategic health authority (SHA), national health service trust and primary care trust (PCT) in England is available in the Library.

The NHS Security Management Service has collected data on the number of physical assaults on NHS staff in England for the period 2004–05. The figure for assaults in the ambulance service was 1,329.

A breakdown of figures for each SHA, NHS trust and PCT in England for the year 2004–05 will be released shortly.

Breast Cancer

Mrs. Hodgson: To ask the Secretary of State for Health what estimate she has made of the additional pathology capacity which would be necessary to test all women diagnosed with early stage breast cancer for HER2 status. [47416]

Ms Rosie Winterton: I refer my hon. Friend to the reply I gave on 9 February 2006, *Official Report*, column 1471W.

Audiologists

Mrs. Dorries: To ask the Secretary of State for Health how many NHS audiologists there are in Bedfordshire; and if she will make a statement. [53521]

Ms Rosie Winterton: The number of medical and non-medical staff as at 30 September 2004, the latest data available, within the audiological medicine speciality within Bedfordshire and Hertfordshire strategic health authority (SHA), by organisation is shown in the following table.

Hospital, public health medicine and community health services: Qualified audiology non-medical staff and medical staff within the audiological medicine specialty within Bedfordshire and Hertfordshire SHA by organisation. As at 30 September 2004

Number (headcount)

			of which:	
	Qualified non-medical staff	*All medical staff*	*Consultant*	*Associate Specialist staff grade*
Bedfordshire and Hertfordshire	30	3	2	1
of which:				
Bedford hospitals				
National health service trust	5	0	0	0
East and North Hertfordshire NHS trust	13	2	2	0
Hertfordshire Partnership NHS trust	1	1	0	1
Luton and Dunstable hospital NHS trust	3	0	0	0
Luton primary care trust	3	0	0	0
West Hertfordshire hospitals NHS trust	5	0	0	0

NHS Health and Social Care Information Centre Non-Medical Workforce Census 2004
NHS Health and Social Care Information Centre Medical and Dental Workforce Census

Cadaveric Donations

Lynne Jones: To ask the Secretary of State for Health how many cadaveric donations of organs there were in England in each of the last 10 years for which figures are available; and what the refusal rate was of families asked if they would permit cadaveric donation in each year. [54257]

Ms Rosie Winterton: The number of cadaveric donors who have donated organs in the last 10 years is shown in the table.

Deceased organ donors in England, 1996–2005

	Donors
1996	668
1997	689
1998	620
1999	617
2000	653
2001	640
2002	652
2003	599
2004	683
2005	633

UK Transplant's national potential donor audit began in January 2003, as part of a series of measures to improve organ donation. All patients for whom death was diagnosed following brain stem tests can be identified. The reasons why potential donors did not become actual solid organ donors can then be investigated. Validated data from 1 April 2003 to 31 December 2004 show that 40 per cent. of the 2,051 families who were approached did not give their consent for heartbeating solid organ donation.

Cervical Smear Tests

Mr. Lansley: To ask the Secretary of State for Health what percentage of women received the results of their cervical smear test from their primary care trust *(a)* within four weeks, *(b)* between four and six weeks and *(c)* over three weeks from time of screening in England in each year since 1997; and if she will make a statement. [45517]

Ms Rosie Winterton: The information requested is shown in the following table.

Percentage

	Weeks		
	Less than four	*Four to six*	*Over six*
1999–2000	32	27	41
2000–01	32	28	40
2001–02	25	25	50
2002–03	33	25	42
2003–04	38	29	33
2004–05	29	28	43

Notes:
1. Information about the time from the taking of a sample to the notification of the test result is currently available only where the result letter is sent by the primary care organisation. In 2004–05, this was reported as occurring in 89 per cent. of cases overall.
2. Information on waiting times for results of cervical screening tests was first published in 1999–2000. Information before this date is not held centrally.

Source:
Statistical Bulletin: Cervical Screening Programme, England: 1999–2000, 2000–01, 2001–02, 2002–03, 2003–04, 2004–05

The increase in waiting times for results for 2004–05 are the result of laboratories converting to liquid based cytology, and the retraining of staff this entails.

Colon Cancer

Mr. Gauke: To ask the Secretary of State for Health what recent assessment she has made of the reasons underlying the lower survival rate for colon cancer in England than in *(a)* Germany and *(b)* the United States of America. [46748]

Ms Rosie Winterton: Although no direct comparison between Germany and the United States of America has been made The Cancer Atlas, published by the Office for National Statistics in 2005, sets out the possible causes and risk factors for developing colorectal cancer.

These include a diet low in vegetables or high in meat, lack of physical exercise, obesity and smoking. The Cancer Atlas also notes that the increase in colorectal incidence may be due partly to changing referral practices or increased patient awareness, leading to an

increase in colonic investigations finding colorectal cancers which may not have been diagnosed during the patient's lifetime.

Five-year survival rates from colorectal cancer in England are improving, from 38.8 per cent. for the years 1986 to 1990 to 49.8 per cent. for the years 1996 to 2001.

Defibrillators

Mr. Lansley: To ask the Secretary of State for Health pursuant to her opinion piece in *The Independent* on 19 January, what the evidential basis is for her statement that 681 defibrillators have saved 68 lives so far; when the defibrillators began to be installed in railway stations and airports; at what cost the defibrillators were installed; and if she will make a statement. [45479]

Ms Rosie Winterton: In July 1999, the White Paper, "Saving Lives: Our Healthier Nation" announced the Government's intention to invest £1 million in installing automatic external defibrillators (AEDs) in busy public places such as railway stations, airports, coach stations and ferry ports. A further £1 million was then committed to training people employed at the site in their use and in basic life support.

In April 2000, the Metro Centre shopping complex was the first public place in which AEDs were installed. Nine further public places (sites) received AEDs, completing the pilot phase of the programme and in November 2002, phase one of the programme was completed. This resulted in 110 sites receiving 681 AEDs and over 6,050 people receiving training in basic life support skills and the use of an AED. These AEDs were mainstreamed to the national health service as of 1 February 2005.

Evidence suggests that 71 lives have been saved as a result of the programme. This information is derived from stakeholders; sites report incident activity to the manager of the national defibrillator programme within 48 hours. On notification from a site or the Department, the manufacturers download data from the AED and forward to the Department within 72 hours. The manager then liaises with ambulance trusts and receiving hospitals, as the download data can be used for diagnosis and follow up treatment if the resuscitation has been successful. Patient confidentiality precludes the Department from insisting on identification and outcomes of the patients so the actual survival rates could be much higher.

Dementia

Keith Vaz: To ask the Secretary of State for Health what research her Department has *(a)* evaluated and *(b)* commissioned on (i) Alzheimer's disease and (ii) senile dementia. [50442]

Jane Kennedy: The main agency through which the Government support medical and clinical research is the Medical Research Council (MRC). The MRC is an independent body funded by the Department of Trade and Industry via the Office of Science and Technology.

The Department funds research through its national research programmes that supports policy and provides the evidence needed to underpin quality improvement and service development in the national health service.

National programme projects related to Alzheimer's disease and other dementia planned, in hand, and recently completed, include:

- a systematic review of injury prevention programmes and strategies for older people with cognitive impairment and dementia in hospital and care home settings;
- a cross-cultural qualitative study on improving access to care for people with dementia and their carers;
- the development of a new instrument and an evaluation of current methodology for the measurement of health-related quality of life for people with dementia;
- a technology assessment report on the clinical and cost-effectiveness of donepezil, rivastigmine, galantamine and memantine for Alzheimer's disease;
- a systematic review of interventions to prevent wandering in dementia and evaluation of the ethical implications and acceptability of their use;
- a randomised controlled trial to explore whether befriending by trained lay workers improves psychological well-being and quality of life for carers of people with dementia, and at what cost; and
- a health technology assessment study of antidepressants for depression in dementia via a definitive multi-centre pragmatic randomised controlled trial of clinical and cost-effectiveness.

Over 75 per cent. of the Department's total expenditure on health research is devolved to and managed by NHS organisations. Details of individual projects, including a large number concerned with dementia, can be found on the national research register on the Department's website at www.dh.gov.uk/research.

Dentistry

Mr. Lansley: To ask the Secretary of State for Health how many dentists have been registered with the General Dental Council in England in each year since 1997. [28699]

Ms Rosie Winterton: The General Dental Council (GDC), which is responsible for the registration of dentists, is a United Kingdom wide regulator and does not separately record registrations by the constituent countries within the UK.

The number of dentists registered with the GDC across the UK each year since 1997 is shown in the table.

	Dentists registered
1997	29,055
1998	29,951
1999	31,029
2000	31,577
2001	31,827
2002	31,932
2003	32,517
2004	31,813
2005	33,631

David Howarth: To ask the Secretary of State for Health how many dental practices in each local authority in England accepted NHS patients in each year since 1997. [31580]

Ms Rosie Winterton *[holding answer 24 November 2005]:* Information on the number of dental practices which provided care for national health service patients since 1997, by local authority, has been placed in the

Library. We do not hold information on how many of these practices were accepting new patients during this period.

Chris Ruane: To ask the Secretary of State for Health how many dentists were registered in each of the last 30 years. [38277]

Ms Rosie Winterton: The number of dentists registered with the General Dental Council (GDC) across the United Kingdom each year since 1975 as at 31 December is shown in the table.

	Total number of dentists
1975	19,543
1976	19,956
1977	20,383
1978	20,636
1979	21,237
1980	21,845
1981	22,468
1982	23,195
1983	23,796
1984	24,410
1985	24,592
1986	24,850
1987	25,286
1988	25,542
1989	25,918
1990	26,320
1991	26,561
1992	27,068
1993	27,617
1994	27,472
1995	27,957
1996	28,505
1997	29,055
1998	29,951
1999	31,029
2000	31,577
2001	31,827
2002	31,932
2003	32,517
2004	32,757
2005	33,698

Andrew Rosindell: To ask the Secretary of State for Health what steps she is planning to take to ensure NHS dental provision for the elderly in England. [40523]

Ms Rosie Winterton: There has been a major improvement in the oral health of adults. The 1998 National Adult Dental Health survey showed that the proportion of adults with no natural teeth had fallen from 37 per cent. in 1968 to 12 per cent. in 1998. However, as was recognised in the 'Report of the Primary Care Dental Workforce Review' published in 2004, people who keep their teeth have a greater need for oral hygiene advice and restorative dental treatment. This additional demand was one of the reasons why, in response to the report, we took measures to expand the dental work force by recruiting the equivalent of over 1,400 whole-time national health service dentists (comparing October 2005 with April 2004) and providing for an extra 170 dental training places each year from 2005.

Mr. Cox: To ask the Secretary of State for Health pursuant to the answer of 14 December 2005, *Official Report*, column 2139W, on dentistry, if she will provide a breakdown of the new NHS dentists by nationality. [45412]

Ms Rosie Winterton *[holding answer 25 January 2006]:* Data on dentists' nationality are not held centrally. The table provides information on the numbers of complete new entrant general dental services (GDS) and personal dental services (PDS) dentists, who have joined the GDS or PDS in England, by country of qualification as at 30 September each year.

Country	*2001*	*2002*	*2003*	*2004*	*2005*
Australia	39	25	31	18	12
Belgium	6	3	1	2	5
Czech Republic	0	0	0	0	6
Denmark	20	14	16	12	10
Finland	5	8	13	1	3
France	4	1	5	0	4
Germany	15	17	24	37	68
Greece	19	26	37	52	81
Hong Kong	0	1	0	0	3
Iceland	0	0	0	0	1
Ireland	36	44	49	41	38
Italy	5	7	5	11	17
Latvia	0	0	0	0	6
Malaysia	6	4	5	12	7
Malta	0	0	0	0	5
Netherlands	0	1	1	4	0
New Zealand	32	18	15	12	15
Norway	8	3	3	2	3
Poland	0	0	0	5	312
Portugal	1	1	2	14	46
South Africa	123	146	94	92	50
Spain	0	5	11	34	65
Sweden	121	79	67	72	64
United Kingdom	1,271	1,110	1,065	1,096	1,063
Unknown[1]	41	36	65	102	260

[1] Unknown dentists include dentists whose status is shown as awaiting entry or statutory exams. Awaiting entry means the dentist did not identify his or her country of qualification when requesting the opening of a new contract. Generally, these are replaced with the genuine country of qualification within weeks. Statutory exam indicates the exam taken by dentists whose home qualification is not recognised by the UK. By its nature, it does not specify a country of qualification but confirms that it is different from all country-specific qualifications.

Notes:

1. Complete new entrant means the dentist had an open GDS or PDS contract in September of the specified year but no GDS or PDS contract in September of the previous year.
2. Data includes all notifications, received by the Dental Practice Board, up to 3 November 2005. Figures for the numbers of dentists at specified dates may vary depending upon the notification period, for example, data with a later notification period will include more recent notifications of dentists leaving the GDS or PDS.

Source:

Dental Practice Board

Mr. Harper: To ask the Secretary of State for Health how many dentists are on the current NHS dental contract in each primary care trust in England. [51636]

Ms Rosie Winterton: Information on the number of dentists providing general dental services and personal dental services in each primary care trust has been placed in the Library.

Mr. Fabian Hamilton: To ask the Secretary of State for Health what steps are being taken to ensure that all children are being covered by NHS dental care provision. [51843]

Ms Rosie Winterton: Dentists working in the salaried primary care dental services examine schoolchildren at least three times in their school career. They also contribute to regular surveys, which have shown that the oral health of children is improving.

Where dentists advise that treatment is necessary, children under 16 and young people aged 16, 17 and 18 who are in full-time education are exempt from charges for national health service dental treatment.

Recent and on-going action to improve access to NHS dentistry, including the recruitment of the equivalent of over 1,450 additional dentists, the establishment of a new university dental school and the introduction of local commissioning responsibilities for primary care trusts, will benefit both children and their families.

Sandra Gidley: To ask the Secretary of State for Health whether she has met the British Dental Association over the past six months to discuss the NHS Dental Contracts. [54173]

Ms Rosie Winterton: I met the British Dental Association, on 14 February 2006 to discuss the new contracts.

Sandra Gidley: To ask the Secretary of State for Health how many adults and children in England were registered with an NHS dentist in each year since 1997 in each primary care trust area. [54174]

Ms Rosie Winterton: The information requested has been placed in the Library.

Mr. Ellwood: To ask the Secretary of State for Health how many NHS dentists there were in the Bournemouth area in each of the last five years. [54285]

Ms Rosie Winterton: The number of national health service dentists within Bournemouth teaching primary care trust (PCT) and Poole PCT as at 30 September each year is shown in the following table.

	Bournemouth teaching PCT	*Poole PCT*
2001	72	81
2002	76	84
2003	71	106
2004	70	110
2005	74	109

Notes:

1. Data includes all notifications of dentists joining or leaving the general dental services (GDS) or personal dental services (PDS), received by the Dental Practice Board, up to 19 October 2005. Figures for the numbers of dentists at specified dates may vary depending upon the notification period, for example, data with a later notification period will include more recent notifications of dentists joining or leaving the GDS or PDS.
2. Dentists include principals, assistants and trainees. Prison contracts have been excluded from the data.
3. The postcode of the dental practice was used to allocate dentists to specific geographic areas. PCT areas have been defined using the Office for National Statistics all fields postcode directory.
4. An individual dentist may have a contract with more than one PCT, in which case he or she will appear in figures for each PCT with which he or she holds a contract.

Source:
Dental Practice Board

Dr. Murrison: To ask the Secretary of State for Health what assessment she has made of the time taken by primary care trusts to finalise contracts with dentists. [54505]

Ms Rosie Winterton: Primary care trusts (PCTs) have until 31 March to finalise new general dental services contracts or personal dental services agreements with dentists, although both PCTs and dentists have been encouraged to sign contracts by the end of February wherever possible to ensure that the first monthly payments under the new arrangements can be made in time.

Helen Jones: To ask the Secretary of State for Health if she will make a statement on the decision of Warrington Primary Care Trust not to fund extra dentistry in Culcheth. [53543]

Ms Rosie Winterton: Cheshire and Merseyside Strategic Health Authority reports that a time-limited arrangement, agreed between Warrington Primary Care Trust (PCT) and the Culcheth Village Dental Practice, has seen a second dentist at the practice since August 2005. The dentist has been salaried through short-term funding, allocated by the Department in October 2005 which ends on 31 March 2006. From April 2006, the national health service will be implementing major reforms to dentistry. New contracts for dentists will abolish the traditional fee per item remuneration system and support new ways of working with a greater focus on preventative care. Evidence from personal dental services pilot schemes is that these new ways of working free up significant capacity that dentists can then use in part to see a greater range of patients.

Julia Goldsworthy: To ask the Secretary of State for Health pursuant to the written ministerial statement of 9 November 2005, *Official Report*, columns 17–18WS, on national health service dentistry, what the headcount figure is for dentists which results in the figure of 622 whole-time equivalents. [31444]

Ms Rosie Winterton: The information requested is not available as the data were not collected in this format.

Doctors (Suspensions)

Mr. Lansley: To ask the Secretary of State for Health how many doctors have been suspended for six months or more in each quarter since April 2001; and what estimate she has made of the cost to the NHS of suspensions of doctors in the last full year for which figures are available. [48844]

Jane Kennedy: Departmental figures show that, from 2000, approximately 30 doctors were suspended at any one time for six months or more. National Clinical Assessment Service (NCAS) figures show that for the first three quarters of 2004, 21 doctors were excluded at any one time, and 19 in quarter four. Long-term suspensions—doctors or dentists formally excluded from work for six months or more—have reduced by almost half to about 20 at any one time in 2004. The figures for 2005 will be published by NCAS in the spring. Data on the cost of exclusions are not collected

centrally. The National Audit Office in their report, "The Management of Suspensions of Clinical Staff in NHS Hospital and Ambulance Trusts in England", estimated that the average cost of excluding a doctor was £188,000.

Eating Disorders

Mr. Davey: To ask the Secretary of State for Health what research her Department has commissioned on the *(a)* recognition and *(b)* referral mechanism for eating disorders by (i) general practitioners and (ii) other health professionals. [53012]

Ms Rosie Winterton: The Department has not commissioned research on the recognition and referral mechanism for eating disorders by general practitioners and other health professionals. However, clinical guidelines published by the National Institute for Health and Clinical Excellence (NICE) in January 2004 provide recommendations for healthcare professionals on core interventions in the treatment and management of anorexia nervosa, bulimia nervosa and related eating disorders in primary, secondary and tertiary care. The guidelines are available on NICE'S website at www.nice.org.uk/pdf/cg009niceguidance.pdf.

Notes:

1. PDS schemes have varying registration periods. To ensure comparability with corresponding GDS data, PDS registrations are estimated using proxy registrations, namely the number of patients seen by PDS practices in the past 15 months. There will be a break in the registrations series at the point at which PDS schemes were introduced as the proxy registrations build up. Falls in registration rates will be particularly pronounced in the financial year 2004–05, when the majority of PDS schemes were introduced.

2. Data for 2003 and earlier do not include those PDS schemes that do not have any registrations, for example, dental access centres, and is therefore not directly comparable with 2004 and 2005 data.

Source:
Dental Practice Board

Erythropoietin

Mr. Drew: To ask the Secretary of State for Health when the National Institute for Health and Clinical Excellence is expected to make its final decision on whether it will recommend the use of erythropoietin. [55367]

Jane Kennedy: I understand that the National Institute for Health and Clinical Excellence (NICE) is likely to publish its final guidance on the use of erythropoietin for the management of anaemia induced by cancer treatment in May 2006. Further information is available from NICE's website at www.nice.org.uk.

Free Eye Examinations

Mr. Lancaster: To ask the Secretary of State for Health what plans she has to delegate responsibility for determining eligibility for free eye examinations to individual primary care trusts. [47209]

Ms Rosie Winterton: There are no plans to delegate responsibility for determining eligibility for free eye tests to primary care trusts.

Gambling Addiction

Mr. Stewart Jackson: To ask the Secretary of State for Health what gambling addiction services are available in Cambridgeshire. [54352]

Ms Rosie Winterton: The information requested is not collected centrally.

Gulf War-related Illnesses

Mr. Ancram: To ask the Secretary of State for Health which NHS hospitals are the main centres for the treatment of Gulf War-related illnesses. [50295]

Ms Rosie Winterton: The Department has not designated any national health service hospitals as main centres for the treatment of ex-service personnel returning from military conflict. Local NHS bodies have a responsibility to provide services to meet the health needs of all those who are eligible for treatment including ex-service personnel.

Mr. Ancram: To ask the Secretary of State for Health what Government guidelines are available to *(a)* general practitioners, *(b)* neurologists and *(c)* other medical carers for the treatment of ex-service personnel suffering Gulf War-related illnesses. [50296]

Ms Rosie Winterton: No guidelines have been issued specifically for the treatment of ex-service personnel returning from military conflict. Clinical guidelines published by the National Institute for Health and Clinical Excellence provide recommendations in the treatment of various health problems including those that may be experienced by ex-service personnel returning from military conflict.

Haemodynamic Fluid Optimisation

Mr. Lansley: To ask the Secretary of State for Health if she will instruct the National Institute for Health and Clinical Excellence to conduct an appraisal of haemodynamic fluid optimisation. [51892]

Jane Kennedy: There are no plans at present for the National Institute for Health and Clinical Excellence to undertake an appraisal of haemodynamic fluid optimisation.

Health Budget

Mr. Lansley: To ask the Secretary of State for Health (1) pursuant to the answer of Mr. Richard Douglas to the Health Committee on 6 December 2005, HC (2005–06) 736-i, on public expenditure on health and personal social services 2005, question 318, what the control totals are which sum to £200 million, broken down by strategic health authority; and which of her Department's budgets will be underspent to finance the NHS deficit anticipated for the 2005–06 financial year; [39398]

(2) if she will list the control totals the Department has agreed with each strategic health authority for financial year 2005–06. [51928]

Jane Kennedy: Control totals are an internal financial management tool used for the operational management of the national health service. The reason for having control totals is to bring strategic health authorities (SHAs) as close as possible to financial balance.

The control totals are set in agreement with SHAs. They are used to inform performance management discussions across SHAs' health economies. It would be inappropriate to publish the control totals during the financial year, as it may have implications for performance discussions held with NHS organisations, and the ability of the Department and all SHAs to discharge their performance management function.

In 2005–06, spending control totals have been issued to the Department's three business groups. These have not been translated into individual budget underspends. The overall central programme is on target to deliver savings.

Health Care (Tamworth)

Mr. Jenkins: To ask the Secretary of State for Health what assessment she has made of the provision of sexual health services in Tamworth. [53413]

Ms Rosie Winterton: Primary care trusts (PCTs) in partnership with strategic health authorities and other local stakeholders, are responsible for planning and developing services to meet the health needs of local people. Burntwood, Litchfield and Tamworth PCT is responsible for commissioning health services for residents of Tamworth.

Mr. Jenkins: To ask the Secretary of State for Health how many vacant midwife posts there are in *(a)* the Staffordshire and Shropshire Strategic Health Authority area and *(b)* the Burntwood, Lichfield and Tamworth Primary Care Trust area; and what plans her Department has to recruit more midwives into the NHS in Staffordshire. [53414]

Ms Rosie Winterton: The table shows the three-month vacancy rates for qualified midwives in the Shropshire and Staffordshire Strategic Health Authority (SHA) area by organisation, including the Lichfield and Tamworth Primary Care Trust (PCT) area.

PCTs, working together with their local acute trust partners, are responsible for determining local workforce requirements, including numbers of midwives.

National health service three-month qualified midwifery vacancies in Shropshire and Staffordshire SHA area by organisation: Three-month vacancy rates—numbers and staff in post

	March 2005		*September 2004*	
	Three-month vacancy rate (percentage)	*Three-month vacancy number*	*(Staff in post) full-time equivalent*	*(Staff in post) Headcount*
Shropshire and Staffordshire SHA area total	0.4	2	519	683
Burntwood, Lichfield and Tamworth PCT	—	0	0	0
Burton Hospitals NHS Trust	0.0	0	101	132
Cannock Chase PCT	—	0	0	0
East Staffordshire PCT	—	0	0	0
Mid-Staffordshire General Hospitals NHS Trust	0.0	0	78	92
Newcastle-under-Lyme PCT	—	0	0	0
North Staffordshire Combined Healthcare NHS Trust	—	0	0	0
North Staffordshire Hospital NHS Trust	1.1	2	178	227
North Stoke PCT	—	0	0	0
Robert Jones and Agnes Hunt Orthopaedic and District Hospital NHS Trust	—	0	0	0
Shrewsbury and Telford Hospitals NHS Trust	—	0	162	232
Shropshire and Staffordshire SHA	—	0	0	0
Shropshire County PCT	—	0	6	0
South Staffordshire Healthcare NHS Trust	—	0	0	0
South Stoke PCT	—	0	0	0
South Western Staffordshire PCT	—	0	0	0
Staffordshire Ambulance Service NHS Trust	—	0	0	0
Staffordshire Moorlands PCT	—	0	0	0
Telford and Wrekin PCT	—	0	0	0

Notes:

Three-month vacancy

1. Three-month vacancy information is as at 31 March 2005.
2. Three-month vacancies are vacancies which trusts are actively trying to fill, which had lasted for three months or more (whole time equivalents).
3. Three-month vacancy rates are three-month vacancies expressed as a percentage of three-month vacancies plus staff in post.
4. Three-month vacancy rates are calculated using staff in post from the Non-Medical Workforce Census September 2004.
5. Percentages are rounded to one decimal place.
6. — zero.

Staff in post

Staff in post data is from the Non-Medical Workforce Census, September 2004.

General

1. Vacancy and staff in post numbers are rounded to the nearest whole number.
2. Calculating the vacancy rates using the above data may not equal the actual vacancy rates.
3. Due to rounding, totals may not equal the sum of component parts.
4. SHA figures are based on trusts and do not necessarily reflect the geographical provision of health care.

Source:

NHS Health and Social Care Information Centre Vacancies Survey, March 2005
NHS Health and Social Care Information Centre Non-Medical Workforce Census, September 2004

Mr. Jenkins: To ask the Secretary of State for Health how many delayed discharges were in acute hospitals serving the Tamworth area in the last 12 months; and how many acute hospital bed nights these represented. [53419]

Ms Rosie Winterton: The information is not available in the format requested. However, the table shows the number of delayed discharges in the last 12 months at the Mid-Staffordshire General Hospitals National Health Service Trust.

Acute delayed transfers of care, Mid-Staffordshire General Hospitals NHS Trust

Month	Delayed transfers of care	Number of days delayed
February 2005	3	152
March 2005	5	168
April 2005	13	313
May 2005	9	283
June 2005	2	249
July 2005	6	127
August 2005	13	240
September 2005	14	312
October 2005	7	285
November 2005	12	291
December 2005	12	401
January 2006	11	175

Notes:
1. Data in the table is taken from local monitoring of delayed discharges included in the SITREPs collection. The delayed transfers of care figures are based on a snapshot taken on the last typical Thursday in the month. This differs to the day used in the separate, quarterly LDPR commissioner collections on which the figures published in the Statistical Supplement to the Chief Executive's Report to the NHS, December 2005 are based. The number of days delayed sums all delays in the month.
2. Due to the way the data are collected, the number of days delayed data for March 2005, June 2005, September 2005 and December 2005 are based on five weeks' data—all other months are based on four weeks' data.

Source:
SitReps

"Health Reform in England; Update and Next Steps"

Mr. Meacher: To ask the Secretary of State for Health whether, in the proposed NHS reforms outlined in "Health Reform in England; update and next steps" she intends that treatment for a terminally ill patient will be supported by the tariff to be used to enable the system of payment by results regardless of how quickly or slowly the patient's health deteriorates. [47467]

Ms Rosie Winterton: Payment by results is a prospective payment system whereby providers are funded according to the number and complexity of cases treated and on the basis of a national tariff. However, in 2006, payment by results only applies to acute hospital services provided by national health service trusts and foundation trusts. Local commissioning arrangements continue to apply to services outside the scope of payment by results, including palliative care.

Health Service Funding

Keith Vaz: To ask the Secretary of State for Health how much funding her Department provided for treatments for *(a)* cancer and *(b)* breast cancer in (i) Leicester and (ii) England since 1997. [49586]

Ms Rosie Winterton: We do not hold information centrally on the treatment of cancer patients. It is for individual primary care trusts to decide the level of funding they allocate locally for the treatment of cancer patients within their population.

Health Services (Wakefield)

Mary Creagh: To ask the Secretary of State for Health how many NHS dentists were employed by Wakefield West Primary Care Trust in each year from 1997 to 2005. [53408]

Ms Rosie Winterton *[holding answer 27 February 2006]:* The information requested is shown in the table.

General dental services (GDS) and personal dental services (PDS): Numbers of dentists within Wakefield West Primary Care Trust (PCT) as at 30 September each year

	Wakefield West PCT
1997	40
1998	47
1999	48
2000	47
2001	50
2002	49
2003	56
2004	49
2005	50

Notes:
1. Data includes all notifications of dentists joining or leaving the GDS or PDS, received by the Dental Practice Board, up to 19 October 2005. Figures for the numbers of dentists at specified dates may vary depending upon the notification period, for example, data with a later notification period will include more recent notifications of dentists joining or leaving the GDS or PDS.
2. Dentists include principals, assistants and trainees. Prison contracts have been excluded from the data.
3. The postcode of the dental practice was used to allocate dentists to specific geographic areas. PCT areas have been defined using the Office for National Statistics all fields postcode directory.

Source:
Dental Practice Board

Herceptin

Sandra Gidley: To ask the Secretary of State for Health pursuant to the answer of 3 November 2005, *Official Report*, column 1340W, on Herceptin, if she will ensure that the action plans submitted by each of the 34 cancer networks to her Department in November 2005 on how they will implement HER2 testing are *(a)* made public and *(b)* placed in the Library. [51482]

Ms Rosie Winterton: I regret that my reply on Thursday 3 November 2005, *Official Report*, column 1340W on Herceptin was incorrect. The term action plans should not have been used in the reply.

Cancer networks were asked to develop proposals (action plans) to implement HER2 testing, but they were not asked to submit these to the Department.

Cancer networks were also asked to establish a baseline of their current position on HER2 testing, that is the percentage of women currently being tested. A proforma for networks to complete this baseline assessment along with an outline proposal for developing HER2 testing was circulated. It was this proforma that was returned by cancer networks to the

cancer action team. The proformas are currently being analysed and a summary will be made available in due course.

Sandra Gidley: To ask the Secretary of State for Health pursuant to the answer of 3 November 2005, *Official Report*, column 1340W, on Herceptin, whether similar action plans will be published on the prescription of Herceptin and related capacity factors. [52549]

Ms Rosie Winterton: The Department has no plans to ask cancer networks to develop action plans on the prescription of Herceptin and related capacity matters.

HIV Treatment

Sandra Gidley: To ask the Secretary of State for Health if she will make a statement on the availability of HIV treatment for pregnant women whose migrant status is undetermined. [54042]

Ms Rosie Winterton: Anyone who is not ordinarily resident in the United Kingdom is subject to the NHS (Charges to Overseas Visitors) Regulations 1989, as amended and will be liable to pay for any hospital treatment they receive unless they meet the criteria for one of several exemption categories listed in the regulations.

Initial diagnostic testing for HIV and any associated counselling are free to all irrespective of residency status. However, HIV/AIDS treatment is not, and a chargeable overseas visitor who receives HIV/AIDS treatment should be charged for it.

Guidance to the national health service is clear that treatment which, in a clinical opinion, is immediately necessary must not be withheld or delayed because of doubts about a person's chargeable status or their ability to pay. Because of the risks to both mother and baby maternity services should always be considered to be immediately necessary and never withheld. This can include treatment to prevent HIV transmission between mother and baby if that is considered to be clinically appropriate.

Hospital-acquired Infections

Mr. Lansley: To ask the Secretary of State for Health pursuant to the press release issued by her Department on 6 February 2006, which 20 trusts will receive support to reduce rates of MRSA and hospital-acquired infections during 2006; who will staff the support teams visiting hospitals with high infection rates; whether these staff will be remunerated by *(a)* her Department, *(b)* NHS organisations and *(c)* other sources of funding; what the total cost of operating these support teams will be in (i) 2005–06 and (ii) 2006–07; what specialist support these support teams will provide to trusts with high MRSA rates; and if she will make a statement. [51890]

Jane Kennedy: The Department has set up specialist, targeted support (improvement teams) to reinforce those initiatives already in place throughout the national health service, which aim to reduce health care associated infections.

The teams will work with trusts that are furthest away from their Methicillin resistant Staphlococcus aureus (MRSA) reduction target. Work has begun with three trusts that were first to volunteer to pilot the support programme—Sandwell and West Birmingham, Northumbria, and Aintree NHS Trusts. The teams will move on to support up to 17 further trusts during 2006–07. Selection will depend on progress towards the MRSA target and other factors. We will announce the additional trusts to join the programme at stages in 2006.

The teams comprise; a programme manager, programme analyst, infection control practitioner and specialist director for infection and prevention control/ microbiologist. Staff will be remunerated through contractual arrangements with the Department.

The cost of the overall programme of support depends upon the level and complexity of the NHS's support requirements and these are presently being calculated—based upon the outcome of the teams' diagnostic work with the three pilot sites. The Department will have calculated the likely cost of support teams by the end of the current financial year.

The objective is to assist trusts in diagnosing those issues which prevent reduction in infections and to develop practical action plans that speed-up progress. The teams will help trusts deliver such plans and put in place management/support arrangements that facilitate sustained improvement.

Chris Ruane: To ask the Secretary of State for Health what was the total research budget for developing research into medicines and treatment for *(a)* MRSA and *(b)* other hospital acquired infections, in each of the past 10 years. [45567]

Jane Kennedy: The main agency through which the Government supports medical and clinical research is the Medical Research Council (MRC). The MRC is an independent body funded by the Department of Trade and Industry via the Office of Science and Technology. Much of the funding for new drug development is provided by the pharmaceutical industry.

The MRC funds a considerable programme of research that underpins scientific understanding of hospital acquired infections including methicillin-resistant Staphylococcus aureus (MRSA) and other antibiotic resistant pathogens. Within this portfolio there are currently no studies exclusive to MRSA.

The Department has for some years recognised the importance of the control of hospital acquired infection, and the threat to public health posed by the increase in antimicrobial resistance. As part of a wide-ranging approach to these issues, the Department set up an advisory group to identify research priorities in 1999. The group's report, published in 2001, made recommendations for future research that led to a research programme that is currently underway.

In 2003, the Department published "Winning Ways—working together to reduce healthcare associated infection in England", a report that laid out a strategic approach to dealing with health care associated infections, including recommendations for further research. The report placed particular emphasis on activity aimed at preventing the occurrence and spread of infection.

Currently available expenditure figures on MRC and Department's policy research programme research into hospital acquired infections are shown in the following table.

£ million

	Department of Health	MRC
1995–96	0.040	0.481
1996–97	0.130	0.331
1997–98	0.160	0.226
1998–99	0.255	0.483
1999–2000	0.190	0.262
2000–01	0.030	1.6
2001–02	0.020	1.7
2002–03	0.130	0.898
2003–04	0.160	0.767

Insulin

Mr. Sanders: To ask the Secretary of State for Health how many incidents involving incorrect insulin doses have occurred in hospitals in each of the last five years; and how many resulted in the death of a patient. [49107]

Ms Rosie Winterton: We do not collect data on the number of incidents involving incorrect insulin doses in hospitals. However, we do collect data on accidental overdose of insulin in general, irrespective of where the event occurred. The two events on which data are collected are: poisoning by insulin and oral hypoglycaemic drugs and insulin and oral hypoglycaemic drugs causing adverse effects in therapeutic use, which is shown in the table.

All diagnosis count of finished consultant episodes for selected diagnoses national health service hospitals, England 2000–01 to 2004–05
Discharge Method

	Death	Live	N/A—patient still in hospital	Not known	Total
2000–01	21	1,701	334	—	2,056
2001–02	33	1,723	372	—	2,128
2002–03	31	1,836	505	—	2,372
2003–04	37	2,051	536	7	2,631
2004–05	38	2,271	668	1	2,978

Notes:

All diagnoses count of episodes—these figures represent a count of all finished consultant episode's (FCE) where the diagnosis was mentioned in any of the 14 (seven prior to 2002–03) diagnosis fields in a Hospital Episodes Statistics (HES) record.

Finished consultant episodes—an FCE is defined as a period of admitted patient care under one consultation with one health care provider. Please note that these figures do not represent the number of patients, as a person may have more than one episode of care within the year.

Deaths—HES data cannot be used to determine the cause of death of a patient while in hospital. Deaths recorded on the HES database may be analysed by the main diagnosis for which the patient was being treated during their stay in hospital, which may not necessarily be the underlying cause of death. For example, consider a patient admitted for a hernia operation (with a primary diagnosis of hernia), but who died from a heart attack. The Office for National Statistics (ONS) collect information on the cause of death, wherever it occurs, based on the death certificate and should be the source of data for analyses on cause of death.

Diagnosis (primary diagnosis)—the primary diagnosis is the first of up to 14 (seven prior to 2002–03) diagnosis fields in the HES data set and provides the main reason why the patient was in hospital.

Secondary diagnosis—as well as the primary diagnosis, there are up to 13 (six prior to 2002–03) secondary diagnosis fields in HES that show other diagnosis relevant to the episode of care.

Selected diagnosis—T383: Insulin and oral hypoglycaemic (anti-diabetic) drug and Y423: Insulin and oral hypoglycaemic (anti-diabetic) drug

Grossing—Figures are grossed for both coverage and missing or invalid clinical data, except for 2003–04 and 2004–05, which is not yet adjusted for shortfalls.

Source:

Hospital Episode Statistics (HES), NHS Health and Social Care Information Centre

Involuntary Automaticity

Steve Webb: To ask the Secretary of State for Health what assessment her Department has made of the part played by involuntary automaticity on adverse incidents in the health care system; and if she will make a statement. [51905]

Jane Kennedy: We recognise the systemic nature of many health care errors and are aware that a number of factors including involuntary automaticity and unconscious behaviour can contribute to adverse incidents in the national health service.

The Department therefore welcomed the recent report following an independent review of a serious adverse radiotherapy incident that occurred at Cookridge hospital which highlighted circumstances where involuntary automaticity may be triggered. Following the publication of the report, the deputy chief medical officer met with the report's authors to discuss the specific circumstances leading to the incident together with the wider implications. In the light of that, we have facilitated debate about involuntary automaticity, including a discussion at the European Union patient safety summit in November 2005.

As yet, it is difficult to determine the proportion of adverse incidents where involuntary automaticity is a contributing factor. However, overcoming this and other factors is built into our patient safety agenda and the work of the National Patient Safety Agency (NPSA). For example, the NPSA's publication 'Right Patient, Right Care' included work on the bedside identity checking of patients receiving care.

Macmillan Nurses

Mr. Jenkins: To ask the Secretary of State for Health what measures she is taking to increase the numbers of Macmillan nurses working for the NHS in Staffordshire. [51223]

Ms Rosie Winterton: It is for trusts to decide how many nurses including palliative care nurse specialists, are employed in each specialty within hospitals. It is for local cancer networks working in partnership with primary care trusts, strategic health authorities and their workforce development directorates to assess, plan and review their workforce, education and training needs for all staff linked to the delivery of local and national priorities for cancer.

Mammography Screening

Mr. Stewart Jackson: To ask the Secretary of State for Health what plans she has to increase the availability of mammography screening for younger women in *(a)* Peterborough and *(b)* Cambridgeshire. [54355]

Ms Rosie Winterton: Primary care trusts are responsible for commissioning health services to meet the needs of the local population.

The Forrest report, on which the national health service breast screening programme is based, recommended further research to assess the clinical and cost-effectiveness of screening women under 50. This research, "the Age Trial", began in 1990 and is nearing completion; and full results are expected later in 2006.

Medicines

Mrs. Maria Miller: To ask the Secretary of State for Health whether the targets for granting marketing authorisations detailed in the Medicines and Healthcare Products Regulatory Agency's business plan for 2005 are being met for over-the-counter medicines; and how many application files were open on the last date for which figures are available. [53024]

Jane Kennedy *[holding answer 27 February 2006]:* In the published business plan for the Medicines and Healthcare products Regulatory Agency (MHRA) for 2005–06, assessment time targets are given for various types of licensing work, including variations to licences and new licences based on abridged dossiers. Specific targets are not given for over-the-counter medicines because these would be included with the abridged dossier applications.

On 21 February 2006, there were 2,490 new product licence applications at various stages of assessment, of which 356 related to products potentially for over-the-counter supply.

I am aware that the MHRA's performance regarding licence and variation approval times during the last nine months has been affected by a combination of adverse factors, including increases in work load, difficulties in recruiting professional assessment staff, especially medically-qualified staff, and transitional implementation problems during the introduction of a new information management system. Though statistics for the full year 2005–06 are not yet available, it is likely that some of the target assessment times given in the plan will not be met.

The MHRA is taking a number of steps to improve service levels. These include organisational restructuring, additional recruitment, re-training of staff, voluntary schemes for extended working hours, and information system performance enhancements.

Mrs. Maria Miller: To ask the Secretary of State for Health how much time was taken on average to grant applications for marketing authorisation for *(a)* new, *(b)* abridged and *(c)* variations of over-the-counter medicines, from initial receipt of the application to its final approval in the last period for which figures are available. [53090]

Jane Kennedy *[holding answer 27 February 2006]:* The most recent full-year figures for new medicines approval times by the Medicines and Healthcare products Regulatory Agency (MHRA) are for 2004–05. These show an average approval time, from receipt of the application to grant of the licence, of 288 calendar days. This period, however, includes the time taken by applicants to supply any necessary new or correcting information following the initial assessment of their application. When this is taken into account the actual number of net working days taken by the MHRA reduces to an average of 122 days. These figures apply to all types of new product licensing including products for over-the-counter (OTC) supply.

For the relatively small number of completely new medicines, for example, those containing new drugs and with the potential for meeting unmet medical needs in major diseases, the MHRA, during the same period, has maintained its record of assessing these in under 40 days.

For variations to OTC product licences, whether straightforward or complex, and again in the most recent full year for which figures are available, 2004–05, the average time taken to approve, from receipt of the application to grant of the variation, was 58 calendar days. This includes the time taken waiting for the company to provide any further information needed.

Mrs. Maria Miller: To ask the Secretary of State for Health when she expects the Better Regulation of Over-the-Counter Medicines Initiative to make its recommendations; and if she will make a statement; [53197]

Steve Webb: To ask the Secretary of State for Health what progress is being made on the Better Regulation of Over-the-Counter Medicines Initiative; and if she will make a statement. [53759]

Jane Kennedy *[holding answer 27 February 2006]:* The Medicines and Healthcare products Regulatory Agency (MHRA) is committed to developing regulation which is proportionate, accountable, consistent, transparent and targeted and is considering how unnecessary regulatory burdens, primarily in relation to over the counter (OTC) medicines, could be eased.

To take this important initiative forward the MHRA is leading the better regulation of OTC medicines initiative (BROMI)—a broad ranging strategy group, which includes representatives from the Proprietary Association of Great Britain (PAGB), the non-proprietary sector, the National Pharmacy Association (NPA), and wider Government.

The group first met in December 2005 at which the terms of reference were agreed and a work plan developed. The group is considering a range of options for easing unnecessary regulatory burdens in relation to OTC medicines and I have asked that BROMI delivers its first proposals to simplify regulatory burdens for OTC medicines in April 2006.

Mrs. Maria Miller: To ask the Secretary of State for Health what mechanisms the Medicines and Healthcare products Regulatory Agency (MHRA) uses to ensure that deadlines for the granting of marketing authorisations for medicines are being met; and what mechanisms are in place to ensure the MHRA assessors are held to account. [53616]

Jane Kennedy *[holding answer 27 February 2006]:* The Medicines and Healthcare products Regulatory Agency (MHRA) uses a number of information technology (IT)

system and staff management mechanisms to monitor the progress and completion of marketing authorisation applications. These include the automatic system flagging of applications when critical dates are due and weekly status checks by the assessment managers. In addition, applications processed through European approval procedures are monitored using a Eudranet IT system which links all of the European Community medicines regulatory agencies.

The accountability for ensuring that licensing deadlines are met is shared between MHRA managers and assessors. The quality, quantity and timeliness of work completed are among the primary measures of their individual performance management.

Milton Keynes PCT

Mr. Lancaster: To ask the Secretary of State for Health when she expects a decision to be made on the future of the Milton Keynes Primary Care Trust. [54877]

Ms Rosie Winterton: Local consultations on the boundary changes began on 14 December 2005, running for 14 weeks until 22 March. It is anticipated that an announcement on new primary care trusts will be made in late May following the consideration of recommendations to Secretary of State, by an independent external panel, on the strategic health authority consultation reports.

Myeloma

Mr. Keetch: To ask the Secretary of State for Health if she will take steps to ensure that the standard of care for patients with myeloma in Hereford is the same as for patients being treated in Wales and Scotland. [49869]

Ms Rosie Winterton: In 2003, the National Institute for Health and Clinical Excellence (NICE) published 'Improving Outcomes in Haematological Cancers'. This guidance is designed to ensure services for patients with haematological cancers are consistent across England and Wales.

In Scotland, The Scottish Intercollegiate Guidelines Network produces similar guidance for use within NHS Scotland.

The Department and the National Assembly for Wales have also asked NICE to appraise velcade for the treatment of multiple myeloma. Velcade is one of the first five drugs to be appraised under NICE'S new single topic appraisal process and guidance is expected in mid-2006.

The Department have made it clear that funding for specific treatments should not be withheld simply because guidance from NICE is unavailable. In these circumstances, we expect primary care trusts to take full account of available evidence when reaching funding decisions.

NHS Dialysis Treatment

Keith Vaz: To ask the Secretary of State for Health how many patients in *(a)* Leicester and *(b)* England receive NHS dialysis treatment. [49605]

Ms Rosie Winterton: Data from the last published report of the 'UK Renal Registry of the Renal Association' show that on 31 December 2003, 509 people were receiving national health service dialysis in Leicester.

The most recent complete data available for England, from a national survey carried out for the Department by the UK Renal Registry of the Renal Association, shows that on 31 December 2002 there were 16,394 adult patients receiving NHS dialysis treatment. There were 214 patients receiving NHS dialysis treatment in United Kingdom paediatric renal units.

Keith Vaz: To ask the Secretary of State for Health what the infection rate was for patients receiving NHS dialysis treatment in the last period for which figures are available. [49606]

Jane Kennedy: National surveillance of healthcare associated infections, including methicillin resistant *Staphylococcus aureus* (MRSA) bacteraemia, is undertaken by the Health Protection Agency (HPA), based on data supplied by the national health service. Data specifically relating to the infection rate for patients receiving dialysis treatment is not available. However, data showing the MRSA bacteraemia rates per acute trust is available on the Department's website at www.dh.gov.uk/assetRoot/04/ll/40/15/04114015.pdf.

NHS Litigation Authority Panel

Mr. Djanogly: To ask the Secretary of State for Health whether solicitors' firms on the NHS Litigation Authority panel *(a)* are subject to audits and *(b)* have their bills reviewed; to what extent they are subject to quality assessment; and whether standards are set for firms to meet to gain a place on the panel. [54901]

Jane Kennedy *[holding answer 1 March 2006]:* The NHS Litigation Authority (NHSLA) maintains two panels of solicitors, the first specialising in clinical negligence claims and the second in non-clinical claims.

In addition to demonstrating technical ability, panel solicitors must meet specific audit criteria set by the NHSLA. Firms on both NHSLA panels are regularly and formally audited. The NHSLA audit the work undertaken for them by the panel solicitors and the firms all have their own internal control structures, some utilising external consultants. In addition, as part of their annual audit of the NHSLA, the National Audit Office comments on costs and cost ratios.

All cases are overseen by experienced NHSLA case managers who look at individual bills, costs to damages ratios and the ratio of defence to claimant costs, both on individual cases and in the aggregate. The NHSLA conduct ad hoc reviews of panel solicitors' work in-house and hold quarterly review meetings with the partners at the panel solicitors.

Non-medical Professional Regulation

Dr. Stoate: To ask the Secretary of State for Health when she expects to publish the findings of the Foster Review of non-medical professional regulation; and if she will make a statement. [48628]

Jane Kennedy: I refer my hon. Friend to the reply I gave the hon. Member for Romsey (Sandra Gidley) on 13 February 2006, *Official Report*, column 1765W.

Parliamentary Questions

Tim Loughton: To ask the Secretary of State for Health when she will answer the question tabled by the hon. Member for East Worthing and Shoreham, on 31 October 2005, reference 24444, on immunisation of people with severe mental illnesses against influenza. [47235]

Ms Rosie Winterton: A reply was given to the hon. Member on 16 February 2006, *Official Report*, columns 2313–14W.

Pharmacist Fees

John Hemming: To ask the Secretary of State for Health pursuant to the answer of 13 February 2006, *Official Report*, columns 1759–64W, on pharmacist fees, what the difference is between the generic reimbursement prices and the prices at which *(a)* Simvastatin, *(b)* Lisinopril and *(c)* Amlodipine could be purchased by pharmacists and dispensing doctors; how much would be recovered by a discount inquiry on that basis for each drug; and if she will break down the information in table one by price category for each drug. [53693]

Jane Kennedy *[holding answer 28 February 2006]:* As stated in my reply on 13 February 2006, *Official Report*, columns 1760–63, simvastatin, lisinopril and amlodipine are included in the new category M in the drug tariff which was introduced in April 2005. The new arrangements for the community pharmacy contractual framework, together with category M are managed to deliver funding for the contractual framework of £1.766 billion in 2005–06. Of this sum, £0.5 billion is derived from margins on medicines retained by community pharmacy contractors and as a result market prices available to contractors will in most cases be less than reimbursement prices paid to contractors. The Department has arrangements in place agreed under the pharmacy contractual framework to ensure that the contract sum is delivered. This is based on information from a sample of pharmacy contractors submitted on a commercial-in-confidence basis.

Prescription Charges

Ms Abbott: To ask the Secretary of State for Health what percentage of prescriptions were exempt from prescription charges in 2004–05; and how much was raised from prescription charges in 2004–05. [54654]

Jane Kennedy: In 2004–05, 87 per cent. of prescription items dispensed in England were exempt from prescription charges. This is based on 691.9 million items dispensed in England of which 602.2 million were dispensed free of charge, which includes prescribed contraceptives and items personally administered and 89.8 million which were charged at the point of supply or through a pre-payment certificate.

For the same period, the income raised from prescription charges was £422.4 million for England. This is in respect of charges collected at point of supply and fees for pre-payment certificates.

Mr. Pickles: To ask the Secretary of State for Health what plans she has to add to the NHS list of medical exemptions to prescription charges; and if she will make a statement. [55020]

Jane Kennedy: We have no plans to extend the existing list of medical conditions that give exemption from prescription charges.

The extensive exemption and change remission arrangements mean that 87 per cent. of prescriptions are dispensed free of charge. As a result, many people with medical conditions not on the exempt list already get free prescriptions on other grounds. Anyone not exempt may claim help through the national health service low income scheme or purchase a prescription prepayment certificate.

Prescription charges are currently being looked at by the Health Select Committee as part of its inquiry into NHS charges.

Primary Care Trusts

Daniel Kawczynski: To ask the Secretary of State for Health what guidance she has issued to primary care trusts on providing Herceptin to patients who are willing to pay for it. [51379]

Ms Rosie Winterton: The Department has not issued any guidance to primary care trusts on providing Herceptin to patients who are willing to pay for it.

Private Finance Initiative

John Hemming: To ask the Secretary of State for Health pursuant to the answer of 8 February 2006, *Official Report*, column 1325W, on the private finance initiative (PFI), what the net present value is of payments under the PFI contract for *(a)* Whipps Cross NHS Trust, *(b)* Peterborough Hospitals NHS Trust and *(c)* Walsall Hospitals NHS Trust; what the net present value is of the public sector comparator; and how much of the net present value of the public sector comparator is accounted for by the optimism bias. [53093]

Jane Kennedy *[holding answer 27 February 2006]:* At both Walsall and Whipps Cross National Health Service Trusts, the costs of the private finance initiative option are not yet finalised so net present values of payments are not available.

The outline business case for Walsall NHS Trust is on their website at www.walsall.wmids.nhs.uk. This shows at page 97 that an allowance of 15 per cent. has been made for optimism bias at the time of publication (November 2004). Page 107 contains a table with the economic analysis of all the options considered by the trust; the public sector comparator is option six and shows the net present value as £2,670,240,000.

For Whipps Cross NHS Trust, the trust has halted their current scheme. They are in the process of revising their proposals which will then be submitted in a new outline business case. Figures from their previous outline business case are subject to significant change.

Peterborough and Stamford hospitals is a NHS foundation trust and their private finance initiative scheme is also still in procurement. In accordance with protocol on foundation trusts, requests for information on this trust should be directed to their chairman.

Prostate Cancer

Charles Hendry: To ask the Secretary of State for Health when she last met the Prostate Cancer Charity to discuss the funding of research into prostate cancer; and if she will make a statement. [51620]

Ms Rosie Winterton *[holding answer 14 February 2006]:* In his capacity as a signatory to the Prostate Cancer Charter for Action, the chief executive of the Prostate Cancer Charity is a member of the prostate cancer advisory group (PCAG), chaired by the national cancer director, Professor Mike Richards. Research is a standing item on the agenda of PCAG, which meets twice a year. The chief executive of the charity also sits on a number of PCAG working groups. In addition, he met with me on 21 July 2005, and has regular informal meetings with officials.

Prostate cancer is the only cancer with departmental funding target for research. The target of £4.2 million was achieved in 2003–04 and 2004–05. This level of funding will be maintained, subject to the quality of research proposals received.

Salt Consumption

Mrs. Dean: To ask the Secretary of State for Health (1) what assessment she has made of the effects of excessive salt consumption on patients at risk of developing kidney disease; and if she will make a statement; [49104]

(2) what guidance her Department has issued to health professionals on monitoring salt intake levels for patients at risk of developing kidney disease; and what methods are used to monitor salt intake. [49105]

Ms Rosie Winterton: Part two of the national service framework for renal services, published in February 2005, identifies certain groups of people who have an increased risk of developing chronic kidney disease, such as those with hypertension, vascular disease or heart failure. It also makes clear that life-style changes which reduce the risk of these diseases, including improving diet and cutting salt intake, are also likely to reduce the risk of developing chronic kidney disease. Implementation of the clinical guideline on the management of hypertension in adults published by the National Institute for Health and Clinical Excellence is identified as a marker of good practice: this includes advice on keeping dietary salt intake low.

Salt intake is not routinely monitored in people identified as having an increased risk of chronic kidney disease.

Tim Loughton: To ask the Secretary of State for Health (1) what assessment she has made of the effects on children at risk of developing kidney disease from consuming excessive levels of salt; [49208]

(2) what guidance her Department has issued to health professionals on recommended levels of salt intake for children at risk of developing kidney disease. [49209]

Ms Rosie Winterton: Part two of the national service framework for renal services, published in February 2005, makes it clear that improving diet and cutting salt intake are among measures likely to reduce the risk of developing chronic kidney disease by reducing the risk of associated conditions such as diabetes and hypertension. However, some of the major causes of chronic kidney disease in children are not affected by salt intake in the same way, including congenital abnormalities of the kidneys and/or urinary tract, inherited kidney diseases and infections such haemolytic uraemic syndrome.

Sentinel Computer System

Steve Webb: To ask the Secretary of State for Health what the cost is of implementing the Medicines and Healthcare Products Regulatory Agency's Sentinel IT system; and what assessment she has made of the impact of Sentinel on the time spent by assessors on simple applications for marketing authorisations. [53760]

Mrs. Maria Miller: To ask the Secretary of State for Health what the total costs have been of implementing MHRA's Sentinel computer system; how many and what proportion of each type of application it is being used for; what assessment she has made of how it has affected the time spent to authorise and approve single applications; and if she will make a statement. [53028]

Jane Kennedy *[holding answer 27 February 2006]:* The Medical Healthcare products Regulatory Agency's (MHRA) Sentinel programme, began in 2002 following formal Government procurement processes. The expected life of the programme is 10 years and to date has cost around £19 million which incorporates enhancements to the scope of the original programme. The MHRA is currently using Sentinel to handle all applications for marketing authorisations and variations, for clinical trial certificates and for import and export licences, as well as a range of internal corporate functions, and will soon extend Sentinel to pharmacovigilence, including new capabilities for signal generation.

Recently assessment approval times have lengthened, mainly due to delays in validating applications, and assessment targets are not being met in a proportion of cases although urgent cases are being processed promptly. Some technical problems were encountered when parts of the Sentinel programme were implemented, which is not unusual for a project of this complexity, but those have been or are being resolved. Positive improvements have already been achieved and more are forecast. Sentinel's development is founded in its ability to handle electronic submissions and as industry increases its use of the external portal for this purpose, the workflow will be further streamlined.

Sentinel completely revolutionises the MHRA's approach to information management and processing and will put them in a leading position in its ability to handle electronic submissions, attract revenues from within and outside the United Kingdom and to remain

a centre of excellence for medicines regulation. It will enable improved access to information to assist in the protection of public health and provide a better service to all its stakeholders.

Supercentre Sterile Services

Mr. Oaten: To ask the Secretary of State for Health what consultations have taken place with the Royal College of Surgeons on the estimated costs involved in the surgical instrument sets when super centre sterile services are established. [53199]

Jane Kennedy *[holding answer 27 February 2006]:* Departmental Officials meet representatives from the Royal College of Surgeons regularly to discuss matters of mutual interest concerning the decontamination programme. It is a matter for each national health service trust involved in a project to improve decontamination services to determine what extra instruments it needs in the light of the size and quality of the existing stock.

Tarceva

Geraldine Smith: To ask the Secretary of State for Health (1) how many NHS patients have received the cancer drug Tarceva; [53996]

(2) if she will list the NHS trusts which have prescribed the cancer drug Tarceva. [54101]

Jane Kennedy *[holding answer 27 February 2006]:* Erlotinib (Tarceva) for non-small cell lung cancer was granted a licence by the European Medicines Agency, in September 2005. The Department does not hold data on the number of people prescribed particular drugs but does hold data on the number of national health service prescriptions dispensed. There is no record of the drug having been issued in hospitals up to June 2005, though our information is not comprehensive and might not capture the use of the drug in clinical trials where it has not been dispensed at the NHS's expense. More recent data is not available due to the contractual restrictions on how data on drugs issued in hospitals can be used. The drug has not been prescribed in primary care up to September 2005. More recent data is currently not available due to National Statistics protocols.

CONSTITUTIONAL AFFAIRS

Court Services (Gloucestershire)

Mr. Harper: To ask the Minister of State, Department for Constitutional Affairs what her assessment is of *(a)* the requirement for and *(b)* the performance of the magistrates court in Coleford, Gloucestershire. [55607]

Bridget Prentice: The requirement for Coleford magistrates court is currently under review and no decision on its future has been made at this time.

The performance figures for Gloucester are collected on a regional basis and individual figures for Coleford magistrates court are not available.

Mr. Harper: To ask the Minister of State, Department for Constitutional Affairs what savings have been sought by her Department from the Courts Service in Gloucestershire; and what assessment she has made of the impact of these savings on court services in Gloucestershire. [55608]

Bridget Prentice: Gloucestershire have identified £109,000 of savings and to date have reported that they have achieved these savings as a result of management reorganisation which does not impact on court business.

Electoral Systems

Mr. Davey: To ask the Minister of State, Department for Constitutional Affairs what work is being undertaken to review electoral systems within the UK. [54666]

Bridget Prentice: I refer the hon. Member to the reply that I gave to the hon. Member for Yeovil (Mr. Laws) on 16 January 2006, *Official Report*, column 1054W. The Government's internal review is desk based, examining a range of existing publications and materials. These include, for example, the reports of the Independent Commission on the Voting Systems ("the Jenkins report"), the Independent Commission on Proportional Representation (ICPR), and the Arbuthnott Commission's report on Boundary Differences and Voting Systems.

Freedom of Information

Mr. Heald: To ask the Minister of State, Department for Constitutional Affairs whether *(a)* Ministers and *(b)* special advisers are informed of Freedom of Information Act 2000 requests made to their Department. [53808]

Bridget Prentice: The decision as to whether to inform ministers about a FOI request is made on a case by case basis in each Department. Ministers are not informed of every individual FOI request.

Where section 36 of the Freedom of Information Act 2000 applies, all requests are submitted to Ministers because this exemption can only be used if, in the Minister's reasonable opinion, disclosure would 'prejudice the effective conduct of public affairs'.

It is usually departmental policy that Special Advisers are copied advice to Ministers.

Information Commissioner

Ben Chapman: To ask the Minister of State, Department for Constitutional Affairs what the target time for the Information Commissioner's Office to process a case from receipt to completion; and what the average time taken was in 2005. [55409]

Bridget Prentice: The Information Commissioner is an independent body created by statute. He has responsibilities for handling complaints made to him under the Freedom of Information Act 2000 and the Data Protection Act 1998.

For FOI cases, the ICO target for the business year 2005–06 is to resolve 50 per cent. within 60 working days. In the calendar year 2005, 50.3 per cent. of cases closed were closed within 60 working days of receipt. The average time taken from receipt to closure for all FOI cases closed during 2005 was 94 working days.

For DP cases, the ICO target for the business year 2005–06 is to resolve 90 per cent. of cases within 90 calendar days. In 2005, 88.5 per cent. of cases closed were closed within 90 calendar days of receipt. The average time taken from receipt to closure for all Data Protection cases in the same period was 50 calendar days.

Judiciary

Mrs. Hodgson: To ask the Minister of State, Department for Constitutional Affairs what proportion of judges in the North East are from the North East; and if she will make a statement. [54580]

Bridget Prentice: The Department for Constitutional Affairs does not record the place of birth of applicants for Judicial post, therefore I am unable to provide this information.

Legal Aid

Mr. Peter Robinson: To ask the Minister of State, Department for Constitutional Affairs how many applications for legal aid were *(a)* made and *(b)* approved in Northern Ireland in each of the last 10 years, broken down by constituency. [54509]

Bridget Prentice: The number of applications for legal aid made and approved in Northern Ireland in each of the last 10 years are as follows:

	Claims	*Applications*			
	Legal advice and assistance	*By way of representation*	*Children order*	*Civil legal aid*	*Criminal legal aid*
2004–05					
Received	55,904	4,352	4,857	10,918	20,991
Granted	-	4,186	4,712	8,825	20,428
2003–04					
Received	15,145	5,193	5,541	13,276	19,619
Granted	-	4,762	5,118	7,155	19,037
2002–03					
Received	55,292	5,745	5,999	13,569	19,177
Granted	-	5,351	5,656	11,102	18,591
2001–02					
Received	41,949	5,797	5,708	14,997	17,820
Granted	-	5,440	5,403	9,011	17,303
2000–01					
Received	46,656	5,622	5,133	14,097	19,344
Granted	-	5,157	4,824	11,480	18,681
1999–00					
Received	45,656	5,798	5,198	14,109	20,063
Granted	-	5,285	4,950	12,586	19,394
1998–99					
Received	57,969	5,633	5,506	15,813	19,732
Granted	-	5,121	4,600	6,713	19,194
1997–98					
Received	76,365	6,032	5,320	18,286	22,703
Granted	-	5,580	4,456	11,158	22,151
1996–97					
Received	86,041	7,696	1,291	18,306	24,375
Granted	-	6,961	1,063	12,102	23,726
1995–96					
Received	79,887	9,011	-	18,414	23,960
Granted	-	8,376	-	11,730	23,396

Notes:
1. Legal Advice and Assistance cases are recorded as claims, not applications.
2. Data for criminal cases is collected for calendar years and the figures in the table relate to the period 1995–2004.
3. To provide the information by constituency would involve a manual review of records. Given the large number of cases involved this would incur a disproportionate cost.

Legal Services Commisson

Dr. Cable: To ask the Minister of State, Department for Constitutional Affairs what assessment she has made of the Legal Services Commission decision to cease funding specialist support and legal advice in complex cases; and if she will make a statement. [54723]

Bridget Prentice: Specialist support services form part of the Legal Services Commission's (LSC) special projects budget. Research undertaken by the LSC which underpins their consultation paper "Making legal rights a reality" points to an increasing demand for front line advice for the most needy.

Given the pressure on the limited legal aid budget and the number of clients needing legal advice, the LSC has concluded that the £2.3 million will be redirected to fund direct legal advice in the next financial year. This will increase access to legal aid services for vulnerable people.

Magistrates Courts

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs how much has been spent on the establishment, development and delivery of the *(a)* North Liverpool Community Justice Centre and *(b)* Salford magistrates court. [54771]

Bridget Prentice: The information is as follows.

(a) The cost of the establishment and development of the North Liverpool Community Justice Centre was £5.4 million. Running costs to deliver the centre are estimated to be £2.5 million per year.

(b) The Community Justice Initiative within Salford magistrates court has been allocated £100,000 for its establishment and development. Ongoing delivery costs will be met within existing budgets for the court and its supporting agencies.

Parliamentary Questions

Mr. Amess: To ask the Minister of State, Department for Constitutional Affairs pursuant to the answer of 1 February 2006, *Official Report*, column 491W, on trials (location), what estimate she has made of the cost of answering the question; and if she will make a statement. [53042]

Bridget Prentice: In order to obtain the information requested, it would be necessary for a member of staff at each of 92 Crown court and 377 magistrates court locations to physically research case files. This would significantly exceed the ceiling of £600 in place for providing responses to Members questions.

Representation Orders

John Mann: To ask the Minister of State, Department for Constitutional Affairs how many representation

orders have been granted in each court within the east midlands Government office region; and to which firms of solicitors. [55451]

Bridget Prentice: During financial year 2004–05: £47,445 representation orders were granted in magistrates courts within the east midlands Government office region. In some circumstances these orders will also cover proceedings in the Crown court.

Information on representation orders actually granted in the Crown court is not held centrally. We will write to my hon. Friend with additional information at the earliest opportunity. A copy of the letter will be placed in the Library.

An application for a representation order is made by, or on behalf of, the defendant in a case. It is on this basis that representation is granted. Information on which firms of solicitors were selected to represent the defendant is not held centrally and could be produced only at disproportionate cost.

Solicitors (Sanctions)

John Mann: To ask the Minister of State, Department for Constitutional Affairs if she will seek to legislate to penalise solicitors who refuse to abide by Law Society adjudication decisions. [55101]

Bridget Prentice: The power to penalise a solicitor who refuses to abide by a Law Society adjudication decision is provided for under existing legislation. If a solicitor fails to comply with an Adjudication Panel decision the Law Society has the power to institute disciplinary proceedings before the Solicitors Disciplinary Tribunal (SDT) on that basis. Under the Solicitors Act 1974 the Tribunal has the power to:

strike a solicitor off the roll;

suspend a solicitor for a fixed or indefinite period;

reprimand a solicitor;

fine a solicitor (fines are payable to HM Treasury);

ban a solicitor's employee from working in a law practice without the consent of the Law Society (under s43 Solicitors Act 1974); and

if the Law Society has awarded compensation, the SDT can make that award enforceable as a High Court order.

The question of enforcement of awards will be taken into account when consideration is given to the proposed complaints handling procedures set out in the Government's White Paper, "The Future of Legal Services: Putting Consumers First": published October 2005.

DEPUTY PRIME MINISTER

Casinos

Mr. Moss: To ask the Deputy Prime Minister what plans he has to change the planning class order on casinos from D2 to *sui generis;* and over what time scale. [53892]

Jim Fitzpatrick: The "Town and Country Planning (Use Classes) Order 1987" was amended by the "Town and Country Planning (Use Classes) (Amendment) (England) Order 2006" (S.I. 2006/220). The amending Order removes use as a casino from Class D2 of the 1987 Order, which relates to assembly and leisure. It also makes use as a casino *sui generis*. The amending order was made on 23 January 2006 and will come into force on 6 April 2006.

Domestic Violence

Sandra Gidley: To ask the Deputy Prime Minister what proportion of people gaining access to a service through Supporting People were at risk of domestic violence in each year since 2003. [54165]

Mr. Woolas: Information is collected by the Office of the Deputy Prime Minister from service providers on the number of new clients accessing services through the Supporting People programme. The following table shows the total number of clients accessing services during 2003–04, 2004–05 and during the first six months of 2005–06, as identified through completed client record forms, together with the number and percentage of clients that were identified as women at risk of domestic violence.

		Clients defined primarily as women at risk of domestic violence		*Clients defined secondarily as women at risk of domestic violence*	
Period	*Total number of clients accessing services*	*Number*	*Percentage of all clients*	*Number*	*Percentage of all clients*
2003–04	209,845	22,229	11	3,975	2
2004–05	202,554	20,629	10	4,024	2
2005[1]	82,323	8,939	11	1,779	2

[1] April to September.

No information is currently collected on men at risk of domestic violence.

Earnings Surveys

Mr. Tyrie: To ask the Deputy Prime Minister what assessment he has made of the effectiveness of *(a)* the New Earnings Survey and *(b)* the Annual Survey of Hours and Earnings in sampling low-paid workers who do not file tax returns; and what effect such data have on area cost adjustments. [54730]

Mr. Woolas: I am content that the Annual Survey of Hours and Earnings (ASHE) sufficiently captures information on the low paid for the following reasons. Firstly, the ASHE contains information on all the employees surveyed who work in PAYE registered companies, including those who earn less than the PAYE threshold.

Secondly, in 2004 and 2005 the Office for National Statistics (ONS) conducted additional surveys of wage information from people working in companies which are not registered for PAYE to supplement the ASHE.

Analysis of the information from these supplementary surveys has shown that people working in small firms, which are not registered for PAYE have the same wage profile as those working in the same occupation in a PAYE registered firm.

Finally, ONS calculate a weighting for every record in the ASHE. This means that the data we use to calculate the area cost adjustment has been weighted to match the national employment profile.

Mr. Tyrie: To ask the Deputy Prime Minister what assessment he has made of the effectiveness of *(a)* the New Earnings Survey and *(b)* the Annual Survey of Hours and Earnings in acquiring information on the qualifications of individuals. [54731]

Mr. Woolas: The New Earnings Survey and the Annual Survey of Hours and Earnings contain no information on the qualifications of the individuals in the survey.

Mr. Tyrie: To ask the Deputy Prime Minister what plans he has to replace the Annual Survey of Hours and Earnings with the Labour Force Survey in calculating area cost adjustments. [54732]

Mr. Woolas: I have no plans to replace the Annual Survey of Hours and Earnings (ASHE) with the Labour Force Survey (LFS).

I am content that the Annual Survey of Hours and Earnings is the best data to use to calculate the Area Cost Adjustment (ACA). The ASHE is a comprehensive source of pay data. It provides a robust and objective basis to assess differences in pay between areas.

Most of the councils who commented on this issue in our summer consultation agreed that we should use the full ASHE to calculate the ACA.

Mr. Tyrie: To ask the Deputy Prime Minister what assessment he has made of estimates of regional wage variations in West Sussex by *(a)* the New Earnings Survey and *(b)* the Annual Survey of Hours and Earnings. [54733]

Mr. Woolas: The labour cost adjustment (LCA) is the element of the local government funding formula that takes account of differences in local wage costs. It is calculated using wage data from each area cost adjustment (ACA) area. The majority of West Sussex is contained in the 'West Sussex Non-Fringe' ACA area. Crawley is contained in the 'Surrey, Berkshire and West Sussex Fringe'.

The LCA was calculated using information from the New Earnings Survey (NES) panel dataset for the 2004–05 local government finance settlement. The Annual Survey of Hours and Earnings (ASHE) replaced the NES in 2004, so the ASHE panel dataset was used to calculate the LCA in 2005–06. Following the formula review, we used the full ASHE dataset to calculate the LCA in 2006–07.

LCA factors for 2004–05, 2005–06 and 2006–07 are given in the following table.

LCA factors

ACA area	*2004–05*	*2005–06*	*2006–07*
City of London	1.5765	1.578	1.5737
Inner London	1.3245	1.3362	1.337

Northumberland	1	1	1
Lincolnshire	1	1	1
Dyfed Powys Police	1	1	1
Cornwall	1	1	1

Mr. Tyrie: To ask the Deputy Prime Minister what plans he has to undertake a review of the geographical rules used in area cost adjustments in the South of England. [54734]

Mr. Woolas: Having announced the 2006–07 settlement, I intend to take stock of my priorities for future formula changes. As part of this, I intend to look again at the geography of the area cost adjustment. However, I do not intend to make formula changes in 2007–08.

Mr. Tyrie: To ask the Deputy Prime Minister what plans he has to abandon lower limits on labour cost adjustment figures. [54735]

Mr. Woolas: Having announced the 2006–07 and 2007–08 settlements, I intend to take stock of my priorities for future formula changes. However, it is unlikely that removing the lower limits on the area cost adjustment (ACA) will be a priority for review.

The ACA contains a lower limit because there is lower wage flexibility in the public sector. Occupations such as teachers, police and firefighters are on national pay

scales, and they make up a higher proportion of local government employment than of the economy as a whole.

Firefighters

Norman Lamb: To ask the Deputy Prime Minister whether there are incentives for employers to allow employees *(a)* to start and *(b)* to continue to work as retained firefighters; and whether he plans to introduce measures to ensure that employees are not penalised for working as retained firefighters. [53332]

Jim Fitzpatrick: Individual fire and rescue services are working closely with local businesses to encourage them to release staff for Retained Duty System (RDS) duties. Currently there are no national incentives for employers to allow employees to become RDS firefighters; however, officials in ODPM are exploring the possibility of a variety of incentive schemes.

The Government recognise that the support of employers is vital to ensure that RDS firefighters can carry out their role effectively. Therefore ODPM are working with the Federation of Small Businesses, CBI and the Public and Voluntary sectors to inform employers of the benefits and responsibilities of supporting staff who are RDS firefighters.

Halfway Reservoirs, Sheppey

Derek Wyatt: To ask the Deputy Prime Minister what assessment he has made of the capacity of reservoirs one and two in Halfway, Sheppey. [55106]

Jim Fitzpatrick: The Department has made no specific assessment of reservoirs one and two in Halfway, Sheppey. However, the water company responsible, Southern Water, has a duty to maintain reservoirs under their ownership. The regulation of reservoirs below a threshold of 25,000 cubic metres is managed by the Health and Safety Executive.

In the event that any concerns regarding the impact of reservoirs, or their operation, are considered not to be addressed by the water company responsible, then these should be taken to the Consumer Council for Water.

Local Government Finance

Mr. Pickles: To ask the Deputy Prime Minister pursuant to the answer to the hon. Member for Meriden (Mrs. Spelman) of 9 February 2006, *Official Report*, column 1425W, on local government finance, whether his Department *(a)* engaged in and *(b)* commissioned (i) research and (ii) preparatory work, independent of the Lyons Inquiry, on the council tax revaluation prior to the decision to postpone the revaluation. [54541]

Mr. Woolas: I have nothing to add to the answers given to the hon. Member for Meriden of 14 November 2005, *Official Report*, column 1030W; 23 November 2005, *Official Report*, column 2063W; 30 November 2005, *Official Report*, column 585W; and 9 February 2006, *Official Report*, column 1425.

Paddy Tipping: To ask the Deputy Prime Minister how much was allocated to Nottinghamshire county council for *(a)* 2006–07 and *(b)* each year since 1996–97 in (i) cash and (ii) real terms. [54744]

Mr. Woolas: Over the period requested, Nottinghamshire county council has received formula grant from Government in support of the discharge of certain of its functions. On the 1 April 1998, the city of Nottingham took on the functions of the county council in its area, becoming a unitary authority. The following table therefore shows the formula grant for Nottinghamshire prior to reorganisation. A like-for-like comparison between years is not possible for this period.

	Formula Grant	*Formula Grant at 2004–05 prices*
1996–97	486.681	588.590
1997–98	489.633	575.153

The following table shows the formula grant for Nottinghamshire after the reorganisation.

In cash terms

	Previous year's adjusted formula grant	*Current year's formula grant*	*Change*	*Percentage change*
1998–99	344.555	343.512	-1.043	-0.3
1999–2000	343.512	362.309	18.797	5.5
2000–01	362.308	380.654	18.346	5.1
2001–02	378.755	393.977	15.222	4.0
2002–03	370.423	392.129	21.706	5.9
2003–04	408.973	439.735	30.762	7.5
2004–05	426.862	453.194	26.331	6.2
2005–06	457.370	481.618	24.249	5.3
2006–07	123.556	127.898	4.342	3.5

At 2004–05 prices

	Previous year's adjusted formula grant	*Current year's formula grant*	*Change*	*Percentage change*
1998–99	404.735	393.309	-11.426	-2.8
1999–2000	393.309	406.824	13.515	3.4
2000–01	406.823	421.899	15.076	3.7
2001–02	419.794	426.137	6.343	1.5
2002–03	400.661	411.079	10.419	2.6
2003–04	428.738	449.112	20.374	4.8
2004–05	435.965	453.194	17.228	4.0
2005–06	457.370	470.436	13.066	2.9
2006–07	120.688	121.930	1.242	1.0

Please note that the decrease in formula grant in 2006–07 reflects the change in the method of funding for schools. From 2006/07, schools will be funded via the Dedicated Schools Grant rather than formula grant.

In addition to the amount of formula grant Nottinghamshire receives it also receives additional funding for services through special and specific grants. These are not available on a like-for-like basis.

Adam Afriyie: To ask the Deputy Prime Minister how many special grants have been issued to local authorities, since January 2001; and for what purposes. [54797]

Mr. Woolas: Since 2001, 59 special grants have been made under the special grant procedures in section 88b of the Local Government Finance Act 1988, and 270 grants made under section 31 of the Local Government

Finance Act 2003. These grants for both capital and revenue expenditure, were made for the following purposes:

Education

Schools Standards Grant
Education Budget Support Grant
Former Grant Maintained School Transitional Funding Grants
Threshold Payments
Heads, Deputies and Advanced Skills Teachers Performance Pay Progression
Deputies Assimilation
Post-16 Budget Support Grant
Performance Pay Progression—Qualified Teachers Pay Scale
Performance Pay Progression for Teachers on the Leadership Pay Spine
Local Authorities with Autonomy on Formulaic Capital Allocations

Electoral Modernisation Programme

Derek Wyatt: To ask the Deputy Prime Minister how much was held in reserves by each *(a)* county council, *(b)* unitary authority and *(c)* district council in England on 1 February. [55104]

Jim Fitzpatrick: Information on local authority reserves levels as at 1 February is not held centrally, and could be provided only at disproportionate cost. A table has been made available in the Library of the House showing levels of revenue reserves as at 1 April 2004 for each county council, unitary authority and district council in England.

The data are as reported from local authorities and are taken from Office of the Deputy Prime Minister (ODPM) Revenue Summary (RS) returns for 2004–05.

Local Government Pension Scheme

Sarah Teather: To ask the Deputy Prime Minister when he will reply to the letter sent to him by the hon. Member for Brent East, dated 21 November 2005, regarding the Local Government Pension Scheme, in respect of Ms Katrina Glennie. [54692]

Mr. Woolas: The Office of the Deputy Prime Minister has no record of receiving the hon. Member's letter of 21 November 2005. Officials have now obtained a copy of the letter from the hon. Member and a reply will be sent shortly.

Local Government Restructuring

Mrs. Spelman: To ask the Deputy Prime Minister if he will list the meetings that *(a)* he and *(b)* civil servants in his Department have had with local authority (i) officials and (ii) representatives concerning local government restructuring in the last 12 months. [53232]

Mr. Woolas: Civil servants in the Office of the Deputy Prime Minister have held meetings with local authority officials on the local governance and structures debate on the following dates:

21 December 2005

22 December 2005

12 January 2006

19 January 2006

30 January 2006

8 February 2006

In addition, Ministers have attended two county dialogues to date, in Shropshire and Gloucestershire, held with officials, representatives and other local government stakeholders, as part of the wider debate on local governance. There were preparatory meetings for these events with officials of the ODPM and the county council concerned.

Ministers and civil servants from the Office of the Deputy Prime Minister have held numerous meetings with local authority officials and representatives during the past 12 months at which a range of topics have been discussed and may have included, on occasion, local government reorganisation.

Lyons Inquiry

Mr. Pickles: To ask the Deputy Prime Minister pursuant to the answer to the hon. Member for Meriden (Mrs. Spelman) of 8 February 2006, *Official Report*, column 1247W, on the Lyons Inquiry, whether his Office made a formal submission to the inquiry. [54531]

Mr. Woolas: I have nothing to add to the answers given to the hon. Member for Meriden of 12 September 2005, *Official Report*, column 2431W; 1 December 2005, *Official Report*, column 682W; and 8 February 2006, *Official Report*, column 1247W.

Renewable Energy

Gregory Barker: To ask the Deputy Prime Minister (1) when his Department will start the urgent review of local authority positive planning for renewable energy policies announced in Standing Committee C on 9 February; and when he expects the review to report its findings; [54045]

(2) when a decision will be taken on the extent to which further Government action will be taken to promote positive planning for renewables policies by local authorities. [54046]

Yvette Cooper: Work is already under way on analysing local plans to determine whether there is a problem with emerging plans that do not fully incorporate PPS22 guidance. A decision on whether any further action is required and, if so, what that action should be and its timing, can only be taken once that analysis is completed and the results available.

FOREIGN AND COMMONWEALTH AFFAIRS

Ascension Island

Mr. Clifton-Brown: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions the UK Government have had with the US Administration about changes in the military and security use of Ascension Island in the last 12 months. [54459]

Mr. Douglas Alexander: During the past 12 months, there have been no talks between the Government and the US Administration about changes in the military and security use of Ascension Island. Officials visiting

Ascension have had a number of working level meetings with the US base commander on Ascension Island. There have also been discussions between the Ministry of Defence and the US to consider options for burden sharing on Ascension Island, and the scope for mutual savings and efficiencies.

Burma

Mr. Hancock: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government have taken to support the Burmese trade union movement. [54635]

Ian Pearson: Independent trade unions in Burma are forbidden in practice and no collective bargaining exists. However, we are in contact with the Federation of Trade Unions of Burma (FTUB) in exile. I met the General Secretary of the FTUB, Mr. Maung Maung, in July 2005.

We work closely with the International Labour Organisation to tackle forced labour in Burma, which remains a major concern.

Vera Baird: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent advice his Department has offered Orient Express on their investments in Burma. [55657]

Ian Pearson: None.

Christian Minorities

David Simpson: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations he has made on the treatment of Christians to the Government of *(a)* Egypt, *(b)* Saudi Arabia, *(c)* Iran, *(d)* Sudan, *(e)* Vietnam, *(f)* China, *(g)* Poland, *(h)* Spain, *(i)* Morocco, *(j)* Nepal, *(k)* India, *(l)* Pakistan, *(m)* Indonesia, *(n)* Myanmar, *(o)* North Korea, *(p)* Belarus, *(q)* the United Arab Emirates and *(r)* Yemen. [53548]

Ian Pearson: The UK condemns all instances where individuals are persecuted because of their faith, wherever it happens and whatever the religion of the individual or group concerned. We regularly urge states, where there is a systematic problem, to pursue laws and practices which foster tolerance and mutual respect and to protect religious minorities against discrimination, intimidation and attacks. While we have not recently raised this issue in all of the countries mentioned, specific examples of where we have been engaged in the last 12 months include:

China: Freedom of religion was a focus of the last EU-China Human Rights Dialogue, which took place under the UK presidency in October 2005. Individual cases of concern, including Christians, was also raised during an UK-led EU demarche on the Chinese Government in December 2005.

Pakistan: The treatment of Christians and the repeal of Blasphemy Laws was raised during an EU demarche on human rights in December 2005. In November 2005, our high commissioner in Pakistan wrote to the Minister for Religious Affairs about the use of mosques to incite violence against Christians and the Archbishop of Canterbury, accompanied by members of the British high commission, raised the treatment of minorities in meetings with President Musharraf and Prime Minister Shauk Aziz.

India: Attacks on Christians and other minority groups was raised with Indian Officials during an EU human rights dialogue in December 2005 and again by our Deputy High Commissioner during his call on the National Human Rights Commission in January 2006.

Indonesia: We co-sponsored an international conference to promote inter-faith understanding and harmony with the Indonesian Government in July 2005.

Iran: Ministers and officials have pressed Iran to address international concern over the freedom of religious minorities on several occasions. All EU member states co-sponsored a UN General Assembly resolution on human rights in Iran in December which expressed serious concern at the continuing discrimination, and other human rights violations against persons belonging to ethnic and religious minorities, recognised or otherwise. During our EU presidency, we twice raised the case of the Christian Pastor and convert, Hamid Pourmand, imprisoned for allegedly deceiving the armed forces about his religion and spying. We continue to monitor Mr. Pourmand's case and the situation of Christians in Iran closely.

Saudi Arabia: We participated in an EU demarche in May 2005 during which the arrest of Christians for taking part in religious activities was raised.

Civil Service Secondees

Dr. Iddon: To ask the Secretary of State for Foreign and Commonwealth Affairs how many people from science and technology backgrounds have been seconded into the civil service in his Department in each of the last three years. [48410]

Ian Pearson: The Foreign and Commonwealth Office does not hold centrally information that would allow us to identify secondees with a science and technology background.

Correspondence

Mr. Clelland: To ask the Secretary of State for Foreign and Commonwealth Affairs when the Parliamentary Under Secretary, Foreign and Commonwealth Office, will reply to the letters of *(a)* 7 and 11 November 2005 and *(b)* 7 December 2005 from the hon. Member for Tyne Bridge. [38553]

Ian Pearson: My noble Friend, the Foreign and Commonwealth Parliamentary Under-Secretary, Lord Triesman of Tottenham, replied to my hon. Friend's letters of 2 and 11 November and 7 December on 16 December 2005.

Democratic Republic of Congo

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the political situation in the Democratic Republic of Congo, with particular reference to the treatment of journalists. [55343]

Ian Pearson: The peace process in the Democratic Republic of Congo (DRC) remains fragile, but the country is making progress towards holding democratic elections by June 2006. It is crucial that all parties stick to this timetable, and work constructively towards free and fair elections. The key challenges of Security Sector Reform, ending corruption and promoting human rights still remain.

Freedom of the press generally exists in the DRC, but harassment of journalists, including physical attacks, have recently increased. The UK has reminded the DRC authorities of their duty to protect freedom of expression and the rights of all vulnerable groups, including journalists. The UK drafted the EU-led Resolution on DRC, adopted at the 2005 UN General Assembly, which made clear that the DRC Government must do more to protect human rights defenders.

Departmental Expenditure

Mr. Weir: To ask the Secretary of State for Foreign and Commonwealth Affairs how much was spent on advertising by *(a)* his Department, *(b)* each (i) non-departmental public body and (ii) executive agency for which his Department is responsible and *(c)* each independent statutory body, organisation and body financially sponsored by his Department in each year since May 1997. [39067]

Ian Pearson: I refer the hon. Member to the answer I gave the hon. Member for Monmouth (David T.C. Davies) on 18 July 2005, *Official Report*, columns 1369–70W.

To collate this information for 1997–2001 and for the Department's non departmental and other bodies would incur disproportionate costs.

Foreign Travel (Health and Safety)

Mr. Sheerman: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government takes to promote health and safety awareness among *(a)* UK citizens undertaking the Hajj to Saudi Arabia and *(b)* UK citizens planning travel to other foreign destinations. [51540]

Dr. Howells: The Foreign and Commonwealth Office (FCO), in partnership with leading British Muslim organisations on the Hajj Advisory Group (HAG), has since 2000 sent the British Hajj Delegation to Saudi Arabia for the Hajj. The Lord Patel of Blackburn has led the last six delegations, working alongside doctors and consular staff from our Consulate-General in Jeddah to provide medical and consular assistance to British pilgrims during the Hajj.

The FCO currently funds the delegation, and, as part of the project, produces a general advice leaflet to raise awareness among British pilgrims planning to go on the Hajj. Prior to the recent Hajj, we distributed 45,000 leaflets to British mosques and to the Saudi embassy in London. They included health and safety advice and a link to FCO travel advice.

The travel advice page for Saudi Arabia on the FCO website has a link to a specially designed section for those planning to go on the Hajj. This is part of the 'Know Before You Go' campaign and includes a separate section on health and welfare issues.

The FCO supports a wide ranging publicity campaign, which encourages British nationals to be better prepared for their overseas trips with a view to avoiding common travelling risks and dangers.

The campaign known as 'Know Before You Go' includes: information leaflets, Government TV fillers, radio messages, newspaper interviews and advertorials, travel show stands and other extensive PR and partnership activity, with some 180 'Know Before You Go' partners in the travel industry.

The FCO maintains a website and telephone helpline, which offer regularly-reviewed and updated information including specific country and destination advice and general safety travel tips.

Iraq

Mr. Holloway: To ask the Secretary of State for Foreign and Commonwealth Affairs how many Iraqi policemen have been trained since the end of the war; and how many more are expected to be trained and ready to work by the end of 2006. [43258]

Dr. Howells: 80,400 members of the Iraqi Police Service have been trained since the end of hostilities. Coalition targets predict that by the end of February 2007, 135,000 Iraqi police officers will be fully trained and equipped.

Nuclear Proliferation

Mr. Maples: To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made in developing the international non-proliferation regime since the June 2005 Non-Proliferation Treaty Review Conference; and if he will make a statement. [44496]

Dr. Howells: Since the Nuclear Non-proliferation Treaty (NPT) Review Conference concluded at the end of May 2005, there has been progress in much of the international non-proliferation regime. I described EU progress, which was made under the UK presidency in my answer today (UNI 44497) and steps we have taken since the Review Conference to strengthen the NPT in the answer I gave to the hon. Member on 23 January 2006, *Official Report*, column 1803W.

The UK successfully chaired a meeting of states party of the Biological and Toxin Weapons Convention in a discussion of codes of conduct for scientists and the substantive outcome of the meeting was published in a written statement I made to this House on 20 December 2005, *Official Report*, columns 191–93WS.

At the annual Conference of States Party to the Chemical Weapons Convention, we were instrumental in the decision to extend the Conference action plan to achieve full national implementation by all states party which sets a series of tight deadlines for states party to take various implementing measures, including passing implementing legislation. It also lays down steps for dealing with countries that do nothing towards implementation.

The UN Security Council's 1540 Committee continued its work to implement the provisions of the resolution, with many states, including the UK, submitting their second reports to the Committee. This followed the examination by experts appointed to the Committee of States' first reports, which highlighted areas where states were required to take action to implement the resolution in full.

At a Diplomatic Conference of the International Maritime Organisation in London in October, States Party to the Convention for the Suppression of Unlawful

Acts Against the Safety of Maritime Navigation agreed amendments to the Convention which, among other areas, will criminalise the transportation of weapons of mass destruction (WMD) and related material by sea, including dual-use equipment intended for a weapons programme.

As part of the continuing engagement with Libya, the UK and US offered assistance in 2005 for the re-deployment and re-training of a number of Libyan scientists and technicians who were working on WMD programmes.

The Amendment on Convention on the Physical Protection of Nuclear Material, agreed this year, significantly strengthened our key instrument for driving physical protection standards around the world. The Convention on Nuclear Terrorism, agreed in April 2005 with significant UK input, opened for signature in September. The UK was among dozens of states which signed the Convention straight away. The Convention includes measures which will reduce greatly the risk from terrorists using nuclear devices.

As G8 President, we encouraged all states to adopt the International Atomic Energy Agencies Additional Protocol and worked with others to formulate appropriate incentives for countries to forego fuel-cycle facilities. The G8 Global Partnership against the spread of weapons and materials of mass destruction made measurable progress on various programmes this year, from tackling the management of the stockpiles of spent nuclear fuel from decommissioned submarines in NW Russia to further progress on the construction of chemical weapons destruction facilities.

On WMD export control regimes, increasingly accepted around the world as important counter-proliferation mechanisms, we made progress towards agreeing criteria in the Nuclear Suppliers Group on transfers of enrichment and reprocessing technology, although final agreement has not yet been reached. We continued to play a lead role in the Australia Group's work countering biological and chemical weapons proliferation which, in its 25th year, marked in Sydney in June 2005, agreed significant control list amendments and admitted Ukraine to its membership. The Missile Technology Control Regime agreed our proposal for special scrutiny at trans-shipment points known to be used by the North Korean missile programme.

The Proliferation Security Initiative (PSI) has continued to attract support from countries around the world, for example the endorsements of the Initiative by Argentina, Jordan, Iraq, and Georgia. We have played a full role in the Initiative, including the organisation of the global exercise Exploring Themis in November. In the same month, the first Regional Operational Experts Group was held in Hamburg. This new format will help further increase the co-ordination and sharing of best practice between supporters of the PSI, which in a short space of time has become a key tool in our efforts to improve global counter-proliferation capability.

We pressed forward with our commitment to an international treaty on the trade in conventional arms, securing strong support from the EU in Council Conclusions agreed on 3 October and on 27 November with support from the Commonwealth for the start of a negotiation at the UN.

Mr. Maples: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the UK took during the UK presidency of the European Union to secure European commitments on non-proliferation and disarmament; what outcomes were achieved; and if he will make a statement. [44497]

Dr. Howells: During our EU presidency we aimed to improve the EU's contribution to multilateral counter-proliferation work through continued implementation of the EU Strategy Against the Proliferation of Weapons of Mass Destruction (WMD). Our general co-ordination of EU positions in numerous lobbying campaigns and multilateral meetings such as the United Nations General Assembly First Committee was acknowledged to be strong and helped convey the EU's policies clearly and positively. We made good progress on existing initiatives: the EU agreed to renew Joint Actions to support International Atomic Energy Agency and Organisation for the Prohibition of Chemical Weapons work on universalisation and full implementation of the Nuclear Non-Proliferation Treaty and the Chemical Weapons Convention. We have also begun two major pieces of work to strengthen the Biological and Toxin Weapons Convention (BTWC), which we expect to be completed during the Austrian presidency: a new Joint Action on universalisation of the BTWC and an EU Common Position for the BTWC Review Conference. We have also agreed a new Strategy to combat illicit trafficking in Small Arms and Light Weapons to complement the WMD Strategy. We launched a debate on future financing of WMD work to focus discussion on how best to channel limited EU resources for the period 2007–13.

Rwanda

Ed Balls: To ask the Secretary of State for Foreign and Commonwealth Affairs what proportion of the population in Rwanda are living below the poverty line. [54803]

Ian Pearson: According to the Rwandan Government's 2000–01 Household Living Conditions Survey (EICV 1), 60.3 per cent. of the population was living below the poverty line. The percentage in rural areas was much higher at 65.7 per cent. than in the urban areas at 15.8 per cent.

There is no more recent comprehensive data available, but the Government are assisting the Rwandan Government in conducting EICV 2. The findings will be made public in early 2007.

Somalia

Jeremy Corbyn: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has held with the African Unity Organisation concerning the governance of Somalia; and if he will make a statement. [54170]

Ian Pearson: Officials in Addis Ababa and Nairobi have frequent discussions with their African Union

contacts about Somalia, most recently on 31 January 2006. The Transitional Federal Government has been based in Jowhar since its return to Somalia in June 2005. Progress on establishing governance has been delayed by disagreements over the Government's seat and the formation of a National Security and Stabilisation Plan, including the nature of any peace support operation to provide for the Government's security. We welcome the first meeting of the Transitional Federal Parliament inside Somalia, which took place in Baidoa on 26 February as a significant step forward on the road back to governance.

Uganda

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what recent discussions he has had with his counterparts at the UN regarding measures to address the conflict in northern Uganda; [52169]

(2) what assessment he has made of the case for targeted sanctions against the Lord's Resistance Army in Uganda; [52170]

(3) what steps are being taken by his Department to reduce the flow of arms to the Lord's Resistance Army in Uganda. [52171]

Ian Pearson: Assisting in ending the conflict in Northern Uganda is a priority for the Government. The UK was instrumental in securing adoption of UN Security Council Resolution 1653 on the Great lakes on 27 January 2006, which strongly condemned Lord's Resistance Army (LRA) actions, and asked the UN Secretary General to make recommendations on how the UN Security Council, UN Missions and agencies can best support Governments in the region to put an end to the activities of illegal armed groups. As part of that process, Jan Egeland, the UN's Under Secretary General for Humanitarian Affairs, plans to visit Uganda in March.

The UK is committed to restricting the arms available to all illegal armed groups, and is therefore a strong supporter of the arms embargoes in force in the region. We support the international criminal court's efforts to bring indicted LRA leaders to justice. But we are unconvinced at this time that targeted sanctions against the LRA in Uganda would be effective. However, we look forward to receipt of the Secretary General's report, and in the light of the report will consider further with partners all possible options for addressing the conflict.

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the violence associated with the recent elections in Uganda. [53876]

Ian Pearson: The fatal shootings in Kampala on 15 February were a cause for concern in the lead up to the 23 February presidential and parliamentary elections. We understand that an individual has been charged in regard to this incident, and will expect the Ugandan legal system to deal with this matter in a prompt, fair and transparent manner.

However, voting in the presidential and parliamentary elections passed generally peacefully and with a significant voter turnout. These elections were an important achievement in Uganda's return to multi-party democracy, and we congratulate the people of Uganda for demonstrating a clear commitment to this process.

Vandalism

David T.C. Davies: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list the acts of vandalism which have been perpetrated *(a)* inside and *(b)* on the outside of his Department's buildings in the last 12 months. [49505]

Ian Pearson: There have been no recorded acts of vandalism perpetrated either *(a)* inside or *(b)* outside the Department's buildings within the last 12 months.

Zimbabwe

Mr. Cox: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps his Department is taking to bring human rights abuses in Zimbabwe to the attention of the international community; and if he will make a statement on the situation in Zimbabwe, with particular reference to recent reports that the Mugabe regime has begun to confiscate the passports of dissidents. [44962]

Ian Pearson: The UK plays a significant role in ensuring that the international community is aware of, and tackles, the situation in Zimbabwe. Together with our European partners, we have imposed a travel ban and assets freeze on those responsible for human rights abuses. We have successfully ensured that Zimbabwe has been brought to the attention of the UN Security Council, where it was discussed three times in 2005. It remains on the Council agenda.

We condemn efforts by the Government of Zimbabwe to suppress opposition by denying regime critics their right to travel. We encourage African partners to join with the international community in rejecting these human rights abuses by the Government of Zimbabwe.

HOME DEPARTMENT

Assets Recovery Agency

Mrs. James: To ask the Secretary of State for the Home Department what progress the Assets Recovery Agency is making in recovering assets under the Proceeds of Crime Act 2002; and if he will make a statement. [53113]

Paul Goggins: The Assets Recovery Agency is making an effective contribution towards recovering criminal proceeds. Since its inception in 2003, the Agency has adopted 150 civil recovery cases and 22 tax cases for investigation; and disrupted over 100 criminal enterprises with £69 million worth of assets subject to freezing orders. The Agency has completed around 30 cases with a recovery value of approximately £10 million and has realised receipts of around £4 million.

The Agency has also assisted law enforcement agencies in obtaining 13 confiscation orders with a total value of £6.4 million.

The Centre of Excellence in the Assets Recovery Agency has delivered training in the Proceeds of Crime Act to over 2,600 financial investigators in law enforcement agencies. The Agency has also successfully raised awareness of the new powers in the Act by hosting a series of conferences and presentations; and by the issue of a monthly newsletter which publicises successes in recovering the proceeds of crime.

Biometric Information

Mr. Holloway: To ask the Secretary of State for the Home Department if he will list the countries which *(a)* require and *(b)* will soon require UK citizens to have biometric facial, iris and fingerprint scan data on passports. [54929]

Andy Burnham: The proposed use of multiple biometrics has been accepted in the International Civil Aviation Organisation (ICAO) Blueprint for machine readable travel documents which has been accepted by the 188 ICAO contracting states and includes the face as the primary mandatory biometric and iris or fingerprints as secondary and optional biometrics. The UK has no specific information as to when other countries will move to using multiple biometrics, however, the deadline within the EU for issuing passports that include a digital facial image is 28 August 2006. The deadline for fingerprints will be three years after final adoption of the technical standards, which is still awaited.

The United States of America has confirmed that countries wishing to remain within their Visa waiver' scheme must start issuing biometric passports to their nationals from October 2006. The UK is not aware of any other country that is planning to impose a similar requirement.

Lynne Jones: To ask the Secretary of State for the Home Department what estimate he has made of the annual income from the proposed charge for a biometric passport and identity card in each of the first three years of the scheme. [53757]

Andy Burnham: The annual income from the proposed fee regime which will apply to the biometric passport and identity card package in each of the first three years of the identity card scheme will depend on the volume of passports and identity cards issued in each year and the level of fees charged.

It is expected that the number of new or renewed passports issued to adults will be 4,157,000 in 2008–09, 3,862,000 in 2009–10 and 3,984,000 in 2010–11.

The regulatory impact assessment published alongside the identity cards bill on the 25 May 2005, states that the current best estimate for the unit cost of a combined biometric passport and ID card package valid for 10 years is £93. However, the actual fee regime for the biometric passport and identity card package will not be laid before Parliament until the procurement process for the identity cards scheme has been completed.

Lynne Jones: To ask the Secretary of State for the Home Department pursuant to the answer of 28 July 2005, *Official Report*, column 1448W, on biometric information, whether the UK Passport Service has commenced the introduction of biometric passports; and what the cost is of producing biometric passports *(a)* to comply only with US requirements and *(b)* with a facial recognition biometric obtained in the most cost-effective manner. [50928]

Andy Burnham: The UK Passport Service intends to begin a phased implementation of biometric passports in March, subject to successful system testing. This phased implementation is expected to be complete in August when all passport production will be biometric.

The UK has chosen the facial recognition biometric, in line with International Civil Aviation Organisation (ICAO) guidance to achieve both enhanced security and compliance with US visa waiver requirements in the most cost effective manner. The 2006 fee review the Passport Service will undertake with HM Treasury will determine the full cost, and hence the fee for biometric passports going forward.

Lynne Jones: To ask the Secretary of State for the Home Department on what basis he assesses the cost of a biometric passport as accounting for 70 per cent. of the cost of the passport and identity card. [50948]

Andy Burnham: The forecast costs of the combination passport and identity card package was published in the regulatory impact assessment document published in 2004. The 70 per cent. assessment is based on forecast average passport costs at the time of introduction of this combined passport and identity card package.

Mr. Evans: To ask the Secretary of State for the Home Department how many biometric passports have been issued to date; and how many he expects will be issued by October 2006. [51874]

Andy Burnham: The Foreign and Commonwealth Office (FCO), through the embassy in Washington, began issuing the first British biometric passports to British nationals in the United States with effect from the week of six February 2006. By 10 February some 200 biometric passports had been issued. SPSL (the UKPS printer and producer of passports) is currently building up biometric passport stock to supply the FCO for its overseas passport issuance programme and for UKPS regional passport office issuance during 2006.

By October 2006 we estimate that some 3.6 million biometric passports will have been issued. This figure will be subject to actual demand figures and the safe and steady conversion of all production facilities to biometric production.

Cohesion and Faiths Unit

Lynne Featherstone: To ask the Secretary of State for the Home Department (1) if he will make a statement on the new database for the Cohesion and Faiths Unit; [52237]

(2) how many people have responded to a request for information about *(a)* their religious belief and *(b)* whether they are a member of a particular sect or denomination for the new database for the Cohesion and Faiths Unit; and if he will make a statement. [52238]

Paul Goggins: The Home Office Cohesion and Faiths Unit is compiling a directory of organisations that it has, or may need to have, contact with. It is intended that the

directory will contain contact details. Where the purpose of an organisation is not immediately apparent from its name, it is intended to include, where possible, a brief description of the purpose of the organisation as it describes itself.

In developing the directory an e-mail was sent on 8 February 2006 requesting details to populate the directory. In error this e-mail was sent to organisations and individuals whom it was not intended for. Clearly personally held religious beliefs are a private matter. Upon realising the mistake an apology was sent on 9 February to all those to whom the request was sent asking them to disregard the request entirely.

As of 15 February 2006, 13 faith based organisations had responded.

Community Engagement (Policing)

Mr. Hoyle: To ask the Secretary of State for the Home Department how many *(a)* community police officers and *(b)* community support officers are working in the Chorley constituency. [52621]

Hazel Blears: The information requested is not collected centrally. Information may be available from the local Chief Constable or Basic Command Unit Commander.

Community Legal Service Direct

Mr. Pelling: To ask the Secretary of State for the Home Department what the annual usage of Community Legal Service Direct has been in *(a)* England and Wales and *(b)* the London borough of Croydon since its inception. [41135]

Bridget Prentice: I have been asked to reply (as I have ministerial responsibility for the Legal Services Commission).

Community Legal Service Direct was launched in July 2004. Total calls to Community Legal Service Direct from England and Wales are shown in table A. The telephone system breaks down the callers by area code. Therefore it is not possible to provide comparable figures for total calls from the London borough of Croydon, as it is not possible to separate them from other 0208 numbers.

Table B shows the number of cases closed by specialist legal advisors for people living in England and Wales and the London borough of Croydon.

Table A: Total calls to community legal service direct from England and Wales

	Number
2004 (July to December)	114,363
2005 (January to December)	450,535

Table B: Total advice cases closed by community legal service direct specialist legal advisors

	Clients lives in England or Wales	*Client lives in London borough of Croydon*
2004 (July to December)	12,423	58
2005 (January to December)	65,342	370

DNA Profiles

Lynne Featherstone: To ask the Secretary of State for the Home Department pursuant to the answer of 20 December 2005, *Official Report*, column 2890W, on DNA profiles, how many of the 139,463 people were perceived to be *(a)* of ethnic minority origin and *(b)* white. [47860]

Andy Burnham: As indicated in the answer of 20 December 2005, *Official Report*, column 2890W, there were 139,463 people who have a DNA profile on the National DNA Database (NDNAD) who have not been charged or cautioned with an offence. This figure comprised 124,347 people who have been arrested and subsequently not been charged or cautioned with an offence and 15,116 people who had volunteered a sample and given consent to the profile being loaded on the NDNAD.

Of the 124,347 people who had been arrested, a record of their perceived ethnic origin was available on the NDNAD for 101,066 persons only. In addition, for a further 17,677 persons, the Police National Computer (PNC) held a record of their White or Non-White status. There was no record of perceived minority ethnic origin or White/Non-White status for the remaining 5,604 persons.

The available data indicates that 21 per cent. were perceived to be of minority ethnic origin, 74 per cent. were perceived to be white and 5 per cent. were unknown. Of the 15,000 persons who had volunteered a DMA sample, 80 per cent. do not have an ethnic appearance recorded, 3 per cent. are recorded as being of minority ethnic origin and 17 per cent. as white.

Mr. Stewart Jackson: To ask the Secretary of State for the Home Department how many DNA profiles of individuals *(a)* under 24 years and *(b)* over 24 years not convicted of a criminal offence normally resident in Cambridgeshire are held by Cambridgeshire constabulary. [53233]

Andy Burnham: It is estimated that there are 11,324 individuals who are currently under 24 years of age and 22,338 individuals who are 24 years or over who have a DNA profile on the National DNA Database taken by Cambridgeshire police. These individuals would have been arrested, detained in a police station and had a DNA sample taken in Cambridgeshire, but would not necessarily be resident in Cambridgeshire.

Data on whether these individuals have been convicted of a criminal offence is not held on the National DNA Database. It could only be obtained at disproportionate cost by cross-searching the 33,662 records for the individuals on the Police National Computer (PNC).

Enrolment Centres

Mr. Alan Reid: To ask the Secretary of State for the Home Department pursuant to the answer of 6 February 2006, *Official Report*, column 940W, on enrolment centres, if he will list the criteria that will be used to select *(a)* the premises in which the interviews over a secure webcam will be conducted and *(b)* the local administrators who will facilitate the interviews. [51401]

Andy Burnham: The answer of 6 February 2006, *Official Report*, column 940W, referred to the use of secure webcam links as one of the options being considered for areas more than an hour's travelling time from the network of permanent offices for passport interviews. If this option is chosen, detailed criteria to balance the requirements of cost, convenience and security will be developed.

Extraditions

Andrew Rosindell: To ask the Secretary of State for the Home Department how many extraditions the Government have *(a)* requested and *(b)* granted in each of the last seven years. [53783]

Andy Burnham: The information requested is as follows:

	Extraditions requested	*Extraditions granted*[1]
1999	56	38
2000	70	47
2001	82	55
2002	70	53
2003	82	55
2004[2]	33	50
2005[2]	31	62

[1] The term "granted" has been taken to apply to cases in which extradition has actually taken place.
[2] The above figures exclude extraditions requested or granted under Part one or Part three of the Extradition Act 2003, which implemented the European Arrest Warrant system on one January 2004. They also exclude extraditions requested or granted to the Republic of Ireland, prior to one January 2004. In all of those cases extraditions have been requested or ordered by judicial authorities rather than by the Government.
Note:
The figures do not include requests made or granted by Ministers in Scotland and Northern Ireland, who have devolved powers to make or grant requests.

Gating Orders

Mr. Betts: To ask the Secretary of State for the Home Department how many gating orders have been made under the Clean Neighbourhoods and Environment Act 2005, broken down by local authority. [54431]

Hazel Blears: No gating orders have been made under the Clean Neighbourhoods and Environment Act 2005. This provision will be commenced this spring when the regulations have been laid before Parliament.

Home Detention Curfew Scheme

Mr. Holloway: To ask the Secretary of State for the Home Department how many people have been released on the Home Detention Curfew Scheme. [54927]

Fiona Mactaggart: According to the Prison Service IT system, by 31 December 2005 122,304 prisoners had been released under the Home Detention Curfew Scheme since the scheme began on 28 January 1999.

Identity Cards

Mr. Holloway: To ask the Secretary of State for the Home Department whether radio frequency technology will be used in identity cards. [54928]

Andy Burnham: It is currently planned that the ID card will be valid for travel within the EEA. As a result, they must comply with standards established by the International Civil Aviation Organisation (ICAO), a branch of the UN. These standards stipulate that a travel document such as an identity card will need to have a "proximity" chip, which will use radio frequencies to allow the card to be read at very short distances, approximately 0 cm-2 cm from a reader. Thus, one specific kind of radio frequency technology will be used in the "proximity" chip in the identity card in line with their introduction into passports in many countries in the coming years.

However, the use of radio frequencies in the identity card should not be confused with other uses of radio frequencies in many different technologies, such as RFID tags. While both use radio frequencies, they use different operating systems, access controls and security requirements. For example, proximity chips include a far higher level of security protection than an RFID tag and can only be read at a very short distance. These differences are reflected in the fact that they operate to different standards set by the International Organisation for Standardisation (ISO).

Furthermore, proximity chips in the identity card will utilise Basic Access Control as a data access protocol in accordance with international standards as well as other cryptographic measures in order to prevent the information on the chip from being modified. In addition, it is planned that further advanced encryption will be utilised to secure biometric information on the chip of the card. This will comply with Extended Access Control standards that are currently under development at an international level.

Life Sentences

Mr. Winnick: To ask the Secretary of State for the Home Department how many of those sentenced to mandatory life imprisonment were released after less than *(a)* 12 years, *(b)* eight years and *(c)* six years in each year since 2000. [53355]

Fiona Mactaggart: The following table from the Prison Service IT system provides figures on the numbers of prisoners sentenced to mandatory life sentences released on licence between the years 2000 and 2005.

Prisoners sentenced to mandatory life imprisonment released[1] *after (a) 8 years to less than 12 years, (b) 6 years to less than 8 years, and (c) less than 6 years; between 2000 and 2004*

Time band/year	*2000*	*2001*	*2002*	*2003*	*2004*	*2005*
8 years to less than 12	41	40	37	51	56	42
6 years to less than 8	3	6	7	6	5	4
Less than 6 years	2	3	1	1	1	

[1] Figures relate to first releases on licence only

National Youth and Community Service

Lynne Jones: To ask the Secretary of State for the Home Department pursuant to the answer of 14 February 2006, *Official Report*, columns 1982–83W, on the National Youth and Community Service, what the rationale was for setting up a new charitable company to implement the National Youth and Community Service Scheme. [53729]

Hazel Blears: The Russell Commission report on youth action and engagement, published in March 2005, recommended the creation of a new national youth volunteering body, independent of Government. The report provided the Government with four options for the legal form of this body: a non-departmental public body, a company limited by guarantee, a community interest company, or an existing organisation, suitably adapted.

The Government decided to create a company limited by guarantee with charitable status. This was for three reasons:

1. The vast majority of the 6,000 young people responding to the Russell Commission consultation commented that a programme run by an organisation independent from Government would be more attractive to them.

2. Implementation of the scheme is more likely to be successful in an organisation with an exclusive focus. While there are existing voluntary sector bodies with a focus on youth volunteering, they do not individually have the capacity or governance structures to deliver the framework.

3. Full implementation of the reports recommendations is dependent on securing support from the private sector. Private sector supporters proved more likely to fund an independent charity than a Government scheme.

It is also important to note that the charitable company will not be delivering the Commission recommendations itself, but will be contracting with existing voluntary and community organisations.

Operation Trident

Anne Main: To ask the Secretary of State for the Home Department what assessment he has made of the effectiveness of Operation Trident in reducing gun crime; and if he will make a statement. [54474]

Hazel Blears: Operation Trident, established London-wide in 1999, has had a significant effect on gun-enabled crime in London. While there have recently been increases in the number of incidents in some boroughs, others such as Tower Hamlets and Southwark have seen reductions (of 13.2 per cent. and 1.8 per cent. respectively in the 12 months to December 2005—MPS figures).

Community support for Trident is a vital component of its success and has been developed via the Independent Advisory Group (IAG), which remains at the heart of Trident strategy. We encourage the development of similar IAGs in other areas as a model of good practice in community engagement.

Passport Applicants (Personal Interviews)

Mr. Alan Reid: To ask the Secretary of State for the Home Department what calculation was used to arrive at the 19-minute average travelling time for first-time applicants for passports under the new arrangements involving personal interviews at offices; and what estimate he has made of the number of people who would have to travel for *(a)* less than and *(b)* more than 19 minutes who live in (i) Argyll and Bute constituency, (ii) Scotland and (iii) the United Kingdom. [51407]

Andy Burnham: The calculation of a UK wide travel average utilised the services of a specialist transport and locational analysis company, MVA Ltd. The company accessed Office for National Statistics census population data, and combined this with Department for Transport and other Government transport and travel data. By analysing trends in public and private travel patterns, MVA were able to advise the UK Passport Service on the average journey time for the anticipated catchment populations of each of the 69 proposed passport office locations. The catchment areas of the proposed 69 office locations are derived by determining the nearest convenient office. Therefore catchment areas cross parliamentary constituency and national boundaries so it is not possible, without incurring disproportionate costs, to calculate the average travel times for a specific population group (for example within a constituency) within the UK.

The choice of the proposed 69 locations was informed by this analysis; the locations chosen balanced the need for ensuring convenience for the customer with the operational efficiency of potential locations given the predicted number of adult first time passport applications within the catchment area. Applicants will be free to choose to be interviewed in any fixed office, enabling them to be interviewed near, for example, their places of employment or study, or to attend an interview in conjunction with travel for social or leisure reasons.

The arrangements for passport interviews will include, in addition to the network of permanent passport interview offices, different arrangements for people living more than an hour's journey time from one of these offices.

Police Restructuring

Mr. Holloway: To ask the Secretary of State for the Home Department what discussions he has had with the Chief Constable of Kent about police restructuring since the consultation period on police restructuring closed on 23 December 2005; and when he expects the Government's response to the consultation to be completed. [43273]

Hazel Blears: The Home Secretary received a business case on police restructuring from the Chief Constable of Kent, Mr. Fuller, and the Chair of the Kent Police Authority, Mrs. Barnes on 23 December 2005.

The Home Secretary has not had any discussions about the restructuring process with the Chief Constable of Kent. However, Mr. Giffard, Chief Constable of Staffordshire and Programme Director of the restructuring process, met with the Chief Constable of Kent and the Chair of the Kent Police Authority. They have also spoken by telephone and in person on a number of occasions. In addition to this, there has been regular contact between the Kent project team working on restructuring and the Home Office Review Unit supporting the process.

We recognise that there will be issues that need further discussion and we have been working closely with forces and authorities to resolve these.

On 6 February the Home Secretary published a written ministerial statement setting out initial findings from the protective services assessments, in relation to five proposed force amalgamations. These amalgamations were identified as the solution able to provide the greatest operational benefit for those areas.

The remaining forces will be dealt with on a case-by-case basis and the final decision will be based on a range of factors, including affordability, organisational resilience and the impact of the changes on other parts of the Criminal Justice System. We expect this analysis to be completed shortly.

Post Office

Norman Lamb: To ask the Secretary of State for the Home Department what services to the public which are provided by his Department are available from the Post Office. [51198]

Andy Burnham: Post Office Ltd. provide a passport application check and send service and hold passport applications packs at 2,513 branches on behalf of the UK Passport Service.

Prisons

Mr. Garnier: To ask the Secretary of State for the Home Department how many *(a)* free and *(b)* payphone telephones are available for remand prisoners in each prison holding remand prisoners in England and Wales. [55078]

Fiona Mactaggart: No free telephones are routinely available to prisoners. However, prisoners are permitted, at the discretion of local managers, to make a private call on an official telephone, for example, when a close family member is ill and cannot visit the prisoner. The following table details the location of all telephones within the prison estate provided by British Telecommunications plc under the terms of the prisoner pinphone contract. It is not possible to differentiate those telephones used exclusively by remand prisoners.

Probation Service

Mrs. Hodgson: To ask the Secretary of State for the Home Department what recent representations he has received on the planned changes to the structure and role of the Probation Service. [54582]

Fiona Mactaggart: A consultation on proposals outlined in the paper Restructuring Probation to Reduce Re-offending was held between 20 October and 20 December. A summary of responses and the Government's reply to these will be published in the near future. In addition to the responses submitted to the consultation, Ministers have met and corresponded with a number of key stakeholders.

Public Services (Voluntary Organisations)

Mr. Andrew Turner: To ask the Secretary of State for the Home Department what obstacles he has identified to voluntary organisations providing a larger share of public services; what steps he proposes to take to reduce such obstacles; and what his timetable is for this. [52639]

Paul Goggins: Obstacles have been identified in Government and other reports. These include:

Short contracts of less than three years

A disproportionate sharing of risk

The lack of full cost recovery

The absence of pre-payments at the start of a contract

Disproportionate monitoring and reporting arrangements

The possibility that the capacity of the smaller organisations is insufficient to meet the potential demand.

Because of the nature of the voluntary and community sector, these factors can put them at a disadvantage when competing with others for public service contracts. It is the Government's intention to promote a level playing field on which such disadvantages are removed and public services have the opportunity to benefit from the reservoir of experience and skill in the sector.

Resolving the problem of full cost recovery is a shared issue with the Sector and we will be working closely with it to do so. In the period 2004–08, the Government are investing £365 million to support capacity building and public service delivery activity within the voluntary and community sector.

We will publish the details of further plans in due course.

Reconviction Rates

Mr. Holloway: To ask the Secretary of State for the Home Department what the reconviction rate for adult offenders was in *(a)* the last period for which figures are available and *(b)* 1997. [54935]

Fiona Mactaggart: The most recent information on the re-offending of adults, covering those starting community sentences and discharged from prison, was published in December 2005 in 'Adult re-offending: results from the 2002 cohort'. Home Office Statistical Bulletin 25/05. The report is available on line at http://www.homeoffice.gov.uk/rds/pdfs05/hosb2505.pdf and contains information on progress since 1997 at page 11.

Respect Action Plan

Anne Snelgrove: To ask the Secretary of State for the Home Department how much each local authority will receive for activities for young people under the Respect Action Plan in the next three financial years. [52688]

Hazel Blears: The engagement of young people in constructive and purposeful activity that contribute to their communities and divert them away from antisocial behaviour is central to the Respect drive. This was a core theme in the Government's Green Paper, Youth Matters, which set out the commitment to ensure that all young people have access to activities they find interesting.

As part of this the Youth Green Paper contained proposals for a Youth Opportunity and Youth Capital Fund. Extra funding was made available for these in the Chancellor's pre-budget report. A total of £115 million will be available to local authorities over the 2006–07, 2007–08 financial years to be spent in ways involving young people on projects to improve local activities and facilities. An average local authority could receive approximately £500,000 over the next two years to make a budget available for projects chosen by young people.

We will also build on the successful Sports Champions programme and will provide a new investment of £1 million over three years to expand the Sports Mentoring scheme into other areas.

Sex Offenders

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how many and what percentage of prisoners convicted of sexual offences maintained their innocence and refused to participate in the Sex Offender Treatment Programme in prison and on probation after their release in each year since 1995; and how many have been convicted of sexual offences after they were released from prison. [53907]

Fiona Mactaggart: This information has not been recorded and cannot be collected in retrospect.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how many and what percentage of prisoners convicted of sexual offences participated in the Sex Offender Treatment Programme in prison and on probation in each year since 1995; and how many have been convicted of sexual offences after they were released from prison. [53908]

Fiona Mactaggart: The information requested is as follows:

Custody

The table shows the number of Sex Offender Treatment Programme completions in custody in each financial year since 1995. The percentage of imprisoned sex offenders completing treatment has been calculated by taking the total number of sentenced sex offenders in prison as of 30 June each year. These figures are only available from 2000 onwards.

Please note that some of the completions refer to second or third treatment programmes. Thus the absolute number of prisoners receiving treatment in a given year is lower than the number of completions.

HO Research Findings 205 reported an evaluation of prisoners attending the Core SOTP between 1992 and 1996. This study found that 2.6 per cent. of treated sex offenders reconvicted for a further sexual offence compared with 2.8 per cent. of untreated sex offenders over a two-year follow up period. However when further sexual and violent reconvictions were included, 4.6 per cent. of treated sex offenders reconvicted compared with 8.1 per cent. of untreated. There have not been any further evaluations to date.

Community

Accredited sex offender treatment programmes were introduced in the Probation Service in 2002–03. Data on offenders starting treatment are available for 2003–04 (1,051 starts) and 2004–05 (981 starts). In 2004–05 there were 4,767 sex offenders under supervision in the community, 21 per cent. of offenders were participating in accredited treatment programmes reflecting assessments that not all were suitable for the treatment programmes or had conditions of treatment as part of their supervision.

A reconviction study is not yet available for sex offenders who have completed treatment in the community, as there has been insufficient time for a meaningful follow-up.

The following table shows the number of Sex Offender Treatment Programme completions in custody in each financial year since 1995. The percentage of imprisoned sex offenders completing treatment has been calculated by taking the total number of sentenced sex offenders in prison as of 30 June each year. These figures are only available from 2000 onwards.

Please note that some of the completions refer to second or third treatment programmes. Thus the absolute number of prisoners receiving treatment in a given year is lower than the number of completions.

	Number of completions	*Total sentenced SOs*	*Percentage*
1995–96	439	—	—
1996–97	663	—	—
1997–98	671	—	—
1998–99	589	—	—
1999–2000	585	—	—
2000–01	786	5,090	15.5
2001–02	839	5,107	16.5
2002–03	876	5,305	16.5
2003–04	1,091	5,540	20
2004–05	1232	5773	21.5

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department whether it is compulsory for individuals convicted of sexual offences who maintain their innocence to participate in the Sex Offender Treatment Programme *(a)* in prison and *(b)* on probation. [53909]

Fiona Mactaggart: The information is as follows:

(a) It is not compulsory for sexual offenders in prison to participate in the Sex Offender Treatment Programme.

(b) Following assessment, sex offenders can be required to undertake treatment as a condition of a Community Rehabilitation Order or as a condition of their release from prison on licence. The degree to which convicted sex offenders accept responsibility for their offence behaviour varies in each case and may change over time, particularly after release from prison. It may be necessary, in the interests of protecting the public, for offenders who maintain their innocence to participate in a treatment programme.

Somalia

Daniel Kawczynski: To ask the Secretary of State for the Home Department how many British citizens were born in Somalia. [52089]

Mr. McNulty: As there is no requirement for British citizens born abroad to be registered with the local British consul, and there has been no diplomatic representation in Somalia since 1991, this information is not available.

Special Advisers

Keith Vaz: To ask the Secretary of State for the Home Department whether special advisers in his Department receive an IT allowance. [52665]

Mr. Charles Clarke: Special advisers in the Home Office do not receive any IT allowances.

Street Level Up Programme

David Davis: To ask the Secretary of State for the Home Department how many people have been arrested for Class A drug offences through the Street Level Up Programme. [47697]

Mr. Charles Clarke: It is not possible to allocate specific arrests directly to the Street Level Up Programme rather than to other forms of police activity.

Volunteering

Annette Brooke: To ask the Secretary of State for the Home Department what representations he has received on voluntary organisations adhering to a code of practice on the status and treatment of long-term volunteers. [53798]

Paul Goggins: The Compact, which has provided a framework for the relationship between Government and the voluntary and community sector since 1997 includes a code of practice covering the duties of government and the voluntary sector towards volunteers. This code of practice was updated and republished in autumn 2005, following a 12-week period of consultation.

Wire Tapping

Harry Cohen: To ask the Secretary of State for the Home Department whether *(a)* he, *(b)* any UK Minister and *(c)* any official of the UK Government has authorised any warrantless wiretapping since 1997. [54462]

Hazel Blears: Sections three and four of the Regulation of Investigatory Powers Act 2000 set out the limited circumstances where interception of communications is lawful without a warrant. Such interception does not require authorisation by or reporting to Ministers. While in some circumstances officials can authorise such interception, there is no central record of such authorisations.

All other interception of communications within the UK requires a warrant authorised by a Secretary of State.

Written Answers to Questions

Friday 3 March 2006

CHURCH COMMISSIONERS

Disinvestment Policy

Mrs. Ellman: To ask the honourable Member for Middlesbrough, representing the Church Commissioners if he will list the *(a)* companies and *(b)* countries to which the Church's policy on disinvestment is being applied. [55696]

Sir Stuart Bell: It is not possible to list individual companies in which the Commissioners have agreed in the light of the ethical investment policy not to invest, as this information is commercially sensitive. There is no blanket policy on investing in, or excluding investment from, any specific country.

Ethical Investment Advisory Group

Mr. Gibb: To ask the hon. Member for Middlesbrough, representing the Church Commissioners what *(a)* advice, *(b)* guidance and *(c)* policies the Church of England's Ethical Investment Advisory Group has (i) developed and (ii) published (A) excluding and (B) advising against investment in certain countries. [54673]

Sir Stuart Bell: The Ethical Investment Advisory Group develops ethical investment policy on behalf of the three central Church investment bodies, as set out in the Church's Statement of Ethical Investment Policy. The policy proscribes investment in certain industrial or business activities from which the Church does not wish to benefit. There is no blanket policy on either investing in or excluding investment from any specific country.

Mr. Gibb: To ask the honourable Member for Middlesbrough, representing the Church Commissioners what the policy is of the Ethical Investment Advisory Group of the Church of England on investment in *(a)* China, *(b)* Cuba, *(c)* Iran, *(d)* Libya, *(e)* North Korea, *(f)* Sudan and *(g)* Syria. [54675]

Sir Stuart Bell: There are no blanket policies relating to specific countries. However, the Church expects companies in which it invests to observe any national or international sanction regimes in place from time to time.

Mr. Gibb: To ask the hon. Member for Middlesbrough, representing the Church Commissioners if he will list the *(a)* companies, *(b)* countries, *(c)* markets and *(d)* sectors in which the Ethical Investment Advisory Group of the Church of England has a policy not to invest. [54676]

Sir Stuart Bell: The Commissioners' Statement of Ethical Investment Policy proscribes investment in tobacco, alcohol, pornography, armaments, and gambling. Companies whose activities breach the Church's policy are avoided but it is not possible to list them as this information is commercially sensitive. There is no blanket policy on either investing in, or excluding investment from, any specific country.

Investments

Mr. Burrowes: To ask the hon. Member for Middlesbrough, representing the Church Commissioners which companies the Anglican Church has investments in; and which of those *(a)* trade with and *(b)* provide supplies for the Governments of (i) Zimbabwe, (ii) China, (iii) Burma, (iv) Saudi Arabia and (v) Iran. [54869]

Sir Stuart Bell: The Commissioners held investments in China valued at £1.2 million at the end of 2005. There are to my knowledge no investee companies which are wholly or mainly engaged in trading with any or all of the regimes listed by the hon. Gentleman but, in a globalised economy with large numbers of multinationals, many investee companies will do some business with at least some of these countries provided that there are no sanctions in place.

TRANSPORT

Alcohol-related Crime

Sarah Teather: To ask the Secretary of State for Transport pursuant to the answer to the hon. Member for Maidenhead (Mrs. May) of 12 December 2005, *Official Report*, column 1707W, on alcohol-related crime, if he will break the figures down by constituency. [54626]

Derek Twigg: Data are not collected in this format. The information requested can therefore be provided only at disproportionate cost.

British Transport Police

Alan Simpson: To ask the Secretary of State for Transport how many people are employed within the British Transport Police. [50758]

Derek Twigg: The number of people employed within the British Transport Police as at 8 February 2006 is 4,133. This figure includes police officers and civilian staff. This has increased from 3,757 in 2004–05.

Alan Simpson: To ask the Secretary of State for Transport what the total operating budget was of the British Transport Police in the last year for which figures are available. [50759]

Derek Twigg: The total operating budget for the British Transport Police from 1 April 2005 to 31 March 2006 is £200,861,000.

Crossrail

Andrew Rosindell: To ask the Secretary of State for Transport what criteria were used in making the decision not to include an underground siding for Crossrail trains; and if he will make a statement. [55275]

Derek Twigg: The engineering of sidings within the central underground section of the proposed Crossrail route would be very difficult and costly, given the need to negotiate the piled foundations of buildings and changing gradients between stations. In operational terms the addition of sidings would not significantly

improve existing reversing capability or the process for removing a failed train from the tunnel. The inclusion of sidings in the central section is therefore unlikely to deliver good value for money for the taxpayer and farepayer.

Cycling

Mr. Stewart Jackson: To ask the Secretary of State for Transport what progress has been made on the Government's target outlined in the 10-Year Transport Plan to triple the number of cycling trips by 2010; and if he will make a statement. [54910]

Derek Twigg: In the July 2004 White Paper "The Future of Transport" we announced that we were moving away from the "one size fits all" national target and would instead be encouraging local authorities to include sharper and more focussed targets within their local transport plans. These plans are due for submission by 31 March 2006.

We are working closely with our advisory body, Cycling England, to increase participation in cycling through initiatives to improve the physical environment, raise standards of training, and improve safety.

Mr. Stewart Jackson: To ask the Secretary of State for Transport what strategies he is pursuing to increase cycling in Peterborough; and if he will make a statement. [54911]

Derek Twigg: Local authorities are responsible for developing their own cycling strategies as part of the Local Transport Plan (LTP) process. New LTPs covering the period from 2006–11 are currently being finalised by highway authorities and are due to be submitted to the Department for Transport by the end of this month.

In 2004 Peterborough was picked as one of the Department's "sustainable travel demonstration towns". An additional £3.24 million is being invested in the city over five years on measures to encourage more sustainable travel behaviour in the city. This includes an intensive programme of measures to promote cycling.

Rail Fares

Mr. Jenkin: To ask the Secretary of State for Transport what estimate he has made of the average increase in rail fares for each financial year between 2005–06 and 2012–13; and what is the total estimated increase over that period. [52066]

Derek Twigg: The average increase in rail fares is monitored annually by the Office of Rail Regulation. Future fares levels are not known and cannot be estimated.

Rail Safety (Hampshire)

Mr. Hancock: To ask the Secretary of State for Transport pursuant to his answer of 13 February 2006, *Official Report*, column 1500W, on Rail Safety (Hampshire), if he will provide the names and addresses of the organisations which hold this information. [53590]

Derek Twigg: Network Rail holds the data for those level crossings in Hampshire for which they are the statutory undertaker. Their address is 40 Melton Street, London, NW1 2EE.

Other crossing operators holding records of level crossings for Hampshire may include:

Mid Hants Railway plc (The Watercress Line), The Railway Station, Alresford, Hampshire, SO24 9JG.

Port Director, ABP Southampton, Ocean Gate, Atlantic Way, Southampton, SO14 3QN.

Marine Terminal Manager, Esso Petroleum Ltd. Esso Refinery, Fawley, SO45 1TX.

Business Manager, EWS Railway Ltd. Infrastructure Services, Lakeside Business Park, Carolina Way, Doncaster DN4 5PN

Alstom Wessex Train Services, Eastleigh Works, Campbell Road, Eastleigh, SO50 5ZB.

Chief Executive's Office, HO DSDA, Defence Rail Agency (Marchwood and Ludgershall), Ploughley Road, Lower Arncott, Bicester, Oxon, OX25 2LD

TREASURY

British Exports (Europe)

Mr. Holloway: To ask the Chancellor of the Exchequer what the total value was of British exports to *(a)* the Eurozone area, *(b)* the pre-enlargement 15 EU member states and *(c)* the post-enlargement 25 EU member states in (i) 2005 and (ii) each quarter of 2005. [54956]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Karen Dunnell, dated 3 March 2006:

As National Statistician, I have been asked to reply to your recent question asking for the total value of British exports to *(a)* the Eurozone area, *(b)* the pre-enlargement 15 EU member states and *(c)* the post-enlargement 25 EU member states in (i) 2005 and (ii) each quarter of 2005. (54956)

The attached table shows exports on a Balance of Payments basis in £ million for goods and services for those quarters for which data are available. They are consistent with the UK Trade First Release published on 9 February 2006 and on the National Statistics website at: http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=1119

£ million

	Exports of goods			*Exports of services*		
	Eurozone area	*EU15*	*EU25*	*Eurozone area*	*EU15*	*EU25*
2005	106,936	113,706	118,497	[1]—	[1]—	[1]—
Q1	25,938	27,617	28,742	8,905	9,875	10,383
Q2	26,282	27,953	29,143	8,624	9,571	10,056

Q4	27,634	29,363	30,615	[1]—	[1]—	[1]—

[1] Not available.

Child Trust Fund

Mr. Hoyle: To ask the Chancellor of the Exchequer pursuant to the answer of 16 February 2006, *Official Report*, column 2416W, on child trust fund accounts, what estimate was made of the cost of providing the information; and whether he contacted Lancashire county council to obtain the figures. [54760]

Mr. Ivan Lewis: When I answered the hon. Member's earlier question I was advised that the cost of providing figures for Child Trust Fund accounts opened by HMRC for children looked after by Lancashire county council would have greatly exceeded the disproportionate cost threshold. Lancashire county council were not approached for this information as it was believed that they would not know how many Child Trust Fund accounts HMRC had opened for the children being looked after by them.

It has subsequently come to light that it is possible to obtain this information. I now understand that by 20 February 2006, HM Revenue and Customs had opened 165 accounts for children looked after by Lancashire county council. I very much regret that it was not possible to provide this information in reply to the hon. Member's earlier question. Details of the total number of Child Trust Fund accounts opened by HMRC for all looked after children will be published along with other annual Child Trust Fund statistics later this year.

Civil Service Relocation

Mr. Stewart Jackson: To ask the Chancellor of the Exchequer when he plans to review the relocation of Civil Service jobs from the South East of England; whether he plans to meet representatives from local authorities in the East of England to discuss this matter; and if he will make a statement. [54914]

Mr. Des Browne: The Government has accepted the recommendations of Sir Michael Lyons' Independent Review of Public Sector Relocation in 2004, and reflected these in the target to relocate 20,000 civil service posts out of London and the south east by 2010. Pre-Budget report 2005 reported that over 6,300 posts have already been moved out of London and the south east. Progress will continue to be closely monitored but the Government have no current plans to undertake a further review of civil service relocation.

Local Authority Finance

Mr. Maude: To ask the Chancellor of the Exchequer what the *(a)* gross domestic product and *(b)* GVA per capita was for each local authority area in (i) Kent, (ii) Surrey and (iii) Sussex in each of the last eight years; and what the equivalent average figures were for England in the same period. [55189]

Mr. Des Browne: The ONS does not produce gross domestic product data for local authorities. It does produce gross value added figures for counties and unitary authorities.

The following tables show the latest total gross value added and gross value added per capita data for the unitary authorities in Kent, Surrey and Sussex for years 1996 to 2003. Further information is available on the ONS website at the following web address: http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=7359

Headline[1] gross value added (GVA)[2] per head by NUTS3 area at current basic prices 1996 to 2003

National Insurance

Mr. Keetch: To ask the Chancellor of the Exchequer (1) when he was informed that national insurance contributions records were not up-to-date; [52677]

(2) whether a deadline has been set for the Inland Revenue to have all records of national insurance contributions recorded up-to-date. [52678]

Dawn Primarolo: HM Revenue and Customs has public service agreements targets to process 97.5 per cent. of returns by 31 December and 98 per cent. by 31 March. While the majority of records are up to date, the Department reported in November to Ministers that they had expectations of a missed 31 December target. And they have continued to provide progress reports thereafter. They have also kept employers and representative bodies informed of progress.

Nominal Business Investment

Mr. Holloway: To ask the Chancellor of the Exchequer what the level of nominal business investment was in each *(a)* year and *(b)* quarter since 1997. [54960]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Karen Dunnell, dated 3 March 2006:

As National Statistician, I have been asked to reply to your recent Parliamentary Question on the level of nominal business investment since 1997. (54960)

The information is shown in the attached tables. More information about business investment is available in the First Release, available on the National Statistics website at:

Northern Ireland (Public Expenditure)

Chris Ruane: To ask the Chancellor of the Exchequer what the level of public expenditure in Northern Ireland was in each of the past 30 years at today's prices; and how much was raised through taxation in Northern Ireland in each year. [55565]

Mr. Des Browne: Table 8.1 of the Treasury publication Public Expenditure Statistical Analyses 2005 (Cm 6521) details total identifiable expenditure by country and region for the years 1999–2000 to 2004–05. Information relating to earlier years can be obtained from previous editions of PESA.

The Treasury does not produce estimates of the total amount of taxes raised by region or country.

Office for National Statistics

Mr. Holloway: To ask the Chancellor of the Exchequer when he last discussed with the Office for National Statistics the operation of its website; and if he will make a statement. [54955]

John Healey: I discuss a wide range of issues with the National Statistician and her staff. As was the case with previous Administrations, it is not the Government's practice to provide details of all such meetings between Ministers and their officials.

Oil Prices

Mr. Holloway: To ask the Chancellor of the Exchequer which measures he uses for oil prices in making forecasts for the UK economy; and what the average price of oil has been according to that measure in each *(a)* month, *(b)* quarter and *(c)* year since 1997. [54957]

John Healey: The measure of the oil price used in Treasury forecasts is the Brent crude price. Brent crude dollar prices since 1997 are given in the following table.

Productivity Growth

Mr. Holloway: To ask the Chancellor of the Exchequer what productivity growth was in *(a)* output per worker and *(b)* output per hour worked in each (i) year and (ii) quarter since 1989. [54961]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Karen Dunnell, dated 3 March 2006:

As National Statistician, I have been asked to reply to your recent Parliamentary Question concerning what productivity growth was in *(a)* output per worker and *(b)* output per hour worked in each (i) year and (ii) quarter since 1989. (54961)

The tables below show the growth of output per worker and output per hour for the UK whole economy for each year from 1989 to 2004. Table A shows the annual growth and Table B the quarterly growth.

Table A: UK whole economy productivity annual growth, 1989 to 2004

	Annual growth rate (per cent.)	
	Output per worker	Output per hour
1989	-0.8	—
1990	0.3	—
1991	2.0	—
1992	3.7	—
1993	3.6	—
1994	3.7	3.0
1995	1.5	1.4
1996	1.7	1.7
1997	1.4	1.4
1998	2.4	2.6
1999	1.7	2.2
2000	2.9	3.8
2001	1.1	1.0
2002	0.9	1.8
2003	1.5	2.0
2004	2.0	2.4

Note:

Output per hour figures start in the second quarter of 1992 and it is therefore not possible to calculate a measure for 1992 or previous.

Table B: UK whole economy productivity quarterly growth, 1989 to 2004

	Per cent. change on previous year		Per cent. change on previous quarter	
Quarter	Output per worker	Output per hour	Output per worker	Output per hour
1989 Q1	-0.5	—	-0.8	—

2005 Q1	0.9	0.6	-0.1	-0.1
2005 Q2	0.6	0.4	0.4	0.7
2005 Q3	0.4	0.0	0.0	-0.3

Note:

Output per hour figures start in the second quarter of 1992 and it is therefore not possible to calculate a measure for 1992 or previous.

Property Tax (Added Value)

Sarah Teather: To ask the Chancellor of the Exchequer when the Government expects to make an announcement in respect of developing a new tax for capturing the uplift in value created by the granting of planning permission and public investment in infrastructure. [54689]

John Healey: The Government's consultation on the proposed Planning-gain Supplement ended on 27 February 2006. Responses to the consultation will be considered carefully and further announcements made in due course.

Public Spending

Mr. Milburn: To ask the Chancellor of the Exchequer what estimate he has made of the level of public spending in *(a)* England, *(b)* Scotland, *(c)* Wales and *(d)* Northern Ireland for future years. [54641]

Mr. Des Browne: The 2004 Spending Review set out spending settlements for Scotland, Wales, Northern Ireland and the UK Government departments up to and including 2007–08. Public spending beyond that period is matter for the 2007 Comprehensive Spending Review.

Mr. Milburn: To ask the Chancellor of the Exchequer what *(a)* the gross domestic product (GDP), *(b)* the level of public spending and *(c)* public spending as a share of GDP was in (i) England, (ii) Scotland, (iii) Wales, (iv) Northern Ireland and (v) each region of England in each year since 1992–93. [54642]

Mr. Des Browne: Information on total identifiable expenditure for each region of England and for Scotland, Wales and Northern Ireland is set out in the HM Treasury publication, "Public Expenditure Statistical Analyses" (PESA) 2005, April 2005 (Cm 6521). This provides outturn data from 1999–2000 to 2003–04. Previous editions of PESA provide outturn data for years prior to 1999–2000. "Public Expenditure Statistical Analyses 1998–99", April 1998 (Cm 3901) provides outturn data from 1992–93.

The Office of National Statistics provides data on Gross Value Added (GVA), the Government's preferred measure of regional economic output, for each region and country of the UK on its website at http://www.statistics.gov.uk/downloads/theme economy/NUTS1_Tables_1–8.xls

Security Industry

Mrs. Dorries: To ask the Chancellor of the Exchequer what assessment he has made of the contribution the security industry makes to the UK economy; and if he will make a statement. [54940]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Karen Dunnell, dated 3 March 2006:

As National Statistician, I have been asked to reply to your recent question asking what contribution the security industry makes to the UK economy. (54940)

There are published statistics for industry Group 74.6 of the Standard Industrial Classification, 2003 which covers both investigation and security activities. The most recent figures available relate to 2004.

The turnover of this sector of the UK economy, which consists of almost 6,000 businesses, was valued at £5.1 billion. Their approximate gross value added to the economy was £3.8 billion.

Survey Data

Mr. Tyrie: To ask the Chancellor of the Exchequer if he will publish the disaggregated micro-data from the *(a)* Labour Force Survey, *(b)* New Earnings Survey and *(c)* Annual Survey of Hours and Earnings. [54736]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Colin Mowl, dated 3 March 2006:

The National Statistician, has been asked to reply to your recent Parliamentary Question asking for the publication of the disaggregated micro-data from the *(a)* Labour Force Survey, *(b)* New Earnings Survey and *(c)* Annual Survey of Hours and Earnings. I am replying in her absence. (54736)

ONS places great importance on maintaining confidentiality of responses to its surveys, to safeguard the trust of data suppliers and so ensure that good quality data continues to be available to users. Whilst the demand for more detailed and better quality data is growing, respondents and society at large are increasingly concerned about confidentiality protection. ONS must be responsive to user needs and concerns and safeguard trust in the ONS and our reputation for quality service. The National Statistics Code of Practice, and its associated protocols is the regulatory framework under which the ONS operates. More detail can be found at: http://www.statistics.gov.uk/about/national_statistics/cop/default.asp.

On the specific surveys you mention;

1. Labour Force Survey (LFS). LFS data is provided voluntarily by private individuals under a guarantee of confidentiality and no statistics can be published that are likely to identify individuals unless specifically agreed with them. Specifically, the Data Protection Act 1998 protects personal data relating to living individuals, and identifiable records are subject to a Common Law duty of confidence.

2. The Annual Survey of Hours and Earnings (ASHE). ASHE, and its predecessor the New Earnings Survey, are carried out under the Statistics of Trade Act 1947. This act prohibits the publication of disaggregated data. The records of individual employees collected in the ASHE survey are personal data and subject to the Data Protection Act and the duty of confidence.

I hope this explains why ONS are not able to publish these disaggregated data in a form which alone, or in combination with any other information reasonably available, could allow for the identification of individuals or the disclosure of information relating to them.

It may interest you to know that anonymised disaggregated data from the LFS is available under license for statistical and research uses only through the UK Data Archive at Essex University.

Unit Wage Costs

Mr. Holloway: To ask the Chancellor of the Exchequer what the change in unit wage costs was in each *(a)* year and *(b)* quarter since 1989. [54958]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Karen Dunnell, dated 3 March 2006:

As National Statistician, I have been asked to reply to your recent Parliamentary Question concerning what the change in unit wage costs was in each *(a)* year *(b)* quarter since 1989. (54958)

The tables below show the growth of unit wage costs for the UK whole economy for each year from 1989 to 2004. Table A shows the annual growth and Table B the quarterly growth.

Table A: UK whole economy unit wage costs annual growth, 1989 to 2004

	Annual growth rate (per cent.)
1989	10.4
1990	9.4
1991	6.4
1992	1.8
1993	0.0
1994	-0.8
1995	1.5

TRADE AND INDUSTRY

Broadband (Milton Keynes)

Mr. Lancaster: To ask the Secretary of State for Trade and Industry what plans he has to ensure that broadband will be available to all new houses built in Milton Keynes. [54870]

Alun Michael: Virtually all the exchanges in the UK have been enabled for broadband, which means 99.7 per cent. of all households have access to broadband.

Building upon the high availability and high demand for broadband, DTI and the Office of the Deputy Prime Minister are working with the industry to develop guidance to ensure that new builds are "broadband ready", thereby minimising disruption at a later stage. We expect the guidance to be ready for publication later this year.

Civil Service (Workforce Reductions)

Mrs. Villiers: To ask the Secretary of State for Trade and Industry what targets he has set for *(a)* UK Trade and Investment and *(b)* the Office of Fair Trading to achieve (i) efficiency savings and (ii) Civil Service workforce reductions. [52811]

Ian Pearson: UK Trade & Investment negotiated efficiency savings targets with the Treasury, as part of its 2004 Spending Review settlement. Under this settlement, these targets are £5.8 million for 2005–06; £18.0 million for 2006–07; and £35 million for 2007–08.

By 31 March 2008, UK Trade & Investment plans to reduce the number of posts in its London and Glasgow headquarters' offices by 200.

Office of Fair Trading agreed to achieve £1.5 million efficiency savings in 2005–06 and £2.5 million in each of 2006–07 and 2007–08.

By 31 March 2008, Office of Fair Trading plans to reduce the number of posts for those activities it carried out at April 2004, by 30.

Construction Industry (Fraud)

Mr. Spellar: To ask the Secretary of State for Trade and Industry what assessment his Department has made of the level of fraud involving use of fake construction skill cards; and what action is being taken to combat such fraud. [54787]

Alun Michael: The Construction Skills Certification Scheme (CSCS) was launched in 1995 by the construction industry to bring different occupational schemes together under one set of standards with one easily recognisable 'badge'. It covers over 220 occupations and currently has approximately 1 million cardholders.

The key aims of the scheme is to set an industry standard for the quality of work onsite, to improve industry health and safety and to encourage construction employers to use competent workers. It provides employers and clients with proof that cardholders have the skills required for their stated occupation and have health and safety awareness. The scheme is owned and managed by CSCS Ltd, a company representing construction employers, trade unions and clients. Government has no responsibility for the scheme and its decision-making. These responsibilities fall within the remit of the CSCS Ltd Board.

The CSCS Ltd and the Construction Industry Training Board have jointly responded to incidents of fraud and called on the industry to help them to police the scheme.

Digital Switchover

Mr. Don Foster: To ask the Secretary of State for Trade and Industry what assessment has been made by *(a)* the Department and *(b)* its non-departmental public bodies of compliance with digital switchover Certification Mark scheme rules; and if he will make a statement. [54652]

Alun Michael: The Department of Trade and Industry developed the digital switchover certification mark scheme in conjunction with key stakeholders, including retailers, manufacturers, broadcasters and consumer bodies. Key industry bodies are aware of the scheme's requirements, which are clearly set out in their licence agreements and on a public website.

As part of a process of monitoring compliance with the terms of the digital switchover certification mark licence agreements, the Department of Trade and Industry commissioned a programme of mystery shopping in early 2005 during the first year of the scheme. This surveyed approximately 10 per cent. of retail licensees across the country. It did not identify any examples of deliberate attempts by retailers to mislead the public, but did show there was room for improvement in the provision of information. Results were used to inform developments for the second year of the scheme. In addition, several retailers and manufacturers have been contacted directly where the certification mark was being used incorrectly. My right hon. Friend the Secretary of State for Trade and Industry has appointed Digital UK, the independent not-for-profit organisation that is coordinating digital switchover, to administer and supervise key aspects of the second year of the scheme. Digital UK is currently developing its own programme of compliance monitoring.

Engineering Industry

Mr. Sarwar: To ask the Secretary of State for Trade and Industry if he will make a statement on support for the British engineering industry. [55003]

Alun Michael: The Government is seeking to provide the right macroeconomic conditions and support to ensure that UK engineering companies can compete successfully in world markets. We are working closely with the Engineering Employers Federation and other key stakeholders to further develop the support we are providing through the Manufacturing Strategy and working with the member of the Manufacturing Forum, which I co-chair with Kevin Smith, Chief Executive of GKN. DTI is also working closely with the Royal Academy of Engineering and other leading science, engineering and technology institutions to support the "Shape the Future" campaign which promotes science, engineering and technology to young people as a career option.

EU Services Directive

John Bercow: To ask the Secretary of State for Trade and Industry what recent discussions he has had with his EU counterparts on the proposed EU directive on services, with particular reference to the country of origin principle. [55500]

Ian Pearson: My right hon. Friend the Secretary of State for Trade and Industry meets regularly with his EU counterparts and has had discussions on the proposed EU Services Directive as well as on other issues. Ministers will discuss the Services Directive during the Competitiveness Council on 13 March, and conversations between DTI Ministers and their counterparts will take place in preparation for that Council.

Independent Retailers

Mr. Hollobone: To ask the Secretary of State for Trade and Industry what assessment he has made of the potential future role of small independent retailers in the economy. [53657]

Alun Michael: DTI considers the role of small independent retailers as a matter of course in its work but has not undertaken a specific piece of work on the future role of small independent retailers as such. The focus of the Department's research has been on the key factors affecting the economic performance of the retail sector as a whole.

When looking at particular regulatory (or deregulatory) proposals we look at the impact on small business or small retailers when relevant as part of that work.

In our analysis of the sector, the role of small retailers does feature. For instance, one of the recommendations of a report that we commissioned to assess the productivity of the retail sector was to look at the development of a small number of efficiency metrics of relevance for smaller retailers. Following this recommendation we consulted with several trade associations and some retailers, and found no consensus over what those benchmarks should be. We also concluded that if there was any value in taking this work forward, it needs to be led by the industry.

In addition the DTI recognises that independent retailers are important to communities so, we ensure that representative bodies of smaller retailers are involved with our key retail fora: Retail Policy Forum (better regulation); Retail Innovation Group (identification and exploitation of good practice); and have been invited to be part of the steering group for the fledgling regional retail strategy that is exploring good practice in working with retail at regional/local level.

Internet Services

John Bercow: To ask the Secretary of State for Trade and Industry what advice his Department issues on internet service providers and the right to privacy of individuals using internet services including search engines. [55485]

Alun Michael: The DTI website provides information on choosing an internet service provider (http://www.dti.gov.uk/industries/information_security/pdfs/Choose_ISP.pdf), and information about the Privacy and Electronic Communications (EC Directive) Regulations 2003 (http://www.dti.gov.uk/industries/ecommunications/directive_on_privacy_electronic_communications_200258ec.html). The Government is a supporter of the Get Safe Online initiative (http://www.getsafeonline.org/). This provides information on how to protect against internet threats, including advice on how to protect privacy online. Our advice on choosing an Internet Service Provider is tailored towards small business, but most points will also apply to individuals. The advice focuses on encouraging people to understand their requirements, and not to just choose on a technical basis. The information we provide about the Privacy and Electronic Communications (EC Directive) Regulations 2003 focuses on the related European Directive and the consultation about and implementation of the regulations. The Information Commissioner's Office provides guidance to organisations and individuals regarding this legislation and the Data Protection Act. Information regarding the rights of individuals under the Data Protection Act and the Privacy and Electronic Communications (EC Directive) Regulations is available from the Information Commissioner's Office website (http://www.ico.gov.uk/).

Poland (Exporters)

Daniel Kawczynski: To ask the Secretary of State for Trade and Industry if he will list the five largest British exporters to Poland in 2004–05. [54601]

Ian Pearson: For reasons of commercial confidentiality, the Department does not publish this type of information about where individual companies operate.

Post Offices

Mrs. Dorries: To ask the Secretary of State for Trade and Industry what steps the Government is taking to prevent the closure of branch post offices; and if he will make a statement. [54849]

Barry Gardiner: In 2003 the Government introduced an annual subsidy of £150 million to help maintain the rural post office network. On 24 February we secured European Commission approval for an extension of the subsidy to 2008. Up to £25 million of the Government's

subsidy package is available to Post Office Ltd to finance pilot activity to test modern, innovative ways of delivering services in rural areas.

The Government's requirement for Post Office Ltd to prevent avoidable sub-post office closures in rural areas currently runs until the end of March 2006 and a further announcement will be made shortly.

Huw Irranca-Davies: To ask the Secretary of State for Trade and Industry what the *(a)* nature, *(b)* duration and *(c)* location is of pilot studies to (i) assist with the long-term viability of post offices and (ii) assess the viability of remote post office branches after the end of the Post Office card account. [54906]

Barry Gardiner *[holding answer 2 March 2006]:* Post Office Ltd. is conducting trials of modern, innovative ways of delivering post office services to rural communities. The trials will operate for 12 months and are focused on a 'Core and Outreach' approach. There are four types of Outreach service being piloted:

Hosted (fixed or portable)—a full service offer by the sub-postmaster/mistress (SPM) or a fully trained employee;

Partner Service—a basic service (e.g. access to cash, bill payment, stamps, weighing and leaving parcels) provided by another retailer alongside their main business, generally a petrol station or pub. The Core SPM maintains a remote overview and provides the site with the products required.

Home Service—a full service is offered via telephone or internet ordering. The SPM then arranges to deliver, in person or by post, the products requested.

Mobile—a full service is offered by a mobile post office visiting a number of locations at set times.

I have asked Post Office Ltd. to publish a report detailing findings on its pilot activity and expect them to do so shortly.

The locations of the 'Core and Outreach' pilots are detailed in the following table.

Location of Post Office Ltd. 'Core and Outreach' pilot activity

Core site	*Outreach site*	*Type of pilot activity*
Castle Douglas (Dumfries and Galloway)	Crocketford	Portable Hosted
	Haugh of Urr	Portable Hosted

	Escombe	Mobile
	Whitton Le Wear	Mobile
	Toronto	Mobile
	Cornsay Colliery	Mobile

Huw Irranca-Davies: To ask the Secretary of State for Trade and Industry whether alternative funding will be put in place to ensure the continuation of Post Office banking in remote communities after the withdrawal of Post Office card accounts. [54907]

Barry Gardiner *[holding answer 2 March 2006]:* I understand that Post Office Ltd. is currently developing new banking and savings products which might be suitable for existing Post Office card account customers, in addition to the 25 or so bank accounts that can already be accessed at post offices. The company is also piloting innovative ways of delivering its products and services to remote communities in a sustainable way. It is too early to speculate on the need for any alternative funding.

Huw Irranca-Davies: To ask the Secretary of State for Trade and Industry how many post offices in Ogmore constituency receive rural support funding. [55389]

Barry Gardiner *[holding answer 1 March 2006]:* The Government's annual £150 million funding is used to underpin the fixed element of sub-postmaster remuneration, known as their 'Assigned Office Payment' and to meet the costs incurred by Post Office Ltd. in supporting the non-commercial part of the rural network, such as IT costs, cash delivery arrangements, training and marketing.

How this funding is used to benefit rural post offices in Ogmore constituency is an operational matter for Post Office Ltd. Alan Cook, the managing director, has been asked to reply direct to the hon. Member.

Mr. Hancock: To ask the Secretary of State for Trade and Industry how many *(a)* Crown post offices and *(b)* sub-post offices there were in each local authority area in Hampshire in (i) 1997, (ii) 2001 and (iii) the latest period for which figures are available; how many he expects there to be by 2010; and if he will make a statement. [55535]

Barry Gardiner: This is an operational matter for Post Office Ltd. Alan Cook, the managing director, has been asked to reply direct to the hon. Member.

Mr. Paterson: To ask the Secretary of State for Trade and Industry whether the European Commission has cleared the payment of subsidies to Post Offices Limited for the forthcoming financial year; and when an application for clearance was made to the Commission. [55599]

Barry Gardiner: The European Commission gave state aid clearance on 24 February to the Government's £300 million support package to the rural post office network for the two years from April 2006 to March 2008. The application for state aid clearance was submitted to the Commission in March 2005.

Privacy and Electronic Communications Regulations

Mr. Amess: To ask the Secretary of State for Trade and Industry, (1) how many *(a)* males and *(b)* females have been (i) prosecuted and (ii) convicted under the Privacy and Electronic Communications (EC Directive) Regulations 2003, (S.I. 2003, No. 2426); and if he will make a statement on the operation of the Regulations; [52410]

(2) how many complaints were made to the Information Commissioner about the enforcement of the Privacy and Electronic Communications (EC Directive) Regulations 2003, (S.I.2003, No. 2426) in the last year for which information is available. [52414]

Alun Michael: Statistics concerning complaints, prosecutions and convictions are a matter for the Information Commissioner, who has responsibility for the operation of the Privacy and Electronic Communications (EC Directive) Regulations.

Mr. Amess: To ask the Secretary of State for Trade and Industry how many *(a)* individuals, *(b)* internet companies, *(c)* companies and *(d)* Government departments responded to his Department's consultation on the EC Directive on Privacy and Electronic Communications; if he will list them; if he will place a copy of each response in the Library; and if he will make a statement. [52415]

Alun Michael: The public consultation on how to implement the Directive on Privacy and Electronic Communications closed on 19 June 2003. More than 420 responses were received. A list of non government respondees, excluding private individuals in order to protect their privacy, has been published on the DTI website which gives details of how to obtain hard copies of any non confidential responses.

Retail Business

Dr. Kumar: To ask the Secretary of State for Trade and Industry how many retail businesses have been closed in each year since 1997. [56127]

Alun Michael: DTI data on the number of retail business[1] closures in the UK from 1997 to 2004, based solely on VAT de-registrations, are shown in the following table.

[1] Standard Industrial Classification 52, retail trade (except of motor vehicles), repair of personal and household goods.

VAT de-registrations 1997–2004

	Number
1997	22,225
1998	22,225
1999	21,645
2000	21,455
2001	20,495
2002	19,785
2003	20,565
2004	20,930

Source:
Business Start-ups and Closures: VAT Registrations and De-registrations 1994–2004, Small Business Service, available at http://www.sbs.gov.uk/vats

VAT registration and de-registration data do not capture all business activity. Businesses are unlikely to be registered if their turnover falls below the compulsory VAT threshold, which has risen each year since 1997. Similarly, businesses that de-register will not necessarily have closed. In the retail sector, 63 per cent. of enterprises (200,000 out of 320,000) were registered for VAT at the start of 2004.

UK Trade and Investment

Mrs. Villiers: To ask the Secretary of State for Trade and Industry how much of the efficiency savings targets for UK Trade and Investment are to be cashable; and under what budget headings these cashable efficiency savings will be re-spent. [52817]

Ian Pearson: UK Trade and Investment's efficiency savings target for the period 2005–06 to 2007–08 is £35 million. £5.8 million is required to be found in the first year for redeployment within the organisation.

The first year savings are being re-deployed to achieve better delivery of UK Trade and Investment services. The component relating to UK Trade and Investment's programme funding (2.1 million) is improving service delivery in the English regions. The component relating to UK Trade and Investment's admin funding from the Department of Trade and Industry (£1.6 million) is enhancing inward investment activities. The remainder (£2.1 million), which relates to admin funding from the Foreign and Commonwealth Office, is strengthening UK Trade and Investment's presence in overseas markets that are priorities for UK businesses.

Unsolicited e-mail

Mr. Amess: To ask the Secretary of State for Trade and Industry (1) what recent representations he has received from *(a)* hon. Members, *(b)* Members of the House of Lords and *(c)* members of the public in favour of legislation to make it a criminal offence to send unsolicited commercial e-mail unless the consent of the recipient has been gained; and if he will make a statement; [52412]

(2) what recent representations he has received from *(a)* hon. Members, *(b)* Members of the House of Lords and *(c)* members of the public about spam e-mails; and if he will make a statement. [52416]

Alun Michael: I receive representations from a variety of sources concerning a wide range of communications issues. Information about these representations is not maintained in the form requested, but there has certainly been a downwards trend in the number of representations since the Privacy and Electronic Communications Regulations (EC Directive) 2003 were introduced on 11 December 2003.

Mr. Amess: To ask the Secretary of State for Trade and Industry (1) what steps his Department *(a)* has taken and *(b)* plans to take to discourage spam e-mails; and if he will make a statement; [52485]

(2) if he will bring forward legislative proposals to make it a criminal offence to send unsolicited commercial e-mail unless the consent of the recipient has been gained; and if he will make a statement; [52411]

(3) what recent discussions *(a)* Ministers and *(b)* officials in his Department have had with (i) Microsoft and (ii) internet providers on restricting spam e-mail; and if he will make a statement; [52417]

(4) what support his Department is providing to the Spamhaus project; and if he will make a statement; [52418]

(5) what information is provided to his Department to members of the public wishing to control the amount of spam e-mail received by them; and if he will make a statement; [52419]

(6) what estimate his Department has made of the number of spam e-mails received in the United Kingdom in each of the last three years; and if he will make a statement; [52420]

(7) what advice his Department offers to members of the public about how to complain about spam e-mails; and if he will make a statement. [52421]

Alun Michael: The Government introduced statutory controls on spam by means of the Privacy and Electronic Communications (EC Directive) Regulations 2003, which entered into force on 11 December 2003. The Regulations provide a first line of defence against spam where the recipient has no knowledge of the advertiser or the products being marketed. The regulations require that unsolicited spam must not be sent to an individual subscriber unless prior permission has been obtained or unless there is a previous relationship between the parties. The regulations can be enforced against an offending company or individual anywhere in the European Union (EU). There is regular contact between my Department, the Department of Constitutional Affairs and the Information Commissioner's Office regarding operation of these regulations.

The Government recognises the source of the problem is often outside our borders and has therefore promoted international co-operation initiatives such as the London Action Plan, and plays a major role in the Organisation for Economic Co-operation and

Development's Anti Spam Task Force, which is the lead intergovernmental organisation dealing with spam. Additionally on 2 July 2004 a Memorandum of Understanding was agreed between the United Kingdom, United States and Australia, which aims to reduce further the problem by committing enforcement authorities, which for the UK is the Information Commissioner's Office and the Office of Fair Trading, to work together to investigate those sending spam.

The end user has a role to play in taking action to avoid being a target for those sending spam, as well as taking action to filter spam. Information has been made available to the public and to business by my Department, the Information Commissioner's Office, the Office of Fair Trading as well as a number of sites provided by service and software providers. These messages have been reinforced by the Get Safe Online initiative that launched on 27 October 2005. This is an initiative between Government and Industry to help individuals and businesses protect themselves against internet threats, including spam. The Government do not measure the amount of spam sent to UK businesses and private citizens.

Officials engage with Microsoft and the Internet Service Providers on a regular basis, in particular as part of the UK based Anti Spam Working Group, which DTI leads. Ministers have not had contact with Microsoft or Internet Service Providers specific to this matter. Spamhaus which is an active and valued member of the Anti Spam Working Group, is an industry-led initiative and does not receive funding from DTI. DTI advises members of the public who wish to complain about spam to contact the Information Commissioner who is responsible for the enforcement of the Regulations. A breach of an enforcement notice is a criminal offence subject to a fine of up to 5000 in a magistrate's court.

Our response to the problem of spam is developing. I have taken careful note of the views of the Information Commissioner's Office on the powers available to him, and Government is actively considering whether to revise the relevant legislation. I shall shortly meet the Information Commissioner to discuss this, while DTI officials will continue a dialogue with Internet Service Providers regarding steps that can be taken to reduce spam. We will also continue our efforts to achieve greater international co-operation.

Mr. Amess: To ask the Secretary of State for Trade and Industry, what *(a)* representations and *(b)* complaints he has received on spam e-mails. [52746]

Alun Michael: I refer the hon. Member to my reply today to his question numbers 52412 and 52416.

Uranium

Norman Baker: To ask the Secretary of State for Trade and Industry if he will list the natural sources of uranium, broken down by country; and what the expected life is of that supply. [52588]

Malcolm Wicks: The Organisation for Economic Co-operation and Development (OECD) Nuclear Energy Agency and the International Atomic Energy Agency has published a report examining uranium production—"Uranium 2003: Resources, Production and Demand"—which includes a list of sources of uranium by country. This list will be placed in the Libraries of the House. Please refer to the report for full reporting methodology.

EDUCATION AND SKILLS

Care Support Services

Ed Balls: To ask the Secretary of State for Education and Skills what the average age of children leaving care was in *(a)* Wakefield district and *(b)* Normanton constituency in (i) 2004 and (ii) 2005. [51944]

Beverley Hughes: Information on the average age of children who ceased to be looked after by Wakefield metropolitan borough council is shown below. This information is not collected centrally at district or constituency level.

Children who ceased to be looked after during the years ending 31 March 2004 to 2005 by average age at end of latest period of care—Wakefield and England

Number

	2003–04	*2004–05*[1]
Wakefield		
All ages—at end of stay (yr:mth)	10:08	10:10
All ages—number who ceased to be looked after[2]	190	170
Age 16 and over—average age at end of stay (yr:mth)	17:03	17:04
Age 16 and over—number who ceased to be looked after[2]	60	50
England		
All ages—average age at end of stay (yr:mth)	10:07	10:09
All ages—number who ceased to be looked after[3]	25,800	25,600
Age 16 and over—average age at end of stay (yr:mth)	17:06	17:06
Age 16 and over—number who ceased to be looked after[3]	6,800	7,500

DfES

Child Care

Mr. Paul Goodman: To ask the Secretary of State for Education and Skills how many child care places have *(a)* opened and *(b)* closed since 2003. [51371]

Beverley Hughes *[holding answer 13 February 2006]:* The numbers of child care places opening and closing since 2003, drawn from Ofsted's registration data, for England are shown in the following table:

	Places opening	*Places closing*	*Net growth*
April 2003–March 2004	238,596	128,350	110,246
April 2004–March 2005	254,126	187,245	66,881
April 2005–September 2005	113,703	73,460	40,243

Employer Training Pilots

Kelvin Hopkins: To ask the Secretary of State for Education and Skills how many of the companies who participated in the employer training pilots in *(a)* 2004–05 and *(b)* 2005–06 employed (i) under 50

staff, (ii) between 50 and 249 staff and (iii) 250 or more staff; and how many were in the (A) public and (B) private sector. [51638]

Phil Hope: The information requested is not held centrally by the Department, but is collected by the Learning and Skills Council (LSC). Mark Haysom has written to my hon. Friend and a copy of his response will be placed in the Library.

Letter from Mark Haysom, dated 1 March 2006:

I am writing in response to your recent parliamentary question which has been referred to me, concerning employer participation in the Employer Training Pilot in 2004–05 and 2005–06.

The Employer Training Pilot supports employers by providing assistance and funding to train lower skilled employees, so they may achieve basic skills and NVQ Level 2 qualifications in a variety of vocational areas. The numbers of participating employers for each calendar year, broken down into each size band, is shown in the following table.

I trust this is helpful.

	Employer size band			
	1 to 49	*50 to 249*	*250 or greater*	*Total*
2004				
Private Sector	5,940	1,476	932	8,348
Public Sector	610	191	291	1,092
Not specified	259	48	32	339
Total	6,809	1,715	1,255	9,779
2005				
Private Sector	6,899	1,782	1,370	10,051
Public Sector	887	231	436	1,554
Not specified	287	64	37	388
Total	8,073	2,077	1,843	11,993

Higher Education (East Lancashire)

Kitty Ussher: To ask the Secretary of State for Education and Skills what assessment she has made of the future higher education needs of East Lancashire; and if she will make a statement. [54653]

Bill Rammell: I recently visited East Lancashire and listened to a progress report from the Higher Education East Lancashire (HEEL) group. Further development of higher education provision in East Lancashire would clearly be welcome, and is consistent with Government policy. Any public funding for this development would come through the Higher Education Funding Council for England (HEFCE), and I understand that the HEEL group is involving HEFCE in its discussions.

Hillingdon Education Authority

John McDonnell: To ask the Secretary of State for Education and Skills what assessment she has made of the additional costs falling upon Hillingdon education authority from Heathrow airport. [47069]

Jacqui Smith: Hillingdon does not receive additional funding specifically because Heathrow airport is in its local education authority area.

Nevertheless, the current revenue funding formula recognises that Hillingdon has well above the average numbers of children from ethnic minority families and has well above the average costs of recruiting and retaining staff. In 2005–06 its SFSS allocation was £3,679 per pupil: the 28th highest allocation in the country. In addition, it was allocated £1,081,611 of Ethnic Minority Achievement Grant.

On capital, we are aware of the problems of aircraft noise in schools near the airport. The Department provides significant capital resources which can be used for noise reduction, where that is a local priority. Hillingdon and its schools are receiving over £50 million across the three years 2005–06 to 2007–08. I also understand that BAA recently set up a voluntary compensation scheme which covers schools affected by airport developments in circumstances where the noise levels are over 63 dBA (16 hours time-averaged level). The total fund made available by BAA amounts to £5 million a year.

Keith Hudson

Mr. Gibb: To ask the Secretary of State for Education and Skills on what date the case of Keith Hudson was referred to her Department for a List 99 determination; and on what date it was decided. [43408]

Ruth Kelly: The case of Keith Hudson was referred to this Department on 1 June 1998 and decided on 24 August 2001.

Student Loans

Jim Cousins: To ask the Secretary of State for Education and Skills what estimate she has made of the student loan book nominal value for outstanding loans for living and fee support *(a)* in (i) 2004–05 and (ii) 2005–06 and *(b)* by 2007–08. [54564]

Bill Rammell: The student loan book nominal value for outstanding loans for maintenance and fee support for England and Wales students at the end of 2004–05 was £13.6 billion and is estimated to be around £16 billion by the end of 2005–06; and around £24 billion by the end of 2007–08.

Mr. Hayes: To ask the Secretary of State for Education and Skills how much was provided by her Department to EU students through student loans in 2004–05. [53118]

Bill Rammell: In the academic year 2004/05, student loans for living costs were not available to EU nationals except in very limited and specific circumstances: European Economic Area migrant workers in the UK; or those who had lived in the UK and Islands throughout the three-year period before the start of their course. These students were also eligible to apply for tuition fee support. We estimate that the number of such students is very small.

In the same academic year, EU nationals studying in the UK were eligible for tuition fee support on the same basis as home students under Article 12 of the EC Treaty which requires that EU nationals are not discriminated against on grounds of nationality with regard to fees. The public contribution to tuition fees for these students studying in England and Wales in academic year 2004/05 was £17.3 million.

William Gibson

Mr. Gibb: To ask the Secretary of State for Education and Skills by whom the case of William Gibson was referred to her Department for a List 99 determination; on what date the case was referred; and on what date the case was decided. [43405]

Ruth Kelly: The case of William Gibson was referred by a supply agency, STC Consortium by telephone call on 14 January 2003. The case was concluded on 31 January 2005.

CULTURE, MEDIA AND SPORT

Digital Switchover

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport what steps her Department has taken to encourage owners of homes in multiple occupancy to prepare for digital switchover; and if she will make a statement. [54651]

James Purnell: Many residents living in flats and other types of multi-occupancy dwellings are already able to access digital television services either through communal aerial systems that are capable of transmitting digital signals or through the use of other antennae. According to a survey carried out in 2004 by NOP World, 59 per cent. of local authority landlords and 47 per cent. of housing association and other registered social landlords had upgraded communal aerial systems for digital reception.

In August 2005 we published "Digital Switchover; A Good Practice Briefing Special" in association with the Chartered Institute of Housing. This describes the implications of digital switchover for private and social sector landlords giving clear, objective advice on the various options available. The Good Practice Briefing has been circulated widely to housing sector professionals by DCMS, the Chartered Institute of Housing, by other housing representative bodies and by Digital UK. An electronic version is available on www.digitaltelevision.gov.uk. A copy of the Good Practice Briefing has been placed in the Library.

The Digital Switchover Programme, led by Digital UK working with Government and Ofcom, has established a dedicated workstream on housing issues. This will make sure the progress in converting communal TV systems is tracked and that the right messages go to private and social landlords and to managing agents and other representatives. It will also be important to make sure that tenants are aware of what is happening, something Digital UK will do this year as part of its wider communications campaigns. The housing workstream will be supported by a dedicated Housing Stakeholder Group drawn from representatives from the private and social housing sectors as well as central and local government.

DEFENCE

Armed Forces

Mr. Lancaster: To ask the Secretary of State for Defence what plans are in place to address the shortfall of medical staff in the armed forces. [54881]

Mr. Touhig: Manning levels in the Defence Medical Services (DMS) vary across different specialities and Services. In some areas we are very well manned, whilst in others we are experiencing shortfalls.

Manning shortfalls are being addressed through a package of remunerative and non-remunerative measures. In terms of remuneration, we aim to ensure that DMS pay is comparable with the NHS. The Ministry of Defence is responsible for preparing papers of evidence on all DMS pay for the Armed Forces Pay Review Body's (AFPRB) consideration. Pay recommendations for Medical and Dental Officers are currently being considered by the AFPRB. Nurses and Allied Health Professionals in the DMS are covered separately by the main Armed Forces 2006 pay uplift of 3 per cent. which will be implemented from 1 April 2006. As recommended by the AFPRB, we are also in the process of examining the scope for changing their pay structures to ensure that military pay remains comparable with the new NHS Agenda for Change pay structure. Pay can only go some way towards addressing manning shortfalls. Non-remunerative measures are equally as important. Examples of non-remunerative initiatives include: the introduction of new pension arrangements which are designed to encourage retention; looking at alternative means of meeting operational commitments (for example, by working closely with allies and partners on operations overseas and by using DMS Civilian Medical and Dental Practitioners and Agency Staff); development of the Ministry of Defence Hospital Unit (MDHU) concept to build a stronger military ethos; and the regular undertaking of Continuous Attitude Surveys to ensure we remain up to date with the concerns of our personnel.

Mr. Harper: To ask the Secretary of State for Defence (1) how many RAF service personnel medically assessed at grade *(a)* P2(A1), *(b)* P2(A2), *(c)* P2 or below (A3), *(d)* P2 or below (A4), *(e)* P3 or below (A5), *(f)* P8 (A5), *(g)* P2(G1), *(h)* P2(G2), *(j)* P3 or below (G3), *(k)* P7(G4), *(l)* P8(G5), *(m)* P2(Z1), *(n)* P3(Z2), *(o)* P3(Z3), *(p)* P3(Z4) and P7(Z5) are deployed in (i) Iraq and (ii) Afghanistan; [52747]

(2) how many Army service personnel medically assessed at grade *(a)* P2(FE), *(b)* P3(LE), *(c)* P3(PP), *(d)* P7(CPND), *(e)* P7(HO), *(f)* P7(HONNI) and *(g)* P7(HO(UK)NNI) are deployed in (i) Iraq and (ii) Afghanistan. [52748]

Mr. Touhig: The information requested is not held centrally.

Cluster Munitions

Mr. Drew: To ask the Secretary of State for Defence if he will ban the use of cluster munitions by UK forces. [55414]

Mr. Ingram: No. Cluster munitions are not unlawful and UK Forces use them strictly in accordance with International Humanitarian Law. They provide a unique capability for use against wide area or dispersed targets.

We will not deny our troops this battle winning capability and thereby place them at greater risk.

Courts Martial

Robert Key: To ask the Secretary of State for Defence how many *(a)* Royal Air Force, *(b)* Royal Navy and *(c)* Army personnel were (i) tried, (ii) found guilty and (iii) acquitted by a court martial in each calendar year between 2000 and 2005. [53477]

Mr. Touhig: The information requested is provided in the tables.

	2000			2001			2002		
	Navy	*Army*	*RAF*	*Navy*	*Army*	*RAF*	*Navy*	*Army*	*RAF*
Number of individuals tried by Court Martial	56	455	72	62	630	91	57	505	50
Number[2] found guilty	32	373	56	43	485	78	44	440	38
Number acquitted	16	82	16	14	145	13	10	65	12

	2003			2004			2005		
	Navy	*Army*	*RAF*	*Navy*	*Army*	*RAF*	*Navy*	*Army*	*RAF*
Number of individuals tried by Court Martial	61	470	62	72	521	43	69[1]	638	85
Number[2] found guilty	51	400	44	48	464	37	49	545	73
Number acquitted	8	70	18	15	57	6	12	93	12

[1] Revised from figure previously reported because five cases re-listed to 2006 and one case dealt with summarily, not by Court Martial.
[2] Includes those where the accused was acquitted on some charges.

Departmental Dwellings

Mike Penning: To ask the Secretary of State for Defence what plans his Department has for the selling-off of empty departmental private dwellings. [54742]

Mr. Touhig: *[holding answer 2 March 2006]:* The bulk of the married quarter estate in England and Wales was sold to Annington Homes Ltd (AHL) in 1996. Arrangements are in place for the Ministry of Defence (MOD) to lease back properties from AHL as required. When there is no MOD requirement, the lease is surrendered to AHL who dispose of it as they see fit.

A copy of MOD's 'Disposals List' which is regularly updated, is available in the Library of the House.

Iraq

Dr. Cable: To ask the Secretary of State for Defence what his most recent estimate is of the average monthly cost of the military operation in Iraq; and if he will make a statement. [55037]

Mr. Ingram: The costs of operations are calculated on a net additional basis and audited figures are published each year in the Ministry of Defence's annual report and accounts. Expenditure varies depending on troop numbers and activities and cannot therefore sensibly be broken down on a monthly basis.

Estimated annual costs for operations in Iraq of 1,098 Million in 2005–06 were included in the Spring Supplementary Estimates published in February. Final figures will be published in the MOD's Annual Report and Accounts for 2005–06 following audit by the National Audit Office.

Joint Strike Fighter

Mr. Holloway: To ask the Secretary of State for Defence what discussions he has had with his US counterpart about the joint strike fighter programme. [54921]

Mr. Ingram: I refer the hon. Member to the answer I gave on 23 January 2006, *Official Report*, column 1714W, to the right hon. Member for Fylde (Mr. Jack).

Military Tattoo

Mr. Jenkins: To ask the Secretary of State for Defence whether he has estimated the cost of putting on an annual military tattoo in London; and if he will make a statement. [53467]

Mr. Touhig: My right hon. Friend the Minister for the Armed Forces announced the discontinuance of the Defence 2000 series of events on 11 May 2004, *Official Report*, columns 223–4W. Since then there have been no plans to hold an annual military tattoo in London and no costings have been made.

Oracle

Mr. Lancaster: To ask the Secretary of State for Defence when the Oracle database will be available to all service personnel. [54883]

Mr. Touhig: The Oracle based Joint Personnel Administration (JPA) programme is expected to be delivered to the RAF as planned in March 2006. The dates for its subsequent roll out to the Royal Navy and then the Army are currently under review to ensure full alignment with the deployment of the Defence Information Infrastructure upon which the JPA system depends.

Parachute Regiment

Mr. Scott: To ask the Secretary of State for Defence (1) what the establishment manpower is of *(a)* officers and *(b)* other ranks in the 3rd Battalion of the Parachute Regiment; [53544]

(2) how many *(a)* officers and *(b)* other ranks there are in the 3rd Battalion of the Parachute Regiment; and how many in each category have completed their training within the last three months. [53617]

Mr. Touhig: The table shows the strength of 3rd Battalion of the Parachute Regiment, broken down by Officers and Soldiers, compared to the Infantry element of the establishment as at 1 January 2006. The table also shows the numbers of Officers and Soldiers who have entered the trained strength during the period 1 October 2005 and 31 December 2005.

Trained Strength of the 3rd Battalion of the Parachute Regiment: As at 1 January 2006

	Officers	*Soldiers*	*Total*
Establishment	35	540	580
Strength	40	480	520
Of which, entered trained strength between 1 October 2005 and 31 December 2005	[1]—	20	20

[1] Indicates a value less than five.

Notes:

1. The figures quoted are as at 1 January 2006 and are for UK Regular Trained Army Officers and Soldiers only and therefore exclude Mobilised Reserves, Full Time Reserve Service and other Reserves.
2. The Establishment figures include only the Infantry posts and exclude attached personnel of other Arms and Services such as chefs, clerks etc.
3. The strength figures do not include personnel from other capbadges that are attached to the battalion. The officer element excludes personnel with the rank of Colonel and above.
4. Officer figures are rounded to the nearest 5. Soldier and total figures are rounded to the nearest 10. Totals have been rounded separately and therefore may not be equal to the sum of their parts.

In addition to those 3rd Battalion of the Parachute Regiment personnel serving with 3rd Battalion there are 65 (excluding Colonels and Above) members of 3rd Battalion posted elsewhere, of these fewer than five had joined the trained strength during the period 1 October 2005 to 31 December 2005.

Royal Air Force

Mr. Lancaster: To ask the Secretary of State for Defence what incentive schemes are operated by the Royal Air Force to encourage pilots to stay in the service. [54884]

Mr. Touhig: Current remuneration measures include a single targeted taxable financial retention incentive, paid to all fast jet and helicopter pilots and some multi-engine pilots in return for a five year return of service beyond the point at which they could leave with an immediate pension award. There is also a Professional Aviator Pay Scale for selected aircrew officers which replaces basic pay and flying pay rates with an enhanced rate of pay that results in higher pension payments in return for prolonged service.

As a separate non-remuneration initiative, the RAF Civilian Airline Recruitment Scheme exists to encourage pilots to remain in the Service until they reach age 38 or complete 16 years service. In return, the scheme assists the transition of those wanting to pursue a second career in the civilian airlines.

Mr. Lancaster: To ask the Secretary of State for Defence what the estimated cost is of training a Royal Air Force pilot, broken down by aircraft type. [54885]

Mr. Touhig: I will write to the hon. Member and place a copy of my letter in the Library of the House.

DEPUTY PRIME MINISTER

Accidental Dwelling Fires

John McDonnell: To ask the Deputy Prime Minister, how many *(a)* accidental dwelling fires started by (i) children aged 0 to 9 years, (ii) youths aged 10 to 17 years, (iii) adults of 18 plus years and (iv) others of unspecified age and *(b)* related casualties there were in (A) 2004 and (B) 2005. [56157]

Jim Fitzpatrick: The table shows the data for financial years 2003–04 and 2004–05 in England. Data for calendar year 2005 are not available yet.

Accidental dwelling fires and related casualties by firestarter group, England, 2003–04 and 2004–05

	2003–04			*2004–05*[1]		
	Fires	*Fatal casualties*	*Nonfatal casualties*	*Fires*	*Fatal casualties*	*Nonfatal casualties*
Total	40,034	283	8,242	38,249	230	7,649
Child (0–9 years)	1,111	14	438	921	8	342
Youth (10-17 years)	1,258	0	246	1,034	0	241
Adult (18 years and over)	26,678	185	6,044	25,634	153	5,556
Other	9,198	24	1,152	8,881	15	1,176
Unknown	1,788	60	362	1,778	54	334

[1] Data for 2005 are provisional.

Fire & Rescue Service FDR1 returns to ODPM.

Defacement Removal Notices

Anne Snelgrove: To ask the Deputy Prime Minister, what plans he has to extend the powers of local authorities to serve defacement removal notices on the owners of commercial property. [54656]

Mr. Bradshaw: I have been asked to reply.

Under section 48 of the Anti-social Behaviour Act 2003 a graffiti removal notice may be served by a local authority in relation to certain types of 'relevant surface'. Section 31, and paragraphs 16–19 of Schedule 4 to, the Clean Neighbourhoods and Environment Act 2005, extend the scope of these notices so that they can also be issued in relation to fly-posting, and are re-named defacement removal notices. Currently the

BEST COPY AVAILBLE

powers are available in 12 local authority pilot areas in relation to graffiti only, but as of April defacement notices for both graffiti and fly-posting will be commenced on a national basis.

There are no plans to extend the types of surface to which the provisions apply. 'Relevant surface' in section 48 applies to street furniture and other structures in or on any public street. It does not, however, apply to private buildings such as shop fronts with a frontage that is adjacent to the street. Additionally, notices can be served in relation to surfaces owned, occupied or controlled by certain types of statutory undertaker (transport operators or providers, not utility companies) and educational institutions, provided that the land is public or the surface is visible from public land or to members of the public using the services of that body.

Fire Service (Buckinghamshire)

Mr. Lancaster: To ask the Deputy Prime Minister how many *(a)* full-time and *(b)* retained firefighters have (i) been employed and (ii) taken early retirement in (A) Milton Keynes and (B) Buckinghamshire Fire Authority in each year since 1996–97. [54900]

Jim Fitzpatrick: Information on the number of firefighters employed in Milton Keynes is not held centrally, and could only be provided at disproportionate cost. However, the number of firefighters in Buckinghamshire Fire and Rescue Authority that have (i) been employed in each year since 1996–97 and (ii) taken ill-health retirement since 1998–99 is presented in the table; Information on ill-health retirement for individual fire and rescue services prior to 1998–99 is not held centrally, and could only be provided at disproportionate cost.

Buckinghamshire Fire and Rescue Service

	Number employed[1]		*Number of ill health retirements*	
	Wholetime	*Retained duty system*	*Wholetime*	*Retained duty system*
1996–97	306	214	[2]—	[2]—
1997–98	301	199	[2]—	[2]—
1998–99	305	197	7	1
1999–00	307	193	3	0
2000–01	292	200	8	1
2001–02	304	190	8	1
2002–03	330	200	6	0
2003–04	352	195	7	0
2004–05[3]	349	184	5	0

[1] The figures provided are a snapshot at 31 March each year

ODPM annual returns

Malicious Vehicle Fires

Mr. Pickles: To ask the Deputy Prime Minister, how many malicious vehicle fires there were in England in each year since 1997. [54542]

Jim Fitzpatrick: The table shows the number of deliberate road vehicle primary fires attended by the fire and rescue service in England since 1997.

	Number of deliberate road vehicle primary fires
1997	35,162
1998	40,090
1999	41,888
2000	58,979
2001	67,158
2002[1]	68,153
2003[1]	61,958
2004	46,660

[1] Including estimates for incidents not recorded during periods of industrial action in 2002 and 2003.
Source:
Fire & Rescue Service FDR1 returns to ODPM.

National Parks

Mr. Pickles: To ask the Deputy Prime Minister, how much National Parks received via *(a)* council tax, *(b)* district and *(c)* county precepts in 2004–05. [54543]

Jim Knight: I have been asked to reply.

The English National Park Authorities and the Broads Authority receive their core funding direct from Defra through the National Park Grant (NPG). For 2005–06 the NPG is £42.13 million in total. The level of NPG has increased by 51 per cent. since 2001–02. National Parks can also receive other Government funding, such as the performance related Planning Delivery Grant from the Office of the Deputy Prime Minister.

Prior to 2004–05, Defra paid 75 per cent. of the NPG directly to the Parks, and routed 25 per cent. via the local authorities. Although the Parks have retained their levying powers they are not currently used.

CONSTITUTIONAL AFFAIRS

1911 Census

Mr. Hancock: To ask the Minister of State, Department for Constitutional Affairs if she will place in the Library the correspondence exchanged in the period June to September 2004 between Susan Healy, Head of Information Policy and Legislation Unit, National Archives, and *(a)* Graham Smith, Deputy Information Commissioner and *(b)* Phil Boyd, Assistant Information Commissioner, on the subject of (i) access to Census records under the Freedom of Information Act 2000 and (ii) 1911 Census records. [56518]

Bridget Prentice: The National Archives will make arrangements to place a copy of the relevant correspondence in the Library. An explanatory note will also be provided.

Criminal Court (Salaried Defenders)

Mr. Heald: To ask the Minister of State, Department for Constitutional Affairs whether PKF prepared a report to inform her policy on salaried defenders for the criminal court; if she will make a statement; and if she will place a copy in the Library. [55435]

Bridget Prentice: PKF has not prepared a report for my Department to inform policy on salaried defenders in the criminal courts.

Lord Carter of Coles, as part of his independent review of legal aid procurement, commissioned PKF to analyse the expenditure, income, efficiency and productivity of the legal professions in delivering legal aid services. Lord Carter will produce his final report later this spring.

Crown Courts

Robert Key: To ask the Minister of State, Department for Constitutional Affairs how many people were *(a)* tried, *(b)* found guilty and *(c)* acquitted by Crown courts in each calendar year between 2000 and 2005. [53479]

Bridget Prentice: Figures relating to the number of defendants *(a)* tried, *(b)* found guilty and *(c)* acquitted in the Crown Court are provided in the following table:

Committals for trial and cases sent for trial: Defendants dealt with

	Tried	*Found guilty (Convicted)*	*Acquitted*
2000	29,439	9,672	19,767
2001	28,848	9,687	19,161
2002	28,853	9,929	18,924
2003	28,534	9,241	19,293
2004	28,727	9,415	19,312
2005	26,938	9,032	17,906

Departmental IT

Mr. Liddell-Grainger: To ask the Minister of State, Department for Constitutional Affairs how many computer projects are being developed by her Department. [55294]

Bridget Prentice: In common with any large organisation, IT based change projects in my Department range in scale from the very small, involving just a small number of new PCs, to those supporting major strategic business developments for the Department. For the strategic group, there have been three change programmes: the Courts and Tribunals Modernisation Programme (CTMP) covering the Crown and County Courts; Libra, covering the Magistrates' Courts; and ARAMIS, covering our Headquarters areas.

Ecovet FM

Mr. Liddell-Grainger: To ask the Minister of State, Department for Constitutional Affairs what the cost was to her Department of employing Ecovet FM in *(a)* 2002–03, *(b)* 2003–04 and *(c)* 2004–05. [55293]

Bridget Prentice: Ecovert FM have not been employed by my department in the financial years 2002–03, 2003–04 and 2004–05. As such there has been no cost to the department.

Electoral Reform

James Duddridge: To ask the Minister of State, Department for Constitutional Affairs what representations she has received since the May 2005 General Election from the Electoral Commission concerning *(a)* voter turnout and *(b)* strategies to reduce voter abstention. [53730]

Bridget Prentice: The Electoral Commission published its report 'Election 2005: turnout how many, who and Why?' Last October. The report provides a comprehensive analysis breakdown of data on turnout at the May 2006 General Election.

The Electoral Commission have not made any representation concerning strategies to reduce voter abstention.

James Duddridge: To ask the Minister of State, Department for Constitutional Affairs what recent assessment she has made of the factors affecting levels of voter turnout; and if she will make a statement. [53732]

Bridget Prentice: The Government are concerned with the level of voter turnout and is taking steps to increase access to registration as the gateway to voting.

James Duddridge: To ask the Minister of State, Department for Constitutional Affairs what representations she has received on the use of electronic methods of counting votes cast in electoral processes; what assessment she has made of such methods; and if she will make a statement. [53888]

Bridget Prentice: In October 2005 the DCA issued a prospectus calling for applications to conduct pilots at the May 2005 elections. Eight local authorities applied to electronically count votes cast in their elections. Lord Falconer approved four applications, which were announced by Written Ministerial Statement to this House on 14 February 2006 with associated explanatory material placed in the House Library.

These applications were approved as they are expected to provide additional learning to pilots of electronic counting conducted in previous years and its use at elections for the Greater London assembly and London Members of the European Parliament in 2004. It is the role of the Electoral Commission to evaluate these pilots and we are working closely with the Commission to ensure that the evaluation process provides useful learning. The Commission's evaluations of previous pilots using e-counting are available on its website and I understand their report on this May's pilots will be due in August 2006.

Jewish Festivals

David T.C. Davies: To ask the Minister of State, Department for Constitutional Affairs what her Department did to *(a)* celebrate Hanukkah and *(b)* mark Yom Kippur in 2005. [46752]

Bridget Prentice: The Department for Constitutional Affairs did not host any specific events to mark Hanukkah or Yom Kippur.

The events were included in the calendar of religious festivals, which are distributed to members of staff at the commencement of every year.

The Department does encourage managers to be flexible in allowing individuals to take annual leave to celebrate religious festivals.

The Department will be circulating a religion and belief toolkit by June 2006 to all members of staff, which will outline the practices and beliefs of the major faith communities in this country.

The first Faith Forum in Whitehall will be launched by this Department on 21 February 2006. The Forum is a corporate body that includes members of staff and members of the judiciary. The objective is to develop a better, shared understanding of how faith relates to daily life, particularly in the workplace. Faiths represented include Christians, Muslims, Jews, Hindus, Sikhs and other faith communities. It is also open to those belonging to no faith but are interested in faith issues.

Legal Aid

Miss McIntosh: To ask the Minister of State, Department for Constitutional Affairs when she expects Lord Carter to report on legal aid procurement. [55204]

Bridget Prentice: Lord Carter of Coles published an interim report on his approach to criminal legal aid procurement on 9 February 2006. His final report on both civil and criminal legal aid procurement is expected later this spring.

Mr. Heald: To ask the Minister of State, Department for Constitutional Affairs whether Frontier Economics prepared a report to inform the Carter Review of Legal Aid; and if she will make a statement. [55436]

Bridget Prentice: Frontier Economics have been working with Lord Carter in his Review of Legal Aid Procurement to help develop proposals for the reform of the legal aid procurement system and to provide advice on the economic impact of Lord Carter's proposed reforms. Lord Carter has not commissioned a formal report from Frontier.

Post Mortem

Mr. Evans: To ask the Minister of State, Department for Constitutional Affairs how many decisions to hold a coroner's post-mortem have resulted in delays to the release of bodies to *(a)* Jewish, *(b)* Muslim and *(c)* Hindu families living in Lancashire such that funerals have not been possible within 24 hours in each of the last five years. [55881]

Bridget Prentice: This information is not available.

Prerogative Powers

Mr. Hollobone: To ask the Minister of State, Department for Constitutional Affairs what plans she has to review the use of prerogative powers. [55962]

Ms Harman: The Government has no such plans.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Abandoned Cars

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs how many cars were abandoned in each government office region in England in each year since 1997. [54552]

Mr. Bradshaw: Estimates for numbers of abandoned vehicles by government office regions and England have been made for years 2000–01 to 2003–04. The results are published in the DEFRA Municipal Waste Management Survey, 2003–4, Annex A, Table 17 and are available from the DEFRA website, link below: http://defraweb/environment/statistics/wastats/mwb0304/wbtables.htm#annxa.Estimates for 2004–05 will be available in the Spring.

Avian Influenza

Mr. Keetch: To ask the Secretary of State for Environment, Food and Rural Affairs what measures are in place to protect the farming industry in Hereford in the event of an outbreak of avian influenza in the UK; and if she will make a statement. [54729]

Mr. Bradshaw: In the event of an outbreak of avian influenza, disease control would focus on the slaughter of infected birds and dangerous contacts, and the imposition of movement controls around infected premises.

Poultry movements would still be permitted under license, depending on risk assessments and the proximity of poultry to infected premises. This approach would allow much of the poultry industry to continue its normal business.

The countryside would not be closed down as we saw during the foot and mouth outbreak. If we had an avian influenza outbreak there would be little need to restrict access to land by closing footpaths or other rights of way.

Our extensive wild bird surveillance programme in the UK has not revealed highly pathogenic avian influenza in any sample collected so far. We are continuing to work with stakeholders to increase vigilance and encourage sensible bio-security measures.

Mr. Lancaster: To ask the Secretary of State for Environment, Food and Rural Affairs which countries have reported cases of the H5N1 strain of avian influenza in the last 12 months. [54871]

Mr. Bradshaw: In the last 12 months the H5N1 virus type has been reported in Austria, Azerbaijan, Bulgaria, Cambodia, China, Croatia, northern Cyprus, Egypt, France, Germany, Greece, Hong Kong, Hungary, India, Indonesia, Iran Italy, Kazakhstan, Kuwait, Malaysia, Mongolia, Niger, Nigeria, Romania, Russia, Slovak Republic, Slovenia, Thailand, Turkey, Ukraine and Vietnam.

In addition the H5 virus type has been reported in Bosnia and Herzegovina, Iraq, and Switzerland.

Mrs. Dorries: To ask the Secretary of State for Environment, Food and Rural Affairs how many requests state veterinary surgeons have received for the vaccination of birds against avian influenza; and if she will make a statement. [55065]

Mr. Bradshaw: This information is not held centrally by the State Veterinary Service.

We believe, however, that swift detection and culling of infected flocks and dangerous contacts, and the introduction of movement controls around infected premises is a more effective and efficient strategy for disease control, should an outbreak of avian influenza occur in this country. The vast majority of poultry stakeholders agree.

Mrs. Dorries: To ask the Secretary of State for Environment, Food and Rural Affairs what steps the Government is taking to protect endangered bird species kept in zoos from avian influenza; and if she will make a statement. [55066]

Mr. Bradshaw: Defra is considering a preventive vaccination programme for zoo birds in the UK for conservation purposes. This will be based on a scientific and veterinary risk assessment. If we decide to implement such a programme, it will require prior approval from the Commission.

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what action the Government plans to take to protect rare breeds amongst UK poultry from avian influenza. [55377]

Mr. Bradshaw: Defra is considering a preventive vaccination programme for rare breeds in the UK for conservation purposes. This will be based on a scientific and veterinary risk assessment. If we decide to implement such a programme, it will require prior approval from the Commission.

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs whether poultry producers producing rare breeds are permitted to vaccinate their poultry. [55379]

Mr. Bradshaw: Vaccines are available to protect poultry against some diseases, for example, Newcastle Disease. But the use of avian influenza vaccines is prohibited by European Union (EU) legislation except in emergency or high risk situations. An avian influenza vaccine would also have to be specifically authorised by the Chief Veterinary Officer.

Of course, we continue to monitor developments on vaccination and to discuss the issue with stakeholders.

Tim Farron: To ask the Secretary of State for Environment, Food and Rural Affairs what advice the Government are giving to poultry farmers in Westmorland and Lonsdale on the possibility of an outbreak of avian influenza. [55385]

Mr. Bradshaw *[holding answer 2 March 2006]:* Defra has distributed guidance materials to a range of industry groups who have helped to distribute information to their members. We have also provided leaflets and posters to farmers and local veterinary surgeons and placed advertisements in poultry hobby magazines. Specific guidance on worker protection has been issued by an industry and cross-departmental working group. Information is also available on the avian influenza pages of the Defra website: http://www.defra.gov.uk/animalh/diseases/notifiable/disease/ai/index.htm.

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to cull poultry from an unregistered flock in the event of an avian influenza outbreak. [55422]

Mr. Bradshaw: In the event of an outbreak of avian influenza in this country, disease control would include culling birds on infected premises, regardless of whether they were registered under the GB Poultry Register.

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what her policy is on the criteria which must be met before a decision is taken to order the vaccination of domestic poultry flocks. [55424]

Mr. Bradshaw: I refer my hon. Friend to the reply given to the hon. Member for Leominster (Bill Wiggin) on 14 February 2006, *Official Report*, column 1807W.

Bovine Tuberculosis

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs for what reasons the implementation of pre-movement testing for bovine tuberculosis has been postponed. [55502]

Mr. Bradshaw: The start of pre-movement testing has been put back to 27 March 2006 so industry has more time to prepare for the measure. Defra is appointing an independent advisor to carry out a rapid survey of veterinary capacity and preparedness to deliver the new requirements for pre-movement testing in order to address concerns raised by the farming industry and veterinary profession. But the policy itself will not be subject to review, as it is widely expected to reduce the risk of spreading TB through cattle movements.

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs if she will publish the results of the work of the Veterinary Laboratories Agency evaluating the use of the gamma interferon test for bovine tuberculosis in cattle. [53874]

Mr. Bradshaw: Defra received, in late 2005, an interim report of the first 150 herds in the field trial from the Veterinary Laboratories Agency (VLA). A copy of the report was given to the Independent Scientific Group on Cattle TB to inform their ongoing work.

The VLA are due to produce a more complete analysis of the results obtained, from all 195 herds recruited in the trial, by the end of March. Once it has decided what publishable material will come out of the analysis, Defra will, in line with standard practice, make the final report freely available.

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs if she will increase the amount of compensation payable for premium cattle which have contracted TB to standard compensation level; and if she will make a statement. [55649]

Mr. Bradshaw: No. The new arrangements for cattle affected by bovine tuberculosis came into force in England on 1 February 2006. In making these changes, the Department's objective is to have in place a system that promotes good industry practice, enhances disease control, addresses the serious (and independently identified) problem of over-compensation, and is fair to both cattle owners and the taxpayer.

Under these arrangements, we believe that all farmers effectively gain because they are being compensated for disease affected animals (whose true worth are salvage value only) using a price based on the value of healthy animals.

As part of Government's ongoing commitment to work in partnership with stakeholders, Defra is setting up a Cattle Compensation Advisory Group involving industry stakeholder representatives. We expect this stakeholder group to help us monitor the new compensation arrangements.

Mr. Steen: To ask the Secretary of State for Environment, Food and Rural Affairs if she will take steps to provide a second TB test for farmers whose cattle have tested positive to the TB reactor test and are prepared to pay for a further test. [55885]

Mr. Bradshaw: No. The current skin test for bovine tuberculosis (TB) is an effective test. It is the accepted standard laid down in both national and international legislation for determining the existence of disease in a cattle herd.

The Tuberculosis (England and Wales) Order 1984 requires cattle failing the tuberculin test, and those considered to have been direct contacts exposed to TB, to be compulsorily slaughtered. And Directive 64/432 requires the slaughter of cattle once they react positively to the bovine TB skin test. There is no automatic provision for a second TB test. However in exceptional circumstances, for example if there is clear evidence that the skin test has not been carried out in accordance with instructions, officials will offer a re-test.

Christmas Cards

Mr. Hands: To ask the Secretary of State for Environment, Food and Rural Affairs if she will estimate the cost to her Department of sending Christmas cards in 2005. [45925]

Jim Knight: The official 2005 Defra Christmas Card was produced at a cost of £4,000: 7,000 cards were produced. Information relating to costs incurred on mailing Christmas cards from across Defra is not held centrally. To retrieve this information would incur disproportionate cost, as this is incurred at a local or individual level.

All expenditure on Christmas cards is made in accordance with normal departmental financial procedures and principles based on those set out in Government Accounting.

Departmental Building (Guildford)

Anne Milton: To ask the Secretary of State for Environment, Food and Rural Affairs when the shuttle bus service proposed to service the departmental building at Merrow, Guildford will commence; whether a car-share co-ordinator has been appointed; and whether departmental staff have initiated a video-conferencing publicity campaign. [52452]

Jim Knight: Defra and IBM have agreed, in principle, to fund a "Park & Ride" type service to ferry commuters working at the Defra Site. We are in discussions with Guildford Borough Council and the preferred Bus Company, to try to identify a convenient location for the off-site parking of vehicles. The date for the commencement of this proposed service is dependent upon the identification of this site.

Rather than appoint a car-share co-ordinator, Defra have evaluated the Surrey Car Share Scheme, promoted by Surrey County Council and are in the process of joining.

Defra and IBM have access to full video conferencing facilities at the Guildford Defra Offices. We have already launched a poster campaign around the Site, to advertise the facilities and to encourage wider participation in this form of meeting communication. It is also intended to publicise the facility on the Guildford pages of the Defra Intranet. This will be an ongoing campaign strategy to re-iterate the benefits of such communication and re-enforce the positive message.

Departmental Recruitment

Mrs. Villiers: To ask the Secretary of State for Environment, Food and Rural Affairs how many job advertisements were placed by her Department *(a)* in total, *(b)* in print newspapers and magazines and *(c)* on a recruitment website in each year since 1997; and at what (i) total and (ii) average cost in each case. [50751]

Jim Knight: Defra was formed in 2001 and the Resource Centre was created in April 2004 centralising recruitment activity within the Department from that date. The information requested is available for the period since April 2004 and is contained in the following table.

	1 April 2004 to 31 December 2004	*2005*	*1 January 2006 to 10 February 2006*	*Overall total since 1 April 2004*
Number of Ads placed	143	223	7	373
Number of ads placed in Newspapers/Magazines	66	85	3	154
Number of ads placed on websites	77	[1]138	4	219
Total Cost of Ads in Newspapers/Magazines (£)	179,008	253,703	8,648	441,359
Total cost of Ads on websites (£)	6,949	3,235	0	10,184
Average cost of Ads in Newspapers/Magazines (£)	2,712.24	2,984.71	2,882.66	2,865.96
Average cost of Ads on Websites (£)	90.24	23.44	0	46.50

[1] This number includes the Civil Service Gateway, Job Centre Website and www.defra.gov.uk all of which are free of charge.

Departmental Staff

Dr. Cable: To ask the Secretary of State for Environment, Food and Rural Affairs how many people were employed by the Rural Payments Agency in each of the last 12 months for which information is available; and how many and what percentage of posts were vacant in each region in each month. [51168]

Jim Knight: The number of people employed in the Rural Payments Agency in each of the last 12 months (as at the 1st of the month) was as follows:

	Number
March 2005	3,606
April 2005	3,545
May 2005	3,475
June 2005	3,403
July 2005	3,440
August 2005	3,146
September 2005	3,087
October 2005	3,053
November 2005	3,114
December 2005	3,122
January 2006	3,095
February 2006	3,133

The number and percentage of posts (for which data are available) that were vacant, and addressed by external recruitment, in each region in each month was as follows:

	Region	*Vacancies*	*Percentage*
March 2005	South East	6	0.17
April 2005	South East	14	0.39
May 2005	South East	20	0.58
	North West	1	0.03
	North East	1	0.03
	South West	1	0.03
June 2005	South East	9	0.26
	North West	2	0.06
	North East	2	0.06
	South West	2	0.06
July 2005	South East	16	0.46
	North West	1	0.03
	North East	1	0.03
	South West	1	0.03
August 2005	South East	19	0.6
	North West	2	0.06
	North East	1	0.03
	South West	2	0.06
September 2005	South East	11	0.36
	North East	137	4.44
October 2005	South East	5	0.16
	North West	100	3.27
November 2005	South East	6	0.19
December 2005	South East	19	0.6
	North West	19	0.6
	North East	19	0.6
	South West	19	0.6
January 2006	South East	12	0.39
	North West	23	0.74
	North East	12	0.39
	South West	12	0.39
February	South East	4	0.13
	North West	20	0.64

Digital Maps

Mr. Graham Stuart: To ask the Secretary of State for Environment, Food and Rural Affairs how many digital maps issued by the Rural Payments Agency have been returned due to error; and if she will make a statement. [54264]

Jim Knight: The Rural Payments Agency (RPA) is responsible for the administration of digital mapping in England. The digital mapping data capture work is being subject to a continuous quality assurance checking process. Just under a third of all land parcels captured or amended are being checked, with 2.2 per cent. of land parcels checked requiring amendment before the map is sent to applicants.

RPA does not assess whether changes requested to maps are due to errors in the data capture or due to further amendments.

Mr. Graham Stuart: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the time taken to receive a digital map from the Rural Payments Agency; and if she will make a statement. [54265]

Jim Knight: Over the past seven months the Rural Payments Agency (RPA) has received well over 100,000 requests to register land or modify existing registrations. That number reflects an increase in demand of over 1000 per cent. over previous levels. Against this level of demand it is not surprising that requests have taken longer to process than had been previously been the case. In view of the unprecedented demand RPA introduced new procedures to reduce the processing timetable. Since the start of 2006 each request has taken on average six weeks to process.

Mr. Graham Stuart: To ask the Secretary of State for Environment, Food and Rural Affairs what the average time taken was for the Rural Payments Agency to send out a digital map in the latest period for which a figure is available. [54266]

Jim Knight: Since 1 January 2006 the average time taken by Rural Payments Agency (RPA) to send a digital map is six weeks, timed from receipt of the request at RPA to the map being mailed.

Fly-tipping

Mr. Randall: To ask the Secretary of State for Environment, Food and Rural Affairs how many incidents of fly-tipping were reported in *(a)* Uxbridge constituency and *(b)* the London borough of Hillingdon in each year since 1997; how many prosecutions were made as a result; and if she will make a statement. [53636]

Mr. Bradshaw: Defra has worked with the Environment Agency to establish Flycapture, the national database of fly-tipping, which has been operational since April 2004. No national data were previously available on illegal waste disposal or fly-tipping.

Flycapture collects data at local authority level only. It is important to note that the data are probably an underestimate and will increase as authorities get better at collecting and reporting the data.

The London borough of Hillingdon reported 2,128 incidents of fly-tipping between April 2004 and March 2005 (an average of 177 per month) and 1,799 between April 2005 and December 2005 (average 200 per month). During the same time periods the Environment Agency investigated 11 and 4 incidents respectively in Hillingdon.

The data submitted for prosecutions are incomplete but show that the London borough of Hillingdon took one prosecution in 2004–05 and six to date in 2005–06. The Environment Agency took two prosecutions in both 2004–05 and so far in 2005–06.

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of trends in the amount of fly-tipping since *(a)* 1997 and *(b)* 2001. [54551]

Mr. Bradshaw: No national data were previously available before Flycapture, the national database for fly-tipping incidents, was launched in April 2004. Data from the first year's Flycapture reports have indicated that local authorities and the Environment Agency dealt with 955,426 incidents of fly-tipping in England and Wales between April 2004 and March 2005.

Gamma Interferon Working Group

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what the terms of reference are for the Gamma Interferon Working Group; and when it is due to report to Ministers. [53875]

Mr. Bradshaw: The terms of reference for the Gamma Interferon Working Group are to consider and plan the use of the gamma interferon test as a policy delivery measure.

Although there is no set date when the group will report to Ministers, it will do so before the wider roll out of the test occurs later this year. In the meantime, Defra continues to facilitate the use of the gamma interferon test in certain prescribed circumstances.

Horse Riding

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs what representations she has received from horse riders and horse riding organisations about access to *(a)* sites of specific interest and *(b)* national nature reserves; and if she will make a statement. [52731]

Jim Knight *[holding answer 27 February 2006]:* We have worked closely with both the British Horse Society (BHS) and the British Horse Industry Confederation on the production of the joint Horse Industry Strategy for England and Wales which was launched in December 2005. The strategy includes a range of proposals on increasing access to off-road riding. During consultation we received a number of representations covering a variety of horse related issues.

English Nature manages most of England's national nature reserves and is also responsible for administering the SSSI regime. It promotes and works to increase access and recreation on NNRs whilst also ensuring the protection of the special interest features of sites. My Department has recently received correspondence relating specifically to horse riding at Saltfleetby National Nature Reserve, to which a reply will be sent shortly.

House of Lords

Mike Penning: To ask the Secretary of State for Environment, Food and Rural Affairs whether any *(a)* employee of her Department, *(b)* person engaged by her Department as a consultant and *(c)* paid adviser to her Department is a member of the House of Lords; and if she will make a statement. [52895]

Jim Knight: There are no records in the Department of any current employee, consultant or paid adviser also being a member of the House of Lords.

Natural Reserve

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs what the basis is of the calculation of the Natural Reserve; and if she will make a statement. [55650]

Jim Knight: National Reserve awards under the Single Payment Scheme (SPS) have been calculated in accordance with the provisions of Article 42 of EU Council Regulation no. 1782/2003 and Articles 18—23a of EU Commission Regulation no.796/2004. Those provisions and details of how member state discretion, where provided for, has been exercised in England, were summarised in section F of the "Single Payment Scheme Handbook and Guidance for England 2005", a copy of which was sent to all SPS applicants in 2005. I am arranging for copies to the placed in the Libraries of the House.

Pension Liabilities

Mr. Philip Hammond: To ask the Secretary of State for Environment, Food and Rural Affairs if she will estimate the net present value of accrued pension liabilities in respect of *(a)* present and *(b)* former employees of her Department and its predecessors. [52113]

Jim Knight: The Principal Civil Service Pension Scheme is an unfunded multi-employer defined benefit scheme and individual departments' pension liabilities are not available. The Cabinet Office: Civil Superannuation Resource Accounts for 2004–05 showed that the total pension liability at 31 March 2005 was £84.1 billion. The value of pension liabilities was assessed as follows:

liabilities for current members still contributing to the scheme—£37 billion

deferred pensions and contingent pensions for dependants in respect of members no longer contributing—£12.7 billion

current pensions for members and contingent pensions for dependants—£34.4 billion

As a result of a change in the discount rate used for calculating pension liabilities with effect from 1 April 2005, the total pension liability at 1 April 2005 increased by £10.6 billion to £94.7 billion.

Single Farm Payment

Mr. Fraser: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the interest which has accumulated

from the funds allocated for single farm payments which have not yet been paid; and what the interest will be used for. [52486]

Jim Knight: Common Agricultural Policy funding is reimbursed by the European Commission two months after the end of the month in which the payments to claimants are made. No funds have therefore been received in respect of payments under the Single Payment Scheme that have not yet been made and no interest has therefore accumulated.

Mr. Fraser: To ask the Secretary of State for Environment, Food and Rural Affairs how many farms to date have received the correct single farm payment from the Rural Payments Agency; and on what date she expects all farmers in England to have received full payment. [52526]

Jim Knight: RPA made the first Single Payment Scheme payments to farmers and growers in England on 20 February. It remains on track to complete the bulk of payments by the end of March 2006.

I expect all payments will be made well within the regulatory payment window which runs until 30 June 2006.

Spending Review (Efficiency Targets)

Mrs. Villiers: To ask the Secretary of State for Environment, Food and Rural Affairs how much is expected to be saved as a result of meeting the Civil Service workforce reductions targets for her Department set out in the 2004 Spending Review; and whether these savings count towards the agreed efficiency target for her Department set out in the Review. [52802]

Jim Knight: Defra has a target to achieve financial efficiencies of £610 million by March 2008, of which more than 60 per cent. are planned to be cash-releasing. Within the same timeframe, Defra will reduce the size of its workforce by 2,400. The financial savings arising from this workforce reduction will count towards the cash-releasing target though it is not possible to confirm the precise level at this stage.

Mrs. Villiers: To ask the Secretary of State for Environment, Food and Rural Affairs how much of the agreed efficiency target for her Department set out in the 2004 Spending Review is to be cashable; and under what budget headings these cashable efficiency savings will be re-spent. [52824]

Jim Knight: Defra has a target to deliver £610 million financial efficiencies by March 2008. Over 60 per cent. of these are planned to be cash-releasing. They arise from two broad areas. First, Defra identified £226 million of cashable savings. These have been recycled to meet (i) requirements under the Department's 5 Year Strategy for which we were unsuccessful in gaining additional funding in SR04, such as some elements of the climate change and sustainable development programmes, and (ii) other priority pressures such as bovine TB and diffuse water pollution.

The second area relates to local authorities, which have a target to deliver at least £149 million cashable savings through improved management of environmental services. Each local authority is free to determine how the resources it releases will be used.

Mrs. Villiers: To ask the Secretary of State for Environment, Food and Rural Affairs what the target level of employment expressed as full-time equivalents is in her Department by April 2008, in order to meet her Department's Civil Service workforce reductions target set out in the 2004 Spending Review. [52843]

Jim Knight: The target level for staff in post in April 2008 for DEFRA and its Executive Agencies (excluding non-departmental public bodies) is 11,250.

Mrs. Villiers: To ask the Secretary of State for Environment, Food and Rural Affairs what total efficiency savings were achieved by her Department in 2004–05; and whether these count towards the agreed efficiency target for her Department set out in the 2004 Spending Review. [52866]

Jim Knight: DEFRA achieved efficiency savings of £114.6 million in 2004–05. Apart from efficiencies of £6.5 million arising from one-off procurement activities, these savings count towards the overall efficiency target of £610 million to be achieved by March 2008.

Mrs. Villiers: To ask the Secretary of State for Environment, Food and Rural Affairs what interim targets she has set for achieving *(a)* the agreed efficiency target for her Department and *(b)* the Civil Service workforce reductions targets for (i) gross reductions in posts, (ii) net reductions in posts and (iii) relocations for her Department, as set out in the 2004 Spending Review; what the baseline figures are against which these interim targets are assessed; on what dates they will take effect; and by what dates these interim targets are intended to be met. [52912]

Jim Knight: DEFRA does not have interim efficiency targets. The Department's efficiency portfolio is made up of a number of programmes and projects that will deliver efficiencies at various times in the 2004 Spending Review period. DEFRA's Efficiency Technical Note, which is available on-line (www.defra.gov.uk/corporate/busplan/efficiencynote-0511.pdf), describes our plans for meeting efficiency targets. We have developed a trajectory based on key milestones from the component parts of the efficiency portfolio and use this to monitor progress towards financial, workforce and relocation targets.

Travelling Circuses

Mr. Hancock: To ask the Secretary of State for Environment, Food and Rural Affairs what representations she has received since 1997 from *(a)* individuals and *(b)* organisations on the welfare of animals in travelling circuses; and when the Department last (i) commissioned and (ii) evaluated research on the welfare of animals in travelling circuses. [54633]

Mr. Bradshaw: The Department has received a range of representations on this issue from both individuals and organisations. We have considered the findings of various research projects, but have not commissioned any directly.

Vandalism

David T.C. Davies: To ask the Secretary of State for Environment, Food and Rural Affairs if she will list the acts of vandalism which have been perpetrated *(a)* inside and *(b)* on the outside of her Department's buildings in the last 12 months. [49506]

Jim Knight: Incidences of vandalism to my Department's buildings across the estate are very rare. Over the last 12 months there have been few, and those that have occurred, have been limited to trivial acts of graffiti or minor vandalism to fixtures and fittings. A list of individual incidents is not recorded centrally.

CABINET OFFICE

Departmental Property

Norman Baker: To ask the Chancellor of the Duchy of Lancaster what properties are held by his Department; and what the *(a)* square footage and *(b)* purpose to which the property is being put is in each case. [55798]

Mr. Jim Murphy: The properties held by the Cabinet Office, their Net Internal Area and the purpose for which the properties are being used are shown in the following table.

Land and property	*Net internal area (m^2)*	*Use*
10–12 Downing Street	3,388	Office/residential accommodation
70 Whitehall	7,895	Office
36 Whitehall	2,031	Office
Admiralty House	1,367	Ministerial residences for non-Cabinet Office Ministers including conference facilities
22/26 Whitehall	8,678	Office
Admiralty Arch	7,383	Office
13–1 5 Scotland Yard	988	Civil Service Club
53 Parliament Street	892	Office
1 Horse Guards Road	323	Office
9 Whitehall	1,522	Office
11 Belgrave Road	2,441	Office/training facilities
2 Little Smith Street	600	Office
35 Great Smith Street	2,925	Office
Stockley House	2,937	Office
7 St James Square	1,202	Office
67 Tufton Street	2,087	Office/recruitment and selection facilities
1 0 Great George Street	2,220	Office
The Hawkhills, York	10,230	Office/residential training facilities
Hannington Radio Station, Hampshire	1,441	Transmission mast and miscellaneous out-buildings
Grosvenor House, Basingstoke	1,695	Office
St. Clements House, Norwich	284	Office
Birchwood Park, Warrington	728	Office
Sunningdale Park, Berkshire	2,385	Office/residential training facilities

Ministers Without Portfolio

Norman Baker: To ask the Chancellor of the Duchy of Lancaster from what date and for what reason it became the practice that Ministers Without Portfolio no longer answer written questions. [55796]

Mr. Jim Murphy: The tabling of written questions is a matter for the House Authorities.

Regulatory Reform

Andrew Miller: To ask the Chancellor of the Duchy of Lancaster if he will place in the Library his initial response to the Regulatory Reform Committee's 1st Special Report of Session 2005–06 [55900]

Mr. Jim Murphy: Copies of the response have been placed in the Library.

Spending Review (Efficiency Targets)

Mrs. Villiers: To ask the Chancellor of the Duchy of Lancaster how much is expected to be saved as a result of meeting the civil service work force reductions targets for his Department set out in the 2004 Spending Review; and whether these savings count towards the agreed efficiency target for his Department set out in the review. [52806]

Mr. Jim Murphy: The expected saving for the Department is £5.65 million.

These savings count towards our agreed efficiency target.

Mrs. Villiers: To ask the Chancellor of the Duchy of Lancaster what the target level of employment expressed as full-time equivalents is in the Cabinet Office by April 2008, in order to meet the Cabinet Office's civil service workforce reductions target set out in the 2004 Spending Review. [52839]

Mr. Jim Murphy: I can confirm that the current target is 1,990.

Mrs. Villiers: To ask the Chancellor of the Duchy of Lancaster what baseline figures he is using for assessing progress on the Cabinet Office's targets to *(a)* rationalise back office functions by continuing work on a shared corporate human resources centre with HM Treasury and the Office of the Deputy Prime Minister, *(b)* review back office systems and costs, *(c)* implement reforms in financial management and information technology and *(d)* improve procurement; what progress has been made towards these targets to date; and what the total efficiency savings achieved to date are for these targets. [52933]

Mr. Jim Murphy: The baseline against which these efficiencies are measured is the outturn expenditure for Cabinet Office for 2003–04 and our workforce headcount figures reported on 1 April 2004.

The Cabinet Office achieved £1.2 million in efficiency savings in 2004–05. The breakdown across categories is shown in the table.

£ millions

Category	*Savings*
Rationalisation of back office functions	0
Review of back office systems and costs	0.6
Financial management and IT reforms	0
Improvements in procurement	0.6

Our Internal Audit Service is calculating an independent review of our progress for 2005–06, but the unaudited figures show us to be ahead of trajectory towards achieving our final 2007–08 target.

Mrs. Villiers: To ask the Chancellor of the Duchy of Lancaster what interim targets he has set for achieving *(a)* the agreed efficiency target for the Cabinet Office and *(b)* the civil service workforce reductions targets for (i) gross reductions in posts, (ii) net reductions in posts and (iii) relocations for the Cabinet Office, as set out in the 2004 Spending Review; what the baseline figures are against which these interim targets are assessed; on what dates they will take effect; and by what dates these interim targets are intended to be met. [52941]

Mr. Jim Murphy: The Efficiency Technical Note published on the Cabinet Office website sets out our current plans for achieving our efficiency target for 2007–08.

A revised Efficiency Technical Note will be published in spring 2006 to reflect our plans for a Cabinet Office that is more strategic and better focused on its core objectives.

FOREIGN AND COMMONWEALTH AFFAIRS

Accidental Deaths

Mr. Sheerman: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list the accidental deaths of UK citizens abroad whose cases were handled by consular staff in 2004–05, broken down by country; and in how many cases individuals were abroad on *(a)* tourist, *(b)* student, *(c)* business and *(d)* immigrant visas. [54715]

Dr. Howells: The following table provides a breakdown by country of the number of British Nationals entered as accidental death cases during 2004–05 on our global assistance database. The total of 387 is lower than the figure of 389 given to my hon. Friend on 14 February 2006, as two duplicate cases were discovered on our database. It is possible that there were a small number of cases not recorded on the database but only recorded locally on paper files. The figure of 387 does not include any Tsunami cases; all 150 of these will be counted in the 2005–06 period due to the extended period of time in establishing this figure. We do not keep a record of the immigration status of these individuals.

COMPASS-NG

Asian Tsunami

Daniel Kawczynski: To ask the Secretary of State for Foreign and Commonwealth Affairs what Government financial help is available following the tsunami disaster to British citizens who are residents of Sri Lanka *(a)* to rebuild their businesses and *(b)* for other purposes. [55150]

Dr. Howells: No financial assistance is available to British citizens resident in Sri Lanka to rebuild their businesses following the tsunami disaster, nor for any other purposes.

The Tsunami Family Assistance Package ceased on 31 January 2006. The one (dual British/Sri Lankan) family resident in Sri Lanka who were entitled to assistance under the Family Assistance Package have not used it. They were informed of their entitlement.

Balata Refugee Camp

Dr. Starkey: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Israeli government concerning its military attacks on the Balata refugee camp in Nablus; what estimate he has made of the number of civilians who have been *(a)* killed and *(b)* injured in the last seven days; and what assessment he has made of the effect of the killings on the continuance of the truce being observed by Hamas. [55144]

Dr. Howells: On 23 February, the Israeli Defence Force (IDF) killed five Palestinians in the West Bank city of Nablus, four of them in the Balata refugee camp. We have no estimate of the number of Palestinians who may have been injured. However, the Israeli non-governmental organisation "Physicians for Human Rights" has protested about the injuring by the IDF of an ambulance man who was attempting to reach casualties during the clashes.

We condemn the recent upsurge in Israeli military activity in the West Bank and Gaza, and our Ambassador in Tel Aviv raised this with the Israeli Foreign Minister, Tzipi Livni, on 30 January. We have made no assessment of the effect of the Israeli military activity on the current truce held by Hamas.

British Overseas Territories

Daniel Kawczynski: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will take steps to allow British overseas territories to veto the choice of governor appointed by the UK Government. [55880]

Mr. Douglas Alexander: The Governor is the official representative of Her Majesty the Queen and therefore it would not be appropriate to give overseas territories the right of veto. Chief Ministers, or their equivalents, are asked for their views on the qualities required of the Governor at an early stage in the appointment process. These are taken into account in the selection and chief Ministers are then notified personally and in confidence of the proposed candidate before the appointment is submitted to Her Majesty the Queen for approval.

British Virgin Islands

Daniel Kawczynski: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will visit the British Virgin Islands to meet their elected representative. [55937]

Mr. Douglas Alexander: Foreign engagements for my right hon. Friend the Foreign Secretary and other Ministers are kept under constant review. It is not our practice to announce such visits until they are firm. Because of the unpredictable nature of world events, final decisions on overseas visits are often not possible until very shortly before the day of travel.

Correspondence

Sarah Teather: To ask the Secretary of State for Foreign and Commonwealth Affairs when he will reply to the letter sent to him by the hon. Member for Brent, East dated 21 November 2005, regarding Mr. Michael Day. [54695]

Dr. Howells: A reply was sent to the hon. Member on 28 February.

Cyprus

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs whether he plans to amend his Department's advice to UK nationals considering purchasing property in Northern Cyprus; and if he will make a statement. [55811]

Mr. Douglas Alexander: We keep all our travel advice under regular review. Our advice for Cyprus was last updated on 30 January. It advises British citizens considering purchasing property in Cyprus to seek independent qualified legal advice and warns of a number of potential practical, financial and legal complications, particularly in buying property in the north. These complications arise principally from the non-recognition of the "Turkish Republic of Northern Cyprus", the possibility of a future political settlement in Cyprus, and claims to ownership from people displaced in 1974. Our travel advice also warns of the risk of legal proceedings in the Republic of Cyprus, as well as attempts to enforce judgments from the courts of the Republic of Cyprus elsewhere in the EU, including the UK.

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Government of Cyprus about the occupied part of the island; and if he will make a statement. [55813]

Mr. Douglas Alexander: My right hon. Friend the Foreign Secretary recently visited Cyprus, Turkey and Greece to evaluate the prospects for progress towards a comprehensive settlement and the reunification of the island. In Cyprus, he met Foreign Minister George Iacovou for a full discussion on all aspects of the Cyprus problem. The UK remains firmly committed to supporting efforts to reach a comprehensive solution. To this end, we also remain committed to ending the isolation of the Turkish Cypriot community. We were delighted that the EU Council of Ministers agreed to provide €139 million to the Turkish Cypriot community on 27 February. These funds will help

narrow the economic gap between the two communities and bring the Turkish Cypriot community closer to the EU.

Mr. Brady: To ask the Secretary of State for Foreign and Commonwealth Affairs what his Department's policy is regarding the deadline of the end of 2006 set by the EU presidency for Turkey to recognise Cyprus. [56066]

Mr. Douglas Alexander: Despite press reports to the contrary over the last week, the EU presidency has not set a deadline for Turkey to recognise the Republic of Cyprus. In 2006, the EU will review Turkey's implementation of the Ankara Agreement Protocol extending the Customs Union to all EU member states, including the Republic of Cyprus. EU leaders, including President Papadopoulos of Cyprus, have said that signing the Ankara Agreement Protocol does not amount to recognition. The EU has, however, made clear that recognition of all member states is a necessary component of the EU accession process.

Diplomatic Passports

Mike Penning: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list those organisations which are not a state for which the United Kingdom recognises a diplomatic passport. [46862]

Dr. Howells: The UK does not recognise any diplomatic passports issued by organisations which are not a state.

Embassies and Consulates

Mr. MacNeil: To ask the Secretary of State for Foreign and Commonwealth Affairs whether an agreement is in place with other EU member states to provide consular assistance to EU nationals. [41423]

Dr. Howells: EU member states consular staff in countries outside the EU provide consular assistance to EU nationals whose own country is not represented, in conformity with article 20 of the Treaty establishing the European Community and the European Council decision of 19 December 1995 regarding protection for citizens of the European Union by diplomatic and consular missions (Decision 95/553/EC, Official Journal L 314, 28/12/1995). The full text is available at: http://europa.eu.int/eur-lex/lex/LexUriServ/LexUriServ.do?uri=CELEX:41995D0553:EM:HTML

Gibraltar

Andrew Mackinlay: To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made in the Royal Gibraltar police's investigation into the complaint that officers of the Gibraltar Services police unlawfully removed papers from the premises of the Transport and General Workers Union in Gibraltar; and if he will make a statement. [56159]

Mr. Douglas Alexander: The Royal Gibraltar police's investigation into this matter, which was conducted lawfully under a waiver issued by the Governor, has been completed and no further action will be taken.

Guantanamo Bay

Sarah Teather: To ask the Secretary of State for Foreign and Commonwealth Affairs how many letters his Department has received about Guantanamo Bay. [55042]

Dr. Howells: Foreign and Commonwealth Office (FCO) Ministers have replied to 259 letters from Members of Parliament, and FCO departments have replied to 1,140 letters from members of the public, about Guantanamo Bay since 1 October 2004. To collate the statistics before that date would involve disproportionate cost.

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the recommendations in the UN Human Rights Commission report on the detention centre at Guantanamo Bay; and what discussions he has had with the US Administration on the recommendations in the report. [55437]

Dr. Howells: We have made it clear that we regard the circumstances under which detainees continue to be held in Guantanamo Bay as unacceptable. My right hon. Friend the Prime Minister has said that Guantanamo Bay is an anomaly that should come to an end sooner rather than later. The US Government is fully aware of our views.

However, it is important to remember the circumstances which led to Guantanamo Bay. Nearly 3,000 people were killed during the terrorist attacks on 11 September 2001. We remain determined to work with our allies to defeat the scourge of international terrorism.

Haiti

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the prospect of free and fair elections in Haiti. [52201]

Mr. Douglas Alexander: The first round of presidential and parliamentary elections took place in Haiti on 7 February. On 16 February, Haiti's Provisional Electoral Council (CEP) declared Rene Preval the winner of the presidential elections with 51.15 per cent. of the vote. The European Union sent an observer mission to monitor the elections. The mission's preliminary declaration reports that polling took place in a calm environment with high voter turnout and that the elections mark a major step forward for Haiti's democratic process. The mission will produce a full report on the election process once the second round of parliamentary elections has taken place on 19 March.

Iran

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to *(a)* the authorities in Iran and *(b)* other bodies regarding the use of the death penalty in Iran. [55341]

Dr. Howells: We have serious concerns regarding the Iranian authorities' use of the death penalty. Figures from international non-governmental organisations indicate that in 2004 only China executed more people.

We receive many reports of executions carried out in public. Growing numbers of juvenile offenders have been sentenced to death, and in some cases executed.

During our presidency of the EU in 2005, we pressed the Iranian authorities on seven occasions on death penalty related concerns. On 26 July 2005, the EU issued a public statement recalling the EU's "long held position that capital punishment may not, in any circumstances, be imposed on persons below 18 years of age at the time of the commission of their crime". Such punishments are in contravention of Iran's obligations under International Convention of Civil and Political Rights and also the Convention of the Rights of the Child. The EU expressed its hope that Iran would adopt a law abolishing all lashings and executions for crimes committed by those under the age of 18. It called on Iran to implement a moratorium until that time.

We have also raised death penalty concerns in other fora. In December 2005, all EU member states co-sponsored a resolution on human rights in Iran at the United Nations General Assembly. The resolution expressed serious concern at "public executions including multiple public executions and, on a large scale, other executions in the absence of respect for internationally recognised safeguards" and deplored "the execution of persons who were below 18 years of age at the time their offence was committed".

Israel

Sir Gerald Kaufman: To ask the Secretary of State for Foreign and Commonwealth Affairs what response he has received to the representations he made to the Israeli Government in November 2005 concerning the anti-semitic harassment of the right hon. Member for Manchester, Gorton, by an Israeli official at Tel-Aviv airport. [55795]

Dr. Howells: My right hon. Friend the Foreign Secretary received a letter from the Israeli ambassador dated 10 January, responding to his letter which raised my right hon. Friend's concerns. The ambassador noted that the letter had been passed to the relevant authorities in Israel to investigate. My officials have since spoken with the Israeli embassy, who have assured us that they will provide a full reply once they have completed their investigation.

Kazakhstan

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of *(a)* reports that the Government of Kazakhstan has operated death squads which have murdered opposition politicians and *(b)* the impact this may have upon the transition to democracy. [55438]

Mr. Douglas Alexander: I was saddened to hear about the murder of Altynbek Sarsenbaiuly on 13 February. The EU made a statement shortly afterwards offering condolences, underlining the need for an immediate, full and transparent investigation into the circumstances of his death, and asking to be kept informed of developments.

Together with our EU partners, we will continue to work to encourage democratic reform in Kazakhstan.

Middle East

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the impact of the Hamas victory in the Palestinian elections on equality and freedom for women. [55433]

Dr. Howells: We have made no specific assessment on what impact Hamas's recent election success will have upon equality and secular freedom for women. Hamas have not yet formed a government and we understand that this may take some time.

Montenegro

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what his policy is on the proposed referendum on whether Montenegro should secede from Serbia. [55344]

Mr. Douglas Alexander: The Government believe that a fully functioning state union is the most effective means of furthering Serbia and Montenegro's progress towards the EU, and to contribute to lasting reconciliation in the region. However, under the terms of the 2003 Constitutional Charter of the State Union of Serbia and Montenegro, either republic can hold a referendum on withdrawal after three years. We respect this provision and we expect both republics to do the same.

If a referendum takes place in Montenegro this year, as is increasingly likely, it should be held according to the terms of the Constitutional Charter and any outcome be transparent, peaceful, consensual and democratic. The UK welcomes the appointment of Miroslav Lajcak as personal representative of the EU High Representative, Javier Solana, to help facilitate dialogue between the Montenegrin Government and the opposition to agree the terms for holding a referendum. Ensuring that the referendum and its preceding campaign meet internationally recognised standards and are free and fair will be vital if the international community is to recognise the outcome of any referendum.

Russia

Mr. Dismore: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Russian Government on the position of Hindus in Russia, with particular reference to Moscow; and if he will make a statement. [55746]

Mr. Douglas Alexander: In the course of their on-going contacts, Ministers and staff at our embassy in Moscow continue to raise human rights issues with the Russian Government. We also raise our concerns during biannual EU/Russia consultations and UK/Russia human rights dialogues. Religious freedom is an important part of the agenda at the next EU/Russia human rights consultation, to be held in Vienna on 3 March. In consultation with the Defend Russian Hindus Campaign, we have provided the Austrian presidency with briefing on this point. We will continue to monitor this and other religious freedom issues in Russia and raise them as appropriate in the cause of our on-going dialogue.

SOLICITOR-GENERAL

Judicial Review (QCs)

Mr. Djanogly: To ask the Solicitor-General what rates a Queen's counsel in the Treasury solicitor's Department are entitled to in judicial review cases. [54997]

The Solicitor-General: There is no standard rate. The Treasury Solicitor negotiates rates designed to achieve value for money on an individual basis for QCs instructed in judicial review cases.

WORK AND PENSIONS

Access to Work Programme

Rosie Cooper: To ask the Secretary of State for Work and Pensions if he will make a statement on changes to the Access to Work programme relating to the provision of qualified interpreters for deaf people; and what assessment he has made of the potential impact that this may have on the employment prospects of disabled people. [53381]

Mrs. McGuire: No changes have been made to the policy on Access to Work.

Benefits

Mr. Graham Stuart: To ask the Secretary of State for Work and Pensions how many young people claimed incapacity benefit in Beverley and Holderness in each year since 1997. [53175]

Mrs. McGuire: The available information is in the table.

Incapacity benefit and severe disablement allowance claimants aged under 25 in the Beverley and Holderness parliamentary constituency at August each year from 1997 to 2005

	Number
August	
1997	200
1998	200
1999	100
2000	200
2001	100
2002	200
2003	200
2004	200
2005	200

Notes:
1. The parliamentary constituency figures for the years 1997 to 1999 have been produced using the 5 per cent. data and have been rated up proportionally using the Great Britain WPLS 100 per cent. IB/SDA totals.
2. Figures are rounded to the nearest hundred.
3. "Claimant" figures include all incapacity benefit (IB) and severe disablement allowance, including IB credits only cases.

Source:
DWP Information Directorate, 5 per cent. Samples from 1997 to 1999 and Work and Pensions Longitudinal Study 100 per cent. data thereafter.

Child Support Agency

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions what the total number of staff employed by the Child Support Agency was in the UK during each of the last 18 months for which figures are available. [54245]

Mr. Plaskitt: The administration of the Child Support Agency is a matter for the chief executive. He will write to the hon. Member with the information requested.

Letter from Stephen Geraghty:

In reply to your recent Parliamentary Question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions what the total number of staff employed ,by the Child Support Agency was in the UK during each of the last 18 months for which figures are available.

The total number of full-time equivalent staff employed by the Child Support Agency in the UK during each of the last 18 months is detailed in the following table.

The figures are based on the new Office of National Statistics (ONS) standard for use in the calculation of all public sector employment statistics.

In line with other public sector organisations, the Department for Work and Pensions has implemented the new ONS definitions from November 2005. Historical data using this definition is now available backdated to February 2004, the baseline for the Department's efficiency challenge. The ONS definition has therefore been used to report the figures in the table below.

Month	*Full-time equivalent staff in post (ONS standard)*
2004	
August	10,465
September	10,299
October	10,125
November	10,080
December	10,041
2005	
January	9,963
February	9,937
March	9,985
April	9,981
May	9,971
June	10,001
July	10,047
August	10,102

I hope you find this information helpful.

Mr. Paul Goodman: To ask the Secretary of State for Work and Pensions how many days training have been provided to staff at the Child Support Agency in each of the last five years; how many are planned to be provided in 2005–06; and if he will make a statement. [30024]

Mr. Plaskitt: The administration of the Child Support Agency is a matter for the chief executive, Mr. Stephen Geraghty. He will write to the hon. Member with the information requested.

BEST COPY AVAILBLE

Letter from Stephen Geraghty:

You asked the Secretary of State for Work and Pensions how many days training have been provided to staff at the Child Support Agency in each of the last five years; how many are planned to be provided in 2005–06; and if he will make a statement.

The Child Support Agency has provided a range of training during the last five years covering technical, management, generic skills and information technology.

The table below provides the information requested. The figures provided relate to classroom training only and do not include training given at the workstation. The figures for 2005/06 include planned training days in addition to training delivered.

	Training days	*Staff trained*
2001–02	108,515	[1]—
2002–03	133,199	13,143
2003–04	78,629	11,366
2004–05	67,687	11,376
2005–06	66,704	5,826

[1] Not available.

The decrease in training for 2005/06 has been caused by a number of reasons including awaiting the agreement of the Operational Implementation Plan, which leads to a new training programme for managers and other staff in the Child Support Agency. We have also seen a move towards blended learning and the use of e-learning with less emphasis on classroom training.

Current planning estimates suggest that 387,228 technical training days will be delivered between March 06 and March 09 to support the recently announced Operational Improvement Plan.

More detailed plans are still being finalised but the training will be for both new entrants and to support existing staff who may take on a different role on implementation of the new organisational design.

I hope you find this response helpful.

Disabled Volunteers

Tom Levitt: To ask the Secretary of State for Work and Pensions if he will extend *(a)* Access to Work measures and *(b)* protection from discrimination to disabled volunteers who are working as part of a work experience or rehabilitation scheme. [47226]

Mrs. McGuire: Access to Work does not provide support to people who are engaged in unpaid voluntary work and there are currently no plans to extent Access to Work in this way.

The first priority of Access to Work is to assist unemployed disabled people into paid employment, thereby helping to remove or reduce their dependence on benefits.

We have asked the Disability Rights Commission to consider producing a voluntary code of practice on volunteering as we do not believe at this stage that it would be appropriate to extend the disability discrimination legislation to cover volunteers. There are likely to be practical difficulties in legislating to cover volunteers because of the diversity in the nature of volunteering and in the relationships between volunteers and the organisations that engage them.

Energy Sector (Industrial Injuries)

Mr. Crabb: To ask the Secretary of State for Work and Pensions how many industrial *(a)* injuries and *(b)* fatalities occurred in UK (i) nuclear, (ii) coal-fired and (iii) gas-fired power stations in each year since 1990. [49215]

Mrs. McGuire: The Health and Safety Executive's (HSE) systems record the number of workplace injuries reported in Great Britain under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1995 (RIDDOR 95). Across the five-year period 2000–01 to the provisional year 2004–05: 756 industrial injuries in Great Britain were reported to HSE that occurred in Standard Industrial Classification (SIC) code 40.11 'Electricity generation'. Of these industrial injuries, six fatal injuries were reported. The table provides yearly breakdowns. Further disaggregation to identify the means of electricity generation (e.g. nuclear, coal/gas-fired) is not possible from centrally held statistics. The information provided covers the planning years 2000–01 to 2004–05 (provisional). Access to older data at the required level of detail is not readily available and would require the restoration of archived databases.

Industrial (a) injuries and (b) fatalities in Standard Industrial Classification (SIC) code 40.11 'Electricity generation' reported to HSE in Great Britain in each year since 2000–01

	Employment status	*Industrial (a) injuries*	*Of which (b) fatalities:*
2000–01	Workers	259	—
	Members of Public	3	—
	Total	262	—
2001–02	Workers	212	4
	Members of Public	3	—
	Total	215	4
2002–03	Workers	133	1
	Members of Public	2	—
	Total	135	1
2003–04	Workers	85	1
	Members of Public	—	—
	Total	85	1
2004–05[1]	Workers	58	—
	Members of Public	1	—
	Total	59	—
Total		756	6

[1] Provisional.

Financial Assistance Scheme

Michael Gove: To ask the Secretary of State for Work and Pensions whether in the case of an interim 60 per cent. payment being made under the Financial Assistance Scheme for a terminally ill member the balance will be paid to the spouse when wind-up is completed. [54603]

Mr. Timms: Any balance will be paid to the member's estate.

Incapacity Benefit

Mr. Ruffley: To ask the Secretary of State for Work and Pensions how many people have had their incapacity benefit stopped in each month during the last three years. [43343]

Mrs. McGuire: The information is not available in the format requested. Termination information is not available broken down on a monthly basis. The quarterly figures for incapacity benefit and severe disablement allowance claim terminations are in the table.

Incapacity benefit (IB) and severe disablement allowance (SDA) terminations in the quarters shown

	Number
1 June 2002 to 31 August 2002	176,300
1 September 2002 to 30 November 2002	185,700
1 December 2002 to 28 February 2003	170,300
1 March 2003 to 31 May 2003	165,900
1 June 2003 to 31 August 2003	183,100
1 September 2003 to 30 November 2003	186,900
1 December 2003 to 29 February 2004	172,800
1 March 2004 to 31 May 2004	174,700
1 June 2004 to 31 August 2004	177,400
1 September 2004 to 30 November 2004	176,200
1 December 2004 to 28 February 2005	179,200
1 March 2005 to 31 May 2005	132,300

Notes:

1. Figures are rounded to the nearest hundred.
2. Terminations figures for the latest quarter do not include any late notifications and are subject to major increases in future quarters.
3. Earlier quarters have been updated to include late notified terminations, including terminations for state pension.
4. "Terminations" includes all terminations, whether initiated by the claimant or DWP; it includes cases where the claimant has died.

DWP Information Directorate 5 per cent. samples.

Sunbeds

Mrs. James: To ask the Secretary of State for Work and Pensions (1) how many inspections local authorities made to *(a)* staffed and *(b)* unstaffed sunbed tanning retail outlets in the last period for which figures are available; and what the average interval between inspections was in that period; [53106]

(2) how many complaints local authorities received about *(a)* staffed and *(b)* unstaffed coin-operated sunbed tanning salons in 2004–05; and what assessment he has made of the nature of the complaints; [53108]

(3) what inspections of sunbed tanning retail outlets local authorities undertake; what form such inspections take; and what period of notice is given by local authorities for such an inspection; [53109]

(4) whether any local authority has taken enforcement action against a sunbed tanning salon since 1995; and if he will make a statement. [53111]

Mrs. McGuire: The Health and Safety Executive (HSE) does not collect local authority (LA) health and safety enforcement data at the level of detail requested.

Although most LAs submit voluntary annual returns on their health and safety enforcement activities through HSE to the Health and Safety Commission (HSC), these are aggregate returns used by HSC to establish, compare and contrast broad levels of health and safety enforcement activity carried out by LAs in line with the Commission's published strategy. The returns, while providing numbers of inspections, complaints and details of enforcement action by LAs, do so only at a broad industry sector level.

Swansea Pension Centre

Mrs. James: To ask the Secretary of State for Work and Pensions what recent assessment has been made of customer service performance at the Swansea Pension Centre. [56017]

Mr. Timms: The most recent data for Swansea are in the following table.

	Target	*January 2006*	*YTD*
Pension credit applications clearance (days)	[1]10	11.91	9.07
State pension claims clearance (percentage)	[1]95	98.89	97.81
Telephone calls answered (percentage)	92	92.3	93.6
Telephone calls blocked (percentage)	[2]1	0.0	0.0

[1] Within 60 days.
[2] Less than.

Unclaimed Benefits

Mr. Byers: To ask the Secretary of State for Work and Pensions (1) what estimate he has made of *(a)* the percentage of those entitled to claim (i) housing benefit, (ii) income support, (iii) council tax benefit and (iv) pension credit who did not do so and *(b)* the amount that went unclaimed in each case in each of the last five years; [56161]

(2) what estimate he has made of the amount and percentage that went unclaimed in respect of income-related benefits in *(a)* 1997–98 and *(b)* the latest year for which information is available. [56162]

Mr. Plaskitt: Estimates for the main income-related benefits—income support/minimum income guarantee, pension credit, housing benefit, council tax benefit and income-based jobseeker's allowance—for eligible private household population in Great Britain, are available in the DWP report entitled "Income Related Benefits Estimates of Take-Up". Copies of the latest publication, which describes patterns in take-up since 1997–98, together with past reports, are available in the Library.

Welfare Reform Green Paper

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions what assessment he has made of the additional IT requirements of his Department to implement the proposals outlined in the Green Paper A New Deal for Welfare: Empowering People to Work; and what his estimate is of the cost to his Department of meeting those requirements. [51961]

Mr. Timms: The publication of the welfare reform Green Paper—A New Deal for Welfare: Empowering People to Work—began the official consultation phase which will run until 21 April 2006. The Department welcomes any feedback or suggestions from interested parties as we look for the best way forward.

We are unable to provide details of IT requirements or their costs until the period of consultation is completed and the final design of the proposals are agreed.

HEALTH

Acinetobacter

Steve Webb: To ask the Secretary of State for Health how many cases of infections with the bacteria acinetobacter there were in the NHS in *(a)* 2004 and *(b)* 2005, broken down by region. [53683]

Jane Kennedy: The Health Protection Agency's (HPA) centre for infections receives reports of "Acinetobacter" species blood stream infections (bacteraemias) that are voluntarily reported by microbiology laboratories in England, Wales and Northern Ireland. These laboratories include national health service microbiology laboratories and private microbiology laboratories.

The number of cases of "Acinetobacter" species bacteraemias reported in England for 2004 and 2005 is shown in the table. Figures for 2005 are expected to rise due to late reporting.

Region	*2004*	*2005*
Eastern England	109	96
East Midlands	76	71
London	166	189
North East	75	70
North West	128	165
South East	92	59
South West	92	107
West Midlands	178	153
Yorkshire and Humberside	117	105
England	1,033	1,015

Health Protection Agency

Agenda for Change

Sarah Teather: To ask the Secretary of State for Health what assessment she has made of the consistency of the outcomes of the Agenda for Change re-grading procedure in NHS trusts. [50549]

Mr. Byrne: The responsibility for performance management of implementation of agenda for change, including consistency of implementation, rests with the relevant strategic health authorities. The NHS Staff Council has overall responsibility for consistency of the agenda for change pay system and has recently agreed guidance to employers on consistency monitoring.

Sarah Teather: To ask the Secretary of State for Health how many and what proportion of decisions on pay under Agenda for Change have been disputed since 1 January 2004, broken down by NHS trust. [50550]

Mr. Byrne: This information is not held centrally, as requests for reviews of banding under agenda for change are dealt with locally. However, reports of progress on assimilation received by the Department so far suggest that the number of reviews at most trusts are modest in relation to the size of the workforce.

Alzheimer's Disease

Mr. Marsden: To ask the Secretary of State for Health (1) what assessment the National Institute for Health and Clinical Excellence has made of the *(a)* efficacy and *(b)* side-effects of drug treatment options that would be prescribed as alternatives for people with Alzheimer's disease in the severe stages of the disease who are currently prescribed Ebixa; [54179]

(2) what assessments have been undertaken by the National Institute for Health and Clinical Excellence of the cost-effectiveness of Alzheimer's disease medication compared to non-drug interventions, including the cost of extra care for patients, as part of its development of recommendations on such medication; [54360]

(3) what assessment she has made of whether appraisal by the National Institute for Health and Clinical Excellence of Alzheimer's disease drugs takes current prescribing practice into account; [54361]

(4) what assessment she has made of the accuracy of the methodologies used to develop the National Institute for Health and Clinical Excellence's recommendations on Alzheimer's disease drug treatment. [54362]

Jane Kennedy: The National Institute for Health and Clinical Excellence's (NICE's) "Appraisal Consultation Document" for the appraisal review of drugs for Alzheimer's disease and accompanying documentation detail the appraisal committee's deliberations and the factors it has taken into account in reaching the position on which NICE has consulted. These documents are available on NICE'S website at www.nice.org.uk.

The Department has responded to the appraisal consultations undertaken by NICE in February 2005 and January 2006 and copies of those responses are available in the Library.

The methods NICE follows for developing its guidance are set out in its "Guide to the Methods of Technology Appraisals". The methods guide are kept under constant review, and NICE aims to consult formally with stakeholder organisations including those representing patients and carers, health care professionals and manufacturers approximately every three years, before issuing an updated version. The latest version of the methods guide was also informed by an independent review by the World Health Organisation and is available on NICE's website at www.nice.org.uk.

Mr. Marsden: To ask the Secretary of State for Health what assessment she has made of whether the National Institute of Health and Clinical Excellence took adequate account of the views of *(a)* people with dementia and *(b)* their carers on the effectiveness of drugs for Alzheimer's disease. [54369]

Jane Kennedy: I understand that the National Institute of Health and Clinical Excellence (NICE) follows a standard process when developing its guidance. This process encourages patient groups to register as stakeholders and to submit written evidence. Patient groups are also asked to nominate experts who can give their expert personal view by attending the initial appraisal committee discussion and/or providing written evidence to the committee. Evidence submitted by patient groups and patient experts is published on the NICE website throughout the guidance development process.

Ambulance Trusts

Mr. Lancaster: To ask the Secretary of State for Health when she expects that the posts of chairmen in the ambulance trusts will be advertised. [53522]

Mr. Byrne *[holding answer 27 February 2006]:* Advertising for the appointment of individuals to a pool of potential chairs of ambulance trusts began on 22 January 2006. If no changes to configuration are made, no appointments will be made and the pool will be disbanded.

Centrally-funded Expenditure

Mr. Lansley: To ask the Secretary of State for Health (1) what total expenditure on centrally funded initiatives, services and special allocations has been in each year since 1997–98; and what anticipated expenditure on centrally funded services and special allocations will be in 2005–06; [46591]

(2) what the total expenditure has been on *(a)* centrally financed initiatives and services and *(b)* special allocations for prevention in each financial year since 1997–98; and what the allocation for each is expected to be in 2005–06. [48459]

Mr. Byrne: Total expenditure, including allocations to national health service bodies, from the centrally funded initiatives services and special allocations programme is shown in table 1.

Table 1: Centrally funded initiatives services and special allocations—total expenditure

	£ million
1997–98	5,495
1998–99	6,598
1999–2000	4,826
2000–01	6,378
2001–02	8,577
2002–03	9,090
2003–04	13,246
2004–05	15,736

In 2005–06, the allocation is expected to be about £4 billion less as a result of primary care trust allocations being enhanced to include items previously included in these special allocations. In addition to the above central programme, the following sums for the HIV prevention special allocation were included in health authority (HA) initial allocations. From 2002–03 these funds were incorporated into HA baselines, which is shown in table 2.

Table 2: HIV prevention special allocation

	£ million
1997–98	52
1998–99	53
1999–2000	53
2000–01	55
2001–02	55

Clinical Practice (Alternative Pricing)

Mr. Lansley: To ask the Secretary of State for Health by what means best clinical practice and quality can be incorporated into a method of alternative pricing as stated in her speech to the NHS Confederation of 10 January 2006, how she envisages such a system of pricing would work in practice; and if she will make a statement. [42933]

Mr. Byrne: We keep the development of payment by results under review and we are considering how best to incentivise good clinical practice.

Community Hospitals

Dr. Murrison: To ask the Secretary of State for Health if she will place in the Library copies of *(a)* all guidance, instructions and requests sent to West Wiltshire primary care trust (PCT) on community hospitals since the publication of the Government White Paper 'Our health, our care, our say' and *(b)* all correspondence relating to community hospitals from the PCT received by the Department since publication of the White Paper. [52732]

Mr. Byrne *[holding answer 27 February 2006]:* No specific guidance, instructions or requests have been issued to primary care trusts (PCTs) on community hospitals since the publication of the Government White Paper, 'Our health, our care, our say'.

No correspondence has been received from West Wiltshire PCT relating to community hospitals since the publication of the White Paper.

On February 16, departmental officials wrote to strategic health authorities and a copy of this letter will be placed in the Library.

Community Practitioners

Helen Jones: To ask the Secretary of State for Health what assessment she has made of the ability of voluntary organisations to provide training, support and professional development for community practitioners, if such groups were to provide health services. [42403]

Mr. Byrne *[holding answer 16 January 2006]:* Voluntary and independent sector organisations have traditionally been involved in providing an invaluable element of care and support in community settings. The standards applying to training and education in the voluntary sector are the same as applying in the national health service. Pre-registration education is the domain of the regulatory bodies who will have a direct interest in quality-assuring it. Other regulatory requirements like re- certification or re-registration will shape the continuing professional development available to individual professionals from their employers.

Counsellors/Psychotherapists

Steve Webb: To ask the Secretary of State for Health what plans she has to consult the voluntary sector in drawing up plans for the regulation of counsellors and psychotherapists. [54096]

Jane Kennedy: As with the introduction of statutory regulation of any aspirant professional group, the Health Act 1999 requires a three-month public consultation before the appropriate legislation for regulation can be laid before Parliament.

Demographics

Mr. Chope: To ask the Secretary of State for Health what assessment her Department has made of the impact of the projected increases in the population of England upon demand and capacity in the national health service. [50790]

Mr. Byrne *[holding answer 13 February 2006]:* When preparing for each spending review, the Department undertakes an assessment of requirements and funding pressures. This would include a consideration of growth in activity, pay and prices, any movement in the costs of prescribing, provisions and the cost of capital. A key element in our assessment is an estimation of the impact of demographic changes, in particular, the impact of population growth on the demand for services.

The revenue allocations for 2006–07 and 2007–08 take account of projected population changes. We have used the best available population data so that the national health service can properly take account of the challenges faced in areas with growing populations.

Departmental Assets

David T.C. Davies: To ask the Secretary of State for Health if she will list the items valued at over £100 that have been reported as stolen from buildings occupied by her Department in the past 12 months. [43435]

Mr. Byrne: The Department does not differentiate between stolen, missing or lost equipment. The losses recorded for the period 1 January 2005 to 31 December 2005, with a value of over £100.00 are shown in the table.

Items lost or stolen (value over £100) for period January 2005—December 2005

Description	*Value (£)*
Toshiba portage laptop	1,444.36

Total	29,936.46

The Department takes the security and protection of its assets very seriously. Its policy and procedures are constantly reviewed. As a further deterrent, all Departmental portable equipment is forensically marked with an invisible dye called Smartwater. This also assists in the recovery of lost or stolen equipment. The Department's security unit continues to raise security awareness among its staff, including the secure handling, transportation and storage of portable equipment.

Domiciliary Oxygen

Sandra Gidley: To ask the Secretary of State for Health (1) how many complaints Ministers in her Department have received about the domiciliary oxygen service since contracts were awarded to regional oxygen supply companies on 1 February; [51682]

(2) how many complaints her Department received about the domiciliary oxygen supply service in the five years to December 2005. [51683]

Jane Kennedy: From 1 February to 15 February, the Department received three letters of complaint about domiciliary oxygen supply. For the earlier period, December 2000 through to December 2005, information on the first two years is not held centrally and for the remaining three years could be provided only at a disproportionate cost.

Early Retirement

Mr. Hollobone: To ask the Secretary of State for Health how many of her Department's employees have taken early retirement in each year since 1997. [34041]

Mr. Byrne: The information requested is shown in the following table:

Number of Department of Health employees who have taken early retirement 1997–98 to 2004–05

	Number of staff
1997–98	30
1998–99	26
1999–2000	15
2000–01	[1]116
2001–02	17
2002–03	[2]120
2003–04	[3]138
2004–05	[4]179

[1] This includes 96 staff who left following the closure of Glenthorne Youth Treatment Centre, Birmingham.

[2] This includes 108 staff who left following the shifting the balance of power reorganisation resulting in the closure of the Department's former regional offices.

[3] This includes 69 staff who left on approved early retirement. This was offered to staff aged 50 and over as a pre-redundancy measure during the Department's change programme and to 54 displaced staff who were affected by the closure of the Department's regional offices.

[4] This includes 169 staff who left on voluntary early retirement/ severance This was offered to displaced staff as a pre-redundancy measure during the Department's change Programme.

Elder Abuse

Sandra Gidley: To ask the Secretary of State for Health (1) what steps her Department is taking to protect older people who receive care in their own homes from elder abuse; [46473]

(2) what steps her Department is taking to minimise the risk of elder abuse in health and social care services. [46474]

Mr. Byrne: To minimise abuse and neglect of older people, the Department has been active in promoting better and more consistent standards of care through the publication and implementation of the national service framework for older people and introduction of the national minimum standards for a range of services, provided to older people in their own homes or in care settings. Employers in regulated social care services have a statutory duty to ensure safety of older people by training staff to prevent service users being harmed or be placed at risk of harm.

For non-regulated services, the statutory guidance "No Secrets" provides a national framework for local councils and partner agencies to use in developing local multi-agency codes of practice to prevent and tackle abuse. The guidance encourages councils to publicise their adult protection procedures so that all older people are aware of how to seek help if needed.

On 7 February, I announced that the General Social Care Council is undertaking a consultation on registering the social care work force. This will allow us to set standards for people seeking social care jobs and to take sanctions against people if they fall below those standards of registration. A well trained and fully registered work force will enable older people, parents and children to have confidence in the people who care for them.

Sandra Gidley: To ask the Secretary of State for Health what steps her Department is taking to facilitate access to independent advocacy for older people vulnerable to abuse. [46552]

Mr. Byrne: Employers in regulated social care have a statutory duty to involve and keep record of service users' relatives and representatives and to take into consideration the national minimum standards, for facilitating access to advocacy services for older people in their care.

The Department has made it clear to local councils and the national health service through the publication of the single assessment process and the national service framework for older people that they should bring in independent advocacy where appropriate.

There has been substantial funding made available by the Department to support the development and expansion of self and citizen advocacy services in learning disability, £1.3 million in the last three years. There is £0.9 million available to advocacy groups until March 2006. Funding for advocacy service providers has also been provided through Section 64 grants for projects. The approximate total amount given to advocacy projects for adults was £420,000 in 2003–04, £268,000 in 2004–05 and £397,000 in 2005.

General Practitioners

Sandra Gidley: To ask the Secretary of State for Health (1) what incentives there will be to extend the opening hours of general practitioner surgeries; [51333]

(2) whether the general practitioner contract will have to be renegotiated to accommodate the proposals in the Health and Social Care White Paper to extend opening hours of general practitioner surgeries. [51334]

Mr. Byrne: The existing primary medical care contracting framework already allows primary care trusts (PCTs) to offer incentives both to new or existing providers to provide opening hours which suit patients' preferences. Following publication of the White Paper "Our Health, Our Care, Our Say" the Department is reviewing these arrangements with the aim of ensuring that more patients can enjoy quick and convenient access to primary medical care. NHS Employers will then be mandated to discuss changes to the general medical services contract for 2007–08 onwards with the British Medical Association's general practitioners committee.

Ben Chapman: To ask the Secretary of State for Health what assessment she has made of patient satisfaction levels with GP out-of-hours services. [52031]

Mr. Byrne: Information on patient satisfaction levels with general practitioner out-of-hours services are not collected centrally. Primary care trusts (PCTs) are responsible for ensuring they provide or secure high quality out-of-hours services for their population. Service providers work to a set of national quality requirements, which include regular audits of patient satisfaction that must be reported to the PCT.

Mr. Randall: To ask the Secretary of State for Health how many full-time equivalent NHS general practitioners have been employed in the Uxbridge constituency in each year since 1997; and if she will make a statement. [46606]

Ms Rosie Winterton: The Department does not hold this information in the format requested. However, the table shows figures for all practitioners employed for the organisations that have served the Uxbridge constituency from 1997 to June 2005.

All practitioners (excluding retainers)[1] for selected organisations, 1997-June 2005—England

Estimated full-time equivalents

		1997	1998	1999	2000	2001	2002	2003	2004	June 2005

n/a = data not applicable

[1] All practitioners (excluding retainers) includes contracted general practitioners, general medical service others, personal medical service others and GP registrars.

Notes:
1. Full-time equivalent (FTE) data has been estimated using the results from the 1992–93 General Medical Practice Workload Survey
For 1994–2003 full-time = 1.00 FTE; three quarter time = 0.69 FTE; job share = 0.65 FTE; and half time = 0.60 FTE
For 2004—All GPs—full-time 1.0 FTE; part time = 0.6 FTE, and therefore may not be fully comparable with previous years.
2. Primary care trusts(PCT)/primary care groups (PCG) did not come into existence until 1 April 2000, prior to this data was only available at health authority (HA) level which does not necessarily compare with present day organisational structure
3. Data as at 1 October 1997–99, 30 September 2000–04 and 30 June 2005
Source:
NHS Health and Social Care Information Centre General and Personal Medical Services Statistics

General Medical Council

Steve Webb: To ask the Secretary of State for Health what assessment she has made of the effectiveness of the General Medical Council's complaints mechanism; and if she will make a statement. [54094]

Jane Kennedy: The Chief Medical Officer is currently undertaking a review of matters relating to medical regulation which will address this issue. A statement will be made shortly.

Health Services (Wakefield)

Mary Creagh: To ask the Secretary of State for Health how much her Department has allocated for drugs for the treatment of Alzheimer's disease and senile dementia in *(a)* Wakefield constituency and *(b)* England in each year from 1997 to 2005. [53410]

Mr. Byrne *[holding answer 27 February 2006]:* This information requested is not held centrally.

Home Oxygen Service

Daniel Kawczynski: To ask the Secretary of State for Health what assessment she has made of the New Home Oxygen Service introduced on 1 February. [53339]

Jane Kennedy: There has been some disruption to the planned six-month programme, which began on 1 February 2006, to support the transfer of patients receiving home oxygen supplies to new suppliers. We have already taken action to get that planned programme back on track and we are continuing to work with the national health service and suppliers to monitor progress. When fully introduced, the new arrangements will provide a modern service to patients with improved access to a wider range of oxygen equipment that can do much to improve their quality of life.

Human Papillomavirus Vaccine

Sandra Gidley: To ask the Secretary of State for Health how many times she has met the manufacturers of the human papillomavirus vaccine, to discuss its introduction, following the submission of the first Marketing Authorisation Application to the European Medicines Agency. [54052]

Jane Kennedy: The manufacturers of the human papillomavirus vaccine has consulted with the Medicines and Healthcare products Regulatory Agency (MHRA) for national scientific advice in 2004 and 2005. European scientific advice, in which the MHRA acted as coordinator, was also provided in 2005. The MHRA has not met with the manufacturers following submission of the marketing authorisation application to the European Medicines Agency.

Independent Sector Provision

Mr. Lansley: To ask the Secretary of State for Health what proportion of *(a)* elective procedures and *(b)* other procedures financed by the public purse she expects to be provided by the independent sector by (i) 2008 and (ii) 2010. [39360]

Mr. Byrne: It is expected that around 10 per cent. of elective procedures and diagnostic scans in the national health service will be carried out by independent sector providers, including second wave independent sector treatment centres by 2008.

Independent Treatment Centres

Helen Jones: To ask the Secretary of State for Health how many NHS staff in each region are on secondment to independent sector treatment centres. [21496]

Mr. Byrne: As of January 2006, 7.1 whole-time equivalent (WTE) doctors and 0.8 WTE nurses are on secondment to independent sector treatment centre projects in the areas shown in the table.

	Split of WTEs seconded	
	Doctors	*Nurses*
North Bradford	5.2	—
Kidderminster	1.6	—
Portsmouth	0.3	8.0
Total	7.1	8.0

Influenza Vaccine

Mr. Amess: To ask the Secretary of State for Health how many and what percentage of the additional 200,000 doses of winter influenza vaccine ordered by her Department went to Southend. [50865]

Caroline Flint: Contingency influenza vaccine is delivered on request. No primary care trust or surgery in the Southend area has requested any of this stock.

The Department wrote to immunisation coordinators on 27 January reminding them that this vaccine was available to order and how to order it.

In-patient Televisions (Subtitles)

Rosie Cooper: To ask the Secretary of State for Health (1) if she will make it her policy that no new in-patient television systems should be installed without the facility to offer subtitles; [53400]

(2) when she expects all hospitals to be able to provide subtitles on pay-to-view televisions; [53401]

(3) which hospitals provide pay-to-view patient televisions on which subtitles are *(a)* available and *(b)* unavailable. [53402]

Jane Kennedy: There are now over 77,000 bedside televisions installed at over 155 national health service hospitals. The majority of these have the capability of providing subtitles, where they are available from the broadcaster, and provide subtitles on some channels.

It is the responsibility of the local NHS trust to decide whether subtitles are provided on its bedside televisions.

Medicines

Steve Webb: To ask the Secretary of State for Health whether the targets are being met for granting marketing authorisations set out in the Medicines and Healthcare products Regulatory Agency business plan for 2005–06 for over-the-counter medicines; and how many application files are open. [53762]

Jane Kennedy: In the published business plan for the Medicines and Healthcare products Regulatory Agency (MHRA) for 2005–06, assessment time targets are given for various types of licensing work, including variations to licences and new licences based on abridged dossiers. Specific targets are not given for over-the-counter medicines because these would be included with the abridged dossier applications.

On the 21 February 2006, there were 2,490 new product licence applications at various stages of assessment of which 356 related to products potentially for over-the-counter supply.

I am aware that the MHRA's performance regarding licence and variation approval times during the last nine months has been affected by a combination of adverse factors including increases in workload, difficulties in recruiting professional assessment staff, especially medically-qualified staff, and transitional implementation problems during the introduction of a new information management system. Though statistics for the full year 2005–06 are not yet available, it is likely that some of the target assessment times given in the plan will not be met.

Steve Webb: To ask the Secretary of State for Health what the *(a)* average and *(b)* longest time for the Medicines and Healthcare products Regulatory Agency to process (i) new, (ii) abridged and (iii) variation applications for marketing authorisations was in the last period for which figures are available. [53763]

Jane Kennedy: The Medicines and Healthcare products Regulatory Agency (MHRA) has published statistics for the processing of product licence applications and variations during the full year 2004–05. The published figures relate to the total time taken from receipt of an application to its determination (grant or refusal) and also for the net time in working days taken by the MHRA. Net times for approval do not include the time taken for the applicant to respond to the MHRA's questions or for correction of the application.

For abridged new licence applications in 2004–05, the gross and net times were 288 days and 122 days respectively. August 2004 had the longest times during 2004–05 for this type of work at 660 days and 180 days respectively.

For licence variations in 2004–05, the net average time taken was approximately 50 days. The longest time taken exceeded 450 days in a small number of cases, including the time taken for the applicant to supply additional or amending information.

For the relatively small number of completely new medicines, for example those containing new drugs and with the potential for meeting unmet medical needs in major diseases, the MHRA during this period has maintained its record of assessing these in under 40 days.

Mr. Todd: To ask the Secretary of State for Health what the *(a)* longest and *(b)* average period the Medicines and Healthcare products Regulatory Agency took to process (i) an abridged application and (ii) a variation was in (A) 2004 and (B) 2005. [53334]

Jane Kennedy: The Medicines and Healthcare products Regulatory Agency (MHRA) has published statistics for the processing of product licence applications and variations for the full years 2003–04 and 2004–05. The published figures relate to the total time taken from receipt of an application to its determination (grant or refusal) and also for the net time in working days taken by the MHRA. Net times for approval do not include the time taken for the applicant to respond to the MHRA's questions or for correction of the application.

For abridged new licence applications in 2003–04 the gross and net average times were 228 days and 113 days, and in 2004–05 were 288 days and 122 days respectively. July 2003 had the longest gross and net times for that year at 370 days and 140 days respectively. Likewise, August 2004 had the longest times during 2004–05 at 660 days and 180 days respectively.

For licence variations in 2003–04 and 2004–05 the net average time taken was approximately 50 days in both years. The longest time taken, exceeded 450 days in a small number of cases, including the time taken for the applicant to supply additional or amending information.

Mr. Todd: To ask the Secretary of State for Health how many *(a)* applications for marketing authorisation for over-the-counter products, *(b)* abridged applications and *(c)* variations were received by the Medicines and Healthcare products Regulatory Agency in each year since 2001. [53335]

Jane Kennedy: The Medicines and Healthcare products Regulatory Agency (MHRA) collects and publishes statistics on numbers of applications and processing times according to its April to March reporting years. The most recent full year for which figures are available is 2004–05.

Marketing authorisation (product licence) applications for over-the-counter (OTC) medicines are almost invariably considered as a type of abridged application and so the figures provided in the table for abridged applications include the numbers of OTC medicine applications. The total numbers of all types of licence variations exceeds 20,000 each year. The figures provided in the table relate only to those variations to the licences OTC medicines.

	2001–02	2002–03	2003–04	2004–05
Abridged dossier product licence applications	1,160	1,244	1,673	1,119
Product licence applications for OTC medicines	161	226	175	122
Variations to OTC product licences	4,102	4,136	4,217	4,661

Ministerial Speech

Mr. Amess: To ask the Secretary of State for Health if she will place on her Department's website a copy of her speech to the annual dinner of Royal Obstetricians and Gynaecologists on 25 November 2005; and if she will make a statement. [34529]

Mr. Byrne: The Secretary of State gave some informal comments to the annual dinner of Royal Obstetricians and Gynaecologists. No formal record was kept of her remarks.

National Health Research Strategy

Steve Webb: To ask the Secretary of State for Health pursuant to the written statement of 25 January 2006, *Official Report*, column 57WS, on the national health research strategy, what the estimated cost is of a national expert advice line providing advice *(a)* 24-hours a day and *(b)* during normal office hours to researchers on interpreting the law relating to medical research. [51911]

Jane Kennedy: The national health research strategy does not include plans to establish a national expert advice line providing advice 24 hours a day. The national advice service is to operate through e-mail and a telephone helpline, backed up by an electronic interface that links it to national regulatory experts. At this stage, subject to further scoping and piloting, it is estimated that the cost of delivering the advice service during normal office hours will be not more than 50,000 a year. Most of it will be found by organising existing resources better.

National Institute for Health and Clinical Excellence

Alison Seabeck: To ask the Secretary of State for Health pursuant to the answer to the hon. Member for Norwich, North (Dr. Gibson) on 10 January 2006, *Official Report*, column 595W, on the National Institute for Health and Clinical Excellence (NICE), when she expects the review of the process for selecting topics for NICE's programme to be completed; and when she expects the consultation document to be published. [52484]

Jane Kennedy: The Department will be undertaking a three month public consultation shortly on the proposed changes to the process for selecting topics for the National Institute for Health and Clinical Excellence's future work programmes.

National Programme for Information Technology

Mr. Lansley: To ask the Secretary of State for Health whether local service provider deployment activity as part of the National Programme for Information Technology is being rescheduled, with particular reference to the software supplier iSoft; and if she will make a statement. [51897]

Mr. Byrne: In the Eastern, North East, and North West and West Midlands cluster areas, where iSoft solutions are being deployed, some 900 sites have had iSoft solutions installed, and these are being used by more than 25,000 users. Some local service provider (LSP) local system deployment activity is being re-scheduled as a result of LSPs and their subcontractors, including iSoft, taking longer than originally anticipated to deliver software solutions.

However, there is no single new deadline. The national programme for information technology is a hugely complex ten-year programme which will see many thousands of further deployments and associated deadlines. Because contracts under the programme are structured so that financing and completion risk rests with the LSPs and their subcontractors, those who deliver get paid; the corollary also applies.

Needlestick Injuries

Mr. Bellingham: To ask the Secretary of State for Health (1) how much compensation has been paid to health care workers arising from needlestick injuries in each year since 1990; and if she will make a statement; [33798]

(2) what recent assessment she has made of the risk to health care workers of needlestick injuries; and if she will make a statement; [33799]

(3) what assessment she has made of the cost of fitting safety devices to needles to reduce the number of injuries suffered by health care workers; and if she will make a statement; [33800]

(4) what recent discussions she has had regarding needlestick injuries suffered by health care workers; [33801]

(5) how many needlestick injuries were suffered by health care workers in each year since 1990; and if she will make a statement. [33802]

Mr. Byrne *[holding answers 30 November 2005]:* Details of compensation payments and the number of needlestick injuries to health care workers are not collected centrally but held by individual employers.

The NHS Pensions Agency administers the NHS injury benefit scheme on behalf of the Secretary of State for Health. The injury benefit scheme is a no-blame income protection scheme designed to provide benefits for national health service employees who suffer loss of earnings or earning ability as a result of an injury, disease or condition caused wholly or mainly by the duties of their NHS employment. The NHS Pensions Agency does not hold statistics on the amount of compensation paid to health care workers for needlestick injuries.

The Health Protection Agency (HPA) carries out surveillance of needlestick injuries and occupational exposure to blood-borne viruses. The most recent report

was published in January 2005 and is available on the HPA's website at: www.hpa.org.uk/infections/topics_az/bbv/s_report.htm

All NHS employers are required to carry out risk assessments, including the risk of needlestick injuries, as part of their duties under the Health and Safety at Work Act 1977 (as amended by the Health and Safety at Work Regulations 1992).

No assessment has been made of the cost of fitting safety devices to needles in the NHS in England. The industry has made great progress over the last two years resulting in no significant difference in unit cost. This allows employers to introduce the safer devices in areas where risk assessment indicates it would be beneficial for the safety of staff and patients. Details of products available in this country can be found on the NHS Purchasing and Supplies Agency website at: www.pasa.nhs.uk/medicalconsumables/sharps/

There has been no recent discussions involving Health Ministers regarding needlestick injuries to health care workers. NHS employers has the remit to share good practice and advise NHS employers on this and similar health and safety issues.

NHS (Private Providers)

Rosie Cooper: To ask the Secretary of State for Health whether private providers who carry out NHS work will be subject to the NHS complaints procedure. [54261]

Jane Kennedy: National health service patients who are referred for treatment in independent sector treatment centres have the same right to complain as patients who are treated by NHS providers. Where an NHS trust or primary care trust (PCT) makes arrangements for the provision of services with an independent provider, it must ensure that the independent provider has in place arrangements for the handling and consideration of complaints about any matter connected with its provision of services as if the NHS (Complaints) Regulations 2004 applied to it. The responsibility for handling complaints regarding commissioning rests with the appropriate PCT.

NHS Budget

Alan Simpson: To ask the Secretary of State for Health what proportion of the NHS budget was paid to non-NHS providers in 2004–05. [51641]

Jane Kennedy: 5.3 per cent. of the national health service budget was paid to non-NHS providers in 2004–05 for a wide range of services mostly non-elective, which includes expenditure of £78.8 million on centrally procured elective treatment.

NHS Direct

Mr. Stephen O'Brien: To ask the Secretary of State for Health how many people accessed NHS Direct *(a)* by telephone and *(b)* online in each year since its inception. [43020]

Mr. Byrne: Information from 1998–99 onwards on the number of calls received nationally and the number of visits to NHS Direct Online are available in the statistical supplement to the chief executive's report to the national health service, which is available on the Department's website at www.dh.gov.uk.

David Howarth: To ask the Secretary of State for Health what percentage of calls to NHS Direct resulted in the referral of a patient to *(a)* a doctor and *(b)* another part of the national health service in each of the last three years. [45907]

Mr. Byrne *[holding answer 26 January 2006]:* This information is not centrally held. It may be available from NHS Direct special health authority and you may wish to contact the chairman of NHS Direct for details.

NHS Finance

Mr. Paul Goodman: To ask the Secretary of State for Health how much was spent by the NHS per head in each local government area in the last year for which information is available; and if she will make a statement. [41713]

Mr. Byrne *[holding answer 12 January 2006]:* Information is not available in the format requested.

2004–05 expenditure per head of resident population by primary care trusts in England is shown in a table which has been placed in the Library.

I regret the reply I gave to the hon. Member for Bury St. Edmunds (Mr. Ruffley) on 29 November 2005, *Official Report*, column 460W was incorrect.

Mr. Lansley: To ask the Secretary of State for Health pursuant to the answer of 31 January 2006, *Official Report*, column 469W, on NHS finance, for what reasons it is not appropriate to publish in-year monitoring data on an ongoing basis; and what assessment she has made of how publication of data would impact on the operational management of the NHS. [51872]

Jane Kennedy: In-year financial monitoring data is not audited, and is subject to change. It could give a misleading view of the financial position of national health service bodies.

In addition, in-year monitoring data is used for the operational management of the NHS. It is used by strategic health authorities (SHAs) to inform their performance management discussions with NHS trusts and primary care trusts and by the Department in performance discussions with SHAs. Routine publication of the data by the Department during the financial year may adversely affect the nature of these discussions, and the ability of the Department and SHAs to discharge their performance management function.

Nurses (South West London)

Mr. Davey: To ask the Secretary of State for Health how many nurses per 100 beds there have been in each hospital in South West London in each year since 1997. [53010]

Jane Kennedy: The information requested is shown in the table.

National health service hospital and community health services: Qualified nurses per 100 beds in the South West London area by specified trusts as at 30 September each specified year

Headcount per 100 beds

	1997	*1998*	*1999*	*2000*	*2001*	*2002*	*2003*	*2004*

n/a = not applicable

Notes:

1. Beds numbers are based on an average of those hospital beds that are available overnight over a 12 month period between 1 April and 31 May of the following year
2. Nurses do not include community nursing staff

Source:

KH03 annual beds census
NHS Health and Social Care Information Centre Non-Medical Workforce Census

Nursing Agencies

Mr. Burstow: To ask the Secretary of State for Health pursuant to the answer of 29 September 2005, *Official Report*, column 284W, on agency nurses, what estimate she has made of the total number of nursing agencies not registered with the Commission for Social Care Inspection. [35422]

Mr. Byrne: I am informed by the Chair of the Commission for Social Care Inspection (CSCI) that under Section 4 (5) of the Care Standards Act 2000, a nurses agency means

> "an employment agency or employment business, being (in either case) a business which consists of or includes supplying, or providing services for the purposes of supplying, registered nurses, registered midwives or registered health visitors".

If a nurses agency is operating as described and is not registered with CSCI, then it is operating illegally. No estimate has been made of the total number of agencies operating illegally.

Outsourcing

John McDonnell: To ask the Secretary of State for Health if she will publish the business case for the outsourcing of *(a)* the NHS Pensions Agency, *(b)* the NHS Logistics Authority, *(c)* the Dental Practice Board and *(d)* the Prescription Pricing Authority; and what alternatives were considered in each case. [51855]

Mr. Byrne *[holding answer 16 February 2006]:* No decisions have been made to further outsource either the NHS Pensions Agency, NHS Logistics Authority or the Prescription Pricing Authority. The Department is in the process of considering options for these organisations that meet the Government's objectives as set out in the report, "Reconfiguring the Department of Health's Arms Length Bodies" (July 2004) which is available on the Department's website at: www.dh.gov.uk/assetRoot/04/12/32/50/4123250.pdf.

In the case of the Dental Practice Board, a decision has been made to expand the current outsourcing contract with Astron for the remainder of its term. The assessment of this option considered the alternatives of:

> doing nothing;
>
> doing the minimum, that is, performing the processes in-house and
>
> returning the administration of dental payments to the primary care trusts.

In future, the Business Service Authority will follow standard national health service practice and make available business cases for all major investment and operational decisions.

John McDonnell: To ask the Secretary of State for Health why the contract for provision of services supplied by the NHS Pensions Agency is not going out to competitive tender. [51858]

Mr. Byrne *[holding answer 16 February 2006]:* In January 2002, the NHS Pensions Agency entered into a partial outsourcing of its services with Paymaster (1836) Ltd. The tendering process was fully competitive and conformed to European Union procurement procedures.

Within the contract is a provision to move at some point in the future to full outsourcing. The terms of the contract agreed with Paymaster (1836) Ltd. require that the NHS Pensions Agency must first allow them to bid for the full outsourcing. Only if this bid is not value for money can the agency tender for the services on a competitive basis. At present, the bid from Paymaster (1836) Ltd. is still being prepared.

Paediatric Continence Services

Mr. Burstow: To ask the Secretary of State for Health what assessment she has made of the likely impact of practice-based commissioning will have on the availability of integrated paediatric continence services in England. [43573]

Mr. Byrne: There has not been an assessment of the effect of practice based commissioning on the availability of integrated paediatric continence services.

Under practice based commissioning, practices have to work with their primary care trusts (PCTs) in the commissioning of services. All new services proposed by practices are expected to fit with local strategic priorities and have to be considered and approved by their respective PCTs.

For children this will also link into the children and young people's plan and children's trust identified priorities.

Paediatric Intensive Care Beds

Dr. Kumar: To ask the Secretary of State for Health (1) whether she plans to increase the number of paediatric intensive care beds available in hospitals in England; [43800]

(2) how many paediatric intensive care beds have been available in hospitals in *(a)* England, *(b)* the Tees Valley and *(c)* hospitals serving the Middlesbrough, South and East Cleveland constituency in each year since 1997. [43801]

Mr. Byrne: No. The number of paediatric intensive care beds available is a matter for local decision, taking account of demand. This is variable, with more beds provided over the winter months when the incidence of severe respiratory conditions in young children increases. The majority of paediatric intensive care episodes are non-elective. Units, therefore allow for some 20 per cent. spare capacity to be available to respond to anticipated but unpredictable emergency demand. The average number of paediatric intensive care beds available is shown in the table.

Average number of paediatric intensive care beds, including unoccupied beds

	England	*Tees Valley*	*Middlesbrough, South and East Cleveland*
1997–98	265	3	3
1998–99	273	4	4
1999–2000	282	3	3
2000–01	290	3	3
2001–02	303	3	3
2002–03	254	3	3
2003–04	239	3	3
2004–05	283	4	4

Source:
Department of Health form KH03.

Paper Prescriptions

Mr. Drew: To ask the Secretary of State for Health what plans she has to replace the use of paper prescriptions by use of IT. [53516]

Jane Kennedy: The electronic prescription service (EPS), formerly known as the electronic transmission of prescriptions, being developed by NHS Connecting for Health will, when fully implemented, allow electronic transmission of a prescription between prescribers and pharmacists. EPS is being rolled in phases with two releases of EPS compliant general practitioner and pharmacy software. Release one, currently being deployed requires paper prescriptions to be maintained. However, Release two, includes the use of electronic prescriptions. When Release two is fully deployed, it is expected that electronic prescriptions will become the norm, with paper prescriptions being issued only when requested by the patient. NHS Connecting for Health is working towards 100 per cent. implementation of the EPS by the end of 2007.

Psychology

Mr. Gibb: To ask the Secretary of State for Health how many *(a)* chartered psychologists and *(b)* chartered educational psychologists are practising in England. [39517]

Mr. Byrne: The information requested is not collected centrally, but there were 7,051 qualified clinical psychology staff as at 30 September 2004.

Washable Keyboards

David T.C. Davies: To ask the Secretary of State for Health what her Department's policy is on the supply of washable keyboards in the NHS. [54510]

Jane Kennedy: The purchase of computer equipment is a local responsibility. We do not promote particular products but the rapid review panel is available to consider new products that may contribute to infection control and prevention and comment on the evidence supporting their use.

Working with Children

Tim Loughton: To ask the Secretary of State for Health what duty is placed on local authorities to report to her Department incidents of individuals with a record of sex offending working with children. [44472]

Mr. Byrne: I refer the hon. Member to the reply given on 20 January 2006, *Official Report*, column 1621W, by my right hon. Friend, the Secretary of State for Education and Skills.

NORTHERN IRELAND

Belfast-Sligo Road

Mr. McGrady: To ask the Secretary of State for Northern Ireland whether the Department has discussed the improvement of the Belfast-Sligo Road with *(a)* the National Roads Authority and *(b)* the Irish Government. [54585]

Mr. Woodward: The Chief Executive of Roads Service (Dr. Malcolm McKibbin) has been asked to write to the hon. Gentleman in response to this question.

Letter from Dr. Malcolm McKibbin, dated 2 March 2006:

You recently asked the Secretary of State for Northern Ireland a Parliamentary Question about whether the Department has discussed the improvement of the Belfast-Sligo Road with *(a)* the National Roads Authority and *(b)* the Irish Government.

I have been asked to reply as this issue falls within my responsibility as Chief Executive of Roads Service.

I can confirm that Roads Service Board members meet with their counterparts in the National Roads Authority (NRA) and a representative of the Republic of Ireland's (RoI) Department of Transport approximately three times per year through the Cross Border Roads Steering Group. Chairmanship of these meetings is shared between myself and the Chief Executive of the NRA.

During recent meetings, the respective major road improvement programmes in RoI and Northern Ireland, have been discussed to ensure the respective programmes are compatible. These discussions have paid particular attention to proposals for the cross border routes which include the A4 / N16 Belfast to Enniskillen to Sligo road.

I can assure you that we will continue to monitor the development and implementation of the respective roads programmes, ensuring that both road authorities are kept updated on any proposed changes.

I hope this information is helpful.

Concessionary Travel

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland if he will take steps to ensure that free travel for senior citizens in Northern Ireland is available to people of both sexes at the same age. [56164]

Mr. Woodward: Under the current rules of the Northern Ireland Concessionary Fares Scheme, free travel is provided to Northern Ireland residents who are aged 65 and over. The eligible age is the same for both genders.

Crime Statistics

Chris Ruane: To ask the Secretary of State for Northern Ireland what the incidence of crime and disorder was in each *(a)* ward, *(b)* county and *(c)* constituency in Northern Ireland in 2004–05. [55549]

Mr. Woodward: The Police Service for Northern Ireland do not record crime figures in the format requested. Incidents of crime are recorded by police District Command Unit and a monthly update is posted on the police website at www.psni.police.uk .A copy of the full PSNI Statistical Report for the year 2004–05 is also available on the website.

Department for Education (Running Costs)

Sammy Wilson: To ask the Secretary of State for Northern Ireland what the running costs of the Department for Education in Northern Ireland were in 2004–05. [54638]

Angela E. Smith: The running costs of the Department of Education for Northern Ireland in 2004–05 were £22.4 million, or 1.4 per cent. of overall education expenditure of £1,628.2 million in that year.

Motoring Offences

Mr. Peter Robinson: To ask the Secretary of State for Northern Ireland how many *(a)* males and *(b)* females were convicted of motoring offences in each district command unit in Northern Ireland in 2004, broken down by offence. [52969]

Mr. Hanson: The information provided in the response of 6 December 2005, *Official Report*, column 1263W, currently remains the most up-to-date available. At that time it was envisaged that 2004 statistics would be available in early 2006, however an on-going data validation exercise of the data source for these statistics has led to an unavoidable delay. The information will be made available to the House as soon as possible.

Parliamentary Boundary Commission

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland when he expects the Northern Ireland Parliamentary Boundary Commission to submit its report. [53074]

Mr. Hanson: Advice from the Secretary to the Northern Ireland Parliamentary Boundary Commission is that the report on its fifth review of parliamentary constituencies in Northern Ireland will be published this autumn.

Pre-school Education

Chris Ruane: To ask the Secretary of State for Northern Ireland how much funding was allocated to *(a)* 0 to three and *(b)* three to five years education in each (i) ward and (ii) county in Northern Ireland in the last year for which figures are available. [55545]

Angela E. Smith: The information is not available in the format requested. The compulsory school age in Northern Ireland is any age between four years two months and 16. What I can provide is funding allocated to pre-school education in Northern Ireland, which can range from age two to compulsory school age.

In the 2005–06 financial year recurrent funding was allocated as follows:

Statutory Sector

Local Management of Schools (LMS) funding in Northern Ireland does not disaggregate nursery class or year group funding from primary schools' budgets. However in the 2005–06 financial year, under the LMS formula, £15,428,957 was allocated to nursery schools only.

Voluntary Sector

A total of £7,829,000 was allocated to the education and library boards to fund places for children in their final pre-school year, (aged between three years two months and four years two months at the start of the academic year), in voluntary/private settings.

Roads Service

Mr. McGrady: To ask the Secretary of State for Northern Ireland how much was spent by Roads Service in each year since 2000, broken down by district council area. [55174]

Mr. Woodward: The Chief Executive of Roads Service (Dr. Malcolm McKibbin) has been asked to write to the hon. Gentleman in response to these questions.

Letter from Dr. Malcolm McKibbin, dated 2 March 2006:

You recently asked the Secretary of State for Northern Ireland a Parliamentary Question about how much was spent by the Department for Regional Development's Roads Service in each year since 2000, broken down by district council area.

I have been asked to reply as this issue falls within my responsibility as Chief Executive of Roads Service.

The following table provides details of Roads Service expenditure for the period requested.

I hope this information is useful.

Roads Service expenditure from 2000–01 to 2004–05 (£000)

	Total years				
District council	*2000–01*	*2001–02*	*2002–03*	*2003–04*	*2004–05*
Antrim	3,996	4,892	13,688	15,042	8,865
Coleraine	5,092	5,632	4,673	6,310	6,515
Limavady	2,908	4,328	12,189	7,045	5,771
Moyle	1,926	1,278	1,661	1,959	2,168
Ballymoney	3,093	2,600	2,944	3,032	3,390
Londonderry	6,492	8,210	10,299	10,148	14,980
Ballymena	8,042	6,426	4,970	6,078	6,279
Larne	2,439	2,172	2,817	4,388	2,966
Belfast	21,092	25,918	24,392	23,338	35,283
Castlereagh	3,450	3,739	2,689	2,991	3,730

Armagh	5,648	5,428	5,223	6,429	8,424
Newry and Mourne	5,726	7,108	6,441	14,849	27,489
Banbridge	3,264	3,923	4,837	7,853	7,708
Craigavon	6,915	7,848	6,401	7,202	9,353
Down	4,476	5,992	5,169	5,808	6,763
Magherafelt	2,854	2,939	3,329	4,086	4,993
Omagh	5,498	6,485	7,449	8,414	12,374
Strabane	5,903	8,960	12,185	6,885	7,586
Cookstown	2,749	2,947	3,137	3,955	3,974
Fermanagh	6,265	6,209	6,717	8,624	10,484
Dungannon	4,680	5,344	5,404	7,784	8,953
Over totals	131,197	148,790	173,282	193,374	229,169

Roadworks (Limavady)

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what roadworks have been undertaken on Windyhill Road, Limavady within the past 12 months; and what the duration has been of each programme of work. [55313]

Mr. Woodward: The chief executive of Roads Service (Dr. Malcolm McKibbin) has been asked to write to the hon. Gentleman in response to this question.

Letter from Dr. Malcolm McKibbin, dated 3 March 2006:

You recently asked the Secretary of State for Northern Ireland a Parliamentary Question regarding what roadworks have been undertaken on Windyhill Road, Limavady within the past 12 months; and what has been the duration of each programme of work.

I have been asked to reply as this issue falls within my responsibility as Chief Executive of Roads Service.

I can confirm that within the past 12 months, Roads Service carried out one improvement scheme on the Windyhill Road. This scheme was completed over an 8-week period during June/July 2005.

I can also advise that on 27 February 2006, Roads Service commenced work on further identified improvement and resurfacing schemes along this route. These schemes, which involve working at 5 separate locations along Windyhill Road will be completed over an eight-week period, during which time the road will be closed to through traffic. The work has been programmed to keep traffic disruption to a minimum and provision has been made to ensure local access is facilitated.

I hope this information is useful.

School Closures

Sammy Wilson: To ask the Secretary of State for Northern Ireland how many schools in Northern Ireland he expects to close in the next *(a)* 12 months and *(b)* five years. [54637]

Angela E. Smith: Proposals to close a school are subject to the publication of a development proposal which ensures that all interested parties are informed, and have the opportunity to comment, before a decision is made.

The Department has approved the closure of four primary schools, three of which are due to close in August 2006 and one to close in August 2007. The Department has also approved the closure of one post-primary school to take effect in August 2006.

There are currently six other recently published development proposals for the closure of primary schools, with five proposed to take effect in August 2006 and one in August 2007, on which decisions have not yet been made.

In addition, the Department has approved previously the amalgamations of 21 primary schools into nine schools which are planned to take effect in the coming few years. A development proposal for the amalgamation of two post-primary schools is currently under consideration.

School Meals

Chris Ruane: To ask the Secretary of State for Northern Ireland how many children are entitled to free school meals in each *(a)* ward, *(b)* county and *(c)* constituency in Northern Ireland. [55557]

Angela E. Smith: Information on free school meal entitlement of pupils at primary schools in Northern Ireland is not available at ward level. Analysis based on the location of schools is not available in respect of counties, but is provided below for education and library board areas and constituencies.

Children entitled to free school meals 2005/06, by education and library board area

Education and library board	*Pupils entitled to free school meals*
Belfast	14,702
Western	14,399
North Eastern	9,516
South Eastern	8,423
Southern	13,232
Northern Ireland total	60,272

Children entitled to free school meals 2005/06, by parliamentary constituency

Parliamentary constituency	*Pupils entitled to free school meals*
Belfast East	2,071
Belfast North	5,738
Belfast South	2,037
Belfast West	7,620
East Antrim	1,723
East Londonderry	2,571
Fermanagh and South Tyrone	3,204
Foyle	7,566
Lagan Valley	1,842
Mid Ulster	3,338
Newry and Armagh	4,921
North Antrim	2,696
North Down	1,108
South Antrim	1,871
South Down	3,111
Strangford	1,397

Children entitled to free school meals 2005/06, by parliamentary constituency

Parliamentary constituency	*Pupils entitled to free school meals*
Upper Bann	3,549
West Tyrone	3,909
Northern Ireland Total	60,272

Note:
1. Figures relate to year one to year seven pupils in primary schools and pupils at post-primary schools. Figures for pupils at special schools entitled to free school meals are not collected.

School Funding

Mark Durkan: To ask the Secretary of State for Northern Ireland when the money for the education strand of the Children's Package will be distributed to schools. [55865]

Angela E. Smith: The main education strand of the Children and Young People's Funding Package under which schools will directly benefit, is the 'Extended Schools' element. Some £10 million per year (2006–07 and 2007–08 financial years) has been earmarked for this purpose and this funding will be focused on schools in disadvantaged areas.

My Department is currently working with other Departments and partner organisations to develop a means of identifying those schools to be funded and the associated level of funding. It is planned to complete this task within the next few weeks and funding will issue as soon as possible thereafter.

Sperrin Lakeland Trust

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what costs were incurred by the Sperrin Lakeland Trust as a result of the severance package of the former Chief Executive of the Trust. [49358]

Mr. Woodward: Immediately following the initial report on clinical governance in Sperrin Lakeland Trust, the then Chief Executive took premature retirement. As a result he received a payment of salary in lieu of notice and early payment of his pension entitlement.

The payment in lieu of notice totalled £26,615. The cost payable by the Trust to the HPSS Superannuation Fund was a total of £408,768, this sum not being a payment to the Chief Executive. The lump sum and annual pension for future years will be paid from the Superannuation Fund.

Throughout the Trust has met its legal and employment contract obligations, within the terms and conditions of the contract of employment.

Traffic Congestion (South Belfast)

Dr. Alasdair McDonnell: To ask the Secretary of State for Northern Ireland what plans his Department has to tackle rush hour traffic congestion on the Saintfield and Ormeau roads leading to and from south Belfast. [54595]

Mr. Woodward: The chief executive of Roads Service, Dr. Malcolm McKibbin, has been asked to write to the hon. Gentleman in response to this question.

Letter from Dr. Malcolm McKibbin, dated 3 March 2006:

You recently asked the Secretary of State for Northern Ireland a Parliamentary Question about whether his Department has any plans to tackle rush hour traffic congestion on the Saintfield and Ormeau roads leading to and from south Belfast.

I have been asked to reply as this issue falls within my responsibility as Chief Executive of Roads Service.

You will be aware that the Department for Regional Development published the Belfast Metropolitan Transport Plan (BMTP) in November 2004, which outlines transport proposals for the Belfast Metropolitan Area up to 2015. The transport plan proposes a balanced approach across the range of transport modes, and provides for greater use of public transport and greater levels of walking and cycling, whilst also supporting an appropriate level of movement of cars and goods vehicles.

Within the plan period to 2015, it is not proposed to introduce any large scale road schemes on the Saintfield or Ormeau roads as the proposed public transport improvements along this route will help to reduce travel by private car. However, the plan proposes the implementation of a Quality Bus Corridor (QBC) on the Saintfield Road together with a park-and-ride site at Cairnshill for 750 spaces. Initially the Park and Ride site will be served by a dedicated bus service using the QBC bus priority infrastructure, but with the opportunity for linking it in the longer term with a potential rapid transit scheme, known as SuperRoute. The Department plans to submit a planning application for the Park and Ride site in Spring 2006.

The plan also proposes the implementation of a Route Management Strategy on the A24 from the Outer Ring Road (A55) to Ballynahinch that may contain a range of measures including:

safety schemes;

improved lighting;

junction modification;

signing and parking/stopping restrictions; and

better enforcement of clearways.

This route management strategy is currently ongoing to identify potential improvements.

I should also advise that outside the plan period to 2015, it is proposed that a new road link is constructed between the A24 at Cairnshill and the A55 at Newtownbreda to provide relief to the existing A24 Saintfield Road and the A24/A55 outer ring junction. This will closely follow part of the alignment of 'SuperRoute' and it is proposed that both will be protected from development through the Belfast Metropolitan Area Plan.

I hope this information is helpful.

Transport Infrastructure

Chris Grayling: To ask the Secretary of State for Northern Ireland what investment in transport infrastructure schemes to support economic regeneration is being considered in Northern Ireland; what the schemes are; what the amount of public investment is; and when he expects decisions to be made. [54947]

Mr. Woodward: Focused on giving priority to those investments that promote economic growth, the Investment Strategy for Northern Ireland, unveiled on 14 December 2005, identifies some £2.5 billion of investment in transport infrastructure schemes in the 10 years to 2015. This includes £1.4 billion for strategic road improvements and £309 million on public transport capital works projects over the 10-year period covered by the strategy.

A revised Regional Strategic Transport Network Transport Plan is currently being prepared that will identify the programme of schemes that can be undertaken with this enhanced funding.

Details of the major transportation infrastructure improvements already included in the roads programme have been placed in the Library.

HOME DEPARTMENT

Asylum Seekers

Mr. Hurd: To ask the Secretary of State for the Home Department how many asylum seekers have been housed in *(a)* Greater London, *(b)* the London borough of Hillingdon and *(c)* Ruislip-Northwood constituency in each of the last seven years. [39958]

Mr. McNulty: Statistics on the location of asylum seekers in the UK are linked to the available information on the support that the asylum seeker receives. The number of asylum seekers directly supported by the National Asylum Support Service (NASS) are published on a quarterly and annual basis, broken down by local authority. The most recent publication covering the fourth quarter of 2005, and further historical publications are available on the Home Office Research Development and Statistics website at http://www.homeoffice.gov.uk/rds/immigration1.html. Data on asylum seekers supported by NASS broken down by parliamentary constituency are also available from the Library of the House.

Tony Lloyd: To ask the Secretary of State for the Home Department how many asylum seekers are supported in each local authority area. [44308]

Mr. McNulty: Statistics on the location of asylum seekers in the UK are linked to the available information on the support that the asylum seeker receives. The number of asylum seekers directly supported by the National Asylum Support Service (NASS) are published on a quarterly and annual basis, broken down by Local authority. The most recent publication covering the fourth quarter of 2005, and further historical publications are available on the Home Office Research Development and Statistics website at http://www.homeoffice.gov.uk/rds/immigration1.html. Data on asylum seekers supported by NASS broken down by parliamentary constituency are also available from the Library of the House.

Biometric Passports (Gravesham)

Mr. Holloway: To ask the Secretary of State for the Home Department what provision he has made for people in Gravesham to register for biometric passports. [54926]

Andy Burnham: The UK Passport Service will begin issuing biometric passports, containing a microchip holding a copy of the facial image and personal details in the passport, in June this year. This will not change the way in which passport applications are made. People need only ensure that they follow the advice shown in the photograph guidance leaflet included in the passport application pack, before sending their applications in the normal way.

The separate requirement for adults applying for their first individual passport to attend an interview to confirm identity is to be introduced from the last quarter of 2006.

A network of locations for offices in which to carry out the interviews has been designed to provide the optimum balance between convenience and costs. The design took into account customer opinion surveys and consultations with county and regional authorities and was externally verified. It has resulted in a network of potential locations in which the average two way journey from home to interview office and back will be just under 25 miles and take just under 40 minutes. However, it is not yet possible to announce the potential locations because the procurement process for a premises contractor has not been finalised and the availability of premises has not been confirmed.

Attendance to record fingerprints for passports is not currently expected to be necessary until 2009.

Cannabis

Dr. Iddon: To ask the Secretary of State for the Home Department pursuant to his comments in an interview with Channel 4 on 17 January, what evidence he has received that use of cannabis has resulted in deaths; and if he will make a statement. [46032]

Mr. Charles Clarke: I was referring on 19 January to representations I have received as a constituency MP from families who believe that cannabis has been linked to psychosis that has resulted in a member of their families death.

The Government have accepted the Advisory Council on the Misuse of Drugs (ACMD) conclusion that cannabis can worsen mental health problems. The recent ACMD report on the links between cannabis and mental health said

> "Cannabis is harmful and its consumption can lead to a wide range of physical and psychological hazards",

although the ACMD added

> "cannabis makes ... only a small contribution to an individual's risk for developing schizophrenia".

Several research studies (including Lincoln and McGorry, 1999) have shown that mental illness significantly increases the risk of suicide in the individual.

I made clear in my statement to Parliament that cannabis is harmful and illegal and therefore I set out a package of policies and activity to reinforce this message. I have asked ACPO to draw up new guidelines on cannabis so that they and others can continue to drive down supply and increase support to those who need it.

The key priorities of this campaign will be to deliver a large-scale education programme, strengthen services for misusers and crack down on cultivators and suppliers of cannabis.

Correspondence

Lynne Featherstone: To ask the Secretary of State for the Home Department when the Minister for Immigration, Citizenship and Nationality will answer the letter of 7 December 2005 from the hon. Member for Hornsey and Wood Green on her constituent Mr. Ahmed Taha (Home Office ref: T1021789). [54789]

Mr. McNulty: I wrote to the hon. Member on 1 March.

Lynne Featherstone: To ask the Secretary of State for the Home Department when the Immigration and Nationality Directorate will respond to the correspondence from the hon. Member for Hornsey and Wood Green of 2 November 2005, regarding a constituent, Mrs. Dennis (Home Office reference D1101020). [54855]

Mr. McNulty: The Director General of the Immigration and Nationality Directorate wrote to the hon. Member on 28 February.

Criminal Cases Review Commission

Mr. Amess: To ask the Secretary of State for the Home Department what advice the Criminal Cases Review Commission gives to members of the public wishing to have a case considered by the Commission; and if he will make a statement. [47412]

Fiona Mactaggart: The Commission produces a range of literature and maintains a website which makes available to members of the public and potential applicants information on the role played by the Commission in reviewing convictions and sentences. An information pack has been placed in the Libraries of both Houses.

Departmental Entertainment

Mr. Heald: To ask the Secretary of State for the Home Department how much was spent on entertainment by his Department in 2004–05; and how much of that sum is accounted for by *(a)* food, *(b)* alcohol, *(c)* staff and *(d)* accommodation. [50896]

Mr. Charles Clarke: The Home Office does not record entertainment expenditure broken down into the four elements requested in the PQ.

All expenditure of official entertainment is made in accordance with published departmental guidance on financial procedures and propriety, based on principles set out in the 'Government Accounting' procedures.

The spend on entertainment for the Home Office for 2004–05 was £269,000.

Deportations

Lynne Featherstone: To ask the Secretary of State for the Home Department how many individuals with no legal right to be in the UK have been deported or returned voluntarily to their country of origin and subsequently refused entry to that country and permitted to return to the UK in each of the last five years. [54808]

Mr. McNulty: This information is not available.

Published statistics on immigration and asylum issues are available on the Home Office research development and statistics website at: http://www.homeoffice.gov.uk/rds/immigration1.html

Emergency Hoax Calls

Mr. Crausby: To ask the Secretary of State for the Home Department how many hoax calls were made to the emergency services and fire service in each of the last three years in *(a)* Bolton, *(b)* the North West and *(c)* England. [51560]

Jim Fitzpatrick: I have been asked to reply.

The number of hoax calls received by the emergency services is not held centrally, and could be provided only at disproportionate cost.

The following table shows the number of malicious false fire alarms attended by the fire and rescue service (FRS) in each of the last three years in:

(a) Greater Manchester FRS (Data for individual local authorities is not available. Bolton is within Greater Manchester FRS area);

(b) North West region;

(c) England.

Malicious false fire alarm calls attended by Fire and Rescue Services 2002–04

	2002[1]	*2003*[1]	*2004*
Greater Manchester	5,740	5,268	4,572
North West region	10,639	9,956	8,044
England	54,109	47,010	39,139

[1] Including estimates for incidents not recorded during periods of industrial action in 2002 and 2003.

Source:
Fire and Rescue Service FDR1 returns to ODPM.

Home Detention Curfew Scheme

David T.C. Davies: To ask the Secretary of State for the Home Department how many prisoners are on the home detention curfew scheme. [45867]

Fiona Mactaggart: According to the Prison Service IT system, there were 3,024 prisoners on the home detention curfew scheme on 24 February 2006.

Illegal Immigration

Mr. Stewart Jackson: To ask the Secretary of State for the Home Department what action he is taking to tackle illegal immigration in Cambridgeshire. [54350]

Mr. McNulty: Immigration and Nationality Directorate is committed to working towards the Government target of removing more failed asylum seekers, on a monthly basis, than there are unfounded claims. Operations are also undertaken targeting those who are working here illegally.

Operations are intelligence led. Any information received concerning the county of Cambridgeshire is considered according to priorities and operations set up as necessary.

Enforcement and removal work for United Kingdom Immigration Service in Cambridgeshire is carried out by the St. Ives office which is also the HQ of the eastern region.

All work is intelligence driven and in Cambridgeshire centres on failed asylum seeker identification and removal. In order to deal with this regular visits are conducted by staff from that office to private addresses and business premises. The region also conducts prosecutions of individuals and businesses where flagrant breaches are identified.

The Immigration Service in Cambridgeshire work closely with the police and other Government Departments as well as the local business community to deal with breaches of the immigration rules.

National Offender Management Service

Mr. Garnier: To ask the Secretary of State for the Home Department whether legislation will be needed to allow regional offender managers to commission and contract for probation services under the National Offender Management Service arrangements. [48447]

Fiona Mactaggart: Legislation would be needed to allow regional offender managers to contract with other providers for services currently delivered by probation boards.

Passports

Mr. Gray: To ask the Secretary of State for the Home Department what assessment he has made of the possible link between UK passports lost in the post and *(a)* identity theft, *(b)* human trafficking and *(c)* international terrorism; and if he will make a statement. [29741]

Andy Burnham: The extent to which UK passports reported lost in the post are used to facilitate identity theft is extremely difficult to establish because there is very little information in this area. However, as a result of concerns about the number of passports being reported lost in the post the UK Passport Service introduced a secure delivery service in February 2004. The secure delivery service provides for all new passports dispatched from UKPS to be taken to their destination by courier. As a result of the introduction of this service the number of UK passports being reported to UKPS as having been lost in the post has fallen dramatically.

There is also much less potential for the current design of digital passport, if stolen, to be modified to carry—for example—a different name or photograph. This will be made still more improbable with the advent if the new biometric chip enabled passport, which is being introduced next year.

Victims who are trafficked into the UK for purposes of exploitation frequently travel on genuine passports that have been falsified, or on forged passports. While no specific study has been done, there is unlikely to be a link to UK passports lost in the post. Most people entering the UK in this way would travel on a document from a country which closely mirrored their own in culture and language to minimise the chances of detection.

Because of the relatively small number of UK passports reported as being lost in the post, we do not believe that there is a link between such passports and international terrorism.

Prisons

Mr. Holloway: To ask the Secretary of State for the Home Department what the *(a)* adult (i) male and (ii) female prison population and *(b)* (A) male and (B) female young offender institution populations in (1) England and Wales and (2) Kent were on the last date for which figures are available. [54939]

Fiona Mactaggart: The following table from the Prison Service IT system provides figures on the prison population in both England and Wales and Kent, and gives separate figures for adults and young offenders.

Population of prisons[1] and young offender institutions on 31 January 2006

	Male	*Female*	*Total*
England and Wales			
Adults	61,301	3,876	65,177
Young persons[2]	10,235	508	10,743
Total	71,536	4,384	75,920
Kent[3]			
Adults	3,298	251	3,549
Young persons[2]	504	19	523
Total	3,802	270	4,072

[1] Young persons are held in local prisons as well as in young offender and juvenile institutions.

[2] Young persons are aged under 21 but include 21-year-old prisoners who were aged 20 or under at conviction who have not been reclassified as part of the adult population.

[3] Prisons in Kent are: Blantyre House, Canterbury, Cookham Wood, Dover, East Sutton Park, Elmley, Maidstone, Rochester, Standford Hill.

Mr. Garnier: To ask the Secretary of State for the Home Department what his policy is on *(a)* prison and *(b)* young offender institution visits in the first week of a custodial sentence. [55075]

Fiona Mactaggart: It is a requirement that prisoners and young offenders are informed of their statutory right to a social visit on reception, as an integral part of the reception process. Subject to pressing operational factors, there is an expectation that such a visit should take place within 72 hours of their reception into custody. Prisoners and young offenders also have access to telephones and are entitled to a letter at public expense, on reception, as an additional means of communication.

Mr. Garnier: To ask the Secretary of State for the Home Department how many married prisoners were divorced in each of the last five years for which figures are available. [55082]

Fiona Mactaggart: Information on changes of marital state of prisoners whilst in custody is not routinely collected. The most recent survey that addresses this question directly is the National Prison Survey of 1991, The National Prison Survey 1991 by Tricia Dodd and Paul Hunter of Office of Population Censuses and Surveys, London: HMSO.

The survey was based on a representative simple random sample of all prisoners except juveniles. This found that of prisoners who were married before imprisonment 22 per cent. were divorced or separated at the time of interview in custody.

John Bercow: To ask the Secretary of State for the Home Department (1) what steps are being taken by his Department to improve access to courses by prisoners serving in open prisons, with particular reference to assisting with travel costs; [55472]

(2) what funding is available for prisoners serving in open prisons wishing to undertake education or training courses outside the prison. [55529]

Fiona Mactaggart: The Green Paper 'Reducing Re-Offending Through Skills and Employment' published in December 2005 set out for consultation our plans to improve the learning and skills service for all offenders, including those held in open prisons.

The Department for Education and Skills has allocated £60,000 in financial year 2005–06 to support travel and other costs for offenders in open prisons attending education or training outside the prison. This funding allows offenders access to mainstream post-16 education in further education colleges, with most offenders eligible to have their course costs met by the Learning and Skills Council as part of its responsibilities for planning and funding general post-16 learning.

John Bercow: To ask the Secretary of State for the Home Department what changes have been made to his Department's procurement procedures, as a result of the leaks in the roofs of X and Y blocks at HM Prison Spring Hill with particular reference to assigning national building contracts. [55482]

Fiona Mactaggart: No changes have been made to the Home Office's procurement procedures as a direct result of the roof leaks in the blocks at HMP Spring Hill. These type of blocks constructed at HMP Spring Hill and elsewhere on the prison estate were the only modular temporary units (MTUs) readily available for quick purchase and rapid construction to meet the then rapidly rising prison places need. The new Strategic Alliance Partnerships set up in 2003–04 with its updated procurement procedures will in future deal with the demands of high value projects with tight timescales across the prison estate. An improved modular design is being developed through these partnerships and no more units of the design used at HMP Spring Hill will be built.

John Bercow: To ask the Secretary of State for the Home Department what funding has been provided by his Department for repairs to the roofs of X and Y blocks at HM Prison Spring Hill. [55483]

Fiona Mactaggart: No central funding has been provided. The suppliers (Elliott Redispace at HMP Spring Hill) are responsible for rectifying defects with the roofs as per the negotiated contract. There are currently ongoing discussions with the suppliers to carry out appropriate further roof repairs.

John Bercow: To ask the Secretary of State for the Home Department how many rooms are not available for use as a result of roof leakage in X and Y blocks at HM's Prison Spring Hill. [55484]

Fiona Mactaggart: No rooms in either of these blocks are currently decommissioned as a result of leaking roofs. Local estate management in conjunction with the site health and safety officer are keeping the situation under review and will undertake a risk assessment as necessary to establish what further roof repairs may be required.

John Bercow: To ask the Secretary of State for the Home Department what discussions he has had with the contractor who built X and Y blocks at HM Prison Spring Hill on *(a)* leaking roofs and *(b)* other issues. [55598]

Fiona Mactaggart: National Offender Management Service (NOMS) Property Unit is engaged in ongoing discussions with Elliot Redispace, the suppliers of the blocks at HMP Spring Hill, to perform cyclical inspections of their modular temporary units across the public prison estate to identify any leakage or other problems and for them to then carry out the necessary repairs at no further cost to the Department.

Repatriation

Lynne Featherstone: To ask the Secretary of State for the Home Department what the Government's policy is on *(a)* repatriation and *(b)* granting leave to remain for individuals who have been returned to their country of origin but refused entry to that country; and if he will make a statement. [54809]

Mr. McNulty: Failed immigration offenders whose country of origin has refused to accept them on removal and who have been returned to the UK will not be granted leave to enter or remain. If they are granted temporary admission further attempts to remove them will be made through re-documentation or the use of international instruments as appropriate.

Lynne Featherstone: To ask the Secretary of State for the Home Department how much the failed repatriation and return to the UK of individuals who have been deported or left to return to their country of origin but have been refused entry to that country of origin has cost in each of the last five years. [54810]

Mr. McNulty: There is no information on the number of people who have either been removed or deported as immigration offenders but rejected during transit or on arrival at their country of origin and are returned to the UK, therefore it is not possible to establish cost.

Written Answers to Questions

Monday 6 March 2006

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Aggregates Levy

Mr. Gray: To ask the Secretary of State for Environment, Food and Rural Affairs how many tonnes of aggregates were *(a)* quarried and *(b)* recycled in each of the five years (i) before and (ii) since the introduction of the aggregates levy. [53349]

Yvette Cooper *[holding answer 27 February 2006]:* I have been asked to reply.

Quarried and dredged aggregate

The aggregates levy applies to the whole of the United Kingdom. Data is not available on the amount of aggregate "quarried", or "extracted" because producers keep no such records. Great Britain sales data, sometimes erroneously described as "production", is available from the Annual Minerals Raised Inquiry (AMRI) undertaken by the Office for National Statistics under commission from the Office of the Deputy Prime Minister and the Department for Trade and Industry.

Data on the sales of aggregate in Northern Ireland comes from their Annual Minerals Statement that provides data on all mineral production. Because this data does not provide sufficient detail to enable clear identification of aggregates, the available figures exceed the amounts of aggregate that have been produced. Combining these sources produces the following table:

UK sales of aggregate extracted on land and from the seabed from 1995–2004

Tonnes million

	Great Britain	*Northern Ireland*	*United Kingdom*
1995	240.5	22.1	262.6
1996	214.9	25.1	240.0
1997	220.2	21.6	241.8
1998	217.7	22.4	240.1
1999	220.8	22.8	243.6
2000	219.5	24.0	243.5
2001	222.0	26.2	248.2
2002	209.3	23.5	232.8
2003	203.7	23.6	227.3
2004	213.8	25.7	239.5

There was a fall in sales between 2001 and 2003 but an increase in 2004. The Office for National Statistics is currently examining the reasons for this. One factor may be an increase in the number of quarries surveyed in the AMRI following a review of, and additions to, the list of quarries that were surveyed.

Recycled aggregate

Data on the amount of construction demolition and excavation waste used as aggregate comes from surveys of "Arisings and Use of Construction, Demolition and Excavation Waste as Aggregate", commissioned by ODPM. These surveys have collected data for 1999, 2001 and 2003 only. A contract for a 2005 survey has been placed recently but results will not be available until early 2007. Although the 1999 and 2001 surveys included analysis for England and Wales, the 2003 survey covered England. Therefore, the complete time series is for England only. There are no data available for Scotland or Northern Ireland.

Construction demolition and excavation waste crushed and/or screened for use as aggregate in England in 1999, 2001 and 2003

Tonnes million

1999	22.0
2001	36.4
2003	39.6

Airguns

John Barrett: To ask the Secretary of State for Environment, Food and Rural Affairs what steps the Government have taken to tackle misuse of air weapons against *(a)* domestic pets and *(b)* wildlife. [55335]

Mr. Bradshaw: This Government are committed to high standards of welfare for all animals.

Currently, the Protection of Animals Act 1911 prevents wanton acts that cause unnecessary suffering to any animal, wild or domestic. This includes any suffering or death caused by the misuse of air weapons. The Animal Welfare Bill will strengthen the protection available, for example through tougher penalties for serious offences. The Wildlife and Countryside Act 1981 gives additional protection to wild animals and birds.

Avian Influenza

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what action is being taken to protect pets from avian influenza. [55378]

Mr. Bradshaw: If a case of H5N1 is found in Great Britain, owners of pet birds would be asked to keep their birds indoors. Infection in any other pet species is believed to be very rare but we have commissioned scientific advice on the recent infection of a cat in Germany.

Information on effective biosecurity and surveillance has already been produced for hobby keepers of birds and for local veterinary practices. Owners should also make use of advice and information, which is available on the avian influenza pages of the Defra website: http://www.defra.gov.uk/animalh/diseases/notifiable/disease/ai/index.htm.

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what percentage of the poultry flock is registered; and what percentage of flocks of *(a)* above and *(b)* below 50 birds are registered. [55421]

Mr. Bradshaw: Information from enforcement officers and from other data sets about poultry held by government suggest there are at least 6,200 holdings with 50 or more birds. As at 28 February 2006, 17,691 poultry premises had registered on the GB Poultry Register, including both compulsory and voluntary registrations. These figures suggest that poultry owners have responded positively to the requirement to register their flocks on the GB Poultry Register.

Further information, including an analysis of flock sizes, will be made available on the Defra website later this month.

Bovine TB

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what discussions her Department has held with the British Veterinary Association on the introduction of pre-movement testing for bovine tuberculosis in cattle herds. [55423]

Mr. Bradshaw: Defra has held regular meetings with the veterinary profession on the introduction of pre-movement testing. The views of veterinary groups were also taken into account as part of our public consultation exercise, and by the TB Stakeholder Group on pre-movement testing.

We have also appointed an independent advisor to carry out a rapid survey of veterinary capacity and preparedness to deliver the new requirements for pre-movement testing from 27 March.

Sir Nicholas Winterton: To ask the Secretary of State for Environment, Food and Rural Affairs if her Department will provide assistance towards the costs of pre-movement tuberculosis testing of cattle; and if she will make a statement. [56060]

Mr. Bradshaw: Cost sharing on animal health issues between Government and industry is a key part of our Animal Health and Welfare Strategy. As there are benefits to herd owners from buying or selling cattle with additional disease assurance, it is right that they should share the cost of tests which are outside the routine surveillance programme. The Government continue to fund the provision of tuberculin and all routine surveillance testing at a cost of over £40 million per annum.

Countryside Agency (Designations)

Dr. Francis: To ask the Secretary of State for Environment, Food and Rural Affairs whether she has recently discussed with the Countryside Agency the designation of new *(a)* National Parks and *(b)* Areas of Outstanding Natural Beauty; and if she will make a statement. [55196]

Jim Knight: My officials talk regularly to staff from the Countryside Agency on a variety of matters but it is the agency's responsibility to decide whether to make a designation order for any area in England. The agency is due to carry out a review programme for National Park and Area of Outstanding Natural Beauty boundaries. This may also examine the merits of designating any new areas.

Meanwhile, the process of designating the South Downs as a new National Park is ongoing and a public inquiry has now been held. The full inspector's report will be considered by the Secretary of State on receipt.

Departmental Energy Costs

Mrs. Villiers: To ask the Secretary of State for Environment, Food and Rural Affairs how much was spent by her Department on *(a)* gas and *(b)* electricity in 2004–05. [51778]

Jim Knight: The Department for Environment, Food and Rural Affairs was created in June 2001.

The annual spending on *(a)* gas and *(b)* electricity at buildings for which Defra and its Executive Agencies have contractual responsibility was as follows:

£000

	Gas	Electricity
2001–02	1,331,589	2,292,248
2002–03	1,337,644	2,583,077
2003–04	1,423,414	2,361,546
2004–05	1,459,602	2,779,828

Departmental Expenditure

Mr. Laws: To ask the Secretary of State for Environment, Food and Rural Affairs how much has been spent by her Department on media training in each year since 1997–98. [55207]

Jim Knight: Defra was formed in June 2001; information on media training is not held centrally prior to that date. Media training expenditure through the centrally held budget managed by Defra's Communications Directorate since that date is as follows:

FY	£
2001–02	56,198.44
2002–03	31,313.75
2003–04	28,728.75
2004–05	66,616.62
2005–06	65,096.78

These payments have been made to a company providing television and radio interview training . This training has enabled senior Defra delivery staff to accept invitations from regional media to do factual interviews explaining their work.

Providing details of non-centralized Defra spend would incur disproportionate cost.

Farm Incomes

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the average farm income for each of the last 10 years for which figures are available; and if she will make a statement. [55648]

Jim Knight *[holding answer 3 March 2006]:* The average net farm income for farms in England for each of the last 10 years is shown in the following table.

Average net farm income in England

March/February	Nominal terms	£/farm[1] In real terms at 2004–05 prices
1995–96	38,200	47,800
1996–97	31,700	38,800
1997–98	15,200	18,000
1998–99	11,500	13,200
1999–2000	8,700	9,800
2000–01	10,600	11,600
2001–02[2]	14,900	16,100
2002–03	16,600	17,600
2003–04	29,500	30,400
2004–05	21,200	21,200

[1] All farm types, including horticulture.
[2] Excluding farms subjected to compulsory foot and mouth disease cull.
Note:
1. Deflated by the Retail Price Index.
Source:
Farm Business Survey.

Net farm income is the return to the principal farmer and spouse for their manual and managerial labour and to the tenant-type capital of the business.

Single Payment Scheme

Rosie Cooper: To ask the Secretary of State for Environment, Food and Rural Affairs what recent assessment her Department has made of the impact on farmers in West Lancashire of late payments of the single farm payment. [53315]

Jim Knight: The first SPS payments reached farmers on 20 February. This is in line with the forecast the Rural Payments Agency (RPA) made over a year ago and well within the EU regulatory window of 1 December 2005 to 30 June 2006. The RPA is now in the process of authorising over £300 million worth of claims for payment and remains on track to pay the bulk of the £1.6 billion to English farmers by the end of March.

All evidence to date suggests no otherwise viable businesses will fail because of the timing of these payments, but I know cash flow is currently an important issue for a number of farmers and that the start of payments has, consequently, been widely welcomed.

Mr. Fraser: To ask the Secretary of State for Environment, Food and Rural Affairs what discussions she has had with the Rural Payments Agency on the efficiency and accuracy of their computer systems; and whether the Agency has allocated the correct single farm payment to each farm. [52525]

Jim Knight: My noble Friend Lord Bach has regular meetings with senior officials of the Rural Payments Agency (RPA) to review progress towards making payments under the Single Payment Scheme (SPS). All operational issues, for example resources, systems and business processes are discussed.

RPA also uses the Office for Government Commerce Gateway Review process to peer review the progress they are making with the programme of work.

I am pleased to confirm that the first SPS payments were released by the RPA on 20 February 2006. As part of the process there is a review of the proposed payment before it is authorised. There is of course, as a matter of customer service, a process for customers to appeal on grounds of fact if they believe there is a material error in their payment.

Mr. Fraser: To ask the Secretary of State for Environment, Food and Rural Affairs if the Government will make provision to reimburse farmers for the interest they have lost from the single farm payment as a result of the delays in payments being made. [52527]

Jim Knight: The payment window for the Single Payment Scheme (SPS) 2005 as set by EU legislation opens on 1 December 2005 and runs until 30 June 2006.

Further to the announcement I made on 31 January 2006, I am pleased to report that the first SPS payments were released by the Rural Payments Agency on 20 February 2006. The bulk of payments are expected to be complete by the end of March, and I expect all payments will be made well within the regulatory payment window.

Under the circumstances it is not appropriate to pay interest.

Organic Farming

Mr. Jenkins: To ask the Secretary of State for Environment, Food and Rural Affairs how many farmers in Staffordshire have been registered under the Organic Entry Level Scheme. [51417]

Jim Knight: As at 16 February 2006, three applications have been received by the West Midlands Rural Development Service, one of these has generated a full agreement.

Public Information

Mr. Gale: To ask the Secretary of State for Environment, Food and Rural Affairs how much was spent on the Department's public relations and information services in each of the last five years for which figures are available. [48960]

Jim Knight: The information requested is as follows:

(a) Public Relations

With regard to public relations expenditure incurred by Defra's Communications Directorate since 2001, I refer my hon. Friend to the answer given on 19 December 2005, *Official Report*, column 2385W, relevant details of which are as follows:

Date	Agency	Cost (£)	Project
2002	Good Relations	5,900	Sustainable Food and Farming
2002	Biss Lancaster	189,366.67	Your countryside your welcome
2002	Red	121,848,93	Illegal Imports
2002	Country Porter Novelli	16,243	Sustainable Development
2003	Forster Company	11,170	Darwin Initiative
July 2004-March 2005	Media Moguls	261,558.70	Illegal Food Imports Campaign Phase 1

Date	Agency	Cost (£)	Project
August 2005-present	Media Moguls	22,362.31	Illegal Food Imports Campaign Phase 2
January-May 2005	Amazon Public Relations	55,904.84	Launch of the Sustainable Development Strategy
August 2005 to date	Amazon Public; Relations	18,750	Sustainable Development case; studies
October 2005 to March 2006	Weber Shandwick	60,000	Climate Change

Inclusion of non-centralized Defra spend would incur disproportionate cost.

(b) Information Services

The Department does not maintain separate records of its expenditure for information services. Expenditure can only be indicated through the centrally held budget managed by Defra's Communications Directorate, and covers all paid publicity activity. Inclusion of non-centralized Defra spend would incur disproportionate cost. Expenditure for the last five years is as follows:

	Expenditure (£ million)
2001–02	6.6
2002–03	4.7
2003–04	3.7
2004–05	6.8
2005–06	[1]3.9

[1] Budgeted expenditure for FY 2005–06

Waste Incineration

Mr. Chaytor: To ask the Secretary of State for Environment, Food and Rural Affairs what her Department's plans are to increase mass-burn incineration of waste. [53695]

Mr. Bradshaw: Local authorities are responsible for deciding the most appropriate waste management facilities for their areas and currently recover energy from about 9 per cent. of municipal waste via incineration. Economic modelling undertaken to inform the Government's current waste strategy review suggests that this may increase to about 25 per cent. nationally by 2020. This is less than was forecast in Waste Strategy 2000 due to our expected better performance on recycling.

Wind Farms

Janet Anderson: To ask the Secretary of State for Environment, Food and Rural Affairs when she expects to make a decision on the application for the transfer of common land on Scout Moor to facilitate the building of a wind farm. [55400]

Jim Knight: Following a public inquiry into joint applications under section 36 of the Electricity Act 1989 and section 147 of the Inclosure Act 1845, the inspector has submitted his recommendations to the relevant Secretaries of State. We are currently seeking to resolve a number of detailed issues relating to the application under section 147 of the 1845 Act and expect to reach a decision shortly.

PRIME MINISTER

British Overseas Territories

Daniel Kawczynski: To ask the Prime Minister if he will appoint a Cabinet Minister with responsibility for British Overseas Territories. [55852]

The Prime Minister: My right hon. Friend the Foreign Secretary (Jack Straw) is the Cabinet Minister with responsibility for British Overseas Territories.

Council Tax

Mr. Pickles: To ask the Prime Minister which Ministers had council tax bills on official residences paid for by Government departments since May 1997; and for how long such payments have been made. [51072]

The Prime Minister: The detailed information requested is not held centrally and could be provided only at disproportionate cost.

Departmental Expenditure

Mr. Laws: To ask the Prime Minister how much has been spent by his Office on media training in each year since 1997–98. [55223]

The Prime Minister: For these purposes my office forms part of the Cabinet Office. I refer the hon. Member to the answer given to him by my hon. Friend the Parliamentary Secretary for the Cabinet Office (Jim Murphy) today.

Flood Defences (Shrewsbury)

Daniel Kawczynski: To ask the Prime Minister if he will visit flood defences in Shrewsbury. [56500]

The Prime Minister: I refer the hon. Member to the answer I gave him on 5 December 2005, *Official Report*, column 1039W.

Guantanamo Bay

Lynne Jones: To ask the Prime Minister what discussions he has had with *(a)* the President of the United States and *(b)* the United Nations on the call from the United Nations Economic Social Research Council Commission on Human Rights, contained in paragraph 96 of report E/CN.4/2006/120, for the detention facilities at Guantanamo Bay to be closed; and if he will make a statement. [54463]

The Prime Minister: It is important to remember the circumstances which led to Guantanamo Bay's establishment. Nearly 3,000 people were killed during the terrorist attacks on 11 September 2001. We remain determined to work with our allies to defeat the scourge of global terrorism.

We have made it clear that we regard the circumstances under which detainees continue to be held in Guantanamo Bay as unacceptable. Guantanamo Bay is an anomaly that should come to an end sooner rather than later. The US Government, and the UN, are fully aware of our views.

Queen's Birthday

Anne Main: To ask the Prime Minister what plans he has to celebrate Her Majesty The Queen's 80th birthday in his official capacity; and what assessment he has made of plans for the celebration. [54184]

The Prime Minister: I shall be attending the official celebrations for Her Majesty The Queen's 80th birthday including the National Service of Thanksgiving at St. Paul's Cathedral.

Sustainable Development Commission

Mr. Drew: To ask the Prime Minister how often he meets the UK Sustainable Development Commission. [55368]

The Prime Minister: I have meetings with a wide range of organisations and individuals on a wide range of subjects, including members of the UK Sustainable Development Commission.

Tibet

Mr. Hancock: To ask the Prime Minister when he last raised human rights in Tibet with the Chinese Government. [56464]

The Prime Minister: I refer the hon. Member to the answer I gave on 30 January 2006, *Official Report*, column 64W to the hon. Member for Buckingham (John Bercow).

CULTURE, MEDIA AND SPORT

Museums

10. **Andrew Miller:** To ask the Secretary of State for Culture, Media and Sport if she will make a statement on public funding for regional museums. [55627]

James Purnell: The information is as follows.

Public funding is provided both through local authorities and my Department.

My Department is committing a targeted £77 million to English regional museums in 2006–08, through the Renaissance in the Regions programme.

Regional museums are also able to apply to the Heritage Lottery Fund (HLF) and, for those with Designated collections, the Designated Challenge Fund.

Section 106 Agreements (Sports Facilities)

11. **Derek Wyatt:** To ask the Secretary of State for Culture, Media and Sport how many section 106 agreements have led to additional sports facilities since 1997. [55628]

Mr. Caborn: Information on the numbers of section 106 agreements that have led to additional sports facilities is not held centrally.

However, the Government believe that new developments should contribute to meeting the increased recreational needs of our communities through new and enhanced facilities for sport and this is clearly set out in the planning guidance for open space, sport and recreation—(PPG 17).

To that end Sport England work closely with local authorities to actively promote the use of planning obligations to bring benefits for sport.

BBC

12. **Mr. Gauke:** To ask the Secretary of State for Culture, Media and Sport If she will make a statement on her plans for future funding of the BBC through the licence fee. [55629]

Tessa Jowell: As stated in the Green Paper, "A strong BBC, independent of government", published in March 2005, the BBC will continue to be funded by the licence fee for the whole of the next Charter period.

The Government are currently conducting a funding review to determine the level of the television licence fee to apply from April 2007 and will announce the outcome in due course.

Mr. Ellwood: To ask the Secretary of State for Culture, Media and Sport when the White Paper on the BBC is expected; and what arrangements she has made for its launch. [55801]

Tessa Jowell: I intend to publish the White Paper on BBC Charter review very shortly and will make appropriate arrangements for its launch.

Mrs. James: To ask the Secretary of State for Culture, Media and Sport (1) how many complaints have been received by TV Licensing in the last 12 months in relation to records held by TV Licensing for postal addresses that do not exist; [56176]

(2) what progress has been made by TV Licensing towards maintaining accurate householder and postal address records. [56177]

James Purnell: The BBC has statutory responsibility for the administration of the television licensing system and TV Licensing carries out the day to day administration under contract to the Corporation. I have therefore asked the BBC's Head of Revenue Management to consider the questions raised by my hon. Friend and to write to her direct. Copies of the reply will be placed in the Libraries of both Houses.

National Lottery

13. **Daniel Kawczynski:** To ask the Secretary of State for Culture, Media and Sport what proportion of funds awarded by the Big Lottery Fund in 2004–05 went to the four original good causes. [55630]

Mr. Caborn: I refer the hon. Member to the answer which I gave earlier to the right hon. Member for Wells (Mr. Heathcoat-Amory).

Mr. Hancock: To ask the Secretary of State for Culture, Media and Sport how much lottery funding each ward in each local authority in Hampshire classified as disadvantaged has received over the last three years; and what percentage this represented of total lottery funding in each local authority area. [55536]

Mr. Caborn: There is no agreed definition that classifies an area as either deprived or not deprived.

However, information on the number and value of lottery awards by ward and local authority, including in Hampshire, is available on the Department's lottery awards database at www.lottery.culture.gsi.gov.uk

Digital Television

14. **Mr. David Jones:** To ask the Secretary of State for Culture, Media and Sport if she will make a statement on the Government's targeted assistance programme for digital switchover. [55631]

James Purnell: I refer the hon. Member to the answer I gave earlier to the hon. Member for North-East Milton Keynes (Mr. Lancaster).

Local Authorities (Art Sales)

15. **Mr. Gordon Prentice:** To ask the Secretary of State for Culture, Media and Sport if she will discourage local authorities from selling works of art as a way of balancing their budgets. [55632]

James Purnell: The Code of Ethics of the Museums Association, specifies that any decision to dispose of items should not be made with the principal aim of generating funds. I understand that MLA is currently in discussion with those bodies that have recently announced their intention to sell some paintings.

Sports Participation

16. **Mr. Evennett:** To ask the Secretary of State for Culture, Media and Sport what steps she is taking to increase participation in sport. [55633]

19. **Mr. Mackay:** To ask the Secretary of State for Culture, Media and Sport what plans she has to increase participation in sport. [55636]

Mr. Caborn: The Department is committed to its public service agreement target of increasing levels of participation in sport by priority groups by 3 per cent. by 2008. We are implementing a range of measures to achieve this.

Library Services

17. **Mr. Bone:** To ask the Secretary of State for Culture, Media and Sport what steps she is taking to ensure library services are maintained at the current level. [55634]

James Purnell: We are seeking to encourage the best possible library services through measures like the Public Library Service Standards and the publication of Framework for the Future, the first ever national strategy document.

However, ultimately, it is for the 149 library authorities in England to decide how best to deliver those services for their own communities.

Newcastle Gateshead Initiative

18. **Mrs. Hodgson:** To ask the Secretary of State for Culture, Media and Sport if she will make a statement on her Department's involvement with the Newcastle Gateshead Initiative. [55635]

Tessa Jowell: My Department continues to support the Newcastle Gateshead Initiative through the work of bodies for which I am responsible, particularly Arts Council England. I fully endorse Newcastle Gateshead Initiative's belief that culture is a powerful catalyst for regeneration.

Arts Council England

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport whether it is Government policy to reduce the establishment of the Arts Council England; and if she will make a statement. [54674]

Tessa Jowell: One of the recommendations in the report of the Peer Review of Arts Council England (ACE), published in December 2005, was around the establishment of a more streamlined, strategic National Office. This recommendation, along with the others in the report, is endorsed by both ACE and DCMS. With our support, ACE is now undertaking a review of the role and structure of its National Office, the initial findings of which are due at the end of March 2006.

Burma

John Bercow: To ask the Secretary of State for Culture, Media and Sport what the policy of her Department is regarding sourcing goods from Burma. [52222]

Mr. Caborn: The Department does not actively or intentionally source goods from Burma. Its procurement policy is in line with the Government's procurement policy based on value for money, the EU and World Trade Organisation procurement rules and its own policy objectives. The Department has a sustainable timber policy and also takes into account advice from the Department for Environment, Food and Rural Affairs on the procurement of legal and sustainable timber.

Casinos

Mrs. Dorries: To ask the Secretary of State for Culture, Media and Sport which places have submitted expressions of interest for super and regional casinos; and if she will make a statement. [55032]

Mr. Caborn: I refer the hon. Member to the answer I gave to my right hon. Friend the Member for Newcastle upon Tyne, East and Wallsend (Mr. Brown) on 6 February 2006, *Official Report*, column 837W.

Since then, one local authority—Bedford—has clarified that it is interested in a large rather than the regional casino. In addition, one further authority—Newport—has indicated that it is interested in the regional casino.

Cinema Attendance

Mrs. James: To ask the Secretary of State for Culture, Media and Sport what change there has been in cinema attendance figures since 1997. [56175]

James Purnell: Since 1997 cinema attendance figures in the UK have risen by 18.5 per cent. from 138,922,379 at the end of 1997, to 164,691,778 at the end of 2005.

This compares to a 17.9 per cent. rise in France, 4.8 per cent. rise in Italy, and a drop of 11 per cent. in Germany.

Departmental Energy Costs

Mrs. Villiers: To ask the Secretary of State for Culture, Media and Sport how much was spent by her Department on *(a)* gas and *(b)* electricity in 2004–05. [51783]

Mr. Caborn: In the year 2004–05 the Department spent the following amounts:

Gas: £45,002

Electricity: £227,002

Departmental Expenditure

Mr. Laws: To ask the Secretary of State for Culture, Media and Sport how much has been spent by her Department on media training in each year since 1997–98. [55211]

Mr. Caborn: The Department does not record media training separately from other forms of training.

Licensing

Miss McIntosh: To ask the Secretary of State for Culture, Media and Sport what recent representations she has received from voluntary groups on the Licensing Act 2003. [56172]

James Purnell *[holding answer 3 March 2006]*: The Department has received a number of representations on the Licensing Act 2003 from voluntary groups, including one from the hon. Member enclosing correspondence concerning voluntary workers in old people's homes. Ministers are currently considering the views of a wide range of organisations, including some which represent voluntary groups, on the Temporary Events Notice regime. In addition, the Independent Licensing Fees Review Panel has taken evidence from a number of organisations that represent voluntary and not-for-profits groups.

Mrs. James: To ask the Secretary of State for Culture, Media and Sport how many licences for the sale of alcohol over 24 hours have been granted in *(a)* Swansea East and *(b)* Wales. [56173]

James Purnell: This information is held by local licensing authorities.

London Olympics

Keith Vaz: To ask the Secretary of State for Culture, Media and Sport what steps her Department plans to take to encourage a worldwide Olympic truce during the 2012 London Olympics. [55674]

Mr. Caborn: The Host City Contract signed by the International Olympic Committee (IOC), the Mayor of London (on behalf of the City) and the British Olympic Association (BOA) sets out that the City, the BOA and the London Organising Committee for the Olympic Games will promote the principles of Olympism, including the Olympic Truce.

Furthermore, it is customary for each country hosting the Olympic Games to table a resolution in the UN General Assembly in advance of the Games which urges member states to observe the Olympic Truce for the duration of the competition. The UK has co-sponsored these resolutions in advance of recent Games. I anticipate that the UK will wish to maintain the custom when London hosts the Olympic Games and Paralympic Games in 2012.

Keith Vaz: To ask the Secretary of State for Culture, Media and Sport what procurement guidelines are being used for contracts awarded for the 2012 London Olympics. [54756]

Mr. Caborn: The London Development Agency and Transport for London are letting contracts in advance of the establishment of the Olympic Delivery Authority (ODA). The contracts will be let on the basis of a number of established and objective criteria, including cost, quality and capacity to deliver.

The interim ODA is preparing a procurement policy building upon the 'Procurement Principles' it published in September 2005 which set out its commitment to sustainability, design quality, local benefits, regeneration, legacy use and best value for money.

Keith Vaz: To ask the Secretary of State for Culture, Media and Sport what mechanisms are in place to ensure that black and ethnic minority businesses receive a representational proportion of contracts awarded for the 2012 London Olympics. [54757]

Mr. Caborn: The interim Olympic Delivery Authority (ODA) is currently developing the ODA's procurement policy which will set out the ODA's policy on supplier diversity. The Government, the Mayor of London and the London Development Agency are determined to ensure that London and UK-based businesses, including minority-led businesses, are able to bid for and be successful in accessing contracting and subcontracting opportunities arising either directly or indirectly as a result of the 2012 Olympic games and Paralympic games, and are in discussion about a range of programmes to support these businesses.

Mr. Stewart Jackson: To ask the Secretary of State for Culture, Media and Sport what discussions she has had with the East of England Steering Group for the 2012 Olympic and Paralympic games regarding the opportunities for Peterborough to play a role in the 2012 London Olympics. [54893]

Mr. Caborn: My right hon. Friend, the Secretary of State, has had no discussions with the East of England Steering Group for the 2012 games.

However, departmental officials are working with the East of England Steering Group through the Nations and Regions Group to ensure the whole of the UK is engaged with and realises the benefits—economic, social and sporting—from the 2012 Olympic games and Paralympic games.

The East of England Steering Group will be producing a plan to ensure the whole of the region, including Peterborough, benefits from the games.

Museums (Purchasing)

Derek Wyatt: To ask the Secretary of State for Culture, Media and Sport if she will reintroduce a special grant for national galleries and museums to buy works of art that suddenly and unexpectedly come onto the market. [56025]

James Purnell: There are no plans to introduce a special grant for national galleries and museums to buy works of art that suddenly and unexpectedly come onto the market.

National museums and galleries sponsored by DCMS can purchase acquisitions using grant in aid, lottery grant, or self-generated income, including bequests and donations, and can apply for grants from the Heritage Lottery Fund, the National Heritage Memorial Fund, and the Art Fund.

New Opportunities Fund

Mr. Swire: To ask the Secretary of State for Culture, Media and Sport how much money has been *(a)* committed and *(b)* distributed by the New Opportunities Fund since its creation. [55981]

Mr. Caborn: The table shows money committed and distributed by the New Opportunities Fund since its creation until 31 January 2006.

New Opportunities Fund

	£
Commitments	3,237,075,213
Lapsed/revoked	152,602,030
Distributed	2,251,447,190

Sports Bodies

Hugh Robertson: To ask the Secretary of State for Culture, Media and Sport what role the Government plans for *(a)* local sports councils and *(b)* sports trusts. [56483]

Mr. Caborn: It is envisaged that local sports councils will have a key role in shaping and delivering sport at the local level as part of the emerging Community Sports Networks which are alliances of local delivery agents working in partnership to increase participation in sport at a local level.

The Audit Commission is currently undertaking a study into the different types of management arrangements available to local authorities for operating leisure services and how they approach the task of choosing the option best suited to local needs. This is expected to include a consideration of the potential implications of each of these options, including for charitable sports trusts.

I will ensure a copy of the study is placed in the Libraries of both Houses once it is published.

Wembley Stadium

Sarah Teather: To ask the Secretary of State for Culture, Media and Sport if she will make a statement on the construction of Wembley stadium. [54702]

Mr. Caborn: Multiplex, the building contractors, are working hard to finish Wembley stadium as quickly as possible but have been unable to give the Football Association (FA) the 100 per cent. guarantee it needs that the stadium will be completed in time to host the 2006 FA cup final.

A written ministerial statement was made to the House on 27 February 2006 by my right hon. Friend the Secretary of State.

Wembley stadium will be well worth the wait; it will be the best stadium in the world and a great piece of construction engineering. Millions of people will enjoy Wembley stadium and the whole country will take pride in it.

World Cup

Mr. Hands: To ask the Secretary of State for Culture, Media and Sport which of the stadium venues for this year's football World Cup she has visited. [56344]

Mr. Caborn: My right hon. Friend the Secretary of State has not recently visited any of the stadia to be used in the 2006 Football World Cup in Germany.

TRANSPORT

A5 Ring Road

Daniel Kawczynski: To ask the Secretary of State for Transport what discussions he has had about upgrading the A5 ring road in Shrewsbury as an alternative to the north west relief road. [55149]

Dr. Ladyman: The Secretary of State has had no discussions about the upgrading of the A5 ring road as an alternative to the north west relief road.

Aircraft Movements

Mr. Clegg: To ask the Secretary of State for Transport if he will take steps to establish on how many occasions since 1 January 2001 US-registered aircraft *(a)* N44982, formerly N8068V and N379P and *(b)* N313P have landed at a UK airport. [55384]

Ms Buck *[holding answer 2 March 2006]:* I have agreed that Eurocontrol should release their data to Dick Marty, chair of the Legal Affairs and Human Rights Committee of the Parliamentary Assembly of the Council of Europe, on a confidential basis in order to contribute to their inquiry into rendition.

Bingley Relief Road

Philip Davies: To ask the Secretary of State for Transport how many people are waiting for compensation payments agreed with his Department for the work carried out on the Bingley relief road; and when he expects outstanding payments to be paid. [55245]

Dr. Ladyman: As at 1 March, the Highways Agency's valuers (the Valuation Office Agency) have agreed terms with 619 claimants of which 26 have been processed for payment by 7 March. The Highways Agency is waiting for responses to a further 834 compensation offers. Claims will be processed for payment in a rolling programme as soon as all the necessary procedures have been completed. We would expect the majority of the claims to have been paid no later than February 2007.

Digital Smart Cards

Mr. Paterson: To ask the Secretary of State for Transport how many *(a)* company, *(b)* vehicle and *(c)* driver digital smart cards he expects to have been issued by the Driver and Vehicle Licensing Agency by 1 May 2006. [55158]

Dr. Ladyman: Since July 2005 the Driver and Vehicle Licensing Agency (DVLA) have issued 2,751 company cards and 11,110 driver cards. It is not possible to estimate how many will be issued by 1 May 2006, as this will depend on the number of applications the DVLA receives. There is no vehicle digital smart card.

Driving Hours Rules

Mr. Paterson: To ask the Secretary of State for Transport what assessment he has made of the merits of extending the hours rules to cover drivers of *(a)* school buses and *(b)* commercial vans. [55086]

Dr. Ladyman: There are two sets of rules governing drivers' hours in the UK. Most drivers of school buses and commercial vans operate under the UK domestic drivers' hours legislation as opposed to the European Union (EU) Regulations which require the use of tachographs. This is because buses on routes less than 50 kilometres, and goods vehicles under 3.5 tonnes, are specifically exempted from the EU Regulations.

A new EU Regulation on drivers' hours has recently been adopted by the EU institutions. Although, during negotiations, consideration was given to extending the scope of the new regulation to include all buses on routes less than 50 kilometres and light vans between 2.8 and 3.5 tonnes, this change was not made.

Mr. Paterson: To ask the Secretary of State for Transport what assessment he has made of the merits of extending road transport drivers' hours rules to cover the drivers of cars being used for business purposes. [55098]

Dr. Ladyman: We have made no such assessment. However, the "Driving at work" guidance for employers published by the Department and the Health and Safety Executive jointly in September 2003 covers such things as the need for company drivers to have realistic schedules and to consider the need for proper rest, especially after a long working day. That guidance is available online at:

http://www.hse.gov.uk/pubns/indg382.pdf.

Driving Licences

Mr. Clifton-Brown: To ask the Secretary of State for Transport if he will raise the age for provisional driving licences to 18 years. [56239]

Dr. Ladyman: We have no plans to do so. We decided in 2004, following a substantial consultation exercise on a structured approach to learning to drive, that further statutory regulation on the way new drivers learn would be unlikely to make enough of a contribution to road safety to justify legislative action at present.

Foreign-based Freight Operators

Mr. Paterson: To ask the Secretary of State for Transport how many Vehicle and Operator Services Agency lead prosecutions have taken place of *(a)* UK and *(b)* foreign-based freight operators over the last five years. [55165]

Dr. Ladyman: The following table represents UK operators and driver/operators prosecuted by the Vehicle and Operator Services Agency (VOSA) from 2001–02 to date. Data prior to this date is not held by VOSA. VOSA does not hold central data on the prosecution of foreign based operators.

	Number
2001–02	8,692
2002–03	8,718
2003–04	6,830
2004–05	4,927

Haulage Industry

Mr. Paterson: To ask the Secretary of State for Transport when the last review of the regulation of the UK's haulage industry was carried out. [55749]

Dr. Ladyman: We have recently carried out a review of the goods vehicle operator licensing system and we published a consultation paper—"Modernising Operator Licensing"—on 19 December. This sets out proposals for a streamlined regulatory system for the road haulage industry which would reduce administrative burdens for operators while maintaining safety standards. Copies of the paper are available in the Library. The consultation closes on 31 March.

Mr. Paterson: To ask the Secretary of State for Transport what recent assessment he has made of the prospects for the UK haulage industry; and what estimate he has made of the number of commercial haulage operators over the next five years. [55747]

Dr. Ladyman: A joint industry and Government task group is considering the issues raised by the "The Burns Report" (published by the Freight Transport Association and Road Haulage Association), and a number of other important issues that affect the efficiency of the haulage industry.

The Department has made no estimate of the number of commercial operators over the next five years. However, to help the industry to improve its performance and competitiveness, the Department funds the Freight Best Practice programme (at a cost of around £1 million per annum) to identify areas where best practice exists and disseminate information and guides for haulage industry.

HGV Drivers

Mr. Paterson: To ask the Secretary of State for Transport how many and for what offences *(a)* non-UK-based and *(b)* UK-based HGV drivers were prosecuted in the UK in 2005. [55085]

Dr. Ladyman: Full details of the enforcement activities of the Vehicle and Operator Services Agency (VOSA) are published annually in their Effectiveness Report which is available from www.vosa.gov.uk or the House of Commons Library, Business and Transport section.

Mr. Paterson: To ask the Secretary of State for Transport what assessment he has made of the *(a)* demand for and *(b)* supply of heavy goods vehicle (HGV) drivers in the UK; and how many HGV drivers are registered in the UK, broken down by age. [55164]

Dr. Ladyman: The Department for Transport is funding a research programme by Skills for Logistics that will:

Assess the HGV driver trainer pool

Profile the job of an HGV driver

Profile potential recruits into HGV driver occupation

Use the information from the above to assess matching of supply and demand

The numbers of Substantive HGV licence holders by age category in Great Britain at January 2006 was:

Age category	*Licence holders*
17 to 20	709
21 to 25	20,928
26 to 30	57,055
31 to 35	121,063
36 to 40	201,254
41 to 45	226,242
46 to 50	193,803
51 to 55	169,514
56 to 60	183,822
61 to 65	133,057
66 to 70	72,696
71 plus	7,042
Total	1,387,185

To assist the industry in reducing a shortfall in vocational driving, the Young Large Goods Vehicles Drivers Scheme was modernised in April 2003 by relaxing the existing qualifications required by young drivers to join.

In 2004, the fee to add vocational driving entitlement to the licence was abolished.

HGV Licences

Mr. Paterson: To ask the Secretary of State for Transport how many non-UK EU nationals have been issued with a UK heavy goods vehicle licence in the last two years. [55163]

Dr. Ladyman: The Driver and Vehicle Licensing Agency exchanged 14,015 non-British driving licences for British Large Goods Vehicle (LGV) and or Passenger Carrying Vehicle (PCV) entitlement over the last two years.

Mr. Paterson: To ask the Secretary of State for Transport how many heavy goods vehicles operator licences have been *(a)* revoked and *(b)* partially revoked in the last five years. [55166]

Dr. Ladyman: Statistics on the outcome of Traffic Commissioners' Inquiries are published in the Traffic commissioners' Annual Report available from the House of Commons Library or www.dft.gsi.gov.uk.

The following table represents the number of operator licences revoked and suspended in the last five calendar years.

Calendar year	*Revoked*	*Suspended*
2001	255	198
2002	278	167
2003	267	155
2004	247	165
2005	226	135

An operator licence cannot be partially revoked, it can be suspended. A suspended operator is not allowed to operate either all or part of a fleet for a period specified by the Traffic Commissioner.

Historic Vehicles

Mr. Greg Knight: To ask the Secretary of State for Transport if he will take steps to ensure that the operation of the Disability Discrimination Act 2005 does not prevent the use of historic vehicles for tourist services; and if he will make a statement. [55980]

Ms Buck: We do not envisage that the Act will prevent the continued use of historic vehicles on tourist services.

The rail provisions of the Act require that an end-date is set of no later than 1 January 2020 by which time all rail vehicles must be subject to the requirements of rail vehicle accessibility regulations. However, the Act also empowers the Secretary of State to exempt entire railway networks, as well as specified vehicles, and we made clear during the passage of the legislation that we intended to use that power in relation to heritage networks, many of which are essentially tourist services, so as to allow the vehicles serving those networks to continue to operate beyond the end-date. We will be consulting on the revised accessibility regulations, and the draft order to exempt specified networks, shortly.

The 2005 Act amended the Disability Discrimination Act 1995 to enable the exemption from the duties set out in Part 3 of that Act for operators of transport vehicles to be lifted. We have used that power to make regulations that will come into force on 4 December 2006 but they will not require any physical adjustments to be made to rail vehicles and so will not impact on the physical structure of historic vehicles.

Identity Fraud

Mrs. James: To ask the Secretary of State for Transport what progress is being made by the Driver and Vehicle Licensing Agency in reducing identity fraud via the misuse of driving licences. [56018]

Dr. Ladyman: Whilst the main function of the driving licence is to convey entitlement to drive, the Driver and Vehicle Licensing Agency recognises that driving licences are accepted as evidence of identity in a wide range of contexts. To prevent misuse of the licence in identity crime, the Agency operates stringent identity checking procedures so that driving licences are granted only after it is satisfied with the evidence of identity supplied.

All staff handling driving licence applications have been trained in the detection of counterfeit and forged documents, using materials supplied by United Kingdom Passport Agency, Office for National Statistics and the Home Office National Document Fraud Unit.

DVLA is also engaged fully in the Home Office Identity Fraud Reduction Programme, which promotes collaborative working between the public and private sectors and identifies and co-ordinates a range of projects and initiatives to reduce identity crime generally.

Large Goods Vehicles

Mr. Paterson: To ask the Secretary of State for Transport (1) how many large goods vehicles not owned by fleets with a British O licence used British roads in 2004–05; [55100]

(2) what estimate he has made of the number of vehicles registered outside the UK using roads in the UK in each of the last five years. [55349]

Dr. Ladyman: I refer the hon. Member to my answer of 9 January 2006, *Official Report*, column 28W, which gave estimates of the number of foreign registered vehicles leaving the UK in each year from 1997 to 2004. Corresponding information is not yet available for 2005 about the number of cars (including minibuses and light goods vehicles), and estimates are not made about the number of coaches. The corresponding 2005 estimate for goods vehicles is 1,614,000.

Mr. Paterson: To ask the Secretary of State for Transport how many *(a)* goods and *(b)* heavy goods vehicle registrations were issued in each of the last five years. [55346]

Dr. Ladyman: The number of licensed goods and large goods vehicles (LGV) in Great Britain in each of the last five years is as follows:

	Large goods vehicles	*Goods vehicles*	*Total*
January to December			
2001	273,621	50,121	323,742
2002	282,989	43,006	325,995
2003	317,333	35,179	352,512
2004	340,479	33,595	374,074
2005	329,233	33,918	363,151

Lay-bys

Mr. Steen: To ask the Secretary of State for Transport what his Department's policy is on the frequency of lay-bys on *(a)* express ways and *(b)* A roads; and what estimate he has made of the cost of creating a new lay-by. [56479]

Dr. Ladyman: The Department for Transport's policy on the type, location and frequency of lay-bys on new all-purpose trunk roads is contained in the Highways Agency's Advice Note TA 69/96, The Location and Layout of Lay-Bys.

The policy for the provision of new lay-bys on existing roads, including roads designated expressways, depends on the identification of a specific local need. The cost of a new lay-by has to be justified and prioritised against other safety related improvement work.

The desirable spacing of lay-bys on all, new, all-purpose dual carriageway trunk roads is between two and five kilometres. On all new single carriageway all-purpose trunk roads, the spacing of lay-bys is dependent on the traffic flow. The desirable frequency on these roads should be between two and 12 kilometres.

The cost of providing a new lay-by as part of a new road scheme or on an existing road varies considerably. It depends on the individual site conditions, availability of land and requirement for retaining structures etc. but the average cost is approximately £200,000.

M20

Hugh Robertson: To ask the Secretary of State for Transport what discussions the Highways Agency has had with Maidstone borough council concerning the resurfacing between junctions 8 and 9 of the M20. [56484]

Dr. Ladyman: The Highways Agency has regular dialogue with Maidstone borough council however, there have been no discussions concerning the resurfacing between junctions 8 and 9 of the M20.

Motorway Services

Mr. Greg Knight: To ask the Secretary of State for Transport what representations he has received during the past two years in respect of the regulations in force regarding the operation of motorway service stations; from whom they were received; what response he has made; and if he will make a statement. [55755]

Dr. Ladyman: During the last two years the Department has received representations concerning the regulations governing motorway service areas from a number of bodies including: the Motorway Service Area Operators Committee, RoadChef Limited, Welcome Break Limited, Moto Hospitality Limited, the Road Haulage Association, the Freight Transport Association, the RAC Foundation, the AA Motoring Trust and the Association of Chief Police Officers.

The Highways Agency is currently conducting, at my request, a review of policy on motorway service areas, and other roadside facilities, with a view to improving services to motorists but not so that service areas would become destinations in their own right.

As part of this review I intend to carry out a public consultation on proposed changes to the policy guidance during the spring. It would therefore not be appropriate to make a statement at this time.

Railways

Mr. MacShane: To ask the Secretary of State for Transport what assessment he has made of the adequacy of the proportion of trains running between Doncaster and Sheffield that stop at Rotherham Central station. [55794]

Derek Twigg: Services at Rotherham Central are provided by the Northern rail franchise. This franchise has been under review, and I expect to announce conclusions in due course.

Mr. Hollobone: To ask the Secretary of State for Transport what account will be taken of representations from the East Midlands regional assembly in deciding on the future of the Asfordby to Edwalton railway test track. [55390]

Derek Twigg *[holding answer 2 March 2006]:* Before a final decision is made about the future of the Asfordby to Edwalton railway test track, all interested parties including the East Midlands regional assembly will be consulted and their views taken into account.

Mr. Hollobone: To ask the Secretary of State for Transport when the Department expects to meet Network Rail to discuss the findings of Network Rail's review of the provision of railway test facilities in the UK. [55391]

Derek Twigg *[holding answer 2 March 2006]:* The Department for Transport expects to meet Network Rail to discuss its plans for test facilities for the railway industry when their assessment of future needs of test track facilities is complete.

Mr. Hollobone: To ask the Secretary of State for Transport what criteria he used in taking the decision not to take over the ownership and operation of the Asfordby to Edwalton railway test track. [55392]

Derek Twigg *[holding answer 2 March 2006]:* No decision on the future of the Asfordby to Edwalton test track has yet been taken. Following Network Rail's assessment of future needs for test track facilities, if the need to retain the facility is identified, the industry will explore ways to continue the operation.

Mr. Hollobone: To ask the Secretary of State for Transport what assessment has been made of the impact on future railway industry development and research of the closure of the Asfordby to Edwalton railway test track. [55393]

Derek Twigg *[holding answer 2 March 2006]:* Before a final decision on the future of the Asfordby to Edwalton railway test track is taken, full account will be taken of the needs of the railway industry including development and research. Network Rail is currently carrying out an assessment.

Mr. Hollobone: To ask the Secretary of State for Transport what recent discussions have taken place with interested parties on the future of the Asfordby to Edwatton railway test track. [55394]

Derek Twigg *[holding answer 2 March 2006]:* Informal discussions have taken place between the relevant stakeholders.

Road Accidents (Sheppey)

Derek Wyatt: To ask the Secretary of State for Transport how many road traffic fatalities there have been on Jenkins Hill, Sheppey, in the last 30 years. [55108]

Dr. Ladyman *[holding answer 2 March 2006]:* Between 1979 and 2004 (the earliest and latest years for which figures are available) there were two fatalities resulting from personal injury road accident on the Leysdown road (B2231) between Rowetts way roundabout and the entrance to Old Rides Farm; known locally as Jenkins Hill, Sheppey. There were 16 fatalities in total on B2231 east of the Rowetts way roundabout during the period.

Derek Wyatt: To ask the Secretary of State for Transport what representations he has received from Kent county council on road safety, on Jenkins Hill in Sheppey. [55692]

Dr. Ladyman *[holding answer 3 March 2006]:* I am not aware of any specific representations made by Kent county council to the Department for Transport with regard to road safety, in particular reference to Jenkins Hill on the Isle of Sheppey.

In common with all other highway authorities, Kent has a system of identifying areas where there is a poor safety record (in conjunction with the local police force) and develops remedial measures, which are funded through the Local Transport Plan.

Kent county council has sought to reassure the Department that the specific issues at Jenkins Hill are being actively addressed in the same manner as part of this process.

Road Charging

Mr. Paterson: To ask the Secretary of State for Transport what plans he has for the introduction of road charging for hauliers based on road usage. [55230]

Dr. Ladyman: The Government's position was set out in the Secretary of State's statement to Parliament on the Transport Innovation Fund on 5 July 2005 and the Government's response to the Transport Select Committee's report: "Road Pricing: the Next Steps", published on 20 July 2005.

Mr. Greg Knight: To ask the Secretary of State for Transport what criteria he will use to determine the location of initial pilots for road pricing schemes; and what the timescale for implementation is. [55753]

Dr. Ladyman: Decisions on the allocations of TIF funds will be taken following appraisal of their business cases against the criteria set out in "Transport Innovation Fund: Guidance January 2006", copies of which were placed in the Library of the House on 26 January 2006.

Road Safety

Mrs. James: To ask the Secretary of State for Transport what progress is being made in dissuading motorists from using hand-held mobile telephones whilst driving. [56075]

Dr. Ladyman: Twice yearly surveys for the Department observe drivers using mobile phones as they pass a number of fixed observation points. Over 100,000 drivers are observed in each survey, conducted on weekdays. The proportion of drivers passing those observation points in the latest published survey while using a hand-held phone was 1.5 per cent. for car drivers and 2.4 per cent. for the drivers of other vehicles. This compares with 1.5 per cent. and 2.3 per cent. in September 2003.

The most recent published results are contained in TRL's report, Lf 2097, which is available online at

"www.trl.co.uk/store/report_list.asp?pid=211&pno=6&searchtext=&advancedsearch=&allwords=&submitted=1"

under 'Reports numbered 51–58'.

Mr. Arbuthnot: To ask the Secretary of State for Transport what steps he is taking to publicise the requirement for children under the height of 1.3 metres to use an appropriate booster seat in road vehicles; and if he will make a statement. [56248]

Dr. Ladyman: Subject to parliamentary approval of the draft regulations, the Department will be advertising the requirement for children under 135cm to use an appropriate child car seat during the summer months in national newspapers, parenting and women's magazines, national radio and on-line. We will also be working with various media to secure wider editorial features. Our key audiences will be parents, carers and others who carry children in cars and goods vehicles.

Roads Funding (Kent)

Mr. Holloway: To ask the Secretary of State for Transport how much funding from his Department Kent county council has received for its roads budget in each year since 1997. [54938]

Dr. Ladyman: Between 1997 and 2000 Kent county council received approximately £159 million for local transport capital investment. Some additional support was provided for the South Thames-side Development Route Section 4 (in total £16 million).

Since 2000 and the introduction of local transport plans, Kent county council has received around £160 million to support its transport budgets. This amount is provided for road maintenance and integrated transport: it is for the council to decide how much should be spent on roads. The support includes major scheme funding for the Kent Fasttrack public transport scheme.

I have set out the information requested as follows in chart form.

Kent county council

Nature of funding[1]	*1997–98*	*1998–99*	*1999–2000*	*2000–01*	*£ million 2001–02*
Capital Maintenance	—	—	—	6.466	11.513
Integrated Block	—	—	—	4.411	7.600
Major Schemes	—	—	—	5.100	7.600
Total	79.604	34.234	45.312	15.977	26.713

Nature of funding[1]	*2002–03*	*2003–04*	*2004–05*	*2005–06*
Capital Maintenance	12.149	15.108	16.705	19.995
Integrated Block	8.129	8.926	7.896	6.375
Major Schemes	3.726	0.700	8.650	8.868
Total	23.998	24.728	33.251	35.199

[1] Figures for 1997–98 to 1999–2000 are grants supplied under the Transport Policies and Programmes, an annual bidding system.

In addition to the above we have also completed a number of Highways Agency strategic road schemes in Kent. These include the A2/M2 Cobham to Junction 4 widening totalling around £303 million. This funding was not provided to Kent county council.

Rolling Stock

Mrs. James: To ask the Secretary of State for Transport what improvements are to be made to *(a)* First Great Western Trains and *(b)* Arriva Trains Wales rolling stock on services from Swansea under current franchise agreements. [56133]

Derek Twigg: The current First Great Western Trains franchise agreement which expires on 1 April 2006 has no further rolling stock improvements for services from Swansea. There is no specific requirement in the ATW franchise agreement about rolling stock improvements for services from Swansea.

In the early years of the new Greater Western Franchise, First Group will invest £200 million to upgrade trains, improve stations, fund community rail and improve performance.

Sheppey Crossing Bridge

David T.C. Davies: To ask the Secretary of State for Transport how much funding was made available by the Department to run the competition to name the Sheppey Crossing bridge linking Kent with the Isle of Sheppey. [55006]

Dr. Ladyman: No funds were made available by the Department to run the competition to name the Sheppey Crossing bridge. Local newspapers involved in the initiative covered their advertising costs and the winner's prize was donated by the DBFO company.

Tachographs

Mr. Paterson: To ask the Secretary of State for Transport what plans he has to reduce the size threshold for vehicles requiring tachographs. [55159]

Dr. Ladyman: We have no such plans. European Union (EU) Regulations require the use of tachographs in most goods vehicles over 3.5 tonnes and in certain buses and coaches operating within the UK.

Changes in the new EU Regulation on drivers' hours which has recently been adopted by the EU institutions will mean that tachographs will have to be fitted to some previously exempted vehicles by 31 December 2007. But these changes do not affect goods vehicles under 3.5 tonnes.

Mr. Paterson: To ask the Secretary of State for Transport how long it will take for the Driver and Vehicle Licensing Agency to complete the issuing of the required numbers of *(a)* driver, *(b)* vehicle and *(c)* company smart cards connected with the introduction of digital tachographs. [55160]

Dr. Ladyman: As there is no requirement for a digital tachograph card until the driver or company is using or likely to use a vehicle fitted with a digital tachograph unit, it is not possible for the DVLA to answer this question. The timescale by which all cards are issued will depend upon when drivers or companies apply for their driver or company cards. There is no vehicle smart card.

Mr. Paterson: To ask the Secretary of State for Transport how many tachograph analysis companies are *(a)* operating in the UK and *(b)* subcontracted by the Vehicle and Operator Services Agency. [55161]

Dr. Ladyman: The information requested is as follows:

(a) The Vehicle and Operator Services Agency (VOSA) do not hold records of how many tachograph analysis companies are operating in the UK.

(b) Currently there are three companies subcontracted by the VOSA to analyse tachograph record sheets.

Mr. Paterson: To ask the Secretary of State for Transport how many vehicles are forecast to be equipped with digital tachographs in the UK *(a)* by May 2006 and *(b)* in each of the next five years. [55173]

Dr. Ladyman: The operators and drivers of certain heavy goods and public service vehicles are required to use tachographs to record drivers' compliance with the EU drivers' hours rules.

At the moment, either analogue or digital tachographs can be used. However, digital tachographs should become mandatory for in-scope vehicles put into service for the first time after early May 2006.

Since digital tachographs are not yet mandatory, it is not known how many vehicles have been so equipped. The number of vehicles to be digital-tachograph equipped in each of the next five years will depend on the numbers of in-scope vehicles put into service for the first time during that period.

Mr. Paterson: To ask the Secretary of State for Transport what assessment he has made of the adequacy of the supply of digital tachographs for recently registered large goods vehicles in the UK. [55231]

Dr. Ladyman: Until digital tachographs become mandatory, operators are free to choose whether to fit analogue or digital tachographs to new vehicles. As far as the Department is aware, neither tachograph nor vehicle manufacturers are reporting any difficulties in supplying type-approved digital tachographs to whoever requires them.

Mr. Paterson: To ask the Secretary of State for Transport what date has been set for the introduction of the digital tachograph. [55348]

Dr. Ladyman: The operators and drivers of certain heavy goods and public service vehicles are required to use tachographs to record drivers' compliance with the EU drivers' hours rules. Under Council Regulation (EC) No. 2135/98, such in-scope vehicles put into service for the first time after 5 August 2004 were required to be fitted with a digital tachograph. However, digital tachographs were not available by that date and the requirement could not be enforced.

The Council and European Parliament agreed last December to change the August 2004 date to ensure legal clarity. This will be achieved through a clause in a new EU Regulation on drivers' hours which will amend Regulation (EC) No. 2135/98. The effect of this amendment will be to require the use of a digital tachograph in vehicles put into service for the first time from a date 20 days after formal publication of the new EU Regulation on drivers' hours. Publication is expected in early April and digital tachographs should become mandatory for new vehicles from early May 2006.

Mr. Paterson: To ask the Secretary of State for Transport what research he has evaluated on the quality of analysis by independent tachograph chart analysis bureaux. [55745]

Dr. Ladyman: We have not conducted an evaluation—operators make their own commercial judgments about the use and quality of independent tachograph chart analysis bureaux.

Mr. Paterson: To ask the Secretary of State for Transport how many tachographs were issued in the UK over the last five years. [55750]

Dr. Ladyman: Tachographs are not issued as such, but the operators and drivers of certain heavy goods and public service vehicles are required to use tachographs to record drivers' compliance with the EU drivers' hours rules.

Traffic Growth (Peterborough)

Mr. Stewart Jackson: To ask the Secretary of State for Transport what his projections are for traffic growth on trunk roads in Peterborough in each of the next 10 years. [54858]

Dr. Ladyman: There are no recent projections of traffic growth on either of the two trunk roads, the A1 and A47, within the city of Peterborough but road based journeys to and from Peterborough are forecast to increase by about 19 per cent. over the next 10 years.

Trunk Road Resurfacing

Mr. Stewart Jackson: To ask the Secretary of State for Transport what progress has been made on the Government's target outlined in the 10-year Transport Plan to resurface 60 per cent. of the trunk road network by 2010 with quieter road surfacing; and if he will make a statement. [54909]

Dr. Ladyman: To date, the Highways Agency has resurfaced approximately 30 per cent. of the strategic road network with quieter materials.

Vehicle and Operator Services Agency

Mr. Paterson: To ask the Secretary of State for Transport how many Vehicle and Operator Services Agency inspectors there were on the latest date for which figures are available; and how many are projected for each of the next five years. [55350]

Dr. Ladyman: The following table shows a number of Vehicle and Operator Services Agency (VOSA) roles including vehicle inspection. These figures are the most recent available (1 March 2006).

VOSA roles	*Number of inspectors*
Tester	84
Traffic Examiners	216
Vehicle Inspectors	422
Vehicle Examiners	535
Enforcement Support Officer	35

VOSA's value for money plans anticipate a reduction of approximately 270 mainly administrative and testing positions over the next two years in which event, VOSA intend to 're-invest' approximately 100 positions predominately in enforcement roles.

Exact figures for specific job positions have not yet been finalised. VOSA also anticipate an increase of up to 100 mainly enforcement positions as a result of new work commencing in the next two years such as enforcement of the working time directive.

VOSA have not currently made a prediction about staffing levels beyond the next two years.

Working Time Directive

Mr. Paterson: To ask the Secretary of State for Transport how many and what proportion of non-UK registered vehicles were physically checked by *(a)* the Vehicle and Operator Services Agency and *(b)* the police for compliance with hours rules and Working Time Directive regulations over the past five years; and how many and what proportion of these were found not to be in compliance with (i) one and (ii) both sets of regulations. [55073]

Dr. Ladyman: The Vehicle and Operator Services Agency (VOSA) publish enforcement data annually in their Effectiveness Report which is available on www.vosa.gov.uk and in the House of Commons Library, Business and Transport Section.

Data is not collected centrally on checks conducted by the police. The Home Office publication of prosecutions for motoring offences gives the prosecutions for certain offences but does not differentiate between UK and non-UK registered vehicles.

Mr. Paterson: To ask the Secretary of State for Transport what assessment he has made of the costs of compliance with the hours rule and Working Time Directive. [55087]

Dr. Ladyman: The European drivers' hours rules (Council Regulation (EEC) No 3820/85) were adopted in 1985 and are directly applicable. We have made no recent assessment of the compliance costs.

The Regulatory Impact Assessment (RIA) for the Road Transport (Working Time) Regulations 2005 (SI 2005/639), which implemented European Directive 2002/15/EC on working time for mobile workers in Great Britain, estimated a compliance cost of £280 to £365 million per annum (copies of the RIA are available in the Libraries of the House). In practice, some early indications suggest that the compliance cost may have been overestimated. At this stage, it is still too early to assess the full impact of the regulations, but a review scheduled for later this year, will consider the actual impact on industry since they came into force in April 2005.

Mr. Paterson: To ask the Secretary of State for Transport what assessment he has made of the consistency of approach taken by different EU member states on the monitoring of the compliance of fleets of regulated vehicles with *(a)* hours rules and *(b)* Working Time Directive regulations. [55088]

Dr. Ladyman: All member states are required to submit a biennial return on the implementation of the drivers' hours rules to the European Commission which, in turn, produces a report based on the information received. The last European Commission report covered the years 1999 and 2000. Explanatory Memorandum No 9347/04 advised Parliament of that report.

Directive 2002/15/EC requires member states to put in place penalties to deal with breaches of the working time requirements. Although penalties must be effective, proportionate and dissuasive, there is no requirement for a consistent approach across member states. The enforcement method used is determined by the member state in question. The introduction of a consistent approach to procedures for checking compliance with the requirements of the directive would need to be agreed at a European level.

Mr. Paterson: To ask the Secretary of State for Transport what assessment he has made of the merits of requiring managers of regulated vehicle fleets to have their compliance with the hours rules and Working Time Directive Regulations audited by independent third parties operating under Government licence. [55097]

Dr. Ladyman: The use of independent third parties operating under Government licence to audit employers' compliance with the EU Drivers' Hours Rules and the Road Transport (Working Time) Regulations 2005 (SI 2005/639), which implement directive 2002/15/EC on working time for mobile workers in Great Britain, has not been assessed. The Vehicle and Operator Services Agency is responsible for enforcing the longstanding EU Drivers' Hours Rules and the 2005 Regulations. The current enforcement regime aims to minimise the regulatory cost and bureaucracy placed on industry, while meeting the enforcement requirements of European legislation.

Mr. Paterson: To ask the Secretary of State for Transport how many hauliers have been prosecuted for infringements of the working time directive in the last 12 months, broken down by category of offence. [55167]

Dr. Ladyman: The Vehicle and Operator Services Agency (VOSA) has made no prosecutions for infringements of the working time directive since it was implemented on 4 April 2005.

TREASURY

Capital Gains Tax

Mr. Pickles: To ask the Chancellor of the Exchequer what the capital gains tax status is of shared ownership sales by housing associations. [56192]

John Healey: Under the current rules non-charitable housing associations will be within the charge to corporation tax and liable to pay tax on chargeable gains, including those arising under shared ownership arrangements. The amount of such gains may be reduced by the various forms of relief that are available to companies, including the ability to deduct capital losses and the indexation allowance leaving only the net figure liable to tax.

Census Categories

Lynne Featherstone: To ask the Chancellor of the Exchequer what factors determine which ethnic groups are included under the census ethnic group categories; how those factors were applied in determining whether to include Turkish as a category; and if he will make a statement. [56022]

John Healey: The information requested falls within the responsibility of the national statistician who has been asked to reply.

Letter from Karen Dunnell, dated 6 March 2006:

As National Statistician, I have been asked to reply to your Parliamentary Question on what factors determine which groups are included under the Census ethnic group categories, and how these factors were applied in determining whether to include Turkish as a category. (56022).

The ethnic group classification in the 2001 Census was designed to allow the majority of people to use a tick box to answer the question. Since it would be impractical to list every ethnic group with a presence in the United Kingdom, the ethnic group categories shown are limited to those groups which have the largest presence in the population, for whom a substantial user need has been identified, and for whom other identifying information such as country of birth is not sufficient. Other criteria that are considered are continuity of categories over time and comparability across Censuses of the constituent countries of the United Kingdom.

The Office for National Statistics recognises that the ethnic groups named in the classification will not apply to all respondents. A tick box for 'Other, please specify' was included to allow respondents to identify their ethnic group if those listed did not apply to them. For your information, 65,318 people wrote in either Turkish (49,946) or Turkish Cypriot (15,372) in the United Kingdom in 2001. Of these, all but 418 were in England and Wales. The number of people who identify themselves using a write-in box, however, tends to be lower than the number who would give the same answer if a tick-box were provided.

The Office for National Statistics is currently reviewing the ethnic group question for the 2011 Census, including consideration of which groups are named in the classification.

EU Membership

Mr. Hayes: To ask the Chancellor of the Exchequer if he will list the *(a)* complete and *(b)* unfinished studies held within his Department analysing costs and benefits of EU membership. [33265]

Mr. Ivan Lewis: The Treasury routinely considers the wide range of external studies that attempt to assess the economic implications of aspects of EU membership.

The Government estimate that 3 million jobs in the UK are dependent on trade with the European Union. The Government's February 2005 publication "Growth and Opportunity: Prioritising Economic Reform in Europe" highlighted the economic benefits of the single market, the costs of remaining barriers to enterprise, competition and trade in the EU, and the importance of economic reform to address these.

Financial Literacy

Mr. Drew: To ask the Chancellor of the Exchequer what initiatives he is supporting to improve financial literacy. [55427]

Mr. Ivan Lewis: The Government are committed to improving financial education, which is why the Chancellor announced in the 2005 pre-Budget report that financial capability would be embedded more explicitly in the schools curriculum by including it in the new functional mathematics component of GCSE mathematics. The Government are also taking steps to strengthen adult financial literacy. Building on the work of Skills for Life it will embed financial capability in functional maths aimed at adults and encourage local authorities to provide more financial education to parents through Sure Start Children's Centres and locally delivered family numeracy activities. In addition the Government will provide information on opportunities for financial education to applicants for Social Fund Budgeting Loans.

The Government are also very supportive of the FSA led National Strategy for Financial Capability which has identified seven key projects that are considered the most likely to result in a step change in financial capability. The FSA's Financial Capability survey, whose results are due to be published on 28 March, will be important both in defining the levels of financial capability within the general population and for measuring future progress of the strategy.

Growth Forecasts

Mr. Bone: To ask the Chancellor of the Exchequer what measures he is taking to improve the reliability of growth forecasts. [55152]

Mr. Hollobone: To ask the Chancellor of the Exchequer what steps he is taking to improve the reliability of forecasts of economic growth. [55950]

John Healey: I refer the hon. Member for Wellingborough to the answer I gave to the hon. Member for South-West Surrey (Mr. Hunt) on the 2 March 2006; *Official Report*, column 392.

Independent Schools

Lynne Jones: To ask the Chancellor of the Exchequer pursuant to the answer of 6 February 2006, *Official Report*, column 1008W to the hon. Member for Buckingham, on independent schools, if he will make it his policy to collect the information in a way that will enable different organisations to be separately identified. [55691]

Mr. Ivan Lewis: To provide historical information in this format would involve a major and disproportionately costly review of tens of thousands of charity records. To do

so in the future would involve significant compliance costs to charities and would increase the administrative cost of HMRC.

Insurance (Genetic Testing)

Sandra Gidley: To ask the Chancellor of the Exchequer what plans he has to introduce legislation that would ban insurance firms from using predictive genetic test results to decide premiums; and if he will make a statement. [53037]

Jane Kennedy: I have been asked to reply.

The consultation and analysis done by the human genetics commission jointly with the genetics and insurance committee (GAIC) has been used to inform the development of the Government's and insurer's "Concordat and Moratorium on Genetics and Insurance", published in March 2005. This document ensures that the use of genetic information by insurance companies will be transparent, fair, and subject to independent oversight. It sets out a range of protections against the use of genetic information by insurers and puts in place until November 2011 a voluntary agreement banning the use by insurers of the results from predictive genetic tests, including tests on breast cancer genes, in deciding the premiums of insurance policies.

During the moratorium no one will be required to disclose the results of a predictive genetic test unless it has been approved by the GAIC and is for insurance of more than £500,000 for life insurance or £300,000 for other health insurance. To date, the only test that has been approved by GAIC is for Huntington's disease for life insurance polices over £500,000, and no applications for any other tests will be submitted before 2008.

The current agreement with the insurance industry is flexible enough to respond to fast moving technological and clinical developments in genetic testing. The Government has made clear that any failure of the agreement will lead to the reconsideration of the need for statutory control. Copies of the Concordat are available in the Library and are also available on the Department's website at www.dh.gov.uk/publications.

Landfill Tax

Mr. Keetch: To ask the Chancellor of the Exchequer if he will consider raising the landfill tax to encourage more local authorities to recycle commercial waste; and if he will make a statement. [56705]

John Healey: The Government announced in the pre-Budget report that the standard rate of landfill tax will increase by £3 per tonne to £21 per tonne in 2006–07.

This increase is consistent with the Government's commitment to increase the standard rate of landfill tax by at least £3 per tonne each year on the way to a rate of £35 per tonne.

Decisions on future rates of landfill tax will be taken as part of the normal Budget process.

Lone Parents

Mr. Laws: To ask the Chancellor of the Exchequer what proportion of lone parents are *(a)* in (i) full-time and (ii) part-time work and *(b)* not in employment; and if he will make a statement. [55821]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Colin Mowl, dated 6 March 2006:

The National Statistician has been asked to reply to your Parliamentary Question about lone parents. I am replying in her absence. (55821)

The attached table gives the number and percentage of lone parents with dependent children in full-time and part-time employment and of those not in employment, for the latest available period ending in November 2005.

Estimates are taken from the Office for National Statistics Labour Force Survey (LFS). As with any sample survey, estimates from the LFS are subject to a margin of uncertainty.

Lone parents [1] aged 16 and over by economic status United Kingdom, not seasonally adjusted

Three months ending November 2005	*Number of lone parents (000)*	*Per cent.* [3]
All lone parents aged 16 and over	1,858	100.0
All in employment [2]	1,026	55.2
Full-time	540	29.0
Part-time	486	26.1
Not in employment	832	44.8

[1] Refers to people who are not married or cohabiting and have dependent children, who are defined as 0 to 15-year-olds, or 16 to 18-year-olds in full-time education.

[2] Includes those who did not state whether they worked full or part time.

[3] As a percentage of all lone parents.

Note:

Excludes lone parents of unknown economic activity

ONS Labour Force Survey

Maternity Statistics

Rosie Cooper: To ask the Chancellor of the Exchequer how many births there were to women resident in the Cheshire and Merseyside strategic health authority *(a)* in maternity hospitals, *(b)* in midwife-led units, *(c)* at home and *(d)* at other locations in each year since 2000. [56404]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Colin Mowl, dated 6 March 2006:

The National Statistician has been asked to reply to your request for the number of births to women resident in the Cheshire and Merseyside Strategic Health Authority at *(a)* individual maternity hospitals, *(b)* midwife-led units, *(c)* home and *(d)* other locations in each year since 2000. I am replying in her absence. (56404)

The latest available figures are for 2004. The table below relates to babies born in England and Wales to women usually resident in the Cheshire and Merseyside Strategic Health Authority area at the time of the birth. Figures are presented for categories *(a)* and *(b)* combined, *(c)* and *(d)*. Information is not available centrally on which of these institutions are mid-wife led units.

Hospitals where more than 30 live births took place over the period 2000 to 2004 have been shown individually; the remaining ones have been aggregated in the 'Other hospitals' sub-total.

Births in the 'Elsewhere' category are mainly those occurring on the way to hospital or at a private residence which is not that of the mother.

Live births by place of occurrence for women resident in Cheshire and Merseyside SHA area 2000–04

	Place of occurrence	*Year of occurrence* 2000	2001	2002	2003	2004
(a) and (b)	*Maternity hospital/unit*					
	Liverpool Women's Hospital	5,894	5,793	5,808	6,111	7,674
	Arrowe Park Hospital	3,158	3,076	3,012	3,252	3,273
	Warrington Hospital	3,055	2,828	2,871	2,948	3,015
	Whiston Hospital	2,696	2,549	2,424	2,548	2,730
	Leighton Hospital	2,365	2,513	2,351	2,490	2,646
	Countess of Chester Hospital	2,371	2,371	2,249	2,388	2,495
	Macclesfield District General	1,422	1,367	1,387	1,431	1,525
	Ormskirk District General Hospital	167	177	184	733	1,328
	Fazakerley Hospital	2,565	2,252	2,228	2,189	322
	Wythenshawe Hospital	220	227	220	238	213
	Stepping Hill Hospital	152	137	114	106	137
	Christiana Hartley Maternity Hospital, Southport	909	894	876	420	134
	Billinge Hospital	260	249	235	249	132
	Royal Albert Edward Infirmary, Wigan	0	0	0	0	83
	North Staffordshire Maternity Hospital	92	85	82	77	82
	St. Marys Hospital, Whitworth Park	48	58	56	60	68
	Ysbyty Maelor, Wrexham	26	31	38	43	26
	Hope Hospital	13	23	15	20	18
	Trafford General Hospital	16	25	16	19	14
	Other hospitals[1]	53	60	52	64	67
(c)	At home	252	217	254	266	299
(d)	Elsewhere	23	26	30	38	30
	Total	25,734	24,932	24,572	25,652	26,281

[1] There were 115 hospitals/units in the 'Other' category where there was at least one birth in the period 2000 to 2004.

Media Training

Mr. Laws: To ask the Chancellor of the Exchequer how much has been spent by his Department on media training in each year since 1997–98. [55224]

John Healey: The cost of media training, being the provision by external suppliers of training to prepare senior officials to be interviewed for television and/or radio, is not recorded in the Treasury's accounting system separately from other forms of training. Therefore figures for spending on media training, if any, over the period referred to could be provided only at disproportionate cost.

North-east Region (Economic Growth)

Mrs. Hodgson: To ask the Chancellor of the Exchequer what assessment he has made of the relationship between the level of skills in the work force and economic growth in the north east region; and if he will make a statement. [55479]

John Healey: Skills are vital to the stability and growth of the economy. Increases in an economy's trend rate of growth are supported by how many people are in employment and how productive they are. Skills are one of the drivers of productivity, which is why the Government have more than doubled overall investment in education and skills since 1997.

The North East Development Agency and its partner organisations, including the Learning and Skills Council, set out the contribution that skills makes to economic growth in the north east in their regional economic strategy and through their regional skills partnership statement of priorities.

The Chancellor has also commissioned the Leitch Review of Skills, an independent review of the UK's skills needs, which published its interim report alongside the pre-Budget report 2005. It sets out the extent of current evidence on the relationship between workforce skills and employment, and their role in reducing inequalities in regional economic growth.

Pensions

Mrs. Villiers: To ask the Chancellor of the Exchequer if he will break down the number of active members of schemes referred to in Table 3.14 of Occupational pension schemes 2004: the twelfth survey by the Government Actuary by *(a)* normal pension age, *(b)* sector and *(c)* benefit type; whether those public sector employees who are not members of public service schemes are treated as being in the public sector category; and whether the data for public and private sector schemes are consistent with previous such surveys by the Government Actuary. [54517]

Mr. Ivan Lewis: The definitions of public sector and private sector pension schemes are set out in paragraphs 1.13 and 1.14 of the report 'Occupational pension schemes 2004: Twelfth Survey by the Government Actuary'. This follows a classification used by the pension schemes registry. Exactly the same approach was adopted for the previous (2000) survey. Members of schemes are categorised according to the scheme of which they are a member, and not by the sector in which

they are employed. Those employees in both the public and private sector who are not members of occupational pension schemes are not recorded in the survey.

Pensions Mis-selling

Mr. Spring: To ask the Chancellor of the Exchequer for what reason people who were mis-sold endowment policies between April and August 1988 are not *(a)* protected by and *(b)* entitled to compensation under existing arrangements. [55741]

Mr. Ivan Lewis: The Financial Ombudsman Service is able to consider complaints about investment business conducted from 29 April 1988. The financial services compensation scheme, which provides compensation to those consumers who have a claim against an authorised firm which has been declared in default, is able to consider claims from 28 August 1988.

Investment firms were authorised for the first time with effect from 29 April 1988 under the Financial Intermediaries, Managers and Brokers Regulatory Association (FIMBRA), which was established under the Financial Services Act 1986. The investors compensation scheme was established under the Financial Services Act with effect from 28 August 1988. A compensation scheme for investors did not exist before that date.

Personal Debt

Mr. Stewart Jackson: To ask the Chancellor of the Exchequer if he will take steps to enable data on personal debt to be collected by county. [55698]

John Healey: Personal debt level statistics are produced by the Bank of England. There are no plans to extend this dataset to include county level data.

Planning Gain Supplement

Mr. Pickles: To ask the Chancellor of the Exchequer if he will place in the Library copies of each response to the Treasury/Office of the Deputy Prime Minister consultation on Planning-gain Supplement. [56191]

John Healey: The Government's consultation on the proposed Planning-gain Supplement (PCS) closed on 27 February 2006. A summary of responses to the consultation will be published in due course.

Population Statistics

Mr. Evans: To ask the Chancellor of the Exchequer what the population of each *(a)* Lancashire constituency and *(b)* Ribble Valley ward was according to (i) figures from the 2001 census, (ii) the most recent electoral rolls and (iii) the most recent figures for health service users; and what projections he has made for the next five years. [55882]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Colin Mowl, dated 6 March 2006:

The National Statistician has been asked to reply to your recent Parliamentary Question regarding the population of each *(a)* Lancashire constituency *(b)* each Ribble Valley ward according to figures from (i) the 2001 Census, (ii) most recent electoral rolls, and (iii) most recent figures for health service users; and what projections have been made for the next five years. I am replying in her absence. (55882)

The tables attached provide the information you have requested. Data for Lancashire constituencies are shown in Table 1 and Table 2. Data for Ribble Valley wards are shown in Table 3.

Electoral rolls provide counts of the number of people registered to vote. Local/European electorate and Parliamentary electorate counts for Lancashire constituencies can be found in Table 1 The 2005 figures are the latest available data. It should be noted that the number of people eligible to vote is not the same as the resident population aged 18 and over. There are a number of reasons for this. For example not everyone who is usually resident is entitled to vote (foreign citizens from outside of the EU and Commonwealth, prisoners, etc. are not eligible), some people do not register to vote and people who have more than one address may register in more than one place. Further, there is inevitably some double counting of the registered electorate as electoral registration officers vary in how quickly they remove people from the registers after they have moved away from an area or after they have died. These factors have a differential impact from area to area.

The number of people registered with a GP, living in each Lancashire constituency, in July 2004, can also be found in Table 1. It should also be noted that patient register counts differ from estimates of the usually resident population for a number of reasons.

Patient registers include people who are in the country for at least three months, whereas population estimates are based on a usual residence definition requiring a stay of 12 months or more. The patient registers exclude individuals who are ineligible to be registered with a GP. People may be on a patient register after having left the country and not deregistered with their GP; similarly people may have moved to another area and not re-registered. Some patients may have more than one NHS number e.g. they may have been issued a temporary number for a short period. Again, these factors have a differential impact from place to place.

The projections in Table 2 for mid-2006 to mid-2010 are based on the mid-2003 population estimates and are the latest population projections available. They assume that trends in fertility, mortality and migration at the time of the mid-2003 population estimate will continue into the future. Population projections are not available for most of the Lancashire constituencies because projections are not routinely produced for constituencies. Local Authority population projections are however produced, and where constituency projections are shown, this reflects that these constituencies have common boundaries with local authority districts.

Ward data are shown in Table 3; the points set out above also apply to wards. However, there are some further points to note for wards. The local government electorate is definitionally closer to the population estimates; however these data are not available at ward level. Hence, the Parliamentary electorate is shown, the most recent data available are for December 2004.

The ONS does not produce projections of population at ward level.

Table 1: 2001 Census, Electoral Register Counts (December 2005) and Patient Register counts (July 2004) for Lancashire Constituencies

	2001 Census April 2001	*Local Government Electors[1] December 2005*	*Parliamentary Electors[2] December 2005*	*Patient Registers July 2004*

Office for National Statistics

Private Schools

Mr. Hancock: To ask the Chancellor of the Exchequer if he will estimate the effect on tax revenue of the charitable status of private schools in the last year for which figures are available. [56232]

Mr. Ivan Lewis: I refer the hon. Gentleman to the answer I gave to the hon. Member for Buckingham (John Bercow) on 6 February 2006, *Official Report*, column 1008W.

Security Industry

Mrs. Dorries: To ask the Chancellor of the Exchequer how many people are employed in the security industry in *(a)* Bedfordshire and *(b)* England and Wales; and if he will make a statement. [54934]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Colin Mowl, dated 6 March 2006:

The National Statistician has been asked to reply to your Parliamentary Question concerning how many people are employed in the security industry in *(a)* Bedfordshire *(b)* England and Wales. I am replying in her absence. (54934).

The Annual Business Inquiry gives figures of economic activity by industry and can provide a regional analysis of the data. The latest figures available relate to the number of employees at 10 December 2004 and cover the industry group "Investigation Activities and Security and Related Activities". We estimate that at that date around 1 thousand people were employed by Bedfordshire firms in that group and around 148 thousand by firms in the same group in England and Wales.

Tax Havens

Andrew George: To ask the Chancellor of the Exchequer if he will list the countries which the Government has designated as tax havens; and how many such countries are *(a)* British Crown Dependencies and *(b)* Overseas Territories. [55057]

Mr. Ivan Lewis: The UK Government do not designate any jurisdictions as tax havens.

Treasury Advisers

Dr. Cable: To ask the Chancellor of the Exchequer (1) what *(a)* payments and *(b)* bonuses were received by (i) James Wardlaw, (ii) Chris Houston and (iii) Sir Adrian Montague as remuneration for their work in the Treasury; [54712]

(2) what precautions his Department takes to ensure that privileged information gained by advisers to the Treasury cannot be used for gain in private business dealings; [54713]

(3) under what restrictions regarding future business ventures and potential conflicts of interest *(a)* James Wardlaw, *(b)* Chris Houston and *(c)* Sir Adrian Montague were placed when they left the Treasury; [54714]

(4) what projects James Wardlaw has been involved with in his Department since 1 May 1997; [54748]

(5) what projects Sir Adrian Montague has been involved with in his Department since 1 May 1997; [54749]

(6) what projects *(a)* Chris Houston and *(b)* James Wardlaw have been involved with in the Treasury since 1 May 1997; [54750]

(7) what positions Sir Adrian Montague has held in respect of private finance initiative projects within the Treasury. [54752]

John Healey: Sir Adrian Montague headed the Treasury Taskforce recommended by the Bates Review of PFI, from 1997 to 2000. The taskforce was concerned with the strengthening of the PFI policy framework and delivery of good quality PFI contracts and projects. James Wardlaw worked for the Treasury as a senior specialist in corporate finance from 2002 to 2005, offering advice to a variety of Treasury teams drawing on his professional background and training. Chris Houston has never been employed by HM Treasury.

The Treasury does not disclose pay details for individuals below board level. All Treasury staff are subject to the rules on acceptance of outside appointments by Crown servants as set out in the Civil Service Management Code. Staff are required to continue to observe their duty of confidentiality after they have left Crown service.

Unemployment

Mr. Paul Murphy: To ask the Chancellor of the Exchequer how many people in Torfaen constituency *(a)* under the age of 25 years and *(b)* over the age of 25 years were long-term unemployed in each year since 1997. [55827]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Karen Dunnell, dated 6 March 2006:

As National Statistician, I have been asked to reply to your Parliamentary Question about unemployment. (55827)

The Office for National Statistics (ONS) compiles statistics of unemployment for local areas from the annual local area Labour Force Survey (LFS) and the Annual Population Survey (APS) following International Labour Organisation definitions.

However, for the Torfaen Parliamentary Constituency, sample numbers are insufficient to provide the estimates requested.

ONS also compiles statistics for local areas of people claiming Jobseeker's Allowance (JSA). The attached table shows the annual average number of ISA claimants, aged under 25, and aged 25 and over, resident in the Torfaen constituency, who were claiming for over 12 months, since 1997.

JSA claimants resident in the Torfaen parliamentary constituency
Annual averages

	Long-term (claiming over 12 months)[1]	
	Aged under 25	*Aged 25 and over*
1997	110	480
1998	55	300
1999	5	295
2000	5	205
2001	0	185
2002	5	170
2003	5	165
2004	0	115
2005	10	80

Jobcentre Plus Administrative system

Mr. Stewart Jackson: To ask the Chancellor of the Exchequer what the rate of *(a)* unemployment, *(b)* long-term unemployment and *(c)* youth unemployment was in Peterborough in each year since 1997; and how many individuals this represented in each case. [54815]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Karen Dunnell, dated 6 March 2006:

As National Statistician, I have been asked to reply to your Parliamentary Question about unemployment. (54815)

The Office for National Statistics (ONS) compiles statistics of unemployment for local areas from the annual local area Labour Force Survey (LFS) and the Annual Population Survey (APS) following International Labour Organisation definitions.

Table 1 shows rates and levels for all persons unemployed and youth (aged 16 to 24) unemployed resident in the Peterborough Parliamentary Constituency from the annual local area LFS for each 12 months ending February 1998 to February 2004. Sample numbers are insufficient to provide estimates of long-term unemployment.

These estimates, as with any from sample surveys, are subject to a margin of uncertainty. Changes in the estimates from year to year should be treated with particular caution.

ONS also compiles statistics for local areas of people claiming Jobseeker's Allowance (JSA). Table 2 shows the annual average number of JSA claimants, and as a proportion of the resident working age population, those claiming for over 12 months and claimants aged 18 to 24, resident in the Peterborough constituency since 1997.

Table 1: Unemployed persons resident in the Peterborough parliamentary constituency

12 months ending	*All (16+)*		*Youth (aged 16 to 24)*	
	Level (000s)	*Rate*[1] *(percentage)*	*Level (000s)*	*Rate*[1] *(percentage)*
February 1998	6	12	2	17
February 1999	3	7	2	27
February 2000	4	8	1	11
February 2001	3	6	1	8
February 2002	3	6	1	16
February 2003	3	6	1	11
February 2004	2	5	1	11
March 2005	2	4	1	11

[1] Percentage of the economically active resident population.
Note:
Estimates are subject to sampling variability. Changes from year to year should be treated with particular caution.

Winter Mortality

Lynne Featherstone: To ask the Chancellor of the Exchequer what the excess winter mortality *(a)* rate and *(b)* numbers were for (i) those aged 65 to 80 years, (ii) those aged over 80 years and (iii) all ages in (A) the UK, (B) England, (C) Scotland, (D) Wales, (E) each London borough and (F) Hornsey and Wood Green in each of the last five years; and if he will make a statement. [55099]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Karen Dunnell, dated 6 March 2006:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking what the excess winter mortality *(a)* rate and *(b)* numbers were for (i) those aged 65 to 80 years, (ii) those aged over 80 years, and (iii) all ages in (A) the UK, (B) England, (C) Scotland, (D) Wales, (E) each London Borough, and (F) Hornsey and Wood Green, in each of the last five years. (55099)

I am placing in the House of Commons Library, a table giving the available figures on excess winter deaths (the excess number of deaths each winter compared to the average during other months of the year) by age group and area. The table gives the excess winter mortality (EWM) index, which is calculated as the excess number of winter deaths divided by the average number of non-winter deaths, expressed as a percentage.

The latest available figures for the constituent countries of the United Kingdom are for 2004/2005. These figures for 2004/2005 are provisional and are not available for areas smaller than Government Office Regions.

[1] Excess winter deaths are defined as the difference between the number of deaths during the four winter months (December to March) and the average number of deaths during the preceding four months (August to November) and the following four months (April to July).Figures for 1999/2000 to 2003/2004 are final estimates rounded to the nearest 10.
[2] The excess winter deaths index is calculated as the excess number of winter deaths divided by the average number of non-winter deaths, expressed as a percentage.
[3] Data are based on occurrences of death each month for England and Wales and on registrations of deaths each month for Scotland and Northern Ireland.
[4] Figures for 2004/05 are provisional. These are rounded to the nearest 100 for the United Kingdom, England, and Wales, and to the nearest 10 for Scotland.
[5] Parliamentary constituency of Hornsey and Wood Green.

INTERNATIONAL DEVELOPMENT

Tanzania

David Taylor: To ask the Secretary of State for International Development how much aid has been allocated to the Government of Tanzania for 2006–07. [55460]

Hilary Benn: DFID has allocated £115 million of bilateral development assistance to Tanzania in the financial year of 2006–07. Of this, £90 million will be provided directly to the Government of Tanzania in the form of budget support.

HOUSE OF COMMONS COMMISSION

Saints' Days

Mr. Andrew Turner: To ask the hon. Member for North Devon, representing the House of Commons Commission what special arrangements are made by the Refreshment Department to mark *(a)* St George's Day, *(b)* St David's Day, *(c)* St Andrew's Day and *(d)* St Patrick's Day. [56488]

Nick Harvey: The Refreshment Department regularly runs special promotions in some or all of its restaurants and bars. These may be run as part of a national campaign, such as the 'Fairtrade Fortnight' to be celebrated 06–19 March 2006, or in response to consumer interest in a particular type of product or food, such as the 'Healthy Eating Awareness Day' held in Portcullis House in January, or to mark a special occasion, such as the celebration of a national saint's day.

The decision as to whether to mark a particular national saints' day depends on a number of factors, including whether the House will be sitting on that day, and whether there are any competing bids for special promotions to run at the same time.

This year, St David's day was marked by serving Welsh dishes and products in the cafeterias and Members' Dining Room. A selection of Welsh cheeses was served throughout the week, Penderyn Welsh Whisky was offered for tasting in the Members' Dining Room, and Brains' Bitter, brewed in Cardiff, is the Regional Ale being served throughout March in the Strangers' Bar.

There are no plans to mark St George's day this year, as it falls on a Sunday, nor are there plans to mark St Patrick's day, which falls during the Fairtrade Fortnight. No plans have yet been made for promotions to be mounted in the autumn, so no decision has yet been reached about St Andrew's day on 30 November 2006.

CABINET OFFICE

Departmental Expenditure

Mr. Laws: To ask the Chancellor of the Duchy of Lancaster how much has been spent by the Cabinet Office on media training in each year since 1997–98. [55222]

Mr. Jim Murphy: The information requested is not collected centrally.

All Cabinet Office Units have delegated responsibility for spend against their training budgets. There has been no centrally organised media training for Cabinet Office staff.

The National School for Government (NSG) deliver courses related to media training. These courses are open to all civil servants.

NORTHERN IRELAND

Anti-poverty Strategy

Mark Durkan: To ask the Secretary of State for Northern Ireland when he plans to publish the anti-poverty strategy. [54850]

Angela E. Smith: The Government plans to publish its strategy for tackling poverty and social exclusion later this year.

Child Care

Chris Ruane: To ask the Secretary of State for Northern Ireland how many child care places there are in each ward in Northern Ireland. [55544]

Mr. Woodward: Information on childcare places is not collected according to ward in Northern Ireland. The information is, however, available according to Health and Social Services Trust area, and is shown in the following table in respect of the number of registered places at 31 March 2005.

			Places available with:			
Health and Social Services Trust	*Day nurseries*	*Child-minders*	*Playgroups*	*Out of school clubs*	*Holiday schemes*[1]	*Total*
North and West Belfast	717	1,024	1,264	941	77	4,023
South and East Belfast	1,994	2,280	1,286	772	404	6,736
Ulster	772	2,188	1,283	198	65	4,506
Down Lisburn	741	2,439	1,370	520	211	5,281
Causeway	437	1,692	854	487	0	3,470
Homefirst	2,080	4,485	2,517	864	140	10,086
Armagh and Dungannon	322	899	936	436	108	2,701
Craigavon and Banbridge	801	1,014	786	674	486	3,761
Newry and Mourne	364	130	740	265	332	1,831
Foyle	501	960	1,447	549	0	3,457
Sperrin Lakeland	468	954	1,287	582	0	3,291
Northern Ireland Total	9,197	18,065	13,770	6,288	1,823	49,143

[1] Information on holiday schemes relates to the number of places in schemes open at any time during the year ending 31 March 2005.

Civil Servants (Travel Costs)

David Simpson: To ask the Secretary of State for Northern Ireland what the total cost was of official air travel for civil servants employed in each Department in Northern Ireland in each of the last 10 years. [53145]

Angela E. Smith: The information requested is not readily available and could be obtained only at disproportionate cost.

However, information pertaining to the period from 1 October 2004 to 20 February 2006 is available and is provided in the following table.

Department	*2004*[1]	*2005*[2]	*2006*[3]
Department of Finance and Personnel[4]	80,355	300,254	31,472
Department of Employment and Learning[4]	15,464	154,045	3,691
Department for Regional Development[4]	79,809	421,670	39,518
Department of Education[4]	12,664	42,062	1,306
Department for Social Development[4]	105,369	430,150	34,319
Department of Health and Social Services and Public Safety[4]	70,122	257,852	26,951
Department of Enterprise Trade and Investment[4]	95,672	346,714	30,115
Department of Culture, Arts and Leisure[4]	17,504	81,007	9,919
Department of Agriculture and Rural Development[4]	86,930	317,533	20,675
Office of the First Minister and Deputy First Minister[4]	46,017	157,245	12,074
Northern Ireland Office	385,624	1,568,503	245,008

[1] October to December.
[2] January to December.
[3] January to 20 February.
[4] These figures relate only to flights booked through Northern Ireland civil service contracted travel agency service since 1 October 2004 when the current contract commenced. They do not include any journeys undertaken that were booked through other channels as this information could be obtained only at disproportionate cost.

The Northern Ireland Office figure reflects the need for regular travel between the London and Belfast offices in connection with the range of official duties.

Dangerous Wild Animals

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what plans he has to extend the Dangerous Wild Animals Act 1976 to Northern Ireland. [55153]

Angela E. Smith: A Commencement Order has to be made before the Dangerous Wild Animals (Northern Ireland) Order 2004 comes into force and it is expected that this will be made later in 2006.

Article 9 of the Order makes provision for a 'Surrender Period' during which a keeper of a Dangerous Wild Animal (DWA) can give up their ownership to the Department of the Environment. In such circumstances the Department must have safe holding facilities in place to accept and house such animals while attempts are made to re-home them.

Article 6 will give the Department the powers to seize DWAs should the owners be in breach of licence conditions. Again holding facilities are required to hold DWAs in safety while attempts to re-home the animals are made.

In the operation of this legislation the health and safety of the public is paramount while the welfare of the animals must be considered at all times. The Department is currently in an advanced stage of negotiations with a potential provider of a DWA holding service. The breadth of species listed in the Schedule of the Order requires a range of facilities to cater for the special needs of these creatures. It is expected that these negotiations will be completed shortly and the facilities will be developed to allow for the making of the Commencement Order.

Demography

Chris Ruane: To ask the Secretary of State for Northern Ireland how many 18 to 30-year-olds there were in each ward in Northern Ireland in the last year for which figures are available; and what percentage of the population they represented in each case. [55564]

Angela E. Smith: A table giving the number of 18 to 30-year-olds in each electoral ward in Northern Ireland from the 2001 census and the percentage of the population they represented, has been placed in the Library.

Dentistry

Chris Ruane: To ask the Secretary of State for Northern Ireland how many and what percentage of children suffered from dental caries in each ward in Northern Ireland in 2004–05, listed in descending order by percentage. [55546]

Mr. Woodward: The information is not available in the format requested. However, through school dental screening, the incidence of dental caries in primary 1, primary 2 and primary 7 children is recorded at trust level. The information for 2004–05 is presented in the following tables:

Primary 1

Trust	*Target*	*Number screened*	*Percentage screened*	*Number with caries*	*Percentage with caries*
Sperrin Lakeland	1,602	1,426	89.01	1,035	72.58

Departmental Vehicles

Mr. Peter Robinson: To ask the Secretary of State for Northern Ireland how much each Department under his authority spent on taxi hire in each of the last five years, broken down by Department. [52987]

Angela E. Smith: The information requested is not readily available and could be obtained only at disproportionate cost.

Education Authority (Running Costs)

Sammy Wilson: To ask the Secretary of State for Northern Ireland what the estimated running costs are over the first five years for the proposed single education authority. [54639]

Angela E. Smith: It is not possible at this stage to give an estimate of the running costs of the new education authority. However, it is estimated that there will be significant efficiency savings from the new arrangements.

Educational Attainment

Chris Ruane: To ask the Secretary of State for Northern Ireland what percentage of 16-year-olds left school without any qualifications in each *(a)* ward, *(b)* county and *(c)* constituency in Northern Ireland in the last year for which figures are available. [55573]

Angela E. Smith: *(a)* The requested information has been placed in the Library.

(b) Information is not available for each county in Northern Ireland, but is provided in respect of each education and library board area. The percentage of 16-year-olds resident in each education and library board area who left school in 2003–04 without any qualifications is as follows:

Education and Library Board	*Number of 16-year-old school leavers with no qualifications*	*Number of 16-year-old school leavers*	*Percentage of 16-year-old school leavers with no qualifications*
Missing/incomplete postcode	30	199	15.1
Belfast	282	1,594	17.7
Western	224	1,858	12.1
North Eastern	175	2,856	6.1
South Eastern	234	2,562	9.1
Southern	208	2,923	7.1

(c) The percentage of 16-year-olds resident in each constituency who left school in 2003–04 without any qualifications is as follows:

Constituency	*Number of 16-year-old school leavers with no qualifications*	*Number of 16-year-old school leavers*	*Percentage of 16-year-old school leavers with no qualifications*
Missing/incomplete postcode	30	199	15.1
Belfast East	48	449	10.7
Belfast North	84	605	13.9
Belfast South	49	333	14.7
Belfast West	158	692	22.8
East Antrim	26	530	4.9
East Londonderry	71	646	11.0
Fermanagh and South Tyrone	20	499	4.0
Foyle	130	672	19.3
Lagan Valley	49	670	7.3
Mid Ulster	31	685	4.5
Newry and Armagh	93	928	10.0
North Antrim	48	852	5.6
North Down	45	439	10.3
South Antrim	39	711	5.5

Strangford	55	692	7.9
Upper Bann	58	903	6.4
West Tyrone	49	634	7.7

Efficiency Gains

Mrs. Villiers: To ask the Secretary of State for Northern Ireland what baseline figures he is using for assessing progress on his Department's targets to *(a)* rationalise back office functions, *(b)* restructure and streamline its headquarters' directorates, *(c)* improve procurement, *(d)* improve working practices in the Prison Service, *(e)* reduce sickness absence in the Prison Service, *(f)* invest in core ICT infrastructure and in Causeway and *(g)* increase front-line time of the police as a percentage of police time; what progress has been made towards these targets to date; and what the total efficiency savings achieved to date are for these targets. [52930]

Mr. Hain: Information in respect of the NIOs Efficiency Programme, including baseline data, is contained in the Department's Efficiency Technical Note (published in December 2005). This can be viewed on the NIO website at www.nio.gov.uk/nio_publications. As of the end of December 2005 the NIO's Efficiency Programme has delivered gains of £35.1 million.

Electoral Fraud

Mr. Peter Robinson: To ask the Secretary of State for Northern Ireland how many times police have questioned electoral office staff regarding possible electoral fraud in Northern Ireland in each of the last 10 years. [53068]

Mr. Hanson: The Electoral Office for Northern Ireland and the PSNI do not have any record of police questioning staff about possible electoral fraud in any of the last 10 years.

Housing

Dr. Alasdair McDonnell: To ask the Secretary of State for Northern Ireland how many people are on the waiting list for single accommodation in each of the housing executive districts. [54592]

Mr. Hanson: The numbers at 31 December 2005 are as follows:

NIHE district	*Single applicants*
Antrim	393
Armagh	318
Ballycastle	143
Ballymena	575
Ballymoney	177
Banbridge	187
Bangor	594
Belfast 1	486
Belfast 2	671
Belfast 3	427
Belfast 4	436
Belfast 5	329
Belfast 6	561
Belfast 7	1,071
Carrickfergus	362
Castlereagh	455
Coleraine	453
Cookstown	173
Downpatrick	459
Dungannon	310
Fermanagh	443
Larne	162
Limavady	249
Lisburn Antrim Street	640
Lisburn Dairy Farm	301
Londonderry 1	361
Londonderry 2	279
Londonderry 3	339
Lurgan	390
Magherafelt	172
Newry	798
Newtownabbey 1	324
Newtownabbey 2	288
Newtownards	527
Omagh	263
Portadown	239
Strabane	310
Total	14,665

Dr. Alasdair McDonnell: To ask the Secretary of State for Northern Ireland how many housing units for single persons were built in Northern Ireland in the last five financial years. [54593]

Mr. Hanson: A total of 217 units, designed specifically for single occupation, were completed during the five year period 2000–01 to 2004–05. Other small units however can be made available to singles where circumstances require it.

Dr. Alasdair McDonnell: To ask the Secretary of State for Northern Ireland what provision is being made for single housing in each of the Housing Executive districts. [54594]

Mr. Hanson: A total of 436 units, designed specifically for singles occupation, are planned for the five year period 2005–06 to 2009–10. Other small units in the programme can however be made available to singles where circumstances require it.

Social housing provision for single persons is made through a combination of relets of existing property and new build provision. Last year, over 3,000 allocations were made to single people.

Departmental statistics are not held by Housing Executive District. However, by district council area, the 436 planned starts are located as follows:

District council/area	*Planned starts*
Belfast	317
Coleraine	7
Craigavon	10
Derry	44
Dungannon	19
Fermanagh	11
Larne	12
Limavady	6
Newry and Mourne	10

Obesity

Chris Ruane: To ask the Secretary of State for Northern Ireland what the *(a)* childhood and *(b)* adult obesity levels were in each (i) ward, (ii) county and (iii) health authority area in Northern Ireland in the latest period for which figures are available. [55554]

Mr. Woodward: Information on *(a)* childhood obesity is not available in the format requested. However, Table 1 shows the prevalence of obesity, by gender, at health and social services (HSS) board and at Northern Ireland level for primary 1 (PI) school children.

Table 1: PI Obesity levels 2003–04 by HSS Board[1]

Percentage

	Male	*Female*	*All*
Northern board	4.0	6.0	5.0
Southern board	5.1	8.2	6.6
Eastern board	4.7	6.8	5.7
Western board	4.4	6.8	5.6
NI	4.6	6.9	5.7

[1] relates to HSS board in which child's school is located rather than where child actually resides

Source:
Child Health System (NI) 2003–2004.

Information on *(b)* adult obesity levels is available only at Northern Ireland level. According to the latest 'NI Health and Social Well-Being' survey conducted in

1997, 19 per cent. of adults were classified as being obese, with 17 per cent. male compared to 20 per cent. female.

Primary Schools

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what the average transport to school cost was per pupil in Northern Ireland for pupils enrolled at *(a)* controlled, *(b)* maintained and *(c)* integrated primary schools as at December 2005. [56358]

Angela E. Smith: The information is not available in the required format. However, the average per pupil transport cost in Northern Ireland in the 2004–05 financial year was:

£675 in respect of controlled and maintained primary schools;

£661 in respect of grant-maintained integrated primary schools.

Police Service of Northern Ireland

Mark Durkan: To ask the Secretary of State for Northern Ireland what audits of human rights training in *(a)* the Police Service of Northern Ireland and *(b)* MI5 in Northern Ireland have been carried out by the Northern Ireland Human Rights Commission. [53259]

Mr. Hanson: I have been informed by the Chief Executive of the Northern Ireland Human Rights Commission that the Commission has evaluated the human rights element of training provided to four separate cohorts of Police Service NI recruits, over the period 2000–05. In addition, in 2004 an evaluation was undertaken by the Commission of the Course For All training delivered across the police service.

The Commission has not conducted any review or audit of any aspect of the work of the Security Service.

Public Consultations

David Simpson: To ask the Secretary of State for Northern Ireland what was the total cost of public consultations undertaken by each Department in Northern Ireland in each of the last 10 years. [53153]

Angela E. Smith: The information sought is not readily available in the form requested, however, the amount of money spent on consultation exercises undertaken by the Northern Ireland Office and 11 Departments of the Northern Ireland Administration between July 2001 and December 2005 is as follows:

July 2001—December 2005

Department	*Consultation costs (£)*
Agriculture and Rural Development	57,540.38
Culture, Arts and Leisure	62,458.66
Education	1,058,501.00
Environment	265,951.00
Enterprise, Trade and Investment	110,245.00
Employment and Learning	150,431.87
Finance and Personnel	331,368.00
Health, Social Services and Public Safety	635,144.00
Regional Development	283,172.00
Social Development	316,387.39
Northern Ireland Office	60,126.04
Office of the First Minister and Deputy First Minister	986,207.13
Total	4,317,532.47

Schools

Mr. Dodds: To ask the Secretary of State for Northern Ireland how much has been allocated to *(a)* the Irish-medium and *(b)* the integrated education sector in Northern Ireland in each of the last 10 years. [54133]

Angela E. Smith: The funding allocated to the Irish-medium education (IME) and integrated education (IE) sectors in each of the last 10 years was as follows:

£

	IME		*IE*	
	Recurrent	*Capital*	*Recurrent*	*Capital*
1995–96	1,789,411	n/k	12,664,806	n/k
1996–97	1,894,762	n/k	17,216,920	n/k
1997–98	2,468,490	n/k	22,086,499	12,328,218
1998–99	3,276,372	n/k	30,133,347	17,090,741
1999–2000	4,041,534	1,667,584	38,125,242	14,858,040
2000–01	6,075,876	763,796	42,621,998	10,489,448
2001–02	6,070,061	140,896	47,286,324	4,968,875
2002–03	6,730,101	775,717	51,994,494	8,300,843
2003–04	8,019,913	1,589,219	58,685,121	12,554,731
2004–05	8,550,337	3,086,106	62,572,458	8,981,840

Seafood Purification Plant (Warrenpoint)

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what steps were taken to ensure the seafood purification plant project in Warrenpoint does not duplicate services provided by other Government-funded projects in Northern Ireland. [54648]

Angela E. Smith: The shellfish purification plant currently under construction at Warrenpoint will be the first such public facility of its kind in the Carlingford Lough region. This is an important part of the reconstruction of Warrenpoint harbour area being undertaken with assistance from the Interreg Programme to provide safe, modern facilities for mussel dredgers using the Lough. Since this will be the only public shellfish purification unit in the area, there is no duplication with any other grant-aided projects.

Spending Review (Efficiency Targets)

Mrs. Villiers: To ask the Secretary of State for Northern Ireland what total efficiency savings were achieved by his Department in 2004–05; and whether these count towards the agreed efficiency target for his Department set out in the 2004 Spending Review. [52868]

Mr. Hain: The Northern Ireland Office delivered some £8.6 million of efficiency savings in 2004–05. As these savings persist into subsequent years they have been included in the overall savings that the Department is forecasting in the 2004 Spending Review.

Statementing

Chris Ruane: To ask the Secretary of State for Northern Ireland how many statemented children there are in each *(a)* ward, *(b)* county and *(c)* constituency in Northern Ireland; and what percentage of all children this represents in each county. [55571]

Angela E. Smith: Information on statemented pupils at primary, special and nursery schools in Northern Ireland is not available at ward level. Analysis based on the location of schools is not available in respect of counties, but is provided in the following table for Education and Library Board areas and constituencies. The distribution of statemented pupils is affected by the location of special schools and special units attached to mainstream schools.

Schoolchildren with statements of special education needs 2005–06, by Education and Library Board area

Education and Library Board	*Schoolchildren with statements of special education needs*	*Percentage of all pupils*
Belfast	1,640	3
Western	2,002	3
North Eastern	2,360	3
South Eastern	3,281	5
Southern	2,671	4
Northern Ireland total	11,954	4

Schoolchildren with statements of special education needs 2005–06, by parliamentary constituency

Parliamentary constituency	*Schoolchildren with statements of special education needs*	*Percentage of all pupils*
Belfast East	318	2
Belfast North	418	2
Belfast South	846	5
Belfast West	495	2
East Antrim	581	4
East Londonderry	636	4
Fermanagh and South Tyrone	742	4
Foyle	789	3
Lagan Valley	923	6
Mid Ulster	608	3
Newry and Armagh	892	4
North Antrim	685	3
North Down	469	4
South Antrim	272	2
South Down	994	5
Strangford	843	6
Upper Bann	867	4
West Tyrone	576	3
Northern Ireland Total	11,954	4

Note:
Figures relate to children in nursery, primary, post primary and special schools.

(c) The percentage of 16-year-olds resident in each constituency who left school in 2003–04 without any qualifications is as follows:

Constituency	*Number of 16-year-old school leavers with no qualifications*	*Number of 16-year-old school leavers*	*Percentage of 16-year-old school leavers with no qualifications*
Missing/incomplete postcode	30	199	15.1
Belfast East	48	449	10.7
Belfast North	84	605	13.9
Belfast South	49	333	14.7
Belfast West	158	692	22.8
East Antrim	26	530	4.9
East Londonderry	71	646	11.0
Fermanagh and South Tyrone	20	499	4.0
Foyle	130	672	19.3
Lagan Valley	49	670	7.3
Mid Ulster	31	685	4.5
Newry and Armagh	93	928	10.0
North Antrim	48	852	5.6
North Down	45	439	10.3
South Antrim	39	711	5.5
South Down	70	853	8.2
Strangford	55	692	7.9
Upper Bann	58	903	6.4
West Tyrone	49	634	7.7

Suicides

Chris Ruane: To ask the Secretary of State for Northern Ireland what the suicide rate per 10,000 population was in each *(a)* constituency and *(b)* county in Northern Ireland in each of the last 30 years. [55559]

Angela E. Smith: Tables have been placed in the Library which contain information about the death rate per 10,000 population for deaths registered in Northern Ireland, due to 'suicide and self-inflicted injury'[1] and 'undetermined injury whether accidentally or purposefully inflicted'[2] by parliamentary constituency, in each year between 1991 and 2004 and by local government district in each year between 1981 and 2004.

Population estimates are only available by parliamentary constituency from 1991. Population estimates are not available by county, so local government district information has been provided instead. Suicide and undetermined deaths data by local government district is only available from 1981 onwards.

[1] International Classification of Diseases, Tenth Revision codes X60-X84, Y87.0 for years 2001–04 and Ninth Revision codes E950-E959 for years 1981–2000.

[2] International Classification of Diseases, Tenth Revision codes Y10-Y34, Y87.2 for years 2001–04 and Ninth Revision codes E980-E989 for years 1981–2000.

HOME DEPARTMENT

Animal Procedures

Norman Baker: To ask the Secretary of State for the Home Department how many procedures involving the extraction of foetal calf serum from cows were carried out in 2004. [55387]

Andy Burnham *[holding answer 2 March 2006]:* There were no procedures carried out under the Animals (Scientific Procedures) Act 1986 involving the extraction of foetal calf serum from cows in 2004.

Norman Baker: To ask the Secretary of State for the Home Department whether it is his policy to license the extraction of foetal calf serum from cows under the Animals (Scientific Procedures) Act 1986. [55388]

Andy Burnham *[holding answer 2 March 2006]:* The Animals (Scientific Procedures) Act 1986 makes provision for the protection of animals used for experimental and other scientific purposes, and does not contain any specific prohibition of the use of animals to harvest foetal calf serum. Any application under the Animals (Scientific Procedures) Act 1986 for a licence involving the extraction of foetal calf serum from cows would be considered and judged on its merits in the usual way.

Norman Baker: To ask the Secretary of State for the Home Department if he will list *(a)* the four animals identified as being found dead in the immediate peri- and post-surgical period in procedures allocated a moderate severity limit, *(b)* the 10 animals found dead in procedures allocated a moderately severity limit said to have had significant clinical findings and to be receiving appropriate symptomatic, supportive and specific treatment to control or minimise any resulting suffering and *(c)* the three animals found dead in procedures allocated a moderately severity limit said to have died unexpectedly in the Department's Response to Twelve Questions Raised by Dan Lyons, Uncaged Campaigns, About Imutran Xenotransplantation Research Licensed Under the Animals (Scientific Procedures) Act, published in August 2004; and what evidence supported the Department's view on the cause of death in respect of *(c)*. [55454]

Andy Burnham *[holding answer 2 March 2006]:* Seventeen animals died between observation periods in procedures of moderate severity out of over 500 non-human primates used in the Imutran studies between July 1994 and March 2000. Four of these animals died in the immediate post-surgical period before the effects of anaesthesia and sedation had worn off and are not thought to have experienced any suffering.

Their reference numbers were: T405, V570, W265 and Y231M. Ten of the animals had welfare problems that had been diagnosed and were receiving appropriate symptomatic, supportive and specific treatment. Their reference numbers were: A168, A471, W264, W762, W741, W774, X535, X538, X540, and Y252F.

Three of the animals had been in previously good health and died at five, seven, and 22 days post-surgery. Their reference numbers were: W14, W747, Y247M. Although the causes of death of these last three animals were not determined with absolute certainty, the evidence suggests that their deaths resulted from a combination of the immuno-suppression regimens and organ rejection, rather than surgical complications.

The evidence available at the time also suggested that death occurred quickly with little suffering being experienced by the individual animals. These judgments were drawn during the Home Office Chief Inspector's review of compliance with the licence authorities granted to Imutran staff for their xenotransplantation research following examination of all of the available documentary evidence, including clinical records, surgeon's notes and post mortem reports. None of the 17 deaths raised issues of non-compliance with the relevant licence authorities.

Asylum Seekers

Mrs. James: To ask the Secretary of State for the Home Department how many Kurdish asylum seekers from Turkey were *(a)* refused asylum in the UK and *(b)* deported in 2005. [56002]

Mr. McNulty: Information on how many Kurdish asylum seekers from Turkey were refused asylum and deported is not available. Data on the ethnic origin of asylum seekers are not collated centrally and could be produced only by examination of individual case-files at disproportionate cost.

Information on asylum initial decisions, appeal outcomes and removals by nationality are published quarterly and annually. Copies are available from the Library of the House and on the Home Office Research Development and Statistics Directorate website at http://www.homeoffice.gov.uk/rds/immigration1.html.

Mrs. James: To ask the Secretary of State for the Home Department how many *(a)* Somalian, *(b)* Ivorian, *(c)* Pakistani, *(d)* Algerian and *(e)* Iranian asylum seekers were (i) granted asylum in the UK and (ii) deported in 2004–05. [56003]

Mr. McNulty: The table shows the number of Somalian, Ivorian, Pakistani, Algerian and Iranian asylum seekers granted asylum and deported in the financial year 2004–05. Information on asylum initial decisions and removals by nationality are published quarterly and annually. Copies are available from the Library of the House and on the Home Office Research Development and Statistics Directorate website at http://www.homeoffice.gov.uk/rds/immigration1.html.

Removals and voluntary departures[1] of asylum applicants, excluding dependants, for nationals of Somalia, Ivory Coast, Pakistan, Algeria and Iran, in the financial year 2004–05[2, 3, 4]

Nationality	*Number of principal applicants*
Somalia	70
Ivory Coast	15
Pakistan	340
Algeria	120
Iran	350

[1] Includes persons departing "voluntarily" after enforcement action had been initiated against them, persons leaving under assisted voluntary return programmes run by the International Organisation for Migration, those who it is established have left the UK without informing the immigration authorities.
[2] Figures rounded to the nearest five.
[3] Figures exclude dependants of asylum seekers removed.
[4] Provisional figures.

Cash-in-transit Crime

Mr. McGovern: To ask the Secretary of State for the Home Department what research his Department has undertaken into combating cash-in-transit crime. [42644]

Hazel Blears *[holding answer 17 January 2006]:* The following is the list of research reports published by the Department where cash-in-transit crime has been referred to.

"Preventing robberies at Sub-Post Offices: an evaluation of a security initiative", Paul Ekblom, 1987.

"The prevention of robbery at Building Society branches": Claire Austin, 1988.

"Making Crime Prevention Pay: initiatives from business", John Burrows, 1991.

"Armed Robbery: two police responses", Roger Matthews, 1996.

Home Office Research Study 182 "The Prevention of cheque and credit card fraud revisited": Michael Levi and Jim Handley, 1998.

"Not rocket science? Problem-solving and crime reduction": Tim Read and Nick Tilley, 2000.

"Problem-solving street crime: practical lessons from the Street Crime Initiative": Nick Tilley et al, 2004.

Criminal Damage

Mr. Pickles: To ask the Secretary of State for the Home Department how many recorded cases of criminal damage there were in each police force area in *(a)* England and *(b)* England and Wales in each year since 1998. [54549]

Hazel Blears: Available information relating to recorded criminal damage offences is given in the tables.

Table 1: Criminal damage offences recorded by police force area, 1998–99 to 2001–02[1]

Police force area	*1998–99*	*1999–2000*	*2000–01*	*2001–02*
				Number of offences
Avon and Somerset	20,605	20,519	22,479	26,990
Bedfordshire	7,893	8,048	7,892	8,193

[1] Data in this table takes account of the introduction of the National Crime Recording Standard in April 2002. These figures are not directly comparable with those for earlier years.

Driving Offences (Mobile Phones)

Chris Grayling: To ask the Secretary of State for the Home Department how many *(a)* £30 fixed penalties have been issued and *(b)* people have been taken to court for using a mobile phone while driving in each month since December 2003. [54991]

Hazel Blears: Driving whilst using a hand held mobile phone became an offence from one December 2003. 1,888 fixed penalty notices were issued for this offence in England and Wales in December 2003. Data for 2004 will not be available until late March 2006. Data from the court proceedings database held by the Office for Criminal Justice Reform on the number of defendants proceeded against at the magistrates courts for offences under Road Vehicles (Construction & Use) Regs 1986. Reg 110 (1), England and Wales, 2004 is given in the table. There are no records of prosecutions for this offence as the principal offence in December 2003.

Number of defendants prosecuted at magistrates courts for offences relating to using a mobile phone whilst driving in England and Wales, 2004[1]

Electronic Offender Monitoring

David T.C. Davies: To ask the Secretary of State for the Home Department pursuant to the answer of 14 February 2006, *Official Report*, column 1980W in how many of the 700 cases of damage to electronic offender monitoring equipment offenders were found to be in breach of their licence conditions and recalled to prison. [54662]

Fiona Mactaggart: The information requested is not available centrally and could be obtained only at disproportionate cost.

National Offender Management Service

Mr. Austin Mitchell: To ask the Secretary of State for the Home Department what steps have been taken by regional offender managers to improve operational efficiency within the National Probation Service. [50238]

Fiona Mactaggart: The National Probation Service has improved its performance dramatically over the last four years with virtually all its delivery targets being achieved. This has been done through collaboration, benchmarking, the promotion of good practice and by rigorous performance management by the National Probation Directorate. From 1 April 2006, Regional Offender Managers will hold Service Level Agreements with Probation Boards for the delivery of Offender Management and Interventions.

From this point on, ROMs will supplement the existing performance management arrangements. The process of monitoring delivery against SLAs provides the mechanism for ROMs to challenge and promote improvements in operational efficiency and effectiveness.

Police

Andrew Rosindell: To ask the Secretary of State for the Home Department what the average number of arrests per police officer was in each of the last seven years in *(a)* Romford, *(b)* each London borough and *(c)* England and Wales. [52310]

Hazel Blears: The information is not held centrally in the form requested as arrests statistics are collected on a recorded crime basis only.

Mr. Drew: To ask the Secretary of State for the Home Department if he will list the police authorities that suggested that they would seek federation rather than amalgamation in their response to Closing the Gap; and if he will make a statement. [47498]

Hazel Blears *[holding answer 31 January 2006]:* Of the police authority submissions received in December 2005, four authorities expressed an interest in federated options but did not submit a costed business case for this arrangement. These authorities were: Northamptonshire, Cambridgeshire, Cheshire and Sussex.

In addition to this I have now received a further joint submission from Gloucestershire, Dorset and Wiltshire making the case for a "strategic alliance" in delivery of services. This option will undergo an assessment of its potential to deliver protective services to the required standard, and a financial assessment.

Mrs. James: To ask the Secretary of State for the Home Department what changes there have been in police numbers at basic command level in the South Wales police in each year since 1997; and if he will make a statement. [55995]

Hazel Blears: Information on the number of police officers for each basic command unit (BCU) in the South Wales police for each year since March 2002 is set out in the table. This information was not collected before 2002. The deployment of police officers to BCUs is an operational matter for the chief constable (Barbara Wilding QPM).

I understand from the chief constable that the decline in BCU strength between March 2004 and March 2005 is due to the transfer of custody officers to a centrally managed criminal justice unit and the creation of operational support teams also centrally resourced. Although these officers continue to be based within each BCU they are not under its control. These changes have been cosmetic and do not reduce the number of officers available for front-line duties in each of the BCUs.

South Wales police—basic command unit strength March 2002 to March 2005

	31 March			
Basic command unit	*2002*[1]	*2003*[2]	*2004*[2]	*2005*[2]
Bridgend	235	254	280	247
Cardiff	651	805	735	685
Merthyr Tydfil	142	144	145	136
Neath and Port Talbot	241	232	248	238
Rhondda Cynon Taff	363	381	399	378

[2] Annual statistical data collection by Home Office Research, Development and Statistics Directorate.

Prisoners

David T.C. Davies: To ask the Secretary of State for the Home Department what the average cost was of housing a prisoner in a low security prison in 2004–05. [54663]

Fiona Mactaggart: The average annual cost of housing a person in an open, or semi-open, establishment in England and Wales for the financial year 2004–05 is shown in the following table.

These figures excludes the element of headquarters overheads, and includes the cost of capital on all Prison Service land and buildings, plus the cost of depreciation on buildings. These indirect costs cannot be disaggregated at establishment level. Therefore the costs are not comparable with whole service cost per prisoner figures.

Average annual cost of housing a person in an open, or semi-open, establishment in England and Wales for the financial year 2004–05

	Total average population	Direct resource expenditure (£)	Cost per prisoner (£)
Female open	209	6,064,942	29,019
Male open	3,197	65,548,367	20,503
Male semi-open	1,148	26,065,679	22,705
Male open young offender institution	261	8,802,198	33,725

Mr. Evans: To ask the Secretary of State for the Home Department how many prisoners underwent treatment for drugs dependence in Lancashire in each of the last five years. [54660]

Fiona Mactaggart: I refer the hon. member to PQ 53395 which contains the information he requires.

Prisons

Mr. Garnier: To ask the Secretary of State for the Home Department what his policy is on unaccompanied prison visits by teenage family members of prisoners. [55079]

Fiona Mactaggart: The protection of children within a prison environment is a key concern. For a routine social visit, children under the age of 16 must be accompanied by an adult. For those aged 16 and 17, subject to a full assessment of risk, the governor has the discretion to allow them to visit unaccompanied. Special arrangements exist for unaccompanied child-centred visits. Guidance will shortly be issued to prisons clarifying the position.

John Bercow: To ask the Secretary of State for the Home Department what assessment he has made of the long-term cost effectiveness of *(a)* building new prison facilities and *(b)* making year-on-year repairs to buildings. [55480]

Fiona Mactaggart: The National Offender Management Service (NOMS) has a continuing duty to maintain the prison estate and to provide capacity for those committee by the courts within its allocated budget. To determine whether it is more cost-effective either to refurbish buildings or to replace them by building new facilities, any proposed major property investment in the prison estate includes an assessment of the whole lifecycle cost of the project.

John Bercow: To ask the Secretary of State for the Home Department what the annual cost has been per patient at *(a)* Rampton hospital, *(b)* Broadmoor hospital and *(c)* HM prison Grendon in each of the last three years. [55489]

Fiona Mactaggart: The average annual cost per prisoner held at Grendon prison, for the last three financial years is shown in the following table. These figures exclude the element of headquarters overheads, including the cost of capital on all Prison Service land and buildings, plus the cost of depreciation on buildings. These indirect costs cannot be disaggregated at establishment level.

Therefore the costs are not comparable with whole Service cost per prisoner figures. Responsibility for Rampton and Broadmoor hospitals falls to the Department of Health who provided the information on them. Information about the cost per bed at these hospitals has been obtained from Department of Health and is shown in the following table. In contrast to the costs for Grendon, the costs for Rampton and Broadmoor include all overheads and capital charges.

Average annual cost per prisoner held at Grendon prison

Financial year	Total average population	Direct resource expenditure	Cost per prisoner (£)
2002–03	464	11,834,438	25,492
2003–04	540	14,095,177	26,086
2004–05	520	14,704,902	28,279

Annual cost per patient at Rampton hospital and Broadmoor hospital

Financial year	Cost per bed (£) Rampton hospital	Broadmoor hospital
2002–03	142,390	140,000
2003–04	168,750	152,650
2004–05	202,920	169,200

Average annual cost per prisoner held at Grendon prison

Financial year	Total average population	Direct resource expenditure	Cost per prisoner (£)
2002–03	464	11,834,438	25,492
2003–04	540	14,095,177	26,086
2004–05	520	14,704,902	28,279

Annual cost per patient at Rampton hospital and Broadmoor hospital

Financial year	Cost per bed (£) Rampton hospital	Broadmoor hospital
2002–03	142,390	140,000
2003–04	168,750	152,650
2004–05	202,920	169,200

John Bercow: To ask the Secretary of State for the Home Department what proportion of prisoners at HM prison Springhill are from the Thames Valley area. [55493]

Fiona Mactaggart: The proportion of prisoners at Springhill prison from the Thames Valley area on 1 March 2006 was approximately 70 per cent.

Mrs. Moon: To ask the Secretary of State for the Home Department what assessment he has made of the average number of transfers between prisons that a category A prisoner will make before trial over a period of *(a)* six months, *(b)* 12 months, *(c)* 18 months and *(d)* two years. [55517]

BEST COPY AVAILBLE

Fiona Mactaggart: Category A prisoners on remand are held in one of six high security prisons with a remand facility. These are Belmarsh, Frankland, Manchester, Long Lartin, Woodhill and Wakefield. Allocation is normally based on the location of the court where the defendant is due to appear.

Remand prisoners would not routinely be transferred prior to conviction unless there were specific grounds, such as issues of security or the transfer of the case to another court. Statistics on the number of such moves are not kept.

Public Order

Mr. Wills: To ask the Secretary of State for the Home Department how many incidents of *(a)* anti-social behaviour and *(b)* alcohol-related crime there have been in (i) the Wiltshire constabulary area and (ii) Swindon in each of the last seven years. [54566]

Hazel Blears: The data are not available in the form requested. Antisocial behaviour is not measured by incidents but through a measure of perceptions using the British Crime Survey (BCS). The size of the sample in the British Crime Survey means that we cannot provide reliable data for geographical areas smaller than police force areas. Due to changes in the measure of antisocial behaviour used police force area data that is comparable to the national figures are only available for 2004–05.

The following table sets out the national figures for the last four years and the comparable figure for Wiltshire constabulary. Table 1: Percentage of people perceiving high levels of antisocial behaviour in their local area to alcohol related crime, it is not possible to identify those offences which are alcohol-related. Such offences are not specifically defined by statute and details of the individual circumstances of offences do not feature in the data series.

Table 1: Percentage of people perceiving high levels of antisocial behaviour in their local area

	National	*Wiltshire constabulary*	*Percentage Statistically significantly different (at the 95 per cent. level) from the national average*
2001–02	19	—	—
2002–03	21	—	—
2003–04	16	—	—
2004–05	17	14	No

Note:
The measure of antisocial behaviour used is based on a scale constructed from seven questions on problems due to noisy neighbours or loud parties, teenagers and young people hanging around, rubbish and litter, vandalism, people using or dealing drugs, people being drunk or rowdy and abandoned cars (see background notes for more details).

Mr. Wills: To ask the Secretary of State for the Home Department how many fixed penalty notices were issued in Swindon for *(a)* public order offences and harassment and *(b)* selling alcohol to minors between 12 November and 24 December (i) 2004 and (ii) 2005. [54658]

Hazel Blears: It is not possible to identify the number of penalty notices for disorder issued in Swindon because centrally available data are for police force areas as a whole and are not broken down to that level of detail. The Penalty Notice for Disorder (PND) scheme was brought into effect in England and Wales during 2003–04 to provide the police with a quick and effective means of dealing with minor offences.

Under the scheme an offender is issued with a fixed penalty notice and has 21 days in which to pay the penalty or request a court hearing. The offences of sale of alcohol to a person under 18 and consumption of alcohol by a person under 18 were added to the scheme with effect from 1 November 2004.

Mr. Holloway: To ask the Secretary of State for the Home Department what research his Department has *(a)* commissioned and *(b)* evaluated on the effectiveness of (i) antisocial behaviour orders and (ii) fixed penalty notices. [54925]

Hazel Blears: I would like to refer the hon. gentleman to the answer I gave on 6 February 2006, *Official Report*, column 926W regarding antisocial behaviour orders. The Home Office has responsibility for the penalty notices for disorder scheme which enables the police to issue fixed penalty notices for specified penalty offences. The scheme was piloted in four police force areas between August 2002 and September 2003. The Home Office commissioned an interim evaluation and a final evaluation of the scheme. The findings of these evaluations were published as Home Office research findings, numbers 232 and 257, in 2004

Rape Prosecutions

Mr. Evans: To ask the Secretary of State for the Home Department what percentage of contested prosecutions for rape in the Lancashire police force area have resulted in a conviction in each of the last five years. [51875]

Fiona Mactaggart: Data held by the Office for Criminal Justice Reform on the number of defendants pleading not guilty of rape and the number and percentage of these found guilty of rape at the Crown Court in Lancashire police force area, is provided in the following table. Figures are presented for the years 2000–04. Court statistics for 2005 will be available in autumn 2006.

Number of defendants pleading not-guilty of rape and the number and percentage of these found guilty of rape at the Crown Court, Lancashire police force area, 2000–04[1]

	Not guilty pleas	*Found guilty*	*Conviction rate (percentage)*
2000	25	9	36
2001	37	14	38
2002	25	7	28
2003	39	13	33
2004	32	8	25

[1] These data are on the principal offence basis.
Note:
Rape includes rape of a female and male.

Recovered Property (Charges)

Bob Spink: To ask the Secretary of State for the Home Department when he last reviewed the statutory fees payable by the victim for the recovery from police of their property. [54775]

Hazel Blears: The police have powers to order the removal of any vehicle that is dangerously, obstructively or illegally parked, broken down or abandoned,

including vehicles abandoned after being stolen. The Government regard such removals as important for road safety and crime reduction and does not consider it appropriate for the cost to fall on the public purse.

Therefore, before owners can reclaim any vehicle so removed they are required by law to pay fees prescribed by the Secretary of State to meet the costs of removal and storage. These fees were last changed in 1993. The Government recognise the burden these necessary fees place on the owners of stolen vehicles and have investigated ways in which it be alleviated.

As a result, the Association of Chief Police Officers has agreed best practice in the handling of stolen vehicles. This focuses on ensuring recovered vehicles are kept no longer than necessary, that the police action is fully explained in advance and that advice is provided to help owners protect their property. The Home Office, with other interested parties, is now beginning a wide-ranging review of the fees.

Bob Spink: To ask the Secretary of State for the Home Department how much was charged in total to victims of theft from vehicles for recovery of their property by each police authority in 2004–05. [54776]

Hazel Blears: The information requested is not collected centrally.

Bob Spink: To ask the Secretary of State for the Home Department how many victims of vehicle theft refused to pay the fee for release of their property from the police in 2004–05 in each police authority area; and if he will make a statement. [54777]

Hazel Blears: The information requested is not collected centrally.

Sex Offenders

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what the average length of time taken to achieve parole was by those who *(a)* participated and *(b)* did not participate in the Sex Offender Treatment Programme in the last period for which figures are available. [53915]

Fiona Mactaggart: The information is not available centrally recorded and could be obtained only at disproportionate cost.

Stolen Vehicles

Bob Spink: To ask the Secretary of State for the Home Department how long recovered stolen vehicles are kept by each police authority before disposal where *(a)* the victims of the theft refuse to pay the recovery fee and *(b)* the original owner cannot be found. [54778]

Hazel Blears: If the police use their powers to recover a stolen vehicle, the owner has seven working days from being notified of its recovery to pay the prescribed fees for removal and storage. If he does not do so, the police will then normally authorise the vehicle's disposal. In cases where after taking reasonable steps the police have not been able to notify the owner of the recovery of his stolen vehicle, they will normally authorise its disposal on a date not less than 14 working days after the date of its recovery.

Bob Spink: To ask the Secretary of State for the Home Department how each police authority disposes of recovered stolen vehicles *(a)* which remain unclaimed and *(b)* where the owner is unable to pay a fee to recover their property. [54779]

Hazel Blears: If for any reason a recovered stolen vehicle is not claimed within the prescribed period, the police will authorise its disposal by the recovery operator working on their behalf. Disposal can be by any means, including sale or disposal as scrap. Any profit from the sale is payable to the owner if claimed within a year. A full audit trail for each vehicle recovered is maintained.

Yarl's Wood

Alistair Burt: To ask the Secretary of State for the Home Department (1) how many detainees at Yarl's Wood Detention Centre, Bedfordshire on 8 November had been detained for *(a)* up to one week, *(b)* between one and three weeks, *(c)* between three and eight weeks and *(d)* longer than eight weeks; [28346]

(2) how many detainees at Yarl'sWood Detention Centre on 8 November were children; and if he will make a statement. [28347]

Mr. McNulty: The Home Office publishes a quarterly snapshot of people detained solely under Immigration Act powers on the last Saturday of each quarter. The latest published information pertains to people detained as at 31 December 2005.

The accompanying table shows the number of persons detained solely under Immigration Act powers in Yarl's Wood Immigration Removal Centre as at 31 December 2005 broken down by length of detention and persons recorded as being under 18 on 31 December 2005.

Additionally, internal management information shows that, as at 9 November 2005, there were 54 children detained with their families at Yarl's Wood. Minors are detained only in two limited circumstances: first, as part of a family group whose detention is considered appropriate; second, when unaccompanied, while alternative care arrangements are made and normally just overnight. While the detention of families with children is very regrettable, it nevertheless remains necessary in appropriate cases in order to maintain an effective immigration control and to tackle abuses of the asylum system. Published statistics on immigration and asylum are available on the Home Office's Research Development and Statistics website at: http://www.homeoffice.gov.uk/rds/immigration1.html.

Persons recorded as being in detention at Yarl's Wood Immigration Removal Centre in the United Kingdom solely under Immigration Act powers as at 31 December 2005, by length of detention [1,2]

		Number of individuals
Length of detention[3,4]	*Total detainees*	*Of whom are minors*[5]
14 days or less	35	10
15 to 29 days	65	15
1 month to less than 2 months	65	5
2 months to less than 3 months	35	5
3 months to less than 4 months	20	*

Persons recorded as being in detention at Yarl's Wood Immigration Removal Centre in the United Kingdom solely under Immigration Act powers as at 31 December 2005, by length of detention [1,2]

Length of detention[3,4]	*Total detainees*	*Number of individuals Of whom are minors*[5]
4 months to less than 6 months	10	—
6 months to less than 1 year	15	—
1 year or more	*	—
Total	240	30

[1] Figures rounded to the nearest 5, with * = 1 or 2, may not sum due to rounding and exclude persons detained in police cells and those recorded as detained under both criminal and immigration powers.

[2] Includes persons recorded by IND as detained in Prison Service Establishments.

[3] Relates to current period of sole detention only.

[4] Two months is defined as 61 days; four months is defined as 122 days; six months is defined as 182 days.

[5] People recorded as being under 18 on 31 December 2005.

WORK AND PENSIONS

Baby Changing Facilities

Anne Main: To ask the Secretary of State for Work and Pensions what representations he has received regarding the safety of parents and babies in public baby changing facilities. [53819]

Mrs. McGuire: HSE or local authorities, depending on the location, enforce health and safety in baby changing facilities. These facilities are mainly in department stores, shopping malls etc., which fall to local authorities. Health and safety in facilities in health centres, hospitals and local authority owned premises is enforced by HSE.

In the last 10 years there were 17 complaints about baby changing facilities in premises enforced by HSE. These included falls from changing mats/tables, cleanliness of the facilities, and the condition of restraint straps. Also in the last 10 years, there have been five investigations resulting from accidents to babies or young children. These include three falls from changing tables and two trapped fingers in door hinges, one resulting in severe cut and the other in the amputation of the top of a finger.

Benefit Payments

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions what mechanisms are in place to assess the eligibility of benefit claimants who are UK citizens resident in foreign countries. [54227]

Mr. Timms: The Pension Service's International Pension Centre assesses the eligibility of benefit claimants resident in foreign countries according to the appropriate UK legislation and relevant reciprocal agreements.

As with claims made within the UK, births, marriages, divorces and national insurance contributions are verified to determine an individual's entitlement. A programme of certification is also in place to ensure that benefits payments continue to be made appropriately.

Energy Costs

Mrs. Villiers: To ask the Secretary of State for Work and Pensions how much was spent by his Department on *(a)* gas and *(b)* electricity in 2004–05. [51767]

Mr. Plaskitt: The Department spent *(a)* £6,613,954.00 on gas and *(b)* £17,342,661.00 on electricity in 2004–05.

Freedom of Information

Mr. Roger Williams: To ask the Secretary of State for Work and Pensions how many Freedom of Information applications his Department has received; how many have taken more than 20 days to process; and how many of these gave rise to complaints about the time taken. [31219]

Mrs. McGuire: In the first nine months of 2005, the Department for Work and Pensions received 1,108 FOI requests (as monitored in line with Department for Constitutional Affairs (DCA) requirements). 167 of these took more than 20 working days to process in full, including 36 where a permitted extension of the normal limit was required in order to apply the public interest test.

During the same period, the Department conducted 52 internal reviews where the applicant was not content with the handling of the request. In line with DCA monitoring requirements information is not kept on how many of these related to the time taken to reply.

DCA is committed to publishing quarterly updates in relation to departmental performance under FOI, including information on both the volume and outcomes of requests. The bulletin for the third quarter was published on 15 December 2005 and can be found on the DCA website at http://www.foi.gov.uk/statsapr-jun05.htm and in the Libraries of both Houses. An annual report will be published by DCA later this year.

Gas Safety

Mr. Sheerman: To ask the Secretary of State for Work and Pensions what steps the Department has taken to implement the Health and Safety Commission's Fundamental Review of Gas Safety recommendation for a levy on the gas industry for research and publicity. [51000]

Mrs. McGuire: The levy envisaged by the Fundamental Review of Gas Safety in 2000 required primary legislation to impose such a charge. As an alternative, effort has focused on promoting a voluntary funding arrangement.

In 2003 Bill Callaghan, Chair of the Health and Safety Commission, met with the top six gas suppliers, now collectively represented by ERA (Energy Retail Association). Agreement was reached to fund a national gas safety strategy to include the dangers of carbon monoxide (CO) poisoning.

On 31 January 2006, there was a roundtable discussion attended by ERA and key stakeholders with an interest in gas safety. ERA outlined activities that had been undertaken to promote gas safety. However no information was forthcoming on costs and no commitment was given at this meeting to extend publicity.

The Chair of the All Party Gas Safety Committee, John Trickett MP, has now written to chief executives of the main energy companies expressing concern that a gas safety campaign has not materialised and requesting information on CO awareness raising activities. A further meeting will be arranged to discuss this information.

HSE is undertaking research to examine the scale of the CO problem associated with domestic gas appliances and any further need for raising awareness. This will help identify the most appropriate publicity measures for dealing with problems. HSE retains the option of imposing a levy.

Jobseeker's Allowance

Mr. Laws: To ask the Secretary of State for Work and Pensions (1) what the average time taken to process a claim for jobseeker's allowance was in *(a)* England and *(b)* each region in each month from April 2004 to September 2005; and if he will make a statement; [24538]

(2) how many claims for jobseeker's allowance have been manually processed in each month from April 2004 to September 2005; and if he will make a statement. [24573]

Margaret Hodge: The administration of Jobcentre Plus is a matter for the chief executive of Jobcentre Plus, Lesley Strathie. She will write to the hon. Member.

Letter from Lesley Strathie:

The Secretary of State has asked me to reply to your questions concerning what the average time taken to process a claim to Jobseeker's Allowance (JSA) was in *(a)* England *(b)* each region, in each month from April 2004 to December 2005, and how many claims for JSA have been manually processed. This is something which falls within the responsibilities delegated to me as Chief Executive of Jobcentre Plus.

(a) The information for England is in the table below.

(b) The information for each region has been placed in the Library.

Actual average clearance times for claims for jobseeker's allowance—England

	Clerical		*System*		*Total*	
	Total JSA claims cleared in month	*Actual average clearance time*	*Total JSA claims cleared in month*	*Actual average clearance time*	*Total JSA claims cleared in month*	*Actual average clearance time*

Source:
Central Data Unit for figures up to and including July 2004 and management information systems programme 04(MISP04) from August 2004 to December 2005.

The Actual Average Clearance Times (AACT) for JSA is measured from the date the customer first contacts Jobcentre Plus to the date the customer is sent a notice of entitlement. The performance of AACT for JSA has increased nationally from 11 days in April 04 to 15 days in December 05. Initial analysis showed that shortfalls in performance in the 'initial contact' part of the process were critical. Delays in contact centres and local service outlets were a contributory factor to the situation as well as the time it can take to gather evidence from third parties before claims can be processed.

Some of our customers did experience problems getting through to our contact centres over the Summer months. Robust plans were put in place to address this, which resulted in week on week improvements. The most recent performance information for our contact centres shows that in the week ending 3rd February we answered over 94 percent of calls offered.

To address the issue of fluctuating clearance times in benefit processing a taskforce has developed immediate recovery measures. Building on the taskforce's work, the Jobcentre Plus Chief Operating Officer launched a National Action Plan in the week commencing 30 January. The Action Plan is built around a mandatory series of "health checks", taking local managers through the whole end to end process, identifying key risk elements and, where a part of the process fails the health check, directing managers to appropriate good practice products and tool-kits. Regular reviews are undertaken to ensure areas of our business do not fall below expectation. We are already seeing improvements following the introduction of these measures.

I hope this is helpful.

New Deal

Anne Snelgrove: To ask the Secretary of State for Work and Pensions how many young people have been helped by New Deal for Young People in Swindon. [55802]

Margaret Hodge: The information is in the following table.

New deal for young people in Swindon

Constituency	*Individuals starting new deal for young people*[1]	*Individuals into work through new deal for young people*[2]
Swindon South	1,480	930
Swindon North	890	540
Total	2,370	1,470

Department for Work and Pensions Information Directorate

Pensions Act

John Penrose: To ask the Secretary of State for Work and Pensions what the reasons are for the delay in publishing the regulations and codes of practice under the Pensions Act 2004. [48097]

Mr. Timms: It was always our intention to phase the introduction of the regulations needed to implement the Pensions Act 2004. The majority of these regulations have been or will be published broadly on the time scale envisaged—in some cases following consultation. They will come into force in time to ensure the measures in the Act come into effect as intended.

A number of sets of regulations came into force on 30 December 2005 which related to the European Directive on Occupational Pensions (Directive 2003/41/EC). These regulations had initially been expected to be in place by 23 September 2005, in line with the overall timetable for implementing the directive. The delay was necessary in order to take account of the issues raised following extensive consultation earlier in the year.

There has also been a delay to our planned timetable for the introduction of the Occupational Pension Schemes (Disclosure of Information) Regulations 2006. Consultation on the regulations raised a large number of helpful technical comments that need to be carefully considered. Therefore, although these regulations were scheduled for April 2006, they will now come into effect in October 2006. The delay will not have any untoward effects on schemes, as the existing regulations will still apply.

The Pension Regulator can only publish supporting codes of practice when the relevant regulations have been made and laid. I have no reason to believe that all the codes of practice will not be published as soon as practicable after the relevant regulations have appeared in final form.

Statutory Instruments

John Bercow: To ask the Secretary of State for Work and Pensions if he will list the statutory instruments introduced by his Department since 6 May 2005. [46221]

Mrs. McGuire: The information has been placed in the Library.

TRADE AND INDUSTRY

Baku-Tbilisi-Ceyhan Pipeline

Andrew George: To ask the Secretary of State for Trade and Industry what criteria were applied by the Export Credits Guarantee Department when deciding to support the Baku-Tbilisi-Ceyhan oil pipeline. [55059]

Ian Pearson: ECGD carried out thorough due diligence on the ETC Pipeline Project before the decision was taken to provide support. This process included an examination of:

the economic and political risks associated with the three host countries;

the proposed borrowing structure, security arrangements and financial standing of the participants;

the commercial and financial viability of the project; and

the environmental, social and human rights impacts of the project.

Andrew George: To ask the Secretary of State for Trade and Industry whether the Baku-Tbilisi-Ceyhan oil pipeline project was completed on time and on budget in 2005. [55093]

Ian Pearson: Construction of the pipeline was estimated to be finalised during December 2005 but completion is now anticipated to be in the first half of 2006. Until such completion ECGD will not know the final cost.

Andrew George: To ask the Secretary of State for Trade and Industry what assessment he has made of the causes of delays in the commissioning of the Turkey section of the Baku-Tbilisi-Ceyhan oil pipeline. [55094]

Ian Pearson: At the outset of this project, BTC Co. set a series of target dates for the various stages of the construction process. ECGD and its independent engineers have been kept informed by BTC Co. of delays and their causes throughout. ECGD's engineers advise that delays are common for a project of this size and nature.

Bangladesh

Mike Penning: To ask the Secretary of State for Trade and Industry what the nature was of the claim made against the British Geological Survey in Bangladesh; and if he will make a statement. [52575]

Barry Gardiner: On 20 February 2004, the Court of Appeal struck out a claim by a Bangladeshi resident in a test case against the British Geological Survey (BGS), part of the Natural Environment Research Council. It was alleged that the BGS was negligent in not testing for the presence of arsenic during a pilot research study into groundwater movement in central and north eastern Bangladesh in 1992. The Court of Appeal decided that the relationship between the BGS and the claimants,

who were not known to the BGS, was too remote for a duty of care towards the claimants to arise. More detailed information is available on the BGS website www.bgs.ac.uk/arsenic

The lawyers for the claimant have appealed to the House of Lords to overturn this decision of the Court of Appeal and a hearing is set for 22–23 May 2006.

British Overseas Territories

Daniel Kawczynski: To ask the Secretary of State for Trade and Industry if he will take steps to seek provision for the separate representation of British overseas territories at future World Trade Organisation talks. [55944]

Ian Pearson: The British overseas territories (as listed in annex II to the EC Treaty) were consulted between 1991 and 1995 by the United Kingdom when the WTO was being negotiated as to whether they wished to be covered by it. They chose not to do so. Accordingly, the overseas territories have no locus in the WTO and are not represented in WTO talks. Should any UK overseas territory wish to participate in the WTO in the future the UK Government would be happy to assist it in exploring with the WTO the means available to it to do so.

Censorship

John Bercow: To ask the Secretary of State for Trade and Industry what advice his Department issues to British companies operating overseas on censorship. [55498]

Ian Pearson: Through UK Trade and Investment, and its staff in Britain's diplomatic missions overseas, the Government provides businesses in the UK with services and advice to help them achieve international business success. This includes appropriate advice to individual companies on censorship issues where this is sought.

Cigarette Lighters

John McDonnell: To ask the Secretary of State for Trade and Industry if the Government will take steps to ensure the introduction of fire safety cigarette lighters into the UK. [56078]

Mr. Sutcliffe: The UK has already indicated its support to the European Commission for the draft Commission Decision to ban disposable cigarette lighters that do not conform to the child-resistancy requirements of technical standard EN 13869:2002 and all child-appealing novelty lighters. We expect the Decision to be formally adopted sometime over the next few weeks, and will then take steps to implement it in the UK.

Coal Imports

Mrs. James: To ask the Secretary of State for Trade and Industry how much coal was imported into the UK in 2005; and what the main sources for such imports were in each year since 2000. [56195]

Alan Johnson: Provisional figures suggest that 45.1 million tonnes of coal (steam coal, coking coal, and anthracite) were imported into the UK in 2005. Figures for the major sources are shown in the following table.

2005	UK imports of coal (million tonnes)
Total	45.1
of which:	
Russia	17.2
South Africa	13.0
Australia	4.5
Colombia	3.3
Indonesia	1.6
USA	1.4
Canada	1.1

Source:
HM Revenue and Customs for SITC chapter 32

Information for earlier years was published in table G.5 of the "Digest of United Kingdom Energy Statistics 2005".

Electricity (Renewable Generation)

Mr. Meacher: To ask the Secretary of State for Trade and Industry why the limit on the proportion of electricity that a supplier may source from co-firing under the renewables obligations certificates scheme is to be reduced from 25 per cent. to 10 per cent. from 1 April; and if he will reverse the decision to make that reduction. [55145]

Malcolm Wicks: I refer my right hon. Friend to the debate on the Renewable Obligation Order 2006 of 1 March 2006, *Official Report*, Second Standing Committee on Delegated Legislation.

Equal Pay

Keith Vaz: To ask the Secretary of State for Trade and Industry what estimate he has made of the pay gap between able bodied and disabled workers in *(a)* Leicester and *(b)* the UK in each year from 1997 to 2005; and what steps his Department is taking to reduce it. [50437]

Mrs. McGuire: I have been asked to reply.

This Department has not undertaken any research into the pay gap between disabled and non-disabled workers. However, the Low Pay Commission reports that, in 2004, the pay gap for people with a work-limiting disability was 13 percentage points.

The employment provisions of the Disability Discrimination Act, as amended and strengthened by this Government, place a duty on an employer not to directly discriminate against a disabled person, or to treat the disabled person less favourably for a reason related to that person's disability, unless this can be justified. The Equal Opportunities Commission's Code of Practice on Equal Pay also makes clear that it is good practice for employers to compare the pay of disabled and non-disabled people doing equal work.

As a result of a strong economy and active labour market policies, the employment gap between disabled and non-disabled people is starting to close. The employment rate for disabled people was 38.1 per cent. in spring 1998, rising to 46.6 per cent. by spring 2005; over the same period, the employment gap fell from 35.1 per cent. to 28 per cent.

The Prime Minister's Strategy Unit report, "Improving the Life Chances of Disabled People" set out a 20-year strategy to realise our vision of substantive equality for disabled people. This strategy is being driven by a new Office for Disability Issues, which was launched in December 2005.

Fireworks

Mr. Laurence Robertson: To ask the Secretary of State for Trade and Industry what guidelines exist for the design of fireworks with regard to their safety; and if he will make a statement. [55647]

Mr. Sutcliffe: All consumer fireworks sold in the UK must comply with British Standard BS 7114. This standard is called up by both the Fireworks (Safety) Regulations 1997 (as amended) and the Fireworks Regulations 2004 (as amended). The standard was prepared to ensure that firework design, construction, labelling and performance minimises the risk of injury to users and onlookers and the public in general.

Gas Imports

Mr. Duncan: To ask the Secretary of State for Trade and Industry how much and what percentage of gas imported to the UK came from Russia in each quarter since January 2002. [54981]

Malcolm Wicks *[holding answer 1 March 2006]:* No UK gas demand has so far been met directly from Russian sources. It is not possible to identify where gas imported through the Zeebrugge to Bacton interconnector was physically sourced.

Gas Supplies

Mr. Wallace: To ask the Secretary of State for Trade and Industry what the annual *(a)* volume and *(b)* value of gas (i) exported from and (ii) imported to the UK was in each year since 1997. [55252]

Malcolm Wicks *[holding answer 2 March 2006]:* Information on UK trade in natural gas since 1997 is contained in the following table. Data for 2005 is provisional and subject to revision over forthcoming months.

	Volume (GWh)		*Value (£ million)*	
	Imported	*Exported*	*Imported*	*Exported*
1997	14,062	21,666	103	80
1998	10,582	31,604	43	80
1999	12,862	84,433	27	230
2000	26,032	146,342	153	579
2001	30,464	138,330	187	746
2002	60,493	150,731	260	848
2003	86,298	177,039	135	946
2004	133,035	114,111	670	645
2005	173,372	96,184	1,742	673

Source:
DTI energy statistics; HMRC overseas trade statistics.

Hearing Loss Claims

John Mann: To ask the Secretary of State for Trade and Industry how many individual claimants have been informed by his Department that their case is being delayed due to negotiations over costs payments for noise-induced hearing loss claims to his Department due to breach of section 4 (2)c of the Conditional Fee Agreement Regulations 2000. [55002]

Malcolm Wicks: Payment of compensation by the Department's claims handlers would not be delayed by negotiations over solicitors' costs.

John Mann: To ask the Secretary of State for Trade and Industry whether references have been made to the Serious Fraud Office concerning breaches of rule 4(2)c of the Conditional Fee Agreement Regulations 2000. [55010]

Malcolm Wicks: No such reference has been made to the Serious Fraud Office. It is not a matter for them but one for the courts to resolve.

India (Imports/Exports)

Mrs. Villiers: To ask the Secretary of State for Trade and Industry what the value of *(a)* imports from and *(b)* exports to India was in (i) goods and (ii) services in each of the last five years; if he will ask the Office for National Statistics to add this data to the monthly trade statistical releases; and if he will make a statement. [54515]

Ian Pearson: The information requested is as follows:

UK trade in goods and services with India

£ million

	Exports		*Imports*	
	Goods	*Services*	*Goods*	*Services*
2000	2,058	549	1,651	663
2001	1,797	664	1,825	814
2002	1,755	619	1,794	804
2003	2,293	688	2,088	783
2004	2,237	812	2,276	1,015
2005	2,813	n/a	2,829	n/a

Note:
Data for 2000–04 is on a balance of payments basis. No services data is available for 2005 at present and the goods figures for 2005 are on an overseas trade statistics basis.

Source:
HM Revenue and Customs and Office for National Statistics (Pink Book).

This data is available in the ONS's "Pink Book" published annually, and from HM Revenue and Customs.

There has been excellent growth in bilateral trade and investment between the UK and India over recent years with data to October 2005 indicating a 29.4 per cent. increase in exports to India compared to the same period in 2004. The UK is the fifth biggest investor in India with UK companies involved in 9.8 per cent. of all new FBI into India since 1991.

The UK Government is committed to furthering UK trade and investment opportunities with India through the Prime Minister's Initiative and through JETCO, the UK-India Joint-Economic and Trade Committee. Under JETCO, business to business working groups, supported by both Governments, are working to identify opportunities and remove barriers to trade and investment in both the UK and India. UK Trade and Investment's team in India is its second biggest globally, after the USA.

Labour Statistics

Mrs. Curtis-Thomas: To ask the Secretary of State for Trade and Industry what percentage of the labour market were women in 2005. [56267]

Mr. Sutcliffe: According to the Labour Force Survey, for the calendar year 2005 an average of 45.8 per cent. of those in the labour force (aged 16 and over and economically active) were women.

During the same period, an average of 46.1 per cent. of those in employment were women.

Mrs. Curtis-Thomas: To ask the Secretary of State for Trade and Industry what percentage of those employed in *(a)* manager and senior positions, *(b)* process, plant and machine operations and *(c)* skilled trade in 2005 were women. [56268]

Mr. Sutcliffe: Please see the following table.

Table 1. Male and female employment by occupation[1]

Percentage

	Male	*Female*
Managers and senior officials	66	34
Skilled trades occupations	92	8
Process, plant and machine operatives	87	13

[1] Occupation in main job.

Source:
Labour Force Survey, autumn 2005

Lesotho

Chris Ruane: To ask the Secretary of State for Trade and Industry what the value was of *(a)* exports to and *(b)* imports from Lesotho in each of the past 20 years at current prices. [56201]

Alan Johnson: Information on the UK's trade in goods with Lesotho from 1986 to 2005 is shown in the table below.

£ million

	UK exports to Lesotho	*UK imports from Lesotho*
1986	2.128	0.276
1987	1.111	0.485
1988	1.260	0.977
1989	0.795	0.734
1990	0.642	1.288
1991	3.258	2.799
1992	2.725	4.159
1993	0.908	2.343
1994	0.665	1.605
1995	1.324	0.399
1996	1.864	0.060
1997	4.847	0.105
1998	1.041	0.015
1999	0.755	0.000
2000	0.313	0.828
2001	1.941	1.883
2002	1.048	1.116
2003	0.202	0.516
2004	0.190	0.262
2005	0.511	0.304

Note:
2005 figures are subject to revision.

Overseas Trade Statistics

Lisbon Agenda

Keith Vaz: To ask the Secretary of State for Trade and Industry what policies his Department has adopted to assist the United Kingdom's fulfilment of the Lisbon Agenda criteria. [56145]

Ian Pearson: The Government strongly support the renewed Lisbon focus on "jobs and growth" as the best way to meet the challenges of globalisation and boost prosperity and living standards for all. The UK National Reform Programme details our policy response to these challenges. The Department of Trade and Industry is driving forward micro-economic reforms in areas such as competition, enterprise, science and innovation, skills and investment.

We expect the spring Council in March to emphasise the importance of implementation of national commitments to reform.

Miners' Compensation

John Mann: To ask the Secretary of State for Trade and Industry in respect of how many cases Browns Solicitors of Bradford have been refused full payment of their costs due to breach of regulation 4 of the conditional fee agreement regulations with regard to miners' hearing loss claims. [54840]

Malcolm Wicks: This information is not readily available. Miners' hearing loss claims are not schemed so solicitors' costs for each claim are dealt with on their own merits. Concerns relating to a breach of regulation 4 of the conditional fee regulations would be raised as part of the negotiations on the appropriate level of costs for any given claim.

John Mann: To ask the Secretary of State for Trade and Industry in how many instances claimants have been informed of his Department's insurers' refusal to meet all solicitors' costs because of a breach of regulation 4 of the conditional fee agreement regulations. [54841]

Malcolm Wicks: Neither the Department nor its claims handlers would inform a claimant directly of a refusal to meet solicitors' costs in full unless contacted by the claimant. No tally of such contacts are kept. However, the onus to keep a claimant appraised of developments falls to the claimant's representatives.

John Mann: To ask the Secretary of State for Trade and Industry (1) in how many ongoing cases his Department's insurers are disputing costs because of a possible breach of regulation four of the conditional fee agreement regulations; [54842]

(2) how many costs payments were refused for cases by solicitors for noise-induced hearing loss claims to his Department due to breach of section 4 (2)c of the Conditional Fee Agreement Regulations 2000 in 2005; and how many such refusals there have been in 2006; [55000]

(3) what the total value is of costs payments that have been refused for cases for noise-induced hearing loss claims to his Department due to breach of section 4 (2)c of the Conditional Fee Agreement Regulations 2000; [55001]

(4) how many *(a)* costs payments and *(b)* costs payments for cases involving Beresfords solicitors for noise-induced hearing loss claims to his Department are being negotiated due to breach of section 4(2)c of the Conditional Fee Agreement Regulations 2000; [55007]

(5) what percentage of noise-induced hearing loss cases disputed due to breaches of rule 4(2)c of the Conditional Fee Agreement Regulations 2000 included a disbursement payment to *(a)* Vendside, *(b)* Beresfords solicitors, *(c)* Melex Ltd., *(d)* Dr. Yeoh, *(e)* NIG and *(f)* Composite Legal Expen when costs were negotiated. [55009]

Malcolm Wicks: This information is not readily available. Miners' hearing loss claims are not schemed so solicitors' costs for each claim are dealt with on their own merits. Concerns relating to a breach of regulation 4 of the conditional fee regulations would be raised as part of the negotiations on the appropriate level of costs for any given claim.

John Mann: To ask the Secretary of State for Trade and Industry if he will take steps to ensure that solicitors abide by Law Society adjudications on complaints from the Miners' Compensation Scheme; and if he will make a statement. [55041]

Malcolm Wicks: This is a matter for the Law Society and the Department has no enforcement powers. The Law Society has this week written to all solicitors involved in the coal health compensation schemes to urge any who have deducted money from claimants' compensation scheme to repay it. This scheme was set up to compensate sick miners and the families of the deceased and it is wholly unacceptable that any of this money should be taken as fees. The firms in question should now act on this and promptly.

John Mann: To ask the Secretary of State for Trade and Industry how much in solicitors' costs has been partially refused due to breach of regulation 4 of the conditional fee regulations for miners' hearing loss claims. [55298]

Malcolm Wicks *[holding answer 2 March 2006]:* This information is not readily available. Miners' hearing loss claims are not schemed so solicitors' costs for each claim are dealt with on their own merits. Concerns relating to a breach of regulation 4 of the conditional fee regulations would be raised as part of the negotiations on the appropriate level of costs for any given claim.

National Institute for Medical Research

Mr. Dismore: To ask the Secretary of State for Trade and Industry (1) what *(a)* advice he has received about and *(b)* assessment he has made of the security implications of moving the National Institute for Medical Research from Mill Hill to Camden; and if he will make a statement; [55232]

(2) what estimate he has made of the cost of relocation of category four containment facilities from the National Institute for Medical Research to the proposed new site on Hampstead road, Camden; and if he will make a statement; [55236]

(3) what the estimated cost is of the proposed relocation of the National Institute for Medical Research from Mill Hill to Camden; and if he will make a statement. [55237]

Barry Gardiner: The proposed move of the National Institute for Medical Research (NIMR) is a matter for the Medical Research Council (MRC). My noble Friend Lord Sainsbury of Turville has been briefed by MRC's chief executive, Professor Colin Blakemore, on MRC's plans for moving the National Institute for Medical Research (NIMR). I have asked Professor Blakemore to write to the hon. Member.

Oil Imports

Mr. Clifton-Brown: To ask the Secretary of State for Trade and Industry what percentage of oil in the UK was imported from Venezuela in each of the last five years. [55496]

Malcolm Wicks: The quantity and percentage of crude oil imported from Venezuela between 2000 and 2004 is shown in the following table.

Venezuela

	Quantity of crude oil imported (thousand tonnes)	*Share of UK crude oil imports (per cent.)*	*Share of UK crude oil supply (per cent.)*
2000	1,092	2.2	1.3
2001	1,137	2.3	1.5
2002	1,293	2.5	1.7
2003	1,124	2.4	1.4
2004	1,337	2.4	1.6

International Energy Agency; DTI Digest of UK Energy Statistics.

Oil Licences

Mr. Amess: To ask the Secretary of State for Trade and Industry how many oil licences were issued by his Department in each of the last 10 years. [55858]

Malcolm Wicks: The following table shows by year the number of offshore (seaward) and onshore (landward) oil and gas licences awarded by my Department in the last 10 years. In some cases the actual date of issue may occur in following year.

Oil and gas licences—1995 to 2005

	Seaward	*Landward*
1995	45	3
1996	0	22
1997	28	0
1998	47	35
1999	1	0
2000	0	44
2001	9	0
2002	32	23
2003	92	8
2004	98	27
2005	151	0

Oil/Gas Industry Regulations

Mr. Amess: To ask the Secretary of State for Trade and Industry if he will make a statement on the operation of *(a)* the Offshore Petroleum Activities (Conservation of

Habitats) Regulations 2001, *(b)* the Prevention of Oil Pollution Act 1971, *(c)* the Offshore Petroleum Activities (Oil Pollution, Prevention and Control) Regulations 2005 and *(d)* the Health and Safety at Work etc Act 1974 in the oil and gas industry. [55814]

Malcolm Wicks: The Offshore Petroleum Activities (Conservation of Habitats) Regulations 2001 apply the European habitats directive and the wild birds directive in relation to oil and gas projects on the UK Continental Shelf (UKCS). For the purpose of the regulations, oil and gas activities are defined as those carried out under the Petroleum Act 1998 in connection with the exploration for or production of petroleum on the UKCS.

The Prevention of Oil Pollution Act 1971 was replaced last year by the Offshore Petroleum Activities (Oil Pollution, Prevention and Control) Regulations 2005 which introduce a permitting regime to the UK oil and gas industry in relation to any oil discharges to the marine environment. In addition the new regulations introduce more wide-ranging powers for the DTI's Offshore Environmental Inspectors and authorise the introduction of Trading Schemes.

The Health and Safety at Work Act 1974 is enforced by the Health and Safety Executive which reports to the Secretary of State for Work and Pensions.

Mr. Amess: To ask the Secretary of State for Trade and Industry what recent representations he has received on the operation of the Health and Safety at Work, etc. Act 1974 in its application to the oil and gas industry. [55857]

Malcolm Wicks: The Health and Safety at Work Act 1974 is enforced by the Health and Safety Executive which reports to the Secretary of State for Work and Pensions. My right hon. Friend the Secretary of State for Trade and Industry has had no recent representations on the Act's application to the oil and gas industry. PILOT, the joint industry/Government forum for the offshore oil and gas industry, which I chair and which includes a representative from the HSE, receives regular feedback on the progress of the industry's Step Change safety initiative.

Ministers and officials have also been involved in discussions with industry, other Departments and local communities following the explosion at the Buncefield oil terminal, on which the Health and Safety Executive published a progress report recently.

Oxley and Coward Solicitors

John Mann: To ask the Secretary of State for Trade and Industry for what reasons Oxley and Coward solicitors refused to release papers as instructed by Thomas Foster, a constituent of the hon. Member for Bassetlaw; and if he will take steps to investigate the matter. [55102]

Malcolm Wicks *[holding answer 2 March 2006]:* This would appear to be an issue that your constituent should resolve with his solicitor. If so, and an impasse has been reached, it may be appropriate to refer the matter to the Law Society.

Post Offices

Mr. Paterson: To ask the Secretary of State for Trade and Industry whether *(a)* he, *(b)* ministers in his Department and *(c)* officials from his Department have had discussions with the European Commission on subsidy payments for the financial year 2006–07 to Post Office Ltd. [55587]

Barry Gardiner: The European Commission cleared our state aid application on 24 February 2006 to help maintain non-commercial rural post office branches. Following formal notification of our application in March 2005, two technical meetings were held between officials of DTI and the Commission.

Mr. Paterson: To ask the Secretary of State for Trade and Industry what the value is of the subsidy his Department proposes to pay during 2006–07 financial year to Post Office Ltd. for the maintenance of *(a)* rural and *(b)* other post offices. [55591]

Barry Gardiner: European Commission clearance has been given to pay up to £150 million to Post Office Ltd. to maintain non-commercial rural post offices in financial year 2006–07. There is also provision for Post Office Ltd. to draw-down up to £145 million in financial year 2006–07 to cover cash outflows, as approved by the European Commission under Decision N 784/2002.

Mr. Paterson: To ask the Secretary of State for Trade and Industry whether the payment of subsidies to Post Office Ltd. for the maintenance of *(a)* rural and *(b)* other post offices required clearance from the European Commission under EU state aid rules. [55592]

Barry Gardiner: Government support to maintain rural post office branches required clearance from the European Commission under article 87 section 1 of the treaty. There is no similar support measure for non-rural branches.

Potash

Dr. Kumar: To ask the Secretary of State for Trade and Industry what his Department's policy is on potash anti-dumping measures. [56069]

Ian Pearson: *[holding answer 3 March 2006]:* The UK has supported the opening of an expiry review of the existing anti-dumping duties on potash. The purpose of the review is to determine whether the existing anti-dumping measures need to be extended. The review should be concluded by no later than July 2006 but in the meantime the existing measures stay in force.

Public Sector Shareholdings

Dr. Cable: To ask the Secretary of State for Trade and Industry which public sector shareholdings have a market valuation; and what their current values are. [54726]

Barry Gardiner: There are no market valuations for any DTI public sector shareholdings.

Responsible Borrowing

Mr. Hoban: To ask the Secretary of State for Trade and Industry what Government policy is on enabling financial institutions to share customer data to facilitate responsible borrowing; and if he will make a statement. [55887]

Mr. Sutcliffe: A key plank in our responsible lending policy is to encourage the greater sharing of data by creditors to enable them to make better responsible lending decisions. Major high street lenders have made significant steps towards full data sharing including data on current accounts. We will shortly be consulting on removing legislative barriers to the sharing of data on approximately 40 million accounts where the debtors did not give their permission for the data to be shared as part of the credit agreement. The Government are also taking steps to address responsible borrowing, such as improving financial education and the FSA's online debt test, as set out in the Government's Annual Report on Tackling Over-indebtedness.

Shareholder Executive

Dr. Cable: To ask the Secretary of State for Trade and Industry if he will list the *(a)* public bodies and *(b)* shareholdings which fall within the remit of the Shareholder Executive. [54725]

Barry Gardiner: The Shareholder Executive's portfolio is listed in Annex A to its Annual Report 2004–05, as placed in the Library of the House on 21 October 2005. It is also available at www.shareholderexecutive.gov.uk/publications.

Waste Electrical and Electronic Equipment Directive

Mr. Kidney: To ask the Secretary of State for Trade and Industry what recent representations he has received from industry regarding the UK's implementation of the waste electrical and electronic equipment directive. [56454]

Malcolm Wicks: I announced on 14 December that the Department would review proposals for implementing the directive in the UK. We have received a number or representations from stakeholder groups during this review, and will continue to discuss the issues with them before undertaking formal consultation later in the spring.

Mr. Kidney: To ask the Secretary of State for Trade and Industry if he will introduce an enforceable recycling charge for electrical and electronic equipment under the waste electrical and electronic equipment directive. [56455]

Malcolm Wicks: I announced on 14 December that the Department would review proposals for implementing the directive in the UK. I will announce the results of this review in due course.

Wind Power

Dr. Francis: To ask the Secretary of State for Trade and Industry whether he has made an assessment of the impact of wind power generation in other countries on *(a)* employment opportunities and *(b)* the environment; and if he will make a statement. [55193]

Malcolm Wicks: The Department has not carried out any assessment of the impact of wind power generation on employment opportunities in other countries. However, the European Wind Energy Association estimate that more than 72,000 people are currently employed in the wind sector across Europe, with the potential to employ 200,000 people by 2020. This compares to just 25,000 jobs in 1998.

The Department has made no assessment of the impact of wind power generation on the environment in other countries. However, we recognise that wind power, like other low carbon technologies, has the potential to make a significant contribution in reducing greenhouse gas emissions—the main cause of climate change.

Dr. Francis: To ask the Secretary of State for Trade and Industry what assessment his Department has made of the *(a)* employment opportunities resulting from and *(b)* the environmental impact of wind power; and if he will make a statement. [55198]

Malcolm Wicks: The Department estimates that there are currently 8,000 people employed in the renewables industry in the UK, the majority of which work in the wind sector. Given the continued growth of the renewables industry in the UK, we estimate that this could rise to between 17,000 and 35,000 jobs by 2020.

The Department has established a research advisory group to fund research into the impact of wind farms on the environment, including addressing concerns over seascape, birds and navigational safety. In addition, applications for consent to construct wind farms, submitted to the DTI, are accompanied by an environmental impact assessment.

Indeed projects like the Black Law windfarm demonstrate that, if properly sited, such developments not only produce zero emissions, but can also have a positive impact on the environment. The RSPB make clear that the Black Law windfarm, on the site of an abandoned opencast coalmine, represents an exciting opportunity to deliver real biodiversity benefits through habitat management.

DEPUTY PRIME MINISTER

Accidental Dwelling Fires

John McDonnell: To ask the Deputy Prime Minister what steps the Government are taking to reduce the number of accidental dwelling fires started by children between the ages of 0 and nine years and related casualties. [56156]

Jim Fitzpatrick: Young children are particularly vulnerable to death and injury by fire and may also cause fire accidentally. Nearly all fire and rescue services provide fire safety education in schools, supported by materials from the National Community Fire Safety Centre. Most fire and rescue services also work with individual young firesetters and the Office of the Deputy Prime Minister published good practice guidance in 2005.

To ensure early and effective intervention and education, the Office of the Deputy Prime Minister has recently published for public consultation a draft Fire and Rescue Service Strategy for Children and Young People. The Strategy will deliver a reduction in fire risk for children of all ages. Officials in the Office of the Deputy Prime Minister are currently working through the responses and the ODPM will publish a final version of the Strategy later this year.

Arm's Length Organisations

Jeremy Corbyn: To ask the Deputy Prime Minister what the *(a)* value and *(b)* repayment date is of each loan provided by his Department to arm's length management organisations in London. [54465]

Yvette Cooper: The Office of the Deputy Prime Minister does not provide loans to arm's length management organisations (ALMOs).

The ODPM's financial support for local authorities takes the form of supported borrowing approvals. The allocations for local authorities with ALMOs in London are tabled as follows.

£ million

Authority	*ALMO allocation 2002–04*	*2004–06*
Round 1		
Hounslow	35.0	64.7
Westminster	20.3	53.7

£ million

	ALMO allocation 2003–05	*2005–07*
Round 2		
Brent	33.8	20.2
Hillingdon	16.6	31.4
Kensington and Chelsea	21.7	21.7

£ million

	ALMO allocation 2004–06	*2006–08*
Round 3		
Barnet	19	29.9
Islington	24.9	59.6

2005–07	*ALMO allocation (£ million)*
Round 4	
Brent (partial)	14.0
Ealing	64.0
Hammersmith and Fulham	78.1

2006–08	*ALMO allocation (£ million)*
Round 5	
Hackney[1]	88.980
Lambeth (part)[1]	8.589
Newham[1]	78.113

[1] Allocation subject to the local authority receiving the Secretary of State's consent to delegate its housing management functions to its ALMO and the ALMO receiving at least a two star rating from the Housing Inspectorate.

These approvals give permission for a local authority to borrow money to fund capital expenditure on its stock. Housing Revenue Account (HRA) Subsidy is paid to local authorities by ODPM to cover the interest payments that a local authority must make on this borrowing. The terms of the loans taken out by local authorities with ALMOs are a matter for the individual local authorities.

Barker Report

Mr. Hollobone: To ask the Deputy Prime Minister what assessment his Department has made of the population growth and immigration assumptions used in the Barker report on future housing needs. [55695]

Yvette Cooper *[holding answer 3 March 2006]:* The assumptions on population growth in the Barker report were based on the Office for National Statistics population projections.

Brownfield Sites

Mr. Byers: To ask the Deputy Prime Minister if he will re-define the term brownfield site to exclude gardens of residential homes. [54033]

Yvette Cooper *[holding answer 27 February 2006]:* Draft Planning Policy Statement 3 "Housing" (PPS3), published for consultation in December 2005, does not propose a change in the definition of brownfield land, residential gardens have been included as brownfield land since 1985. However as draft PPS3 emphasises, this does not necessarily mean that they are suitable for development.

The consultation period for responses to draft PPS3 closed on 27 February. The Office of the Deputy Prime Minister will consider any consultation responses on this matter when finalising PPS3.

Business Rates (Milton Keynes)

Mr. Lancaster: To ask the Deputy Prime Minister how much was paid in business rates in Milton Keynes in each year since 1996–97; and how much was received by Milton Keynes Council from the central rate pool. [54899]

Mr. Woolas: The amounts Milton Keynes collected in business rates and the amounts they received back from the central pool from 1997–98 to 2004–05 are set out in the following table. Unfortunately this information is not readily available for 1996–97.

National non-domestic business rates (NNDR)—Milton Keynes

	Collected by the authority (£)	*Received from the NNDR pool (£)*
1996–97	—	—
1997–98[1]	66,752,909	43,629,207
1998–99	65,361,786	46,461,053
1999–2000	70,826,102	51,080,491
2000–01	82,294,976	58,516,749
2001–02	93,837,068	58,183,087
2002–03	98,596,264	64,529,538
2003–04	92,889,226	62,891,597
2004–05	99,363,282	58,782,184

[1] Collection figure includes £1,050,221.10 in recouped schools relief; audited contribution figure was £65,702,688

Capacity Fund

Mr. Wills: To ask the Deputy Prime Minister how much funding the Department has made available through the Capacity Fund for the Partnership between Swindon borough and Kent county councils. [54728]

Mr. Woolas: Swindon received approval for a grant of £1 million in March 2005 to enable the council to meet expenditure incurred through the piloting of a social services franchise with Kent CC. The Department of Health met £180,000 of the £1 million.

The Kent Swindon franchise has enabled the council to move from 0 Star Social Services in December 2003 to 1 Star (December 2005).

Council Housing

Mrs. Hodgson: To ask the Deputy Prime Minister what proportion of the council housing stock of *(a)* houses and *(b)* flats in Gateshead, East and Washington, West constituency has been sold under the right-to-buy scheme since 1980. [54073]

Yvette Cooper: An estimated 35 per cent. of council housing stock in Gateshead has been sold through the right-to-buy scheme since 1980. Information concerning the type of dwelling sold through right-to-buy and constituency level data are not held centrally, and could be provided only at disproportionate cost.

Energy Costs

Mrs. Villiers: To ask the Deputy Prime Minister how much was spent by his Office on *(a)* gas and *(b)* electricity in 2004–05. [51784]

Jim Fitzpatrick: The cost of electricity and gas used in the properties occupied by the Office of the Deputy Prime Minister, and its agencies in 2004–05 are as follows:

£

	Gas	*Electricity*
Office of the Deputy Prime Minister[1]	121,855	526,517
Agencies	264,168	715,145
Total	386,023	1,241,662

[1] Excluding Government Offices.

This answer does not include figures for 26 Whitehall, which is managed by the Cabinet Office, and for which the Office of the Deputy Prime Minister pays an agreed proportion of the cost of all services supplied by the Cabinet Office.

This answer also does not include the buildings occupied by Government Offices, which carry out functions on behalf of 10 Government Departments.

Fire and Rescue Service

Sarah Teather: To ask the Deputy Prime Minister how many deaths from accidental dwelling fires there were in each fire and rescue service in each year since 1997. [55764]

Jim Fitzpatrick: The following table shows the number of deaths from accidental dwelling fires for each fire and rescue service in England in each year since 1997.

Fatal casualties in accidental dwelling fires, by fire and rescue service
England, 1997–2004

FRS area	*1997*	*1998*	*1999*	*2000*	*2001*	*[1]2002*	*[1]2003*	*2004*

Fire and Rescue Service FDR1 returns to ODPM.

Mr. Lancaster: To ask the Deputy Prime Minister what the real cash changes expected are in each of the regional fire and rescue services budgets in England in each year from 2000 to 2009. [43908]

Mr. Woolas: Each fire and rescue authority and county council who have responsibility for the provision of fire services set their own budgets. Annual budgets are financed by council tax, formula grant, specific grants and local authority reserves. Budget information for 2006–07 to 2009–10 is not available. Figures for the allocations of formula grant for 2006–07 and 2007–08 to each authority with fire and rescue responsibilities were laid before the House on 31 January 2006 and are also available on the Office of the Deputy Prime Minister's website at: http://www.local.odpm.gov.uk/finance/0607/grant.htm

However, figures on reported budgets at the beginning of each year and total service expenditure, which shows actual expenditure in the year are available. The figures provided are based on the total service expenditure. This is the only definition for which figures are available on a consistent basis from 2000–01 to 2005–06. This is because fire authorities in shire areas were financed largely by contributions from county councils and unitary authorities in their area before 2004–05, and these amounts were netted off under all the other definitions. Since 2005–06 fire authorities have been able to finance their budget directly. Year-on-year percentage change in real terms has been calculated using the HM Treasury's GDP deflators.

Mrs. Villiers: To ask the Deputy Prime Minister how much it cost on average to employ a firefighter in each of the first 10 years of service. [54513]

Jim Fitzpatrick: The information requested is not held centrally, and could be provided only at disproportionate cost.

Housing Associations

Mr. Hoyle: To ask the Deputy Prime Minister what money is available for housing associations to build houses in Chorley. [53375]

Yvette Cooper: Chorley has received over £5.5 million through the last three Approved Development Programme bid rounds (2002–03 to 2004–06). This will generate cash spend over a number of years and completions will be delivered in subsequent years to the allocation being made.

Mr. Hoyle: To ask the Deputy Prime Minister how much money the Government has made available for housing in Chorley in the last three years. [53576]

Yvette Cooper: Allocations to Chorley BC of capital funding for housing purposes over the period 2003–04 to 2005–06 total £7.9 million.

This includes the Major Repairs Allowance first introduced in 2001–02 specifically for the improvement of local authority stock alongside the Decent Homes standard which sets out minimum standards to be met by 2010.

In the same period an additional £4.3 million was allocated by the Housing Corporation from its Approved Development Programme to schemes in Chorley.

Inner-city Regeneration Projects

Mr. Streeter: To ask the Deputy Prime Minister pursuant to the oral answer of 1 February 2006, *Official Report*, column 302, on inner-city regeneration projects, what steps he has taken since 1 February 2006 to review spending decisions by Plymouth council to assess whether they are fair. [53220]

Mr. Woolas: It is the responsibility of each local authority to make their spending decisions based on their needs, however the Office of the Deputy Prime Minister recommend that, in accordance with Planning Policy Guidance Note 17 (Planning for Open Space Sport and Recreation), local authorities should assess the needs and opportunities of their local community, including provision for children and teenagers.

I understand that Plymouth city council prioritises its investment in refurbishing and upgrading its play areas across the city on the basis of health and safety risk assessments. Following such assessments, Plymouth

city council has just completed two play area refurbishments and upgrades at Dean's Cross and Hooe Green in Plymstock, and a third scheme is in progress at Hemerdon Heights in Plympton.

Local Authority Employees

Philip Davies: To ask the Deputy Prime Minister what estimate he has made of the cost of the Single Status Scheme for Council employees to *(a)* Bradford Council, *(b)* councils in Yorkshire and *(c)* all councils in England; and what financial support the Government are providing to local authorities for implementing the scheme. [55186]

Mr. Woolas: The Government have made no assessment of these costs. Local government agreed, with the unions, to carry out Single Status Reviews as part of the last round of pay negotiations. It is for local authorities as individual employers to resolve the issue of equal pay in an affordable manner.

Local Government Restructuring

Mrs. Spelman: To ask the Deputy Prime Minister if he will list the meetings that departmental *(a)* Ministers and *(b)* officials have had with local authority (i) officials and (ii) representatives on local government restructuring in the last 12 months. [53095]

Mr. Woolas *[holding answer 27 February 2006]:* I refer the hon. Member to the answer given to her on 2 March 2006.

Mr. Syms: To ask the Deputy Prime Minister if he will list the meetings that the Minster of Housing and Planning has had in the last 12 months with local authority *(a)* officials and *(b)* representatives on local government restructuring. [53344]

Jim Fitzpatrick: I refer the hon. Member to the answer given to the hon. Member for Meriden (Mrs. Spelman) by my hon. Friend the Member for Oldham, East and Saddleworth (Mr. Woolas) on 2 March 2006.

Sheppey General Hospital Site

Derek Wyatt: To ask the Deputy Prime Minister what discussions have taken place between English Partnerships and the local residents concerning the re-development of the old Sheppey general hospital site. [55407]

Yvette Cooper: A development brief for the old Sheppey general hospital site was adopted by the local authority, Swale borough council, as Supplementary Planning Guidance on 17 March 2004. This brief was adopted following a six week period of public consultation and subsequent consideration of over 20 representations received.

English Partnerships marketed the site in October 2005 using the adopted development brief, to which the forthcoming development will adhere.

Social Housing

Mr. Hoyle: To ask the Deputy Prime Minister how many people are on the waiting list for rented social housing in Chorley. [53373]

Yvette Cooper: Local authority figures supplied to the Office of the Deputy Prime Minister show the total number of households on the housing register in Chorley was 1,770 at 1 April 2005.

FOREIGN AND COMMONWEALTH AFFAIRS

Ascension Island

Dr. Cable: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the progress of the legislation to provide a right of abode and a right to own property on Ascension Island; and how much was spent by Her Majesty's Government in providing legal advice in preparation of the legislation. [47441]

Mr. Douglas Alexander *[pursuant to the reply, 6 February 2006, Official Report, c. 765–766W]:* My noble Friend the Foreign and Commonwealth Office Parliamentary Under-Secretary of State, Lord Triesman of Tottenham, wrote to Ascension Island Councillors on 19 January, explaining that there would be no further development of right of abode or the right to own property on Ascension Island. As such there are no current plans to introduce legislation to develop a right of abode and the right to own property on Ascension Island.

The Foreign and Commonwealth Office (FCO)'s Constitutional Advisor on the Overseas Territories, Michael Bradley QC, provides advice to the Government on a range of issues relating to the Overseas Territories, including Ascension Island. He has also undertaken work for the Ascension Island Government. For the period 2001–2005, the estimated cost to the Government of his advice directly attributable to the right of abode and right to own property was £2,500. This is necessarily an estimate given that these issues may have been touched on in the context of broader advice on options for Ascension Island.

In 2004, the FCO's Good Government Fund also approved funding for an Ascension Island government project to strengthen the legal system on the Island. The objective of the project was to provide the government of Ascension Island with a legal advisor to, inter alia, update the laws of Ascension, undertake legal drafting and create better Government documents, which could include on right of abode. Initial personnel costs attached to this project were £60,000. Following a supplementary bid the FCO has provided a total of £106,000 to the Ascension Island government for this project.

Burma

Vera Baird: To ask the Secretary of State for Foreign and Commonwealth Affairs what advice his Department offers to British tourists visiting Burma. [55658]

Ian Pearson: The full travel advice for Burma is available on the Foreign and Commonwealth Office's website at: http://www.fco.gov.uk/servlet/Front?pagename=OpenMarket%2FXcelerate%2FShowPage&c=Page&cid=1007029390590 4&a=KCountryAdvice&aid=1013618387126.

Travel advice is also available by calling 0845 850 2829.

Cyprus

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs on which occasions *(a)* Ministers and *(b)* officials have visited Cyprus in each of the last nine years. [55812]

Mr. Douglas Alexander: The following Ministers of the Foreign and Commonwealth Office have visited Cyprus over the last nine years: my right hon. Friend Joyce Quin in 1999, my hon. Friend Keith Vaz in 2001, my right hon. Friend Peter Hain in 2002, my right hon. Friend Denis MacShane in 2004, and my right hon. Friend the Foreign Secretary in 2006. Government Ministers from other Government Departments have also visited the island. There have been a great many visits by officials during this period.

Diego Garcia

Mr. Ellwood: To ask the Secretary of State for Foreign and Commonwealth Affairs how many foreign troops there are in Diego Garcia. [55661]

Mr. Douglas Alexander: There are a total of 1,209 foreign troops currently based on Diego Garcia:

	Number
United States Navy	446
United States Air Force	763

Eritrea-Ethiopia Claims Commission

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the latest advice from the Eritrea-Ethiopia Claims Commission; and what progress has been made towards reaching a settlement in the region. [55338]

Ian Pearson: We note the awards made by the Eritrea Ethiopia Claims Commission in its December 2005 report and call on both sides to continue to co-operate with the Commission.

We support fully the current US initiative aimed at reaching a lasting settlement to the dispute between Ethiopia and Eritrea, and call on both parties to cooperate with the US in its efforts, including attending any further meetings of the Ethiopia Eritrea Boundary Commission.

Guantanamo Bay

Mr. Clegg: To ask the Secretary of State for Foreign and Commonwealth Affairs whether the Government regard illegal enemy combatants as a legitimate category of detainee under international law. [56317]

Ian Pearson: The duties of states towards those who are in their power as a result of an international armed conflict are set out in international humanitarian law, including in particular the Geneva Conventions of 1949 and Additional Protocol I of 1977. Article 43 of Additional Protocol I sets out a definition of combatant, and Article 75 of Additional Protocol I sets out fundamental guarantees to be accorded to those in the power of a party to a conflict.

Mr. Clegg: To ask the Secretary of State for Foreign and Commonwealth Affairs whether the infliction of simulated drowning falls within the definition of torture or cruel and inhumane treatment used by the Government for the purposes of international law. [56319]

Ian Pearson: Whether the conduct described constitutes torture or cruel, inhumane or degrading treatment or punishment for the purposes of the UN Convention Against Torture would depend on all the circumstances of the case.

Human Rights

David T.C. Davies: To ask the Secretary of State for Foreign and Commonwealth Affairs what his Department's most recent assessment is of the human rights situation in *(a)* Uganda, *(b)* Uzbekistan, *(c)* China, *(d)* Rwanda and *(e)* the Maldives; what conclusions have been drawn; and if he will make a statement. [49490]

Ian Pearson: The Government are committed to promoting human rights overseas, as set out in the Foreign and Commonwealth Office's annual reports on human rights. Our most recent assessments of the situations in the countries listed in the question are as follows:

Uganda

There remains a great deal to do to secure full respect for human rights in Uganda. We are particularly concerned by the situation in northern Uganda. As a result of the long-running conflict, 1.7 million people are living in appalling conditions in internally displaced peoples' camps and over 20,000 children have been abducted by the rebel Lord's Resistance Army since 1988.

We continue to emphasise the importance of upholding human rights in our discussions with the Ugandan government. There have been some positive developments. In June 2005, the constitutional court ruled that mandatory death sentences were unconstitutional. Uganda benefits from an independent judiciary and a relatively free press but concerns do remain regarding restrictions on political freedom and reports of arbitrary detention and torture.

Uzbekistan

We remain gravely concerned by the situation in Uzbekistan. There have been some welcome steps, albeit limited, by the government of Uzbekistan to implement their national action plan on torture based on international recommendations; and President Karimov has announced plans to abolish the death penalty by 1 January 2008. However, overall there has been a clear deterioration in the human rights situation in Uzbekistan. The arbitrary arrest, detention and trials of eye-witnesses to the events in Andizhan of 12–13 May 2005 have been accompanied by increasing restrictions on freedom of expression, thought, conscience and religion, by a continuing refusal to register political parties, and by ongoing harassment, detention and trial of human rights defenders, journalists and others.

The People's Republic of China

We have serious concerns about a wide range of human rights issues in China. Although China has done much in recent years to reduce poverty and promote economic development, we believe China also needs to make substantive progress on human rights and implement serious political reforms to match its economic development. We continue to engage critically with China through the UK China Human Rights Dialogue, Ministerial contacts and EU mechanisms.

Rwanda

The human rights situation in Rwanda still gives grounds for concern; but Rwanda is making progress. We regularly meet local and international non-governmental organisations (NGOs) and the Rwandan National Human Rights Commission to discuss the human rights situation. We are monitoring Rwanda's implementation of its 5-year strategy on human rights, particularly freedom of expression and judicial independence. We have raised with the government issues such as alleged human rights abuses committed by the security services, and urged that perpetrators to be brought swiftly to trial. We have also raised our concerns on opening political space in Rwanda. There are some encouraging signs that are functioning, if not truly independent, civil society is emerging.

The Maldives

We continue to have concerns about the human rights situation in the Maldives, particularly freedom of expression and association and the right to fair trials conducted with due legal process. We share concerns that recent trials of political activists appear to have political motivations. We regularly make clear our concerns to the government of the Maldives both bilaterally, and with EU partners. We promote improvements in human rights where we can and have supported the work of the Human Rights Commission of the Maldives, NGOs concerned with fair trials and the training of journalists.

Internet Censorship Abroad

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has received on internet censorship abroad; and what discussions he has had with his counterparts at the United Nations on the subject. [55508]

Ian Pearson: We have received a number of representations from civil society organisations on restrictions on freedom of expression on the Internet in a number of countries, for example in the lead-up to the UN World Summit on the Information Society (WSIS) in Tunisia in November 2005. The Government has also recently expressed disappointment at the hard line the Chinese Government takes on limiting freedom of expression and information. We believe both are essential to the development of a modern, stable and sustainable society.

The WSIS general preamble ("The Tunis Commitment"), to which all UN member States signed up, is a reaffirmation of human rights and freedom of expression. This explicitly recognises "that freedom of expression and the free flow of information, ideas, and knowledge, are essential for the Information Society". Member States also agreed the more detailed "Tunis Agenda", which reaffirms the freedom to seek, receive, impart and use information and the need to respect freedom of expression when taking measures to ensure Internet security.

Mrs ZN (Immigration)

Mr. Lidington: To ask the Secretary of State for Foreign and Commonwealth Affairs whether HM High Commission Islamabad has sent to the Home Office the appeal papers for the immigration case of Mrs ZN of Aylesbury (reference ISB/879875); and if he will make a statement. [48616]

Dr. Howells *[holding answer 6 February 2006]:* I regret that I cannot provide this information, as it is not our practice to disclose details of individual entry clearance cases in a public forum. My noble Friend the Foreign and Commonwealth Office Parliamentary Under-Secretary of State, Lord Triesman of Tottenham, will write to the hon. Member.

Pakistan

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make representations to the Government of Pakistan regarding the attacks on Christians and Christian institutions in response to the Danish cartoons in Peshawar, Kasur (Lahore) and a number of other communities; and if he will raise the matter with Shaukat Aziz when he visits the UK. [55395]

Dr. Howells: We are aware of the attacks against Christians in Sialkot and Sukkur in February, but not of those in Peshawar, Kasur (Lahore) or elsewhere. We are shocked that any such incidents took place, so soon after the Sangla Hills violence in November 2005. My hon. Friend is well aware that these events are very often triggered to settle personal disputes. However it is also possible that these attacks were influenced by heightened tensions relating to the publication of cartoons offensive to Muslims in Danish and other newspapers. We were disturbed by the serious incidents relating to this which occurred in Peshawar, Lahore, Islamabad and other cities across Pakistan. My right hon. Friend the Foreign Secretary intends to take the opportunity to raise human rights in Pakistan during his meeting with Prime Minister Shaukat Aziz on 7 March.

Russia

Mr. Clegg: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations he has made to the Government of the Russian Federation about *(a)* constraints on press freedom, *(b)* restrictions on the activities of non-governmental organisations and *(c)* disappearances and other human rights abuses in Chechnya and the North Caucasus. [56070]

Mr. Douglas Alexander: All of these issues were discussed at length during the last round of the UK/Russia human rights consultations held on 8 September 2005 under UK chairmanship. My right hon. Friend the Prime Minister, President of the European Commission, Jose Manuel Barroso, and President Putin noted the results of those consultations during the EU Russia summit on 4 October 2005. They had a frank discussion

with President Putin on human rights and democracy issues, including the situation in Chechnya. My right hon. Friend the Foreign Secretary raised our concerns on the situation faced by non-governmental organisations (NGOs) during discussions with Foreign Minister Sergey Lavrov in January 2006. And during my visit to Russia, as Minister for Europe, between 27 February and 1 March 2006, I made our concerns on NGOs and on press freedoms a matter of the public record.

Rwanda

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Home Secretary on prosecution of suspected Rwandan genocidaires. [55448]

Ian Pearson: Foreign and Commonwealth Office officials have held regular meetings with Home Office counterparts and the Metropolitan Police to discuss issues relating to the prosecution of alleged Rwandan war criminals. The most recent meeting took place on 20 February 2006.

Decisions on whether an individual has a case to answer to under UK criminal law are a matter for the Police and the Crown Prosecution Service.

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the government of Norway on its decision to prosecute a suspected Rwandan genocidaire; and what assessment he has made of the merits of pursuing similar prosecutions in the UK. [55586]

Ian Pearson: None. This is a matter for the Government of Norway and the International Criminal Tribunal for Rwanda.

The Government continues to support international efforts to bring to justice perpetrators of genocide, crimes against humanity and war crimes. However, decisions on whether an individual has a case to answer under UK criminal law are a matter for the Police and the Crown Prosecution Service.

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the merits of the prosecution of Rwandan genocidaires outside Rwanda. [55590]

Ian Pearson: The Government are a strong supporter of the work of the International Criminal Tribunal (ICTR) for Rwanda, which is playing an important role in bringing to justice individuals responsible for the most serious crimes perpetrated in Rwanda in 1994. Any prosecution beyond the scope of the ICTR would be a question for the relevant national prosecuting authority.

We continue to support international efforts to bring to justice perpetrators of genocide, crimes against humanity and war crimes.

Joan Walley: To ask the Secretary of State for Foreign and Commonwealth Affairs how many named Rwandan genocide suspects reside in the UK. [56277]

Ian Pearson: It would be inappropriate to discuss the numbers, or details, of named alleged Rwandan genocide suspects resident in the UK. Doing so could jeopardise any possible criminal or immigration action that the UK authorities decided to pursue.

The UK has procedures in place to ensure that any individual indicted by the International Criminal Tribunal for Rwanda and resident in the UK would be handed over to face international justice.

Joan Walley: To ask the Secretary of State for Foreign and Commonwealth Affairs whether there are plans to *(a)* extradite and *(b)* bring proceedings in the UK against those alleged to be involved with the Rwandan genocide. [56278]

Ian Pearson: It is established Government policy to neither confirm nor deny the existence of an extradition request.

Decisions on whether or not an individual has a case to answer to under UK criminal law are a matter for the police and the Crown Prosecution Service.

Sudan

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the situation in Shearia, southern Darfur, with particular reference to Amar Jadeed village. [55339]

Ian Pearson: We have received reports that Shearia and its surrounding villages, along with other areas in North and South Sudan, have in the last two weeks been subjected to fighting between forces of the Government of Sudan and elements of the Sudan Liberation Army/ Movement (SLA/M). The African Union Mission in Sudan is investigating the series of incidents which, if reports are verified, would constitute violations of the Abuja Security and Humanitarian Protocols.

On 19 August 2005, Amar Jadeed village, in Shearia province in South Darfur, was attacked by armed militia. Reports indicate that during the attack, three villagers were killed and a number of others wounded. It was reported that the militias also looted over 600 camels. We have had no specific reports of Amar Jadeed being targeted during the recent fighting.

During their recent visits to the peace talks in Abuja and Sudan, including Darfur, both my right hon. Friends the Foreign Secretary and the Secretary of State for International Development made clear to the Government of Sudan and the SLA/M that they must take urgent steps to improve security in Darfur, particularly by implementing the ceasefire in Darfur fully.

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what reports he has received on whether the Government of Sudan has *(a)* resumed the use of helicopter gunships in Darfur and *(b)* made incursions into Chad. [55340]

Ian Pearson: The Government of Sudan (GoS) continues to fly helicopter gunships in Darfur, but it is unclear whether they have been active in attacks. The African Union is currently investigating and we await their reports. Offensive military flights by the GoS would constitute a breach of its obligations under the Abuja Security Protocol and, under United Nations Security Council Resolution 1591, those responsible would be liable to targeted sanctions.

We have received no reports of the Sudanese army making incursions into Chad, although we understand that rebel groups and militia from both Chad and Sudan regularly cross the border. Stability in both countries is vital for the region and we therefore welcome the peace agreement signed by the Presidents of both Sudan and Chad in Libya on 8 February. We hope the parties will work hard to honour it.

During his visit to Sudan, including Darfur, on 21–23 February my right hon. Friend the Secretary of State for International Development (Hilary Benn) raised these issues with the Government of Sudan and made clear that they must take urgent steps to improve the security situation in Darfur. In their meeting with the Sudanese Foreign Minister on 3 February, my right hon. Friend the Foreign Secretary, and my noble Friend the Foreign and Commonwealth Office Minister for Africa, Lord Triesman of Totter[illegible]m, also made clear that the Government of Sudan [illegible]bide by their obligations under the UN security [illegible] Resolutions and pressed on the need to reduce te[illegible]th Chad.

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to try to mediate between the different factions in the Sudan Liberation Army in Darfur. [55342]

Ian Pearson: We continue to be concerned by the leadership split between two factions of the Sudanese Liberation Movement/Army (SLM/A). When my right hon. Friend the Foreign Secretary addressed the Darfur peace talks in Abuja on 14 February 2006, he pressed the parties to increase their efforts to reach a negotiated settlement. He called upon all the leaders of the rebel movements to attend the talks to demonstrate their commitment to a negotiated settlement. Minni Minnawi, the leader of one faction of the SLM/A, returned to Abuja on 20 February, his first visit to the talks since December. Our representative at the Abuja talks regularly presses the SLM/A and the Justice and Equality Movement to continue to maintain a joint negotiating position in the talks in Abuja, and to work together to achieve a peaceful solution for the people of Darfur. The UK has now appointed a Special Representative to the Abuja talks, Dr. Roderick Pullen, who will continue to press all the parties at the talks.

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to *(a)* the Government of Sudan and *(b)* the African Union to try to speed up disarmament of Janjaweed militias. [55345]

Ian Pearson: We have made clear to all parties in Darfur that they must abide by the terms of the ceasefire, control their forces, and work towards a political solution. My right hon. Friend the Secretary of State for International Development reaffirmed this during his recent visit to Khartoum, as did my right hon. Friend the Foreign Secretary, during talks with the Sudanese Foreign Minister in London last month. We remain in close touch with the African Union (AU) on this issue, and continue to support the AU-led talks in Abuja on security, wealth sharing and power sharing in Darfur.

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what action he plans to take to pursue those Sudanese officials who have been named in the confidential annex of the report of the panel of experts on Darfur as being involved in gross human rights abuses. [55976]

Ian Pearson: The panel of experts, appointed by the UN Sudan Sanctions Committee, presented its report to the Committee on 23 December 2005. The Government are pressing for swift action by the Committee on the panel's recommendations, including the listing of individuals for targeted sanctions. We will not comment on individual names, but we are clear that there can be no impunity for those who violate human rights or impede the peace process in Sudan. We will strongly support the imposition of sanctions against individuals who do so, where there is clear and compelling evidence against them.

Turkey

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Turkish Government on *(a)* its application to join the EU and *(b)* Cyprus; and if he will make a statement. [55809]

Mr. Douglas Alexander: During his visit to the region in January, my right hon. Friend the Foreign Secretary held meetings with the Turkish Prime Minister Erdogan and Foreign Minister Gul. With both he discussed Turkey's application to join the EU and the prospects for a settlement in Cyprus. My right hon. Friend the Foreign Secretary also reaffirmed the UK's commitment to Turkey's accession process, and urged Turkey to keep up its reform efforts to align itself with the EU acquis. On Cyprus, he stressed his desire for all parties to make progress towards a comprehensive settlement under UN auspices and a normalisation of relations in the region.

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations he has had made to Turkey on the *(a)* amount and *(b)* type of equipment of the Turkish Army in Northern Cyprus; and if he will make a statement. [55810]

Mr. Douglas Alexander: My right hon. Friend the Foreign Secretary recently visited Cyprus, Turkey and Greece to examine the prospects for making progress towards a settlement of the Cyprus problem. He stressed to all parties that the current situation is bad for Cyprus, bad for the region and bad for the EU, and encouraged them to take the necessary steps towards a resumption of settlement negotiations, including, where appropriate, lowering troop levels. The type of equipment used by Turkish forces on Cyprus was not discussed.

Mrs. James: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on progress on Turkey's proposed accession to the European Union. [56020]

Mr. Douglas Alexander: Under the Austrian Presidency, the European Commission is taking forward the negotiations following the framework agreed on 3 October 2005. It is currently screening Turkey's legislation against the EU *acquis* and has completed screening on 9 Chapters. The Commission presented its first screening reports, on Science and Research and Education and Culture, to Member States in February, concluding that Turkey is ready to open negotiations in both chapters. Following the presentation of the Commission's screening reports it is for Member States to consider whether to set benchmarks for Turkey to fulfil before the opening of chapters, and then decide whether any chapters are ready to be opened. The relevant Council Working Group has recently recommended the opening of the Science and Research Chapter and we expect this to happen during the Austrian Presidency.

Uganda

Mr. Clifton-Brown: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps are being taken by *(a)* the United Kingdom and *(b)* the international community to ensure that violence does not occur in Uganda following the presidential election.[55495]

Ian Pearson: Primary responsibility for ensuring that violence does not occur rests with the Ugandan Government, opposition, and population. The elections and their aftermath have been generally peaceful. An EU Observer Mission is still present in Uganda to monitor all remaining aspects of the electoral process. We have called on all involved, in particular the candidates, their parties and supporters, to demonstrate a responsible attitude and to abide by constitutional procedures.

Keith Vaz: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment his Department has made of the fairness of the recent elections in Uganda; and if he will make a statement. [55676]

Ian Pearson: On 24 February, the EU's Election Observation Mission issued a statement of preliminary conclusions, which noted that the elections had so far been generally well administered, transparent, competitive and relatively peaceful, demonstrating some significant improvements in comparison to previous elections.

On 27 February we, along with our EU partners, issued a statement. It noted that voting passed generally peacefully and with significant voter turnout and congratulated the people of Uganda for demonstrating a clear commitment to democracy in the first multi-party elections in 25 years. However, there were shortcomings, primarily the lack of a level playing field for all parties in the run-up to the elections.

UN Human Rights Council

Mr. Clegg: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government have taken to support the establishment of a new United Nations Human Rights Council; and if he will make a statement. [56071]

Ian Pearson: The Government have been and remain actively involved in negotiations on the establishment of a UN Human Rights Council. This has included co-ordination of EU negotiating positions during our presidency of the EU in 2005, working closely with partners in New York, Geneva and Brussels. We have engaged consistently and constructively with the process, lobbied widely and provided our full support to the efforts of the President of the General Assembly (PGA) and his two co-chairs. We will continue to work hard with partners, and closely in support of PGA Eliasson, as we try to progress this important piece of the UN reform agenda.

UN Peacekeepers

Keith Vaz: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps his Department plans to take to assist the United Nations in ensuring that individual peacekeepers face proper judicial process when accused of criminal acts. [55678]

Ian Pearson: We are deeply concerned by any allegations of criminal acts and misconduct by UN peacekeeping personnel. We strongly support the actions of the UN Secretary- General to implement a 'zero-tolerance' approach in all United Nations Missions.

We welcomed last March the comprehensive report on sexual exploitation and abuse prepared by the Secretary-General's Adviser on this issue, His Royal Highness Prince Zeid Ra'ad Zeid Al-Hussein. We were active in ensuring that the UN General Assembly's Special Committee on Peacekeeping adopted the report's recommendations.

The UN is now focusing on five key areas to ensure that peacekeepers who commit crimes are bought to justice:

a model Memorandum of Understanding between the UN and countries whose troops are participating in peacekeeping operations, ensuring that those countries are fully aware of and can be held to account for their responsibilities in this area;

establishment of full-time Conduct and Discipline Teams in all UN missions, as well as at the UN Headquarters in New York, dedicated to addressing cases of misconduct, providing advice to missions, ensuring coherent application of UN procedures and providing guidance and advice for peacekeeping personnel;

ensuring that managers and commanders are made responsible for creating and maintaining an environment that prevents misconduct, are clearly directed to facilitate investigations and are held accountable for their failures in this regard;

work through a Group of Legal Experts nominated by the UN Department of Peacekeeping Operations to ensure that individuals are held accountable for criminal offences they have committed, and that there is no impunity for any category of staff, whether civilian or military;

a framework for collaboration in investigations between the UN's Office of Internal Oversight and national authorities, to ensure that any evidence collected is admissible in the relevant national jurisdiction of the country of the offender.

The UK is working closely with the EU and other partners to ensure that work is concluded successfully in all these areas.

CONSTITUTIONAL AFFAIRS

1911 Census

Mr. Arbuthnot: To ask the Minister of State, Department for Constitutional Affairs pursuant to the answer of 27 February 2006, *Official Report*, column 111W, on the 1911 Census, what the date was *(a)* of the 171 requests for access to information contained in the 1911 Census returns, *(b)* of the response to each request, *(c)* of the 14 appeals from enquirers and *(d)* on which each appeal was responded to; and what reasons were given for each refusal. [56480]

Bridget Prentice: The information is as follows:

(a) The National Archives received 171 requests for access to information contained in the 1911 census returns between 2 February 2005 and 29 January 2006.

(b) The response to each of these requests, which were considered in consultation with the Office for National Statistics, was that access could be not granted because the information was covered by S.41 of the Freedom of Information Act 2000.

(c) The National Archives reviewed the 14 appeals against this decision between 8 February 2005 and 18 January 2006. These were responded to between 4 March 2005 and 28 February 2006.

(d) After review, it was determined that the original decisions to deny access under S.41 of the Act should stand, in the context of government policy that the decennial census returns should be opened after 100 years.

DEFENCE

Active Service (Military Police Investigations)

Dr. Julian Lewis: To ask the Secretary of State for Defence whether it is his policy that every shooting incident involving UK military personnel on active service must be investigated by the military police.[55463]

Mr. Ingram: Ministry of Defence policy is that every shooting incident involving United Kingdom military personnel in Iraq should be subject to a Shooting Incident Review carried out by the Commanding Officer. If evidence emerges that there are any grounds to suspect that a criminal act has occurred or that Rules of Engagement might have been breached the incident would be referred to the Service Police immediately for an investigation.

Afghanistan

Mr. Harper: To ask the Secretary of State for Defence pursuant to his Answer of 27 February 2006, to Question 53831, whether his definition of the term support includes *(a)* intelligence gathering and sharing for specific operations, *(b)* provision of lift capability for Afghan forces and *(c)* protective cordons for Afghan forces. [55613]

John Reid *[holding answer 2 March 2006]*: As I have made clear on a number of occasions, counter-narcotics operations are the responsibility of the government of Afghanistan. The support that the International Security Assistance Force (ISAF) may provide is set in this context and will be determined by the requirements of any particular operation at the time.

Aircraft Carriers

Ann Winterton: To ask the Secretary of State for Defence whether, following his meeting with the French Defence Minister, consideration is being given to the possible purchase of the Rafale Aircraft as an option to equip the proposed new aircraft carriers; and if he will make a statement. [56498]

Mr. Ingram: I refer the hon. Member to the answer I gave on 2 March 2006, *Official Report*, column 1251W, to the right hon. Member for Fylde (Mr. Jack).

Armed Forces Pay Review Body

Mr. Harper: To ask the Secretary of State for Defence if he will list the papers submitted to the Armed Forces Pay Review Body in preparation for its 35th report. [55476]

John Reid: The following papers of evidence were submitted by the Ministry of Defence to the Armed Forces' Pay Review Body to help inform their 2006 recommendations, which were accepted in full by the Government on 16 February:

Manning, Recruitment and Retention

Hours of Work Survey

Leave Survey

Strategic Management

Senior Non-Commissioned Officers Issues

Accommodation

Pensions Update

Pay As You Dine Update

Ship's Divers

Special Communications Pay

Specialist Pay and Reserve Bounties Proposals

Unpleasant Living Allowance

Service Nurses

Professions Allied to Medicine

Military Provost Guard Service

Special Forces Pay

Manning Update

Arms Manufacturers (Promotions)

David Taylor: To ask the Secretary of State for Defence what recent steps he has undertaken to promote UK arms manufacturers. [56570]

Mr. Ingram: The Defence Industrial Strategy underlined the benefits to defence from responsible defence exports. Ministers therefore regularly support export promotion activities. For example, at the Defence Systems and Equipment International exhibition, held in London last autumn, Defence Ministers attended a number of events and supported UK companies. My noble Friend the Minister for Defence Procurement, who has responsibility for defence exports, has in recent months supported UK exporters at defence exhibitions in Turkey and India.

Caribbean (Anti-drugs Patrols)

Dr. Julian Lewis: To ask the Secretary of State for Defence pursuant to his answer of 1 March 2006 to Question 54015, on anti-drugs patrolling of the Caribbean, what assessment he has made of the impact of providing a frigate or destroyer for this role for only four months in 2006; and for what reason the decision to reduce the length of this deployment was taken. [56580]

Mr. Ingram: Counter-drugs activities form part of the Royal Navy's deployments to the Caribbean and provide a visible presence as one element of the UK's broader counter-drugs engagement in the region. These activities are co-ordinated by HM Revenue and Customs, and involve agencies from a number of our international partners.

As well as counter-drugs tasks, the primary purposes of the Caribbean deployment (Atlantic Patrol Task (North)) are to promote UK interests and provide security to UK Overseas Territories, including support to humanitarian operations and disaster relief. Traditionally, this support has been needed most during the hurricane season.

The decision to reduce the length of the deployment in 2006 was taken following a review of the Royal Navy's standing tasks and commitments. This was explained in the Government's response to the House of Commons Defence Committee's Fourth Report of Session 2004–05 on the 'Future Capabilities' Command Paper. The shorter assignment period will apply for 2006 only, after which it is planned to resume year-round assignment of a frigate/destroyer to the region.

Chemical Defence Establishment

Andrew Mackinlay: To ask the Secretary of State for Defence (1) on whose authority the Chemical Defence Establishment at Porton Down collaborated with *(a)* Walter Basson and *(b)* Roodeplaat Research Laboratory on chemical biological weapon research during the period of the apartheid government in South Africa; and if he will make a statement; [39801]

(2) what *(a)* collaboration and *(b)* contact took place between scientists and officials employed by or at (i) the Chemical Defence Establishment at Porton Down and (ii) other institutions funded by Her Majesty's Government and Walter Basson of South Africa; and if he will make a statement; [39803]

(3) what *(a)* collaboration and *(b)* contact took place between scientists and officials employed by or at (i) the Chemical Defence Establishment at Porton Down and (ii) other institutions funded by the Government, with the Roodeplaat Research Laboratory of South Africa; and if he will make a statement. [40479]

Mr. Ingram: There is no record of collaboration between the Ministry of Defence officials and either Wouter Basson or the Roodeplaat Research Laboratory, nor is there any record of contact between Ministry of Defence officials and the Roodeplaat Research Laboratory.

In March 1995, there was a visit to the new South African "Government of National Unity". The cross-government visit included a scientist form the Chemical Biological Defence Establishment, and provided advice to South Africa on her international treaty obligations under the Biological and Toxin Weapons Convention. Two official meetings involved the South African Surgeon General; as a member of his staff, Wouter Basson was present.

I am not in a position to comment of the activities of Her Majesty Government funded institutions outside the Ministry of Defence.

Andrew Mackinlay: To ask the Secretary of State for Defence pursuant to the Answer of 19 December 2005, *Official Report*, column 2347W, on Porton Down, if on visits in January and March 1992 Ministry of Defence employees *(a)* visited Roodeplaat Research Laboratory and *(b)* met its officials. [40480]

Mr. Ingram: During their passage through South Africa in January and March 1992 the Ministry of Defence employees, from what was then the Chemical Defence Establishment at Porton Down, did not visit the Roodeplaat Research Laboratory and were not knowingly introduced to its officials.

Correspondence

Mr. Harper: To ask the Secretary of State for Defence when he will reply to the letter to the Prime Minister dated 5 December 2005 from Colour Sergeant Nicholas Cowan, which has been passed to him for reply. [56371]

Mr. Touhig: Neither the Ministry of Defence nor the Prime Minister's office is aware of any such letter. However, both No 10 and the Office of the Deputy Prime Minister responded to earlier correspondence from Colour Sergeant Nicholas Cowan on 5 December 2005. He has since written again, and officials are co-ordinating a further response.

Dartmouth Naval College

Mr. Steen: To ask the Secretary of State for Defence what plans he has for the *(a)* short-term and *(b)* long-term future of the Dartmouth Naval College; and if he will make a statement. [56433]

Mr. Touhig: Our short and longer term planning assumption is that Britannia Royal Naval College, Dartmouth will continue to be a major centre of training excellence and activity for the Royal Navy. Such assumptions are, however, constantly reviewed in the normal cycle of Defence Planning, but any significant proposed change which emerged from that process would be subject to consultation with interested parties under well-established procedures.

Defence Export Services Organisation

David Taylor: To ask the Secretary of State for Defence (1) how many visits officials from the Defence Export Services Organisation have made to: *(a)* Pakistan, *(b)* India, *(c)* Indonesia, *(d)* Saudi Arabia and *(e)* Iraq since 18 March 2003; [56582]

(2) how many visits officials from the Defence Export Services Organisation have made to *(a)* Nigeria, *(b)* Turkey and *(c)* Israel since 18 March 2003 [56571]

Mr. Ingram: The information requested is set out in the table:

Country	*Number of visits*
India	20
Indonesia	1
Israel	0
Iraq	1
Nigeria	1
Saudi Arabia[1]	–
Pakistan	9
Turkey	8

[1] Very frequent visits are made by DESO officials to the Kingdom of Saudi Arabia, principally in support of the implementation of Government-to-Government contracts signed previously. The number of visits therefore could only be provided at disproportionate cost.

Departmental Dwellings

Mike Penning: To ask the Secretary of State for Defence if he will make a statement on his plans for the long-term future of empty married couples' dwellings identified by his Department. [54741]

Mr. Touhig: I refer the hon. Member to the answer I gave on 7 November 2005, *Official Report*, column 101W, to my right hon. and learned Friend the Member for Devizes (Mr. Ancram). Some 3,000 are held for future service deployments, 500 are held pending modernisation and approximately 800 are in the course

of disposal. A further 1,400 will be required to re-house families to facilitate further disposals of surplus stock. The remaining housing stock is available for allocation or awaiting incoming families. New commitments arising from policy changes, such as Gurkha Married Accompanied Service, will also be met from existing surplus housing stock where available and will result in further reductions to the level of void properties.

Departmental Expenditure

Mr. Laws: To ask the Secretary of State for Defence how much has been spent by his Department on media training in each year since 1997–98. [55212]

Mr. Touhig: Information that is readily available relates to training of military personnel of all three Services primarily to deal with the media while on operations. This training is now the responsibility of the Defence Media Operations Centre which opened a training school in April 2005. Costs to date on civilian training contractors is some £151,000.

Prior to April 2005 media training was the responsibility of each Service; information on the amounts spent is not held centrally and could only be provided at disproportionate cost.

Departmental Vehicles

Mr. Hoyle: To ask the Secretary of State for Defence what makes of cars ministers in his Department use; and whether they are UK-built. [51529]

Mr. Touhig *[holding answer 13 February 2006]:* The secretary of State's vehicle is provided by the Metropolitan Police.

Details of the cars currently available for use by other defence Ministers are as follows.

Make/Model of vehicle	*Country of manufacture*
Ford Mondeo	Belgium
Rover 75	UK
Honda Accord	UK
Nissan Primera	UK
Toyota Avensis	UK
Vauxhall Vectra	Germany
Vauxhall Signum	Germany

Discharged Personnel (Social Housing)

Mr. Harper: To ask the Secretary of State for Defence how many former service personnel required social housing on discharge in each of the last five years, broken down by service. [55978]

Mr. Touhig: The Joint Services Housing Advisory Office provides Service personnel with information and assistance on housing options, both during their service and on resettlement. However, personnel do not have to declare if they require social housing on discharge and therefore these figures are not available.

Mr. Harper: To ask the Secretary of State for Defence how many people left the armed forces in each of the last five years; and how many of those required social housing but had not received it at their time of discharge. [55979]

Mr. Touhig: The numbers of personnel leaving the Armed Forces in each of the last five years for the 12 month period ending 1 April is as follows:

	Number of personnel leaving the armed forces
2001	24,950
2002	24,710
2003	24,100
2004	23,400
2005	23,430

Source:
UK Defence Statistics 2005.

The Ministry of Defence does not require Service personnel to declare if they require social housing on discharge. Therefore, these figures are not available.

Mr. Harper: To ask the Secretary of State for Defence what his assessment is of *(a)* the need for and *(b)* the ability of service personnel (i) in each service and (ii) of each rank to afford (A) a mortgage and (B) privately-rented accommodation whilst serving in the armed forces. [56376]

Mr. Touhig: Accommodation is available to all Serving personnel as part of their terms and conditions of service. Charges below the market rate are made for this accommodation in consideration of the peripatetic nature of the armed forces. The need for a mortgage or private rent whilst serving is therefore reduced considerably.

The ability to afford mortgage repayments or rental charges whilst Serving obviously depends on individual circumstances. Because of this, a detailed assessment of affordability by rank and Service cannot be made. However, we provide an excellent pay and pension package for Service personnel, together with extensive advice on housing options and an interest-free loan scheme.

Drug Taking

Dr. Julian Lewis: To ask the Secretary of State for Defence whether there has been a change in the policy of dismissing service personnel for taking class A drugs; and if he will make a statement. [55615]

Mr. Touhig: There is no change in policy. Most Service personnel who take drugs illegally—whatever the class of drugs—will be discharged. There is discretion to retain individuals exceptionally, however, and this may be made subject to satisfactory completion of a drugs intervention programme.

Infantry Deployments

Mr. Harper: To ask the Secretary of State for Defence pursuant to the Answer of 27 February 2006, *Official Report*, column 19W, on infantry deployments, if he will list the *(a)* deployments and *(b)* length of time between deployments for each company in those battalions that have been deployed more than once in the past five years. [56068]

Mr. Ingram *[holding answer 3 March 2000]*: This information is not held centrally and can be provided only at disproportionate cost.

Infantry Regiments

Stewart Hosie: To ask the Secretary of State for Defence what discussions his Department has had with the Scottish Executive on the decision to amalgamate the Scottish regiments. [55912]

Mr. Ingram *[holding answer 3 March 2006]*: Defence is a reserved issue for the UK Government. Nevertheless, we have kept the Scottish Executive informed of the decision to amalgamate the Scottish Regiments.

Iraq

Tim Farron: To ask the Secretary of State for Defence (1) what evidence his Department has received on whether members of Al Qaeda were operating in Iraq prior to the start of military action in 2003; [50827]

(2) when he will answer Question 50827, on whether members of Al Qaeda were operating in Iraq prior to 2003, tabled by the hon. Member for Westmorland and Lonsdale on 7 February; and what the reasons are for the time taken to respond. [56489]

John Reid: The MOD does not comment on intelligence and security matters.

Dr. Cable: To ask the Secretary of State for Defence what his most recent estimate is of the cost of *(a)* combat operations and *(b)* peacekeeping operations in Iraq in each year since the conflict began. [55036]

Mr. Ingram: The annual audited figures for the costs of operations in Iraq are collected and audited on an annual basis. It is therefore not possible to separately identify the combat activities which commenced on 20 March 2003 and ceased on 1 May 2003 spanning two financial years 2002–2003 and 2003–2004.

The costs of operations are calculated on a net additional basis and audited figures are published each year in the MOD's Annual Report and Accounts. Costs of operations in Iraq for financial years 2002–03 to 2004–05 were:

		£ million
2002–03	Operations in Iraq	629
	Expenditure on Capital Equipment	218
	Total	847
2003–04	Operations in Iraq	1,051
	Expenditure on Capital Equipment	260
	Total	1,311
2004–05	Operations in Iraq	747
	Expenditure on Capital Equipment	163
	Total	910
	Total	£3,068

The estimated cost of £1,098 million for operations in Iraq for 2005–06 were included in the Spring Supplementary Estimates published in February. Final figures will be published in the MOD's Annual Report and Accounts for 2005–06 following audit by the National Audit Office.

Leaf Class Tankers

Mr. Hancock: To ask the Secretary of State for Defence what the proposed out-of-service dates are for each of the four Leaf class tankers; and what major refits are planned before those dates. [55538]

Mr. Ingram: On current plans the out of service date for RFA Brambleleaf and RFA Orangeleaf is 2009 with the remaining two tankers, RFA Oakleaf and RFA Bayleaf, leaving service in 2010. In order to keep RFA Bayleaf operational until she is withdrawn from service, minor refit work is due to be undertaken in 2008. No refit work is planned for the other three tankers.

Mental Health Services

Mr. Harper: To ask the Secretary of State for Defence what funding his Department provides for the treatment of *(a)* serving personnel and *(b)* veterans with mental health conditions, with particular reference to (i) post-traumatic stress disorder, (ii) alcohol and drug abuse, (iii) depression, (iv) anxiety and (v) stress. [55606]

Mr. Touhig: I refer the hon. Member to the answer I gave on 9 February 2006, *Official Report*, column 1406W, to the hon. Member for Rugby and Kenilworth (Jeremy Wright).

Naval Tasks

Dr. Julian Lewis: To ask the Secretary of State for Defence what naval tasks formerly carried out by Royal Navy destroyers and frigates will in future be undertaken by other classes of vessel; and if he will list the class of ship which will be deployed to fulfil each of those tasks. [56585]

Mr. Ingram: Apportionment of Fleet vessels to standing tasks is decided on the basis of operational effects and capabilities required. Hence the most appropriate ships available are assigned to a given task. The Royal Navy is therefore ready, where appropriate, to deploy units other than destroyers or frigates to fulfil naval tasks traditionally fulfilled by them. An example of this is HMS current operational deployment East of Suez. On the same principle, it is perfectly possible that operations in the Caribbean will on occasion be undertaken by units other than frigates and destroyers.

Nuclear Deterrent

Dr. Julian Lewis: To ask the Secretary of State for Defence what discussions he has had with the Chancellor of the Exchequer about future funding for a possible new generation of the nuclear deterrent. [50184]

John Reid: No decisions have yet been taken on any replacement for Trident. Preparatory work is being undertaken by officials on possible options for the future of the UK's nuclear deterrent, including on the costs involved. Funding issues will be addressed, as required, in the normal way once we get closer to taking decisions.

Parliamentary Questions

Dr. Julian Lewis: To ask the Secretary of State for Defence when he expects to give substantive answers to Questions *(a)* 48822, tabled for named day answer on 8 February 2006, and *(b)* 50184, tabled for named day answer on 13 February 2006, by the hon. Member for New Forest East. [56584]

Mr. Ingram: Question 48822 requires input from various sources and the correlation of data that are not easily accessible. I expect to reply to the hon. Member as soon as officials have completed the necessary work.

I replied to the hon. Member today in respect of question 50184.

Post Traumatic Stress Disorder

Justine Greening: To ask the Secretary of State for Defence what his Department's funding of remedial care for ex-Service personnel with post traumatic stress disorder and related conditions was at facilities provided by the charity Combat Stress in *(a)* 2001, *(b)* 2002, *(c)* 2003 and *(d)* 2004; and if he will make a statement. [53795]

Mr. Touhig: Article 26 of the Naval, Military and Air Forces Etc. (Disablement and Death) Service Pensions Order 1983 provides that the Secretary of State for Defence may defray necessary expenses in respect of the medical, surgical or rehabilitative treatment of former member of the Armed Forces which arise from a disablement due to service, provided they are not provided for under other UK legislation. Under this discretionary power, MOD defrays the individual costs of war pensioners undergoing "remedial treatment" at the Combat Stress homes for conditions related to their individual pensioned disablement and of related expenses, such as travel costs. The table shows the funding received by Combat Stress under this provision.

	£ million
2001–02	2.1
2002–03	2.4
2003–04	2.6
2004–05	2.8

Source:
Ex-Services mental Welfare Society ("Combat Stress")

Propellants

Mr. Liddell-Grainger: To ask the Secretary of State for Defence (1) what the cost of buying propellant from overseas for UK weapons and weapons systems has been in the last three years; [55288]

(2) which countries supply the UK armed forces with propellant for weapons and weapons systems. [55289]

Mr. Ingram: Propellant is provided as an integral part of an ammunition or weapon system and costs are not separately itemised. The source of the propellant is a commercial decision for the manufacturing company.

QinetiQ

Dr. Cable: To ask the Secretary of State for Defence which companies were considered for the contract to manage his Department's practice ranges before the award to QinetiQ in 2003; and for what reasons they were discounted. [50506]

Mr. Ingram: Work to identify a long-term solution to the MOD's requirement for Test and Evaluation Services identified QinetiQ as the only potential bidder with the breadth and depth of experience to deliver the full capability. As such, single source selection process was used to enable the MOD to meet the necessary deadlines for putting arrangements in place.

Rafale Aircraft

Mr. Jack: To ask the Secretary of State for Defence whether his French counterpart has offered the UK the opportunity of purchasing the marine version of Rafale aircraft; and if he will make a statement. [55248]

Mr. Ingram *[holding answer 2 March 2006]:* Contrary to recent reports in the press, the French Defence Minister did not offer the opportunity to purchase the marine version of the Rafale aircraft. We remain committed to progressing the development and acquisition of the Joint Strike Fighter to meet our Joint Combat Aircraft requirement.

Royal Regiment of Scotland

Stewart Hosie: To ask the Secretary of State for Defence (1) what steps his Department has taken to promote the identity of each of the new battalions of the Royal Regiment of Scotland; [55896]

(2) whether he has made an estimate of the advertising expenditure his Department would require to achieve for the Royal Regiment of Scotland the same brand recognition as the Black Watch; [55895]

(3) what the advertising budget is to promote the Royal Regiment of Scotland. [55894]

Mr. Touhig: No specific steps have been taken to promote the identity of the new battalions. However recruiting to the new Regiment, and its constituent battalions, is being addressed by Headquarters Recruiting Group, with new recruiting campaigns and a programme of updating recruiting literature and logos on recruiting assets.

There has been no assessment made by the Army of the amount of advertising spend that would be required for the Royal Regiment of Scotland to achieve the same recognition as the Black Watch. The Black Watch's regimental identity has been built over 250 years, the new Royal Regiment of Scotland's identity will grow with time.

Headquarters Recruiting Group spent £50,000 in November 2005 on press advertising to promote recruiting for the Royal Regiment of Scotland. A

further £100,000 has been spent in-year updating recruiting literature, vehicles and display equipment with new titles and regimental badges.

Standing Naval Tasks

Dr. Julian Lewis: To ask the Secretary of State for Defence pursuant to his Answer of 1 March 2006 to Question 54014, on standing naval tasks, what Royal Navy vessels *(a)* are allocated and *(b)* are scheduled to be allocated to NATO's Standing Naval Force Atlantic. [56581]

Mr. Ingram: The Royal Navy assigns one destroyer or frigate to one of the two Standing NATO Response Force Maritime Groups (SNMG1 and 2), formerly known as Standing Naval Force Atlantic and Standing Naval Force Mediterranean respectively. Since early August 2004, a destroyer or frigate has been permanently assigned to SNMG2 in the Mediterranean; the intention is to maintain this commitment. There are currently no plans to assign a Royal Navy vessel to SNMG1.

Thermobaric and Air/Fuel Weapons

Mr. Chaytor: To ask the Secretary of State for Defence what research his Department has *(a)* conducted and *(b)* commissioned on (i) thermobaric and (ii) air fuel weapons in the past five years. [53696]

Mr. Ingram: The term "thermobaric" has no agreed definition and is not used by the Ministry of Defence. The Department conducts or commissions research aimed at developing a scientific and military understanding of all appropriate weapon technologies. The knowledge generated is employed to assess the threat to UK Forces posed by these technologies, to consider appropriate countermeasures and to assess their potential applicability for use in our own weapon systems.

In the case of fuel air weapons MOD commissioned research tasks aimed at improving our scientific understanding and ability to model the critical parameters and effects of fuel air systems in order to undertake a more detailed analysis of the potential threat they represent. Research into Force Protection engineering measures conducted during the course of the last five years has taken fuel air weapons into account as one of the potential threats.

Warships

Dr. Julian Lewis: To ask the Secretary of State for Defence what revenue has been *(a)* received from and *(b)* agreed with buyers as a result of the sale or scrapping of each major Royal Navy and Royal Fleet Auxiliary vessel disposed of since 1997; and how long each had been in service. [48822]

Mr. Ingram: Question 48822 requires input from various sources and the correlation of data that is not easily accessible. I expect to reply to the hon. Member as soon as officials have completed the necessary work.

I replied to the hon. Member today in respect of question 50184.

HEALTH

Abortion

Mr. Amess: To ask the Secretary of State for Health pursuant to her reply of 8 February 2006, *Official Report*, column 1304W, on abortion, on what grounds each abortion was performed; and what the *(a)* age of the woman, *(b)* gestation of the pregnancy and *(c)* prison at which the abortion was performed was in each case. [52494]

Caroline Flint: The information for age and gestation is shown in the table. The majority of the abortions were performed under Section 1(1) (a)[1] of the Abortion Act 1967 and under the act, treatment for termination of pregnancy can only be carried out in a national health service hospital or an approved independent sector place.

For confidentiality reasons, we are unable to release any further data.

[1] "that the pregnancy has not exceeded its 24th week and that the continuance of the pregnancy would involve risk, greater than if the pregnancy were terminated, of injury to the physical or mental health of the pregnant woman or any existing children of her family."

Age and gestation period of women having terminations giving a prison postcode as their place of residence, England, 1995 to 2004

	Number

Acute Accident and Emergency Cover

Mike Penning: To ask the Secretary of State for Health (1) what acute clinical services need to be available at an NHS hospital in order for it to qualify as offering acute accident and emergency cover; and if she will make a statement; [52469]

(2) what are the differences in medical cover offered by *(a)* a minor injuries unit and *(b)* an acute accident and emergency department; and if she will make a statement. [52470]

Mr. Byrne: To qualify as a major (type one) accident and emergency (A&E) department a service must be, among other requirements, consultant led, open 24 hours a day and have full resuscitation facilities. All major A&E departments are on acute hospital sites. Services on the hospital site usually include critical care and diagnostic radiology comprising x-ray, ultrasound and computerised tomography scan.

The key difference in medical cover offered by a major A&E department, compared with a minor injuries unit (MIU), is that it is required to be consultant-led. MIUs can be general practitioner or nurse-led.

Alzheimer's Disease

Dr. Stoate: To ask the Secretary of State for Health (1) what treatments are available for moderately severe to severe Alzheimer's disease: [51626]

(2) what treatments are available for *(a)* Alzheimer's disease patients scoring lower than 10 in the mini-mental state examination and *(b)* behavioural disturbances arising in Alzheimer's disease patients. [51687]

Mr. Byrne: The drug Ebixa (memantine) is licensed for the treatment of moderate to severe dementia in Alzheimer's disease.

All four of the licensed drugs for the treatment of Alzheimer's disease are used to help treat behavioural disturbances. In addition, a range of social and psychological interventions may be used. The National Institute for Health and Clinical Excellence are currently working on a guideline on health and social care interventions in dementia which is due to be published in draft form in April 2006. Many of the interventions are likely to be useful for behavioural disturbances.

Antiretroviral Drugs

Mr. Burstow: To ask the Secretary of State for Health how many pregnant women have been prescribed with anti-retroviral drugs since 1997 in each health authority in England; and if she will make a statement. [48478]

Mr. Byrne: This information is not collected centrally. Our policy of offering and recommending an HIV test to every pregnant woman as part of their antenatal care, along with associated measures, including use of anti-retroviral drugs, has resulted in a significant reduction of mother-to-baby transmission of HIV infection. In 2004, approximately 92 per cent. of HIV infected pregnant women were diagnosed before delivery. Detection of maternal HIV infections is estimated to have prevented the transmission of HIV to around 190 babies in the United Kingdom in 2004.

Attention Deficit Hyperactivity Disorder

Mr. Lancaster: To ask the Secretary of State for Health (1) what recent steps her Department has taken to increase awareness of attention deficit hyperactivity disorder; [47449]

(2) what treatments are available for attention deficit hyperactivity disorder on the NHS; [47450]

(3) how many patients were diagnosed with attention deficit hyperactivity disorder in each of the last three years. [47451]

Mr. Byrne: Information on the numbers of people diagnosed with attention deficit hyperactivity disorder (ADHD) is not collected centrally.

The assessment and treatment of ADHD is usually undertaken by child psychiatrists. However, it is increasingly common for paediatricians to diagnose and manage ADHD in children.

A treatment programme should not rely on medication alone and psychological interventions which focus on the behaviour of the child, family interactions, classroom problems and learning difficulties should be offered. A comprehensive assessment involving more than one professional perspective will highlight the various problems that need to be addressed.

The National Institute for Health and Clinical Excellence's (NICE) appraisal on the use of methylphenidate, commonly known as Ritalin, recommended that methylphenidate should only be used as part of a comprehensive treatment programme for children with diagnosis of severe ADHD. Methylphenidate is not the only medication option with atomoxetine and dexamfetamine also available. NICE will be issuing guidance on the use of all three shortly. NICE will also be commencing work later this year on a guideline on the management and identification of ADHD in children, young people and adults.

As part of the children's national service framework, we are publishing a series of exemplar patient journeys. This series will be an exemplar on ADHD. We anticipate this being published later this year.

Care Homes

Greg Mulholland: To ask the Secretary of State for Health (1) what steps the Commission for Social Care Inspection takes to ensure that the national minimum standards of nutrition for older people in care homes are properly implemented; [50171]

(2) what steps her Department is taking to ensure that staff providing meals for older people living in care homes have received sufficient catering training; [50179]

(3) how many care homes in *(a)* Leeds North West and *(b)* the Leeds metropolitan area have been deemed as failing to meet standard 15 of the national minimum standards in each year for which figures are available. [50787]

Mr. Byrne *[holding answers 9 February and 13 February 2006]:* Nutritional needs are an important area of care provision. They are embedded in Care Homes for Older People—National Minimum Standards and Care Homes for Adults—National Minimum Standards. Copies are available in the Library. Food and nutrition is extensively covered in the national minimum standards (NMS), which the Commission for Social Care Inspection (CSCI) inspects care homes against The NMS address food and nutrition from various perspectives, including nutritional content, religious or cultural requirements, preparation and hygiene, training of catering staff and the social value of meals and mealtimes.

CSCI inspects against standard 30 of the NMS, which relates to staff training, to ensure that staff providing meals for older people living in care homes have sufficient catering training. Standard 30 states that the registered manager of a care home needs to ensure that there is a staff training and development programme which meets national training organisation (NTO) workforce training targets and ensures staff fulfil the aims of the home and meet the changing needs of service users.

Information about the number of care homes in Leeds North West and the Leeds metropolitan area which have been deemed as failing standard 15 of the NMS is not collected in the format requested.

Figures on the performance against standard 15 of Care Homes for Older People—National Minimum Standards and standard 17 of Care Homes for Adults—National Minimum Standards in Leeds local authority for 2002–03, 2003–04 and 2004–05 is shown in the tables.

Standard 15: Meals and Mealtimes—care homes for older people

	1 April to 31 March		
	2002–03	2003–04	2004–05
1—not met	1	1	3
2—almost met	19	13	10
3—met	76	92	92
4—exceeded	9	10	13
Grand total	105	116	118

Standard 17: Meals and Mealtimes—care homes for younger adults[1]

	1 April to 31 March		
	2002–03	2003–04	2004–05
1—not met	0	0	0
2—almost met	5	3	3
3—met	30	35	52
4—exceeded	5	5	2
Grand total	40	43	57

[1] Aged 18–65

Cerebral Palsy

Mr. Stewart Jackson: To ask the Secretary of State for Health how many children in *(a)* the Norfolk, Suffolk and Cambridgeshire Strategic Health Authority area and *(b)* the Greater Peterborough Primary Care Partnership area have been diagnosed with cerebral palsy in the last five years. [56577]

Ms Rosie Winterton: The information requested is shown in the tables.

Norfolk, Suffolk and Cambridgeshire Strategic Health Authority—all diagnoses count of patients for cerebral palsy

	Patient counts
2000–01	254
2001–02	276
2002–03	311
2003–04	350
2004–05	317

North Peterborough Primary Care Trust (PCT) and South Peterborough PCT

	Patient counts
2000–01	37
2001–02	41
2002–03	36
2003–04	59
2004–05	51

Notes:
General
All diagnoses of patients for cerebral palsy (ICD-10 G80 infantile cerebral palsy).
Age of start of episodes = under 17.
Patient counts
Patient counts are based on the unique patient identifier Hospital Episodes Statistics identification HESID. This identifier is derived based on the patient's date of birth, postcode, sex, local patient identifier and national health service number using an agreed algorithm. Where data are incomplete, HESID might erroneously link episodes or fail to recognise episodes for the same patient. Care is therefore needed, especially where duplicate records persist in the data. The patient count cannot be summed across a table where patients may have episodes in more than one cell.
All diagnoses count of patients
These figures represent a count of all patients where the diagnosis was mentioned in any of the 14 (seven prior to 2002–03) diagnosis fields in a HES record.
Diagnosis (primary diagnosis)
The primary diagnosis is the first of up to 14 (seven prior to 200203) diagnosis fields in the HES data set and provides the main reason why the patient was in hospital.
Secondary diagnoses
As well as the primary diagnosis, there are up to 13 (six prior to 2002–03) secondary diagnosis fields in HES that show other diagnoses relevant to the episode of care.
PCT, SHA data quality
PCT and SHA data were added to historic data years in the HES database using 2002–03 boundaries, as a one off exercise in 2004. The quality of the data on the PCT of treatment and SHA of treatment is poor in 1996–97, 1997–98 and 1998–99, with over a third of all finished episodes having missing values in these years. Data quality of PCT of general practitioner (GP) practice and SHA of GP practice in 1997–87 and 1998–99 is also poor, with a high proportion missing values where practices changed or ceased to exist. There is less change in completeness of the residence based fields over time, where the majority of unknown values are due to missing postcodes on birth episodes. Users of time series analysis including these years need to be aware of these issues in their interpretation of the data.
Ungrossed Data
Figures have not been adjusted for shortfalls, that is the data are ungrossed.
Source:
Hospital Episode Statistics (HES), NHS Health and Social Care Information Centre.

Chronic Fatigue Services

Dr. Desmond Turner: To ask the Secretary of State for Health (1) under what conditions funding will be added to the baseline for primary care trust budgets in 2006–07 for the newly established NHS chronic fatigue syndrome/myalgic encephalomyelitis services; [53671]

(2) if she will make a statement on the progress of establishment of NHS services for chronic fatigue syndrome/myalgic encephalomyelitis; [53672]

(3) what criteria were used in assessing applications from primary care trusts (PCTs) for funding in 2005–06 to establish new NHS chronic fatigue syndrome/myalgic encephalomyelitis services; and if she will list the PCTs which have established such services; [53673]

(4) how many chronic fatigue syndrome/myalgic encephalomyelitis patients have been seen to date by the NHS chronic fatigue syndrome/myalgic encephalomyelitis services; [53675]

(5) if she will take steps to ensure that further NHS chronic fatigue syndrome/myalgic encephalomyelitis services are established in 2006–07. [53676]

Mr. Byrne: Since the announcement of the 8.5 million budget for developing new services for those with chronic fatigue syndrome/myalgic encephalomyelitis

(CFS/ME), we have established 13 clinical network co-ordinating centres, 36 local multi-disciplinary teams, as well as 11 specialist children and young people's teams distributed across England. These new centres have been created to provide services for those with CFS/ME where there was no existing provision, each centre covers up to eight primary care trusts.

The latest figures show that 8,646 adults and 439 children and young adults have been seen. The new centres are expected to see 21,000 patients annually when working at full capacity.

Applications for funding to establish CFS/ME services were assessed by an investment steering group consisting of health professionals, as well as patient and carer representatives. The criteria used by the steering group included strategy and partnership working, the proposed service organisation and staffing structure, as well as the need to ensure an even geographic distribution of centres.

Future funding of CFS/ME services will be included within the resource allocations to primary care trusts to facilitate the continuation of the service once the ring-fenced period ends. CFS/ME services will therefore be considered as part of the future local planning of services.

National Health Service organisations are expected to demonstrate that they are making progress towards achieving the level of service quality described in the national service framework (NSF) for long-term conditions. The NSF sets out a clear vision of how health and social care organisations can improve the quality, consistency and responsiveness of their services and help improve the lives of people with neurological conditions, including CFS/ME. This may include taking steps to ensure the establishment of further CFS/ME centres, if there is a local need.

Colon Cancer

Mr. Clappison: To ask the Secretary of State for Health pursuant to the answer of 15 February 2006, *Official Report*, column 2110W, on colon cancer, how many people were diagnosed with bowel cancer between the age of *(a)* 40 and 49 years, *(b)* 50 and 58 years and *(c)* 58 and 69 years in each of the last five years. [56211]

John Healey: I have been asked to reply.

The information requested falls within the responsibility of the national statistician who has been asked to reply.

Letter from Colin Mowl, dated 6 March 2006:

The National Statistician has been asked to reply to your recent question concerning how many people were diagnosed with bowel cancer between the age of *(a)* 40 and 49 years, *(b)* 50 and 58 years and *(c)* 58 and 69 years in each of the last five years. I am replying in her absence. (56211)

The most recent available information on registration of newly diagnosed cases (incidence) are for the year 2003. Numbers of newly diagnosed cases registered in England by selected, non-overlapping age groups, are give in the table below.

Newly diagnosed cases of colerectal[1] (bowel) cancer registered in England, by selected age groups, 1999 to 2003

Age groups	*1999*	*2000*	*2001*	*2002*	*Number 2003*
40–49	1,089	1,010	1,030	1,056	1,029
50–57	2,574	2,542	2,545	2,438	2,371
58–69	7,674	7,753	7,378	7,391	7,449
All ages 40–69	11,337	11,305	10,953	10,885	10,849

[1] International Classification of Diseases, Tenth Revision (ICD-10) codes C18-C21.

Co-payment (NHS Services)

Mr. Baron: To ask the Secretary of State for Health (1) what recent representations she has received on the introduction of co-payment in the NHS, with particular reference to maternity services; [49615]

(2) what guidance she has issued to NHS organisations on the introduction of co-payments in the provision of NHS services; [49616]

(3) under what legislation co-payments for NHS maternity services would be introduced. [49617]

Mr. Byrne *[holding answer 7 February 2006]:* The Department has received three recent representations concerning the introduction of co-payment into maternity services in the National Health Service. To review all recent correspondence received by the Department could only be obtained at disproportionate cost.

Under S1(2) of the NHS Act 1977 health services provided under the Act shall be free of charge except in so far as the making and recovery of charges is expressly provided for by or under any enactment, whenever passed. Certain NHS bodies also have income generation powers contained in S7 of the Health and Medicines Act 1988, but such powers may only be used insofar as they do not significantly interfere with the performance of any duty under the 1977 Act or significantly disadvantage NHS patients.

The Department has provided guidance to the NHS where statutory provision has been made for charging for specific services, or for income generation. This guidance is available on the Department's website at www.dh.gov.uk.

There are no plans to introduce legislation to permit charging for any clinically necessary NHS maternity services.

Correspondence

Lynne Featherstone: To ask the Secretary of State for Health when she will reply to the letter from the hon. Member for Hornsey and Wood Green of 9 November 2005 on the Whittington Hospital. [55016]

Mr. Byrne *[holding answer 1 March 2006]*: A response was sent to the hon. Member on Tuesday 28 February.

Debt

Anne Main: To ask the Secretary of State for Health (1) how much interest the NHS paid on pre-existing debts in the latest year for which figures are available; [54575]

(2) what *(a)* targets she has set and *(b)* guidance her Department has given to primary care trusts on repayment of pre-existing debt. [54576]

Jane Kennedy: Interest paid on pre-existing debts cannot be separately identified from interest paid on debts incurred in the year, therefore, the information requested is not collected centrally.

All National Health Service trusts and primary care trusts should breakeven every year. NHS trusts have a financial breakeven duty to balance their income and expenditure over a three or, in exceptional circumstances, five-year period. Strategic health authorities (SHAs) have the discretion to agree a recovery plan that will return them to balance over this period. However, as SHAs have the responsibility for ensuring the NHS organisations across their areas are in financial balance every year, if they agree to one organisation overspending, they require another NHS organisation within the health economy to underspend over the same period. Any such arrangements would have to be subject to the agreement of local providers.

Dentistry

Mr. Hoban: To ask the Secretary of State for Health how many children are registered as NHS patients in dental practices where adults have to pay for treatment. [50286]

Ms Rosie Winterton *[holding answer 9 February 2006]*: The information requested is not held centrally.

Mr. Crabb: To ask the Secretary of State for Health pursuant to the Answer to the hon. Member for Buckingham of 6 February 2006, Official Report, column 970W, on dentistry, what assessment she has made of whether the reasons for children not being registered with an NHS dentist include lack of availability of NHS dentists in their area. [51307]

Ms Rosie Winterton *[holding answer 13 February 2006]*: There are a number of factors that affect levels of children's registrations. The published registration figures reflect those children who attend a national health service dentist at least once within the most recent 15-month period and therefore exclude some children who attend less regularly than every 15 months. The level of registrations will also be affected by parents' perception of whether their children need to have dental treatment, by the availability of NHS dentistry in some areas and by the decision of some parents to choose private treatment for their children. The registration rate for children has been broadly stable since 1998.

The dental reforms being implemented from this April are designed to promote new ways of working that typically enable dentists to see a wide range of patients and improve access.

Mr. Hoban: To ask the Secretary of State for Health pursuant to the Answer of 15 February 2006, *Official Report*, column 2303W, on dentistry, whether these arrangements will continue under the new contract where a practice is currently treating children under the NHS and their parents privately. [54755]

Ms Rosie Winterton *[holding answer 1 March 2006]*: After 1 April 2006, dentists can continue to have children-only lists by agreement with their primary care trust.

Julia Goldsworthy: To ask the Secretary of State for Health what out-of-hours dental cover her Department envisages for dental patients after 1 April 2006, in addition to reference to dental access centres. [55892]

Ms Rosie Winterton: From 1 April 2006, primary care trusts (PCTs) will be responsible for ensuring that appropriate out-of-hours arrangements are provided in their area to meet local needs.

A factsheet providing guidance to PCTs on how to commission out-of-hours services was issued by the Department in December 2005 and is available on the Department's website at www.dh.gov.uk/assetRoot/04/12/56/62/04125662,pdf.

Steve Webb: To ask the Secretary of State for Health which categories of dentists were involved in her calculation of the average income of dentists under the new dental contract; and how many such dentists were included in her calculation. [56318]

Ms Rosie Winterton: The historical estimates of average earnings and expenses for dentists are calculated by the NHS Health and Social Care Information Centre, based on data on gross fees and payments from the Dental Practice Board (DPB) and data from HM Revenue and Customs on expenses.

DPB payment data show that, on average, a dentist with a reasonable National Health Service commitment in 2004–05 in the general dental services (CDS) received gross CDS income of about £154,350. At 2005–06 remuneration levels, this would be a gross CDS income of around £159,600. Dentists with a reasonable commitment are defined as those with gross fee earnings of £59,100 or more. These averages covered some 7,640 CDS principal dentists who worked throughout the year 2004–05.

HM Revenue and Customs information from dentists1 tax returns show that the average ratio of expenses to gross earnings for a highly committed NHS dentist is around 52 per cent. (2003–04 tax year). The same source gives average net income of a highly committed NHS dentist from all sources as £78,600 in the tax year 2003–04, which would equate to an average of about £83,500 in 2005–06. This information is taken from the tax returns of 392 GDS principal dentists who were in non-associate business arrangements for whom the tax year ended between January and March 2004. Based on the data available from these sources, the Department estimates that a highly committed NHS dentist has an average income of around £80,000 in 2005–06.

Departmental Assets

David T.C. Davies: To ask the Secretary of State for Health if she will list the items of departmental property worth over £100 that have been reported as *(a)* lost and *(b)* broken in the last 12 months. [47681]

Mr. Byrne: The Department does not differentiate between stolen, missing or lost equipment. Departmental property losses or broken reported for the period 1 January 2005 to 31 December 2005, with a value of over £100 are shown in the table.

	Value (£)
Reported Lost or stolen

Duchenne Muscular Dystrophy

Mr. Chaytor: To ask the Secretary of State for Health what plans she has to provide further funding for the MDEX consortium gene therapy clinical trials to develop a treatment for Duchenne muscular dystrophy. [53697]

Jane Kennedy: In 2004, the Department awarded £1.6 million to the muscular dystrophy campaign, headed by Professor Francesco Muntoni at Imperial College London for research on Duchenne muscular dystrophy (DMD). If successful, this research should lead to the first United Kingdom gene therapy clinical trial aimed at treating DMD. The Government will carefully monitor developments in this area in considering future funding needs.

Government Powers of Direction

Sandra Gidley: To ask the Secretary of State for Health what powers she has to direct *(a)* ambulance trusts, *(b)* primary care trusts, *(c)* acute hospital trusts and *(d)* strategic health authorities; and on what occasions these powers have been used in each case. [38287]

Jane Kennedy: Under section 17 of the National Health Service Act 1977, the Secretary of State may direct NHS trusts including ambulance trusts, primary care trusts and strategic health authorities about the exercise of any of their functions.

A list of directions issued is available on the Department's website at: www.dh.gov.uk/PublicationsAndStatistics/Legislation/DirectionsFromSecretaryState/fs/en.

Health Expenditure

Frank Dobson: To ask the Secretary of State for Health what estimate she has made of the percentage of an average lifetime's health expenditure which is incurred in the last year of life. [50333]

Mr. Byrne *[holding answer 13 February 2006]:* In his final report on "Securing our Future Health: Taking a Long-Term View" published April 2002, Sir Derek Wanless said that

"on average, around a quarter of all the healthcare someone consumes in their lifetime is consumed in the last year of their life".

Health-specific Inflation

Mr. Lansley: To ask the Secretary of State for Health what health-specific inflation has been in each year since 1997–98; and what the components are of health-specific inflation indices for revenue spending on *(a)* hospital and community health services and *(b)* family health services in each year. [43529]

Mr. Byrne: The hospital and community health services (HCHS) pay and price inflation is a weighted average of two separate inflation indices, the pay cost index and the health service cost index which gives the measure of price inflation.

The HCHS pay and price inflation index is available on the Department's website at: www.info.doh.gov.uk/doh/finman.nsf/newsletters (see financial matters-February 2006).

The family health service (FHS) index is calculated from inflation figures associated with general medical services/personal medical services, general dental services/personal dental services, pharmaceutical services and general ophthalmic services.

The FHS inflation index is available United Kingdom's Parliament website at: www.publications.parliament.uk/pa/cm/cmhealth.htm (see report 1 December 2005)

Hospital Beds

Mr. Hoyle: To ask the Secretary of State for Health (1) if she will make a statement on the effect on hospital trusts of beds being taken up by individuals not receiving any medical treatment and the consequent effect on patients waiting on trolleys who require medical treatment; [48107]

(2) what steps she *(a)* is taking and *(b)* plans to take to reduce the number of beds on wards being taken up by individuals who are not receiving medical treatment. [48108]

Mr. Byrne: Delayed transfers of care have been a priority area for action since 2001 when the health and social care change agent team was created specifically to help local health and social care communities tackle the problem. Delays in the acute sector have fallen since then by over 65 per cent. by December 2005, releasing about 1.5 million bed days a year. Delayed transfers of care are an issue for the whole health and social care system and require concerted action from all parties—acute sector, primary care trusts, local authorities and the voluntary and independent sector—to make sure people get the right care at the right time in the right place. They are expected to work together to agree how resources, such as the delayed discharges grant to local authorities, can be invested to develop services that enable people to be treated at home wherever possible or close to home in intermediate care or other rehabilitation services. The reimbursement scheme provides financial incentives to local authorities to complete their assessments quickly and enable people to move from acute hospital beds at the optimum time. The Government is currently considering an extension to reimbursement to non acute and mental health sectors.

Delays in accident and emergency (A&E) departments have been cut dramatically in recent years, including waits for admission. Alongside headline improvements in total time spent in A&E for all patients, the percentage of patients waiting over four hours for admission following a decision to admit being made has fallen from 13 per cent. at the end of September 2001 to one per cent. as at the end of September 2005.

Hospital Management Frameworks

Steve Webb: To ask the Secretary of State for Health (1) by what date NHS trusts will be asked to complete a third hospital management framework self-assessment; [53687]

(2) what discussions her Department has had with strategic health authorities about the hospital medicines management framework self-assessment responses. [53688]

Jane Kennedy: The need for a third medicines management framework will be reviewed in the light of the report of the Healthcare Commission on medicines management in national health service hospitals.

Departmental officials meet regularly with strategic health authority (SHA) pharmaceutical leads to discuss a wide range of issues including medicines management.

The Department has facilitated feedback from the self-assessments, which were returned to the SHAs, to the Healthcare Commission so that the learning can be incorporated into their audit of medicines management, the report from which is due to be published in summer 2006.

Mobile Telephones

Mrs. Hodgson: To ask the Secretary of State for Health (1) what recent representations she has received concerning the use of mobile telephones in NHS hospitals; and if she will make a statement; [47767]

(2) what assessment she has made of the merits of allowing NHS in-patients to use their mobile telephones; [47769]

(3) what the evidential basis is for NHS hospitals banning the use of mobile telephones on hospital premises; [47770]

(4) if she will take steps to ensure that NHS trusts enable patients to use mobile telephones without disruption to medical equipment; [47786]

Jane Kennedy: The Office of Communications (Ofcom) concluded an investigation on 17 January 2006 following complaints from consumers about the prices charged for calls to hospital patients.

Ofcom wrote to the Secretary of State recommending that the Department should provide a clear message to National Health Service trusts that they are free to decide their own policy on mobile phone uses.

The Medicines and Healthcare products Regulatory Agency (MHRA) has issued guidance to hospital trusts that they should undertake a local risk assessment within their hospital to determine those areas where it is safe to permit mobile telephone usage and those areas where usage should be prohibited, due to the presence of electrically sensitive medical devices, for example. This risk assessment should cover not only the publics' use of mobile telephones and other radio equipment, but also the use of communication equipment by hospital staff and the emergency services.

The use of mobile phones and other communication equipment in close proximity to certain electrically sensitive medical equipment is not advised, as the consequences of disrupting such equipment may cause direct harm to patients.

It is the responsibility of individual trusts to assess the areas within hospitals where a total ban on the use of mobile telephones is appropriate on safety grounds. Restrictions in other areas of the hospital premises may be introduced for reasons other than their impact on the safety of medical equipment, such as the desire to reduce the disruption caused by the uncontrolled use of mobile phones and the possible invasion of patients' privacy from mobile telephones with built in cameras, for example.

No assessments have been carried out to determine the merits of allowing patients to use their mobile telephones in NHS hospitals.

MRSA

Mr. Jenkin: To ask the Secretary of State for Health pursuant to her Answer of 2 February 2006, *Official Report*, column 723W, on MRSA, what her Department's policy is on maintaining current records on reported cases of MRSA; how frequently those data are updated; and if she will make a statement. [52241]

Jane Kennedy *[holding answer 16 February 2006]:* Mandatory surveillance measures Methicillin-resitant *Staphylococcus aureus* bloodstream infections (bacteraemias). Results from this surveillance are published every six months. The results from April to September 2005 were published on 6 February 2006 and are available on the Department's website at www.dh.gov.uk/hcai.

From April 2005, trusts have been required to report bacteraemias monthly to the Health Protection Agency, and to check these initial reports quarterly before they are collated for publication.

NHS Campuses (Learning Disability)

Danny Alexander: To ask the Secretary of State for Health if she will make a statement on the decision not to include the proposal to close NHS campuses for people with a learning disability in the easy-read version of the White Paper "Our Health, Our Care, Our Say". [50994]

Mr. Byrne: The easy-read version of the White Paper focuses on the issues that will be relevant to most people. It was intended to be a short summary document, which concentrates on the key themes of health and well-being; choice and putting people in control; access to services; and meeting the individual needs of people with long-term conditions.

Nurse Advisers

Paul Flynn: To ask the Secretary of State for Health how many nurse advisers supplied by private agencies were employed by *(a)* general practitioner surgeries and *(b)* hospitals in the last period for which figures are available. [50830]

Mr. Byrne *[holding answer 13 February 2006]*: This information is not collected centrally.

Outsourcing

John McDonnell: To ask the Secretary of State for Health what assessment she has made of the effect on costs of the outsourcing of *(a)* the NHS Pensions Agency, *(b)* the NHS Logistics Authority, *(c)* the Dental Practice Board and *(d)* the Prescription Pricing Authority. [51856]

Mr. Byrne *[holding answer 16 February 2006]:* A high level review on options available to the NHS Business Services Authority for achieving the arms length body (ALB) sector target savings was concluded in September 2005. This report concluded that a business model that sought to gain synergies through merging the processes of the ALBs, and taking advantage of the private sector capabilities to deliver those processes, was most likely to meet the target savings. In relation to further outsourcing of the functions of the merging ALBs the following assessments are in hand:

NHS Pensions Agency

Within the original contract negotiated with Paymaster (1836) Limited is a provision to move at some point in the future to full outsourcing. The terms of the contract agreed with Paymaster (1836) Limited require that the NHS Pensions Agency must first allow Paymaster (1836) Limited to bid for the full outsourcing.

Paymaster (1836) Limited have been asked to prepare a bid for full outsourcing and full consideration will be given to the costs and benefits once it is received.

NHS Logistics Authority (NHSLA)

No decision has been made to outsource the NHSLA. The Department is still in the process of market testing. All costs and benefits resulting from outsourcing will be taken into account in the business case.

Dental Practice Board (DPB)

A business case for expanding the Astron contract demonstrated that better value could be obtained from it compared to performing the same activity in-house. As well as financial benefits, the DPB advised that the risks associated with implementing the new dental contract would be more effectively controlled if the contract with Astron was extended.

Prescription Pricing Authority (PPA)

No further assessment has taken place on outsourcing the functions of this organisation beyond that concluded in September 2005.

Options for outsourcing the functions of the PPA are still being considered.

John McDonnell: To ask the Secretary of State for Health what the cost was of *(a)* the creation of the new Business Services Authority and *(b)* the administration of the outsourcing. [51857]

Mr. Byrne *[holding answer 16 February 2006]:* The creation of the NHS Business Services Authority is part of a larger programme aimed at reconfiguring the Department's arms length bodies (ALBs). While some elements of the costs of creating the NHS Business Services Authority are identifiable, it is not possible to calculate the total costs as the programme costs are not allocated to individual projects.

The NHS Business Services Authority will not take on the functions of the ALBs merging into it until 1 April 2006. Therefore, it has not outsourced any activity as yet and has incurred no cost associated with administration of outsourcing.

Parliamentary Questions

David T.C. Davies: To ask the Secretary of State for Health (1) how many parliamentary questions tabled in the last 12 months for answer by her on a named day *(a)* were transferred and *(b)* received a substantive answer (i) on the day named and (ii) after the day named; [49874]

(2) how many ordinary written parliamentary questions tabled for answer by her in the last 12 months have been answered *(a)* within 14 days, *(b)* between 14 and 28 days, *(c)* between 28 days and two months and *(d)* in excess of two months after the date of tabling; and if she will make a statement. [49901]

Mr. Byrne: The information for the year ending 31 January 2006 is shown in the tables.

Named day questions	*Total number of days*
Transferred	27
Answered on the day named	186
Answered after the named day	1126

Ordinary written questions	*Total number of days*
Within 14 days	3172
15–28 days	2298
29–60 days	787
29–60 days	383

Departments aim to ensure that Members receive a substantive response to their Named Day question on the named day and to endeavour to answer Ordinary Written questions within a working week of being tabled. Unfortunately, this is not always possible but this Department makes every effort to achieve these timescales.

Pathfinder Exercise

Mr. Oaten: To ask the Secretary of State for Health why contracts for sterile service supercentres have been issued before the conclusions of the Pathfinder exercise. [53198]

Jane Kennedy *[holding answer 27 February 2006]*: No such contracts have been issued.

PET Scanners

Mr. Steen: To ask the Secretary of State for Health what plans she has to increase the number of PET scanners for the diagnostic investigation of people with cancer. [55982]

Ms Rosie Winterton: "The National Framework for the Development of Positron Emission Tomography (PET) Services in England" published in October 2005 recommended that 46,000 scans should be made available over the next three to five years. 40,000 of these will be for the benefit of cancer patients.

Therefore, an additional £20 million capital funding has been made available over the next two years (2006–08) to support the development of this service. In addition a further 25,000 scans per year will be made available from the independent sector over the next five years to support the National Health Service.

Prescription Charges

Mr. Hollobone: To ask the Secretary of State for Health what discretion her Department has to waive penalty charges imposed where a patient has incorrectly claimed an exemption from prescription charges. [55693]

Ms Rosie Winterton *[holding answer 3 March 2006]*: The NHS Counter Fraud and Security Management Service (CFSMS) have issued detailed penalty charge guidance to ensure that primary care trusts can administer penalties consistently and in accordance with the law. This guidance, which can be found on their website at www.cfsms.nhs.uk/files/Penalty%20Charge%20Guidance.pdf explains the two provisions in the penalty charge legislation, which permit responsible authorities in exceptional cases to recover just the unpaid national health service costs and waive a penalty charge.

First, "A Defence under the Legislation" where the patient can show that they did not act wrongfully, or with any lack of care and secondly, an "Administrative Easement" where the personal circumstances are such that issuing a penalty notice may be deemed as inappropriate. Examples of this include patients suffering from a terminal illness or who are in residential care.

Primary Care Trusts (Poor Administration)

Mr. Gummer: To ask the Secretary of State for Health what sanctions are available to her against a primary care trust and its board members should poor administration be found by the financial and management specialist team. [47652]

Mr. Byrne *[holding answer 2 February 2006]*: If a primary care trust (PCT) is not performing one or more of its functions adequately, or there are significant failings in the way it is being run, the Secretary of State may make an intervention order under sections 84A and 84B of the National Health Service Act 1977. She also has powers under section 17 of that Act to direct a PCT about the exercise of its functions whether as a sanction or otherwise. There are further powers under sections 97C, 97D and 99 to direct a PCT in respect of its financial functions.

The Secretary of State also has powers, in the Primary Care Trusts (Membership, Procedure and Administration Arrangements) Regulations 2000 to terminate the tenure of office of the Chair and non-executive board members of a PCT if she is of the opinion that it is not in the interests of the health service in the area for which the trust acts or it is not conducive to the good management of a trust for a person to continue to hold office.

Residential Care Costs

Mark Hunter: To ask the Secretary of State for Health (1) how many people in England receiving residential care pay *(a)* all the cost of such care and *(b)* part of the cost themselves; [55380]

(2) how many people in England receiving residential care have the cost of the care paid for them by the National Health Service. [55381]

Mr. Byrne *[Holding answers issued 2 March 2006]*: At 31 March 2005, there were 267,200 adults, aged 18 and over, supported in care homes by councils with social service responsibilities (CSSRs) in England. A breakdown of the number of clients who are partially funded and those who are fully funded by CSSRs is not centrally available.

Data from the independent market analysts Laing and Buisson suggest there are some 15,000 to 20,000 National Health Service funded residents and over 100,000 privately funded residents.

Special Advisers

Tim Loughton: To ask the Secretary of State for Health if she will list the special advisers retained by Ministers in her Department. [48081]

Mr. Byrne: The Secretary of State and her Ministers retain two special advisers, Liz Kendall and Paul Richards.

Sterile Services Initiative

Mr. Oaten: To ask the Secretary of State for Health if she will list the consultants used in the Pathfinder project for the sterile services initiative; and what the value was of each contract. [48802]

Jane Kennedy *[holding answer 6 February 2006]*: The Pathfinder project will deliver modern decontamination services to the Bradford Teaching Hospitals National Health Service Foundation Trust, the Leeds Teaching Hospitals NHS Trust and the Calderdale and Huddersfield NHS Trust. The project has used Ernst and Young, Gleeds Management Services and Pinsent Masons. The value of these contracts is commercially confidential.

Suicide Prevention Strategy Advisory Group

Mr. Greg Knight: To ask the Secretary of State for Health what the *(a)* membership and *(b)* terms of reference are of the Suicide Prevention Strategy Advisory Group; what assessment she has made of the impact of its work; and if she will make a statement. [56375]

Ms Rosie Winterton: The suicide prevention strategy advisory group provides leadership and support in ensuring successful implementation of the national suicide prevention strategy. It also provides valuable input into the development of various specific actions outlined in the strategy where members of the group have a particular expertise. A review of membership was undertaken in 2005 to ensure it reflected the skills, knowledge and experience necessary to take this work forward. The new membership is as follows:

Name	*Organisation*
Professor Louis Appleby (Chairman)	National Director for Mental Health
Keith Foster	Suicide Prevention Programme Lead, national Institute for Mental Health in England (NIMHE)
Dr Jenny Bywaters	Director of Public Health, NIMHE
Professor Clair Chilvers	Department of Health
Sue Graves	Department of Health
Alison Tingle	Department of Health
Dr David Gunnell	University of Bristol
Professor Keith Hawton	Centre for Suicide Research, Oxford University
Professor Rachel Jenkins	Institute of Psychiatry
Dr Mary Piper	Department of Health
Dr Sian Rees	Department of Health
Nigel Hancock	Safety Custody Group, Health and Offender Partnerships (NOMS)
Dr Neil Brimblecombe	Department of Health
Anna Brown	PAPYRUS
Veronica Collingridge	Coroner's Society of England & Wales
Sandie Keene	Local Government Association
Pat Holma	National Mental Health Partnership
Finlay Robertson	
Professor David Sallah	Head of NIMHE BME programme
David King	Samaritans
John Scott	NIMHE

Supercentre Sterile Services

Mr. Oaten: To ask the Secretary of State for Health what measures she has in place to allow fair competition and innovation to continue when supercentre contracts for sterile services are developed. [53200]

Jane Kennedy *[holding answer 27 February 2006]*: We are committed to a mixed economy in decontamination in the National Health Service. NHS trusts may choose to redevelop their own services to meet the national standards, they may obtain the service from private contractors by market testing, they may obtain the service as part of a larger private finance initiative project or they may join with other NHS bodies to redevelop the service by means of a joint venture with a private sector service provider.

We estimate that about 100 NHS trusts and NHS foundation trusts will choose to participate in joint ventures with the remainder choosing one of the other options.

Each supercentre will have a joint venture management board (JVMB) and an instrument review committee (IRG) made up of NHS personnel who will regularly review the performance of the service provider and work in partnership to discuss requirements and maintain innovation.

The IRC and JVMB will also be responsible for specifying requirements and benchmarking arrangements to ensure fair competition and best value in terms of both quality and price.

The decisions on procurement routes and products will be determined at local level by the JVMB and the IRC. It is our intention to support both markets by ensuring that agreements are in place that reflect the changing requirements of the NHS, whilst providing opportunities for innovation through competition.

There are currently a number of national framework agreements in place for products associated with decontamination, some of which are provided through the NHS Logistics Authority. These are available to third parties procuring on behalf of the NHS as well as to the NHS itself.

Waiting Times

Mr. Lansley: To ask the Secretary of State for Health pursuant to the Answer of 20 January 2006, *Official Report*, column 1686W, on waiting times, if she will provide the equivalent data for the years 1992–93 to 1996–97; and how many patients dealt with in an out-patient setting were not subsequently admitted onto the in-patient waiting list in each year since 1997–98. [46621]

Jane Kennedy: The Department is unable to supply data on the estimated mean and median waiting times for a first out-patient appointment with a consultant following general practitioner referral, for years 1992–93 to 1996–97. This is because the relevant data collection commenced in September 1997.

The Department does not centrally collect data on the number of patients dealt with in an out-patient setting who were not subsequently admitted onto the in-patient waiting list.

Working Time Directive

Mr. Stewart Jackson: To ask the Secretary of State for Health what research her Department has undertaken into the impact of the Working Time Directive on *(a)* junior doctors, *(b)* consultants, *(c)* registrars and *(d)* nursing staff in the Norfolk, Suffolk and Cambridge Health Authority area. [33477]

Ms Rosie Winterton: The Department has not undertaken any research into the impact of the working time directive (WTD) in Norfolk, Suffolk and Cambridge Health Authority area. Implementation of the WTD is the responsibility of local National Health Service trusts and strategic health authorities (SHAs) were required to draw up affordable plans to meet WTD 2004.

The Government agreed to implement the European WTD as United Kingdom legislation to improve the health and safety and working lives of all employees in this country. The vast majority of staff groups have been covered by the 48-hour week since 1998. The Government negotiated; an extension to the WTD for doctors in training to enable phased implementation from August 2004.

Insurance (Genetic Testing)

Sandra Gidley: To ask the Secretary of State for Health (1) what assessment her Department has made of research undertaken jointly by the Human Genetics Committee and the Genetics and Insurance Committee on the use of genetic information by the insurance industry, which was due for completion in 2005; [52764]

(2) if she will make a statement on the temporary ban, voluntarily agreed between the Government and the Association of British Insurers on insurers requesting the results of predictive genetic tests on breast cancer genes. [53038]

Jane Kennedy: The consultation and analysis done by the human genetics commission jointly with the genetics and insurance committee (GAIC) has been used to inform the development of the Government's and insurer's "Concordat and Moratorium on Genetics and Insurance", published in March 2005. This document ensures that the use of genetic information by insurance companies will be transparent, fair, and subject to independent oversight. It sets out a range of protections against the use of genetic information by insurers and puts in place until November 2011 a voluntary agreement banning the use by insurers of the results from predictive genetic tests, including tests on breast cancer genes, in deciding the premiums of insurance policies.

During the moratorium no one will be required to disclose the results of a predictive genetic test unless it has been approved by the GAIC and is for insurance of more than £500,000 for life insurance or £300,000 for other health insurance. To date, the only test that has been approved by GAIC is for Huntington's disease for life insurance polices over £500,000, and no applications for any other tests will be submitted before 2008.

The current agreement with the insurance industry is flexible enough to respond to fast moving technological and clinical developments in genetic testing. The Government has made clear that any failure of the agreement will lead to the reconsideration of the need for statutory control. Copies of the Concordat are available in the Library and are also available on the Department's website at www.dh.gov.uk/publications.

EDUCATION AND SKILLS

Academies

Mr. Marsden: To ask the Secretary of State for Education and Skills how many academies are supported by organisations which incorporate or adhere to a faith or religious ethos in their *(a)* curricula and *(b)* admissions policies. [53910]

Jacqui Smith: Only Academies which have been designated as having a religious character may incorporate a faith or religious ethos in their curricula and admissions policies. Of the 27 Academies which are currently open eight have been designated as having a religious character. All of the eight open Academies which have been designated as having a religious character operate a curriculum which reflects the ethos of the tenets of their chosen faith. However, religious designation does not require an Academy to operate a faith based admissions policy, and only three Academies do this.

Arson

Mr. Gibb: To ask the Secretary of State for Education and Skills what estimate she has made of the cost of losses of buildings used for education caused by arson in each year since 1996. [53552]

Jacqui Smith: The Department does not have figures or estimates for the costs of arson in educational buildings over that period and nor does the Office of the Deputy Prime Minister (ODPM), the department with the policy lead on arson. ODPM does have figures for 2003. These show that in England and Wales there were 792 deliberate fires in schools and 118 deliberate fires in further education establishments that year—910 such fires in total. ODPM's Cost of Fire Estimates for 2003 show that the average cost of property damage for public sector buildings, which includes educational premises, was £45,410 in England and Wales. Using these figures, the cost of fire losses due to arson in schools and further education colleges that year were estimated to be £41,323,100.

Canvey Junior School

Bob Spink: To ask the Secretary of State for Education and Skills if she will name the teacher who resigned from Canvey Junior School in 2004 after receiving a police caution for having indecent images of children; whether this person *(a)* is and *(b)* has since their resignation been working with children; and if she will make a statement. [48905]

Ruth Kelly *[holding answer 6 February 2006]:* In accordance with its obligations under the Data Protection Act, the Department does not disclose personal information in the detail of individual cases.

Chicken Farming

Mrs. Gillan: To ask the Secretary of State for Education and Skills if she will make representations to the Deputy Prime Minister to prevent planning permission from being granted to chicken farms being opened in close proximity to schools. [44261]

Jacqui Smith *[holding answer 20 January 2006]:* We will not be making any representations to the Deputy Prime Minister. It is a matter for local planners to decide the locations of chicken farms taking into account any relevant guidance from the Office of the Deputy Prime Minister. The Government are working closely with key stakeholders on all issues related to the protection of human health during a possible outbreak of avian influenza.

Child Protection

Mr. Gibb: To ask the Secretary of State for Education and Skills how many Criminal Records Bureau checks were requested by *(a)* schools, *(b)* local authorities and *(c)* her Department in each year since 2002. [47274]

Ruth Kelly: The Information required is not available in the format requested.

However, the Criminal Records Bureau confirms that since its launch in 2002, over 8 million disclosures have been issued.

Mr. Gibb: To ask the Secretary of State for Education and Skills whether a Criminal Records Bureau check was requested on Paul Reeve by *(a)* Norfolk county council and *(b)* the head teacher or other authorised staff member at the Hewett School in Norwich. [47275]

Ruth Kelly: My Department has made it clear in successive guidance that CRB checks are strongly recommended as part of the appointment process for anybody who will be working in a school, further education institution or LEA education service.

'Safeguarding children in education' (September 2004) emphasises the wider responsibilities on employers, including adopting recruitment practices which involve scrutinising applicants, verifying any qualifications, obtaining references, checking previous job history as well as a check of List 99 and CRB check where appropriate.

The changes I announced in my statement of 19 January will mean that existing arrangements become compulsory for schools through proposed amendments to regulations to be made under sections 35 and 36 of the Education Act 2002 (and section 72 of the School Standards and Framework Act (SSFA) 1998)—this will affect amendments to the current School Staffing (England) Regulations 2003 and will make an 'on appointment' CRB check compulsory for all new appointments to the schools workforce.

The Department does not know whether a Criminal Records Bureau check was requested on Paul Reeve.

Mr. Gibb: To ask the Secretary of State for Education and Skills how many people are employed in the Children's Safeguards Unit in Darlington. [47278]

Ruth Kelly: As of 31 January 2006 there were 96 people (86.9 full time equivalent posts) employed in the Safeguarding Children Unit. Staff in this unit work on a number of different areas of policy, operations and casework.

Mr. Gibb: To ask the Secretary of State for Education and Skills who is the head of the Children's Safeguard Unit. [47279]

Ruth Kelly: It is my Department's policy not to reveal the names of individuals who are working within the Safeguarding Children Unit or any other unit.

Class Sizes

David Davis: To ask the Secretary of State for Education and Skills what the size of each class is in each *(a)* primary and *(b)* secondary school in Haltemprice and Howden. [49052]

Jacqui Smith: Information on class sizes in primary and secondary schools in Haltemprice and Howden is shown in the following table.

Maintained primary and secondary schools[1]: Average class size[2,3]—January 2005—Haltemprice and Howden parliamentary constituency

URN	School name	Number of classes	Number of pupils in classes	Average class size
Primary schools				
117824	Barmby-on-the-Marsh Primary School	1	16	16.0
117841	Eastrington Primary School	6	127	21.2
117842	Brough Primary School	14	366	26.1
117844	Gilberdyke Primary School	10	256	25.6
117845	Anlaby Junior School	10	272	27.2
117846	Hallgate Junior School	8	232	29.0
117847	Hallgate Infant School	6	154	25.7
117850	Willerby Carr Lane Junior School	12	349	29.1
117852	Holme-upon-Spalding Moor Primary School	11	314	28.5
117854	Howden Junior School	8	188	23.5
117859	Newbald Primary School	4	69	17.3
117860	Newport Primary School	5	132	26.4
117868	Welton Primary School	7	183	26.1
117874	Cottingham Croxby Primary School	10	284	28.4
117875	Cottingham Bacon Garth Primary School	6	146	24.3
117877	Anlaby Infant School	6	170	28.3
117878	Bubwith Community Primary School	3	80	26.7
117881	Kirk Ella St. Andrew's Community Primary School	21	586	27.9
117883	Westfield Primary School	14	380	27.1
117884	Swanland Primary School	14	408	29.1
117885	Springhead Primary School	7	150	21.4
117887	Willerby Carr Lane Infant School	9	226	25.1
117888	Anlaby Acre Heads Primary School	12	336	28.0
117891	Elloughton Primary School	11	289	26.3
117984	North Cave Church of England Voluntary Controlled Primary School	5	114	22.8

Maintained primary and secondary schools[1]: Average class size[2,3]—January 2005—Haltemprice and Howden parliamentary constituency

URN	School name	Number of classes	Number of pupils in classes	Average class size
117985	North Ferriby Church of England Voluntary Controlled Primary School	11	289	26.3
117990	Little Weighton Rowley Church of England Voluntary Controlled Primary School	4	78	19.5
117992	Skidby Church of England Voluntary Controlled Primary School	4	81	20.3
118003	South Cave Church of England Voluntary Controlled Primary School	15	397	26.5
118055	St. Thomas More RC Primary School	4	129	32.3
118121	Howden Church of England Infant School	7	179	25.6
Secondary Schools				
118077	South Hunsley School	79	1,716	21.7
118079	Cottingham High School	70	1,513	21.6
118083	Wolfreton School	91	1,895	20.8
118084	Howden School and Technology College	34	719	21.1
118106	Sydney Smith School	59	1,544	26.2

[1] Includes middle schools as deemed
[2] One teacher classes
[3] Classes as taught during one selected period on the day of the census in January

Communication Aids

Mrs. Maria Miller: To ask the Secretary of State for Education and Skills what factors underlay the decision to discontinue the Communication Aids Project from 1 April 2006; and if she will make a statement on the future funding mechanisms for assisting children and adults with complex communication issues. [54794]

Maris Eagle: Since it went live in April 2002, the Communication Aids Project has assisted some 4,000 children of school age experiencing significant difficulty in communicating with those around them. The project has been successful but we have always made it clear, through the referral process and otherwise, that CAP was there to supplement, and not replace, provision made locally. The present tranche of funding is time-limited and comes to an end in March 2006. With other pressures on funding arising from the Government's ambitious agenda for education, it has not been possible to extend the funding for CAP.

Addressing severe communication difficulties is clearly an important part of meeting individual needs for local service providers. Where children are concerned, we would be looking to children's services, through children's trusts, to provide appropriate support and equipment to all disabled children. Adult needs would be met by local authorities and primary care trusts working together through their integrated community equipment services.

Corporate Services

Mr. Gauke: To ask the Secretary of State for Education and Skills what measures she has taken to reduce the costs of the corporate services of *(a)* her Department, *(b)* its non-departmental public bodies and *(c)* Ofsted; and what savings have been made as a consequence. [52398]

Ruth Kelly: The Department has agreed budgets which reflect a commitment to make 15 percent. efficiency savings in real terms in administrative expenditure (of which corporate services expenditure is an element) by 2007–08, within the Department itself, and across the landscape of its non-departmental public bodies and Ofsted. We are monitoring spend across all these budgets to ensure spend does not exceed profiled levels.

Work is also underway to examine how the sharing of corporate services can produce further efficiencies for the department and its NDPBs.

My Department reported progress towards our Gershon Review target in the Department's autumn performance report. It will report further progress in the departmental annual report which we expect to publish in April.

Criminal Records Bureau

Mr. Rob Wilson: To ask the Secretary of State for Education and Skills what percentage of *(a)* teaching staff and *(b)* non-teaching staff in schools in England have been checked by the Criminal Records Bureau, broken down by local education authority. [50200]

Ruth Kelly: The information is not available in the format requested.

Disadvantaged Children

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills what steps her Department plans to take to ensure that disadvantaged children are given appropriate school placements under the White Paper proposals. [50508]

Jacqui Smith *[holding answer 14 February 2006]*: We will place a duty on local authorities to provide advice and assistance to parents when expressing preferences for schools. We are investing in a network of choice advisers to provide practical support to parents most likely to need extra help with the admissions process. This will ensure that ALL parents, including the most disadvantaged, will be able to make an informed choice of school for their child.

We will make it easier for schools to adopt banding to ensure that the pupils admitted to the schools are representative of all levels of ability. This can give children living further away more chance of obtaining entry to schools than would have been the case if distance had been the main criterion. We also intend to reduce inequalities by giving disadvantaged parents easier access to a wider choice of schools. The White Paper proposals will extend school transport rights for low income groups to remove barriers to effective choice.

School failure is more prevalent in deprived areas, so disadvantaged children may be more likely than their peers to attend a weak school. The Schools White Paper proposals contain firm measures to ensure that school failure and underperformance is addressed more rapidly and more decisively.

Education (Peterborough)

Mr. Stewart Jackson: To ask the Secretary of State for Education and Skills what support will be provided in respect of free school transport for less well off children attending *(a)* the Thomas Deacon Academy and *(b)* the Voyager School in Peterborough constituency. [54860]

Jacqui Smith: Current legislation requires local authorities to make transport arrangements for pupils of compulsory school age who attend their nearest suitable school, and where this is beyond statutory walking distance (3 miles for secondary aged pupils). Pupils meeting these criteria will have transport arrangements made for them by the local authority.

The Education and Inspections Bill includes proposals to extend entitlement to free home to school transport for low income families—for secondary aged pupils to any one of the three nearest suitable schools, where the distance travelled is between two and six miles.

Education Funding

Keith Vaz: To ask the Secretary of State for Education and Skills how much funding her Department allocated for IT equipment in schools in *(a)* Leicester and *(b)* England in each year between 1997 and 2005. [50145]

Jacqui Smith: The Department does not hold information on funding for ICT at constituency level. However, Leicester East is in Leicester City LA and allocations for this authority, between 1998–2005, are detailed in 'Funding for ICT in Schools in England' which is available in the House Library. The document also includes total funding allocations for schools in England in each year. The ICT funding allocation for Leicester City LA in 2005–2006 was £2,530,305 and the total allocation for ICT in schools in England was £611 million.

Mr. Lancaster: To ask the Secretary of State for Education and Skills what the dedicated school grant per pupil was in Milton Keynes in 2004–05; and what she estimates the grant per pupil will be in each of the next three years. [55399]

Jacqui Smith: The Dedicated Schools Grant (DSG) is being introduced from 2006–07. The data I placed in the Library to accompany my written statement of 7 December 2005 on the School Funding Settlement for 2006–07 and 2007–08, sets out how much DSG each authority will receive for those years. That statement and more detailed information may be found on the Teachernet website at: www.teachernet.gov.uk/management/schoolfunding/2006–07_funding_arrangements/

Examination Report

Mr. Gibb: To ask the Secretary of State for Education and Skills when she expects the Qualifications and Curriculum Authority to publish its second report into the use of coursework in GCSE and GCE A level exams. [53474]

Jacqui Smith: The 14–19 Education and Skills White Paper asked the Qualifications and Curriculum Authority to carry out a review of coursework in GCSE and A level qualifications with a view to reducing the cumulative burden. We expect to receive the outcome of QCA's review by Easter 2006.

Foreign Language Teaching

Mr. Gibb: To ask the Secretary of State for Education and Skills what proportion of *(a)* primary and *(b)* secondary schools teach at least two foreign languages in each year group. [54903]

Jacqui Smith: The information requested is not held centrally. Beyond delivering the core subjects, schools are free to choose what other subjects they teach.

GCSEs

Mr. Byers: To ask the Secretary of State for Education and Skills in secondary schools with over 20 percent. of pupils entitled to free school meals, what is *(a)* (i) the percentage of such pupils and (ii) the overall proportion leaving without a qualification and *(b)* the overall proportion achieving grade A* to C at GCSE or equivalent. [54074]

Jacqui Smith *[holding answer 27 February 2006]*: The information requested for academic year 2004/05 can be found in the following table.

Figures for all maintained mainstream schools have been provided for comparison.

	Maintained mainstream[1] secondary schools with > 20 percent. FSM	*All maintained mainstream[1] secondary schools*
Number of schools	851	3,123
Background information		
Total number of pupils[2]	772,518	3,206,924
Percentage of pupils known to be eligible for free school meals[3]	33.2	14.3
GCSE and equivalent achievements		
Total number of pupils at the end of KS4]	139,528	571,423

	Maintained mainstream1 secondary schools with > 20 percent. FSM	All maintained mainstream1 secondary schools
Percentage of pupils at the end of KS4 achieving5:		
No qualification	4.8	2.6
5 or more A*-C at GCSE and equivalent	41.5	55.9

[1] Maintained mainstream schools include academies, community schools, voluntary aided schools, voluntary controlled schools, Foundation schools and city technology colleges.
[2] Includes all pupils with sole and dual (main) enrolment status on the schools' registers.
[3] The number of pupils known to be eligible for free school meals (FSM) expressed as a percentage of the school population.
[4] Number of pupils at the end of Key Stage 4 in academic year 2004/05.
[5] Includes achievements for these pupils in other academic years.

Grammar Schools

Mr. Hands: To ask the Secretary of State for Education and Skills (1) when she last visited a state grammar school on official business; [53825]

(2) how many visits she has made to state grammar schools on official business since 5 May 2005; and to which schools. [53826]

Ruth Kelly: Since my appointment as Secretary of State for Education and Skills, I have not visited any state grammar schools on official business.

Gypsies/Travellers

John Bercow: To ask the Secretary of State for Education and Skills what targeted programmes have been introduced to address under-performance of pupils from Gypsy and Traveller communities. [53540]

Jacqui Smith: We are concerned that Gypsy, Roma and Traveller pupils are among the lowest achieving in our schools. In 2003 the Government launched a national strategy to tackle the underachievement of minority ethnic pupils. This included a range of initiatives aimed at supporting Gypsy, Roma and Traveller young people, including a national pilot project testing strategies to improve attendance and raise attainment.

The findings from this pilot have informed the development of a national programme of work to support local authorities and schools with large numbers of Gypsy, Roma and Traveller pupils to better meet their needs. This will be launched in 12 local authorities in April 2006 and follows up a commitment we made in the Schools White Paper.

Head Teachers

Mr. Gibb: To ask the Secretary of State for Education and Skills (1) what the average salary paid to head teachers in *(a)* primary and *(b)* secondary schools was in each year since 1995; [46408]

(2) what the average age of head teachers in *(a)* primary and *(b)* secondary schools was in each year since 1995; [46409]

(3) how many head teachers *(a)* retired and *(b)* were appointed in (i) primary and (ii) secondary schools in each year since 1995; [46410]

(4) what the average salary of head teachers was in 2004–05, broken down by region. [47341]

Jacqui Smith: As a result of the data issues explained in my response to the hon. Member's question of 31 January on the publication "Statistics of Education: The School Workforce in England", the most recent data currently available are for March 2003, (except for retirements) which are available for 2004. The figures provided for 2001 onwards are the best currently available but may be revised following further analysis. Any revisions will be made available on the Research and Statistics Gateway[1]. The available data are shown in the tables.

Information on the average salary of head teachers by region is not currently available.

[1] The Research and Statistics Gateway is the web portal that provides access to all DfES statistics, it can be found at the following address: http://www.dfes.gov.uk/rsgateway/

The following table provides the average salary and average age of full-time regular qualified head teachers employed in maintained nursery, primary and secondary schools in England, March 1995 to March 2003, the latest information available.

Average salary and average age of full-time regular qualified head teachers in the maintained schools sector in England, March 1995 to March 2003

	Nursery/primary		Secondary	
	Mean salary (£)	Mean age	Mean salary (£)	Mean age
1995	28,000	47.7	38,500	49.3
1996	28,900	47.9	39,800	49.3
1997	30,100	48.0	41,500	49.4
1998	31,100	48.0	43,100	49.3
1999	32,500	48.4	44,900	49.7
2000	35,100	48.9	48,200	50.1
2001	37,300	49.1	50,800	50.1
2002	39,400	49.4	54,000	50.3
2003	41,700	49.6	57,500	50.5

Source:
Database of Teacher Records

Average salaries are rounded to the nearest £100.

Schools and local authorities have flexibility to award recruitment and retention incentives and are able to set a head teacher's salary above the top of the pay spine.

The following table provides the number of head teachers who retired and the number of teachers promoted to head teacher in each year from 1995–96 to 2003–04, the latest information available.

Head teacher retirement awards and promotions in maintained nursery, primary and secondary schools in England, (financial years)

	Nursery/primary		Secondary	
	Retirement awards[1]	Promotions[2]	Retirement awards[1]	Promotions[2]
1995–96	1,080	1,710	300	390
1996–97	1,370	1,860	300	450
1997–98[3]	1,360	2,120	360	530
1998–99	550	1,440	200	410
1999–2000	600	1,810	170	420
2000–01[4]	1,030	1,810	270	680

Head teacher retirement awards and promotions in maintained nursery, primary and secondary schools in England, (financial years)

	Nursery/primary		Secondary	
	Retirement awards[1]	Promotions[2]	Retirement awards[1]	Promotions[2]
2001–02	870	1,690	240	490
2002–03	790	1,490	240	460
2003–04	880	n/a	200	n/a

n/a = not available

[1] Includes teachers whose last day of service may have been some years earlier than the retirement award date.

[2] Promotions exclude teachers who were not previously in service or in service outside of the maintained sector.

[3] The effect of the change in the Teachers' Pensions Scheme as from 31 August 1997 was that many more teachers took early retirement in 1996–97 and 1997–98 than in previous and subsequent years.

[4] Standards Fund money was made available in 2000–01 and 2000–02 to support early retirement scheme specifically aimed at head teachers.

Note:
Figures are rounded to the nearest 10.

Database of Teacher Records and Pensioner Statistics Database

Mr. Gibb: To ask the Secretary of State for Education and Skills (1) how many and what proportion of applicants for the National Professional Qualification for Headship were required to retake *(a)* the school-based assessment and *(b)* the final assessment in each year since 1997; [47337]

(2) how many and what proportion of teachers with the National Professional Qualification for Headship qualified through each available route; [47338]

(3) what the pass rate for the National Professional Qualification for Headship was in each year since 1997; [47339]

(4) how many people have been awarded the National Professional Qualification for Headship in each year since 1997; [47340]

(5) what proportion of headteachers have the National Professional Qualification for Headship. [47373]

Jacqui Smith: On the basis of information provided by the National College of School Leadership (NCSL), which has run the revised National Professional Qualification for Headship (NPQH) since its introduction in 2001.

Candidates must pass the school-based assessment before they can move to the final stage. There is no obligation to retake an assessment, but these candidates would have to do so if they were to obtain the NPQH. The following table shows how many candidates did not meet the assessment criteria in each year since 2001.

	School-based assessment		Final assessment	
Calendar year	Number of candidates who did not meet assessment criteria	Percentage of candidates who did not meet assessment criteria	Number of candidates who did not meet assessment criteria	Percentage of candidates who did not meet assessment criteria
2002	38	1.4	35	1.4
2003	97	2.9	118	3.5
2004	114	2.9	111	2.8
2005	113	2.7	156	3.6

14,526 candidates graduated with the NPQH in the period 2001–05. The number and percentage of candidates that qualified via each route is shown in the following table.

	Number of graduates	Percentage of graduates
Route 1	4,646	32.0
Route 2	8,484	58.4
Route 3	1,396	9.6
Total	14,526	100.0

The three routes for the revised model of the NPQH are access (route 1); development (route 2); accelerated (route 3). For each intake, all three routes start at the same time but conclude at different rates, from around six months (accelerated route) to two years (access route).

There are two intakes for NPQH each calendar year, and the following table shows the percentage of candidates in each intake that have graduated as at January 2006. Successful candidates will achieve the NPQH at different rates, from around six months (accelerated route) to two years (access route). From intake 7 (March 2004) onwards, the percentage of those who have graduated is lower than for previous intakes because some candidates will still be working towards NPQH, as would be expected.

			Candidates from this intake who had graduated as at January 2006	
Intake	Start date	Candidates in intake	Number	Percentage
1	March 2001	2,869	2,352	82.0
2	September 2001	2,300	1,953	84.9
3	March 2002	1,487	1,270	85.4
4	September 2002	2,541	2,190	86.1
5	March 2003	1,897	1,620	85.3
6	September 2003	2,900	2,356	81.2
7	March 2004	2,029	1,366	67.2
8	September 2004	2,844	1,291	45.4
9	March 2005	2,100	128	6.1
10	September 2005	2,849	—	—
		23,816	14,526	

The following table shows the number of people that have been awarded the revised NPQH in each year since 2001.

	Number of candidates awarded revised NPQH
2001	387
2002	2,783
2003	3,282
2004	3,838
2005	4,236
Total	14,526

As of January 2005, there were 22,860 full-time serving headteachers in the maintained sector in England. The NCSL estimates that around 23 per cent. of these headteachers now hold the NPQH. From 1 April 2004, it has been mandatory for all those appointed to their first headship post in local authority maintained schools, and non-maintained special schools, to hold the NPQH or be working towards it.

Keith Vaz: To ask the Secretary of State for Education and Skills how many vacancies there were for headteacher positions in each year from 1997 to 2005 in *(a)* Leicestershire and *(b)* England. [51725]

Jacqui Smith: The following table gives the number of full-time head teacher vacancies and temporarily filled head teacher posts in maintained schools in Leicestershire and Leicester local authority and in England, in each year, January 1997 to 2005, the latest information available.

Full-time head teacher vacancies[1] and temporarily filled posts[2], in maintained nursery, primary, secondary and special schools, January 1997 to 2005

	Former Leicestershire[3]	*Local authority Leicestershire (post 1 April 1997)*	*Leicester*	*England*
1997[3]				
Vacancies	9	—	—	180
Temporarily filled posts (including vacancies)	—	—	—	—
1998				
Vacancies	—	0	4	250
Temporarily filled posts (including vacancies)	—	6	4	580
1999				
Vacancies	—	1	4	250
Temporarily filled posts (including vacancies)	—	6	4	490
2000				
Vacancies	—	0	3	230
Temporarily filled posts (including vacancies)	—	12	3	540
2001				
Vacancies	—	1	3	190
Temporarily filled posts (including vacancies)	—	8	3	650
2002				
Vacancies	—	0	6	170
Temporarily filled posts (including vacancies)	—	4	10	520
2003				
Vacancies	—	3	6	130
Temporarily filled posts (including vacancies)	—	3	7	540
2004				
Vacancies	—	1	0	120
Temporarily filled posts (including vacancies)	—	8	3	570
2005				
Vacancies	—	5	0	170
Temporarily filled posts (including vacancies)	—	6	5	610

[1] Advertised vacancies for permanent appointments (or appointments of at least one term's duration). Posts filled by somebody on a contract of a term or more are not counted as being vacant.

2. Temporarily filled full-time permanent appointments (including vacancies). The definition is wider than the vacancy definition above (items b to d as follows are in addition to the normal definition).

a. where there is no incumbent who is expected to return to the post.

b. whether or not filled on a temporary basis, i.e either without a contract or on a contract of less than one year,

c. whether or not advertised,

d. where an appointment has been made but not yet taken up.

[3] In April 1997 Leicestershire was reorganised into two authorities, Leicestershire and Leicester. Information on temporarily filled posts were not collected before 1998.

Note:

Figures for England are rounded to the nearest 10.

DfES annual 618G survey.

Key Skills Training

Rosie Cooper: To ask the Secretary of State for Education and Skills how much her Department have allocated for key skills training in secondary schools in *(a)* Lancashire and *(b)* West Lancashire in each year since the beginning of the scheme. [53316]

Jacqui Smith: Training for key skills teachers is provided through the Key Skills Support Programme (KSSP) which focuses on post-16 learners in schools, colleges and work-based training. The amounts allocated nationally for schools and colleges since the start of the KSSP are set out in the following table.

Financial year	*Allocation (£)*
1999–2000	4,000,000
2000–01	4,000,000
2001–02	4,000,000
2002–03	4,000,000
2003–04	4,000,000
2004–05	3,115,000
2005–06	3,525,000

The KSSP is a national programme and the above figures represent the total allocations across England for both secondary schools and colleges. More detailed breakdowns, whether by region or by type of institution, are not available.

Key Stage 3

John Bercow: To ask the Secretary of State for Education and Skills if she will make a statement on the review by the Qualification and Curriculum Authority of the Key Stage 3 curriculum. [53512]

Jacqui Smith: Key Stage 3 needs to be the springboard into a reformed 14–19 phase. The purpose of the Key Stage 3 Review is to define clearly the essential elements of National Curriculum subjects to which all young people are entitled and, in so doing, create space in the school timetable. This will give schools flexibility to offer catch up provision for those who are struggling particularly in English and mathematics and to provide stretching opportunities for all children, including those who have particular gifts and talents.

List 99

Annette Brooke: To ask the Secretary of State for Education and Skills how many individuals whose names have been removed from *(a)* List 99 and *(b)* the Protection of Children Act List in each of the last four years have subsequently been employed in the provision of childcare in any regulated setting from birth to entry to school. [47224]

Ruth Kelly *[holding answer 31 January 2006]:* Employment decisions are a matter for individual employers. Departmental guidance 'Child Protection: Preventing Unsuitable People from working with Children and Young Persons in the Education Service' gives comprehensive advice on the full range of pre-employment checks that need to be undertaken before employing an individual including obtaining CRB checks. Employers must make a judgment on the suitability of the applicant in hand. CRB checks are mandatory for all those working in regulated child care settings and for all newly appointed teachers.

Any individual who appears on list 99 or the POCA List (other than provisionally) on the grounds of unsuitability to work with children is barred from working in a "regulated position" within the meaning of section 36 of the Criminal Justice and Court Services Act 2000 which includes a position where normal duties include caring for, training, supervising or being in charge of children.

Annette Brooke: To ask the Secretary of State for Education and Skills what representations she has received about individuals whose name appears *(a)* on the Sex Offenders Register, *(b)* List 99 and *(c)* the Protection of Children Act List working in unregulated child care settings. [47225]

Ruth Kelly *[holding answer 31 January 2006]:* My Department does not keep a central record of any such representations.

Music

Rosie Cooper: To ask the Secretary of State for Education and Skills what funding her Department has made available for school music facilities in *(a)* West Lancashire and *(b)* Lancashire in each academic year since 1997. [53319]

Jacqui Smith: Capital allocations to local authorities and schools are higher than ever before. In 2005–06 they are £5.5 billion and they are planned to rise to £6.3 billion in 2007–08, an increase from £683 million in 1996–97.

Allocations are made on a financial year basis, not the academic year. The Department does not hold information on funding for music facilities at constituency level. However, West Lancashire comes under Lancashire county council and allocations for this authority since 1997–98 are set out in the following table:

	£ million
1997	13.3
1998	19.5
1999	36.8
2000	42.2
2001	36.0
2002	55.5
2003	62.6
2004	44.2
2005	38.1

We expect local authorities and schools to take decisions on allocating funds between their various priorities, including music facilities, in accordance with local asset management plans.

New Schools

Mrs. Ellman: To ask the Secretary of State for Education and Skills how many competitions in relation to opening new schools by local education authorities took place under the Education Act *(a)* 2002 and *(b)* 2005 in each year since commencement of the

relevant provisions; what the results of these were; and how many such competitions were forecast to be likely to take place under each Act prior to their coming into force. [55109]

Jacqui Smith *[holding answer 2 March 2006]:* There have been no competitions in relation to opening new schools under the Education Acts 2002 and 2005. The provisions of the 2002 Act apply to additional secondary schools only and do not affect proposals by proposers other than the local authority. It is therefore open to authorities to support proposals by other proposers rather than hold a competition.

The provisions of the 2005 Act have yet to be commenced, and we are currently consulting on regulations and guidance to be made under them. These provisions will require competitions for all new secondary schools, including replacement schools as a result of reorganisation, and allow the publication of proposals outside a competition only with the consent of the Secretary of State.

It was estimated that the circumstances under which a competition could potentially arise under the 2002 Act might number seven or eight a year, and that there might be up to 20 competitions a year under the wider provisions of the 2005 Act.

Parent Choice

Paul Rowen: To ask the Secretary of State for Education and Skills what research her Department have undertaken into the effects that extending parent choice in secondary schools would have on pupil distribution. [52437]

Jacqui Smith *[holding answer 16 February 2006]:* None.

Playing Fields

Mr. Leech: To ask the Secretary of State for Education and Skills how many school playing fields in Manchester have been sold since 1997. [52712]

Jacqui Smith: Since 1997, seven applications involving the sale of school playing field capable of forming at least a small sports pitch have been approved at schools in Manchester. Of these, five were at closed schools.

Post-16 Education

Mr. Hoban: To ask the Secretary of State for Education and Skills pursuant to the Answer of 30 June 2005, *Official Report*, column 1721W, on sixth forms, if she will make a statement on the outcome of the consultation with stakeholder representative groups and bodies on the guidance for the operation of the 16–19 capital fund. [55247]

Jacqui Smith *[holding answer 2 March 2006]:* The Learning and Skills Council (LSC) consulted stakeholder representative groups on its guidance for the operation of the 16–19 capital fund in October 2005. 155 organisations responded, including 21 local authorities, 41 schools, 36 sixth form colleges and 44 general Further Education colleges. The LSC published its guidance on the 16–19 capital fund in December 2005.

Religious Education

Mr. Allen: To ask the Secretary of State for Education and Skills whether she plans to review the law requiring a daily act of collective worship of a broadly Christian nature in all community schools. [55474]

Jacqui Smith: The current policy regarding collective worship is set out in the Department for Education and Skills Circular 1/94. All registered pupils attending a maintained school, primary or secondary, should take part in a daily act of collective worship. There are no current plans to review this requirement.

Collective worship is to be wholly or mainly of a broadly Christian character. However, if a head teacher considers that the requirement for Christian collective worship is inappropriate for their school, he or she can apply to the local Standing Advisory Council on Religious Education to have it lifted or modified.

School Buildings

Mr. Gibb: To ask the Secretary of State for Education and Skills whether it is her Department's policy to reduce grants for new school buildings if a sprinkler system is included in the plans. [53348]

Jacqui Smith: It is not the Department's policy to reduce grants or other forms of capital funding for new school buildings if sprinkler systems are included in the plans.

Where a local education authority (LEA) decides that sprinklers are needed in a new school, it will clearly add to the overall project costs. Limited figures we have from LEAs indicate that installing sprinkler systems in new schools adds some 5–10 per cent. to construction costs. Because this data is based on a relatively small number of projects, we have commissioned the Building Research Establishment (BRE) to carry out a cost benefit analysis of installing sprinklers in new school buildings. We expect a preliminary report from BRE by Easter.

School Providers

Mr. Willetts: To ask the Secretary of State for Education and Skills how many potential providers have submitted proposals to set up schools under provisions for open competition in the Acts of *(a)* 1998, *(b)* 2002 and *(c)* 2005; and how many of these have been successful in each case. [54357]

Jacqui Smith: The School Standards and Framework Act 1998 did not make provision for competitions for the establishment of new secondary schools. The Education Act 2002 introduced the requirement that a local authority run a competition where it proposed to establish an additional secondary school as a community or foundation school. These measures came into force in June 2003 but there have been no competitions to date. The Education Act 2005 will extend the requirement for competitions to all proposals for new secondary schools, including replacement

schools, but the provisions have not yet been commenced. We are currently consulting on regulations and guidance which will bring these measures into force.

Promoters, other than a local authority, may currently publish proposals for a new school without the need for a competition. When the 2005 Act measures come into force new secondary schools will normally be established following competitions. Promoters will, however, be able to apply to the Secretary of State for consent to publish proposals without the requirement of a competition.

School Results

Mr. Gibb: To ask the Secretary of State for Education and Skills what proportion of 11-year-olds attending *(a)* faith schools and *(b)* other maintained schools achieved (i) level 4 and (ii) level 5 in (A) English, (B) mathematics, (C) science, (D) reading, (E) writing, (F) reading and writing and (G) reading, writing and mathematics in each year since 1996. [52557]

Jacqui Smith: The information requested is not readily available and can be obtained only at disproportionate cost. Figures for 2005 have been provided as follows:

	Percentage pupils achieving level 4 or above	
	Faith schools	*Other maintained schools*
English	84	77
Maths	80	73
Science	90	85
Reading	89	83
Writing	69	61
Reading and writing	68	59
Reading, writing and maths	63	54

	Percentage pupils achieving level 5 or above	
	Faith schools	*Other maintained schools*
English	31	24
Maths	35	28
Science	52	44
Reading	49	39
Writing	18	14
Reading and writing	16	12
Reading, writing and maths	11	8

Note:
Only LA maintained schools whose results are published in the Achievement and Attainment Tables are included in this analysis.

Mr. Gibb: To ask the Secretary of State for Education and Skills what proportion of 11 year olds in receipt of free school meals attending *(a)* faith schools and *(b)* other maintained schools achieved (i) level 4 and (ii) level 5 in (A) English, (B) mathematics, (C) science, (D) reading, (E) writing, (F) reading and writing and (G) reading, writing and mathematics in each year since 1996. [52559]

Jacqui Smith: The information requested is not readily available and can be obtained only at disproportionate cost. Figures for 2005 have been provided as follows:

	Percentage pupils in receipt of FSM achieving level 4 or above	
	Faith schools	*Other maintained schools*
English	67	59
Maths	62	55
Science	77	71
Reading	75	67
Writing	50	43
Reading and writing	48	41
Reading, writing and maths	41	34

	Percentage pupils in receipt of FSM achieving level 5	
	Faith schools	*Other maintained schools*
English	14	10
Maths	16	13
Science	29	25
Reading	26	20
Writing	8	6
Reading and writing	6	5
Reading, writing and maths	4	3

Notes:
1. Only LA maintained schools whose results are published in the Achievement and Attainment Tables are included in this analysis.
2. The free school meal information is gathered through the Pupil Level Annual School Census (PLASC) in January 2005.

School Sport

Dr. Stoate: To ask the Secretary of State for Education and Skills what steps her Department is taking to ensure that sufficient time is made available for high quality physical education in schools. [55227]

Jacqui Smith: The Department for Education and Skills and the Department for Culture Media and Sport are jointly implementing the national PE, School Sport and Club Links strategy in England. In the five years to 2008 over £1.5 billion is being invested (including £686 million lottery funding) to implement the strategy.

The strategy is delivering an ambitious public service agreement target to increase the percentage of five to 16-year-olds who spend a minimum of two hours a week on high quality PE and school sport within and beyond the curriculum to 75 per cent. by 2006 and then 85 per cent. by 2008. The long-term ambition, by 2010, is to offer all children at least four hours of sport every week.

Spearheading this strategy is the creation of a national PE/sports infrastructure, by establishing a network of Sports Colleges and School Sport Partnerships (families of schools which work together). There are currently 411 live partnerships incorporating 80 per cent. of schools in England. The 2004/05 school sport survey results found that overall, 69 per cent. of pupils within a School Sport Partnership were participating in at least two hours of high quality PE and school sport a week. In 2003/04 this figure was 62 per cent.

School Staff (Child Protection)

Bob Spink: To ask the Secretary of State for Education and Skills whether it is her policy to inform parents at the school involved when teachers are found to have indecent pictures of children on their computers. [48543]

Ruth Kelly *[holding answer 7 February 2006]*: The Department for Education and Skills expects employers to notify its List 99 team and the police as soon as possible after such an offence came to light. Any teacher convicted of this offence would be automatically barred.

It is not the Department's policy to notify parents in such circumstances. This would be a decision for the governing body of the school.

Bob Spink: To ask the Secretary of State for Education and Skills whether it is her policy to issue a caution to teachers found to be breaking the law by having indecent pictures of children on their computers in exchange for them resigning; and if she will make a statement. [48545]

Ruth Kelly *[holding answer 7 February 2006]*: Formal cautions are the responsibility of the police.

School Statistics

Mr. Gibb: To ask the Secretary of State for Education and Skills (1) at what stage the data quality issues affecting the Statistics of Education: School workforce in England statistical release were detected; what the data quality issues are; and whether they have affected previous releases on the school workforce; [47227]

(2) when she expects the final version of the Statistics of Education: School Workforce in England volume to be completed. [47228]

Jacqui Smith: This annual volume brings together a range of data from various sources. A potential problem with one of the sources was found in January 2005 and since then analysis has been carried out to identify the underlying cause and to explore potential solutions. This analysis is continuing and this interim version of the volume was released in January so as not to hold up the release of the majority of the tables, which are unaffected. As a national statistics publication, the content and the timing of the release are determined by the Department's head of profession for statistics and are not influenced by Ministers.

The problem relates to the way that members of the leadership group are identified.

Further work is required, but it is now clear that a number of head teachers have been mis-recorded as either deputy or assistant heads.

The information in question is based on service details from the Teachers Pension Scheme. This is maintained primarily for pension administration purposes but is also used for statistical purposes. The grade issue does not affect pension administration.

The on-going analysis shows that the problem appears to relate to the introduction of the leadership pay spine in September 2000. Consequently, some tables within previous editions of the volume are affected. A note explaining how each table is affected has been added as an annex to the explanatory notes on the Research and Statistics Gateway[1]. Statistical first releases on the school workforce don't use data from the pension scheme and are not affected in any way.

Further analysis is being carried out during February with a view to finalising the volume in March. If possible, updated or amended tables will be included. If the further work indicates that the problem is likely to take longer to resolve, any possible additions or amendments will be released on the Research and Statistics Gateway, alongside the volume, as soon as possible.

[1] The Research and Statistics Gateway is the web portal that provides access to all DfES statistics. It can be found at the following address:

http://www.dfes.gov.uk/rsgateway/

Sex Offenders

Mr. Rob Wilson: To ask the Secretary of State for Education and Skills whether registered sex offenders have been approved by her Department to work in Reading local education authority schools. [45510]

Ruth Kelly: My Department does not approve people to work in schools.

My statement, and the accompanying report, of 19 January set out clearly the Government's analysis of, and response to, issues concerning child protection and List 99, together with the action we are currently taking.

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills whether registered sex offenders have been approved by her Department to work in Coventry local education authority schools. [46166]

Ruth Kelly: My Department does not 'approve' individuals to work in schools. My statement, and the accompanying report, of 19 January set out clearly the Government's analysis of, and response to, issues concerning child protection and List 99, together with the action we are currently taking.

Teaching Assistants

Mr. Clegg: To ask the Secretary of State for Education and Skills how many teaching assistants have *(a)* been dismissed and *(b)* left primary schools in Sheffield since 2001; and what the reasons for the dismissal or departure were in each case. [55383]

Jacqui Smith *[holding answer 2 March 2006]*: The information requested is not collected centrally.

Traveller Children (West Lancashire)

Rosie Cooper: To ask the Secretary of State for Education and Skills what her policy is on education provision for Traveller children in West Lancashire. [52784]

Jacqui Smith: We are concerned that Gypsy, Roma and Traveller pupils are amongst the lowest achieving in our schools. In 2003 the Government launched a national strategy to tackle the underachievement of minority ethnic pupils. This included a range of initiatives aimed at supporting Gypsy, Roma and Traveller young people, including a national pilot project testing strategies to improve attendance and raise attainment.

The findings from this pilot have informed the development of a national programme of work to support local authorities and schools with large numbers of Gypsy, Roma and Traveller pupils to better

meet their needs. This will be launched in April 2006 and follows up a commitment we made in the schools White Paper.

Truancy

Mr. Gauke: To ask the Secretary of State for Education and Skills what the cost has been of her Department's campaigns designed to reduce truancy since 1997. [52029]

John Smith: "Truancy" is one of several reasons why a child may be absent from school without authorisation. My Department has spent the following on measures aimed solely at reducing absence from schools:

£11.25 million to help 530 secondary schools which had higher than average rates of unauthorised absence to purchase electronic registration systems;

£0.8 million on advisers working within the National Strategies to provide support to local authorities on their attendance strategies;

£0.3 million on eight advisers seconded from local authorities to the Department to work with 60 local authorities with high levels of unauthorised absence; and

£0.2 million on events for local authorities to share effective practice on attendance management.

In addition to these specific measures my Department has funded other initiatives such as the Behaviour Improvement Programme which have had, as part of their overall objectives, the reduction of absence and truancy.

Trust Schools

Mr. Marsden: To ask the Secretary of State for Education and Skills what discussions she and her officials have had with universities in the north west of England on their potential involvement in proposed trust schools. [54006]

Jacqui Smith: Ministers and Officials have met a wide variety of schools and organisations, including some higher education institutions in the North West, to explore interest and discuss ideas for how the trust school model might be developed. We do not hold a comprehensive list of every organisation that has expressed interest or asked for information about forming a trust to support a school. I have placed in the Library of the House a list of a number of those organisations with whom we have discussed trust schools since publication of the White Paper. We are engaged in early discussions with a number of other organisations, including some hgher education ienstitutions in the North West and will release information about them once they have agreed to be involved in a pathfinder (except in cases where release might prejudice discussions with stakeholders in the project) or if they have agreed to be publicly named as working with the Government to develop the trust school model.

Lynne Jones: To ask the Secretary of State for Education and Skills what criteria she will set to determine who will be able to form a trust school; and if she will make a statement. [55241]

Jacqui Smith: It will be for individual school governing bodies to decide, following consultation with parents and other stakeholders, whether they want to acquire a Trust and choose whom they want to work with to support them. However there will be safeguards. All Trusts must be charities and the consultation will need to set out who the members of the charity will be. Local Authorities will be able to refer plans to acquire a Trust to the Schools Adjudicator if it is clear the school has not consulted properly, or if they are concerned that the acquisition of the trust would have a negative impact on school standards.

Certain categories of people will not be allowed to be involved in a trust. These will include those disqualified under company or charity law and those who have been disqualified from working with children and young people. If enacted, the Education and Inspections Bill will also put into place other safeguards. It would give the Secretary of State the power to make regulations prescribing requirements as to persons to be disqualified from acting as charity Trustees. In addition, it would give the Secretary of State a reserve power, in prescribed cases, to remove any charity Trustee, even if the person is not otherwise disqualified, and to appoint charity Trustees.

Work Programmes

Mr. Hayes: To ask the Secretary of State for Education and Skills what the *(a)* current work programme and *(b)* funding for 2005–06 is for (i) the Adult Learning Inspectorate, (ii) Partnership for Schools, (iii) National College of School Leadership, (iv) the Learning and Skills Council, (v) the Children and Family Court Advisory and Support Services, (vi) the British Educational Communications and Technology Agency, (vii) the General Teaching Council and (viii) the Office for Fair Access. [53351]

Bill Rammell: Each NDPB's plans for the current year are set out in its corporate plan or annual statement of priorities. I have arranged for copies of the relevant documents to be placed in the House of Commons Library. Table 1 lists the amount of funding given to each organisation.

Table 1: Budgets in 2005–06

NDPB	*£ million*
Adult Learning inspectorate	26.7
Partnership for Schools	5.7
National College for School Leadership	86.2
Learning and Skills Council	10,175

Written Answers to Questions

Tuesday 7 March 2006

HEALTH

Oxygen Service

14. **Andrew Rosindell:** To ask the Secretary of State for Health if she will make a statement on the operation of the Home Oxygen Service. [56304]

Jane Kennedy: I refer the hon. Member to the reply I gave the hon. Member for Romsey (Sandra Gidley) on 7 March 2006.

Private Finance Initiative

18. **Simon Hughes:** To ask the Secretary of State for Health if she will make a statement on the use of private finance initiative projects in the NHS. [56310]

Jane Kennedy: PFI has enabled the NHS to build 79 new hospital schemes since 1997. We remain committed to the continued use of PFI. In order to ensure that future schemes continue to be locally affordable and are consistent with the principles outlined in the recent White Paper, 'Our health, our care, our say: a new direction for community services', we have asked all trusts with planned schemes to reconfirm their proposals.

Patient Violence

19. **Jonathan Shaw:** To ask the Secretary of State for Health what steps she is taking to protect NHS staff from patient violence. [56311]

Ms Rosie Winterton: The NHS Security Management Service (NHS SMS) has developed a range of both proactive and reactive initiatives to tackle violence and aggression against staff.

A network of local specialists has been put in place, with the professional skills to tackle this problem, supported nationally by the NHS SMS. A national syllabus for conflict resolution training has been developed to ensure NHS front-line staff are given the skills required to confidently and lawfully de-escalate and manage potentially violent situations.

A new national reporting system for physical assaults has been introduced and the first ever accurate figures for the number of assaults on NHS staff. The NHS SMS is also ensuring that effective sanctions are applied to those who attack NHS staff by providing highly effective legal advice, guidance and support to NHS bodies. Figures released in August 2005 show a 15-fold increase in the number of prosecutions against those who physically assault NHS staff.

Accident and Emergency Services

20. **Mr. Malik:** To ask the Secretary of State for Health what the average patient wait in accident and emergency departments was in *(a)* the latest period for which figures are available and *(b)* 2003; and if she will make a statement. [56312]

Jane Kennedy: Data are not collected on average waiting times. Information is collected on the number and percentage of patients who were seen, diagnosed and treated within four hours of arrival at accident and emergency departments. Latest published figures show that performance was 98.2 per cent. for October to December 2005, compared with 90.8 per cent. for this period in 2003.

Herceptin

22. **Mr. Liddell-Grainger:** To ask the Secretary of State for Health how many primary care trusts do not offer Herceptin for the treatment of late stage HER2 breast cancers. [56314]

Ms Rosie Winterton: In 2004, the National Cancer Director published a report which confirmed considerable variations in the usage of cancer drugs approved by NICE, including Herceptin.

Action plans have been developed to respond to these findings, and an update will be published this year to establish if variations have now been reduced.

Agenda for Change

Sarah Teather: To ask the Secretary of State for Health what the cost of Agenda for Change has been since 2004, including additional salary costs, the cost of administering the programme and the cost of the appeal system *(a)* in total and *(b)* as a proportion of the annual NHS salary budget for financial year 2004–05; and whether she has made an estimate of the total final cost of implementing Agenda for Change on the same basis. [50548]

Mr. Byrne: Agenda for change is estimated to have cost between £520 million and £610 million in 2004–05, that is 2.3 per cent. to 2.6 per cent. of the estimated pay bill in 2004–05 for staff covered by agenda for change. The figures include funding for the early implementer sites in that year. The range reflects uncertainty over the indirect costs of employing additional staff to cover changes to leave and hours.

The planned investment in agenda for change is due to rise to £1,780 million by 2007–08. This figure does not take account of benefits, including the benefits arising from simplification of administration compared to the more complex pay arrangements previously in place.

Anabolic Steroids

Mrs. James: To ask the Secretary of State for Health what steps are being taken to tackle misuse of anabolic steroids. [38851]

Caroline Flint: The Department recognises the harms associated with the misuse of anabolic steroids.

FRANK, the major cross Government initiative to provide advice to young people in relation to drug misuse includes information on the harms associated with the misuse of anabolic steroids.

The harmful short and long-term effects of anabolic steroid use are also described in the most recent version of the Department's publication, "Dangerousness of drugs" (2003).

In addition, to restrict access to them, anabolic steroids are only available via prescription.

Needles and syringe exchange services are also available to provide harm reduction paraphernalia for those who are not yet ready to stop using and who are otherwise at risk of blood borne virus infection (HIV, hepatitis B and C) if they share injecting equipment.

Car Parking Charges

Mrs. Hodgson: To ask the Secretary of State for Health what discussions she has had regarding guidance issued to *(a)* NHS trusts and *(b)* other NHS organisations on charging for car parking space for patients requiring (i) extended periods of stay in and (ii) repeated visits to hospitals. [54159]

Mr. Byrne: Guidance advising on a range of factors to be considered when implementing car-parking charges was last issued to the national health service in 1996. It remains current. It is a matter for individual NHS bodies to decide whether or not to charge for car parking, and the level of charges, considering local circumstances.

Care Definitions

Mr. Keetch: To ask the Secretary of State for Health what definition she uses of *(a)* emergency and *(b)* routine care; and how each is applied to the treatment received by unregistered NHS patients. [38917]

Ms Rosie Winterton: A primary care trust (PCT) may make arrangements with any dentist whose name is included in its dental list for the provision of treatment in urgent cases. The National Health Service (General Dental Services) Regulations 1992 define an urgent case as any circumstance in which, in the opinion of the dentist, a patient needs immediate treatment for an acute condition.

PCTs have a duty under section 16CA(1) of the National Health Service Act 1977 to provide dental services to the extent considered necessary to meet all reasonable requirements in their area, including arrangements for both urgent and routine care.

Carers

Dr. Francis: To ask the Secretary of State for Health what assessment she has made of the impact of the Carers Equal Opportunities Act 2004 on the number of unpaid carers returning to *(a)* work and *(b)* training; and if she will make a statement. [55195]

Mr. Byrne: No assessment has been made centrally. The Department has issued guidance which makes it clear that, under the Carers (Equal Opportunities) Act 2004, a carer's assessment must include a consideration of whether the carer works or wishes to work, or is undertaking or wishes to undertake any educational training. It is for local authorities to ensure that they include these considerations in their assessment.

Children Leaving Care

Ed Balls: To ask the Secretary of State for Health what percentage of children leaving care in Wakefield district and Normanton constituency in 2005 were registered at the point they left care with *(a)* a doctor, *(b)* a dentist and *(c)* an optician in each of the last five years. [52719]

Mr. Byrne: The information requested is not collected centrally.

Correspondence

Keith Vaz: To ask the Secretary of State for Health what plans her Department has to correspond electronically with *(a)* hon. Members and *(b)* members of the public. [52693]

Mr. Byrne: We have no current plans to correspond electronically with hon. Members. We have an email service for members of the public which is accessible through the Department's website at dhemail@dh.gsi.gov.uk.

Dementia

Keith Vaz: To ask the Secretary of State for Health how much her Department has allocated for drugs for the treatment of Alzheimer's disease and senile dementia in each year from 1997 to 2005 in *(a)* Leicester and *(b)* England. [50443]

Mr. Byrne: This information requested is not held centrally.

Dentistry

Mr. Fabian Hamilton: To ask the Secretary of State for Health if she will make it her policy that all dentists trained in the UK should have to participate in the provision of NHS dental services for a minimum period of time. [51845]

Ms Rosie Winterton: Before they may practise independently in the national health service, newly qualified dental graduates are required to undertake one year's vocational training in a dental practice under the supervision of a suitably experienced general dental practitioner. It is the Department's policy that these vocational trainers should have a significant commitment to the NHS.

NHS dentists already enjoy a wide range of benefits including membership of the NHS superannuation scheme and support given to their continuing professional development. The Department will continue to identify and promote good practice by primary care trusts in encouraging continued commitment to the NHS.

Keith Vaz: To ask the Secretary of State for Health how many NHS dentists, excluding orthodontists, have been available for dental students to work for during their compulsory work experience year in *(a)* Leicester, *(b)* Surrey and *(c)* England in each year since 1997. [49585]

Ms Rosie Winterton: Newly qualified dental graduates are required to undertake one year's vocational training before they may practise independently in the National Health Service. These vocational dental practitioners (VDPs), none of whom

would have started specialist training in orthodontics at this stage, undergo the training in approved vocational training dental practices distributed across the country.

In 2005, there were 14 training places in the Leicester area, 24 in Surrey and 624 in England as a whole. In 2005, 598 VDPs were appointed to these vocational training practices including 14 in the Leicester area. Information for earlier years is not held centrally. Given that the number of VDPs is largely determined by the number of dental undergraduates and there had been no significant increase in admissions to dental schools until we funded a major expansion from autumn 2005, it may, however, be assumed that these figures have remained fairly constant since 1997.

Julia Goldsworthy: To ask the Secretary of State for Health how many vocational dental trainees have taken up places in the general dental service in 2005. [31446]

Ms Rosie Winterton: In 2005, 598 dentists, most of whom were newly qualified graduates, were placed as vocational dental practitioners (VDPs) in dental practices within the vocational training scheme. It is our policy that practices which take VDPs should be making a significant commitment to the national health service. We do not hold information centrally on where VDPs go on to work, but in general, recently qualified dentists tend to work predominantly with NHS patients before they have the option of undertaking much private practice.

David Taylor: To ask the Secretary of State for Health what the waiting time target is for NHS out-patients requiring dental work that can only be carried out in hospital. [54825]

Ms Rosie Winterton *[holding answer 2 March 2006]:* From January 2006, no patient should expect to wait longer than 13 weeks for a first out-patient appointment with a consultant, following referral by a general medical practitioner or general dental practitioner. This applies equally to dental services and other hospital services.

Departmental Information Leaflets

Steve Webb: To ask the Secretary of State for Health what the cost of printing and distributing information leaflets produced by her Department was in each of the last five years. [51913]

Mr. Byrne: Between 1 October 2004 and 31 September 2005, the Department produced 697 publications. The cost of producing these including design, typesetting and print services totalled £6,781,780.

For all other printed publications produced prior to 1 October 2004, the Department has no central record of this information and could not obtain these without incurring disproportionate cost.

Digital Hearing Aids

Annette Brooke: To ask the Secretary of State for Health what the average waiting time for people to receive digital hearing aids in England was in 2005; and if she will make a statement. [56313]

Jane Kennedy: The information requested is not collected centrally. It is for primary care trusts to ensure their local population benefits from modernised hearing aid services.

Miss Kirkbride: To ask the Secretary of State for Health what the target waiting time is for existing NHS hearing aid users to be upgraded to digital hearing aids. [52026]

Mr. Byrne: It is for primary care trusts to plan and commission appropriate services for their local population including those who require digital hearing aids.

There is no specific target for replacing analogue hearing aids. This should be done as part of the routine maintenance programme for individuals based on their clinical need.

Dr R Hensman

Dr. Iddon: To ask the Secretary of State for Health when she expects to resolve the complaint made to her Department from the hon. Member for Bolton South East and the right hon. Member for Holborn and St. Pancras (Frank Dobson) regarding the way in which D R R Hensman and his patients were treated by the NHS. [33912]

Jane Kennedy: This is a confidential matter and I will write to the hon. Member about it.

Dysfluency

Mr. Clappison: To ask the Secretary of State for Health what assessment she has made of the provision of NHS services for children who stammer; and what plans she has to provide further services to deal with dysfluency. [52751]

Mr. Byrne: No assessment has been carried out centrally. It is for primary care trusts in partnership with strategic health authorities, local authorities and other local stakeholders to determine how best to use their funds to meet national and local priorities for improving health, tackling health inequalities and modernising services. This process provides the means for addressing local needs within the health community including the provision of services for children with dysfluency.

Speech and language therapists treat children with dysfluency. We have increased the number of speech and language therapists employed in the national health service by 34.6 per cent. since 1997, and the numbers of people in training for this profession by 62 per cent. since 1999–2000.

Mr. Clappison: To ask the Secretary of State for Health what guidance is given to health visitors concerning the detection and treatment of dysfluency in young children. [52752]

Mr. Byrne: No guidance is given centrally. Health visitors are free to make decisions about the services and care they provide. This will be matched with accountability for individual professional judgment and the use of best available evidence in detecting dysfluency in young children. They will then refer the child to an appropriate healthcare professional, such as a speech and language therapist, for treatment.

External Contractors (Bedfordshire and Hertfordshire)

Mrs. Dorries: To ask the Secretary of State for Health what external contractors were used by *(a)* Bedfordshire Heartlands NHS primary care trust, *(b)* Bedfordshire and Hertfordshire NHS strategic health authority and *(c)* Bedford Hospital NHS Trust in the last period for which figures are available; what the costs of using these contractors were in that year; and if she will make a statement. [52141]

Ms Rosie Winterton: The details of the expenditure at Bedford Hospitals Trust on contractors is shown in the table.

	Expenditure (£)
2001–02	197,000
2002–03	244,000
2003–04	202,000
2004–05	284,000
2005–06	241,000

Bedfordshire Heartlands primary care trust costs for KPMG in 2005–06 and Audit Commission were funded by the Department.

The names of the external contractors are commercially confidential.

Health Care

Mr. Sheerman: To ask the Secretary of State for Health what steps her Department has taken to raise awareness of elder abuse. [53864]

Mr. Byrne: To minimise abuse and neglect of older people, the Department has been active in promoting better and more consistent standards of care through the publication and implementation of the national service framework for older people and the introduction of national minimum standards (NMS) for a range of services provided to older people in their own homes or in care settings. Employers in regulated social care services have a statutory duty to ensure the safety of older people by training staff to prevent service users from being harmed or being placed at risk of harm.

We also expect local councils and providers of non-regulated social care to comply by "No Secrets", a statutory guide for developing a multi-agency framework for prevention and investigation of abuse to vulnerable adults. "No Secrets", jointly published by the Department and the Home Office in 2000, provides a complete definition of abuse and a framework for councils to work with the police, the national health service and regulators to tackle and prevent abuse occurring. It encourages councils to publicise their adult protection procedures so that all older people are aware of how to seek help if needed. "No Secrets" gives local councils the lead for development of adult protection committees. A copy is available in the Library.

On 7 February, I announced that the General Social Care Council is undertaking a consultation on registering the social care work force. This will allow us to set standards for people seeking social care jobs and to take sanctions against people if they fall below those standards of registration. A well-trained and fully registered work force will enable older people, parents and children to have confidence in the people who care for them.

Mr. Jenkins: To ask the Secretary of State for Health how many single-handed general practitioner practices there are in *(a)* Tamworth and *(b)* Staffordshire. [53420]

Mr. Byrne: The information is not available in the format requested. The table shows the number of single handed general practitioner practices (GP) in each primary care trust (PCT) within the Shropshire and Staffordshire strategic health authority (SHA) area.

GP practices[1] for Shropshire and Staffordshire SHA, as at 30 September 2004

	Numbers (headcount)	
	All practices	*of which: Single handed*
Shropshire and Staffordshire	255	68
Burntwood, Lichfield and Tamworth PCT	24	9
Staffordshire Moorlands PCT	15	1
Newcastle-Under-Lyme PCT	19	6
Shropshire County PCT	44	-
North Stoke PCT	22	9
South Stoke PCT	34	17
Telford and Wrekin PCT	22	5
East Staffordshire PCT	19	3
Cannock Chase PCT	31	15
South Western Staffordshire PCT	25	3

[1] Figures relate to practitioners, excluding GP registrars and GP retainers, who are single handed that is—had no partners although their practice may have a GP registrar or GP retainer. This figure cannot be replicated for earlier years.

NHS Health and Social Care Information Centre General and Personal Medial Services Statistics

Hearing Tests

Mrs. Dorries: To ask the Secretary of State for Health what steps the Government are taking to reduce waiting times for *(a)* children and *(b)* adults who need hearing (i) aids and (ii) tests; and if she will make a statement. [53463]

Mr. Byrne: Several initiatives have been introduced to improve capacity to deliver audiology services for children and adults. These are the national framework contract (public private partnership) to bring in additional independent sector capacity, the development of a new degree to help to address the shortage of audiologists and the introduction of "Hearing Direct" that provides follow-up care and advice for hearing aid users who would benefit from this.

The figures on waiting times for testing and fitting hearing aids are not collected centrally. It is for primary care trusts to ensure their local population benefits from modernised hearing aid services.

High Cholesterol

Mr. Lansley: To ask the Secretary of State for Health what steps she is taking to encourage pharmacies to test cholesterol levels. [43537]

Jane Kennedy: New community pharmacy contractual arrangements provide the framework for pharmacy to make a positive contribution to tackling key health

priorities such as obesity and coronary heart disease and to improving the health of the public, including where health inequalities persist.

Some pharmacies offer blood pressure testing, cholesterol testing or a range of other screening tests. Such testing should be in accordance with relevant national screening guidelines, where they exist, and in line with local primary care trust (PCT) programmes for prevention and management of risk factors and with robust quality assurance processes.

The Department published, "Choosing Health through Pharmacy—A programme for pharmaceutical public health", in April 2005, which aims to maximise the contribution of pharmacists, their staff and the premises in which they work to improve health and reduce health inequalities. This strategy will enable pharmacists and their staff to make better use of their skills and it will open up opportunities for pharmacy to make a bigger difference to improving the health of people in England. PCTs can commission local enhanced services to meet identified health needs.

Although we do not hold details centrally on the number of pharmacists planning to offer health checks or the numbers of such checks, we have developed an assurance framework for PCTs to use in monitoring pharmacy's implementation of new contractual requirements, and also strategic tests for strategic health authorities to monitor how PCTs are using the new framework to deliver key health priorities and objectives locally.

HIV/AIDS (Hertfordshire)

Anne Main: To ask the Secretary of State for Health pursuant to the answer of 2 February 2006, *Official Report*, column 721W, on HIV/AIDS (Hertfordshire), what assessment she has made of the reasons for the trends in HIV diagnosis rates; and if she will make a statement. [50757]

Caroline Flint: The increasing number of HIV diagnoses in Bedfordshire and Hertfordshire Strategic Health Authority (SHA), from 16 diagnoses in 1997 to 247 diagnoses in 2004, is related to an increase in the number of diagnoses of HIV infections probably acquired through heterosexual contact, mainly in Africa.

In 1997, there were seven diagnoses of HIV infection in heterosexual men and women in Bedfordshire and Hertfordshire SHA, in 2004 this figure had risen to 215 diagnoses. In 1997, five of the seven diagnoses were probably acquired through heterosexual contact in Africa, rising to 186 of 215 in 2004.

This data are available on the Health Protection Agency's website at: www.hpa.org. uk/infections/topics_az/hiv_and_sti/hiv/epidemiology/hars_tables.htm.

Home Oxygen Service

Rosie Cooper: To ask the Secretary of State for Health how many complaints her Department received about the domiciliary oxygen supply service in West Lancashire in *(a)* 2004 and *(b)* 2005; and how many it has recruited in 2006. [53359]

Mr. Byrne: During 2006, the Department has not received any complaints concerning domiciliary oxygen supply services in West Lancashire. For the period December 2000 through to December 2005, information on the first two years is not held centrally and for the remaining three years could only be provided at a disproportionate cost.

Mr. Mackay: To ask the Secretary of State for Health if she will make a statement on changes to the Home Oxygen Service. [56306]

Jane Kennedy: I refer the right hon. Member to the reply I gave the hon. Member for Romsey (Sandra Gidley) on 7 March 2006.

Miss Kirkbride: To ask the Secretary of State for Health (1) what steps were taken by her Department to ensure that the companies bidding for the domiciliary oxygen contract had submitted bids adequate to cover the costs of providing the required service; [56056]

(2) whether companies awarded contracts for the supply of domiciliary oxygen *(a)* claimed additional costs, *(b)* asked for a review of the agreed contract price and *(c)* asked for extra monies to supply the service. [56065]

Jane Kennedy: All companies bidding for domiciliary oxygen service contracts submitted detailed cost schedules as part of documents required under the competitive tendering process, The assessment panel, which included members with financial expertise, assessed the schedules.

Since signing contracts, no company has claimed additional costs associated with the delivery of the new service, asked for a review of the contract price or asked for extra moneys to supply the new service.

Hospital Food

David Taylor: To ask the Secretary of State for Health what the average *(a)* daily, *(b)* monthly and *(c)* annual expenditure on patient food was for NHS hospitals serving (i) the East Midlands, (ii) Leicestershire and (iii) North West Leicestershire in the last year for which figures are available. [55975]

Ms Rosie Winterton *[holding answer 6 March 2006]:* The information requested is not collected centrally.

Hospital Services

Mr. Dismore: To ask the Secretary of State for Health if she will include Edgware Community Hospital in the directory of services for patient choice; and if she will make a statement. [45233]

Jane Kennedy: Services provided at Edgware Community Hospital are already included within the choose and book directory of services (DoS). Responsibility for loading the services delivered at Edgware Community Hospital onto the DoS lies with provider organisations rather than the Department. Once services are loaded onto the DoS, for example by a local national health service trust, they can be commissioned by primary care trusts and chosen by local patients.

Human Papillomavirus Vaccine

Sandra Gidley: To ask the Secretary of State for Health (1) if she has requested the joint committee on vaccination and immunisation to make a recommendation for the use of the human papillomavirus vaccine as a matter of priority; [54050]

(2) when the joint committee on vaccination and immunisation will make a recommendation for the use of a human papillomavirus vaccine. [54051]

Caroline Flint: The human papillomavirus vaccine is not a licensed vaccine in the United Kingdom. The joint committee on vaccination and immunisation is looking at the safety and implications of this vaccine and will be making its decision at some future point.

Institutional Care (Disabled People)

Danny Alexander: To ask the Secretary of State for Health when she will consult on the proposal for a right for people with disabilities to request not to be placed in institutional care; and if she will make a statement. [54498]

Mr. Byrne: We have already consulted on the proposal for a right for people with disabilities not to be placed in institutional care in "Independence, Well-Being and Choice: Our vision for the future of social care for adults in England".

The consultation ran between 21 March and 28 July 2005. An analysis of the consultation was published on 19 October 2005. Copies are available in the Library. Responses to the consultation were mixed and no clear view emerged.

Learning Disability Services

Mr. Paterson: To ask the Secretary of State for Health (1) what the projected out-turn against budgeted expenditure by social services departments for learning disability services is in 2005–06; [51362]

(2) what the average expenditure per head of population by social services departments on learning disability services was in each year since 1997; [51441]

(3) what the total out-turn against budgeted expenditure by social services departments in England for learning disability services was in each year since 1997. [51443]

Mr. Byrne: Data on projected out-turn and budgeted expenditure by social services departments is not collected centrally.

While the Department is responsible for establishing overall social care policy, councils have a significant degree of flexibility to manage and direct their own resources according to local priorities and the needs of the communities they represent, including people with learning disabilities. For this reason, we cannot provide a national figure for the funding provided in respect of learning disability services.

The information available is shown in the table.

£

	Gross expenditure on learning disabilities (LD)	*Gross expenditure on LD per head of population aged 18–64*
1997–98	1,324,047,000	44.55
1998–99	1,494,930,000	50.06
1999–2000	1,633,064,000	54.32
2000–01	1,751,908,000	57.87
2001–02	1,903,991,000	62.49
2002–03	2,253,481,000	73.55
2003–04[1]	2,609,441,000	84.65
2004–05[1]	2,850,224,000	91.87

[1] Includes expenditure from the supporting people grant.

Mental Health

Ed Balls: To ask the Secretary of State for Health how many trained mental health professionals are available to treat children living in *(a)* West Yorkshire, *(b)* Wakefield district and *(c)* Normanton constituency. [51603]

Mr. Byrne: The information requested is shown in the table.

Hospital, Public Health Medicine and Community Health Services: Medical staff working within the psychiatry group of specialties by specialty and organisation within West Yorkshire Strategic Health Authority—England as at 30 September 2004

Numbers (headcount)

	All staff	*Child and adolescent psychiatry*	*Forensic psychiatry*	*General psychiatry*	*Learning disabilities*	*Old age psychiatry*	*Psychotherapy*
West Yorkshire	368	23	15	232	20	71	7
of which:

MHRA

Miss Widdecombe: To ask the Secretary of State for Health what the costs of implementing the Medicines and Healthcare products Regulatory Agency's Sentinel IT system are; and what impact it has had on time spent by assessors on simple applications for marketing authorisations. [55301]

Jane Kennedy *[holding answer 2 March 2006]:* The Medicines and Healthcare products Regulatory Agency's (MHRA) Sentinel programme, began in 2002 following formal Government procurement processes. The expected life of the programme is 10 years and to date has cost around £19 million, which incorporates enhancements to the scope of the original programme. The MHRA is currently using Sentinel to handle all applications for marketing authorisations and variations, for clinical trial certificates and for import and export licences, as well as a range of internal corporate functions, and will soon extend Sentinel to pharmacovigilence, including new capabilities for signal generation.

Recently assessment approval times have lengthened, mainly due to delays in validating applications, and assessment targets are not being met in a proportion of cases although urgent cases are being processed promptly. Some technical problems were encountered when parts of the Sentinel programme were implemented, which is not unusual for a project of this complexity, but those have been or are being resolved. Positive improvements have already been achieved and more are forecast. Sentinel's development is founded in its ability to handle electronic submissions and as industry increases its use of the external portal for this purpose, the workflow will be further streamlined.

Sentinel completely revolutionises the MHRA's approach to information management and processing and will put the them in a leading position in its ability to handle electronic submissions, attract revenues from within and outside the United Kingdom and to remain a centre of excellence for medicines regulation. It will enable improved access to information to assist in the protection of public health and provide a better service to all its stakeholders.

NHS Optometry

Mr. Lancaster: To ask the Secretary of State for Health whether it is her policy that eye examinations will continue to be provided under the NHS under general ophthalmic services. [56883]

Ms Rosie Winterton: The national health service fund sight tests for eligible people which are carried out in accordance with the Sight Testing (Examination and Prescription) (No. 2) Regulations 1989. This includes external and intra-ocular examinations of the eye, and such additional examinations as appear to be necessary. We plan to continue providing NHS funded sight tests to all currently eligible people.

NHS Staff

Dr. Cable: To ask the Secretary of State for Health (1) how much was spent on recruiting *(a)* nurses and *(b)* consultants from abroad in each (i) strategic health authority and (ii) Government office region in the last 12 months for which figures are available, broken down by specialism; [53566]

(2) how many *(a)* nurses and *(b)* consultants, broken down by specialism, were recruited from abroad in each (i) strategic health authority and (ii) government office region in the last 12 months for which data is available; and what percentage of the total employed in each category these figures represent. [53567]

Mr. Byrne: Details of the amount spent on recruiting nurses and consultants from abroad and the numbers recruited, broken down by specialism in each strategic health authority and Government office region are not collected centrally.

Parliamentary Questions

Mr. Andrew Turner: To ask the Secretary of State for Health when she will reply to question 45821, tabled on 23 January, by the hon. Member for the Isle of Wight. [51718]

Mr. Byrne: A reply was given on 23 February 2006, *Official Report*, column 489W.

Patientline

Helen Jones: To ask the Secretary of State for Health (1) if she will examine the charges made by Patientline for telephone calls to and from hospital patients; [55610]

(2) what representations she has received on the cost of telephone calls provided by Patientline for hospital patients. [55611]

Jane Kennedy *[holding answer 2 March 2006]:* I refer the right hon. Member to the written ministerial statement made on 19 January 2006, *Official Report*, column 33WS.

Helen Jones: To ask the Secretary of State for Health what guidance has been issued to hospital trusts on charging patients for *(a)* telephone calls and *(b)* television viewing. [55612]

Jane Kennedy *[holding answer 2 March 2006]:* In order to make this service available, a tender exercise was undertaken and a number of companies were licensed to provide these services to the national health service.

The licence documentation contains guidance on acceptable charging strategies within the NHS.

Helen Jones: To ask the Secretary of State for Health how many acute trusts have contracts with Patientline, broken down by region. [55899]

Jane Kennedy: Patientline currently has contracts to supply bedside televisions and telephones in 157 hospitals in 102 national health service trusts in England.

The contracts won by region are shown in the table.

Region	*Number of trusts contracted*
Eastern	9
London	20
Midlands	18

Region	Number of trusts contracted
Northern	30
Southern	15
South East	10
Total	102

Predictive Diallers

John Hemming: To ask the Secretary of State for Health pursuant to the answer of 30 January 2006, *Official Report*, column 187W, on predictive diallers, whether any public body for which her Department is responsible uses predictive dialling. [52318]

Mr. Byrne: The information requested could be provided only at disproportionate cost.

Prescription Charges

Mr. Hollobone: To ask the Secretary of State for Health what part of her Department is responsible for establishing if a prescription charge exemption has been claimed incorrectly and for imposing appropriate penalties. [55694]

Jane Kennedy *[holding answer 3 March 2006]:* Since 1 April 2005, individual primary care trusts have had the responsibility for establishing whether a prescription charge has been claimed incorrectly and for imposing a penalty charge where this is deemed to be appropriate.

Prisoners

Tim Loughton: To ask the Secretary of State for Health what treatment and care is offered to prisoners with learning disabilities. [47842]

Ms Rosie Winterton: The assessment that prisoners receive on first reception into prison will provide an initial opportunity to identify those who might have a learning disability. Any follow up action will depend on the needs of the particular prisoner. From April 2006, all primary care trusts, in conjunction with the prison in their area, will be responsible for commissioning primary care services according to the particular needs of the prison population. Such arrangements should help to improve the range of treatment and care available to prisoners with learning disabilities. Prison mental health in-reach teams also have a role to play, with referral to appropriate specialists in particular cases.

Prostate Cancer

Mr. Hollobone: To ask the Secretary of State for Health when the prostate cancer advisory group is next expected to report on its new initiatives. [56591]

Ms Rosie Winterton: The report 'Making Progress on Prostate Cancer', published by the Department on behalf of the prostate cancer advisory group in November 2004, highlighted a number of future actions the group will take forward in tackling issues surrounding prostate cancer. These actions are in various states of development, and the group will consider publishing a further update report at an appropriate time.

UK Prostate Link, the national prostate cancer website highlighted in the 'Making Progress on Prostate Cancer' report, was launched on 3 November 2005 and is available on its website at: http://www.prostate-link.org.uk This is the first comprehensive online source of information of its kind, and will help prostate cancer patients, their families and health professionals to find all the information they want to know about prostate cancer. The website is being jointly funded by the Department and signatories to the Prostate Cancer Charter for Action, providing a good example of joint working between the Government and stakeholders.

Rheumatology Services

Joan Walley: To ask the Secretary of State for Health at what locations rheumatology services are available to patients in the North and South Stoke teaching primary care trust areas. [53880]

Mr. Byrne: I am advised by Shropshire and Staffordshire strategic health authority, that North and South Stoke primary care trusts commission rheumatology services from the following locations:

Queens Hospital, Burton

Derby City General Hospital, Derby

Macclesfield District General Hospital, Macclesfield

Leighton Hospital, Crewe

Mid Staffordshire District General Hospital National Health Service Trust, Stafford

Robert Jones and Agnes Hunt Orthopaedic Hospital NHS Trust, Oswestry

University Hospital of North Staffordshire NHS Trust, Stoke-on-Trent

Haywood Hospital, Stoke on Trent

School Nurses (Development)

Mr. Amess: To ask the Secretary of State for Health when her Department expects to publish an updated edition of the school nurse development pack; if she will place a copy in the Library; and if she will make a statement. [54300]

Mr. Byrne: We will be publishing this document shortly and a copy will be placed in the Library.

Sexual Health Services

Anne Milton: To ask the Secretary of State for Health what grants have been provided to help patients accessing sexual health services in Guildford. [50564]

Caroline Flint: In February 2005, individual primary care trusts (PCTs), including those covering the Guildford area were notified of their choosing health revenue allocation. A separate breakdown for genitor-urinary medicine was not given. In 2006–07, £91.5 million will be allocated to PCTs for sexual health modernisation which includes funding for chlamydia screening and contraception and abortion services and a further £111.5 million will be allocated in 2007–08. In addition, a further £15 million for capital was allocated this financial year for sexual health services and a further £25 million in 2006–07 for sexual health will be allocated.

Data on spend on sexual health services in each PCT are not collected centrally.

Social Services

Mark Hunter: To ask the Secretary of State for Health what assessment she has made of outturn against budgets for local authority social services in the 2005–06 financial year; and if she will make a statement. [52550]

Mr. Byrne: As the Department does not hold 2005–06 forecast outturn information in respect of the 150 local authorities with social services responsibilities, it is not possible to make any assessment of spend against social services' budgets for the current financial year. 2005–06 outturn data will not be available for publication until early in 2007. The most recently available outturn data, published on 2 February 2006, relates to the 2004–05 financial year.

Social Work (Recruitment)

Sandra Gidley: To ask the Secretary of State for Health how much money has been allocated for the National Social Work and Social Care recruitment drive, launched on 15 February, including the amount allocated for *(a)* national and local television, *(b)* press and *(c)* radio advertising. [54043]

Mr. Byrne: A total budget of £2.72 million was allocated to the two recruitment campaigns. The social work campaign launched on 15 February and will be followed by a campaign for social care workers commencing 6 March.

Television will be used for the social care campaign only. Total planned media costs £1.09 million.

Press advertising will support both campaigns. Total planned media costs are £570,000.

Radio advertising will also be used for both campaigns. Total planned media costs are 785,000.

The balance of the expenditure consists of production costs for the above, public relations agency costs, website development and brochure production.

Sterile Services

Mr. Oaten: To ask the Secretary of State for Health why her Department does not allow contractors bidding for the sterile service supercentres to consult directly with the trusts they wish to supply. [53184]

Jane Kennedy: These are local contracts, which are being established through a structured bidding process. Bidders are encouraged to consult freely with national health service trusts.

The only instance when they are not actively encouraged to meet NHS trusts is whilst tender documentation is issued for completion; any discussion during this period must be only to seek clarification of questions contained within the tender documentation. This is to ensure that all bidders are given an equal opportunity, treated fairly and equitably and we maintain compliance with European Union procurement guidelines.

Vandalism

David T.C. Davies: To ask the Secretary of State for Health if she will list the acts of vandalism which have been perpetrated *(a)* inside and *(b)* on the outside of her Department's buildings in the last 12 months. [49504]

Mr. Byrne: In the last 12 months, there were nil acts of vandalism perpetuated inside the Department's buildings. However, pink paint was thrown outside at one of the Department's buildings, Richmond House, causing damage to brickwork, signage and forecourt.

Waiting Lists/Times

Mr. Lansley: To ask the Secretary of State for Health pursuant to the written answer of 11 January 2006, *Official Report*, columns 725–6W, on Health Committee evidence, how many patients were waiting over *(a)* six months for in-patient treatment and *(b)* 13 weeks for out-patient treatment in each week between 4 December 2005 and the first week of January 2006. [45480]

Jane Kennedy: The data requested for the weeks in December 2005 are shown in the table. These figures include Welsh patients waiting at English hospitals, who are not covered by the English waiting time targets. As from January 2006, national figures are no longer centrally available, as weekly data are now only collected on a voluntary basis

Monthly data, published on 3 February 2006, showed that the number of inpatients waiting over six months on 31 December 2005 was 48, including 36 patients waiting at Welsh hospitals, and the number of out-patients waiting over 13 weeks was 171, including 153 patients waiting in Welsh hospitals.

This contrasts with the position in June 1997 when there were around 370,000 more patients waiting for treatment; 283,000 more in-patients waiting over six months; and 338,000 more out-patients waiting over 13 weeks.

Week ending:	*Over 6 month in-patient wait*	*Over 13 week out-patient wait*
11 December 2005	14,046	14,814
18 December 2005	10,961	14,838
25 December 2005	Data not collected	Data not collected
31 December 2005	973	2,049

Note:
Figures included Welsh patients waiting at English hospitals

Provider based weekly monitoring data

PRIME MINISTER

Meetings

Keith Vaz: To ask the Prime Minister how many meetings he has had with *(a)* representatives of UK Muslim communities and *(b)* Muslim youth groups in each of the last three years. [54622]

The Prime Minister: I have meetings with a wide range of organisations and individuals on a wide range of subjects. I have met representatives of UK Muslim communities and Muslim youth groups on a number of occasions.

Keith Vaz: To ask the Prime Minister how many meetings he has held with representatives of *(a)* Iraqi and *(b)* Afghan communities living in the UK in each of the last three years. [54623]

The Prime Minister: I have meetings with a wide range of organisations and individuals on a wide range of subjects. I have met representatives of both the Iraqi and Afghani communities living in the UK.

Special Advisers

Frank Dobson: To ask the Prime Minister (1) how much was paid to Professor Julian Le Grand during his period of employment as a Downing Street adviser; [56828]

(2) what estimate he has made of the total sum to be paid to Downing Street advisers in 2005–06. [56829]

The Prime Minister: Since 2003, the Government have published on an annual basis the names and overall cost of special advisers and the number in each payband. I refer my right hon. Friend to the written ministerial statement I made on 21 July 2005, *Official Report*, columns 158–61WS. Information on the numbers of special advisers prior to 2003 was provided at regular intervals and this information is available in the Libraries of the House.

Information on special advisers for 2005–06 will be published in the normal way once it has been completed.

Frank Dobson: To ask the Prime Minister what methods he uses to assess the value for money of the employment of Downing Street advisers *(a)* in general and *(b)* individually. [56830]

The Prime Minister: Special advisers are appointed under the terms and conditions set out in the "Model Contract for Special Advisers" and "Code of Conduct for Special Advisers". Individual posts are subject to standardised job evaluation.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Burma

John Bercow: To ask the Secretary of State for Environment, Food and Rural Affairs what is the policy of her Department regarding sourcing goods from Burma. [52221]

Mr. Morley: There are no current economic sanctions or restrictions on sourcing goods from Burma and so it would be inappropriate for my Department to set special contract terms for goods made in Burma.

Government policy on trade with Burma is to offer no support to British companies who want to trade there, informing those who inquire about trade with Burma of the grave political situation, the regime's atrocious record on human rights and record of economic mismanagement. This is in line with the common position on Burma adopted by the EU in 1996 and renewed in 2005.

As far as I am aware there is no evidence to suggest that my Department has purchased any goods from Burma recently.

As far as policy on forestry is concerned, the Government are working closely with the NGO Global Witness on how best to protect Burma's forests. Their recent report, "A Choice for China" calls for a ban on illegally logged timber. It did not, however, support a ban on all timber from Burma in recognition of the complexity of the problem. Instead, Global Witness called for timber companies not to import illegally logged timber, and for the Chinese Government to suspend importation of logs and processed timber across the China-Burma border. This is pending a review of the legality of all logging operations in Kachin state. Global Witness's work has had a significant impact in Burma, and as a result of their highlighting this problem, the State Peace and Development Council and the Chinese Government have taken steps to clamp down on the illegal trade. According to Global Witness, the destructive logging and vast timber trade on the China-Burma border have come to a near halt over the past four months although it is not clear how permanent such moves will be.

Vera Baird: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the quantity of timber imported from Burma in each of the last 10 years; and which companies are the main importers of timber into the UK from Burma over this period. [55660]

Dawn Primarolo: I have been asked to reply.

Volume of timber imports from Burma 1996–2005

	Netmass (tonnes)
1996	464
1997	214
1998	81
1999	2,899
2000	11,344
2001	6,877
2002	5,538
2003	4,776
2004	440
2005	4,176

Note:
Figures include timber and processed wood products such as plywood, but exclude made up articles of wood (in keeping with previous answers).
Source:
HM Revenue and Customs, Overseas Trade Statistics

Information on individual importers and consignments is recorded from customs documents submitted at import. For reasons of confidentiality, HM Revenue and Customs do not publish company information at the level of detail required by this question.

Carbon Dioxide Emissions

Michael Jabez Foster: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the effects on carbon dioxide emissions of increased miles travelled due to closure of *(a)* post offices, *(b)* bank branches and *(c)* local retail shops. [55017]

Mr. Morley: Neither the Department for the Environment, Food and Rural Affairs nor the Department for Transport have made these assessments. Emissions from these journey types are part of the

estimate for road transport as a whole in the UK greenhouse gas inventory, and in the UK projections of emissions.

Climate Change Communications Initiative

Mrs. Moon: To ask the Secretary of State for Environment, Food and Rural Affairs what notice was given to the National Assembly for Wales of the launch in January 2006 of the climate change communications initiative, tomorrow's climate, today's challenge; what financial input into the initiative the National Assembly was asked to provide; what percentage of that input was committed to benefit Wales; and if she will make a statement. [55518]

Mr. Morley: The climate communications initiative was launched in December 2005, and the climate challenge fund and youth competition were announced in January 2006. Officials from my Department had been in discussion in general terms with officials from the National Assembly for Wales prior to and following the announcement of the climate change communications initiative in February 2005. The indicative figure for Welsh participation in the youth competition was £5,000, equating to the inclusion of one young climate champion from Wales. Discussions on the challenge fund focused largely on the principle of participation, with an indicative contribution for the duration of the fund of the order of £300,000-£500,000 based pro-rata on population. All of the monies coming from Wales would have benefited Welsh applicants, with some allowance for administration.

Climate-proofing (Policy Delivery)

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what discussions she is holding with other Departments on climate proofing new policy delivery. [55419]

Mr. Morley: My Department has been consulting with many other Government Departments and other organisations in the development of the climate change Adaptation Policy Framework. A consultation document was issued in November 2005, and the consultation period ended on 31 January 2006. The results of this exercise will be published later this year.

The Adaptation Policy Framework is seeking to integrate adaptation to climate change into the wider policy making process so that it can be considered alongside other policy objectives and priorities.

Throughout the development of the Adaptation Policy Framework we will be seeking to continue to build on our relationships with other Departments and all regions.

Contingency Planning

Keith Vaz: To ask the Secretary of State for Environment, Food and Rural Affairs whether the Government Decontamination Service has the capacity to operate in response to chemical, biological, radiological and nuclear incidents abroad. [53358]

Mr. Morley: The Government Decontamination Service is able to support operations to remediate parts of the UK contaminated as a result of chemical, biological, radiological and nuclear incidents, regardless of the origins of the contamination.

Cryosat Mission (Global Warming)

Keith Vaz: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the role of the European Space Agency's Cryosat mission in assessing global warming; and if she will make a statement. [55683]

Mr. Morley: Cryosat 2 will make a unique contribution to understanding how Arctic sea ice is thinning due to global warming, and the extent to which the Antarctic and Greenland ice sheets are contributing to global sea level rise.

In parallel with the space-based mission there will be extensive complementary modelling and ground-based experiments to maximise the scientific return from the mission. This will lead to improved predictions of future sea-ice extent and sea-level rise.

The lead scientist for the European Space Agency's (ESA's) Cryosat mission is Professor Duncan Wingham, Director of the Natural Environment Research Council's (NERC's) Centre for Polar Observation and Modelling, based at University College, London. NERC is responsible for the UK's subscription to ESA's Earth Observation Envelope Programme, through which Cryosat is funded.

Farm Payments

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs when she expects this year's single payment will be made to farmers; and if she will make a statement. [55651]

Jim Knight *[holding answer 3 March 2006]:* I am pleased to report that the first 2005 Single Payment Scheme (SPS) payments were released from the Rural Payments Agency (RPA) on 20 February 2006. RPA is continuing in its efforts to make the bulk of payments by the end of March, and all payments are expected to be made before the 30 June regulatory deadline.

Mr. Evans: To ask the Secretary of State for Environment, Food and Rural Affairs what representations she has received on the administration of the Single Farm Payments Scheme in Lancashire. [55884]

Jim Knight *[holding answer 3 March 2006]:* The Rural Payments Agency responds to all correspondence relating to the Single Payment Scheme. As the scheme is not administered on a regional basis, it does not hold records on representations specific to Lancashire.

Farm Subsidies

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs when the first payments will be made under the Single Farm Payments scheme in North Yorkshire. [55374]

Jim Knight: I am pleased to report that the first Single Payment Scheme (SPS) payments were released from the Rural Payments Agency (RPA) on 20 February

2006. RPA is continuing in its efforts to make the bulk of payments by the end of March, and all payments are expected to be made before the 30 June 2006 regulatory deadline.

Payments are made randomly as claims are validated and not on a regional basis.

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs when the full farm payments which are due under the Single Farm Payments scheme will be made. [55375]

Jim Knight: I am pleased to report that the first Single Payment Scheme (SPS) payments were released by the Rural Payments Agency (RPA) on 20 February 2006. RPA is continuing in its efforts to make the bulk of payments by the end of March, and all payments are expected to be made before the 30 June regulatory deadline.

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what representations she has received on the administration of the Single Farm Payments Scheme in North Yorkshire. [55376]

Jim Knight: The Rural Payments Agency responds to all correspondence relating to the Single Payment Scheme. As the scheme is not administered on a regional basis, it does not hold records on representations specific to North Yorkshire.

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs whether the Government will reimburse farmers for financial loss caused by delays in the single farm payment. [56012]

Jim Knight: The payment window for the Single Payment Scheme (SPS) 2005 as set by EU legislation opens on 1 December 2005 and runs until 30 June 2006.

I am pleased to report that the first SPS payments were released by the Rural Payments Agency on 20 February 2006. The bulk of payments are expected to be complete by the end of March, and I expect all payments will be made within the regulatory payment window.

Under the circumstances it is not appropriate to pay interest.

Greenhouse Gases

Gregory Barker: To ask the Secretary of State for Environment, Food and Rural Affairs how much carbon dioxide and other greenhouse gases was emitted from water treatment and sewerage systems in 2004–05; and what assessment she has made of the trend in emissions from such sources. [55457]

Mr. Morley *[holding answer 6 March 2006]:* The main greenhouse gases emitted during the handling and treatment of sewerage are methane and nitrous oxide. Total greenhouse gas emissions from this sector were 2.0 million tonnes of carbon dioxide 2004, the most recent year for which data are available. Emissions from this sector have grown by 15 per cent. since 1990, the base year for emissions under the Kyoto Protocol. However, overall emissions of methane and nitrous oxide have fallen by 50 per cent. and 40 per cent. respectively, since 1990.

National Wildlife Crime Intelligence Unit

Lynne Featherstone: To ask the Secretary of State for Environment, Food and Rural Affairs how many members of staff were employed in the National Wildlife Crime Intelligence Unit on 1 March *(a)* 2005 and *(b)* 2006; how many are expected to be employed on 1 April 2006; and if she will make a statement. [55321]

Jim Knight: It would not be appropriate to publicise operational details about a specialist unit of this kind, but I am pleased to say that on 28 February I announced that the Government will contribute an additional £200,000 to the Unit, and that the Association of Chief Police Officers will provide a further £50,000. This will enable the Unit to expand, strengthening its role in fighting wildlife crime and in reducing the risk of diseases, such as avian influenza, entering the UK through illegal trade.

Pheasant Shooting

Mr. Roger Williams: To ask the Secretary of State for Environment, Food and Rural Affairs how many *(a)* pheasant eggs for hatching and *(b)* pheasant poults were imported from France to the UK for shooting purposes in each year since 2001. [55890]

Jim Knight: *[holding answer 6 March 2006]:* Imports of pheasant eggs are not reported separately by HM Revenue and Customs. The numbers of eggs for hatching, for all poultry other than turkeys or geese, imported from France are shown in the following table:

Poultry eggs for hatching other than turkeys or geese

	Thousand
2001	191
2002	3,372
2003	1,314
2004	1,219
2005	2,163

Imports of pheasant poults are also not recorded as a separate category but are recorded within imports of live other birds (detailed in the footnote). Information is only available on the weight and value of the birds imported. Data are not currently available for the volume of imports in 2005, as the data are still being processed. Imports from France of live other birds are shown in the following table:

	Live: Other birds[1]	
	Tonnes	*£000*
2001	0	0
2002	61	214
2003	286	908
2004	155	1,056
2005	n/a	1,421

[1] Live other birds exclude: chickens, turkeys, ducks, geese, guinea fowl, birds of prey, pigeons, parrots, parakeets, macaws, cockatoos

Private Sewers

Chris Ruane: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what assessment she has made of the effectiveness of the protocol on private sewers introduced in April 2002; [55530]

(2) what recent representations the Department has received on problems with private sewers; what response she plans to make; and whether a public consultation on tackling problems with private sewers is planned; [55531]

(3) what recent research has been undertaken by the Department to ascertain the level and nature of problems with private sewers; [55532]

(4) how many houses in each local authority area are connected to private sewers. [55533]

Mr. Morley: The Government are aware of the problems associated with private sewers.

Few records are kept of private sewers and a breakdown of how many houses in each local authority connect to private sewers is not available. It is estimated that up to 50 per cent. of properties in England and Wales connect to private sewers in one form or another. Householders are often unaware that their property is connected to a private sewer or that they are responsible for its maintenance (sometimes jointly with others) until a problem occurs.

The Government have taken action to tackle the problems associated with private sewers in two stages. The first stage is designed to prevent the creation of further private sewers. A voluntary protocol for the construction of new sewers was introduced in April 2002 which detailed a build standard to make sewers suitable for adoption by water and sewerage companies (WaSCs). A recent review of the protocol conducted on behalf of Government by WS Atkins Consultants Ltd. (Atkins) found that less than 1 per cent. of developers were adhering to it. The Government are currently considering whether the protocol should therefore be mandatory.

The second stage looks at existing private sewers. Research commissioned from Atkins formed the basis of a public consultation reviewing existing arrangements for private sewers and drains in England and Wales. The consultation sought views on a number of possible solutions to the problems they pose. The majority of respondents favoured transferring ownership of private sewers to WaSCs. The Government published their initial response to the consultation in October 2004, which summarised responses, gave the Government's preliminary views and set out the issues that needed to be addressed before a final decision is made.

Defra held a seminar in January 2005 with over 90 relevant stakeholders to agree sustainable options for transferring ownership of private sewers and lateral drains. The information gathered through discussions at the seminar will inform the Government's final decision. Further information on the seminar is available on Defra's website at: http://www.defra.gov.uk/environment/water/industry/sewers/existing/index.htm

Defra also commissioned market research to explore customers' possible views on the transfer of private sewers. A qualitative customer survey comprised 20 focus groups across England and Wales and a final report explaining the findings is available on the Defra website at: http://www.defra.gov.uk/environment/water/industry/sewers/existing/index.htm.

The Government intend to publish their decision on how to deal with existing private sewers and lateral drains in England and Wales in the next few months,, but do not rule out further consultation on implementation options should a decision be taken to transfer their ownership to WaSCs.

Regulatory Simplification

Chris McCafferty: To ask the Secretary of State for Environment, Food and Rural Affairs how many regulatory simplification proposals relating to environmental regulations were received in 2005; how such proposals are made public; and what mechanisms are in place to enable interested parties to comment on these proposals. [54668]

Mr. Morley: Since the launch of the Government's regulatory simplification initiative on 15 September 2005, DEFRA has received 20 proposals relating to environmental regulations.

There is no current requirement to make such proposals public but the Department will consult interested stakeholders before agreeing to take any simplification ideas forward.

Proposals that are taken forward by the Department will be included in updated versions of DEFRA's simplification plan. The Department's initial plan "Lifting the Burden" was published in November 2005 and contains details of 64 simplification initiatives that are taking place over the next year. Copies of the plan have been placed in the House Library or can be downloaded at

http://www.defra.gov.uk/corporate/regulat/pdf/lifting-burden.pdf

Royal Commission on Environmental Pollution

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs if she will hold a public consultation on the recommendations of the Royal Commission on Environmental Pollution. [56661]

Mr. Morley: DEFRA do not intend to hold a public consultation on the recommendations of the Royal Commission on Environmental Pollution prior to the government's response, which is being coordinated by DEFRA and will be published this summer. Any new policy initiatives resulting from the response will be developed in line with Cabinet Office guidance on holding public consultations.

Sustainable Procurement

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what advice she is offering to other Departments on sustainable procurement. [55420]

Mr. Morley: The Sustainable Procurement Task force was set up in May 2005 under the Government's Sustainable Development Strategy. The Task Force, under the chairmanship of Sir Neville Simms, is a business led group reporting jointly to DEFRA's Secretary of State and the Financial Secretary to the Treasury. The Task Force will deliver a Sustainable Procurement National Action Plan to DEFRA and HM Treasury before the end of April 2006, enabling the UK Government to bring about a step change in public

procurement such that, by 2009, it can meet the goal in the Sustainable Development Strategy of the UK being recognised as amongst the leaders in sustainable procurement across the EU.

The Task Force is addressing five key themes: international benchmarking; data and priorities; engaging with the supply base; accountability; and capacity and is building on existing and previous initiatives in sustainable procurement. These include the Market Transformation Programme; the Sustainable Procurement Group; the Quick Wins list published jointly by DEFRA and the OGC; the joint note by the OGC and DEFRA on environmental issues in purchasing; the Framework for the Government Estate, which required every Department to have published a sustainable procurement strategy by 1 December 2005; the work of the Sustainable Development Commission, Envirowise, WRAP and The Carbon Trust amongst others; the work of the Strategic Supply Chain Group; the Public Sector Food Procurement Initiative and the Catering Services Toolkit; the UK's timber procurement policy; and, most recently, the OGC's note on Social Issues in Purchasing. The UK is leading work in the EU on green public procurement under the Environmental Technologies Action Plan. The UK is a member of the OECD Steering Group on Green Public Procurement.

DEFRA is working closely with its suppliers to ensure that products, equipment and services supplied to it are from approved recognised sustainable sources; has grouped its commodities and services into categories and is implementing a category management strategy; seeks every opportunity to work collaboratively with the NAO, the OGC and other public and private sector bodies to adopt and implement sustainable best practice. Two recent examples include the cross public sector travel procurement tender and the pan Government printed paper contract. DEFRA has also published a Position Statement on DEFRA and Social Enterprise, and the OGC and Home Office have published "Think smart.think voluntary sector!"

The Department has published its Sustainable Procurement Strategy and Toolkit at:

http://www.defraweb/corporate/sdstrategy/operations/partf.htm

the PSFPI website is at:

http://www.defra.gov.uk/form/sustain/procurement/index.htm

the Central Point of Expertise on Timber (CPET) website is at:

http://www.proforest.net/cpet

and the minimum environmental products list (Quick Wins) is at:

www.mtprog.com.

The OGC website is at:

www.ogc.gov.uk

Water Abstraction (SSSIs)

Gregory Barker: To ask the Secretary of State for Environment, Food and Rural Affairs how many sites of special scientific interest are assessed as being at risk due to over-abstraction of water. [55458]

Mr. Morley *[holding answer 6 March 2006]:* In the order of 80 sites of special scientific interest (SSSIs) have been identified as at risk from a water company abstraction and are being investigated under the Asset Management programme-AMP-4. Of these 54 are within sites designated under the habitats directive or the birds directive.

Further SSSIs which may be at risk from licensed abstraction, including that from agriculture and other industries as well as water companies, are being identified by English Nature as part of its overall programme to meet the SSSI public service agreement (PSA) target. This programme is identifying he work which needs to be put in place, and by whom, to restore all SSSIs assessed as unfavourable to a recovering or favourable condition. Any further SSSIs identified as at risk from licensed abstraction will be considered with the Environment Agency for action. In parallel, the Environment Agency in consultation with English Nature, is reviewing all its consents and licences affecting SSSIs that have been designated under the habitats directive or the birds directive.

Water Supply

Dr. Kumar: To ask the Secretary of State for Environment, Food and Rural Affairs what steps her Department is taking to prevent long-term water shortages. [56123]

Mr. Morley: The Environment Agency is the statutory body with a duty to manage water resources in England and Wales. As part of the agency's management role it has both national and regional water resource strategies which set out the pressures over the next 25 years.

Water companies have statutory duties to maintain adequate supplies of water. They have 25 year water resource plans which complement the agency strategies and seek to reconcile supply with anticipated demand. This forward planning framework exists to take into account water supply infrastructure required to service significant new housing developments and the implications of climate change.

Although produced voluntarily, every five years, at present these plans will become a statutory requirement under the provisions of the Water Act 2003. My Department is currently consulting on the exercise of the new powers in respect of statutory water resource plans.

Frank Dobson: To ask the Secretary of State for Environment, Food and Rural Affairs what the reservoir capacity of each water company was at the time of privatisation; what the capacity was of the reservoirs of each company or its successor on the latest day for which figures are available; and what the amount of leakage was from the pipes of each water company *(a)* in 1995–96 and *(b)* the latest year for which figures are available. [56491]

Mr. Morley *[holding answer 6 March 2006]:* There has been very little change in reservoir capacity since privatisation in 1989. Overall there has been a balance of some small reservoirs being taken out of operation and some introduced.

The capacities quoted below are for 2006 and derived from records of reservoirs that fall within the ambit of the Reservoirs Act 1975; it therefore includes the capacity of all reservoirs that are capable of storing water in excess of 25,000 cubic metres behind any form of dam or bunding arrangements. The capacities are listed against the company that owns the reservoir: in some cases the resources of some reservoirs are shared between two or three companies.

Company	*Capacity (million litres)*
Anglian Water Services	230,000
Bournemouth and West Hampshire Water[1]	[1]300
Bristol Water	32,000
Cambridge Water	0
Dee Valley Water	1,600
Dwr Cymru (Welsh Water)	460,000
Essex and Suffolk Water	54,000
Folkestone and Dover Water Services	45
Mid Kent Water	0
Northumbrian Water	370,000
Portsmouth Water	0
Severn Trent Water	270,000
South East Water	9,000
South Staffordshire Water	21,000
South West Water Services	119,000
Southern Water Services	43,000
Sutton and East Surrey Water	10,000
Tendring Hundred Water Services	2,200
Thames Water	160,000
Three Valleys Water	3,300
United Utilities	300,000
Wessex Water Services	12,000
Yorkshire Water Services	190,000

[1] This was zero in 1989.

The Director General of Water Services publishes leakage figures annually in the "Security of supply, leakage and the efficient use of water" reports. Total water company leakage, in megalitres per day, was reported as follows:

Company	*1995–96*	*2004–05*
Anglian Water Services	242	214
Bournemouth and West Hampshire Water	28	22
Bristol Water	66	53
Cambridge Water	16	14
Dee Valley Water	15	11
Dwr Cymru (Welsh Water)	413	226
Essex and Suffolk Water	90	67
Folkestone and Dover Water Services	13	8
Mid Kent Water	40	29
Northumbrian Water	190	155
Portsmouth Water	30	30
Severn Trent Water	632	502
South East Water	94	69
South Staffordshire Water	93	74
South West Water Services	142	83
Southern Water Services	120	92
Sutton and East Surrey Water	26	24
Tendring Hundred Water Services	6	5
Thames Water	1,110	915
Three Valleys Water	199	149
United Utilities	789	500
Wessex Water Services	133	73
Yorkshire Water Services	495	293

Mr. Soames: To ask the Secretary of State for Environment, Food and Rural Affairs what minimum *(a)* additional water supply infrastructure, *(b)* additional works to existing water supply infrastructure and *(c)* change in per capita consumption of water she expects to be required in order to enable an adequate water supply to be maintained when the Government have achieved their target for additional new dwellings in Mid Sussex by 2016; and what steps the Government are taking to ensure an adequate water supply. [56566]

Mr. Morley *[holding answer 6 March 2006]:* The Environment Agency is the statutory body with a duty to manage water resources in England and Wales. As part of the agency's management role it has both national and regional water resource strategies which set out the pressures over the next 25 years.

Water companies have statutory duties to maintain adequate supplies of water. They have 25 year water resource plans which complement the agency strategies and seek to reconcile supply with anticipated demand. The plans take account of changing trends in water consumption. This forward planning framework exists to take account of factors such as the water supply and disposal infrastructure required to service significant new housing developments.

It is for water companies to plan the investment necessary to deliver their services, including the necessary financial provision, and it is for Ofwat, in the light of companies' plans, to secure that companies carry out and are able to finance their functions.

Water Tariffs

Kerry McCarthy: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment her Department has made of applying the water affordability tariff, to be introduced in Northern Ireland in April 2007, to England and Wales. [54311]

Mr. Morley: The new affordability tariff in Northern Ireland is being introduced in response to particular circumstances which do not apply in England and Wales. A parallel cannot be drawn which might warrant extending the scheme to England.

Northern Ireland has a public sector water service and there are no household water and sewerage charges. The costs are instead met by local and national taxation. This is set to change in April 2007, when charges will be introduced for the first time. As no charges have been paid before, the Government decided to ease the transition towards full cost recovery, phasing in the charges gradually over a three-year period. The new affordability tariff in Northern Ireland will be based on income and set at a level equivalent to 3 per cent. of the single person's pension credit guarantee, as updated by Parliament each year. The status of the protection will be reviewed after three years.

The water industry in England and Wales is within the private sector and costs are met by charges to customers, a system which is long established. It is not appropriate to subsidise private water companies with taxpayers' money. Subsidies would reduce incentives for companies to improve their performance, and to be accountable to their customers.

SOLICITOR-GENERAL

Crown Prosecution Service

Ben Chapman: To ask the Solicitor-General if he will make a statement on the conduct of the Crown Prosecution Service in the trial of Mike McCartney. [55733]

The Solicitor-General: Michael McCartney was prosecuted for a single offence of sexual touching. The criteria under which the Crown Prosecution Service (CPS) decides whether to prosecute cases is first whether there is sufficient evidence for a realistic prospect of conviction, and secondly, whether it is then in the public interest to proceed. The CPS took the view, having obtained advice from independent counsel, that the requirements of both these tests were fulfilled and it was therefore right for the case to proceed.

TRANSPORT

A and E Provision (Road Signs)

Mr. Stewart Jackson: To ask the Secretary of State for Transport if he will ask the Highways Agency to develop and implement signage on trunk roads that distinguishes between NHS hospitals *(a)* with and *(b)* without accident and emergency departments, with particular reference to Edith Cavell hospital in Peterborough; and if he will make a statement. [55142]

Dr. Ladyman: The Traffic Signs Regulations and General Directions 2002 already define the permitted traffic signs on trunk roads in respect of hospitals with accident and emergency facilities and those without.

As part of a recently completed signing improvement/renewal scheme, worn out signs on the A47 trunk road in Peterborough were changed in order to bring them up to modern standards. The scheme aimed to reduce confusion, clutter and the physical size of the signs. The Highways Agency concluded that only the nearest hospital in Peterborough with accident and emergency would be signed from the trunk road.

The Edith Cavell hospital does not have accident and emergency facilities and therefore it is no longer signed from the A47 trunk road.

Representatives from the Highways Agency attended a meeting at the Edith Cavell hospital on Thursday 2 March to discuss the new signs and how visitors could be helped to find their way to the hospital.

A47 (Peterborough)

Mr. Stewart Jackson: To ask the Secretary of State for Transport what estimate he has made of the number of households in the Peterborough constituency adjacent to the A47 which are adversely affected by noise; what estimate he has made of the decibel levels concerned; and if he will make a statement on the acoustic screening on that stretch of trunk road. [55261]

Dr. Ladyman: Noise calculations were undertaken for two locations on the A47 in the vicinity of Peterborough based on noise surveys carried out in October/November 2005. The calculated roadside noise levels, obtained as part of that sift assessment, are 79dB(A) and 78dB(A) for eye bypass the castor bypass respectively.

No locations alongside the A47 were identified as sites at which known noise problems existed and thus have not been included on the list of locations meeting sift criteria announced on 22 March 1999, for which noise problems are being mitigated in conjunction with a £5 million ring-fenced budget.

Peterborough city council assisted with a study of the noise impact on residential properties at Aspley Way, Longthorpe but this has not resulted in a proposal to increase the provision of acoustic screening along this section of the A47.

Aircraft Emissions

Chris Grayling: To ask the Secretary of State for Transport what estimate he has made of the level of emissions from aircraft using UK airspace in each of the past 20 years. [52654]

Ms Buck: We do not collect data on emissions from aircraft in UK airspace.

DEFRA have recently published research in "Study on the Allocation of Emissions from International Aviation to the UK Inventory". The report is available on the DEFRA website at:

http://www.defra.gov.uk/science/Project_Data/DocumentLibrary/GA01060/GA01060_3319_FRP.pdf.

British Transport Police

Mrs. James: To ask the Secretary of State for Transport how many community support officers there are in the British Transport Police in *(a)* Swansea and *(b)* England and Wales; and if he will make a statement. [55996]

Derek Twigg: As at 2 March 2006 there are 191 British Transport Police Community Support Officers in England and Wales, none of which is presently deployed in Swansea.

Bus Services

Rosie Cooper: To ask the Secretary of State for Transport how many bus services have been *(a)* withdrawn and *(b)* added to service in (i) England and (ii) West Lancashire in each financial year since 1 April 1998. [53390]

Ms Buck: The following table shows the number of bus services added and withdrawn in the UK broken down by Traffic Area since 1 April 1998.

The data kept by the Vehicle and Operator Services Agency on registered bus services do not differentiate between West Lancashire and the rest of the North Western Traffic Area.

	1998–99		*1999–2000*		*2000–01*		*2001–02*	
	New	*Cancelled*	*New*	*Cancelled*	*New*	*Cancelled*	*New*	*Cancelled*
North Eastern Traffic Area	1,127	1,058	669	674	843	697	971	637
North Western Traffic Area	1,243	790	1,077	842	1,147	1048	933	666
West Midlands Traffic Area	525	495	398	335	482	404	347	307
Eastern Traffic Area	1,117	784	690	727	710	941	767	725
Western Traffic Area	592	394	622	2,518	520	456	568	334

Welsh Traffic Area	313	208	236	162	293	175
Total including Scotland and Wales	4,725	3,420	4,652	3,271	4,615	3,190

Grand totals

New Services: 28,084 / 34,519

Cancelled Services: 24,152 / 29,058

Car Journeys

Ian Lucas: To ask the Secretary of State for Transport what proportion of journeys in *(a)* the UK, *(b)* Wales and *(c)* Wrexham were taken by car in the last period for which figures are available. [56523]

Dr. Ladyman: According to data from the National Travel Survey, in 2004 car/van was the main mode of transport for 63 per cent. of trips by residents, of Great Britain and 70 per cent. of trips by residents of Wales. Data are not available for the UK or Wrexham.

Commercial Vehicle Licences

Mr. Paterson: To ask the Secretary of State for Transport how many vehicle licences for commercial operators were issued in each of the last five years. [55347]

Dr. Ladyman: Statistics on vehicle licences issued for commercial operators are published in the Traffic Commissioners' annual report available from the House of Commons Library or www.dft.gsi.gov.uk.

Commuter Services (Shropshire)

Daniel Kawczynski: To ask the Secretary of State for Transport what steps he is taking to encourage bus companies to provide services suitable for commuter use in Shropshire; and what plans he has to introduce more bus lanes in Shropshire. [55067]

Ms Buck: Bus services outside London are provided mainly on a commercial basis by private operators and decisions on service specifications are largely for the commercial judgement of operators. Local authorities have power to subsidise non-commercial services, but they decide which services to support. The Department is part-funding a transport study of Shrewsbury under the Transport Innovation Fund which is linked to demand management measures and will include a review of passenger transport services across the town.

Concessionary Travel

Bob Spink: To ask the Secretary of State for Transport if he will make it his policy to encourage neighbouring councils to co-operate to provide concessionary travel within a group of adjoining authorities; and if he will make a statement. [54780]

Ms Buck: We are keen for local authorities to work together to provide cross boundary, county or regional-wide schemes where that suits local circumstances. Local authorities will have discretion to work together to provide cross-boundary travel, as they do at present, based on their judgment of local needs and their overall financial priorities.

Bob Spink: To ask the Secretary of State for Transport what assessment he has made of the impact of the new concessionary travel scheme on people who need public transport to attend a hospital in an adjoining local authority; and if he will make a statement. [54781]

Ms Buck: None. Local authorities have the discretion to offer travel concessions to a hospital outside their boundary based on their judgment of local needs and circumstances and their overall financial priorities.

Departmental Energy Costs

Mrs. Villiers: To ask the Secretary of State for Transport how much was spent by his Department on *(a)* gas and *(b)* electricity in 2004–05. [51770]

Ms Buck: The Department spent £513,122 on gas and £2,166,870 on electricity in 2004–05 on the departmental estate.

Driving Standards (Commercial Vehicles)

Mr. Greg Knight: To ask the Secretary of State for Transport if he will list the *(a)* persons and *(b)* organisations consulted on plans to introduce a certificate of professional competence for drivers of commercial vehicles; whether he is still consulting thereon; when he expects to introduce firm proposals; and if he will make a statement. [55875]

Dr. Ladyman: The Driving Standards Agency (DSA) held a 12-week public consultation on the introduction of a certificate of professional competence (CPC) for professional drivers, as required by EU directive 2003/

59/EC. The consultation closed on 8 February, and DSA will shortly post the findings on its website. The directive requires legislation to be introduced by September 2006.

An indicative list of those who were invited to comment is contained in annex E of the consultation paper, which is available on DSA's website. Letters were sent to the 1,049 stakeholders on DSA's list of consultees, including bus and lorry companies, driver training organisations, local authorities and emergency services. Letters were also sent to some 834 individuals and organisations on DSA's voluntary register of large goods vehicle instructors; 168 delegated driving examiners; and the 977 training organisations which use DSA's dedicated test booking facility for commercial customers. The paper was posted on the Agency's website and publicised in DSA's trade magazine *Despatch*.

Since summer 2005, DSA has made numerous presentations across Great Britain to raise awareness of the directive. These helped to inform the content of the consultation paper.

Mr. Greg Knight: To ask the Secretary of State for Transport if he will introduce a special category under his certificate of professional competence for drivers of commercial vehicles to enable a lower level of training to be undertaken where the driver only intends to drive a historic commercial vehicle and that vehicle is not being used for commercial purposes. [55876]

Dr. Ladyman: European directive 2003/59/EC requires most professional bus, coach and lorry drivers to hold a certificate of professional competence (CPC) in addition to the relevant driving licence. Bus and coach drivers are affected from September 2008; lorry drivers from September 2009.

There are exemptions to the general requirement for bus and coach drivers to hold a CPC. One of these covers situations where drivers are not working commercially.

Fair Trade

Andrew George: To ask the Secretary of State for Transport how much and what proportion of his Department's catering budget was spent on fair trade produce in the last period for which figures are available. [49963]

Ms Buck: Where figures are available, the amount spent on fair trade produce and the proportion of the catering budget that this covers is as follows:

Government Car and Despatch Agency (GCDA)—£4,700/20 percent.

Driver and Vehicle Licensing Agency (DVLA)—£44,443/24 percent.

The GCDA data relate to the period from April 2005 to January 2006. Data in respect of the DVLA cover the period from 2004–05 and includes expenditure on fair trade produce for hospitality purposes and for purchase in staff restaurants.

Information on the proportion of the catering budget spent on fair trade produce and data on actual spend within our London HQ buildings can be provided only at disproportionate cost.

Freight Control

Mr. Hayes: To ask the Secretary of State for Transport if he will make a statement on changes to UK national control of freight following Commission Regulation 62/2006 of 23 December 2005, OJ L13 of 18 December 2005; what assessment he has made of the degree to which transfer of authority to a supranational structure has occurred; and what estimate he has made of the potential effect on costs. [53279]

Derek Twigg: The regulation is intended to improve the tracking and flow of rail freight throughout Europe. The regulation requires the European freight industry to cooperate and develop a deployment plan. There has been no transfer of authority to a supranational structure. An assessment of the life cycle cost of the system for freight is requested as part of the plan development.

Llansamlet Railway Station

Mrs. James: To ask the Secretary of State for Transport how many times the Health and Safety Executive's railway inspectorate inspectors visited Llansamlet railway station in 2004–05; and what assessment they made of the station facilities and security arrangements. [56080]

Derek Twigg: The Health and Safety Executive's Her Majesty's railway inspectorate (HMRI) made no visits to Llansamlet railway station during 2004–05.

M4

Mr. Paul Murphy: To ask the Secretary of State for Transport how many miles of motorway are under repair on the M4 between junction 13 and the Almondsbury interchange. [55831]

Dr. Ladyman: A total of 9 miles westbound and 20.5 miles eastbound of the M4 between Junction 13 and Almondsbury is currently subject to roadworks. 0.5 miles of both figures is at Almondsbury, where safety barriers are being repaired; the remainder is for the installation of electronic driver information systems.

Marine Environment

Mr. Carmichael: To ask the Secretary of State for Transport if he will place in the Library copies of the *(a)* current and *(b)* proposed new guidance for mariners on (i) Muckle Flugga, (ii) Fethaland, Shetland and (iii) Tor Ness, Hoy. [56831]

Dr. Ladyman: As regards current guidance, a mariner planning a passage through the areas indicated in the Shetland and Orkney Islands would, as required by Chapter V, Regulation 34 of the Safety of Life at Sea

(SOLAS) Convention, be expected to use the largest scale Admiralty charts of the region, supplemented by a number of nautical publications. The main publications are:

North Coast of Scotland Admiralty Sailing Directions (NP 52)—contains a wealth of information and guidance and intended to amplify that already contained on the charts;

Admiralty List of Radio Signals—in particular Volume 6.(1) which details pilot services, vessel traffic services and port operations;

Admiralty List of Lights (Volume A)—characteristics of visual aids to navigation;

Admiralty List of Tides (Volume 1)—times and heights of tides at primary and secondary ports;

Admiralty Tidal Stream Atlas (Orkney and Shetland Islands)—tidal streams and rates;

Admiralty Notices to Mariners—issued by the UK Hydrographic Office;

if carried (although not required by law), the International Maritime Organization Ships' Routeing Manual which details all routeing measures adopted by the IMO. The information contained within the manual is also reproduced, as appropriate, on relevant charts and in relevant publications.

As regards new guidance, my Department's Maritime and Coastguard Agency will publish a Marine Information Note which will advise mariners about the UK's Marine Environmental High Risk Areas (MEHRAs), to be followed in due course by a Marine Guidance Note. I shall take the earliest opportunity to place the Marine Information Note, and the subsequent Marine Guidance Note, in the House of Commons Library.

Mr. Carmichael: To ask the Secretary of State for Transport what assessment he has made of the likely impact of the new marine environmental high risk areas for *(a)* Muckle Flugga, *(b)* Fethaland, Shetland and *(c)* Tor Ness, Hoy. [56832]

Dr. Ladyman: The establishment of Marine Environmental High Risk Areas (MEHRAs) is just one of a number of measures used to protect the UK coast from possible environmental impacts of shipping in addition to existing protective measures. As a result of their identification, ships' mariners are expected to take note of MEHRAs and either to keep well clear or, where this is not practicable, to exercise an even higher degree of care than usual when passing through a MEHRA.

The shipping industry will be made aware of the location of MEHRAs by means of markings on UK Hydrographic Office charts and through Marine Guidance Notices issued by the Maritime and Coastguard Agency.

Mr. Carmichael: To ask the Secretary of State for Transport what methods he will use to assess compliance with the new guidance for mariners on marine environmental high risk areas; and after what period of time he will assess the impact of the measure. [56885]

Dr. Ladyman: Marine environmental high risks areas are not intended as a mandatory compliance measure for mariners. They have been put in place to raise public awareness of the particular environmental sensitivity of these areas.

Mariners will be expected in accordance with the Marine Guidance Note (to be issued by the Maritime and Coastguard Agency) to take note of MEHRAs and either to keep well clear or, where this is not practicable, to exercise an even higher degree of care than usual when passing through a MEHRA.

Mr. Carmichael: To ask the Secretary of State for Transport how many hours of surveillance the Maritime and Coastguard Agency has conducted in each year since 1997 as part of the attempt to prevent pollution. [56886]

Dr. Ladyman: The table shows the number of flying hours carried out for the purpose of detecting and deterring illegal marine pollution by the Maritime and Coastguard Agency's (MCA) contracted fixed wing surveillance aircraft, since 1997. Each yearly total includes 300 flying hours carried out on behalf of the Department of Trade and Industry (DTI), monitoring off-shore installation areas. This is in accordance with an extant MCA/DTI Operating Agreement.

In recent years, surveillance flights have been better targeted, with night flying hours increased. For the past two years the aerial pollution monitoring flights have been augmented by an on-going, targeted satellite surveillance program.

	Surveillance flight hours
1997	925
1998	925
1999	925
2000	900
2001	900
2002	900
2003	850
2004	805
2005	805

Mr. Carmichael: To ask the Secretary of State for Transport how many *(a)* prosecutions and *(b)* successful prosecutions for pollution at sea there have been in each year since 1997. [56887]

Dr. Ladyman: Individual harbour authorities prosecute pollution incidents within harbour authority limits, and the Department has no figures regarding the numbers of their prosecutions. Outside of those areas, the Maritime and Coastguard Agency deals with prosecutions. They have conducted the following numbers of prosecutions in respect of pollution at sea from ships under Merchant Shipping legislation:

	Number
1997	1
1998	6
1999	3
2000	2
2001	0
2002	2
2003	1
2004	1
2005	4

All of the prosecutions were successful.

The Environment Agency also has powers to undertake prosecutions for pollution at sea from land-based sources, under the Water Resources Act 1991. However, the Environment Agency database shows only two marine incidents within this period where an offender has been identified and prosecution recommended, and both of these incidents occurred in harbours.

Network Rail

Mr. Greg Knight: To ask the Secretary of State for Transport how many *(a)* ships and *(b)* boats are owned by Network Rail; at what cost; and for what purpose they are maintained. [56374]

Derek Twigg *[holding answer 6 March 2006]:* This is an operational matter for Network Rail. I have asked Network Rail to reply directly to the right hon. Member.

North-east to South Transport Links

Mrs. Hodgson: To ask the Secretary of State for Transport what steps have been taken since 2001 to improve road and rail links from the North East to the South; and what further plans there are for such links. [54153]

Ms Buck: The Secretary of State for Transport through his Department, its agencies and with partners has delivered, and continues to develop, both road and rail projects to enhance the connectivity within and beyond the North East of England.

In many cases, improvements to infrastructure elsewhere in the country will bring benefits to travellers to and from the North East. In terms of the national road network, table 1 following gives details of Highways Agency schemes in the Targeted Programme of Improvements (TPI) while table 2 relates to projects under development. These tables concentrate on north—south routes.

Table 1—targeted programme of improvements

Government office	*Targeted programme of improvements (TPI) scheme names*	*Scheme category*	*Scheme in preparation*	*Scheme on site*	*Scheme completed*	*Date entered TPI*	*Comments*
North East	A1 Willowburn—Denwick Improvement	—	—	—	Y	—	Completed March 2003
York and Humber	A1(M) Ferrybridge—Hook Moor	W	—	Y	—	—	Under construction
York and Humber	A1(M) Wetherby—Walshford	W	—	—	Y	—	Completed August 2005
East Midlands	A1 Peterborough—Blyth GSJ	J	Y	—	—	Added to TPI March 2001	—

A1 Jockey Lane Grade Separated Junction	East Midlands	Under development
A1(M)J6–8	East	Subject to regional priorities
A1 Brampton—Alconbury	East	Under development
A1—Sandy and Beeston Bypass	East	Subject to regional priorities

In respect of rail, this year the Government are spending £87 million every week to improve the railways. This commitment to our rail network is helping to bring in further substantial investment from the private sector. The Government are investing an unprecedented amount of money in the rail network to address decades of under-investment.

In terms of specific rail activity, table 3 provides details of key improvements to both infrastructure and services since 2001 and plans currently under consideration.

In addition, since 2001, over the five year life of the first Local Transport Plans the North East Local Authorities have received in excess of £500 million to invest in capital works in the region.

Table 3—rail

	Key improvements/plans
Services	Currently half-hourly service from London to North East on the East Coast Main Line but, by Dec 2007, the new franchise requires GNER to put in 2 further services from Newcastle to London on Sundays. GNER have already put in place an hourly bus link between Darlington Station and Durham Tees Valley Airport.
Infrastructure	New infrastructure at Allington Chord was put in place to alleviate a bottleneck on the ECML and increase reliability and capacity of GNER services.
In development	Capacity pressures on cross-country services between WM, NE and SW are being examined as part of the re-franchising process. Future documents that will provide a picture of rail services in the NE and a framework for options for change includes—ECML Route Utilisation Strategy (RUS)—RUS are Network Rail's examination of how to make best use of the capacity available on the route. ECML RUS currently being developed, and expected to be published later in the year.

Overground Train Services (London)

Mr. Pickles: To ask the Secretary of State for Transport what responsibility he has transferred to Transport for London for the *(a)* provision and *(b)* regulation of overground train services in London; and what plans he has to make further such transfers. [54560]

Ms Buck: Responsibility for the provision of the "Silverlink Metro" group of services will be transferred to Transport for London on 11 November 2007.

Transport for London were passed the responsibility for taking forward the East London Line Extension in November 2004 and will be responsible for passenger services operating on this route, which are expected to begin in 2009–10.

There are currently no plans to transfer further responsibilities on London rail services to Transport for London.

Parking (Peterborough)

Mr. Stewart Jackson: To ask the Secretary of State for Transport how much income was derived from parking by Peterborough city council in each year between 2002–03 and 2004–05; and how much of that income came from *(a)* charges and *(b)* penalties in each year. [55025]

Ms Buck: I refer the hon. Member to my answer of 27 February 2006, *Official Report*, column 155W. Figures for 2002–03 and 2003–04 are in the Libraries of the House.

Railways

Mr. Pickles: To ask the Secretary of State for Transport what powers Transport for London has to amend *(a)* rail fares and *(b)* rail provision on trains (i) in and (ii) entering Greater London. [54629]

Ms Buck: Transport for London has no direct powers at present to amend rail fares on trains in London or entering Greater London other than through the joint setting of Travelcard fares with the Train Operating Companies and on some defined joint rail and London Underground routes within London.

Transport for London has the ability to buy additional services or propose savings on National Rail franchised passenger services operating entirely within London, subject to affordability and network constraints. The Railways Act 2005 also allows TfL to enter into direct agreements with Train Operating Companies on minor increments to services that do not require a change to the franchise agreement.

Transport for London has no powers to amend rail provision on services entering Greater London.

Mrs. James: To ask the Secretary of State for Transport what representations he has received on the First Great Western Trains' December 2006 timetable consultation; and whether the Department intends to make a submission to the consultation. [56050]

Derek Twigg: The Department for Transport has received 290 submissions regarding First Great Western's 2006 timetable consultations. Officials will meet First Great Western management when consultation closes, to assess responses.

Mrs. James: To ask the Secretary of State for Transport if he will make a statement on the proposed termination at Cardiff of the 1515 First Great Western Trains service from London Paddington to Swansea. [56074]

Derek Twigg: Under the proposed December 2006 timetable for the Greater Western franchise, the 15.15 train from Paddington will terminate at Cardiff. The following 15.45 train will provide a Swansea arrival 26 minutes later than the present 15.15. The number of weekday trains from Paddington to Swansea will remain at 21, and the number of weekday trains from Swansea to Paddington will increase from 20 to 21.

Chris Grayling: To ask the Secretary of State for Transport when his Department first became aware of a potential bid for London and Continental Railways.[55024]

Derek Twigg: The Department received a first indication of a possible approach on 19 January 2006. The Secretary of State reported this to Parliament on 14 February 2006 when it became clear that this interest was being actively pursued.

Chris Grayling: To ask the Secretary of State for Transport how many cycles have been taken on trains in each year since 1997. [54965]

Derek Twigg: This information is not collected centrally.

Mrs. James: To ask the Secretary of State for Transport what plans there are to withdraw Pacer Unit rolling stock on Arriva Trains Wales services from Swansea. [56082]

Derek Twigg: The ATW franchise agreement has no specific requirement to replace rolling stock.

Mrs. Spelman: To ask the Secretary of State for Transport (1) what the levels of overcrowding in peak hours were on train lines on each line and franchise in the West Midlands in each year since 1996–97; [46949]

(2) what measures *(a)* the Government, *(b)* Network Rail and *(c)* the Rail Regulator uses to assess train overcrowding in (i) the West Midlands area and (ii) lines not covered by the passengers in excess of capacity measure. [46951]

Derek Twigg: Crowding is measured on those services in the West Midlands which are specified by the West Midlands Passenger Transport Executive (CENTRO) and operated by Central Trains. Central Trains count the number of passengers on each train serving Birmingham during the morning and evening peak on two occasions a year. Count data are available from 1999 onwards and the figures have been placed in the Libraries of the House.

Franchises which are not covered by the Passengers in Excess of Capacity or Passenger Transport Executive capacity regimes are under a contractual obligation to plan their timetable in such a way as to manage passenger demand and prevent overcrowding being concentrated on one route.

Network Rail is responsible for developing route utilisation strategies, which seek to balance capacity, passenger and freight demand, operational performance and cost. These strategies will then inform the development and delivery of timetables to address future passenger growth.

Road Safety

Mrs. James: To ask the Secretary of State for Transport what progress has been made to reduce *(a)* serious accidents and *(b)* speeding on motorways and dual carriageways. [56076]

Dr. Ladyman: The number of serious personal injury road accidents on motorways and other dual carriageway roads in Great Britain has decreased year on year over the last five years. Casualty figures for 2004 show a 10 per cent. reduction in the number of serious accidents on motorways and a 21 per cent. reduction in the number of serious accidents on other dual carriageway roads, compared to the 1994–98 baseline averages. This is against a background of increases of 37 per cent. and 20 per cent. respectively in the total billion vehicle kilometres travelled on these roads in 2004, compared to in 1994.

Driving in excess of the speed limit amongst car drivers on motorways and non-urban dual carriageways has remained largely constant over the last five years. In 2004, 56 per cent. of cars exceeded the speed limit on motorways, and 48 per cent. on non-urban dual carriageways.

Tackling excessive speed on all roads is a priority for the Government and we work closely with the police to ensure the safe and reliable operation of Great Britain's strategic road networks. For example, the roll out of the Highways Agency Traffic Officer service across England's motorway network is enabling more police time and resources to be used on core police activities, including speed enforcement.

Roads (Gloucestershire)

Mr. Harper: To ask the Secretary of State for Transport what his most recent assessment is of the volume of traffic flows on *(a)* the A40 between Gloucester and Highnam, *(b)* the A40 between Highnam and Huntley, *(c)* the A40 between Huntley and Ross-on-Wye, *(d)* the A48 between Highnam and Lydney, *(e)* the A48 between Lydney and Chepstow and *(f)* the A417 between Gloucester and junction 2 of the M50. [55901]

Dr. Ladyman: The average annual daily traffic flows on the lengths of trunk road specified are as follows:

A40 Gloucester (A38 Junction)-Highnam: 20,700 (2004 figure)

The latest available information for the A40 between Highnam and Ross-on-Wye is for 2002:

A40 Highnam to Huntley: 26,100

A40 Huntley to Ross-on-Wye: 15,200

The A48 between Highnam and Chepstow was de-trunked with effect from 1 July 2005 and is now the responsibility of Gloucestershire county council. However, the latest figures prior to that date are for 2003:

A48 Highnam to Lydney: 12,100

A48 Lydney to Chepstow: 7,700

The A417 between Gloucester and Junction 2 of the M50 has never been part of the trunk road network and the appropriate highway authority is Gloucestershire county council.

Rural Public Transport

Dan Norris: To ask the Secretary of State for Transport how much has been spent to improve rural public transport in *(a)* Bath and North East Somerset and *(b)* South Gloucestershire in each of the last eight years. [54401]

Ms Buck: The statistics collected by the Government on actual council spend do not identify all council expenditure on rural public transport as a discrete item.

The relevant funding allocated to Bath and North East Somerset and South Gloucestershire councils by the Department for Transport is shown in tables A and B (respectively). The revenue funding paid by the Department supplements the non-service specific financial support provided through revenue support grant. The integrated transport block can be spent on a variety of types of capital project, including related to rural public transport, according to the councils' local policies and priorities.

Table A: Bath and North East Somerset council

	1998–99	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*2003–04*	*2004–05*	*£000 2005–06*
Integrated Transport Block[1]	[2]—	[2]—	1,273	2,358	2,560	2,587	2,389	2,392
Rural Bus Subsidy Grant[3]	140	140	140	179	205	209	217	225
Rural Bus Challenge[3]	0	0	466	40	169	22	90	83

Table B: South Gloucestershire council

	1998–99	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*2003–04*	*2004–05*	*£000 2005–06*
Integrated Transport Block[1]	[2]—	[2]—	1,430	2,368	2,570	2,406	5,267	3,515
Rural Bus Subsidy Grant[3]	191	191	191	244	280	286	294	306
Rural Bus Challenge[3]	182	249	557	80	379	513	119	0

[1] Capital.
[2] In 1998–99 and 1999–2000 the equivalent of the integrated transport block was a number of separate funding streams, none of which in these areas was targeted towards rural public transport.
[3] Revenue.

Safety Cameras

Mrs. James: To ask the Secretary of State for Transport what assessment he has made of the effectiveness of static speed enforcement cameras in capturing speeding motorcyclists travelling *(a)* towards and *(b)* away from a static camera site. [56590]

Dr. Ladyman: The Department has not made an assessment of the effectiveness of static speed enforcement cameras in capturing speeding motorcyclists travelling towards and away from a static camera site. The majority of static safety cameras photograph vehicle number plates from behind and in this respect motorcycles, which only have a licence plate on the back, are treated the same as other vehicles. As motorcycles do not have a front licence plate they cannot be registered by the small number of enforcement cameras that photograph vehicles from the front.

Transport Links (England and Wales)

Mr. Paul Murphy: To ask the Secretary of State for Transport what arrangements are in place for regular contact between his Department and the National Assembly Government to discuss the improvement and maintenance of transport links between England and Wales. [55830]

Ms Buck: The Department enjoys a good working relationship with the Welsh Assembly Government and my ministerial colleagues and I are always happy to meet our counterparts from the Assembly to discuss how transport links between Wales and England might be improved and maintained.

DEFENCE

Afghanistan

Mr. Jim Cunningham: To ask the Secretary of State for Defence how many mental health professionals his Department has in place in Afghanistan to identify and treat service personnel. [55112]

Mr. Touhig *[holding answer 6 March 2006]:* The mental health care capability on Operation HERRICK in Afghanistan is currently fulfilled by Community Psychiatric Nurses (CPN) based in the UK and able to deploy at short notice.

In order to support the increasing number of troops to be deployed on Operation HERRICK later this year, two CPNs will shortly be deployed in Afghanistan, consistent with the main deployment of British troops to the region.

Argentina

Dr. Julian Lewis: To ask the Secretary of State for Defence what recent discussions there have been between *(a)* Ministers and *(b)* officials in his Department with their Argentine counterparts. [55984]

John Reid: In the past year, there have been no contacts by UK Defence Ministers with their Argentine counterparts. However, during the Defence Staff Talks held in Buenos Aires in June 2005, senior Ministry of Defence officials met with the Argentine Deputy Defence Minister, Sr. Jaime Garreta. Officials within the MOD have regular contact with Argentine Defence Attaches based in London and, equally, UK Defence Attaches based in our Embassy in Buenos Aires liaise as necessary with Argentine defence officials at various levels in support of UK interests.

Dr. Julian Lewis: To ask the Secretary of State for Defence what Royal Navy warships were in the vicinity when the British trawler John Cheek was impounded by Argentine coastguard forces; and if he will make a statement. [55985]

John Reid: No Royal Navy warships were in the immediate vicinity of the Falkland Island's registered fishing vessel John Cheek when the fishing vessel was boarded by Argentine officials. The nearest warship would have been HMS Dumbarton Castle, which was on exercise off the Falklands Islands. Additionally, HMS Endurance was alongside in the Falkland Islands at the time.

Dr. Julian Lewis: To ask the Secretary of State for Defence what recent assessment he has made of the increase in the size of the Argentine air force; and if he will make a statement. [55986]

Mr. Ingram: We have no evidence that the Argentine air force has increased in size.

Dr. Julian Lewis: To ask the Secretary of State for Defence if he will make a statement on the circumstances in which an Argentine submarine was recently detected by the Royal Navy near South Georgia. [55987]

Mr. Ingram: No Argentinean submarines have been seen or detected recently near South Georgia.

Army Deployments

Dr. Fox: To ask the Secretary of State for Defence how many tours were undertaken by each regiment of *(a)* the Royal Logistics Corps, *(b)* Royal Corps of Signals and *(c)* Corps of Royal Engineers in the last five years; what the (i) location and (ii) length of each deployment was; and what the length of time between each deployment was for each regiment. [51832]

Mr. Ingram: The location of deployments undertaken by elements of the Royal Logistics Corps (RLC), Royal Signals (R SIGNALS) and Royal Engineers (RE) over the past five years has been placed in the Library of the House. Such deployments are normally conducted at sub-unit level and below, and vary in duration and composition of personnel involved, some involving a number of short visits to theatre. While the length of time between such deployments (or 'Tour Intervals' (TI)) is not held centrally and could only be provided at disproportionate cost, in general terms the average TI's for each Regiment is as follows:

	Months
RLC	29.3
R SIGNALS	30.2
RE	24.1

Of course, it is recognised that these are "pinch point" trades where the TI's are much shorter. Future Army structures will address these concerns by investing in trade groups that have been in high demand (such as engineers and logisticians), whilst restructuring the Army to better enable Brigade level operations, including ensuring that each deployable Brigade has its own integral enablers.

Departmental Energy Costs

Mrs. Villiers: To ask the Secretary of State for Defence how much was spent by his Department on *(a)* gas and *(b)* electricity in 2004–05. [51785]

Mr. Touhig: Expenditure on gas and electricity forms part of the utilities costs, which are disclosed at Note 3 within the published departmental resource accounts. A copy of the annual report and accounts for 2004–05 is available in the Library of the House.

The following table details the total gas and electricity costs incurred by the Department in 2004–05.

	£ million
Gas	69
Electricity	114

Departmental Finance

Mr. Harper: To ask the Secretary of State for Defence (1) if he will break down the *(a)* main estimate, *(b)* winter supplementary estimate and *(c)* spring supplementary estimate Request for Resources 1 Annually Managed Expenditure provision by subhead in (i) near cash and non cash terms for financial years 1999–2000 to 2005–06; [53662]

(2) if he will break down the Request for Resources 1 Annually Managed Expenditure outturn by subhead in (i) near cash and (ii) non cash terms for financial years 1999–2000 to 2004–05; [53663]

(3) if he will break down the *(a)* main estimate, *(b)* winter supplementary estimate and *(c)* spring supplementary estimate Request for Resources 1 non-budget expenditure provision by subhead in (i) near cash and (ii) non cash terms for financial years 1999–2000 to 2005–06; [53664]

(4) if he will break down the Request for Resources 3 Annually Managed Expenditure outturn by subhead in *(a)* near cash and *(b)* non cash terms for financial years 2002–03 to 2004–05; [53665]

(5) if he will break down the Request for Resources 1 non-budget expenditure outturn by subhead in *(a)* near cash, and *(b)* non cash terms for financial years 1999–2000 to 2004–05; [53666]

(6) if he will break down the *(a)* main estimate, *(b)* winter supplementary estimate and *(c)* spring supplementary estimate Request for Resources 3 Annual Managed Expenditure provision by subhead in (i) near cash and (ii) non-cash terms for financial years 2002 to 2005. [53841]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

Gibraltar

Andrew Rosindell: To ask the Secretary of State for Defence if he will make a statement on the future of the British military base on Gibraltar. [56859]

Mr. Ingram: There are no plans to change Gibraltar's current military role, which centres on providing a forward mounting base and other facilities to support overseas operations. This role will continue to be kept under regular review.

Iraq

Dr. Gibson: To ask the Secretary of State for Defence how many British soldiers have been wounded in Iraq; how many were returned home as a result of their injuries; and whether his Department keeps records of their geographical location in the UK when they return. [36699]

Sir Menzies Campbell: To ask the Secretary of State for Defence how many British *(a)* servicemen and *(b)* women have been very seriously injured in Iraq in each month since March 2003. [39267]

Mr. Arbuthnot: To ask the Secretary of State for Defence how many service personnel in Iraq were wounded in *(a)* action and *(b)* accidents in each year since hostilities began, broken down by severity of injury. [45453]

John Reid *[Pursuant to the reply, 2 February 2006, Official Report, c. 704–5W]:* I stated that the number of military and civilian personnel medically evacuated from theatre was some 4,000. The answer should have said up to some 4,000.

Mental Health Services

Mr. Harper: To ask the Secretary of State for Defence what discussions he has had with the Department of Health to ensure that veterans have access to adequate mental health services on discharge. [55580]

Mr. Touhig: The formal framework for discussions between the two Departments is set out in a Concordat, first signed by my predecessor and his Department of Health (DH) counterpart in 2002, and revised in 2005 to include the other UK Health Authorities, which sets out how the Defence Medical Services and the NHS will work together to further their individual and mutual aims of delivering high quality healthcare to both the UK armed forces and NHS patients.

A joint MOD/DH Partnership Board, co-chaired by senior MOD and DH personnel, meets three times a year to monitor the effectiveness of the Concordat and to explore mutual areas of co-operation. I am kept informed of the work of the Partnership Board. In 2005, the Partnership Board approved revised Health Guidance for the NHS covering, among other things, arrangements for the continuing care of service personnel on retirement or discharge from the armed forces. This guidance specifies that, for a very small group who have a significant and debilitating illness at the time of medical discharge, ;it is essential that the MOD is able to engage as soon as possible with the Primary Care Trust of future residence to ensure that there is a seamless transfer of care.

The MOD has work in hand to ensure that there is a coherent response to veterans' mental health issues, co-ordinating inputs from the NHS, Health Departments throughout the UK, the Services and ex-Service organisations including the specialist mental health charity, Combat Stress. In support of these developments, MOD is also working on a number of in-Service initiatives, for example relating to the prevention and management of problems arising out of operational stress and to the need to address issues of stigma and discrimination.

Regimental Mascots

Mr. Gordon Prentice: To ask the Secretary of State for Defence what the cost of maintaining regimental *(a)* dogs, *(b)* goats and *(c)* other animal mascots was in the most recent year for which figures are available. [50244]

Mr. Ingram: I will write to the hon. Member and a copy of my letter will be placed in the Library of the House.

Veterans

Mr. Harper: To ask the Secretary of State for Defence what steps his Department takes to maintain contact with veterans following discharge from service. [55581]

Mr. Touhig: The Ministry of Defence is exceptional among employers in the extent to which it seeks to maintain contact with and offer support to those who have left service. The Veterans Agency is the focus for maintaining contact and provides a helpline service that offer advice or puts the veteran in touch with Government or non-Government agencies that can offer the assistance sought. Particular assistance is offered to those who are discharged for medical reasons and, where the condition is due to service, pensions may be payable from the War Pension Scheme and the Armed Forces Pension Scheme attributable pension; contact is maintained with the leaver to establish eligibility and to ensure that the appropriate payments are made. Those in receipt of a War Pension are provided with practical advice and assistance from the War Pensions Welfare Service.

There are wider welfare arrangements in the event of death or serious injury and the Department also works closely with ex-Service organisations to support their work in providing assistance and advice to those who have left the armed forces, particularly where they have welfare needs. Assistance is provided to eligible Service personnel to identify employment opportunities after they have left the armed forces and this can be provided up to two years after discharge. More generally, we are proud of the achievements of our veterans and take a wide range of opportunities to celebrate their successes and to commemorate their sacrifices. We seek to involve veterans closely in these events.

Warships

Mr. Rob Wilson: To ask the Secretary of State for Defence what assessment he has made of the adequacy of warship numbers to meet the tasks of the Fleet. [56445]

Mr. Ingram: The structure of the armed forces is reviewed on a continual basis; the current size and shape of the Royal Navy is adequate to meet all tasks, commitments and challenges of the foreseeable future. Our very considerable investment in new warship building will ensure this remains the case.

Widowed Service Pensioners

John Barrett: To ask the Secretary of State for Defence how many widowed service pensioners have made post-retirement marriages, broken down by constituency. [55971]

Mr. Touhig: The information is not held centrally and could be provided only at disproportionate cost.

SCOTLAND

Departmental Expenditure

Mr. Laws: To ask the Secretary of State for Scotland how much has been spent by his Department on media training in each year since 1997–98. [55214]

David Cairns: The Scotland Office was established on 1 July 1999. Since that date, the Office has incurred no expenditure on media training.

Devolution

Miss McIntosh: To ask the Secretary of State for Scotland what recent devolution issues have been considered by the Advocate General. [55205]

David Cairns: Since 24 January, 86 devolution issues have been intimated to the Advocate General.

Queen's Birthday

Anne Main: To ask the Secretary of State for Scotland what plans his Department has to celebrate Her Majesty's 80th birthday; and if he will make a statement. [54187]

David Cairns: The Scotland Office will mark Her Majesty's 80th birthday by flying the Union flag and the Saltire from its buildings in London and Edinburgh.

TRADE AND INDUSTRY

Bureau International des Poids et Mesures

Mike Penning: To ask the Secretary of State for Trade and Industry what the nature is of his Department's financial contribution to the Bureau International des Poids et Mesures; and if he will make a statement on the current programme of that institution. [52572]

Barry Gardiner: The DTI pays an annual dotation to the Bureau International des Poids et Mesures (BIPM). For 2006 this is £581,346.16 (€848,309). The sum to be paid is set according to rules annexed to the Metre Convention of 1875 and is agreed by the General Conference on Weights and Measures which meets every four years, the last meeting being in 2003.

The BIPM is the international body set up as a result of the Metre Convention with the aim of ensuring world-wide uniformity of measurements and their traceability to the International System of Units (SI). A significant part of its work is in supporting the Mutual Recognition Arrangement—which allows for the international acceptance of measurement results which are traceable to National Standards.

BIPM's scientific and technical programme provides it with the ability to carry out its role. It is published by the BIPM and is reported on annually in the Directors report. Significant features of the programme are: the responsibility to conserve and disseminate the primary standard of mass—the international prototype of the kilogram; to establish and disseminate International Atomic Time (TAI) and Co-ordinated Universal Time (UTC); and to provide unique facilities such as the International Reference System for radionuclides. Work is also carried out in a number of other aspects of metrology such as length and chemistry.

Centre of Ecology and Hydrology Research

Gregory Barker: To ask the Secretary of State for Trade and Industry what audit the Natural Environmental Research Council (NERC) has conducted of the science delivery and management expertise at the Centre of Ecology and Hydrology research sites in the last five years; and whether the findings of these comply with NERC's scientific objectives. [52047]

Barry Gardiner: The performance of each of the Natural Environment Research Council's (NERC) research and collaborative centres is evaluated in five-yearly Science and Management Audits (SMAs). SMAs scrutinise delivery over the previous five years of the science approved by NERC Council at the start of that five-year period. However, they do not examine proposals for future activity. NERC conducted an SMA of the Centre for Ecology and Hydrology (CEH) in 2004. In 2004–05 and 2005–06 it also considered CEH's proposals for the period 2005–10 and NERC's Science and Innovation Strategy Board made funding recommendations to NERC Council based on the quality of these proposals, their fit to NERC's overall science strategy, and their priority relative to other funding proposals made to NERC.

Gregory Barker: To ask the Secretary of State for Trade and Industry (1) how many Institute for Scientific Information listed scientific publications were published

in 2004–05 per scientific employee at the Centre of Ecology and Hydrology research sites; and if he will make a statement; [52049]

(2) if he will list the scientific publications from the Centre of Ecology and Hydrology research sites in the last five years; and what assessment he has made of these; [52050]

(3) how many scientific papers on ecology have been published by *(a)* universities and *(b)* the Centre for Ecology and Hydrology research facilities since 2001. [52062]

Barry Gardiner: The Government are fully committed to maintaining the quality of environmental science in the UK and provide funding to the National Environment Research Council (NERC) for this purpose. NERC's science budget allocation has doubled since 1997 to £334 million for this year. NERC is currently considering the input from a wide consultation with stakeholders on proposals on how its Centre for Ecology and Hydrology (CEH) can best contribute on a sustainable basis to UK environmental science in the future.

I have asked the Chief Executive of NERC to write to the hon. Member about his specific requests for information on publications.

Gregory Barker: To ask the Secretary of State for Trade and Industry what assessments the Natural Environment Research Council made of the Centre for Ecology and Hydrology sites not chosen for closure; and if it will make its findings public. [52060]

Barry Gardiner: The Natural Environment Research Council (NERC) asked independent consultants to conduct a strategic review of the Centre for Ecology and Hydrology (CEH) in 2005 so as to assist it in developing a business plan for the future of CEH. All the CEH sites were assessed against the same list of criteria, referred to in section 4.3 of the CEH Business Plan (available on the NERC website).

Gregory Barker: To ask the Secretary of State for Trade and Industry if the National Environment Research Council will publish table 5a of the Centre for Ecology and Hydrology business plan; and if he will make a statement. [52064]

Barry Gardiner: A copy of the Centre for Ecology and Hydrology (CEH) Business Plan is available on the Natural Environment Research Council (NERC) website (http://www.nerc.ac.uk). NERC has not published specific aspects of the business plan that are commercial-in-confidence or relate to confidential peer review.

Defence Export Services Organisation

David Taylor: To ask the Secretary of State for Trade and Industry how many meetings officials in his Department have had with their counterparts in the Defence Export Services Organisation at the Ministry of Defence since 18 March 2003. [56323]

Malcolm Wicks: The Export Control Organisation (ECO) does not routinely collate information on the meetings it holds with other Government Departments (OGDs) and I am unable therefore to provide you with the precise number of meetings ECO officials have held with their MOD/DESO colleagues since 18 March 2003.

ECO officials hold regular meetings with other Government Departments, including DESO, on a wide variety of business relating to export licence applications and export control policy.

Medical Research

Dr. Gibson: To ask the Secretary of State for Trade and Industry (1) what estimate he has made of the cost of moving the National Institute for Medical Research, Mill Hill; and what discussions he has had with the Medical Research Council on the move; [53440]

(2) when he expects the move of the National Institute for Medical Research, Mill Hill to central London to take place; and when he expects the Gateway process on the move *(a)* to start and *(b)* to finish. [53441]

Barry Gardiner: My noble Friend Lord Sainsbury of Turville has been briefed by MRC's chief executive, Professor Colin Blakemore, on MRC's plans for moving the National Institute for Medical Research (NIMR). I have asked Professor Blakemore to write to the hon. Member with information on MRC's proposals.

Migrant Workers

Mrs. James: To ask the Secretary of State for Trade and Industry what recent steps he has undertaken to promote the rights of workers among migrant workers' groups. [56178]

Mr. Sutcliffe: We are aware that migrant workers arriving in the United Kingdom to work in a range of industries may face difficulties in understanding their rights. We have offered to work with the Governments of all the new EU member states, to prepare bi-lingual "know before you go" leaflets for migrant workers seeking temporary work, giving advice on questions to ask before leaving the country and on legal protections offered to workers including details of the national minimum wage and agricultural minimum wage and the relevant helpline numbers. It is particularly important to reach workers in the host country before they leave as it is often much harder to help workers, who may not speak English and have no accommodation arranged, once they arrive.

To date we have produced leaflets in partnership with the Portuguese, Polish and Lithuanian Governments and are still in talks with other Governments. These benefited from input from the TUC, the CBI and other stakeholders and have been distributed widely in both the workers' home countries and the UK, for example via Citizen's Advice Bureaux. In Poland, for example, they have been publicised on television and our embassy and the Polish authorities have worked hard to distribute them via job centres, recruitment fairs and other channels. The text of the leaflets is also available on the DTI website:

http://www.dti.gov.uk/er/agency/migrant_workers.htm

We are currently updating the three leaflets to ensure they contain up to date information on, for example, national minimum wage rates.

HMRC enforce the national minimum wage on behalf of the DTI. Each month HMRC select a sample of employers with workers from the new European Union accession countries who have registered under the Workers Registration Scheme. These employers are inspected to ensure that they are complying with the requirements of the national minimum wage legislation.

The Home Office also provide information to workers from EU accession countries. Nationals of the new member states (except Cyprus and Malta) working in the UK are subject to the Worker Registration Scheme. When subject to the scheme, they need to register with the Home Office if they plan to work for more than one month for an employer in the UK. Workers subject to registering with the Worker Registration Scheme receive information on employment rights as a matter of course. A leaflet setting out the rights and responsibilities of nationals from the new member states is available on the Home Office website:

http://www.workingintheuk.gov.uk/working_in_the_uk/en/homepage/schemes_and_programmes/worker_registration.Maincontent.0003.file.tmp/Home%20Office%20WRS%2020pp%PROOF.pdf

The Government's decision that nationals from these countries should have, subject to the registration requirements of the Worker Registration Scheme, access to the labour market and freedom to change employers should mean that they are significantly less vulnerable to exploitation than they were previously.

Mrs. James: To ask the Secretary of State for Trade and Industry what consideration he has given to the establishment of a migrant workers' helpline by his Department to report *(a)* poor working conditions and *(b)* worker intimidation. [56179]

Mr. Sutcliffe: The Advisory, Conciliation and Arbitration Service (ACAS) provide information on general employment rights and contractual matters and operate a helpline on 08457 474747.

The HMRC's national minimum wage helpline number is 0845 6000 678.

The DTIs Employment Agency Standards Inspectorate which is responsible for enforcing the legislation governing the private recruitment industry, operate a helpline where workers can seek advice and/or register complaints concerning the conduct of an employment agency or employment business. Complaints can be taken in confidence. I would always encourage anyone who has a problem with an agency or employment business to contact the helpline on 0845 955 5105.

However, a DTI run project is currently underway, which will review the range of government funded helplines for employees, with a view to identifying areas where the existing provision might be consolidated, providing clarity and improved service for users.

Mines Rescue Service

Mr. Todd: To ask the Secretary of State for Trade and Industry what steps he is taking to ensure that *(a)* a mines rescue service is maintained and *(b)* its skills and technology are used by other emergency services. [56764]

Malcolm Wicks: Mines Rescue Service Ltd. (MRS Ltd.) is, at present, the provider of the services required under the statutory Mines Rescue Scheme. Although MRS Ltd. is a not for profit, private-sector company in which the Government have no locus, the Coal Authority (a DTI-sponsored NDPB) has provided it with financial support over the last two years utilising unexpected gains from the sale of property inherited from British Coal. In the absence of further similar windfall receipts, it remains the responsibility of deep-mine coal operators to fund the service in accordance with the terms of the statutory scheme. I understand that MRS Ltd. has already been very successful in marketing its particular expertise and experience among the recognised emergency services and elsewhere.

Mobile Phone Intercepts

Margaret Moran: To ask the Secretary of State for Trade and Industry what measures he is taking to ensure that mobile phone tracking by individuals is properly regulated. [55662]

Alun Michael: The Privacy and Electronic Communications Directive (2002/58/EC) applies a number of privacy safeguards to value added services based on traffic and location data, including a requirement for informed consent from subscribers or users of the communications service involved. In the case of location data services, there is a requirement that subscribers or users must be able to withdraw their consent on a temporary as well as a long term basis, each time they connect to the network or make a phone call or other form of communication. The Directive was implemented in the UK by the Privacy and Electronic Communications (EC Directive) Regulations 2003, which came into force on 11 December 2003.

Mobile phone location services are regulated under the Privacy and Electronic Communications (EC Directive) Regulations 2003 and the Data Protection Act 1998. Enforcement is the responsibility of the Information Commissioner.

National Institute for Medical Research

Mr. Dismore: To ask the Secretary of State for Trade and Industry whether medical research carried out by the National Institute for Medical Research on the H5N1 avian influenza virus from infected humans needs to be conducted in category 4 containment facilities; and if he will make a statement. [55238]

Barry Gardiner: The regulations of the Health and Safety Executive and the advice of the Advisory Committee on dangerous pathogens are the first point of reference in making decisions about the appropriate containment level required for research with a pathogen. The specific advice contained in the HSE's "Advice on Working with Influenza Viruses" is that H5N1 should be handled in containment level 3.

Natural Environment Research Council

Gregory Barker: To ask the Secretary of State for Trade and Industry what criteria were used by the Natural Environment Research Council in its decision to close Centre for Ecology and Hydrology research facilities; and what assessment he has made of this. [52252]

Barry Gardiner *[holding answer 27 February 2006]:* The Centre for Ecology and Hydrology (CEH) is wholly owned by the Natural Environment Research Council (NERC). NERC science budget allocation has doubled since 1997 to 334 million for this year, demonstrating our commitment to maintaining the quality of environmental research in the UK. NERC is responsible for determining the details of how this funding is allocated to specific activities. NERC is currently considering the input from a wide consultation with stakeholders on proposals on how best CEH can contribute on a sustainable basis to UK environmental science in the future.

NERC has set out the criteria used in developing the proposals in the CEH Business Plan (available on the NERC website). The proposals were informed by assessments by an international peer review and a moderating panel, leading to recommendations to NERC Council from NERC's Science and Innovation Strategy Board. This included assessment of the science quality, value for money and the fit of the CEH science proposal to NERC's strategy. In addition, there was input from a strategic review of CEH conducted by independent consultants in 2005, which enabled NERC to estimate the likely level of future commissioned research income that CEH could expect to win. NERC also factored in the necessary level of future investment in the facilities for the research carried out by CEH.

Newton's Apple Tree

Mike Penning: To ask the Secretary of State for Trade and Industry what the estimated *(a)* value and *(b)* maintenance cost is of "Newton's Apple Tree" at the National Physics Laboratory; what right of public access to it exists; and if he will make a statement. [52573]

Barry Gardiner: As a non-operational heritage asset, "Newton's Apple Tree" at the National Physical Laboratory (NPL) is not valued on the Department's balance sheet. Its maintenance costs are not separately identifiable from the general grounds maintenance costs at the Laboratory.

The tree was presented to NPL in 1953 by the director of the Royal Botanic Gardens at Kew and is derived from a graft from an old tree at Woolsthorpe Manor in Lincolnshire, the birthplace of Sir Isaac Newton and where, according to tradition, Newton was inspired by a falling apple in developing his theory of gravitation. The tree at NPL is one of a number of similar descendants around the world. Public access to this tree is not possible but a similar, and perhaps more directly related, tree can be seen at Woolsthorpe Manor, which is in the care of the National Trust.

Post Offices

Mr. Paterson: To ask the Secretary of State for Trade and Industry (1) whether the European Commission has *(a)* imposed and *(b)* indicated that it will impose any restrictions or conditions on the disbursement of subsidies to (i) rural and (ii) other post offices; [55594]

(2) whether the European Commission has imposed limits on the amount of subsidy his Department may pay to Post Offices Limited in respect of support for *(a)* rural and *(b)* other post offices in any one year. [55600]

Barry Gardiner: The European Commission has approved the Department's support of no more than £150 million per annum, to support non-commercial rural post offices, for the financial years 2006–07 and 2007–08. Post Office Limited uses this support to cover such costs as sub-postmasters' fixed pay, cash distribution and information technology. European Commission Decision N 784/2002 also allowed for support to POL to cover cash outflows until financial year 2006–07.

Satellite Licences

Mike Penning: To ask the Secretary of State for Trade and Industry what the nature is of his Department's contingent liabilities pertaining to the issue of licences to operators of satellites and other space objects; and if he will make a statement. [52571]

Barry Gardiner: Under UN Treaties, the Government are internationally responsible for activities in outer space carried on by its nationals, and assumes certain liabilities for damage caused to third parties as a result of those activities. The Department administers the Outer Space Act 1986, which requires that such space activities be licensed. Anyone who carries on a licensable activity gives an unlimited indemnity to the Government against claims. The Department seeks to secure indemnification in part by requiring £100 million insurance cover. If the insurance policy proved insufficient to cover a particular claim, the licensee would be required to indemnify the Government of the excess. However, if the licensee were unable to meet this, the Government would have to fund the remainder from its own resources. Hence, there is a contingent liability.

Shareholder Executive

Dr. Cable: To ask the Secretary of State for Trade and Industry if he will list the activities for which the Shareholder Executive has obtained external financial advice; on what matters the company provided advice on each occasion; and what fees were paid in each case. [54724]

Barry Gardiner: The Shareholder Executive advises a number of different ministers on their shareholdings. Those Ministers retain responsibility for all aspects of the shareholdings.

Since the Shareholder Executive's transfer to the DTI in June 2004, the following advisers have been engaged on the businesses in its portfolio for which my right hon. Friend the Secretary of State for Trade and Industry has responsibility:

Royal Mail Holdings plc: Deloitte, CSFB, Strategia. All provided financial advice relating to Royal Mail and Post Office Ltd.'s financial performance and future funding requirements.

British Energy Group plc: CSFB, Deloitte. Both provided financial advice relating to the British Energy restructuring.

British Nuclear Fuels plc: Deloitte—general accountancy advice.

In addition the Shareholder Executive obtained advice from McKinsey and Company in relation to the development of its economic profit methodology.

The total amount spent on these advisors from June 2004 to February 2006 is £8,308,008. Amounts paid to individual advisors are commercially confidential to the Department and the relevant adviser.

Dr. Cable: To ask the Secretary of State for Trade and Industry what arrangements are in place to prevent conflicts of interest in cases of *(a)* asset sales and *(b)* financial restructuring for which the Shareholder Executive seeks external advice. [54727]

Barry Gardiner: As pat of any appointment process, external advisors are required to confirm that they have no actual or perceived conflict of interest in relation to the proposed project.

Telephone Hotlines

Anne Milton: To ask the Secretary of State for Trade and Industry what representations he has received from consumer groups on the use of premium rate telephone numbers for telephone hotlines. [56531]

Alun Michael: This Department has received no such representations. Premium Rate Services are regulated by the Independent Committee for the Supervision of Standards of Telephone Information Services (ICSTIS). ICSTIS is in constant dialogue with consumer groups on premium rate issues through consultation processes. ICSTIS has had no specific representations about hotlines.

CULTURE, MEDIA AND SPORT

Departmental Telephone Numbers

Anne Milton: To ask the Secretary of State for Culture, Media and Sport if she will list the *(a)* 0800, *(b)* 0845 and *(c)* 0870 telephone numbers for the public administered by her Department. [56534]

Mr. Caborn: My Department does not administer any 0800, 0845 or 0870 numbers for the public.

TREASURY

Burma

Vera Baird: To ask the Chancellor of the Exchequer what estimate he has made of the value of Burmese gems imported in each of the last five years. [55656]

Dawn Primarolo: The information is as follows.

Value of gems imported from Burma 2001–05

	Value (£)
2001	0
2002	0
2003	0
2004	0
2005	623

Notes:

1. Value declared in 2005 was in the category of 'Precious stones (o/t) diamonds and semi-precious stones not strung, mounted or set—unworked, simply sawn or roughly shaped'.
2. Declarations below a value of £600 are recorded in a separate low value' commodity code.

HM Revenue and Customs, Overseas Trade Statistics

Cancer

Mr. Hollobone: To ask the Chancellor of the Exchequer what the *(a)* contraction and *(b)* death rates were for (i) breast cancer, (ii) lung cancer and (iii) prostate cancer in the last year for which figures are available. [56592]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Colin Mowl, dated 7 March 2006:

The National Statistician has been asked to reply to your recent question concerning what the *(a)* contraction and *(b)* death rates were for (i) breast cancer, (ii) lung cancer and (iii) prostate cancer in the last year for which figures are available. I am replying in her absence. (56592)

The most recent available information is on registration of newly diagnosed cases (incidence) and mortality for the years 2003 and 2004, respectively. Age-standardised incidence and mortality rates (directly standardised to the European standard population) are given in the table below for selected cancers in England, 2003–2004.

Directly age-standardised incidence and mortality rates per 100,000 population[1] for selected cancers[2], England, 2003–2004

	Incidence		*Mortality*[3,4]	
Cancer type/sex	*2003*	*2004*	*2003*	*2004*
Breast				
F	120.8	—	29.2	28.4
Lung				
M	59.3	—	53.7	51.7
F	33.4	—	28.5	28.2
P[5]	44.6	—	39.3	38.3
Prostate				
M	91.1	—	27.1	26.4

[1] Rate per 100,000 standardised to the European standard population.
[2] Defined by codes in the International Classification of Diseases, Tenth Revision (ICD10). In this table lung cancer is taken to be code C34, breast cancer C50 and prostate cancer C61. Deaths were selected using the original underlying cause.
[3] Residents of England at time of death.
[4] Figures are based on occurrences of death in each calendar year.
[5] Persons—the calculated total rate for both males and females.

Source:

Office for National Statistics

Child Benefit

Mr. Byers: To ask the Chancellor of the Exchequer what estimate he has made of *(a)* the percentage of those entitled to claim child benefit who do not do so and *(b)* the amount that went unclaimed in each of the last five years. [56160]

Dawn Primarolo: Precise figures are not available, but it is estimated that approximately 2 per cent. of families although entitled, do not claim child benefit.

There are no estimates available for the amount that went unclaimed in each of the last five years.

Commercial Waste

Mr. Keetch: To ask the Chancellor of the Exchequer if he will consider awarding extra funding to local authorities to collect and recycle commercial waste. [56706]

John Healey: The Government are currently consulting on their Review of Waste Strategy. Decisions on waste spending will be taken in the context of the Comprehensive Spending Review in 2007.

Cot Death

Mr. Oaten: To ask the Chancellor of the Exchequer how many post-neonatal babies died from cot death in the period covered by the most recent statistics produced by the Office for National Statistics; and how many such deaths would have been recorded in that period if the rate for post-neonatal first babies inside marriage were applied to all post-neonatal babies. [56731]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Colin Mowl, dated 7 March 2006:

The National Statistician has been asked to reply to your recent question on how many postneonatal babies died from cot death in the period covered by the most recent statistics produced by the Office for National Statistics; and how many such babies would have died in that period if the rate for postneonatal first babies inside marriage was applied to all postneonatal babies. I am replying in her absence. (56731)

Available figures on cot deaths are based on a mention of "sudden infant death", "cot death", "sudden infant death syndrome" or some other similar term on the death certificate. This figure is referred to as "sudden infant deaths" in routine publications.

In 2004 (the latest year for which provisional figures are available) there were 149 sudden infant deaths in the postneonatal period in England and Wales (0.23 deaths per 1,000 live births). Seven of these were among first babies born inside marriage (0.05 deaths per 1,000 live births). If this rate had applied to all live births in 2004, then 29 babies would have died from sudden infant deaths in the postneonatal period.

Diamonds

Keith Vaz: To ask the Chancellor of the Exchequer what estimate he has made of *(a)* the proportion of diamonds sold in the UK in each of the last five years for which such estimates are available which were smuggled and *(b)* the consequent cost to the economy of the UK in lost tax revenues. [52887]

Dawn Primarolo: HM Revenue and Customs do not produce estimates in relation to the smuggling of diamonds. Their report "Measuring Indirect Tax Losses", available on their website at http://www.hmrc.gov.uk/pbr2005/index.htm provides estimates of indirect tax losses arising from fraud, avoidance and other forms of non-compliance but does not provide specific information on the trade in diamonds.

Euro

Mr. Pickles: To ask the Chancellor of the Exchequer (1) if he will place in the Library a copy of the Valuation Office Agency's plan on preparing for the introduction of the euro; [54554]

(2) if he will place in the Library a copy of the Valuation Office Agency's high level plan for the introduction of the euro. [54614]

Dawn Primarolo: The Valuation Office Agency does not have a separate euro preparations plan. Their planning is included in the strategy for HM Revenue and Customs as a whole.

Government Liablities

Mr. Newmark: To ask the Chancellor of the Exchequer if he will estimate the Government's liability arising from schemes under *(a)* the private finance initiative, *(b)* public sector pension provision and *(c)* other contingent liabilities which do not appear on the Government's balance sheet in each year since 1997. [54607]

Mr. Des Browne: The information is as follows.

(a) The estimated Government liability arising from both previous and future PFI projects is publicly available information. This data can be found in previous Budget publications (available online at www.hm-treasury.gov.uk).

(b) The chief secretary explained the latest position on public sector pension liabilities in his answer to the oral question from Mr. Philip Dunne (4130 05/06), answered on the 2 March and placed a paper in the House of Commons Library the same day providing a full explanation of the latest estimate.

(c) Each year estimates of Government's contingent liabilities are provided in resource accounts.

Household Repairs (VAT)

Mr. Evans: To ask the Chancellor of the Exchequer if he will make it his policy to incentivise property owners and landlords to *(a)* return existing properties to housing use and *(b)* improve the quality of private housing stock by (i) reducing and (ii) removing VAT on household repairs. [56348]

Dawn Primarolo: We keep under review the use of reduced rates for construction work where these could help support regeneration and renewal, and to date have targeted relief at areas of specific need, such as certain residential conversions (including converting a non-residential property into single household dwellings or converting a house into flats) and the renovation of housing that has been empty for more than three years. These measures have helped bring vacant homes back into use and create new homes through better use of the UK's existing housing stock. However, a blanket reduced rate for all household repairs is unlikely to be an efficient or well-targeted use of resources.

While agreements with our European partners allow us to keep our zero rates as they currently stand, we cannot extend them or introduce new ones.

Income Tax

Mr. Pickles: To ask Mr Chancellor of the Exchequer what estimated revenue would be raised by increasing the rate of basic rate income tax by one per cent. [56190]

Dawn Primarolo: The information requested is available in Table 4 'Direct effects of illustrative changes in income tax" from the publication Tax ready reckoner and tax reliefs, December 2005', which is available in the

House of Commons Library, or on the HMT website at http://www.hm-treasury.gov.uk/media/fa1/96/pbr05 taxreadyreckoner 223.pdf

Iraq

Mr. Harper: To ask the Chancellor of the Exchequer on which dates he visited British soldiers injured in Iraq; and what locations were visited. [54099]

Mr. Gordon Brown: I regularly meet members of the armed forces, veterans and their families on my visits around the UK and in my constituency.

Leases

Mrs. Villiers: To ask the Chancellor of the Exchequer (1) what assessment he has made of the likely impact of the proposed legislation governing the tax treatment of leases on *(a)* leasing, *(b)* the wider financial services industry and *(c)* small and medium-sized enterprises; [54519]

(2) what assessment he has made of the likely impact of the proposed legislation governing the tax treatment of leases on future levels of business investment; [54520]

(3) what assessment he has made of the likely impact of the proposed legislation governing the tax treatment of leases on the *(a)* road haulage, *(b)* shipping, *(c)* railways, *(d)* manufacturing and *(e)* air travel and freight industry. [54521]

Dawn Primarolo: An assessment of the likely impact of the proposals to reform the taxation of leased plant and machinery is contained in a partial regulatory impact assessment (RIA), available at http://www.hmrc.gov.uk/ria/leasing-reform.pdf.

A final RIA, with a full assessment of these issues, will be published with legislation, following the Chancellor's Budget statement.

Local Authority Car Parks

Jim Cousins: To ask the Chancellor of the Exchequer whether he plans to appeal the tribunal decision that four local authorities were not liable for VAT on car parking revenues. [54570]

Mr. Pickles: To ask the Chancellor of the Exchequer if he will make a statement on the VAT status of local authority car parks following recent tribunal rulings. [54559]

Dawn Primarolo: HM Revenue and Customs are currently considering the implications of the decision of the VAT and Duties Tribunal in the case of Isle of Wight council.

Ms Susan Johnston

Sir Gerald Kaufman: To ask the Chancellor of the Exchequer when he will reply to the letter to him dated 16 January 2006 from the right hon. Member for Manchester, Gorton, with regard to Ms Susan Johnston. [55762]

Dawn Primarolo: I have replied to the right hon. Member.

National Asset Register

Sarah Teather: To ask the Chancellor of the Exchequer when he expects to publish the next version of the National Asset Register. [55771]

Mr. Des Browne: The Government are planning to publish the next version of the National Asset Register in time to inform the 2007 Comprehensive Spending Review.

NHS Trusts (Arrears)

Mr. Philip Hammond: To ask the Chancellor of the Exchequer if he will make an estimate of aggregate arrears of pay as you earn and national insurance payments due from NHS trusts to Her Majesty's Revenue and Customs as at *(a)* 20 October 2005 and *(b)* 20 October 2004. [28619]

Dawn Primarolo: Employers are monitored when they fall into arrears. However, Her Majesty's Revenue and Customs monitors employer's payment performance by value of amount due, rather than by category of business. Information on the arrears of PAYE and National Insurance Contributions for a particular category of employer is not held at national level and in view of this it is not possible to make an estimate.

PAYE

Mr. Liddell-Grainger: To ask the Chancellor of the Exchequer what advice his Department issues to PAYE defaulters who have failed to make payments due to technical faults with computer systems on the action necessary to rectify the faults. [55273]

Dawn Primarolo: The advice given will depend on the nature of the technical fault. In general terms Her Majesty's Revenue and Customs (HMRC) communicates with employers through a wide variety of media including publications issued by HMRC and publications issued by external organisations to which HMRC is invited to contribute. In addition, extensive guidance and educational material is available through the HMRC internet site. HMRC gives advice through forums such as "Working Together" and the "Employer Umbrella Group".

Mr. Liddell-Grainger: To ask the Chancellor of the Exchequer which countries the Inland Revenue has advised on setting up and running a computer system similar to the one used for PAYE contributions. [55277]

Dawn Primarolo: HMRC has not advised any countries on setting up and running computer systems similar to those that support PAYE.

Mr. Liddell-Grainger: To ask the Chancellor of the Exchequer how many legal actions were taken by the Inland Revenue due to PAYE infringement in each year from 2000–01 to 2003–04. [55278]

Dawn Primarolo: Information on how many legal actions were taken by the Inland Revenue due to PAYE infringement is not available. The Department records the number of legal actions taken but this is not broken down into the different tax regimes.

Mr. Liddell-Grainger: To ask the Chancellor of the Exchequer what estimate he has made of the total amount of PAYE which was due but was not collected in each year from 2000–01 to 2003–04. [55279]

Dawn Primarolo: The information is not available for 2000–01 and 2001–02. The Inland Revenue accounting year ran to the end of October each year and the figures available for uncollected tax represented net tax charged but not paid as a snapshot view at the accounting date. This did not include PAYE as the liability is only finally established after the end of the financial year. The figures for 2002–03 and 2003–04 as follows are a snapshot at 31 March each year, and include estimates of monthly PAYE arrears.

	£ billion
2002–03	4.9
2003–04	5.2

The vast majority of this is paid within a few days of becoming due.

Mr. Liddell-Grainger: To ask the Chancellor of the Exchequer how many major computer upgrades have been carried out on the PAYE computer system in the last five years; and what the cost was in each year. [55283]

Dawn Primarolo: PAYE has developed over the years and does not have one computer system, but rather a number of systems that process, hold and support PAYE data. Enhancements have been made to these systems over the last five years, and there is currently one ongoing major upgrade to the PAYE computer support for electronic filing of employer end of year returns. This is the modernising PAYE processes for customers (MPPC) programme. In 2003–04 and 2004–05 approximately £27.5 million and £38 million was spent by the project.

Mr. Liddell-Grainger: To ask the Chancellor of the Exchequer how many people were liable for PAYE payments in the UK in *(a)* 2003–04 and *(b)* 2004–05. [55320]

Dawn Primarolo: The number of taxpayers with employment income in 2003–04 is estimated at around 22 million. The total number of people with tax deducted under PAYE will be higher than this as some people may have worked for only part of the year and been entitled to a repayment of tax as their incomes for the year as a whole were below the tax threshold. This figure excludes people with personal and occupational pensions from which income tax is also deducted under PAYE.

This estimate is based on the latest available year of the Survey of Personal incomes.

Post Office Card Account

Danny Alexander: To ask the Chancellor of the Exchequer how many people use the Post Office Card Account for the payment of tax credits or other payments administered by his Department, broken down by parliamentary constituency. [54508]

Dawn Primarolo *[holding answer 1 March 2006]:* In February there were around 141,000 tax credits claims where payments were made via a Post Office Card Account. Information is not available by parliamentary constituency.

For total numbers of child benefit recipients, I refer the hon. Member to the reply I gave him on 24 January 2006, *Official Report*, column 2047W. I am arranging for a break down by parliamentary constituency to be placed in the House of Commons Library.

Social Exclusion

Mr. Pickles: To ask the Chancellor of the Exchequer what funding streams his Department plans to finance directly in 2006–07 to tackle social exclusion. [56214]

John Healey: Social exclusion is a problem with many dimensions, which is recognised and prioritised in the Treasury's objectives and closely linked to other aspects of the department's work. Treasury objective 2 is to increase the productivity of the economy and expand economic and employment opportunities for all; Treasury objective 4 is to promote a fair, efficient and integrated tax and benefit system with incentives to work, save and invest. The work of many of the Treasury's teams contributes towards these objectives, working with other Departments where appropriate. For example, the Treasury established the Financial Inclusion Taskforce to increase access to banking, affordable credit and face-to-face money advice. The Treasury's 2006–07 budget includes £1 million to fund the work of the taskforce and the Treasury team supporting it.

Spending Review (Efficiency Targets)

Mrs. Villiers: To ask the Chancellor of the Exchequer how much is expected to be saved as a result of meeting the Civil Service workforce reductions targets for his Department set out in the 2004 Spending Review; and whether these savings count towards the agreed efficiency target for his Department set out in the Review. [52805]

Mr. Des Browne: The information requested is as follows.

Treasury Group, HMRC and ONS

The required information is contained within the relevant Efficiency Technical Notes available on http://www.hm-treasury.gov.uk, http://www.hmrc.gov.uk, http://www.statistics.gov.uk, and search for 'Efficiency Technical Note').

GAD

GAD was not set workforce reduction targets.

Mrs. Villiers: To ask the Chancellor of the Exchequer how much of the agreed efficiency target for his Department set out in the 2004 Spending Review is to be cashable; and under what budget headings these cashable efficiency savings will be re-spent. [52821]

Mr. Des Browne: The information is as follows:

Treasury Group

The Treasury has committed to achieving efficiencies of £11.9 million per annum by 2007–08. All planned savings are cashable and recycled to new policy priorities.

The DMO has committed to achieving efficiencies of £1.0 million per annum by 2007–08. Of this total, cashable savings represent £0.7 million. The savings will be spent over a variety of budget headings focused mainly on maintaining and, where appropriate, enhancing the DMO's operational capability and risk management processes.

OGC is committed to achieving annual efficiency savings of 4 million by 2007–08. Of these savings at least 60 per cent. will be cashable. OGC buying solutions has committed to achieving efficiencies of £1.8 million by 2007–08, of which cashable savings represents £0.9 million. The savings will be invested in increasing front line procurement delivery to support the commodity procurement work stream.

HMRC, ONS and GAD

Please see our Efficiency Technical Notes (available on http://www.hmrc.gov.uk, http://www.statistics.gov.uk, and search for 'Efficiency Technical Note' and on http://www.gad.gov.uk/Publications/Departmental%20Reports.htm).

Mrs. Villiers: To ask the Chancellor of the Exchequer what the target level of employment expressed as full-time equivalents is in his Department by April 2008, in order to meet his Department's civil service work force reductions target set out in the 2004 Spending Review. [52840]

Mr. Des Browne: The information is as follows:

Treasury Group

The 1 April 2004 baseline for core Treasury full-time equivalent staff is 1,243. This includes 150 full time equivalent posts transferred from HM Revenue and Customs as a result of the O'Donnell Review and 39 full time equivalents on paid secondments, maternity leave, training and long term sickness.

With a target reduction of 150 full time equivalent staff over the 2004 Spending Review period, this gives a target level of employment in April 2008 of 1,093 full-time equivalents for core Treasury. The work force reductions target for the Treasury Group will be met by core Treasury.

HMRC, ONS and GAD

Please see our Efficiency Technical Notes (available on http://www.hmrc.gov.uk, http://www.statistics.gov.uk, and search for 'Efficiency Technical Note').

GAD

GAD was not set work force reduction targets.

Mrs. Villiers: To ask the Chancellor of the Exchequer what total efficiency savings were achieved by his Department in 2004–05; and whether these count towards the agreed efficiency target for his Department set out in the 2004 Spending Review. [52869]

John Healey: Information for the Treasury Group is reported in the 2005 Departmental Report (available at www.hm-treasury.gov.uk).

Efficiency targets for HMRC, ONS and GAD are planned over three years from 2005–06 to 2007–08, details of which are set out in their departmental reports and efficiency technical notes (available on http://www.hmrc.gov.uk; http://www.statistics.gov.uk; and on http://www.gad.gov.uk/Publications/Departmental%20Reports.htm).

The first year in which efficiencies are expected to be achieved under their efficiency programmes is therefore 2005–06.

Mrs. Villiers: To ask the Chancellor of the Exchequer what baseline figures he is using for assessing progress on his Department's targets to *(a)* develop electronic channels, *(b)* rationalise back office functions, *(c)* improve procurement and *(d)* exploit the opportunities to achieve efficiencies generated by the creation of HM Revenue and Customs; what progress has been made towards these targets to date; and what the total efficiency savings achieved to date are for these targets. [52931]

Mr. Des Browne: Relevant information can be found in HM Treasury's Efficiency Technical Note (available on http://www.hm-treasury.gov.uk, and search for 'Efficiency Technical Note') and our 2005 Autumn Performance Report (search for 'Autumn Performance Report'). Treasury does not break down its efficiency programme in exactly this way.

HMRC

Please see our Efficiency Technical Note (available on http://www.hmrc.gov.uk, and search for 'Efficiency Technical Note') and our 2005 Departmental Report (search for 'Departmental Report').

ONS

ONS's efficiency target of £25 million is against a 2004–05 baseline of £177 million.

This includes:

rationalisation of back office functions, contributing some 20 per cent. of the total savings (£5 million); estimated efficiencies to date amount to £2 million;

procurement efficiencies, including the use of cross-government IT services, contributing some 10 per cent. of the total savings (£2.5 million); estimated efficiencies to date amount to £2 million.

GAD

GAD were set a baseline target of £125,000 for Efficiency Gains over 2005–08. These are broken down as follows:

(a) Electronic channels—not applicable

(b) Productive time—£41,000 (efficiencies to date amount to £13,000)

(c) Procurement—£52,000 (efficiencies to date amount to £89,000)

(d) not applicable

(e) Policy (Client Liaison function)—£32,000 (efficiencies to date amount to£36,000).

Mrs. Villiers: To ask the Chancellor of the Exchequer what interim targets he has set for achieving *(a)* the agreed efficiency target for his Department and *(b)* the civil service work force reductions targets for (i) gross reductions in posts, (ii) net reductions in posts and (iii) relocations for his Department, as set out in the 2004 Spending Review; what the baseline figures are against which these interim targets are assessed; on what dates they will take effect; and by what dates these interim targets are intended to be met. [52940]

Mr. Des Browne: The information requested is as follows:

Treasury Group

The 2004 Spending Review efficiency targets are to be achieved by 31 March 2008 (and relocations by 2010) and there are no interim targets for the programme as a whole. Treasury Group (core Treasury, the Office for Government Commerce and the Debt Management Office) monitors progress trajectories against its targets and reports on progress in the Departmental and Autumn Performance Reports, but has no formal interim targets.

HMRC

Please see our Efficiency Technical Note (available on http://www.hmrc.gov.uk, and search for 'Efficiency Technical Note')

ONS

No interim targets were set for ONS. The Department has, however, identified key milestones against which progress against targets can be monitored.

GAD

GAD has achieved the Efficiency Gains required for 2005–06 and has exceeded them.

GAD has not been set any headcount reduction or relocation targets.

Tax Credits

Mr. Laws: To ask the Chancellor of the Exchequer what progress is being made by HM Revenue and Customs in introducing more rigorous checks on changes of circumstance notified to the Tax Credit Office *(a)* by post, *(b)* by telephone and *(c)* by internet; and if he will make a statement. [38148]

Dawn Primarolo: HMRC has a range of measures in place to combat non-compliance which are kept under review. All reported changes to circumstances are risk assessed and where appropriate are considered for further examination by HMRC's compliance teams, along with direct referrals from staff who suspect a reported change. Where non-compliance is discovered HMRC have a number of measures available to them including prosecution under the new law of tax credit fraud.

Mr. Hoban: To ask the Chancellor of the Exchequer (1) what estimate he has made of the number of tax credit claimants affected by technical issues preventing *(a)* automatic payments being made into bank accounts and *(b)* cheques being posted to 2004–05 tax year accounts; [50599]

(2) when the technical issues preventing the *(a)* posting of cash cheques to correct tax year accounts and *(b)* automatic payment of tax credits to claimants' bank accounts were first identified; what steps are being taken to resolve them; what assessment he has made of (i) when they will be corrected and (ii) the cost of correcting them; whether the cost of correcting them will be met from public funds; and what assessment he has made of the impact of these technical issues on the ability of HM Revenue and Customs to resolve disputes with claimants. [50642]

Dawn Primarolo: There are around 21,500 tax credits claimants currently receiving regular manual payments instead of automatic payments (whether BACS or cheques). This represents around 0.35 per cent. of tax credits claimants.

At the end of February there were around 24,000 individual cheque encashments on the 2004–05 worklist that had not been posted to the taxpayers records.

HMRC are working hard to improve administration, address technical issues and minimise impact on taxpayers.

Mr. Frank Field: To ask the Chancellor of the Exchequer if he will place in the Library copies of the most recent available drafts of *(a)* a tax credit award notice, *(b)* a tax credit overpayment notification letter, *(c)* an end of year renewals form and *(d)* Code of Practice 26. [54160]

Dawn Primarolo *[holding answer 27 February 2006]:* Copies of the tax credit award notices that will be issued to claimants from 6 April onwards have been placed in the Library. A new version of COP 26 will be published in April. HMRC is currently consulting on a revised version, a copy of which has been placed in the Library.

Mr. Frank Field: To ask the Chancellor of the Exchequer pursuant to the Paymaster General's evidence to the Treasury Select Committee, 1 February 2006, question 307, what the cost is of extending additional payments of tax credits for claimants who are in hardship and who have suffered a reduction of regular payments due to their income rising by more than £2,500. [54161]

Dawn Primarolo *[holding answer 27 February 2006]:* There is no net cost. There will be a cash flow effect as additional payments will reduce the rate at which overpayments are recovered. The size of this effect will depend on the level of additional payments which results from the changes but it is likely to be small.

Mr. Frank Field: To ask the Chancellor of the Exchequer how many TC610 Notice to Pay forms were issued in *(a)* 2003–04, *(b)* 2004–05 and *(c)* 2005–06. [54164]

Dawn Primarolo *[holding answer 27 February 2006]:* The information requested is:

TC610s issued

	Thousand
2003–04	0
2004–05	1,025
2005–06	1,451

Anne Main: To ask the Chancellor of the Exchequer pursuant to the answer of 9 February 2006, *Official Report*, column 1397W, on tax credits, how many claims were not decided within 30 days; and what the *(a)* average and *(b)* longest time taken was to decide one of those claims. [54254]

Dawn Primarolo: HM Revenue and Customs (HMRC) has service delivery agreement targets for deciding tax credit claims within five working days and 30 working days and reports progress against those targets in its annual report. It reported that, for

2004–05, 95.9 per cent. of all new claims, renewals and changes of circumstances were decided within 30 working days of receipt, therefore 4.1 per cent. of new claims, renewals and changes of circumstances were decided outside 30 days.

The information requested at *(a)* and *(b)* is not available.

Anne Main: To ask the Chancellor of the Exchequer pursuant to the answer of 9 February 2006, *Official Report*, column 1397W, on tax credits, how many families were sent more than one tax credit entitlement notice in each year. [54256]

Dawn Primarolo: This information is not available.

However, the great majority of families receiving tax credits will have received more than one award notice in any given year, as couples receive individual notices and notices are issued when the award is renewed and each time there is a household change of circumstances in keeping with the principle of independent taxation.

Mr. Wills: To ask the Chancellor of the Exchequer what research he has evaluated on the effects of tax credits on incentives to work. [54613]

Dawn Primarolo: The Institute for Fiscal Studies were commissioned to evaluate the impact of the working families' tax credit. In the final evaluation, which was produced in 2005, they found that working families' tax credit had increased labour supply of lone mothers by around 5 percentage points and had a broadly neutral effect on the employment of couple families, compared with family credit, which preceded it.

These results are consistent with other independent research.

Mr. Lancaster: To ask the Chancellor of the Exchequer how many tax credit overpayments have been written off *(a)* in part and *(b)* in full in respect of residents of Milton Keynes since tax credits were introduced. [54679]

Dawn Primarolo: This information requested is not available at constituency level and in the format requested.

Mr. Holloway: To ask the Chancellor of the Exchequer if he will list the tax credits available to businesses investing in research and development in each year since 1997. [54738]

John Healey: Research and Development (R&D) tax credits have been available from 1 April 2000 for companies that are small and medium sized enterprises (SMEs). They became available for large companies from 1 April 2002. Since 22 April 2003 Vaccines Research Relief has also been available for companies undertaking R&D into certain medicines and vaccines.

Miss McIntosh: To ask the Chancellor of the Exchequer what recent representations he has received on the administration of tax credits. [55203]

Dawn Primarolo: Treasury Ministers have received a number of representations on various aspects of the administration of the tax credits system and I have reported regularly to the House on its operation.

Mark Durkan: To ask the Chancellor of the Exchequer what the location is of each tax credits office assigned to deal with the tax credit claims of Northern Ireland residents working *(a)* in the Republic of Ireland and *(b)* within Northern Ireland. [55868]

Dawn Primarolo: Tax credit claims from Northern Ireland residents working in the Republic of Ireland are dealt with in Belfast. Claims from Northern Ireland residents working within Northern Ireland may be dealt with by tax credit offices in Belfast, Preston or Liverpool.

Tax Returns

Mr. Gregory Campbell: To ask the Chancellor of the Exchequer how many people in Northern Ireland he estimates have completed their Inland Revenue annual returns via the internet in each of the last five years. [56167]

Dawn Primarolo *[holding answer 3 March 2006]:* The available information does not separate returns from individuals filed over the internet from those submitted by their agents. Nor can HM Revenue and Customs separate returns made to Northern Ireland offices by Northern Ireland residents from those resident in the rest of the UK. The number of returns filed electronically in Northern Ireland for the current year and the previous two years is as follows. (Earlier years' figures are not readily available):

Return year	*Year submitted*	*Total*
2003–03	2003–04	19,643
2003–04	2004–05	31,187
2004–05	2005–06	52,565

Taxation (Northern Ireland)

Mark Durkan: To ask the Chancellor of the Exchequer how many Northern Ireland residents work in the Republic of Ireland and are liable for double taxation by the Inland Revenue. [55869]

Dawn Primarolo: The information requested is not available.

Mark Durkan: To ask the Chancellor of the Exchequer if he will take steps to put in place a scheme for residents of Northern Ireland equivalent to that which the Irish Government operates for special tax relief for Southern residents who work across the border in Northern Ireland. [55871]

Dawn Primarolo: There is a double taxation agreement between the Republic of Ireland and the United Kingdom to resolve double taxation issues.

Valuation Office Agency

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the answer of 6 February 2006, *Official Report*, column 1035W, to the hon. Member for Meriden on the Valuation Office Agency, whether the Aspire/GapGemini contract with HM Revenue and Customs *(a)* allows and *(b)* includes provision for electronic image management and archiving. [54557]

Dawn Primarolo: The Valuation Office Agency acquires its IT services from CapGemini through the HMRC Aspire contract. This contract enables provision of a wide range of IT services both existing at the date of contract (1 July 2004) and new services specified since. Electronic image management is provided through a bespoke application. There is no requirement for archiving of photographs.

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the answer of 6 February 2006, *Official Report*, column 1035W to the hon. Member for Meriden, on the Valuation Office Agency, if he will place in the Library copies of the e-learning documents relating to council tax valuations on a DVD or equivalent electronic media. [54558]

Dawn Primarolo: The Valuation Office Agency's council tax manual, and instructions and advice documents to staff, on which the e-learning packages are based, are available on the Agency's website at:

www.voa.gov.uk.

VAT

Sarah Teather: To ask the Chancellor of the Exchequer how much revenue was foregone under the VAT zero-rate on the construction of new dwellings in the last year for which figures are available. [55772]

Dawn Primarolo: The information is given in table 6 of the Tax Ready Reckoner and Tax Reliefs, which can be found at www.hm-treasury.gov.uk and is published annually alongside the pre-Budget report.

HOME DEPARTMENT

Airguns

John Barrett: To ask the Secretary of State for the Home Department how many people were *(a)* charged with and *(b)* convicted of an offence involving misuse of an airgun against an animal in 2005, broken down by constituency. [55336]

Fiona Mactaggart: It is not possible, from the court proceedings data held by the Office for Criminal Justice Reform, to identify offences involving the misuse of an airgun against an animal as there is no specific offence that covers this.

Charities Bill

Mr. Andrew Turner: To ask the Secretary of State for the Home Department how many charities he estimates will be excepted from a requirement to register with the Charity Commission under the proposals in the Charities Bill as introduced *(a)* in the House of Lords and *(b)* in this House. [54868]

Paul Goggins [Holding answer 1 March 2006]: Under the proposals in the Charities Bill there would be three types of charity that do not have to register with the Charity Commissions) exempt charities, b) excepted and formerly exempt charities with an income below £100,000, and c) small charities with an annual income below £5,000.

We estimate that under the Bill at least 135,000 charities in England and Wales would not have to register with the Charity Commission. This estimate remains unchanged for the Bill as brought before this House from when it was introduced in the House of Lords last year.

Compensation Orders

Mr. Drew: To ask the Secretary of State for the Home Department what advice he is offering to those responsible for the administration of compensation orders on how to ensure greater enforcement. [55369]

Ms Harman: I have been asked to reply.

Current legislation dictates that compensation orders must be prioritised over other sums ordered to be paid on conviction by the courts. From 27 March, new enforcement sanctions will be available to all magistrates courts as part of the national rollout of the Courts Act 2003 fines collection scheme, which will greatly improve the collection and enforcement of all financial impositions, including compensation orders. The Green Paper "Rebuilding Lives—supporting victims of crime" (December 2005) proposes extending the current Courts Act 2003 Deduction from Benefit Orders sanction to all cases involving compensation, regardless of default. In addition, HMCS is planning further enforcement blitz operations in areas with sizeable amounts of compensation payments outstanding to specifically target monies owed to the victims of crime.

Council Tax

Mr. Pickles: To ask the Secretary of State for the Home Department how many cases of *(a)* council tax fraud and *(b)* falsely making incorrect declarations to local authorities with regard to council tax liability there were in each year since 1997. [54548]

Paul Goggins: The information requested is not available from the recorded crime statistics.

Crime (Swindon)

Mr. Wills: To ask the Secretary of State for the Home Department what the level of recorded violent crime in Swindon was between 12 November and 24 December *(a)* 2004 and *(b)* 2005. [55276]

Hazel Blears: The information requested is not available to this level of detail.

Departmental Finance

Stewart Hosie: To ask the Secretary of State for the Home Department what the total administrative costs for his core Department are; and whether these are regarded as *(a)* identifiable and *(b)* non-identifiable for the purposes of public expenditure statistical analyses. [39835]

Mr. Charles Clarke: During 2004–05 the core Home Office (excluding its agencies and non-departmental public bodies) incurred administration costs of £526,279,000, of which: £148,566,000 is regarded as identifiable expenditure; and £377,713,000 is regarded as non-identifiable expenditure

Mr. Salmond: To ask the Secretary of State for the Home Department what the administrative costs were of each non-departmental public body for which he has responsibility in the last year for which figures are available; what the total of such costs was in that year; and whether the costs are regarded for the purposes of public expenditure statistical analyses as *(a)* identifiable and *(b)* non-identifiable. [40059]

Mr. Charles Clarke: In accordance with public expenditure classifications, expenditure incurred by Home Office non-departmental public bodies is classified as programme, as is the case for nearly all non-departmental public bodies. Annual reports for each of the bodies concerned are available from the House Library.

Departmental Staff

Mike Penning: To ask the Secretary of State for the Home Department whether any *(a)* employee of his Department, *(b)* person engaged by his Department as a consultant and *(c)* paid advisor to his Department is a member of the House of Lords; and if he will make a statement. [52900]

Mr. Charles Clarke: The Home Office does not maintain a central record that identifies readily staff who may be members of the House of Lords. The information required therefore could only be obtained at a disproportionate cost.

Detainees (Religious Provision)

Mr. David Jones: To ask the Secretary of State for the Home Department what special provision is made in North Wales police premises to accommodate the *(a)* religious and *(b)* dietary needs of (i) Christian, (ii) Muslim, (iii) Jewish and (iv) Hindu detainees. [52788]

Hazel Blears: The provisions in North Wales police is a matter for the chief officer and information is not held centrally on arrangements in place by individual police forces. The code of practice on detention, treatment and questioning of persons by police officers (Code C) issued under the Police and Criminal Evidence Act requires that any specific dietary or religious beliefs the person may have should be met as far as practicable.

The guidance "Safer Detention and Handling of Persons in Police Custody" issued on 8 February 2006 jointly by Home Office, the Association of Chief Police Officers and the National Centre for Policing Excellence states that consideration should be given to providing a separate room which can be used as a prayer room; the supply of appropriate food and clothing; and suitable provision for prayer facilities, such as uncontaminated copies of religious books.

Drugs

Mr. Malins: To ask the Secretary of State for the Home Department what estimate he has made of the percentage of crime attributable to drug misusers; and what estimate he has made of the cost of such crime to public funds. [44643]

Paul Goggins: Routine crime statistics used for monitoring crime trends, such as recorded crime and the British crime survey, do not contain information on the offender's drug habits. It is therefore not possible to provide an estimate of the proportion of all crime that is drug-related. A Home Office Research Study, 'The Economic and Social Costs of Class A Drug Use in England and Wales', provided an estimate of the criminal justice costs associated with problem drug users' criminal activity.

The total cost to the criminal justice system was estimate to be around £2.3 billion for the year 2000.

Early Retirement

Mr. Hollobone: To ask the Secretary of State for the Home Department how many of his Department's employees have taken early retirement in each year since 1997. [34038]

Mr. Charles Clarke: The number of employees that have taken early retirement in each year since 1997 is answered in the table.

Home Office employees who have taken early retirement in each year since 1997 are as follows:

	Home Office[1,2]	*Prison service*	*United Kingdom passport service*[3]	*Forensic science service*[4]
1997	24	n/a	0	7
1998	18	38	0	6
1999[5]	116	65	0	10
2000	15	61		4
2001	17	165		3
2002	22	92	10	2
2003	40	114		8
2004[6]	167	51		3
2005	3	47		4

n/a = not available.

[1] Home Office PIMMS figures 1997–2004. Fire Service College figures are included within HO figures for the period 1997 to 2002.

[2] Home Office Adelphi figures 2004–05 including manual figures for handover period.

[3] UKPS records 10 cases occurring after January 2000, and none before.

[4] FSS ceased to be a Home Office Agency on 5 December 2005 figures run to 3 December 2005.

[5] During 1997–99 there was a scheme to reduce staff across the HO, due to the introduction of the computerised system (Casework programme in Immigration and Nationality).

[6] A large early retirement scheme was run in 2004. Of the figures shown 145 of the HO early retirements, and 19 of the Prison Service early retirements fell under the scheme.

Energy Costs

Mrs. Villiers: To ask the Secretary of State for the Home Department how much was spent by his Department on *(a)* gas and *(b)* electricity in 2004–05. [51776]

Mr. Charles Clarke: The following table shows cost data for gas and electricity for the financial year 2004–05.

Electricity and gas costs for 2004–05

£

Fuel	*Home Office (excluding prisons)*[1]	*public sector prisons*[2]	*Total*
Gas	854,329	13,957,042	14,811,371
Electricity	3,360,523	16,267,718	19,628,242
Total	4,214,852	30,224,761	34,439,613

[1] These figures relate to key buildings only.

[2] Gas figures include natural gas and LPG.

Ketamine

Mrs. James: To ask the Secretary of State for the Home Department whether he plans to bring ketamine within the Misuse of Drugs Act 1971; and if he will make a statement. [56001]

Paul Goggins: Ketamine was brought under the control of the Misuse of Drugs Act 1971 on the 1 January 2006 as a class C controlled drug and under part 1 of schedule 4 of the Misuses of Drugs Regulations 2001.

Magic Mushrooms

David Davis: To ask the Secretary of State for the Home Department how many people were *(a)* arrested, *(b)* prosecuted, *(c)* convicted and *(d)* imprisoned for possession of magic mushrooms in the last period for which figures are available. [47709]

Hazel Blears: The requested data are not collected centrally.

MI5

Mark Durkan: To ask the Secretary of State for the Home Department (1) whether external cultural diversity training is given to recruits to MI5 in Northern Ireland; [53204]

(2) what arrangements are in place for monitoring membership of *(a)* loyal orders and *(b)* the Freemasons of members of MI5 in Northern Ireland; [53206]

(3) what the names are of the senior management of MI5 in Northern Ireland of grade equivalent to the Northern Ireland senior civil service; [53207]

(4) how many people have been externally recruited to MI5 in Northern Ireland in each of the last 10 years, broken down by community background; [53210]

(5) whether 50/50 recruitment is applied by M15 in Northern Ireland in respect of recruitment in Northern Ireland; [53215]

(6) if he will break down the MI5 workforce in Northern Ireland by religious composition; [53257]

(7) how many former officers of the Royal Ulster Constabulary work in MI5 in Northern Ireland; [53258]

(8) whether an audit has been conducted in the last five years of whether there is a neutral working environment in M15 in Northern Ireland. [53212]

Mr. Charles Clarke: It has been the policy of successive Governments not to comment on the details of intelligence and security agency staffing matters. Exceptionally, the name of the director general of the Security Service has been made public.

The Security Service is accredited to the Investors in People standard. Training and development for all staff, who are recruited from throughout the UK, includes training in human rights and cultural awareness. Systems are in place to ensure that the selection of new staff and decisions on promotion and postings are free of prejudice or bias, irrespective of gender, age, race, marital status, ethnic origin, working pattern, sexual orientation, disability or religion.

All recruits must pass a comprehensive vetting process which is standard for all national Government posts that require the highest level of security clearance.

Mark Durkan: To ask the Secretary of State for the Home Department what recent independent reviews there have been of intelligence gathering in M15 in Northern Ireland. [53214]

Mr. Charles Clarke: The work of the Security Service is subject to review by the independent Intelligence Services and Interception Commissioners established under the Regulation of Investigatory Powers Act 2000 and by the Intelligence and Security Committee established under the Intelligence Services Act 1994. It is also subject to scrutiny by the National Audit Office.

Mark Durkan: To ask the Secretary of State for the Home Department what the budget was for MI5 in Northern Ireland in each of the last five years; and what projections there are for its budget in each of the next five years. [53260]

Mr. Charles Clarke: The Security Service's budget, which includes its work in Northern Ireland, is paid from the single intelligence account, which also comprises the Secret Intelligence Service and Government communications headquarters.

For reasons of operational security and efficiency no breakdown of funding between or within the Agencies is published. The total budget for the most recent five year cycle published in the Intelligence and Security Committee's last annual report (Cm 6510) was as shown in the following table. An additional £85 million to be split over the three years 2005–08 was announced on 25 January 2006, (Hansard Cm 57–58 WS) to ensure early delivery of increased capacity to counter the threat from international terrorism in the light of the July bombings in London.

£ million

Financial year	*Resource*	*Capital*
2002–03	940	121.8
2003–04	1060.4	509.9
2004–05	1156.8	156.9
2005–06	1156.4	204.9
2006–07	1266	214.0
2007–08	1324	229

Mark Durkan: To ask the Secretary of State for the Home Department what recommendations of the Chilcott Report affected MI5 in Northern Ireland; and what progress has been made with the implementation of each. [53261]

Mr. Charles Clarke: I have nothing to add to the written ministerial statement on 16 July 2003, *Official Report*, columns 40–41WS, by the then Secretary of State for Northern Ireland concerning the Chilcott Report.

Mr. David Mills

Mr. Evans: To ask the Secretary of State for the Home Department (1) if he will list correspondence between his Department and *(a)* Italian prosecutors and *(b)* the

Italian Government relating to the investigation into Mr. David Mills; and if he will place copies of them in the Library; [56249]

(2) if he will place in the Library a copy of the letter from the Italian prosecutor to his Department relating to the investigation into Mr. David Mills. [56250]

Mr. McNulty *[holding answer 6 March 2006]*: Correspondence between the UK and other countries relating to mutual legal assistance and extradition is by its very nature confidential and the Home Office would normally neither confirm nor deny that such requests have been received or considered by UK authorities. I am aware that a number of documents relating to this case have apparently been leaked to the press.

As a result it is clear that advice on extradition matters has been sought and that requests for mutual legal assistance have been received and acted upon. Regardless of this development, and considering the Government's policy to decline to comment on leaked documents, I consider it right to retain the confidentiality of these documents and as such they will not be placed in the Library.

Muslim Communities

Keith Vaz: To ask the Secretary of State for the Home Department how many meetings he has had with representatives of UK *(a)* Muslim communities and *(b)* Muslim youth groups in each of the last three years. [54766]

Paul Goggins: My right hon. Friend The Home Secretary meets regularly with representative groups from all faith communities. Specific details on meeting with representatives of UK Muslim communities and Muslim youth groups are not separately available.

National Offender Management Service

Mr. Garnier: To ask the Secretary of State for the Home Department when the Chief Executive or Head of the National Offender Management Service will be appointed on a permanent basis; who is to be appointed; and what annual salary the appointee will receive. [55090]

Fiona Mactaggart: There is an open competition in progress to appoint a permanent Chief Executive of the National Offender Management Service. The salary range for the successful candidate is £150,000-£170,00, although more may be available for an exceptional candidate.

Number Plates

Mr. Pickles: To ask the Secretary of State for the Home Department what estimate he has made of the cost to local authorities of *(a)* introducing and *(b)* rolling out automatic number plate recognition via local authority-owned CCTV systems. [54547]

Hazel Blears: In local authority closed circuit television systems (CCTV), automatic number plate recognition (ANPR) technology utilises already existing camera networks. Where these systems have been upgraded to accommodate ANPR, the cost, in most cases, has been borne by the individual Crime and Disorder Reduction Partnerships on a case by case basis. It is not, therefore, possible to provide a centrally collated estimate of the cost of this facility to local authorities.

Mr. Pickles: To ask the Secretary of State for the Home Department what plans the Government have to encourage the use of automatic number plate recognition technologies; and if he will make a statement. [54550]

Hazel Blears: The Government have made £25 million capital funding available to the Police Service in years 2005–06 and a further £7.5 million in 2006–07 (£32.5 million in total) for the provision of Automatic Number Plate Recognition (ANPR) technology development. This investment addresses the fight against serious and organised crime, terrorism, volume crime and road traffic offending.

The Home Office has supported the Association of Chief Police Officers (ACPO) through funding the development of the National ANPR Data Centre as it meets many of its strategic aims for crime reduction. This facility will enable the Police and intelligence services to track vehicle movements throughout the United Kingdom mainly for the purposes of detection and prevention of serious crime. The ANPR facility specifically targets those who choose to use our roads illegally, leaving law-abiding citizens to go about their business uninterrupted.

Passports

Mr. David Hamilton: To ask the Secretary of State for the Home Department if he will estimate the cost of extending free passports to British citizens born after 2 September 1929 when they reach their 75th birthday. [55404]

Andy Burnham: The UK Passport Service has no plans at present to introduce free passports to all British citizens.

If this change were implemented, the estimated impact, based on the current £51 fee, is:

	Additional free passports	*Additional cost (lost revenue) (£)*
2006	52,776	2,692,000
2007	70,012	3,571,000
2008	96,150	4,904,000
2009	112,381	5,731,000
2010	141,540	7,219,000
5 year total	472,859	24,117,000

The current scheme entitles those born on or before 2 September 1929 to a free passport. The cost of this scheme in terms of lost revenue for 2005 was £7.3 million from 172,650 applications.

Police

Mr. Donohoe: To ask the Secretary of State for the Home Department how many injury award pensions are being paid by each police force in England and Wales. [55897]

Hazel Blears: The information requested is not held centrally.

Mr. Randall: To ask the Secretary of State for the Home Department how much funding was allocated to police services in *(a)* Uxbridge and *(b)* each London borough in each year since 1995. [53639]

Hazel Blears: The Commissioner of Police of the Metropolis is responsible for the operational management of, and allocation of funding by the force. I understand he has replied to the hon. Member directly. I will place a copy of the reply in the House Library.

Anne Snelgrove: To ask the Secretary of State for the Home Department how many police officers there were in South Swindon in each year since 1997. [52687]

Hazel Blears: The available information is given in the table. Figures are for the basic command unit for Swindon as information is not collected centrally for South Swindon. Data are only available from 2002–03 onwards.

Police officer strength in Swindon, (2003-05)

As at 31 March:	*Full-time equivalent*[1]
2003	335.1
2004	356.0
2005	355.1

[1] Police officer strength has only been collected by the Home Office at basic command unit level since 2003. Figures are based on full-time equivalent figures (including staff on career breaks or maternity/paternity leave) and have been rounded to the nearest whole number.

Mrs. Villiers: To ask the Secretary of State for the Home Department how much it costs on average to employ a *(a)* police officer and *(b)* community support officer for each of the first 10 years of service. [54514]

Hazel Blears: The only available information on police officer costs by length of service relates to police constables' pay and is provided in the table. The table shows the salary of a police constable on completion of initial training and the relevant regional allowance.

The pay scales for police constables range from £20,397 for a newly recruited officer, rising to £32,025 for an officer with 10 year's service. Additionally, a constable who has served at the top of the pay scale for one year has access to a competence-related threshold payment of £1,062 per year. Salary and other terms and conditions for police community support officers (PCSOs) are determined by the respective police authority.

We do not routinely maintain data on PCSO salaries. The most recent data we have on PCSO salary costs and allowances is contained in a report by Accenture on terms and conditions for PCSOs, which was published on three February. The report provides a range of data on basic pay rates and allowances paid to PCSOs and an analysis of the variations between forces. The report found that the typical average salary for PCSOs was £17,269 and the average total cash reward (basic salary plus allowances and overtime) was £20,526. The report is available on the Home Office website-http://police.homeoffice.gov.uk/community-policing/community-support-officers/

Constables' pay

Pay point	*With effect from 1 September 2005 (£)*
On commencing service	20,397
On completion of initial training	22,770
2	[1]24,090
3	25,563
4	26,367
5	27,213
6	27,990
7	28,683
8	29,601
9	31,392
10	[2]32,025

[1] *(a)*
[2] *(b)*

PR Companies

Mr. Weir: To ask the Secretary of State for the Home Department if he would list the public relations companies that have had contracts with *(a)* his Department, *(b)* each (i) non-departmental public body and (ii) executive agency for which his Department is responsible and *(c)* independent statutory body, organisation and body financially sponsored by his Department since May 1997. [39105]

Mr. Charles Clarke: The Home Office has no formal contracts with public relations companies. The list of companies whose services have been provided through the Central Office of Information since 1997 comprises: Citigate Westminster, Luther Pendragon, RED Consultancy August One, Citigate Communications, Grayling Forster Company, Geronimo, Harrison Cowley, Fishburn Hedges, Band and Brown, Blue Rubicon and Good Relations. The Police Information Technology Organisation let one contract in 2002 to The Team. Centrex let one contract in 2002 to Luther Pendragon. Information from independent statutory bodies and bodies financially sponsored by the Department is not held centrally, and to collate would exceed disproportionate cost.

Prisoners

Philip Davies: To ask the Secretary of State for the Home Department how many prisoners have access to Sky TV in their cells. [52069]

Fiona Mactaggart: 1,536 prisoners have access to Sky TV in their cells.

Prisons

Mr. Garnier: To ask the Secretary of State for the Home Department what facilities are provided by the Prison Service for interpreting and translating for those prisoners who cannot speak or read English. [55084]

Fiona Mactaggart: The Prison Service provides a large number of policy and guidance instructions in languages other than English, this includes the Prisoners' Handbook, the Foreign Nationals Handbook, Advice on Immigration, and important policy documents such as the Prison Service Order on Request Complaints.

The Prison Service has a national contract with a commercial company (Language Line) to provide telephone interpretation and translation of documents. Prisons also use accredited interpreters who will attend at the prison to assist with interviews for parole etc.

John Bercow: To ask the Secretary of State for the Home Department what recent estimate he has made of the proportion of the prison population suffering from alcohol-related problems. [55469]

Fiona Mactaggart: The most recent study reported that 63 per cent. of sentenced males and 39 per cent. of sentenced females were classed as hazardous drinkers in the year before coming into prison.

John Bercow: To ask the Secretary of State for the Home Department what recent representations he has received on alcohol abuse in the prison population; and what steps his Department is taking to reduce it. [55470]

Fiona Mactaggart: Representations have been received on the need to address the alcohol problem of prisoners. The National Offender Management Service (NOMS) takes very seriously the need to address the alcohol problem. NOMS has developed a Comprehensive Alcohol Strategy for Prisoners. Detoxification is available on reception in all local and remand prisons. Some prisons run alcohol awareness courses and Alcoholics Anonymous (AA) run groups in around 50 per cent. of prisons.

For those prisoners whose alcohol misuse is part of poly-drug use, the full range of wider drug treatment services is available. Additionally, general offending behaviour programmes can address the underlying causal factors which occur in alcohol-related crime.

John Bercow: To ask the Secretary of State for the Home Department what funding is available for alcohol treatment and rehabilitation for prisoners. [55471]

Fiona Mactaggart: Figures on local funding streams are not collated.

John Bercow: To ask the Secretary of State for the Home Department what assessment he has made of the effects of levels of funding available at HM Prison Grendon on the amount of time prisoners are able to spend with staff; and what impact this has upon their treatment. [55487]

Fiona Mactaggart: Grendon is allocated a budget to which it is expected to adhere. Recent temporary measures taken to prevent an overspend include a recruitment freeze and a curtailment of association on Friday evenings. Core therapy time has been protected, albeit the prison has temporarily postponed the recruitment of a therapist and three psychologists. A therapist has now been recruited and psychologists posts have been advertised.

John Bercow: To ask the Secretary of State for the Home Department what assessment he has made of the effect of levels of funding available at HM Prison Grendon on the quality of therapy being provided. [55488]

Fiona Mactaggart: Assessment of the quality of therapy provided is undertaken on an annual basis through the Royal College of Psychiatrists Community of Communities-led Correctional Services Accreditation Panel-approved audit process. If reductions in the level of funding have negatively affected the therapeutic process it will be reflected in this accreditation review. The results of the most recent audits are awaited.

John Bercow: To ask the Secretary of State for the Home Department what steps are being taken by his Department to improve the recruitment and retention of staff to the Prison Service. [55494]

Fiona Mactaggart: Work is under way to: examine retention in London establishments; improve recruitment levels of minority staff into the officer grade through a number of positive action measures and; to look at introducing schemes such as apprenticeships in construction grades where there is a national shortage within the industry. Advice, guidance on best practice, help and support is available to staff involved in recruitment.

Probation Services

Mr. Allen: To ask the Secretary of State for the Home Department pursuant to the answer of 9 January 2006, *Official Report*, columns 385–86W, on probation services, what steps he plans to take to ensure that faith-based organisations awarded such contracts do not *(a)* discriminate on the grounds of religion or belief in their employment policies, *(b)* proselytise in the course of their work under contract and *(c)* subject offenders to discrimination or harassment on the grounds of religion or belief. [55408]

Fiona Mactaggart: Contracts will be awarded to the most suitable provider based on the bid submitted. Successful bids will need to comply with the terms of the contract, which will include diversity requirements, and will need to demonstrate they are compliant with legislation on race and religious discrimination. All contracts will be reviewed as part of the Race Equality Impact Assessment process.

Public Order

Mr. Holloway: To ask the Secretary of State for the Home Department what proportion of antisocial behaviour orders issued in Gravesham has been breached. [54922]

Hazel Blears: Antisocial behaviour orders (ASBOs) were introduced under the Crime and Disorder Act 1998 and have been available to the courts since 1 April 1999. A table giving a breakdown by the local government authority area in which prohibitions are imposed within ASBOs is available on the Crime Reduction website at www.crimereduction.gov.uk.

This table gives data by year since ASBOs were introduced up to 30 June 2005 (latest available). ASBO breach data are available at Criminal Justice System (CJS) area level only and are currently available from 1 June 2000 to 31 December 2003 for ASBOs issued since one June 2000. During this period within the Kent CJS area, in which Gravesham is located, notification has been received of seven persons breaching their ASBO on one or more occasions.

Lynne Featherstone: To ask the Secretary of State for the Home Department what sentences have been handed down for breaches of anti-social behaviour orders in each London borough in each year since their establishment; how many of each type have been handed down in each case; and if he will make a statement. [55005]

Fiona Mactaggart: Antisocial behaviour orders (ASBOs) breach data held centrally only cover breach proceedings where there has been a conviction and are currently available from 1 June 2000 to 31 December 2003 for ASBOs issued since 1 June 2000. These data are available at criminal justice system area level only. The available information for Greater London is given in the following table.

The number of ASBO breach occasions, as notified to the Home Office, within Greater London, from 1 June 2000 to 31 December 2003[1], by result

Period	Discharge	Fine	Community sentence	Custody	Other	Total
2000	0	1	0	1	0	2
2001	0	3	4	12	0	19
2002	0	3	3	15	2	23
2003	2	16	5	44	5	72
Total	2	23	12	72	7	116

[1] Breaches are counted in this table on a persons basis, i.e. where the order has been breached on more than one occasion within the same period, a person is counted once only within that period.

Servicemen (Custodial Sentences)

Mr. Garnier: To ask the Secretary of State for the Home Department how many members of the armed services are serving custodial sentences imposed by courts-martial in *(a)* civilian adult prisons and *(b)* young offender institutions in England and Wales; and how many such people there were in each of the last five years. [55091]

Mr. Touhig: I have been asked to reply.

Under the Service Discipline Acts, if a member of the armed forces is sentenced to a custodial sentence by a court-martial, they are automatically dismissed from the service, other than in the most exceptional circumstances. No serving personnel sentenced by a court-martial are imprisoned in civilian adult prisons or Young Offenders' Institutions in England or Wales.

The following table shows the numbers of personnel sentenced to custodial sentences in each of the last five years.

	Number of individuals sent to civilian adult prison	Number of individuals sent to YOI
2001		
RAF	1	0
Royal Navy	2	0
Army	24	1
2002		
RAF	1	0
Royal Navy	0	0
Army	24	2
2003		
RAF	2	0
Royal Navy	1	0
Army	18	1
2004		
RAF	3	0
Royal Navy	0	0
Army	15	1
2005		
RAF	0	0
Royal Navy	1	0
Army	18	0

Social Integration

Keith Vaz: To ask the Secretary of State for the Home Department what steps the Government are taking to increase social integration of Muslims in the UK. [54624]

Paul Goggins: The Government are committed to improving the life chances of all people.

The Government's Strategy to increase race equality and community cohesion—'Improving Opportunity, Strengthening Society', places particularly emphasis on improving the life chances of those suffering greatest disadvantage and living in areas experiencing high levels of social deprivation. It provides for programmes tailored to the needs of specific groups, including the Muslim community.

NORTHERN IRELAND

Avian Influenza

Mark Durkan: To ask the Secretary of State for Northern Ireland what cross-border preparations have taken place for the potential impact of avian influenza; and what plans have been agreed by the two administrations. [55872]

Angela E. Smith: The Department of Agriculture and Rural Development (DARD) is working closely with the Department of Agriculture and Food (DAF) in the Republic of Ireland in taking measures to deal with the threat of avian influenza. Given the mutual interest in ensuring that any outbreak on the island is identified quickly as a first step to its eradication and recognising the importance of the poultry industry, DARD officials have had frequent contact with their counterparts in Dublin over recent months to exchange information and discuss the respective approaches. These discussions have covered such issues as wild bird surveillance, the assessment of risk, preventive actions taken to date in both jurisdictions, and contingency planning. DAF officials have participated as observers in the exercises DARD has held to test its contingency plan and DARD officials have participated as observers in the Republic of Ireland. DARD has been invited to send an observer to meetings of the recently convened Republic of Ireland's Avian Influenza Expert Advisory Group.

The control of Avian Influenza is based on an EU legal framework, which means that the preventive measures being taken North and South, and the control

measures that would be taken in the event of a disease outbreak, are broadly similar. Arrangements are in place to ensure that there is effective communication between the two Departments in the event of an outbreak and to regulate trade in accordance with EU requirements.

Dangerous Wild Animals

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how many dangerous wild animals were identified and recovered in Northern Ireland in each of the last five years. [55154]

Angela E. Smith: As a Commencement Order for the Dangerous Wild Animals (Northern Ireland) Order 2004 has not been made there is currently no licensing arrangement for keepers of Dangerous Wild Animals (DWAs) in Northern Ireland.

Since the Dangerous Wild Animals (Northern Ireland) Order 2004 gained Royal Assent the Department of the Environment has been building its capacity to deal with the new legislation. Recently resources have been secured to appoint an officer to oversee the implementation of the legislation and the Department is at an advanced stage in negotiations with an external provider to provide safe DWA holding facilities. It is expected that this holding centre will be available late in 2006 which will enable the Commencement Order to be progressed.

Domestic Property Ownership

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what the change in the number of domestic properties under the ownership of the Northern Ireland Housing Executive was between 1995 and 2005. [56574]

Mr. Hanson: The Housing Executive at the beginning of 1995 owned 147,500 dwellings and at the end of December 2005 the total was 98,500.

Dual Carriageway

Mr. McGrady: To ask the Secretary of State for Northern Ireland (1) when the Department plans to commence work on the new dual carriageway between Dungannon and Ballygawley; and what the estimated cost of this work is; [54583]

(2) when the Department plans to commence work on the Cherrymount Link at Enniskillen; and what the estimated cost of the work is. [54584]

Mr. Woodward: The Chief Executive of Roads Service (Dr. Malcolm McKibbin) has been asked to write to hon. Gentleman in response to this question.

Letter from Dr. Malcolm McKibbin, dated 7 March 2006:

You recently asked the Secretary of State for Northern Ireland two Parliamentary Questions regarding the commencement of road schemes:

when the Department plans to commence work on the new dual carriageway between Dungannon and Ballygawley; and what the estimated cost of this work is (54583); and

when the Department plans to commence work on the Cherrymo9unt Link at Enniskillen; and what the estimated cost of the work is. (54584)

I have been asked to reply as these issues fall within my responsibility as Chief Executive of Roads Service.

Subject to the availability of funding and the completion of the relevant statutory procedures and economic appraisals, it is anticipated that construction of the A4 Dualling Scheme between Dungannon and Ballygawley is likely to commence in the 2007/2008 financial year. The current estimated cost of the scheme is £102 million.

It is anticipated that construction of the Cherrymount Link is also likely to commence in the 2007/2008 financial year, subject again to the availability of funding and the completion of the relevant statutory procedures and economic appraisals. The current estimated cost of the scheme, as identified in the Regional Strategic Transport Network Transport Plan is £3.8 million, however this will be revised to reflect the additional works envisaged as a result of increased development constraints and poor ground conditions in the area.

I hope this information is helpful.

Health and Social Services Councils

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how many cases each of the health and social services councils in Northern Ireland have dealt with in each of the last three years for which figures are available. [56575]

Mr. Woodward: The information in the following table shows the number of people assisted by the health and social services councils, either in relation to complaints or with advocacy support.

	NHSSC	*EHSSC*	*SHSSC*	*WHSSC*
2002–03	675	n/a	84	n/a
2003–04	804	1176	100	40
2004–05	803	1442	100	42

n/a = not available.

Key Persons Protection Scheme

Mr. Lidington: To ask the Secretary of State for Northern Ireland how many people were given help under the Key Persons Protection Scheme in each year between 2001–02 and 2004–05; how many have been given such help in 2005–06; what the cost of the scheme (i) was in each year and (ii) has been in 2005–06; and if he will make a statement. [56530]

Mr. Woodward: The numbers of people admitted to the Key Persons Protection Scheme between 2001–02 and 2004–05 are listed in the following table. The information is only available in calendar years:

	Number admitted
2001	99
2002	565
2003	433
2004	89
2005	45
2006 (to date)	2

The cost of the Key Persons Protection Scheme is given in the following table and the figures recorded include new works, maintenance and running costs, removal costs, staffing costs and expenditure associated with travel. The costs are calculated in financial years.

BEST COPY AVAILBLE

	Cost (£ million)
2001–02	4.9
2002–03	11
2003–04	13
2004–05	7.5
2005–06	[1]4.5

[1] Anticipated spend.

Mental Health

Chris Ruane: To ask the Secretary of State for Northern Ireland how many and what percentage of people suffered from mental illness in each *(a)* ward, *(b)* county and *(c)* constituency in Northern Ireland in the last period for which figures are available. [55568]

Mr. Woodward: Information on the total number of people suffering from mental illness is not available as many people with such problems are not in contact with health care providers. However, information is available on the number of registered patients in each GP practice in Northern Ireland as recorded on the practice's Mental Health Disease Register.

The following tables provide figures on the number of such patients and the percentage of the local government district (LGD)/parliamentary constituency that they form. Note that the LGD/parliamentary constituency is based on the location of the GP practice according to the practice postcode rather than where the patient actually resides. Information presented in this way at electoral ward level would not be considered reliable.

(A) Local government district

Local government district (LGD)	Number of mental illness patients on GP disease register	Percentage of registered list population
Antrim	309	0.62
Ards	381	0.54
Armagh	385	0.76
Ballymena	271	0.41
Ballymoney	140	0.58
Banbridge	348	0.69
Belfast	2,589	0.71
Carrickfergus	210	0.54
Castlereagh	256	0.51
Coleraine	364	0.61
Cookstown	244	0.72
Craigavon	557	0.65
Derry	666	0.56
Down	431	0.63
Dungannon	422	0.76
Fermanagh	370	0.60
Larne	98	0.37
Limavady	142	0.43
Lisburn	496	0.53
Magherafelt	263	0.70
Moyle	143	0.66
Newry and Mourne	956	1.02
Newtownabbey	410	0.63
North Down	419	0.55
Omagh	424	0.80
Strabane	292	0.71
Northern Ireland total	11,586	0.65

Note:
Practices have been assigned to a local government district (LGD) based on their location as derived from the practice postcode. Disease register counts and registered list populations have been derived by aggregating the appropriate practices together.
Source:
Payment Calculation and Analysis System (PCAS) as at 14 February 2005.

(B) Parliamentary constituency

Parliamentary constituency	Number of mental illness patients on GP disease register	Percentage of registered list population
Belfast East	659	0.69
Belfast North	1,017	0.71
Belfast South	775	0.77
Belfast West	548	0.57
East Antrim	308	0.47
East Londonderry	506	0.55
Fermanagh and South Tyrone	744	0.68
Foyle	666	0.56
Lagan Valley	487	0.52
Mid Ulster	555	0.70
Newry and Armagh	1,088	0.93

West Tyrone	716	0.76
Northern Ireland total	11,586	0.65

Note:
Practices have been assigned to a local government district (LGD) based on their location as derived from the practice postcode. Disease register counts and registered list populations have been derived by aggregating the appropriate practices together.
Source:
Payment Calculation and Analysis System (PCAS) as at 14 February 2005.

Multiple Sclerosis

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many multiple sclerosis sufferers in the Southern Health Board are waiting to commence *(a)* beta interferon and *(b)* glatiramer treatment. [56379]

Mr. Woodward: There were 17 patients resident in the Southern Board area awaiting beta interferon or glatiramer treatment at 31 January 2006 (excluding patients who are currently suspended from the waiting list). The decision about which disease-modifying drug a patient receives is made after they come off the list and prepare to start treatment.

National Lottery

Chris Ruane: To ask the Secretary of State for Northern Ireland how much lottery funding has been spent in each ward of Northern Ireland. [55555]

Mr. Hanson: This information is not available in the form requested. national lottery distributors do not hold information on their awards by ward area or by monies spent.

Police Service

Dr. Alasdair McDonnell: To ask the Secretary of State for Northern Ireland whether the Police Service of Northern Ireland unit established to tackle the targeting of elderly people by criminal gangs is part of a long-term strategy. [54597]

Mr. Woodward: The Government are committed to reducing crime affecting older persons and have been proactive in implementing a range of initiatives which have helped reduce crime and fear of crime among older people. The establishment of a specialist unit within the Police Service of Northern Ireland to tackle aggravated burglary is one element of the police strategy to deter

and detect those involved in committing this type of offence against older persons. The Community Safety Unit of the Northern Ireland Office is also currently developing a strategy for the safety of older persons which will take into account the range of ongoing initiatives.

Public Appointments

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how many people appointed to non-departmental public bodies (NDPB) in Northern Ireland received *(a)* between £10,000 and £19,999, *(b)* between £20,000 and £29,999 and *(c)* over £30,000 in respect of their duties connected with the NDPBs during 2005. [56141]

Angela E. Smith: The information sought is not available in the required format, and could be determined only at disproportionate cost. However, the Northern Ireland Office (NIO) Departmental Report 2005 provides details of remuneration rates for the Department's public appointments and the Public Appointments Annual Report produced by the Office of the First Minister and the Deputy First Minister (OFMDFM) provides similar details for all other public appointments in Northern Ireland.

The NIO Departmental Report 2005 and the Public Appointments Ninth Annual Report are available in the Library of the House. The 2006 NIO report will be available in April and the next OFMDFM report will be published in September.

Public Transport

Chris Ruane: To ask the Secretary of State for Northern Ireland how much was spent on public transport in Northern Ireland in real terms in each of the last 30 years. [55561]

Mr. Woodward: Information is only readily available for the past 20 years. The levels of funding provided by government for public transport in Northern Ireland during that period were as follows:

Source/year	*Purpose*	*Amount (£)*
DOE Appropriation Accounts		
1985–86	Railway Services:	10,677,000
	Road Passenger Services:	11,282,000
1986–87	Railway Services:	12,583,000
	Road Passenger Services:	10,945,000
1987–88	Railway Services:	10,298,000
	Road Passenger Services:	12,793,000
1988–89	Railway Services:	9,796,000
	Road Passenger Services:	11,344,000
1989–90	Railway Services:	11,299,000
	Road Passenger Services:	13,430,000
1990–91	Railway Services:	11,164,000
	Road Passenger Services:	13,875,000
1991–92	Railway Services:	11,989,000
	Road Passenger Services:	15,477,000
1992–93	Railway Services:	12,841,000
	Road Passenger Services:	16,062,000
1993–94	Railway Services:	13,486,000
	Road Passenger Services:	16,576,000
1994–95	Railway Services:	11,543,000
	Road Passenger Services:	16,537,000
1995–96	Railway Services:	12,877,000
	Road Passenger Services:	18,198,000

	Road Passenger Services:	24,589,000
2003–04	Railway Services:	41,170,000
	Road Passenger Services:	33,494,000
2004–05	Railway Services:	69,574,000
	Road Passenger Services:	36,967,000

Royal Victoria Hospital

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what investigations there have been into the allegations by consultant surgeons at the Royal Victoria hospital in a letter dated 18 October 2004 to the chief executive of the Royal group of hospitals of obstruction in getting gravely ill patients into theatre for necessary surgery. [56378]

Mr. Woodward: The allegations were investigated by the Royal group of hospitals and considered by the Regulation and Quality Improvement Authority (RQIA) as part of its independent review into the lessons to be learnt from the death of Mrs. Janine Murtagh.

The RQIA's independent review found that

" . . . in this instance, there was no evidence to substantiate the allegations . . . "

Sure Start

Chris Ruane: To ask the Secretary of State for Northern Ireland how much funding has been allocated to Sure Start schemes in Northern Ireland in each year since they were introduced. [55552]

Mr. Woodward: The information requested is set out in the following table:

Funding for sure start schemes in NI

	£ million *Northern Ireland allocation for sure start*
2000–01	[1]2
2001–02	5.8
2002–03	6.6
2003–04	8.5
2004–05	8.8
2005–06	9.1

[1] From July 2000.

Chris Ruane: To ask the Secretary of State for Northern Ireland how many Sure Start scheme places there are in each *(a)* ward, *(b)* county and *(c)* constituency in Northern Ireland. [55553]

Mr. Woodward: There are currently 25 Sure Start projects in Northern Ireland offering just over 23,000 children in the 0–4 age range access to health care and family support services as opposed to scheme places.

Table 1 shows the number of 0–4's who have access to Sure Start Services at Ward level. There are a total of 582 wards in Northern Ireland and Sure Start projects cover 102 wards.

Teacher Recruitment

Sammy Wilson: To ask the Secretary of State for Northern Ireland what steps he is taking to encourage the recruitment of newly qualified teachers in Northern Ireland. [54640]

Angela E. Smith: The Department has issued guidance to schools indicating that wherever possible preference should be given to newly qualified teachers, or experienced teachers seeking to return to employment, rather than prematurely retired teachers, when filling vacancies. Schools have also been advised that they should recruit to vacancies on a permanent rather than temporary basis unless the vacancy is clearly of a temporary nature.

Moreover, following the review of teacher education in Northern Ireland which is being carried out jointly by the Department of Education and the Department for Employment and Learning, the Departments jointly will be exploring means by which newly qualified teachers can have greater stability in employment during their early years of teaching.

Translink

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what the average percentage increase was in standard fares on *(a)* buses and *(b)* trains under the auspices of Translink in each of the last five years. [56417]

Mr. Woodward: The average percentage fare increase for Translink bus and rail services for the most recent five years are included in the following table:

% increase on previous year	Fare increases from 2001–02 to 2005–06 Ulsterbus	Metro (Citybus until February 2005)	NIR
2001–02	5	5	5

Young People

Chris Ruane: To ask the Secretary of State for Northern Ireland how many *(a)* youth workers and *(b)* social workers there are per 1,000 children and young people in each (i) ward, (ii) county and (iii) constituency in Northern Ireland. [55550]

Mr. Woodward: The available information follows.

(a) The information is not available in the format requested. Youth workers, in Northern Ireland are employed by the five Education and Library Boards. They work within the statutory and voluntary sector on a full-time and part-time basis. The number of full-time youth workers working within the statutory sector in Northern Ireland is detailed in table 1 as follows. However, this is a small fraction of the youth worker services provided within Northern Ireland. Full details of all statutory and voluntary youth workers are available from the Department of Education.

Table 1: Number of full-time youth workers employed in the statutory sector in Northern Ireland by Education and Library Board as at February 2006

CABINET OFFICE

Ecovert FM

Mr. Liddell-Grainger: To ask the Chancellor of the Duchy of Lancaster if he will list the functions carried out by Ecovert FM in *(a)* the Cabinet Office and *(b)* Number 10 Downing street. [55309]

Mr. Jim Murphy: The Downing street complex forms an integral part of the Cabinet Office estate. The key functions carried out by Ecovert FM on the Cabinet Office estate are shown in the list. Alternative arrangements are in place in some buildings for some of the services listed.

Ecovert FM key functions

- Maintenance of plant rooms and equipment
- Planned preventative maintenance
- Landscaping
- Off-site storage
- Security
- Catering and vending
- Cleaning
- Pest control
- Waste disposal and recycling
- Reception services
- Postal, messenger and courier services
- Environmental management
- Space planning and office moves
- Health and Safety
- Signage
- Acquisitions and disposal of property
- Building surveys
- Lease, rent and tenant issues

Official Residences (Council Tax)

Mr. Pickles: To ask the Chancellor of the Duchy of Lancaster what plans the Cabinet Secretary has to issue new *(a)* rules, *(b)* guidance and *(c)* procedures on council tax payments for Ministers with official residences. [56225]

Mr. Jim Murphy: I refer the hon. Member to the statement made by my right hon. Friend the Deputy Prime Minister on 12 January 2006, *Official Report*, column 782W.

Strategy Unit

Mr. Liddell-Grainger: To ask the Chancellor of the Duchy of Lancaster what the total cost of the Number 10 Strategy Unit was in February 2006; how many people were employed by the Unit; and how many were *(a)* civil servant and *(b)* political appointments. [55428]

Mr. Jim Murphy: For Strategy Unit costs, I refer the hon. Member to the answer I gave to the hon. Member for North East Hertfordshire (Oliver Heald) on 27 February 2006, *Official Report*, column 43W.

45.74 full time equivalent (FTE) staff were employed by the Strategy Unit as at 28 February 2006. This total excludes six members of Strategy Unit staff who are on loan to other government departments, and are being paid by other government departments for the duration of the loan. The total also excludes five FTE individuals who were given an offer of employment with the Strategy Unit but were not in post as at 28 February 2006.

Of the 45.74 FTE staff, 42.4 FTE were civil servants. There were no political appointments.

Websites

Mr. Liddell-Grainger: To ask the Chancellor of the Duchy of Lancaster how many websites the Government are responsible for. [55398]

Mr. Jim Murphy: The Cabinet Office does not hold figures on the number of websites operated across Government.

A domain name does not necessarily mean a website, a proportion of domain names will be used as redirects to other websites and for email systems.

Figures are held on the number of .gov.uk domain names that have been registered for use. At 31 January 2006 there were 3,746 approved gov.uk domain names for all levels of central, local and devolved government within the UK.

FOREIGN AND COMMONWEALTH AFFAIRS

Afghanistan

Mr. Clegg: To ask the Secretary of State for Foreign and Commonwealth Affairs what estimate he has made of the number of *(a)* civilians, *(b)* Afghan soldiers and *(c)* coalition soldiers who have been killed in Afghanistan in each quarter since January 2002. [56736]

Dr. Howells: Reports of the number of fatalities in Afghanistan since 2002 vary widely and are difficult to confirm.

In 2005, a total of 1,500 civilians and members of Afghan and international security forces are estimated to have lost their lives as a result of the persistent insurgency and general lawlessness.

Estimates for Afghan civilian and military fatalities since 2002 range from 4,000 to 10,000. Up to February 2006, the US-led operation enduring freedom coalition suffered 255 fatalities. Up to October 2005, the NATO-led international security assistance force suffered 55 fatalities.

Arms Trade

Andrew George: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with his counterparts in *(a)* the United States of America and *(b)* member states of the EU in respect of the establishment of an international arms trade treaty. [56168]

Dr. Howells: The Government are committed to pursuing an international treaty on the trade in all conventional arms. We discuss this initiative regularly with US and EU counterparts. Most recently with the US, our ambassador to the Conference on Disarmament discussed the initiative with officials in Washington on 27 February. During our presidency of the EU in the latter half of 2005, EU member states committed

themselves to securing the start of a formal process at the United Nations at the earliest opportunity. We are now working to make this commitment a reality.

Chechnya

Mr. Clegg: To ask the Secretary of State for Foreign and Commonwealth Affairs what estimate he has made of the number of *(a)* human rights and *(b)* other humanitarian personnel working in Chechnya. [56733]

Mr. Douglas Alexander: The UN Office for the Co-ordination of Humanitarian Affairs confirms that around 40 humanitarian organisations currently work in Chechnya. Not all have a permanent presence in Chechnya and very few have international staff based there. If international staff visit at all, they are usually sent in only for the day. We estimate that these organisations have over a 100 staff, both international and local, working on rotation in Chechnya. But we have no means of assessing with any precision the number of international aid workers who have passed in and out of Chechnya. Many non-governmental organisations (NGOs) have offices in Chechnya staffed by locals.

Human rights work complements much of the work done by the humanitarian organisations. We estimate that there are fewer than 10 human rights organisations operating in Chechnya, but there are no accurate estimate of numbers of either organisations or staff operating in the region. Specific human rights NGOs do have local staff in Chechnya, and human rights workers based elsewhere in the Russian Federation regularly travel to Chechnya.

Correspondence

Sir Gerald Kaufman: To ask the Secretary of State for Foreign and Commonwealth Affairs when he will reply to the letter to him dated 12 January from the right hon. Member for Manchester, Gorton, with regard to Attiya Rani. [55760]

Dr. Howells: My right hon. Friend the Foreign Secretary replied to my right hon. Friend regarding Ms Attiya Rani, on 3 February 2006.

Costa Rica

Keith Vaz: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the recent elections in Costa Rica. [55677]

Mr. Douglas Alexander: Presidential elections took place in Costa Rica on 5 February 2006. The Costa Rican Election Tribunal has not yet been able to make an official announcement since it has yet to resolve some 200 nullity pleas. A formal result is expected soon and the presidential inauguration is due to take place on 8 May.

The head of the Election Observation Mission from the Organisation of American States (OAS) has praised the peaceful conduct of the elections and the functioning of the electoral system.

Egypt

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the imprisonment of Ayman Nour in Egypt. [56109]

Dr. Howells: On 27 December 2005, the UK, speaking as the presidency of the European Union, made a statement on the verdict and imprisonment of Ayman Nour. The full text of the statement can be found at: http://www.eu2005.gov.uk/servlet/Front?pagename=OpenMarket/Xcelerate/ShowPage&c=Page&cid=1107293561746&a=KArticle&aid=1134650253515

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on President Mubarak's decision to postpone local elections in Egypt scheduled for April. [56112]

Dr. Howells: The People's Assembly approved legislation on 14 February, which postponed local government elections for two years, to allow efforts to reform local government on more democratic and decentralised principles. President Mubarak pledged to undertake political reform during his election campaign for the first ever multi-party presidential elections.

EU Accounts

Derek Wyatt: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps he took during the Presidency of the EU to try to ensure that its accounts were approved by the EU auditors. [56675]

Mr. Douglas Alexander: It was disappointing that the European Court of Auditors (EGA) was unable last November to give a positive Statement of Assurance on the EC Budget for 2004. It is encouraging, however, that there have been noticeable improvements since 2003 with pre-accession expenditure once again being cleared, as it was in 2002, and, for the first time, certain areas of agricultural expenditure also gaining clearance. This has meant that around 35 per cent. of EC Budget expenditure was cleared in 2004 compared with only 6 per cent. in 2003. Much of the European Court of Auditors' difficulty in giving a positive assurance on the EU budget payments as a whole arises in the budget sector managed by the member states, who are responsible for 80 per cent. of spending under the EU budget. That is why, during our Presidency, we encouraged member states to take on a greater share of the responsibility for signing off the accounts. We succeeded in securing an agreement that will contribute to bringing about a step change in the EU's financial management and control at a meeting of EU Economic and Finance Ministers on 8 November 2005. We hope that, over time, implementation of the action points in these conclusions will enable the EGA to give positive Statements of Assurance to the EC Budget in future years.

Guantanamo Bay

Mr. Clegg: To ask the Secretary of State for Foreign and Commonwealth Affairs what visits to Guantanamo Bay have been made by UK officials since 2001, broken down by *(a)* Government Department or agency and *(b)* the date of the visit. [55318]

Dr. Howells: Foreign and Commonwealth Office (FCO) officials made nine visits to the US Naval Base at Guantanamo Bay, between January 2002 and October 2004, to check on the British detainees' welfare. These visits took place on the following dates: January, February, May and November 2002; April and September 2003; March, July and October 2004. An FCO official accompanied five British detainees back to the UK at the end of the March 2004 visit. An FCO official also visited Guantanamo Bay in January 2005 to accompany the last four British detainees back to the UK.

UK officials have visited Guantanamo Bay to ask detainees about matters relating to the UK's national security. An account of the intelligence and security agencies' contact with detainees at Guantanamo Bay is set out in the Intelligence and Security Committee's 2005 report, "The Handling of Detainees by UK Intelligence Personnel in Afghanistan, Guantanamo Bay and Iraq". This can be found on the ISC website at: www.cabinetoffice.gov.uk/intelligence.

Hajj Pilgrimage

Keith Vaz: To ask the Secretary of State for Foreign and Commonwealth Affairs what assistance his Department provides to those on the Hajj pilgrimage. [41684]

Dr. Howells: Since 2000, the Foreign and Commonwealth Office (FCO) has worked in partnership with leading representatives of national Muslim organisations on the Hajj Advisory Group to organise the annual British Hajj Delegation (BHD). The FCO provides funding for the delegation which this year was approximately £85,000. The BHD is based in Mecca during the Hajj season and provides medical, pastoral and consular assistance to British Muslims at the Hajj. Lord Patel of Blackburn has led the BHD for the last six years. For the most recent Hajj in January 2006, the BHD included 10 volunteers (nine doctors who run a medical clinic and one counsellor) and two members of staff from our consulate-general in Jeddah enabling the FCO to give consular assistance on the ground. This was particularly vital this year following the stampede at Mina which involved the deaths of three British nationals. The medical clinic also operated over a 15-day period during which the doctors assisted over 7,000 of the estimated 25,000 British pilgrims taking part in the Hajj.

Human Trafficking

Mrs. James: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with other European Union countries about the trafficking of women for *(a)* prostitution and *(b)* other work in the sex industry. [56008]

Dr. Howells: My right hon. Friend the Foreign Secretary discussed these issues at the European Council meeting in December 2005, at which the European Action Plan on Trafficking in Human Beings was agreed.

Iran

Mr. Holloway: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with his *(a)* EU and *(b)* Iranian counterparts on Iran's nuclear programme; and if he will make a statement on that programme. [54924]

Dr. Howells: EU Foreign Ministers discussed Iran's nuclear programme when they met on 27 February. They regretted Iran's decision to withhold co-operation with the International Atomic Energy Agency (IAEA); deplored Iran's resumption of enrichment-related activities; reaffirmed the EU's commitment to a diplomatic solution and called on Iran to reconsider its position on its nuclear issues activities and other areas of concern in order to avoid further deterioration of its relationship with the EU.

At Iranian request, Ministers and senior officials from the UK, France and Germany and the EU High Representative met the Secretary of the Iranian Supreme National Security Council, Dr. Ali Larijani, on 3 March. The aim of the E3/EU in agreeing to the meeting was to enable them to listen to what Dr. Larijani had to say about Iran's response to the resolution passed by the IAEA Board of Governors on 4 February. The resolution deemed it necessary that, among other things, Iran should re-establish a full and sustained suspension of all enrichment related and reprocessing activities, including research and development, to be verified by the Agency. Regrettably, Dr. Larijani was not prepared to undertake that Iran would meet the IAEA Board's requests.

Mr. Dismore: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will review the proscribed status of the People's Mojahedin Organisation of Iran; and if he will make a statement. [55748]

Dr. Howells: The Mojahadin-e Khalq was proscribed in the UK in March 2001.

My right hon. Friend the then Home Secretary decided to proscribe this group because it met the criteria under the terrorism legislation. This decision was endorsed by Parliament.

The list of proscribed organisations is kept under constant review. Under section 4(2) of the Terrorism Act 2000 an organisation or affected person may apply to the Home Secretary for an organisation to be deproscribed.

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations Iran has made to the EU3 regarding the supply of conventional weapons to Iran; and if he will make a statement. [56113]

Dr. Howells: Between December 2004 and August 2005, the E3/EU held talks with Iran under the Paris Agreement. These covered possible long-term arrangements for Iran's nuclear programme and other areas of mutual interest. During the course of these negotiations, Iran expressed concern about European export licence decisions. In August 2005, the E3/EU proposed a framework for a long-term agreement covering Iran's nuclear programme and other political, economic and technological issues. In these proposals, the E3/EU expressed their willingness to take part in a

joint export control workshop in Tehran, which would allow for exchanges on the implementation of United Nations Security Council Resolution 1540 and national/EC laws. Iran rejected the E3/EU proposals without serious consideration. A few days later Iran resumed uranium conversion activities in violation of the Paris Agreement, since when there have been no further negotiations under the Paris Agreement.

The UK's national embargo on Iran was introduced in 1993, amended in 1998, and covers all goods and technology on the Military List as well as items entered in Group O (Nuclear List) in Annex 1 of the European Council Regulation (EC) 1334/2000 on the export of dual-use items and technology. There are two exceptions to this embargo, namely (i) goods essential for the safety of civil aircraft and air traffic control systems; and (ii) radioactive material in the form of sources for medical equipment and deuterium labelled compounds for medical use.

Iraq

Mr. Clegg: To ask the Secretary of State for Foreign and Commonwealth Affairs what estimate he has made of the number of civilians who have been killed in Iraq in each month since January 2005. [56735]

Dr. Howells: We believe that the Iraqi Government are best placed to monitor the deaths of their own civilians. The Iraqi Ministry of Health published figures last year which show that there were 6,629 Iraqi deaths and 23,838 wounded between April 2004 and April 2005. The Iraqi Government have not yet published comprehensive figures for the period beyond April 2005.

Jamil el-Banna

Sarah Teather: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) when the most recent occasion was on which officials in his Department discussed the case of Jamil el-Banna with the United States Administration; [55031]

(2) how many times *(a)* he, *(b)* Ministers in his Department and *(c)* officials in his Department raised the subject of Jamil el-Banna's captivity in Guantanamo Bay with the United States Administration in the last three years; [55043]

(3) how many letters *(a)* he, *(b)* Ministers in his Department and *(c)* officials in his Department have written to the United States Administration regarding the case of Jamil el-Banna. [55044]

Ian Pearson: It is long-standing policy that the Government cannot make consular representations for individuals who are not British nationals.

However, we agreed exceptionally in March and April 2005 that the then Foreign and Commonwealth Office Minister (right hon. Baroness Symons) should meet the families of those detainees, including Jamil el-Banna whom we knew had been resident in the UK, but who are not British Nationals. She then passed on the concerns expressed to us by the families to the US authorities in April 2005.

We continue to raise concerns of a humanitarian character regarding detentions at Guantanamo with the US authorities on a regular basis. We have raised issues relating to detainees who were formerly resident in the UK, including Mr. el Banna's case, with the US on a number of occasions since April 2005, as part of these regular exchanges.

Kurdish Region

Bob Spink: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on *(a)* political progress and *(b)* the impact of unification in the two Kurdish administrations since the war in the Kurdish region of Iraq. [54782]

Dr. Howells: The Kurdish people have a proud tradition of political participation. Following the removal of the former regime, the two Kurdish administrations agreed to form one unified Kurdish Regional Government (KRG). This will be a challenging task—merging the two governments involves downsizing from 27 to 16 Ministries and reunifying some 400,000 civil servants from the Patriotic Union of Kurdistan (PUK) and more than 500,000 civil servants from the Kurdish Democratic Party (KDP).

This decision is testament to the Kurds commitment to democratic rule. Nechirvan Barzani, from the KDP, has been named Prime Minister of the KRG and the position of Deputy Prime Minister will be filled by a member from the Patriotic Union of Kurdistan. The KRG continues to play a crucial role in promoting the formation of a government of national unity, and has advocated a strong central government.

Lebanon

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps are being taken by his Department to promote and foster the transition to democracy in Lebanon. [55434]

Dr. Howells: The Government are actively supporting the transition to democracy in Lebanon. We are encouraged by Prime Minister Siniora's efforts to undertake political reform. Along with our EU partners, we participated in the monitoring of last June's parliamentary elections. We have also contributed £200,000 to the UN Development Programme's support for the Commission on Electoral Reform.

My right hon. Friend the Foreign Secretary, visited Lebanon on 4–5 January to emphasise the UK's commitment to political reform in the Lebanon.

Maldives

Andrew George: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the human rights situation in the Maldives. [56137]

Dr. Howells: We continue to have concerns about the human rights situation in the Maldives, including freedom of expression and association and the right to fair trials conducted with due legal process. We are also concerned that some recent trials of political activists appear to have political motivations.

We monitor developments in the Maldives closely. We make clear our concerns about human rights and democracy to the Government of the Maldives

BEST COPY AVAILBLE

bilaterally, and with EU partners, on a regular basis. We promote improvements in human rights where we can. We have in the past supported the work of the Human Rights Commission of the Maldives, non-governmental organisations concerned with fair trials and, most recently in January, the training of journalists.

It is essential in this context that the Maldives moves forward quickly with democratic reforms. All political groups in the Maldives need to engage in dialogue to move towards a consensus on constitutional change, within a clear and limited time scale. We strongly support the efforts of the Commonwealth Secretariat and the Commonwealth Secretary-General's Special Envoy in furthering this agenda.

Middle East

Jeremy Corbyn: To ask the Secretary of State for Foreign and Commonwealth Affairs what the Government's policy is on the borders of the state of Israel. [56775]

Dr. Howells: As the Quartet has consistently made clear, we continue to believe that, final status issues can only be resolved through negotiations and agreement between the parties themselves. We share the Quartet's goal of a two-state solution with Israel secure within her borders and Palestine established as a viable, contiguous state. We shall continue to work to this end.

Nuclear Co-operation

Mr. Clegg: To ask the Secretary of State for Foreign and Commonwealth Affairs what is the UK Government's policy on a US-India agreement on nuclear co-operation. [56734]

Dr. Howells: As my right hon. Friend the Prime Minister said on 2 March, we warmly welcome the announcement that India and the US have reached agreement on civil nuclear co-operation, as announced by President Bush and Prime Minister Singh on 2 March.

We believe the agreement can make a significant contribution to energy security, development, economic and environmental objectives for India and the international community, as well as represent a net gain for the non-proliferation regime.

The Government have supported this initiative from its inception and has been actively involved throughout. We will continue to work closely with the US and India, and with partners in the Nuclear Suppliers Group and elsewhere, on the detail of this important issue.

Overseas Offices

David T.C. Davies: To ask the Secretary of State for Foreign and Commonwealth Affairs what the running costs were of the Department's offices in *(a)* Pretoria, *(b)* Beijing, *(c)* Amman, *(d)* Islamabad, *(e)* Bangkok, *(f)* Bridgetown, *(g)* Brasilia, *(h)* Kingstown, *(i)* Montserrat, *(j)* Paris and *(k)* Rome in 2004–05. [54664]

Dr. Howells: The running costs of the missions listed in the question in 2004–05 were as follows:

Post	*Total running costs*
Pretoria	2,050,223.89
Beijing	3,388,696.32
Amman	1,198,444.85
Islamabad	3,807,005.10
Bangkok	1,496,225.79
Bridgetown	1,024,008.99
Brasilia	2,100,451.98
Kingstown	64,765.42
Montserrat	220,964.73
Paris	9,161,808.05
Rome	5,065,678.99

The figures derive from the expenditure allocated to the budget for each mission, on a range of accounts covering all aspects of the day-to-day running of the mission. The salaries and allowances of the UK-based staff at each mission are not included as this information could be collated only at disproportionate cost.

Palestine

Mr. Brady: To ask the Secretary of State for Foreign and Commonwealth Affairs whether *(a)* he and *(b)* his officials have received representations from the French government on the future funding of the Palestinian Authority since the formation of the new Palestinian Cabinet. [55877]

Dr. Howells: On 27 February, my right hon. Friend the Foreign Secretary discussed funding for the Palestinian Authority with his French counterpart. The Quartet (EU, UN, US and Russia) agrees that all members of a future Palestinian government must be committed to non-violence, recognition of Israel, and acceptance of previous agreements and obligations, including the Roadmap. There is a fundamental contradiction between armed group and militia activities and the building of a democratic state. We support this approach.

Mr. Clappison: To ask the Secretary of State for Foreign and Commonwealth Affairs what assurances have been *(a)* sought from and *(b)* given by the Palestinian Authority about adherence to (i) international agreements, (ii) renunciation of violence and (iii) recognition of Israel following the Palestinian legislative elections. [56063]

Dr. Howells: The Quartet (EU, UN, US and Russia) agrees that all members of a future Palestinian government must be committed to non-violence, recognition of Israel, and acceptance of previous agreements and obligations, including the Roadmap. We support this approach.

We fully support Palestinian President Mahmoud Abbas's speech at the inauguration of the Palestinian Legislative Council on 18 February calling for the pursuit of negotiations, non-violence, and respect for existing agreements and recognition of Israel. We seek the same assurances from Hamas.

Peter Hogarth Report

Andrew Mackinlay: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will place in the Library the report he commissioned from Peter Hogarth into the working of his Office. [40487]

Mr. Straw *[holding answer 9 January 2006]:* No, because to do so in this case would impair the free and frank provision of advice to Ministers on which the effective conduct of government depends. However, I have written to my hon. Friend today to give him an account of this report, its origins, conclusions and recommendations and will place a copy of my letter in the Library of the House.

Scrutiny Reserve

Michael Gove: To ask the Secretary of State for Foreign and Commonwealth Affairs how many times the Scrutiny Reserve was overridden in *(a)* 2005 and *(b)* the last six months of 2005. [40947]

Mr. Douglas Alexander: In 2005, the Scrutiny Reserve Resolution was overridden on 77 occasions. There were 55 occasions between January-June 2005 and 22 occasions between July-December 2005. Figures for the first half of 2005 include a period when Parliament was dissolved and a period immediately after the opening of Parliament before the European Scrutiny Committee and the European Union Committee in the House of Lords could be appointed. These figures update information provided in my answer to the hon. Member on 17 January 2006, *Official Report*, column 1290W, when estimated figures were provided as data was still being collected from other Departments. Details of the occasions between July-December 2005, and of two additional cases not recorded in the report for January-June 2005, will be provided to the European Scrutiny Committee in line with the Government's commitment to provide the Committee with twice-yearly reports on scrutiny overrides.

Secret Intelligence Service

Mr. Clegg: To ask the Secretary of State for Foreign and Commonwealth Affairs what definition he uses of significant operations for which the Secret Intelligence Service must obtain his prior permission. [55317]

Dr. Howells: The Foreign Secretary's responsibility for the work of the Secret Intelligence Service (SIS) is set out in the 1994 Intelligence Services Act.

It is the longstanding policy of the Government not to comment on operational intelligence matters.

Spending Review (Efficiency Targets)

Mrs. Villiers: To ask the Secretary of State for Foreign and Commonwealth Affairs what interim targets he has set for achieving *(a)* the agreed efficiency target for his Department and *(b)* the civil service work force reductions targets for (i) gross reductions in posts, (ii) net reductions in posts and (iii) relocations for his Department, as set out in the 2004 spending review; what the baseline figures are against which these interim targets are assessed; on what dates they will take effect; and by what dates these interim targets are intended to be met. [52909]

Ian Pearson: The target efficiency gains for the Foreign and Commonwealth Office (FCO) are £38.7 million for 2005–06, £65.3 million for 2006–07 and £86.7 million for 2007–08. These gains will be delivered from a number of distinct projects. Details of the projects, including baselines, are set out in the FCO's Efficiency Technical Note published on our website. Each project will have one or more baseline. For some projects the baselines are straightforward, for instance payments to BBC Monitoring (project 6) were £7.1 million in 2004–05. For other projects there are separate baselines for each process impacted, for instance Prism (project 5) has separate baselines for over 100 benefits.

Increases in the number of staff providing services directly to the public that are fully funded by fees paid by users of those services e.g. through the purchase of visas and UK passports, have been agreed with HM Treasury. Demand for these services, and hence the income derived from them, is increasing and this enables the FCO to employ more staff to meet the demand. The civil service work force reduction targets in other areas of the FCO in full-time equivalents are 165 by 31 March 2006, 265 by 31 March 2007 and 313 by 31 March 2008. These reductions are against a baseline of 5,379 full-time equivalents (this excludes consular and entry clearance staff).

The target relocations are 450 staff. Not all the functions which will be relocated are yet agreed but as relocations take place the baseline is set as the number of staff (if any) who were performing that function in the new location before the relocation takes place.

Sudan

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent assessment he has made of the impact of the African Union mission on *(a)* the security situation in Darfur and *(b)* the activities of the Janjaweed; and if he will make a statement. [56441]

Ian Pearson: The African Union mission (AMIS) is doing a good job under difficult circumstances. Where it has deployed there has been a decrease in attacks by all parties, including the "janjaweed" Arab militias. In December 2005, the UK participated in an international assessment mission conducting an in-depth review of AMIS. This concluded that AMIS has had a positive effect on both the security and humanitarian situations in Darfur and recommended further steps to increase its effectiveness. We are working closely with the African Union to ensure these steps are taken. The UK has provided more than £50 million to date to support AMIS.

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with *(a)* (i) members and (ii) representatives of the government of Sudan, *(b)* leaders of African Union States and *(c)* members of the UN Security Council on the planned handover of the African Union mission to Darfur to the United Nations; and if he will make a statement. [56468]

Ian Pearson: We have had a number of discussions with different parties involved on the possible handover of the African Union (AU) Mission in Darfur to the United Nations. My right hon. Friend the Secretary of State for International Development discussed this with both the Government of Sudan and the AU during his visit to Sudan last month. My right hon. Friend the Foreign Secretary and my noble Friend, the Foreign

and Commonwealth Office Minister for Africa, Lord Triesman of Tottenham, also discussed the matter during talks with the Sudanese Foreign Minister in London last month. The AU is likely to take a decision shortly.

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with his EU counterparts regarding a future full-scale NATO mission in Darfur; and if he will make a statement. [56107]

Mr. Douglas Alexander: The focus of discussions in both EU and NATO has been on support to the African Union's (AU) Mission in Darfur (AMIS), until the expected hand over from AMIS to a UN force in Darfur later this year. The AU is likely to take a decision on transfer to a UN force at the meeting of its Political and Security Committee on 10 March.

Syria

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Government of Syria on *(a)* respect for human rights, *(b)* the transition to good governance and *(c)* the importance of democratic values. [55446]

Dr. Howells: Our Embassy in Damascus, along with EU partners, continue to raise our concerns about human rights, good governance and democracy with Syrian officials. In October 2005, as part of the Campaign on Freedom of Expression, the UK, as Presidency of the EU, and Troika colleagues delivered a demarche to the Syrian Ministry of Foreign Affairs urging them to take action in the case of a number of detained human rights defenders.

There has been no recent formal Ministerial contact with the Government of Syria.

WORK AND PENSIONS

Advice to Benefit Recipients (Private and Voluntary Sector Organisations)

Danny Alexander: To ask the Secretary of State for Work and Pensions what barriers he identified to the provision by private and voluntary sector organisations of welfare to work and employment advice service to benefit recipients as a part of existing and planned Government programmes; and if he will make a statement. [51739]

Margaret Hodge: Many organisations work with us to develop and improve the effectiveness of our service delivery and our evidence-based approach to policy design enables us to devise programmes that best meet the needs of our clients in gaining employment.

The private and voluntary sector (PVS) delivers a significant proportion of our services to the public and we intend continuing and, indeed, extending these partnerships. All our contracts are awarded on a basis of open and competitive tender and the great majority of these contracts are awarded to the PVS, and so there is no evidence of significant barriers to providers from this sector.

Furthermore, we have proposed in our recently published Green Paper—"A new deal for welfare: Empowering people to work"—that this sector will have the primary delivery role in the next phase of our Pathways to Work programme. We will be consulting with the PVS—and other stakeholders—as we progress to ensure that there is opportunity for such organisations to bid to participate in delivering this broader range of services.

Child Support Agency

Mr. Laurence Robertson: To ask the Secretary of State for Work and Pensions what discussions he has had with the Child Support Agency about delays in passing on payments already collected due to computer failure; what steps the Agency is taking to put this matter right; and if he will make a statement. [26116]

Mr. Plaskitt *[holding answer 8 November 2005]:* The administration of the Child Support Agency is a matter for the chief executive. He will write to the hon. Member with the information requested.

Letter from Stephen Geraghty:

In reply to your Parliamentary Question about the Child Support Agency, the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions what discussions he had had with the Child Support Agency about delays in passing on payments already collected due to computer failure; what steps the Agency was taking to put this matter right; and if he would make a statement.

Where a payment has not been issued by the system a manual payment can be requested. The Agency has a process for manual payments which has reduced delays in issuing such payments to clients. In such circumstances, a hold is placed on the computer system to prevent it from releasing the funds pending recovery and adjustment of the accounts. Further investigation is taking place to ensure the system is effective.

The Agency is continuing to work with EDS to remedy the technical problems.

I hope you find this reply helpful.

Claim Forms

Mrs. Moon: To ask the Secretary of State for Work and Pensions what assessment has been made of the merits of providing one claim form which can serve as the passport to other benefits rather than requiring a new claim form to be completed for each separate benefit application. [55520]

Mr. Timms: The Department recognises that simplifying the claims processes has benefits for our customers. The Pensions Transformation Project is currently transforming Pension Service operations, introducing technology that will allow customers to transact more of their business in a single telephone conversation—eliminating the need for them to provide the same information more than once.

Since 5 December 2005, customers who contacted the Pension Credit Application Line (PCAL) have also been able to make a claim for housing benefit and council tax benefit (HB/CTB) at the same time by answering a few additional questions. This allowed PCAL staff to complete a new three page HB/CTB claim form which is sent to the customer who only has to check the details, sign and date it before returning it to their local

authority in the prepaid envelope provided. Under this new arrangement customers only need to supply verification of their income and savings once, to The Pension Service.

By the end of this year, new processes will be in place to allow new applications for state pension and pension credit in one phone call.

Cold Weather Payments

Dan Norris: To ask the Secretary of State for Work and Pensions how much has been paid in cold weather payments to households in Bath and North East Somerset in respect of winter 2005–06. [54403]

Mr. Plaskitt: No cold weather payments have been paid so far to households in Bath and North East Somerset in respect of winter 2005–06.

Employment Advisers (GP Surgeries)

Danny Alexander: To ask the Secretary of State for Work and Pensions if he will list the private and voluntary sector organisations with which he has held discussions with on *(a)* placement of work advisers in general practitioner surgeries, *(b)* provision of work focused interviews for pathways to work and *(c)* provision of work focused interviews for lone parents. [51737]

Margaret Hodge: We have met with a range of people and organisations and will continue to do so as we develop our welfare reform strategy. The private and voluntary sector will have a key role to play in supporting our commitment to help people on incapacity benefits to access jobs. We published our proposals in a Green Paper; "A new deal for welfare: Empowering people to work", in January this year.

Incapacity Benefit

Mr. Keetch: To ask the Secretary of State for Work and Pensions (1) how many people received *(a)* an adult dependant addition and *(b)* an age addition for incapacity benefit and severe disablement allowance in each year since 1995; and what percentage of the overall number of (i) claimants and (ii) beneficiaries that represents in each year; [48426]

(2) what the average amount of the *(a)* adult dependant addition and *(b)* age addition paid to beneficiaries of incapacity benefit and severe disablement allowance was in each year since 1995. [48427]

Mrs. McGuire: Information is not available prior to 1997. The available data has been placed in the Library.

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions what is his latest estimate of the likely *(a)* incapacity benefit and *(b)* severe disabled allowance caseload in each year to 2018 (i) if current policy arrangements continue and (ii) if the reforms proposed in the Green Paper A New Deal for Welfare: Empowering People to Work are implemented. [51959]

Justine Greening: To ask the Secretary of State for Work and Pensions what estimate his Department has made of the number of incapacity benefit claimants in each year up to 2016; and if he will make a statement. [54984]

Margaret Hodge: The Department is currently reviewing its incapacity benefits caseload forecasts, including making them comparable to 100 per cent. administrative data instead of the less reliable 5 per cent. sample used previously. The latest forecasts on this basis will be available at the Budget.

The Green Paper set out our proposed measures to significantly reduce the number of people claiming incapacity benefits. These measures include improvements to workplace health, reform of the gateway, increased support for claimants and removing the perverse incentives in the system.

While it is difficult to model the precise impact of all these measures, the Green Paper set out our aspiration to reduce the number claiming incapacity benefits by one million over the course of a decade through the combined efforts of the Government, employers, local authorities and health professionals.

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions (1) what discussions he has had in the past 12 months with private and voluntary sector organisations on the provision of supported employment opportunities for incapacity benefit claimants; [51966]

(2) if he will list the meetings officials from his Department have had with representatives from the social enterprise sector in each of the last five years; and who the representatives were in each case; [51967]

(3) what discussions he has had with social enterprises regarding the proposals in the Green Paper A New Deal for Welfare: Empowering People to Work. [51968]

Margaret Hodge: Ministers and officials have held numerous discussions with private, voluntary and social enterprise organisations on a number of issues including supported employment and the Green Paper on Welfare Reform. Indeed such discussions have played an important part in the development of our proposals and will continue to be important through the consultation and beyond.

Information on meetings officials have had with representatives from the social enterprise sector in each of the last five years; and who the representatives were in each case could be obtained only at disproportionate cost.

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions in what circumstances incapacity benefit claimants will be required to engage in work-focused activity prior to 2008. [51979]

Margaret Hodge: The current requirement for incapacity benefit claimants is that they take part in an interview with a personal adviser to discuss their work plans eight weeks after they make a claim to benefit. In the Pathways to Work pilots areas, most new claimants are required to attend a further five interviews. From February 2005, the first seven Pathways to Work pilot districts began to extend some requirements to existing customers, who are expected to attend three interviews at six week intervals.

The Pathways to Work pilots have already shown significant success in getting people off benefit and into work. As set out in the green paper A new deal for

welfare: Empowering people to work we aim to invest further in Pathways to Work, extending the approach to every part of Britain by 2008.

Mrs. Curtis-Thomas: To ask the Secretary of State for Work and Pensions how many and what proportion of incapacity benefit claimants were women in the latest period for which figures are available. [56273]

Mrs. McGuire: As at 31 August 2005, there were 2,766,200 people claiming incapacity benefit or severe disablement allowance. Of those, 1,161,800 or 42 percent. were women.

Mr. Hunt: To ask the Secretary of State for Work and Pensions what estimate his Department has made of the number of people likely to be claiming incapacity benefit in 2008 *(a)* in total and *(b)* who will be retired by 2018. [56737]

Mrs. McGuire: The Department is currently reviewing its incapacity benefits caseload forecasts, including making them comparable to 100 per cent. administrative data instead of the less reliable 5 per cent. sample used previously. The latest forecasts on this basis will be available at the Budget.

The Green Paper set out our proposed measures to significantly reduce the number of people claiming incapacity benefits. These measures include improvements to workplace health, reform of the gateway, increased support for claimants and removing the perverse incentives in the system.

While it is difficult to model the precise impact of all these measures, the Green Paper set out our aspiration to reduce the number claiming incapacity benefits by one million over the course of a decade through the combined efforts of the Government, employers, local authorities and health professionals. The paper did not set a formal target.

Learning Disability

Mr. Hancock: To ask the Secretary of State for Work and Pensions if he will fund the voluntary sector to provide learning disability awareness training for Jobcentre Plus staff. [47249]

Margaret Hodge: Jobcentre Plus has its own learning and development division which already ensures that training, including reference to an e-learning package providing awareness on learning disabilities, is available for all staff who work with customers with disabilities.

In addition, disability employment advisers and specialist incapacity benefit advisers receive specialist knowledge training on health conditions including, learning disability. This training is delivered in-house by Jobcentre Plus. We have consulted with a range of key external partners, including RNIB, RNID, MENCAP and Equal Ability, to ensure the materials provide staff with the necessary knowledge to support our disabled customers' job search activity.

We are currently revising our 'Disability Awareness Handbook' and our 'Working with People with Health Conditions and Disabilities' products and we will consult with our external partners in due course to ensure the accuracy and appropriateness of the products.

Means-tested Benefits

Mrs. Moon: To ask the Secretary of State for Work and Pensions how many means-tested benefits are potentially available for people over 65 years of age. [55519]

Mr. Timms: The Department administers three income-related benefits that are available to people over 65 years of age should they meet the qualifying conditions. The entitlements are: pension credit (guarantee credit and saving credit), housing benefit and council tax benefit. People receiving pension credit may also have access to social fund loans and grants.

Her Majesty's Revenue and Customs administers the child tax credit and working tax credit for which this group may also qualify.

More information on financial and other help available to pensioners is given in the Pensioners' Guide—http://www.thepensionservice.gov.uk/resourcecentre/pensionersguide/home.asp

New Deal (Expenditure)

Mr. Davey: To ask the Secretary of State for Work and Pensions what the level of spending was in 2004–05 on education and training within the *(a)* new deal for 18 to 24-year-olds, outside the full-time education and training option, *(b)* new deal 25 plus, *(c)* new deal 50 plus, *(d)* new deal for lone parents and *(e)* new deal for disabled people; and what the estimates are for (i) 2005–06 and (ii) 2006–07 in each case. [46858]

Margaret Hodge: Information is not separately recorded on the cost of any education and training undertaken through the new deal, other than through the new deal for young people full time education and training option.

Parliamentary Questions

Mr. Laws: To ask the Secretary of State for Work and Pensions what estimate he has made of the average time taken to respond to parliamentary written questions from hon. Members on *(a)* all subjects for which his Department is responsible and *(b)* the Child Support Agency since 1st June; and if he will make a statement. [33701]

Mr. Plaskitt *[holding answer 5 December 2005]:* Between 1 June 2005 and 31 December 2005 the Department took an average of 16.9 working days to respond to Commons written parliamentary questions on all subjects and 22.4 working days to respond to questions relating to the Child Support Agency. The Department is committed to answering questions within parliamentary deadlines where possible.

Pathways to Work

Danny Alexander: To ask the Secretary of State for Work and Pensions what plans he has to use the private and voluntary sector to provide work focused interviews in *(a)* existing Pathways to Work areas and *(b)* the next phase of Pathways to Work areas. [51736]

Margaret Hodge: As we set out in the recent Welfare Reform Green Paper, we want to continue to engage private and voluntary sector providers. Building on the

success of New Deal for Disabled People and other initiatives, we wish to develop further our services for incapacity benefits claimants.

We intend to ask the private and voluntary sectors to lead the work in the next phase of pathways to work areas. This will allow new and innovative approaches to be tested while ensuring that quality support is available to a wide range of claimants, delivered with maximum flexibility.

Pensions

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions what transitional arrangements are in place for pension centre operation prior to the reduction in pension centres. [54233]

Mr. Timms: The Pension Service's Pensions Transformation Programme will put in place the organisational, structural and technological changes necessary to make further improvements in customer service and efficiency—as well as to increase take up of pensioner entitlements.

During this period, work from pension centres not being retained will be migrated to those selected to deliver the transformed service. During the transition they will continue to provide support through existing arrangements to ensure that customer service and overall performance are maintained.

Personal Capability Assessments

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions how many centres were carrying out personal capability assessment health checks in each of the last five years. [51987]

Mrs. McGuire: The information requested is not routinely collected. The available information is that in December 2001 there were 121 permanent medical examination centres (MECs) and in July 2005 there were 125. In addition, medical services use up to 40 casual hire sites, as and when required.

Since July 2005, Atos Origin Medical Services have closed seven smaller centres (with a further four closures scheduled for February 2006) and opened one larger centre (with two additional large centres scheduled to open by the end of February 2006) to improve overall customer service.

Post Office Card Account

Mr. Ruffley: To ask the Secretary of State for Work and Pensions pursuant to his answer of 13 February 2006 to the hon. Member for Inverness, Nairn, Badenoch and Strathspey (Danny Alexander), *Official Report*, columns 1690–91W, on Post Office card accounts, what the estimated cost is of the three pilot schemes. [53734]

Mr. Plaskitt: We estimate that the costs of the pilots will be less than £150,000. This will be met from within existing budgets.

Mr. Ruffley: To ask the Secretary of State for Work and Pensions if he will place in the Library a copy of the contract between his Department and Post Office Ltd. for the delivery of Post Office Card Accounts until 2010. [53746]

Mr. Plaskitt: I have placed an abridged copy of the contract in the Library. This includes the background to the contract and the nature of the agreement between the parties, which is the only part of the document I have taken quotations from. The rest of the document is both commercially confidential and technical in nature and is not appropriate to make public.

Social Enterprise Sector

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions what changes he plans to the training given to incapacity benefit personal advisers; and what he expects the cost to his Department of the training to be. [51969]

Margaret Hodge: The administration of Jobcentre Plus is a matter for the Chief Executive of Jobcentre Plus, Lesley Strathie. She will write to the hon. Member.

Letter from Lesley Strathie:

The Secretary of State has asked me to reply to your question asking what changes he plans to the training given to incapacity benefit personal advisers and what he expects the cost to his Department of the training to be. This is something that falls within the responsibilities delegated to me as Chief Executive of Jobcentre Plus.

The Government has recently published a Green Paper setting out its thinking on the reform of incapacity benefits. At this stage it is too early to say what changes will be required to the training given to Personal Advisers, or to estimate what the cost of any such changes may be.

Once any changes to Incapacity Benefit have been finalised, Jobcentre Plus will carry out a learning needs analysis and put in place a programme of training for all the key roles affected by the changes, including Personal Advisers.

Welfare Reform Green Paper

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions (1) what estimate he has made of the likely cost savings from implementation of the measures outlined in the Green Paper, "A new deal for welfare: Empowering people to work" in each year to 2018–19; [51952]

(2) if he will break down by expenditure item the planned £360 million investment proposed in the Green Paper, "A new deal for welfare: Empowering people to work"; [51957]

(3) what he expects the cost to be for each Pathways to Work scheme in each year to 2008; [51974]

(4) what estimate he has made of the cost of extending work-focused interviews to all existing incapacity benefit claimants; [51977]

(5) what estimate he has made of the cost of employing staff to administer the work focused interviews proposed in the Green Paper, "A new deal for welfare: Empowering people to work" in each year from 2008 to 2018; [51982]

(6) what estimate he has made of the cost of employing medical professionals to administer the new personal capability assessments proposed in the Green Paper, "A new deal for welfare: Empowering people to work" in each year from 2008 to 2018; and how many whole-time equivalent medical professionals he expects will be required. [51983]

Margaret Hodge: Our Welfare Reform Green Paper; "A new deal for welfare, Empowering people for work"; set out our proposals for the future of the welfare state and builds on the success of our welfare to work policies such as new deal and Pathways to Work.

The funding for welfare reform has been drawn from the budgets provided to the Department through the 2004 Spending Review settlement which covered the financial years 2005–06 to 2007–08. Details are available in The departmental report 2005 (Cm 6539) published in June 2005. The £360 million funding is largely to be spent extending the Pathways to Work programme beyond the pilot areas and covers 2006–07 and 2007–08, but may also be used to fund other measures dependent on responses to the consultation.

While we are still in the consultation phase a detailed costing of the various parts of our proposals is not possible. This is especially the case in relation to the costs for each Pathways to Work scheme as we are looking to the private and voluntary sector to deliver many of the Pathways schemes and it is not possible to provide detailed costs prior to contract negotiations. This is also the case when it comes to the need for additional medical professionals where we are consulting to develop the detail of the new personal capability assessment. Medical Services will be contracting doctors and other health care professionals where required.

However, I can tell you that if every current incapacity benefit recipient was given a work focussed interview at least once a year, we estimate the cost would be around £80 million annually. The actual costs would be dependent on the numbers joining and leaving the benefit during any one year. But, although the cost savings from measures outlined in the Green Paper depend to a large extent on the final proposals following the consultation, we know that the existing Pathways pilots are already generating savings, and we expect further savings from further roll-out.

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions what additional financial help will be made available to those with the most serious disabilities and health conditions during the three-month assessment phase of the Employment and Support Allowance proposed in the Green Paper "A New Deal for Welfare: Empowering People to Work". [51960]

Margaret Hodge: We are currently in the consultation period for the Green Paper. This consultation will include looking at the scope for simplifying the benefit structure.

The Green Paper proposes that, in addition to the assessment phase benefit, those with the most serious disabilities and health conditions may be entitled to the enhanced and severe disability premiums currently available through income support. They may also get help with housing costs through housing benefit and council tax benefit. It also proposes that claimants may be entitled to disability living allowance, which currently ranges between £16.05 to £104.90 per week depending on the claimant's care and mobility needs.

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions (1) whether the randomly selected ad hoc case checks proposed in the Green Paper, "A new deal for welfare: Empowering people to work" will extend to incapacity benefit claimants with severe long-term disabilities and health conditions; [51965]

(2) assessment he has made of the impact of ad hoc case checks on the health of incapacity benefit claimants *(a)* suffering from stress and mental health problems and *(b)* with severe long-term disabilities and health conditions. [51973]

Margaret Hodge: It is important in the interests of fairness to genuine claimants and to the taxpayer, that we assure ourselves that those claiming incapacity benefits are entitled to do so. This requires regular review and other measures to ensure proper compliance.

Therefore, in line with our core principle of balancing rights with responsibilities, our Green Paper; "A new deal for welfare, Empowering people for work"; sets out proposals to introduce an additional safeguard of randomly selected, ad hoc case checks, to be carried out by a dedicated team which would be created for this purpose. Where these checks produce doubt about the nature or extent of an individual's incapacity, a fresh personal capability assessment will be required. This process will provide confirmation to the genuine claimant of the appropriateness and correctness of their ongoing entitlement and also assurance to the taxpayer of the integrity and security of the benefit.

After completion of the formal consultation period on 21 April 2006, details on the operation of ad hoc case checks will be finalised, along with the other measures in the Green Paper.

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions what he expects will be the qualifying conditions for *(a)* the income-related strand and *(b)* the contribution-related strand of the employment and support allowance proposed in the Green Paper A New Deal for Welfare: Empowering People to Work. [51971]

Margaret Hodge: We are currently in the consultation period for the green paper, "A new deal for welfare: empowering people to work". It proposes that the Employment and Support Allowance will replace incapacity benefit and income support (on grounds of incapacity). As now, individuals will be expected to fulfil the relevant medical, contribution and/or income tests to access the benefit.

Women's Pensions

Andrew Rosindell: To ask the Secretary of State for Work and Pensions if he will make a statement on the level of women's pensions. [56846]

Mr. Timms: We have already made a number of changes that are improving women's pension position. Two-thirds of those benefiting from pension credit are

women. The state second pension is also extending second-tier pension rights, for the first time, to women who are caring for young children or a disabled adult.

We realise that, despite these improvements, more needs to be done. That is why we have made producing fair outcomes for women and carers one of our five tests for reform of the pension system.

Last November we published a research report 'Women and Pensions: the evidence'. This was a compendium of evidence that highlighted the key influences on the level of women's retirement income and provided a firm basis on which to build consensus on the way forward. This report, together with the final report from the Pensions Commission and the outcomes from the ongoing national pensions debate will help to build on progress so far in helping women pensioners when we come forward with proposals for reform of pensions in the spring.

DEPUTY PRIME MINISTER

Bedfordshire and Luton Economic Development Partnership

Andrew Selous: To ask the Deputy Prime Minister what the budget is for the Bedfordshire and Luton Economic Development Partnership for 2005–06; who its directors are; to whom it is accountable; and if he will make a statement. [55964]

Jim Fitzpatrick: Bedfordshire and Luton Economic Development Partnership (BLEDP) have a projected income for 2005–06 of £1,403,572. For the names of directors I would refer the hon. Member to the BLEDP website at: www.bledp.co.uk. BLEDP is accountable to the communities of Bedfordshire and Luton through its board of directors. As a company, it is subject to the normal accountancy procedures. BLEDP is also accountable to the East of England development agency (BEDA) for the achievement of the agreed outputs on all the project funding they provide, to the Learning and Skills Council for the achievement of outputs on the European Social Fund and to the Bedfordshire county council for the achievement of targets on its funding.

Building Regulations

David Howarth: To ask the Deputy Prime Minister when and how he plans to implement Articles 7 to 10 of the Energy Performance of Buildings Directive; and if he will make a statement. [54148]

Yvette Cooper *[holding answer 27 February 2006]:* The Government have already announced changes to Part L of the Building Regulations that increase the energy efficiency of new buildings by 40 per cent. compared to 2002. These changes implement the technical provisions in Articles 3 to 6 of the Energy Performance of Buildings Directive and will come into effect in April 2006.

There is a three-year derogation period, commencing 4 January 2006, to apply fully the provisions for energy certificates and plant inspection in Articles 7 to 10 of the Directive. Government has signalled that it proposes to use this derogation as there are not sufficient numbers of suitably qualified inspectors in place.

The introduction of the Home Inspection Pack in June 2007 and associated training of Home Inspectors will cover requirements of the Directive to make energy certificates available upon the marketed sales of dwellings. The Office of the Deputy Prime Minister is engaging with industry stakeholders to muster a cadre of inspectors to support a phased programme of implementation in other sectors.

I expect to make a further statement on implementation of the Directive soon.

Council Tax Data Sales

Mr. Pickles: To ask the Deputy Prime Minister what *(a)* discussions and *(b)* meetings Valuation Office Agency officials have had with commercial organisations concerning the sale of its council tax data for commercial purposes in the last five years. [56094]

Dawn Primarolo: I have been asked to reply.

Any organisation approaching VOA over the last five years inquiring about the possibility of purchasing council tax data, have been informed that the data is not available for sale.

Departmental Telephone Numbers

Anne Milton: To ask the Deputy Prime Minister if he will list the *(a)* 0800, *(b)* 0845 and *(c)* 0870 telephone numbers for the public administered by (i) his Department and (ii) agencies which report to him. [56542]

Jim Fitzpatrick: The Office of the Deputy Prime Minister does not use any 0800 or 0870 numbers in its dealings with the public. The only 0845 number used is the Neighbourhood Renewal helpline (0845 0828383). However, calls to this number are diverted to the main ODPM switchboard and are charged at a local rate.

The office's agencies do not use 0800, 0845 or 0870 numbers.

Hereditaments

Mrs. Spelman: To ask the Deputy Prime Minister how many composite hereditaments were registered by the Valuation Office Agency for *(a)* council tax and *(b)* business rates in England in each year since 1996–97. [47030]

Mr. Pickles: To ask the Deputy Prime Minister (1) how many composite hereditaments were on the valuation lists in England in each year since 1998; [49711]

(2) how many composite hereditaments there were on the valuation lists in England in each year since 1998. [54537]

Dawn Primarolo: I have been asked to reply.

The number of composite hereditaments shown in the Council Tax List, for England, in 2005 is 295,310. Figures for previous years are not separately available. The number of composite hereditaments shown in the Rating List, for England, are as shown:

	Number
At March:	
2001	184,301
2002	181,250
2003	178,081
At April:	
2004	174,884
At December:	
2005	168,750

Home Information Packs

Mrs. Spelman: To ask the Deputy Prime Minister what estimate the Government have made of the number of home information packs which will be produced each year once the scheme is fully running. [48063]

Yvette Cooper: At the current level of market activity, it is estimated that 1.44 million home information packs would be required each year for homes placed on the market.

Local Authority Achievements

Lynne Featherstone: To ask the Deputy Prime Minister what guidance he has issued to local authorities on the use of public funds to pay for the promotion and advertising of local authority achievements; and if he will make a statement. [54579]

Mr. Woolas: The Office of the Deputy Prime Minister has issued guidance to local authorities with respect to publicity in the "Recommended Code of Practice on Local Authority Publicity". This is available on the Office of the Deputy Prime Minister's website at: www.odpm.gov.uk/index. asp?id = 1133861

Local Authority Grants

Adam Afriyie: To ask the Deputy Prime Minister if he will take steps to improve the accuracy of data used to make allocations of grant to local authorities for future settlements; and what plans he has to compensate those authorities affected by inaccurate data in 2005–06, with particular reference to Slough borough council. [56813]

Mr. Woolas: When calculating formula grant allocations, the Office of the Deputy Prime Minister uses the best data that are available on a consistent basis across all authorities and that are available at the time. In the case of the population projections, these are the 2003-based population projections produced by the Office for National Statistics (ONS). As a general rule, no retrospective adjustments are made to local government finance settlements once more up-to-date data become available. It is only in exceptional circumstances when there has been a major systematic error that we consider making amending reports. The Local Government Finance Report (England) 2005–06: Amending Report 2006 was approved by the House on 6 February 2006, and cannot be reopened.

Adam Afriyie: To ask the Deputy Prime Minister what representations he has received on the accuracy of the Mid Year Population Estimates data used to determine local authority grant allocations. [56834]

Mr. Woolas: In the course of consultation on the 2006–07 local government finance settlement, representations suggesting that Mid Year Population Estimates might not be accurate were received from Slough borough council, the London boroughs of Barking and Dagenham and Southwark, North Tyneside Metropolitan district council, and the High Ethnicity Areas Special Interest Group.

Monitoring Officers

Mr. Paterson: To ask the Deputy Prime Minister (1) what the average annual salary of a local authority monitoring officer was in 2004–05; [55445]

(2) how many monitoring officers are employed by local authorities in England and Wales; [55577]

(3) what the cost of monitoring officers employed by local authorities in England and Wales was in the last year for which figures are available. [55584]

Mr. Woolas: Section 5 of the local government and Housing Act 1989 provides that every principal authority must designate one of its officers as a monitoring officer. Information about the employment of monitoring officers, including their salaries and the overall cost of employing them is not held centrally. The position in Wales is a matter for the National Assembly for Wales.

Mr. Paterson: To ask the Deputy Prime Minister what the relationship is between a local authority monitoring officer and the Standards Board for England. [55593]

Mr. Woolas: The relationship is established by the Local Government Act 2000 and associated regulations. These provide that ethical standards officers of the Standards Board may refer allegations of misconduct against local councillors to monitoring officers for investigation. Regulations also provide that the Standards Board may issue guidance to monitoring officers.

Parish Council Precepts

Dr. Murrison: To ask the Deputy Prime Minister what the parish council precepts are for England in *(a)* 2006–07 and *(b)* 2005–06. [55664]

Mr. Woolas: The information is as follows.

(a) The total figure for parish precepts in England for 2006–07, as reported by billing authorities, will be published on the Office of the Deputy Prime Minister's website on 27 March as part of the council tax statistical release.

(b) The total figure for parish precepts in England for 2005–06 is included in table A2a of "Local Government Financial Statistics England No. 16 2005", a copy of which has been made available in the Library of the House. It is also available at: http://www.local.odpm.gov.uk/finance/stats/lgfs/2005/lgfsl6/h/lgfsl6/xlsfiles/lgfsl6-a-2a.xls.

Rossendale Borough Council

Janet Anderson: To ask the Deputy Prime Minister what the total amount of Government financial support for Rossendale borough council has been since May 2004. [56134]

Mr. Woolas: The total amount of formula grant and other grants and payments made to Rossendale borough council by the Office of the Deputy Prime Minister since May 2004 is £11.507 million.

Social Housing

Sarah Teather: To ask the Deputy Prime Minister when he will announce the winners of the social housing grant competition; and if he will make a statement. [55778]

Yvette Cooper: A decision on the Housing Corporation's Affordable Housing Programme for 2006–08 is expected to be announced later this month and announcements on individual allocations will be made subsequent to that.

Supporting People Programme (North Yorkshire)

Miss McIntosh: To ask the Deputy Prime Minister what assessment he has made of the impact of the reduction of funding for the Supporting People programme in North Yorkshire on the funding of housing related services for vulnerable people in North Yorkshire. [56030]

Mr. Woolas: The Supporting People programme was launched in April 2003 bringing together nine different funding streams that had previously been used to fund housing related support. The Government commissioned an Independent Review into Supporting People which identified that there are wide variations in unit costs between authorities and that efficiencies were available to all authorities.

Authorities have been required to carry out a review of all legacy services and it is through this process that efficiencies have been achieved. The Office of the Deputy Prime Minister has also required that all authorities develop five year Supporting People strategies which set out how they intend to take the programme forward in meeting local need.

The Office of the Deputy Prime Minister recently consulted on the development of a future national strategy for Supporting People and will be looking at the responses to this paper over the coming months. The consultation also asked questions about future funding approaches and an announcement will be made in the summer 2006.

Miss McIntosh: To ask the Deputy Prime Minister what representations he has received regarding the proposed reduction in funding for the Supporting People programme in North Yorkshire. [56031]

Mr. Woolas: The Office of the Deputy Prime Minister announced the 2006–07 Supporting People grant allocations and minimum allocations for 2007–08 on 5 December 2005. Since that time the Office of the Deputy Prime Minister has received a number of representations about the Supporting People programme in North Yorkshire. This includes representations from the North Yorkshire Supporting People Provider Forum, the North Yorkshire Supporting People Partnership, a representation from an individual and one from a support provider that operates across North Yorkshire.

Miss McIntosh: To ask the Deputy Prime Minister what the level of funding for the Supporting People programme in North Yorkshire was in 2003–04; and what the level of funding was in each of the previous three years. [56032]

Mr. Woolas: The information requested is following table.

£

Programme	*2001–02*	*2002–03*	*2003–04*	*Total*
Supporting People Programme Grant	n/a	n/a	16,847,226	16,847,226
Supporting People Administration Grant	188,814	476,645	476,101	1,141,561
Total	188,814	476,645	17,323,327	17,988,787

Miss McIntosh: To ask the Deputy Prime Minister for what reason he has *(a)* reduced the funding and *(b)* proposed a new distribution formula model for the Supporting People programme in North Yorkshire. [56033]

Mr. Woolas: The Government commissioned an Independent Review into the Supporting People programme following significant late growth in estimated costs from £1.4 billion in December 2002 to £1.8 billion by March 2003. The review reported in January 2004 that there are wide variations in unit costs between authorities and that £1.8 billion was too much to pay for the services provided.

Reductions in the Supporting People programme grant reflect the findings of the independent review and subsequent work carried out on value for money including work commissioned into the efficient use of legacy funding and the results of Audit Commission inspections. These studies demonstrate that there is significant potential for making efficiency savings in the current pattern of service provision whilst safeguarding valuable services.

The draft distribution formula is currently out for consultation and all responses have now been received (deadline 28 February). The Office of the Deputy Prime Minister is currently going through the responses and a final decision on the Supporting People distribution formula will be made in the summer with the launch of the Supporting People strategy.

VAT

Sarah Teather: To ask the Deputy Prime Minister whether he has undertaken research into the feasibility of Lord Rogers's recommendation of harmonising VAT rates for new build housing and repair. [55770]

Dawn Primarolo: I have been asked to reply.

We continue to keep the impact of VAT on different types of building work under review, and have introduced reduced rates where they support our regeneration and renewal objectives. However, while agreements with our European partners allow us to keep our zero rates as they currently stand, we cannot extend them or introduce new ones. This means that in order to harmonise the rates of VAT on new build housing and repair, we would first have to give up our current zero rate for construction of new housing. We have no current plans to give up any of our existing construction zero rates.

CONSTITUTIONAL AFFAIRS

Citizens Advice Bureaux

Mr. Harper: To ask the Minister of State, Department for Constitutional Affairs if she will make a statement on the Legal Services Commission's decision to withdraw specialist support funding from Citizens Advice Bureaux. [55475]

Bridget Prentice: I refer the hon. Member to the answer I gave on 2 March 2006, *Official Report*, column 932W to the hon. Member for Twickenham (Dr. Cable).

Electoral Reform

James Duddridge: To ask the Minister of State, Department for Constitutional Affairs what steps the Department is taking to increase voter turnout; what further measures are planned, with particular reference to the local elections in May 2006; and if she will make a statement. [53699]

Ms Harman: The Government has made available £2.5 million to support the new power to encourage electoral participation included in the Electoral Administration Bill. It is intended that this money will enable Returning Officers and Electoral Registration Officers in England and Wales to undertake promotional activity, such as posters, leaflets and outreach work, to encourage registration and/or participation in elections at a local level.

The Electoral Administration Bill includes a new duty on electoral registration officers (EROs) to take all necessary steps to ensure comprehensive registers. Those steps include the following specific measures:

(a) Sending the canvass form more than once to any address;

(b) Making house to house inquires on more than one occasion;

(c) Making contact by such other means as the registration officer thinks appropriate with persons who do not have an entry in a register;

(d) Inspecting any records held by any person which the registration officer is permitted to inspect; and

(e) Providing training to others carrying out the duty

For May elections in London, the Government is leading in the "1824 Collective" campaign to promote awareness of the voter registration. In addition we are piloting early voting in alternative location in some local authorities.

Mrs. Hodgson: To ask the Minister of State, Department for Constitutional Affairs what steps her Department is taking to improve the electoral participation of voters in socio-economic groups D and E. [54154]

Ms Harman: The turnout at the May 2005 general election in social class DE was 54 per cent. This compares with AB turnout of 71 per cent. The gap of participation between AB and DE groups and low turnout of DE group is a concern to the Government.

The Electoral Administration Bill includes a new duty on Electoral Registration Officers (EROs) to take all necessary steps to ensure comprehensive registers. Those steps include the following specific measures:

(a) Sending the canvass form more than once to any address;

(b) Making house to house inquires on more than one occasion;

(c) Making contact by such other means as the registration officer thinks appropriate with persons who do not have an entry in a register;

(d) Inspecting any records held by any person which the registration officer is permitted to inspect; and

(e) Providing training to others carrying out the duty.

The Government has made available £2.5 million to support the new power to encourage electoral participation included in the Electoral Administration Bill. It is intended that this money will enable Returning Officers and Electoral Registration Officers in England and Wales to undertake some promotional activity, such as posters, leaflets and outreach work, to encourage registration and/or participation in elections at a local level.

Electoral Registration (Normanton)

Ed Balls: To ask the Minister of State, Department for Constitutional Affairs what percentage of young people in Normanton were not on the electoral register in *(a)* 1997, *(b)* 2001 and *(c)* 2005; and what steps her Department is taking to increase the proportion registered. [52651]

Ms Harman: Electoral registers in the UK do not identify the age of electors and no record is kept of categories of electors upon that basis. However, the independent Electoral Commission estimate in their report "Understanding electoral registration" (September 2005) that 16 per cent. of 18 to 24-year-olds are not registered and that 28 per cent. of "attainers" (16 to 17-year-olds) are not on the register.

Her Majesty's 80th Birthday

Anne Main: To ask the Minister of State, Department for Constitutional Affairs what plans her Department has to celebrate Her Majesty's 80th birthday; what advice she has issued to her Department's executive agencies on celebrations for the birthday; and if she will make a statement. [54190]

Ms Harman: Her Majesty the Queen's 80th birthday is a personal anniversary. While the Union flag will be flown by the Department to mark the day, there are no plans for other celebrations. However, Buckingham Palace is planning a series of events to mark the occasion.

Legal Funding

Mr. Dunne: To ask the Minister of State, Department for Constitutional Affairs what representations she has received from citizens advice bureaux in *(a)* England and *(b)* Shropshire on the decision of the Legal Services Commission to withdraw funding for specialist advice on complex cases. [56265]

Bridget Prentice: To date, we have received:

67 for the whole of England

two for Shropshire

Magistrates (Lancashire)

Mr. Hoyle: To ask the Minister of State, Department for Constitutional Affairs what steps her Department is taking to increase the numbers of *(a)* young and *(b)* ethnic minority magistrates in Lancashire. [53361]

Ms Harman: As part of the Magistrates National Recruitment Strategy, to increase the numbers of young and ethnic minority magistrates across England and Wales, we have produced publicity material about the magistracy to encourage applications from all sections of local communities and to raise awareness among employers. The Lord Chancellor has set up a working group of the main employer organisations and the Trade Union Congress to seek their active support in encouraging employees to join the magistracy. We are funding the magistrates shadowing scheme run by Operation Black Vote to enable people from black and minority ethnic (BME) groups to shadow magistrates in order to gain valuable insight into the roles and responsibilities of a magistrate, and encourage applications. Magistrate courts in the Burnley, Pendle and Rossendale areas have participated in the scheme.

In September 2005, the Lancashire Advisory Committee ran a concerted press and radio campaign which produced 206 applications. Of these, 18 were from BME applicants and the age composition of all applications was as follows:

Age group	*Applications*
20–30	14
30–40	35
40–50	51
50+	106

The figures for the number of magistrates appointed are not currently available, as the interview process has not yet started. Out of the 206 applications, 150 applicants have been short-listed for interview.

Offender Anonymity

Mr. Andrew Turner: To ask the Minister of State, Department for Constitutional Affairs against how many people proceedings have been initiated for breach of a court order protecting the identity or whereabouts of a person convicted of an offence in each of the last five years; and how many such orders were in place at the last date for which information is available. [55891]

Ms Harman: Information about breaches of court orders protecting the identity or whereabouts of a person convicted of an offence is not collected centrally and could be obtained only at disproportionate cost to the Department.

Orders in Council

Chris Ruane: To ask the Minister of State, Department for Constitutional Affairs how many Orders in Council were passed in each of the past 30 years. [56207]

Ms Harman: The information requested can only be provided at disproportionate cost.

Peers' Residences

Linda Gilroy: To ask the Minister of State, Department for Constitutional Affairs how many Members of the House of Lords have their main residence in each *(a)* country, *(b)* region and *(c)* county of the UK, broken down by political affiliation; and what assessment she has made of the geographical distribution of Members of the House of Lords. [53884]

Ms Harman: The figures available at the end of March 2005 show there are approximately 556 [illegible]rs who have their main residence listed in the UK (w[illegible] known). The following table breaks down this fi[illegible] further by county, region and political affiliation. Th[illegible] figures exclude new appointments from April 2005.

Any assessment on the geographical distribution of Members of the House of Lords will be included in the more detailed work on the future composition of the upper Chamber, as part of the modernisation process.

Post-mortems

Mr. Dismore: To ask the Minister of State, Department for Constitutional Affairs how many decisions to hold a coroner's post-mortem have resulted in delays to the release of bodies to *(a)* Jewish, *(b)* Muslim and *(c)* Hindu families living in (i) Barnet and (ii) London such that funerals have not been possible within 24 hours in the last 12 months; and if she will make a statement. [55170]

Ms Harman: This information is not available.

Mr. Dismore: To ask the Minister of State, Department for Constitutional Affairs what steps she is taking to ensure that coroner's post-mortems do not result in delays in releasing bodies to families of faiths which require funerals to be held within 24 hours of death; and if she will make a statement. [55171]

Ms Harman: For a number of reasons it will not always be possible to authorise the release within 24 hours of the death. The body of a homicide victim may, for example, require forensic analysis. Early release will also depend on the availability of pathologists to conduct post-mortem examinations. But coroners fully appreciate the need to release bodies quickly following a coroner's post-mortem examination, and are particularly sensitive to the requirements of faith groups.

True North Project

Mr. Liddell-Grainger: To ask the Minister of State, Department for Constitutional Affairs whether the True North project is still under way; and what the total spend on the project has been to date. [55295]

Mr. Jim Murphy: I have been asked to reply.

The True North project was run by the Cabinet Office. I refer the hon. Member to the answer I gave him on 14 December 2005, *Official Report*, column 2057W.

Voter Registration

Mr. Jim Cunningham: To ask the Minister of State, Department for Constitutional Affairs what steps her Department is taking to increase voter registration. [55989]

Ms Harman: The Electoral Administration Bill takes forward a number of measures to improve voter registration, including a new duty on registration officers specifying the steps that they must take to ensure comprehensive registers and moving back the deadline for registering until after an election has been called (until 11 days before polling day). The Bill also includes a power for returning officers to encourage participation in elections, to promote current best practice already undertaken by some local authorities in this area.

The Government are actively working with electoral registration officers and community groups to increase awareness on the voter registration in UK and working closely with stakeholders on improving the annual canvass form by making it clearer, simpler and easy to understand.

The Government have embarked on a number of initiatives, such as the "1824 Collective" campaign to promote awareness of voter registration amongst London's "urban youth".

Vulnerable Witnesses

Mark Tami: To ask the Minister of State, Department for Constitutional Affairs what measures she has put in place to assist vulnerable witnesses in the family and civil courts. [53823]

BEST COPY AVAILBLE

Ms Harman: In family and civil cases, the main witness is usually the victim/a party to the proceedings and, therefore, is already known to the alleged perpetrator.

Family courts have wide powers when hearing cases where they consider a victim may be vulnerable or scared. For example: hearings are usually conducted in private and wigs and gowns are not worn; cases are not heard or decided by juries but by family judiciary who have been specially trained to deal with these sensitive cases; when a hearing date is set the victim and his/her legal representative should be advised of any special facilities that are available at that court such as separate entrances/exits or private waiting rooms; in cases of domestic or sexual abuse the court may help the giving of evidence with the use of screens and/or video links. We are also examining the benefits of specialist domestic violence courts where civil and criminal aspects of domestic violence cases will be heard in one court. This should also make the availability of special measures more readily available across the jurisdictions.

INTERNATIONAL DEVELOPMENT

Afghanistan/Iraq

Keith Vaz: To ask the Secretary of State for International Development what steps the Department is taking to improve the living standards and infrastructure of *(a)* Iraq and *(b)* Afghanistan. [54762]

Hilary Benn: The UK Government have pledged a total of £544 million for reconstruction and humanitarian assistance to Iraq from 2003 until 2006, and has disbursed over £460 million. DFID's contribution to this has been £300 million. Our programme focuses on:

- Capacity building in national and local government;
- Supporting participation in the political process;
- Improving infrastructure in the southern governorates.

To date, we have pledged £72 million for infrastructure support projects in the south, of which £44 million has already been spent. Our assistance is directed at improving power and water supplies, which will raise living standards for ordinary Iraqis as well as providing the necessary infrastructure to support business and economic growth. In the power sector, we have repaired transmission lines from Hartha power station to Basra city, securing electricity supplies for 1.5 million residents; we will improve power distribution to 13 areas of Basra (nine areas completed); and we have projects in progress which will add or secure 270MW generation capacity throughout southern Iraq. In the water sector we have repaired over 5,000 leaks, and have provided technical advice for sewage installation in Al Amarah—providing up to half the city's population with access to a piped system and replacing open sewage channels. We are building water towers and reservoirs to provide clean water for 250,000 of the poorest people in Basra, and we are constructing a water training centre which will train 2,000 water officials and engineers from across the south.

The Iraqi people will ultimately depend on their own Government to improve living standards, and to maintain and develop the country's infrastructure. To help the Government rise to this challenge, DFID is providing the following assistance:

- Support to the Government's macro-economic reform programme, in order to generate growth, reduce poverty and improve living standards. This includes helping Iraq to meet its IMF obligations.
- [illegible] the capacity of key central government offices, including the Prime Minister's office, to manage Government business effectively.
- Strengthening institutional capacity, and supporting private sector growth, in the four southern governorates.

We are also supporting living standards in Iraq through the £70 million contribution we made to the United Nations and World Bank Trust Funds in 2004, which includes support to essential services such as health and education.

The rebuilding of Afghanistan cannot be achieved without significant investments in infrastructure, but given the scale of resources required, and the importance of donors working to their respective comparative advantages, we believe other donors are better placed to make these investments. The USA, the Asian Development Bank (ADB) and Japan in particular are investing in Afghanistan's infrastructure sector. A component of DFID's livelihoods work does however include support for small scale rural infrastructure through funding to the National Solidarity programme (£9 million in 2005–06) and the National Emergency Employment programme (£18 million in 2005–06).

The National Solidarity programme is implementing 8,709 community projects in 33 provinces including 3,779 water and irrigation related projects; 1,740 electricity and generator related projects; and 1,740 roads, bridges, culverts and other transportation related projects. Through the National Emergency Employment programme around 6,000 km of rural roads have been rehabilitated and/or constructed, including 11,000 running metres of structures (e.g. culverts, bridges).

John Barrett: To ask the Secretary of State for International Development what assessment he has made of progress towards the post-conflict reconstruction of Iraq. [55324]

Hilary Benn: The Government of Iraq, together with the UK and other donors, has made significant progress with reconstruction since 2003; but there is still a long way to go. Once a relatively wealthy country with high levels of education and healthcare, by 2003 Iraq had suffered more than 20 years of conflict, mismanagement and chronic under-investment from a brutal regime. The 2003 conflict, and the high levels of insecurity that have followed it, have exacerbated, not created, the need for reconstruction in Iraq.

Continued violence, especially sabotage directed at infrastructure, and low (but growing) levels of management capacity in Iraq's national and local Government have slowed progress. However, reconstruction has continued and much has been achieved:

In December 2005, the Iraqi people voted in democratic elections, putting in place a Council of Representatives for the next four years.

The economy has rebounded quickly; Iraq's GDP is projected at $29.3 billion in 2005, up from $18.4 billion in 2002. The International Monetary Fund (IMF) expects Iraq's economy to grow by 10.4 percent. in 2006. With help from donors, including DFID, the interim Government negotiated an emergency post-conflict agreement with the IMF, paving the way for the Paris Club debt reduction deal. In December 2005 Iraq secured a stand-by arrangement with the IMF, which provides an IMF-supported economic reform programme over the next 18 months.

Iraq's infrastructure was badly maintained and underinvested in during the 1990s. Things are slowly improving. Over 4 million more Iraqis have access to potable water than before the conflict; 9.6 million more have access to a sewerage system. More than US$3.5 billion has been spent on electricity, but the gains in generating capacity have been off-set by continued sabotage, inadequate fuel supplies, a lack of Iraqi capacity to operate and maintain the new systems, and continuing failure of old infrastructure. Current generation averages 4,037MW, compared to 4,300MW pre-conflict and 2,500MW immediately post-conflict.

Iraq's health and education services are being restored. More than 50,000 teachers and healthcare professionals have been trained. 3,757 schools have been rehabilitated, and a further 432 are in progress. Hundreds of healthcare facilities have been rehabilitated and a new paediatric hospital in Basra is being built. Through extensive disease control programmes, there has been a decline in the prevalence of polio, measles, leishmaniasis, mumps, rubella, and malaria.

Media and civil society is flourishing. 250 newspapers and magazines have been launched since the fall of the regime, and new, independent radio and TV stations are now up and running. 2,500 Iraqi NGOs are now registered with the Iraqi Government.

DFID is committed to supporting Iraq's reconstruction progress. Our programme focuses on:

- Investing in infrastructure works to deliver improved power and water services in Southern Iraq
- Building the capacity of local and national Government to manage Government business and deliver services effectively
- Supporting the Government's macro-economic reform programme which will help to generate growth and reduce poverty
- Helping the poor and marginalised to participate in the political process, and supporting the development of Iraqi civil society

Our contribution of £70 million to the UN and World Bank Trust Funds, made in 2004, is also helping to finance reconstruction work in other areas, with a particular focus on health and education.

Africa (Humanitarian Relief)

John Barrett: To ask the Secretary of State for International Development what recent assessment he has made of the capacity of international donor countries to offer humanitarian relief following the UN appraisal of African countries at risk of famine. [55330]

Hilary Benn: The UN has issued a number of reports recently about food shortages and the effects of drought in Africa. We have been among the leaders in responding, and are in close discussion with other donor countries to ensure that adequate resources are made available to deal with these crises. At the same time we are pushing forward a major initiative to reform the international humanitarian system to improve the timeliness and effectiveness of relief operations.

Burma

Mr. Hancock: To ask the Secretary of State for International Development whether aid delivery through local civilian administrations referred to in Article 5 of the EU Common Position on Burma includes the Union Solidarity Development Association. [54636]

Mr. Thomas: Aid delivery through local civilian administrations referred to in Article 5 of the EU Common Position on Burma does not include the Union Solidarity Development Association.

Mr. Hancock: To ask the Secretary of State for International Development what recent assessment he has made of whether *(a)* UK and *(b)* EU humanitarian assistance grants in Burma have been used for the purposes for which they were intended. [54644]

Mr. Thomas: DFID provides humanitarian assistance grants to a number of United Nations (UN) agencies and non-governmental organisations (NGOs), all of which are held accountable by DFID for ensuring that funds are used for the intended purpose as specified in project documents. Assessments are made for each project at least once every year as part of a formal review process. There have been no cases of grants being used for other than the purpose intended. We maintain a regular dialogue with EC officials on their humanitarian assistance, but we have not made a formal assessment.

Mr. Hancock: To ask the Secretary of State for International Development what assessment has been made of the effectiveness of HIV/AIDS projects supplying antiretrovirals funded by his Department in Burma; and whether the regime in Burma is allowing effective monitoring of patients supplied with antiretrovirals. [54645]

Mr. Thomas: DFID funds HIV/AIDS projects supplying anti-retrovirals through the UN-managed Joint Programme for HIV/AIDS in Myanmar. The most recent progress report on this programme judged that it was increasing access to and quality of care, treatment and support of people living with HIV/AIDS. In 2004–05, this programme planned to supply anti-retrovirals to 687 people, but was able to reach 734 people. We are not aware of any difficulties in monitoring patients receiving anti-retrovirals.

Mr. Hancock: To ask the Secretary of State for International Development what humanitarian assistance projects his Department supports in Karen National Union-held territory in Burma. [54647]

Mr. Thomas: DFID provides direct assistance to displaced people in Burma through the International Committee of the Red Cross (ICRC) to support their work with conflict-affected populations. Spending on specific displaced populations, such as in the Karen National Union-held territory is not identifiable. Since 2000, DFID has provided total funding of £2.3 million to the ICRC (this also includes support for ICRC's prison visits). Several other DFID-funded projects, including

through local non-governmental organisations (NGO)s, also include displaced populations among their recipients.

Cayman Islands

Daniel Kawczynski: To ask the Secretary of State for International Development what financial assistance has been given to Grand Cayman Island following severe hurricanes in 2005. [55945]

Mr. Thomas: DFID provided approximately £250,000 in direct assistance to Cayman Islands in 2004, for emergency supplies and services in the immediate aftermath of Hurricane Ivan. DFID also funds a full time Disaster Risk Reduction adviser to the Caribbean Overseas Territories, who provides ongoing expertise to these countries to strengthen and improve their disaster preparedness. Accordingly, he visited the Cayman Islands in the immediate aftermath of Hurricane Ivan to advise on recovery planning.

DFID further funded a study of the impact of Hurricane Ivan to help learn from the Cayman Islands' experience of handling the emergency. The adviser has worked in the region throughout the 2005 hurricane season and will continue to do so until August 2006.

DFID also placed a Humanitarian and Disaster Risk Reduction Adviser in the region, based in Barbados, for the 2005 hurricane season. The adviser liaised with, and provided advice to, regional agencies and other development partners dealing with Disaster Risk Reduction and the continuing response to Hurricane Ivan and to Hurricane Emily in July 2005.

The UK also had relief supplies on board one of the frigates based in the Caribbean in preparation for a disaster response in the region.

Chad

John Bercow: To ask the Secretary of State for International Development what recent discussions he has had with the Government of Chad on the appropriate use of oil revenues. [55431]

Hilary Benn: There have been no recent bilateral discussions between DFID and the Government of Chad on the use of oil revenues. The Government of Chad has held recent discussions with the World Bank, including on their intention to implement the Extractive Industries Transparency Initiative. In January 2006, the World Bank suspended all their lending to Chad due to their concerns about the use of oil revenues. The World Bank are continuing to discuss with Chadian officials how to safeguard the oil revenues intended for poverty reduction programs included in their original agreement.

Common Agricultural Policy

John Barrett: To ask the Secretary of State for International Development what recent discussions he has had with his Cabinet colleagues regarding the reform of the common agricultural policy. [55322]

Mr. Thomas: The Government acknowledge the damaging impact that developed countries trade-distorting agricultural subsidies have on developing countries. In December last year the Department for Environment, Food and Rural Affairs (DEFRA) and Her Majesty's Treasury (HMT) jointly published a paper on 'A vision for the Common Agricultural Policy'. This sets out the UK Government's vision for European agriculture which is fundamentally sustainable and does not distort international trade. The paper includes an analysis of the impacts of the CAP on developing countries, which DFID contributed to.

Congo-Brazzaville

John Bercow: To ask the Secretary of State for International Development what assessment he has made of *(a)* the level of corruption in Congo-Brazzaville, *(b)* the impact of such corruption on debt relief negotiations and *(c)* the possible effect of debt relief in entrenching corruption. [55401]

Hilary Benn: DFID does not have a bilateral programme of assistance to the Republic of Congo. We are however aware of long-standing allegations of corruption, including the use of oil revenues, and share the concerns of many about this.

Strengthening governance and tackling corruption in the Republic of Congo are essential if the country is to eradicate poverty and meet its development objectives. The International Monetary Fund (IMF) and the World Bank recognise this, and are addressing the issue through their programmes. We welcome the Republic of Congo government signing up to the Extractive Industries Transparency Initiative, and urge it to continue to improve its performance in this area.

As a heavily indebted poor country (HIPC), the Republic of Congo is eligible for debt relief through the HIPC Initiative. This is currently under discussion at the IMF and the World Bank, and we expect the institutions to make a statement once that discussion has been concluded. To qualify for debt relief, the HIPC Initiative requires countries to demonstrate a track record in poverty reduction and sound economic management; to get irrevocable cancellation countries must also complete a number of important actions and reforms. To date, many HIPC countries have undertaken to strengthen public expenditure management and accountability, as well as making progress in health, education and other areas. The IMF and World Bank are clear that resources released through debt relief must be used to reduce poverty, and they have a range of safeguards to achieve that.

Debt Repayment

John Barrett: To ask the Secretary of State for International Development what discussions he has had with the Chancellor of the Exchequer regarding repayments of debts owed by African countries to *(a)* the UK and *(b)* the Paris Club. [55332]

Hilary Benn: I have frequent discussions with the Chancellor of the Exchequer on debt and development issues, including issues relating to African debt and the Paris Club. In recent months, discussions between the Treasury and DFID have included Nigeria, which last year secured the largest single deal from the Paris Club by a sub-Saharan African country. The deal will cancel

more than $18 billion of Nigeria's debt, and lead to the Government of Nigeria spending an additional $1 billion annually on poverty reducing.

The UK continues to meet and exceed its bilateral debt relief obligations under the Heavily Indebted Poor Countries Initiative, and to deliver its share of debt relief agreed within the Paris Club for other African countries.

Departmental Telephone Numbers

Anne Milton: To ask the Secretary of State for International Development if he will list the *(a)* 0800, *(b)* 0845 and *(c)* 0870 telephone numbers for the public administered by (i) his Department and (ii) public bodies which report to him. [56541]

Mr. Thomas: The only number that DFID administers is the Public Enquiry Point number which is 08453004100.

None of our public bodies have 0845 numbers. They have 0207, 0208 or 01355 numbers.

They are:

Commonwealth Scholarship Commission of the United Kingdom

Crown Agents Holding and Realisation Board

Overseas Services Pensions Advisory Board

Drought

John Bercow: To ask the Secretary of State for International Development what steps are being taken by his Department to address the impact of drought in *(a)* Ethiopia, *(b)* Somalia, *(c)* Eritrea, *(d)* Tanzania and *(e)* Burundi. [55430]

Hilary Benn: Following my announcement of an additional £15 million contribution to the response in Kenya on 1 March, the total DFID commitment to the immediate relief effort in the Horn of Africa has now reached £35.8 million. This is made up of £7 million in Somalia, £21.7 million in Kenya, £5 million in Ethiopia and £2.1 million in Eritrea. In addition, we have also made commitments of £700,000 to Tanzania and £3 million to Burundi, which are also facing food shortages. Our contributions will help save lives by enabling the UN, non-governmental organisations (NGO)s and governments to deliver urgently needed food aid, nutritional therapy, emergency water supplies and health care.

Extractive Industries Transparency Initiative

Andrew George: To ask the Secretary of State for International Development what tax disclosures companies are required to make under the accounting standards of the Extractive Industries Transparency Initiative. [55058]

Mr. Thomas: Implementation of the Extractive Industries Transparency Initiative (EITI) requires the disclosure of all material oil, gas and mining payments by companies to governments. Each country which commits to implement the EITI does so in a way that properly reflects that country's legal and regulatory environment. Information required for publication such as tax disclosures would therefore be decided upon by the implementing country in agreement with other partners such as operating companies and local community groups.

Fair Trade

Mr. Drew: To ask the Secretary of State for International Development what activities he is *(a)* sponsoring and *(b)* supporting for Fairtrade Fortnight. [55371]

Mr. Thomas: DFID is not officially sponsoring Fairtrade Fortnight, although the UK Government is a strong supporter of Fairtrade products to help farmers and other producers earn a decent living and get more of the final value of their product.

DFID recognises the significant role that Fairtrade has had in raising awareness of the development issues surrounding commodities trade. DFID supports fair-trade certification schemes and has given over £1 million to the Fairtrade Foundation (FTF) in support of its development awareness and education campaigns including events such as Fairtrade Fortnight. Through investing in the future of Fairtrade, DFID aims to help achieve sustained improvement in livelihoods of disadvantaged producers in the south.

A number of Government Departments ensure that their catering facilities make available a range of Fairtrade products including DFID. In addition, it is policy in the House of Commons to promote, where possible, the use of Fairtrade products within the refreshment department. Some of the Fairtrade products currently sold are: coffee, tea, drinking chocolate sachets, fruit geo bars, Tradecraft cookies, Divine chocolate, bananas and wines.

Global Fund

John Barrett: To ask the Secretary of State for International Development what assessment he has made of *(a)* contributions and *(b)* pledges to the Global Fund to Fight AIDS, Tuberculosis and Malaria. [55353]

Mr. Thomas: Since the Global Fund began its operations in 2002, the International Community, including public and private donors has pledged and/or contributed a total of US $8.6 billion to support the institution's work through to 2008. This is a substantial achievement for such a young institution and has helped to dramatically increase international funding to combat the three diseases over the last four years. During the September 2005 Replenishment conference, the Global Fund achieved pledges of US $3.7 billion against its estimated resource needs of US $7 billion for 2006 and 2007 which has allowed it to finance all ongoing projects. A further US $3.3 billion is needed to enable the Global Fund to finance new projects over the next two years.

The UK has pledged £359 million to the Global Fund for the period 2002 to 2008. Our contribution in 2005 was £51 million, which brings our total contribution delivered to date, to £159 million. Over the next two years we have pledged to provide £100 million to the Global Fund for 2006 and £100 million for 2007, to support the Fund's estimated resource needs of US $7 billion for this period. The two-year total of £200 million represents 8.4 per cent. of the total pledged

to date (i.e. £3.7 billion) and 5.1 per cent. of the US $7 billion total resource needs. This is above our gross national income fair share and is consistent with our past support. The UK is currently the fourth largest donor for the period 2006 and 2007 (after France, the US and Japan) and the second largest in the European Union. At present, the UK has no plans to increase our contributions.

There will be a mid-term review of the Global Fund's replenishment process in June. This will be an opportunity for the International Community to review further the Global Fund's performance and urge new and existing donors to put in more money. The UK (DFID) will continue to encourage donors to do as much as they can to fill any gaps in Global Fund resources—in particular we will be working to encourage support from new donors, especially the oil producing countries and the private sector.

Haiti

Mr. Clifton-Brown: To ask the Secretary of State for International Development if he will make a statement on the election of Rene Preval as President of Haiti. [55497]

Mr. Thomas: The first round of presidential and parliamentary elections took place in Haiti on 7 February. On 16 February, Haiti's Provisional Electoral Council (CEP) declared Rene Preval the winner of the presidential elections with 51.15 per cent. of the vote. The European Union sent an observer mission to monitor the elections. The mission's preliminary declaration reports that polling took place in a calm environment, with only one or two instances of violence. There was a high voter turn out and we are hopeful that the elections mark a major step forward for Haiti's democratic process. The European Union mission will produce a full report on the election process once the second round of parliamentary elections has taken place.

A representative from DFID attended the Haiti Donors Contact Group meeting held in Washington on 21 February. Donors congratulated Haiti on the result of the election, but recognised that there are still serious challenges ahead for the people of Haiti and their new Government.

The UK Government will remain engaged with other members of the international community on issues concerning Haiti. We are providing over £20 million through our share of the commitments made by the European Commission, Inter-American Development Bank and World Bank at the 2004 Donors' Conference. In addition, the UK made a significant increase in its contribution to the Caribbean Development Bank's soft loans fund for its poverty reduction programme in Haiti—our contribution will provide approximately £3 million a year over the next three years for Haiti. We are currently negotiating the possibility of placing an advisor in Haiti alongside other donor partners to assist in enhancing the effectiveness of the donor response. The UK also pays 7.4 per cent. of the costs of the UN peacekeeping mission.

HIV/AIDS

Andrew George: To ask the Secretary of State for International Development what his most recent estimate is of the number of HIV/AIDS-related deaths in developing countries in a year, broken down by sex. [55048]

Mr. Thomas: DFID, along with the rest of the international community, relies on HIV and AIDS data from the Joint United Nations Programme on HIV/AIDS (UNAIDS). In 2005, the UNAIDS estimated that globally there were 2.6 million adult deaths and 570,000 child (under 15 years) deaths due to AIDS.

The latest country level estimates of deaths due to AIDS are for the year 2003 and can be found in the UNAIDS 2004 Report on the Global AIDS Epidemic. This is available on the UNAIDS website: www.unaids.org/bangkok2004/GAR2004_pdf/UNAIDS GlobalReport2004_en.pdf

At a regional level, adult and child deaths are not estimated separately, nor are the numbers disaggregated by gender. The following table shows estimates for 2005.

	Number of adult and child deaths due to AIDS in 2005	
Region	*Actual*	*Range*[1]
Sub-Saharan Africa	2.4 million	2.1–2.7 million
North Africa and Middle East	58,000	25,000–145,000
South and South-East Asia	480,000	290,000–740,000
East Asia	41,000	20,000–68,000
Oceania	3,600	1,700–8,200
Latin America	66,000	52,000–86,000
Caribbean	24,000	16,000–40,000
Eastern Europe and Central Asia	62,000	39,000–91,000
Western and Central Europe	12,000	<15,000
North America	18,000	9,000–30,000
Total	3.1 million	2.8–3.6 million

[1] The ranges around the estimates in this table define the boundaries within which the actual numbers lie, based on the best information available.

Internally Displaced Persons

Andrew George: To ask the Secretary of State for International Development what estimate he has made of the number of *(a)* male and *(b)* female internally displaced persons in (i) Colombia, (ii) Algeria, (iii) Angola, (iv) the Democratic Republic of the Congo, (v) Cote d'Ivoire, (vi) Kenya, (vii) Somalia, (viii) Sudan, (ix) Uganda, (x) Zimbabwe, (xi) Iraq, (xii) Bangladesh, (xiii) India, (xiv) Indonesia, (xv) Myanmar and (xvi) Sri Lanka. [55049]

Hilary Benn: The estimated number of internally displaced persons in each of the countries are as follows:

	Number
Colombia	1,580,396–3,563,505
Algeria	1,000,000
Angola	91,240
DRC	1,664,000
Cote d'Ivoire	500,000
Kenya	381,924
Somalia	370,000–400,000
Sudan	5,355,000
Uganda	1,740,498
Zimbabwe	569,685
Iraq	1,200,000

	Number
Bangladesh	500,000
India	600,000+
Indonesia	342,000–600,000
Myanmar	540,000
Sri Lanka	341,175

Source:
Internally Displaced Monitoring Centre (based on estimates from sources including the United Nations High Commissioner for Refugees (UNHCR), the ED and UN Office for the Co-ordination for Humanitarian Affairs (OCHA).

It has not been possible to source data for internally displaced persons broken down on the basis of gender as the Internally Displaced Monitoring Centre, who provide the most reliable and comprehensive data on internal displacement, say that

> "such information is rarely available, as in most countries affected by internal displacement, no systematic surveys have been conducted".

Their Global Overview of Trends and Developments in Internal Displacement published in 2004 estimated that women and children account for between 70 and 80 per cent. of all internally displaced persons worldwide.

Andrew George: To ask the Secretary of State for International Development how many *(a)* full-time and *(b)* part-time staff in his Department are assigned to work on issues related to internally displaced persons. [55050]

Hilary Benn: DFID has a core team of three full-time and five part-time staff working on forced migration issues, which includes work relating to refugees and Internally Displaced Persons (IDP). In addition, throughout DFID there are many staff in country programmes who work on IDP issues concerning their countries as and when these occur. Due to the unpredictable nature of the situations that cause internal displacement, it is hard to quantify the number of staff that are engaged at any one time.

Andrew George: To ask the Secretary of State for International Development on how many occasions he has raised the issue of internally displaced persons with his Government counterparts from *(a)* Colombia, *(b)* Algeria, *(c)* Angola, *(d)* the Democratic Republic of Congo, *(e)* Cote d'Ivoire, *(f)* Kenya, *(g)* Somalia, *(h)* Sudan, *(i)* Uganda, *(j)* Zimbabwe, *(k)* Iraq, *(l)* Bangladesh, *(m)* India, *(n)* Indonesia, *(o)* Myanmar and *(p)* Sri Lanka in each of the last five years. [55051]

Hilary Benn: I have consistently raised the issue of Internally Displaced Persons (IDPs) with government counterparts in Uganda and Sudan. DFID and the Foreign and Commonwealth Office officials regularly raise issues of IDPs in a number of other countries of concern, including Iraq. DFID joined other humanitarian donors in a joint statement to express concern and rally the international community to provide assistance to those displaced in Zimbabwe in November.

Andrew George: To ask the Secretary of State for International Development how much his Department has *(a)* pledged, *(b)* committed and *(c)* spent on programmes aimed to benefit internally displaced persons in (i) Colombia, (ii) Algeria, (iii) Angola, (iv) the Democratic Republic of Congo, (v) Cote d'Ivoire, (vi) Kenya, (vii) Somalia, (viii) Sudan, (ix) Uganda, (x) Zimbabwe, (xi) Iraq, (xii) Bangladesh, (xiii) India, (xiv) Indonesia, (xv) Myanmar, (xvi) Sri Lanka and (xvii) in total in each year since 1997. [55052]

Hilary Benn: DFID provides Humanitarian Assistance, such as shelter and medical care in emergencies, to Internally Displaced Persons (IDPs), refugees and other vulnerable people, through its country programmes. We do not disaggregate the amount spent specifically on IDPs from the total Humanitarian Assistance. The following table provides figures for humanitarian spend since 1997 for the requested countries. We do not hold separate information on pledges or commitments. It is unlikely that pledges or commitments would differ from spend.

Bilateral Humanitarian Assistance (HA) to Designated Countries since

Destination	*1997–98*	*1998–99*	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*2003–04*	*2004–05*
Algeria	70,555	3,339	4,955	—	150,000	—	324,038	5,799
Angola	1,500,000	2,500,000	3,236,425	2,240,178	2,191,312	6,974,399	4,452,264	2,186,823

DRC	806,935	369,794	1,256,946	3,036,086	5,471,321	12,099,347	16,257,584	22,476,819
Kenya	1,337,996	4,621,733	2,542,298	12,463,111	3,413,358	1,473,521	228,551	5,517,057
Somalia	1,047,281	1,079,459	372,475	1,234,680	1,637,637	2,919,590	3,171,561	3,543,346
Sudan	4,337,079	23,496,775	2,773,863	4,491,075	5,164,105	16,337,941	21,872,096	77,965,269
Uganda	657,205	360,269	580,562	535,135	784,782	3,477,988	7,768,171	11,850,714
Zimbabwe	41,404	179,732	212,461	225,455	7,242,305	23,259,500	23,959,598	13,753,181
Colombia	166,398	857,100	265,737	223,859	17,141	3,300	—	—
Bangladesh	365,737	15,742,296	745,431	3,496,343	1,780,616	226,404	12,695	25,037,885
Burma	215,650	285,055	206,913	1,030,033	2,088,012	3,163,205	577,504	1,005,000
India	511,936	60,954	3,941,315	20,554,645	6,872,102	5,216,553	1,398,973	441,714
Indonesia	461,300	—	—	822,882	750,000	1,500,000	—	11,123,271
Iraq	3,350,504	5,749,116	6,584,659	9,545,325	7,759,652	18,853,455	110,051,848	21,382,898
Total	14,968,480	55,342,574	22,724,041	59,898,969	45,572,343	96,205,203	190,274,882	196,585,791

In addition DFID provides unearmarked core funding to UN agencies, such as the United Nations High Commissioner for Refugees (UNHCR), and International organisations, such as the International Committee of the Red Cross (ICRC), who provide assistance to IDPs in country. Since 1997, this has included £76.5 million to the UNHCR and £125 million to ICRC. DFID has provided £2.2 million targeted funding for non-governmental organisations (NGO)s since 1997 for IDP projects, such as the Brookings Institution-University of Berne Project on Internal Displacement.

In Iraq, our humanitarian spending, as shown above, includes £1.7 million which we allocated to the UK NGO AMAR for their work on IDPs. The United Nations have also assisted IDPs in Iraq. DFID has contributed over £110 million to the UN for their work in Iraq since 2003.

Andrew George: To ask the Secretary of State for International Development what discussions he has had with *(a)* the United Nations High Commissioner for Refugees (UNHCR) and *(b)* his European counterparts about the UNHCR's proposal for a central fund for internally displaced persons. [55053]

Hilary Benn: The central fund is the Central Emergency Response Fund (CERF), which is being launched on 9 March in New York. The UN has agreed to reform the CERF, which will enable UN humanitarian agencies, including the United Nations High Commissioner for Refugees (UNHCR), to provide a more predictable and timely response to emergencies, including to Internally Displaced Persons (IDP)s, by ensuring that initial funding is available immediately to support rapid response to humanitarian crises and address critical humanitarian needs in under-funded emergencies.

During 2005, DFID Ministers and senior officials held a range of discussions about the role of the CERF with international partners, including European counterparts and UN agencies. Last year, I wrote to EC counterparts seeking their support for the CERF. In October, I raised the issue when I addressed the Informal Humanitarian Affairs Committee on UN reform, and at the informal meeting of EU Development Ministers and, in October, my hon. Friend discussed the CERF with the High Commissioner for Refugees, Antonio Guterres.

The CERF will include, but is not exclusively for IDPs. The UK will be the largest contributor, and has pledged £40 million. Total pledges to date amount to around $187 million.

Andrew George: To ask the Secretary of State for International Development what assessment he has made of the United Nations High Commissioner for Refugees' proposal for a central fund for internally displaced persons. [55054]

Hilary Benn: The central fund is the Central Emergency Response Fund (CERF). The UN has recently approved reform of the CERF, so as to enable UN humanitarian agencies, including the United Nations High Commissioner for Refugees (UNHCR), to provide a more predictable and timely response to emergencies, including to internally displaced persons (IDPs). The fund aims to ensure that initial funding is available immediately to support rapid response to humanitarian crises and address critical humanitarian needs in under-funded emergencies. In December 2004, I put forward the proposal for a global humanitarian fund for improved response to emergencies; I will attend the launch of the CERF on 9 March in York.

DFID's assessment is that the CERF will be valuable in enabling the UN to respond faster when crisis strikes and to achieve more equitable levels of funding between crises. It will be important that the UN develops arrangements with major NGOs so as to be able to transfer funds quickly to non-governmental organisations (NGO) implementing partners, in cases where NGOs are best-placed to deliver the necessary response.

The CERF will include, but not be exclusively for IDPs. The UK will be the largest contributor to the fund. We have pledged £40 million. Total pledges so far amount to around $187 million.

Kenya

Mr. Gregory Campbell: To ask the Secretary of State for International Development what discussions he has had with the Government of Kenya regarding recent reports of corruption in that country; and what effect it will have on international assistance offered by the UK to Kenya. [56140]

Hilary Benn: I had frank discussions with President Kibaki about corruption when I visited Kenya in January 2006. Since then considerable action, including the removal of three senior Ministers, has taken place in response to public pressure following the release of the Githongo dossier and the release of the Goldenberg Report. This is an encouraging start but Kenyans are calling for more to demonstrate full political accountability.

I do not agree that the UK should cut development assistance. Most of the development agencies, including DFID, feel that just because poor people live in a country where corruption is a major problem, it does not mean that they do not deserve our assistance. Indeed much of our assistance is directed towards trying to prevent future corruption through improved financial management, procurement, better governance, justice, law and order. The bulk of our assistance (over 70 per cent.) to Kenya improves lives. Our support will mean textbooks for each of the 18,500 primary schools in Kenya and 12,000 new classrooms. It will also deliver 11 million insecticide treated bednets, saving 167,000 children's lives. We have provided £23.7 million to drought affected regions of Kenya since December 2005.

The UK does not provide direct budget support to Kenya precisely because of our concerns about corruption, all DFID's projects have rigorous safeguards to ensure that our assistance is not being misdirected. Unless there is more evidence of Government of Kenya commitment to political accountability then the prospects for budget support from us and from others look very remote.

Latin America

John Bercow: To ask the Secretary of State for International Development what assessment he has made of the levels of *(a)* poverty and *(b)* inequality in Latin America and of whether levels are being reduced sustainably. [55415]

Mr. Thomas: According to national poverty line data collected by the United Nations, the percentage of the population living in poverty in Latin America and the Caribbean decreased from 48.3 per cent. in 1990 to 42.9 per cent. in 2004. Levels of extreme poverty, whereby a person's basic food needs cannot be met, decreased from 22.5 per cent. to 18.6 per cent. over the same time period. Extreme poverty rates in the region differ considerably across countries. In Bolivia,

Guatemala, Honduras, Nicaragua and Paraguay, more than 30 per cent. of the population live below the extreme poverty line. More than half of the total population in Latin America living in extreme poverty is concentrated in the largest countries: Brazil (25 per cent.), Mexico (14 per cent.) and Colombia (12 per cent.). The extreme poverty rate is higher among indigenous and afro-descendant people, ranging from 1.6 times higher than the rate of the rest of the population in Colombia to 7.9 times in Paraguay.

There are very high levels of inequality in Latin America. In most countries, the share of total income of the richest 20 per cent. of households is between 10 and 16 times larger than the poorest 20 per cent. of households. Income inequality levels are highest in Bolivia, where the poorest 20 per cent. of households receive only 2.2 per cent. of income and in Brazil where the richest 20 per cent. of households receive 62.4 per cent. of income. Between 1990 and 2003, income inequality increased in Argentina, Bolivia and Brazil and decreased in Colombia, Nicaragua and Honduras.

At current rates of progress, Latin America is unlikely to meet the Millennium Development Target to halve the proportion of people living on less than a $1 a day by 2015. Although substantial progress was made in reducing poverty in the early 1990s, progress slowed down subsequently due to the economic crises experienced in many countries in 2000 and 2001. Poverty has been reduced more rapidly in countries that have relatively high levels of human development such as Chile, Uruguay and Brazil. Conversely, countries with low levels of human development such as Honduras and Bolivia have made the lowest levels of progress. Latin America is on track to meet MDGs on universal primary education; gender equality and reduction of child mortality but faces huge challenges in meeting those for maternal mortality, HIV/AIDS, and environmental sustainability.

Lesotho

Chris Ruane: To ask the Secretary of State for International Development what help and funding is in place to develop twinning and civic co-operation between the UK and Lesotho. [56200]

Hilary Benn: DFID has agreed with the Government of Lesotho to support the implementation of four key priorities in their Poverty Reduction Strategy: HIV/AIDS; job creation food security; governance, safety and security. The UK does not provide support for twinning or civic co-operation within these areas.

Chris Ruane: To ask the Secretary of State for International Development what help has been given to Lesotho to help combat HIV/AIDS among *(a)* children and *(b)* adults in each of the last seven years. [56203]

Hilary Benn: DFID has provided support to Lesotho for HIV prevention and control, through two channels: first, through our bilateral programme when support for HIV/AIDS commenced in 2004; and second, through regional programmes since 2001–02. The bulk of this assistance is directed towards the adult population, though the general nature of it helps the entire population, including children. Due to the nature of the regional programmes DFID cannot provide, in all cases, detailed financial figures that solely reflect Lesotho's direct benefit from regional programmes.

DFID's bilateral support to HIV/AIDS responds to the priorities identified in the Government's Poverty Reduction Strategy. Commencing in 2004, it provides a total of £1.8 million over three years. Funding is directed towards mainstreaming HIV/AIDS in economic and poverty planning, strengthening the private sector's response to HIV, and facilitating the establishment of an effective National AIDS Commission and UN response.

Over the last five years, we have supported the Southern African Development Community (SADC) implement a programme for HIV prevention. Resources committed to Lesotho include: £830,000 for condom social marketing; £320,000 for behaviour change and communication; and £41,000 for the treatment of sexually transmitted diseases.

DFID has supported the ground-breaking Soul City programme in Southern Africa. This £14 million commitment is directed at both children and adults and provides information and guidance through multiple media channels.

DFID has recently agreed a £2 million programme with the East and Southern Africa regional office of the Joint UN Programme on HIV/AIDS (UNAIDS). We expect this support will increase the technical capacity of the UN to respond to the epidemic in Lesotho.

We have just recently approved an £18 million programme for the next three financial years, concentrating upon support for orphans and vulnerable children. This programme will be implemented by UNICEF and covers the six worst affected Southern African countries, including Lesotho. This means a rough allocation of £3 million for children over the next three years.

Chris Ruane: To ask the Secretary of State for International Development when a Secretary of State in the Department for International Development last visited Lesotho. [56206]

Hilary Benn: In July 2002 Baroness Amos, the then Parliamentary Under-Secretary for Africa and Commonwealth affairs, visited Lesotho.

Ian Lucas: To ask the Secretary of State for International Development what measures he is taking to promote good governance in Lesotho. [56236]

Hilary Benn: DFID has agreed with the Government of Lesotho to support the implementation of four key priorities in their Poverty Reduction Strategy: HIV/AIDS; job creation food security; and governance, safety and security.

DFID has been supporting good governance in Lesotho since the General Election in May 2002. Since then, our support is directed towards the following:

helping the Lesotho Revenue Authority to address corruption and raise revenue;

strengthening the government's public financial management, particularly the Public Accounts Committee, to make their systems work better; and

supporting civil society's ability to increase government transparency and improve government accountability to Basotho taxpayers.

Liberia

Joan Ruddock: To ask the Secretary of State for International Development how much *(a)* direct and *(b)* indirect aid his Department provided to Liberia in 2004–05. [54655]

Hilary Benn: DFID supported Liberia with £6 million of humanitarian aid in financial year 2004–05, via a range of humanitarian agencies. It was used for basic health care, emergency medical services, water and sanitation, humanitarian air services, protection for displaced people, and their education and re-integration.

In addition, the Disarmament, Demobilisation, Rehabilitation and Reintegration (DDRR) process was assisted with £3 million (£2 million via the UN Trust Fund and £1 million for UNICEF's Programmes of Education and Reintegration for Children Associated with the Fighting Forces).

DFID also began support for governance reforms with initial expenditure of approximately £200,000.

Figures for DFID support to Liberia through multilateral in 2004–05 are not yet available from the Development Assistance Committee. The latest (estimated) information dates from 2003 when DFID provided £1 million through the EC, and £700,000 through the United Nations.

Mexico

Mr. Holloway: To ask the Secretary of State for International Development what assistance he gave to Mexico following the recent hurricanes. [54917]

Mr. Thomas: Following recent hurricanes, Mexico showed sufficient national capacity to respond without international assistance. Therefore there was no request for international assistance by the Mexican Government.

Had there been a request, DFID would have been well placed to respond, as we have after other hurricanes in the region. Throughout the last hurricane season the DFID Caribbean office was strengthened to enhance tropical storm monitoring, preparedness, assessment and response capacity. DFID also had relief supplies on one of the UK frigates based in the Caribbean.

Middle East

Mr. Clappison: To ask the Secretary of State for International Development pursuant to the answer of 14 February 2006 to the hon. Member for Hornsey and Wood Green (Lynne Featherstone), *Official Report*, column 1806W, on the Middle East, what assessment he has made of the implications for the allocation of aid of the post-election policy statements of the leadership of Hamas on the recognition of Israel, the renunciation of violence and the acceptance of previous obligations and agreements. [56061]

Hilary Benn: There is currently an interim administration in charge of the Palestinian Authority (PA). Until a new government takes office and makes clear its position on the conditions in the Quartet statement of 30 January, it is too early to say what the UK Government's future aid programme to the Palestinians might look like.

Montserrat

Daniel Kawczynski: To ask the Secretary of State for International Development what aid was given by the UK to Montserrat in *(a)* 1980 and *(b)* 2004. [55939]

Mr. Thomas: DFID's aid to Montserrat in 1980 was £1.2 million and £20.3 million in 2004.

Multilateral Institutions

Mark Simmonds: To ask the Secretary of State for International Development if he will make a statement on mechanisms for identifying and correcting poor performance by multilateral institutions. [55923]

Hilary Benn: DFID is committed to monitoring the effectiveness of the multilateral organisations it supports. During 2004, we conducted an assessment of 23 multilateral agencies looking at their internal systems. We used a common multilateral effectiveness framework (MEFF) to better understand how well they were organised to deliver their objectives. The assessments were carried out in partnership with the agencies concerned.

DFID uses the results of the MEFF in conjunction with other assessments, such as the surveys carried out by the Multilateral Organisations Performance Assessment Network, and the reporting of multilateral themselves, to assess multilateral performance and to inform partnership decisions.

At the country level, we assess the impact and effectiveness of multilaterals with whom we have a relationship drawing on the views of partner Governments and donors. This evidence based approach helps us engage with multilaterals at a number of levels and informs our decisions around financing.

In addition, we undertake monitoring of multilateral organisations working on particular issues, for example the delivery of humanitarian services. These are framed by institutional strategies which set out jointly agreed objectives between DFID and the organisation linked to financial support. The aim is to foster a transparent relationship which set outs clear principals and targets linked explicitly to improving effectiveness.

Mark Simmonds: To ask the Secretary of State for International Development if he will make a statement on his Department's policy on consolidation within the multilateral system. [55924]

Hilary Benn: 2005 was an important year with real progress made as a result of a number of events; the publications of the UN Secretary General's 'In Larger Freedom' report and Commission for Africa report, the G8 summit, Live8, the Make Poverty History Campaign, the Millennium Development Review and the World Trade Organisation (WTO) trade talks. 2006 and beyond, presents significant challenges as we have to deliver on the commitments made in 2005.

An effective multilateral system will be important to delivering on these commitments. Our vision and the role the UK is playing to support a consolidated and effective multilateral system will be set out in the forthcoming White Paper on international development.

We have already welcomed the announcement at the millennium summit review on the establishment of a Peace Building Commission and Human Rights Council, both of whom have an important role to play towards meeting the millennium development goals (MDG)s.

We are committed to revisiting the structure of the multilateral system (the UN, EU, multilateral banks) and their mandates to ensure that overlap is reduced. We want to see the right agency or organisation, focusing on its area of strength, in the right context with the funding levels it needs to deliver. For example the proliferation of UN agencies has created a complex structure where overlap is evident. We are working toward a more effective and efficient multilateral system which is able to respond to the changing global context.

We also strongly welcome the Secretary General's recent announcement of an international panel to review the UN's development work. My right hon. Friend, the Chancellor of the Exchequer, is a member of this panel and we will be putting forward the case for a strong development role for the UN in the future, involving more stable and predictable financing to meet clear objectives. This would build on the considerable work already begun by the UN's various specialised agencies, funds and programmes to co-ordinate their efforts more closely at the country level. We will also take advantage of the opportunity presented by the White Paper to set out what we think are important roles for both the EU and the multilateral development banks in the 21st century.

Mark Simmonds: To ask the Secretary of State for International Development what criteria his Department uses to select multilateral partners. [55925]

Hilary Benn: The international system, which includes the multilaterals, was designed for the challenges of the post world war II period. Today we are facing new challenges including energy security, climate change, health pandemics, corruption and organised crime. We need a new vision that is fit for purpose in today's world, within which we need to clarify the role of multilaterals. DFID is particularly focused on this as we contribute around 40 per cent. of our total development assistance through the multilateral agencies to achieve the millennium development goals (MDGs).

We are working with the international community to agree objectives on reform. These include the role of the United Nations, European Union and international financial institutions in relation to priorities such as addressing insecurity, natural resources depletion and improving humanitarian assistance.

Looking ahead to the Comprehensive Spending Review 2007, we are looking at multilaterals and assessing their impact against the contribution bilateral programmes make towards achievement of the MDGs This analysis will help us identify criteria for selecting multilateral partners and to help us make financing decisions which have the greatest impact on the lives of the world's poor people.

Mark Simmonds: To ask the Secretary of State for International Development if he will make a statement on his assessment of the Multilateral Effectiveness Framework. [55926]

Hilary Benn: The Multilateral Effectiveness Framework (MEFF), a major assessment of the organisational effectiveness of 23 multilateral agencies was completed in 2004 and the results shared with the respective agencies. Areas of both comparative strength and weakness were identified. The key areas of weakness are being given priority in the tracking over multilateral performance over the next two years.

A key aspect of effectiveness assessed by the MEFF was the degree to which multilateral were improving their focus on results, including by supporting national systems and poverty reduction plans, delegating more responsibility to country offices, and monitoring their own contribution to development outcomes.

The assessments highlighted the positive impact of recent reforms. A significant number of multilaterals were able to demonstrate improvements in how they monitored their own effectiveness and how they managed by results. There was also evidence of greater preparedness to work in partnership with each other.

Through the MEFF, DFID has developed a greater understanding about its multilateral partners, and we will continue to support them to address the areas of relative weakness the individual assessments identified.

Overseas Health Workers

John Barrett: To ask the Secretary of State for International Development what discussions he has had with his Cabinet colleagues regarding employment of overseas health workers in the UK. [55329]

Mr. Thomas: The employment of overseas health workers in the UK is a complex problem which has been discussed in some depth across government and in particular with the Department of Health and with the Scottish Executive and Welsh Assembly.

As a result of these discussions, we have put in place measures to address the "pull" factor of migration to the UK of health workers and to promote ethical international recruitment. The UK has adopted systematic policies including:

Guidance and a revised code of practice embodying ethical principles for the international recruitment of healthcare workers.

An agreed list of developing countries that should not be targeted for recruitment, which has prevented the NHS and other major health employers from actively recruiting from 150 of the poorest and middle income countries.

A memorandum of understanding has been signed with South Africa, for qualified healthcare professionals to undertake time limited placements.

Part of the problem is the chronic under-investment in health workers and health systems in developing countries. This results in low job satisfaction for health

workers, which, combined with very low salaries, leads to migration of health workers to the UK and other developed countries. The UK Government support efforts to increase the supply of health workers, through, for example support to the health sector plan and budget or general budget support. This can support payment of salaries and allowances, and increased production of health workers. The UK support is also geared to improving conditions for health workers through improving health systems/health sector policies and increasing innovative approaches to service provision. This is an area which is covered in DFID's policy paper "Moving Out of Poverty—Making Migration Work Better for Poor People", which has just been approved by Ministers.

Since 2000, the UK Government have spent over £650 million on health sector support in Africa, primarily to strengthen health systems including training and retraining health workers. In Malawi for example, we have invested £100 million over six years towards the Sector Wide Approach for health to strengthen health services and increase access to basic health services. The Malawi programme has three main elements:

improving incentives for recruitment and retention of Malawian staff through salary increases for 11 professional and technical groups—5,400 health workers now receiving 52 per cent. salary top-up and over 700 new staff recruited.

expanding domestic training capacity by over 50 per cent., including doubling the number of nurses and tripling doctors being trained;

using international volunteer physicians and nurse tutors as a stop-gap measure while more Malawians are being trained.

Palestine

Mr. Clappison: To ask the Secretary of State for International Development what assessment he has made of the extent of misappropriation of aid received by the Palestinian Authority. [56062]

Hilary Benn: Since 2004, UK and European Community (EC) financial support to the Palestinian Authority's (PA) budget has been provided through a Reform Trust Fund, managed by the World Bank. Funding is conditional on the achievement of benchmarks for accountability and reform, progress against which is carefully monitored.

There has been recent media coverage of corruption investigations by the Palestinian Attorney General. These investigations have focused on possible abuses by officials in dealings with private companies and date from before the Reform Trust Fund was created. There is no evidence to suggest that budget support to the PA provided by the UK or other donors through the Reform Trust Fund has been diverted to private bank accounts or otherwise misappropriated.

Prior to 2004, the UK did not provide budgetary support to the PA. The EC did provide such aid to the PA and its programme was reviewed by the European Anti-Fraud Office. This review found no evidence to suggest that EC aid had been misused.

Population Control

John Bercow: To ask the Secretary of State for International Development what recent representations he has received on population control. [55442]

Mr. Thomas: The UK all-party group on population, development and reproductive health has invited DFID to contribute to its Hearing in the spring on "Population Growth—Impact on the Millennium Development Goals". DFID will be submitting evidence and I look forward to reading the report of the Hearing in due course.

DFID also regularly receives representations about the funding of the United Nations Population Fund (UNFPA) in connection with allegations that it supports population control. We are satisfied that the UNFPA does not support population control, but works to promote reproductive choice within its population programmes.

Rwanda

Ed Balls: To ask the Secretary of State for International Development how much income the tea and coffee market generated for Rwanda in 2004–05; and what percentage of the country's exports it accounted for. [54804]

Hilary Benn: Rwanda's tea export receipts for the years 2004 and 2005 were US$22 million and US$26 million respectively. The corresponding figures for coffee were US$29 million and US$39 million.

Total export receipts for the two years were $90 million (Government of Rwanda/International Monetary Fund (IMF) figure) and $123 million (provisional figure) respectively, so tea and coffee together accounted for 54 per cent. of total export receipts over the period.

Note:

(Figures from compilations by the Rwanda National Innovation and Competitiveness Programme, On The Frontier Group.)

Ed Balls: To ask the Secretary of State for International Development what proportion of UK aid to Rwanda has been directed to improving healthcare facilities in the last five years. [54806]

Hilary Benn: Although difficult to calculate, it is estimated that about 8–10 per cent of all external aid to Rwanda in recent years has been allocated to health.

The Government of Rwanda (GoR) attaches great importance to health in its Poverty Reduction Strategy Paper (PRSP). The GoR Ministry of Health (MoH) has a strong national health strategic plan (2005–2009) which includes improvement of health care facilities. The health strategic plan is funded through the GoR budget, which is partly funded by general budget support (GBS) provided by donors. Health is also funded through donor support provided off-budget.

The Government of Rwanda (GoR) budget allocation to health has increased substantially over the last five years. In 2003 total government expenditure allocated to the health sector was 4.4 per cent. This increased to 8 per cent. in 2005 and 8.4 per cent. in 2006.

	Percentage		
	2002	2003	2004
Proportion of general budget support as a percentage of external aid	40.09	37.18	[1]36.89
Proportion of all external aid to health	7.76	9.92	[1]8.81
GoR health expenditure (as percentage of GoR expenditure) allocated in budget.	n/a	4.4	4.9

[1] Data for 2004 is programmed estimates.

Notes:

1. Data source for first two rows is Ministry of Finance, (Registry of External Aid to Rwanda, Volume 1, April 2004)
2. A Public Expenditure Review (PER) is currently underway in health, which will provide more up to date data.
3. Preliminary findings of a 2005 Ministry of Health donor mapping study shows a two fold increase in external aid to the health sector between 2004–05 (with an increase from approx 40–80 million US$).

Sierra Leone

Mr. Clifton-Brown: To ask the Secretary of State for International Development what steps are being taken by *(a)* the UK and *(b)* the international community to increase capacity in the mining and fishing industries in Sierra Leone. [55450]

Hilary Benn: DFID has funded an adviser to the President of Sierra Leone since July 2002 to work on the development of a diamond strategy for the sector for Sierra Leone, as part of its overall policy on minerals which the Government of Sierra Leone ratified in 2003. Since that time, we have been working with the Government of Sierra Leone and other donors, including the World Bank, European Commission and the United States Agency for International which includes establishing an appropriate legal and regulatory framework; creating the right business environment; strengthening the capacity of relevant government departments; and supporting non-governmental organisations. These steps will improve the transparency of management of diamonds in Sierra Leone. We also continue to actively support the implementation of the Kimberley process.

A DFID programme of assistance is supporting the objectives set out in the mineral policy. It has two main aims: to maximise the economic and social benefits of the diamond sector to both the Government and the people of Sierra Leone; and to ensure that the benefits accrued from the sector are divided more equitably among those involved. The programme includes: provision of technical advice to the Office of the President; support to review and redraft the Mines and Minerals legislation; technical assistance to the Gold and Diamond Department (GDD) of the National Revenue Authority (NRA); support for the design and implementation of a cadastre system; technical assistance for the Ministry of Mineral Resources (MMR); support to build the capacity of the United Mineworkers Union (UMU); and support for the development of a business and statistical information service. Alongside the UK, the EC is also supporting capacity building in the Ministry of Mineral Resources through the provision of an adviser who is working on the reopening of Sierra Leone's Rutile Mine. The World Bank aim to begin implementing a sector-wide Mineral Project before the end of 2006.

The problems of illegal fishing are considerable, with losses to sub-Saharan Africa estimated to be $1 billion per annum. DFID, in partnership with the UN's Food and Agriculture Organisation (FAO), governments of the West Africa region and local fishing communities, supports a programme to increase local capacity to address poverty in fishing communities through better management of resources. Sierra Leone has participated in this programme and has access to the support that it provides.

More recently, the UK along with a number of other governments has created a programme designed to address illegal, unregulated and unreported fishing activities, which both DFID and the Department for the Environment and Rural Affairs (DEFRA) support. In addition to the support being provided by the UK, the European Commission has recently approved a programme of support in Sierra Leone aimed at providing stock assessments to enhance the country's fisheries management capacity.

Somalia

John Bercow: To ask the Secretary of State for International Development what steps have been taken by his Department to promote the transition from conflict in Somalia. [55416]

Hilary Benn: DFID provided considerable financial and diplomatic support to the 2002–04 national reconciliation conference in Kenya, which resulted in agreement on a transitional charter (or constitution) for Somalia, selection of a new transitional parliament, election of President Yusuf, and appointment of a Transitional Federal Government in January 2005. Since then DFID and the Foreign and Commonwealth Office (FCO) staff have been closely and continuously involved in international efforts to encourage Somali leaders to resolve their differences, and to make the transitional institutions work effectively for stability and reconstruction of the country. These efforts contributed to the new accord between the President and the Parliamentary Speaker reflected in their 'Aden Declaration' of January 2006, and the decision to proceed with the current session of the Somali Parliament in Baidoa after almost a year of disagreement within the transitional institutions and threatened conflict.

In addition:

We have supported efforts to develop a national security and stabilisation plan (NSSP) for Somalia, as called for in the UN Security Council Presidential Statement of July 2005, including financial support for a joint Somali/international community planning conference for the NSSP due to take place later this month;

We facilitated a meeting of senior Somali police officers to develop plans for the new police force, and we have recently allocated a further $1.1 million to the United Nations Development Programme (UNDP)-managed Rule of Law and Security Programme to help develop police, prisons, judiciary, legal and paralegal services throughout Somalia;

We are supporting an International Dialogue for Peace Programme in Somalia which is bringing together Somali public and civil society bodies for a range community-level reconciliation and conflict prevention activities.

John Bercow: To ask the Secretary of State for International Development what assessment he has made of reports that civilians in southern Somalia are dying from thirst as a result of drought. [55417]

Hilary Benn: The drought affecting parts of southern Somalia is considered to be the most severe for at least 10 years. This has meant that many wells have dried up entirely, and that those remaining are being overused. Many of the people in southern Somalia live by raising livestock and due to the exceptionally dry conditions this year they are having to travel further than usual to find pasture for their animals. We have also heard reports that in some cases this has resulted in people arriving at wells only to find them dry or unusable, but without the resources or ability to reach another well. This is a desperate situation. In addition, water is a commodity that is bought and sold in southern Somalia, so it is possible that people simply do not have the means to pay, although it is widely understood that people who are in desperate personal need are given water even if they are unable to pay.

Deaths from thirst may well have occurred in some extreme cases, although the impact of reduced and poor quality water is much wider than this. There are additional deaths from water borne diseases, and the deadly combination of these diseases and malnutrition, plus the sheer burden in terms of time and money on households to keep themselves supplied with water are also taking a terrible toll.

The UK is one of the leading donors to humanitarian relief efforts in Somalia. We are providing £7 million to the immediate relief effort to help enable the UN, NGOs and regional authorities to deliver urgently needed food aid, nutritional therapy, emergency water supplies and health care to those areas worst affected by drought.

South East Asia Earthquake

Mark Durkan: To ask the Secretary of State for International Development how much aid the Government have allocated in response to the South East Asia earthquake; for what purposes; and what further aid *(a)* has been requested and *(b)* is planned. [53606]

Mr. Thomas: DFID has allocated £58 million to meet relief needs. The following table shows the breakdown of assistance to date.

At the 19 November Donors' Conference, DFID pledged a grant of some £70 million to assist Pakistan with reconstruction and rehabilitation following the 8 October earthquake.

The UK is planning a programming mission likely to take place during March where views of the Government of Pakistan and donors will be sought as to how best our funds can be directed to support the reconstruction effort.

The first £5 million tranche of the reconstruction and rehabilitation support for reconstruction is available immediately. In consultation with international programme partners in Pakistan and the Governments of Pakistan we propose to make the following allocations for immediate reconstruction purposes:

reconstructing critical bridges in the affected area, in order to support the whole reconstruction effort through rehabilitated road communications;

training for teachers and administrators, in order to underpin support for rehabilitation of the education sector;

TB prevention services and mental health support services in the earthquake affected areas.

Our programming mission will now look at how to allocate the remaining £65 million.

Annex 1—DFID support to Pakistan earthquake

Partner	*Activity*	*Amount (£)*
Non-governmental organizations (NGOs)		
Oxfam	3,500 winterised family tents, 19,700 collapsible 10-litre jerry cans, 7,530 wool blankets, 40,000 sleeping mats, 20,000 tarpaulins	998,448 (in-kind)
Oxfam	Wat/san	560,000
Islamic Relief	10,000 tarpaulins, 20,000 blankets, 1,000 winterised family tents	258,000 (in-kind)
Christian Aid/ Church World Services	1,000 winterised tents in-kind; Programme for shelter, food and first aid. 2,000 tarps from Lahore (£10,000)	310,000 (including 115,000 in-kind)
Christian Aid	Wat/san in NWFP	347,322
Save the Children UK	Provision of shelter, blankets, clothing, primary health care, psycho social support to children	300,000
Save the Children UK	Shelter	600,000
Save the Children UK	Livelihoods: cash for vulnerable families and village shopkeepers	887,681
Save the Children India	Shelter for India administered Kashmir	500,000
Action Aid	Food packages, health centres, psycho social support, and shelter; 1,250 tarps from Lahore (£6,100)	306,100
RSPN	Tents, food, sanitation, water; 2,750 tarps from Lahore (£13,500)	313,500
RSPN	Shelter, livelihoods and advocacy	205,083
Mercy Corps	Health units, emergency obstetrics and outreach	212,000
International Health Partners	Provision of various emergency medicines	50,000
Norwegian Refugee Council	Stoves and fuel	300,000
Norwegian Refugee Council	Shelter	700,000
Norwegian Refugee Council	Camp Management	850,000
CAFOD	Wat/san and shelter, and cash for work; 2,000 tarps from Lahore (£10,000)	310,000
IMC	Mobile health clinics, primary health care training, distribution of hygiene kits	289,000
GOAL	2,000 tarps from Lahore	10,000
ACTED	Shelter, toolkits and latrines	300,000
ACTED	Water and sanitation	637,356
Action Against Hunger	Wat/san	337,123

Partner	*Activity*	*Amount (£)*
Action Against Hunger	Wat/San	258,228
Internews	Communication, support to journalist training, radio distribution	300,000
Tearfund	Shelter	498,964
Merlin	To set up two field trauma units in the Panj kot valley. Support to four primary health centres and health outreach via mobile units	800,000
Australian Aid International	Health	199,424
Handicap International	Health assistance and rehabilitation to disabled population	300,000
HAPI	Support to agency accountability mechanisms	45,402
IRC	Health assistance	300,000
Solidarity	Wat/san	314,055
World Vision	Shelter	499,244

RWSSP	Wat/san	385,587
RSPN	Shelter, livelihoods and advocacy	200,000
DFID Direct Costs		
Direct costs	Search and rescue teams; DFID assessment teams, operating costs	900,000
Total		53,326,519

Spending Review (Efficiency Targets)

Mrs. Villiers: To ask the Secretary of State for International Development what interim targets he has set for achieving *(a)* the agreed efficiency target for his Department and *(b)* the civil service work force reductions targets for (i) gross reductions in posts, (ii) net reductions in posts and (iii) relocations for his Department, as set out in the 2004 Spending Review; what the baseline figures are against which these interim targets are assessed; on what dates they will take effect; and by what dates these interim targets are intended to be met. [52910]

Hilary Benn: DFID has agreed the following interim targets and dates:

(a) For the agreed efficiency target of £420 million by March 2008, the Department has set intermediate targets of £160 million by March 2006 and £303 million by March 2007.

(b) For civil service work force numbers the interim targets set by the Department are 1,820 by March 2006 and 1,715 by March 2007. The final target of 1,610 will be achieved by March 2008. The gross reduction compared to the April 2004 baseline of 1,780 therefore represents 170 staff. DFID does not have targets for net reductions in post. On relocations 75 posts will have been moved by March 2006 with the full target of 85 achieved by March 2007.

In December 2005, DFID agreed a revised Efficiency Technical Note which contains baseline figures for all its efficiency targets. The Technical Note is available to the public on DFID's website (http://www.dfid.gov.uk/pubs/files/efficiency-technical-note.pdf).

Mrs. Villiers: To ask the Secretary of State for International Development what baseline figures he is using for assessing progress on his Department's targets to *(a)* increase the percentage of bilateral programme spending going to budget support, *(b)* improve the value for money of aid projects, *(c)* increase the level of EC aid going to low income countries, *(d)* raise support for the International Development Association replenishment round, *(e)* deliver cashable savings on administration costs and *(f)* improve procurement; what progress has been made towards these targets to date; and what the total efficiency savings achieved to date are for these targets. [52927]

Hilary Benn: In December 2005 DFID agreed a revised Efficiency Technical Note which contains baseline figures for all its efficiency targets. The Technical Note is available to the public on DFID's website (http://www.dfid.gov.uk/pubs/files/efficiency-technical-note.pdf).

To 31 December 2005, DFID has achieved £41.1 million of efficiency gains. Against each target, progress is as follows:

(a) For the percentage of bilateral programme spending going to budget support: Figures remain provisional until the end of year outturns after the end of March 2006. Forecasts for 2005–06 predict that £922 million will be channelled through programmatic support, an increase of £242 million over the baseline. Efficiencies in the first nine months therefore amount to £36 million.

(b) For the value for money of bilateral projects: Data from quarter 3 2005–06 does not yet show any improvement on the baseline.

(c) For the level of EC aid going to low income countries: Figures will become available from the Development Assistance Committee (DAC) of the Organisation for Economic Development (OECD) after the end of the financial year.

(d) For DFID's contribution to the International Development Association: The conclusion of negotiations for IDA 14 (the latest replenishment, covering the period 2005–08) has resulted in a 59 per cent. increase in the basic contribution over IDA 13. Efficiency gains will be declared as promissory notes are drawn down. This will now take place in 2006–07.

(e) For administration costs: Efficiency gains for this target will commence in 2006–07.

(f) For procurement savings: Results from the last nine months show greater than expected success, with £5.1 million of cashable savings made against a target of £3 million by March 2006.

St. Helena

Andrew Rosindell: To ask the Secretary of State for International Development how much aid has been given to St. Helena in each of the last eight years. [56865]

Mr. Thomas: DFID has provided the following aid to St. Helena over the last eight years:

	£
1997–98	8,765,000
1998–99	8,806,000
1999–2000	9,362,000
2000–01	10,115,000
2001–02	10,106,000
2002–03	9,555,000
2003–04	10,525,000
2004–05	14,481,000

St. Helena also benefits from DFID's 'regional' Overseas Territories programme. Individual country shares of this cannot be attributed without incurring a disproportionate cost.

The European Development Fund also allocates funds for the UK Overseas Territories. Cumulative allocations since 1993 total approximately €86.33 million (the UK share of which is about €10.79 million or about £7.2 million). This sum, some of which is still being committed to or spent on approved development activities, has been shared among eligible UK Overseas Territories. St. Helena's share (which includes provision for Ascension Island and Tristan da Cunha) is €18,150 million (approximately £12.3 million).

Sudan

John Barrett: To ask the Secretary of State for International Development what recent assessment he has made of the effectiveness of the UN mandate in respect of Darfur. [55327]

Hilary Benn: There is currently no UN mandate covering peacekeeping operations in Darfur. Peace support operations there are at present being conducted by African Union personnel (AMIS) on the basis of a Memorandum of Understanding between the African Union (AU) and the Government of Sudan. The UK and other international partners recently participated in a joint assessment mission with the AU. This concluded that AMIS' current mandate is adequate but that the African Union Mission's capacity needs to develop further if it is to be able to carry out the tasks required. We will continue to assist the AU in this.

Tax Competition

Andrew George: To ask the Secretary of State for International Development what assessment his Department has made of the impact of tax competition on developing countries. [55056]

Mr. Thomas: The Department for International Development's (DFID) second White Paper, "Eliminating World Poverty: Making Globalisation Work for the Poor", December 2000, drew attention to the dangers for developing countries of tax competition—the process whereby Governments offer ever more generous tax concessions (such as tax holidays) in an attempt to attract new investment.

Tax competition can have harmful effects if it compromises Governments' ability to raise revenue to fund essential services.

DFID has supported several international studies in this area (for example, by the World Bank and the Organisation for Economic Co-operation and Development). While specific features of a tax regime may influence some investment decisions in some countries at some times, the general conclusion of this work is that selective tax incentives can unnecessarily reduce Government revenues while having little effect in attracting new investment. Consistent with this finding, DFID's policy work emphasises that developing countries should focus on improving the quality of their overall investment climates for domestic and foreign investors alike, rather than competing on taxes.

UN Peacebuilding Commission

Mark Simmonds: To ask the Secretary of State for International Development if he will make a statement on the establishment of a UN peacebuilding commission. [55922]

Hilary Benn: The UN Millennium Review Summit agreed to establish the Peacebuilding Commission (PBC) on 16 September 2005. The Commission was brought into being on 20 December 2005 by joint decision of the UN Security Council and General Assembly. Its functions are to *(a)* marshal resources for peacebuilding; *(b)* advise and approve strategies for reconstruction and institution building and *(c)* extend the period of international attention on peacebuilding in countries emerging from conflict.

Work to appoint the members of the Peacebuilding Commission's organisational committee is currently under way. Once the remaining members are chosen, we expect the Commission to rapidly identify priority countries for its support.

I believe that the establishment of the Peacebuilding Commission is a significant step forward in assisting countries to emerge from conflict and towards sustainable development. The Department for International Development and the Foreign and Commonwealth Office are working closely with the UN Secretariat to ensure that the Commission is able to start its work as soon as possible.

World Trade Organisation

John Barrett: To ask the Secretary of State for International Development what discussions he has had with the European Commissioner for External Trade since the World Trade Organisation's trade talks in Hong Kong. [55331]

Mr. Thomas: Neither I nor my right hon. Friend the Secretary of State for International Development have had any direct discussions with the Trade Commissioner

since Hong Kong. However, my right hon. Friend the Secretary of State for Trade and Industry has discussed the prospects for a successful conclusion to the current round of trade negotiations and how to achieve it.

EDUCATION AND SKILLS

Academic Earnings

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills what the average annual earnings of full-time members of the academic staff of universities in the West Midlands were in the last year for which figures are available. [55991]

Bill Rammell: The latest available figures are shown in the table:

Average salary[1] of full-time HE academic staff Higher education institutions in (a) West Midlands Government office region and (b) England in 2004/05

	Average salary (£)	
Grade	*West Midlands*	*England*
Professors	62,800	61,600
Senior Lecturers and Researchers	42,200	43,600
Lecturers	34,300	35,000
Researchers	26,800	26,800
Other Grades	30,200	41,400

[1] Average salary is derived from the gross basic salary per annum, in pounds sterling as stated in the contract at the reference date of HESA's staff count (July 31) or at the end date of the contract if earlier. It does not include any regular payments for additional duties, responsibility allowances or honoraria, regardless of their source. Figures have been rounded to the nearest 100.

Source:
HESA staff record data 2004/05

Academies

Mr. Marsden: To ask the Secretary of State for Education and Skills how many cases of children excluded from academies have been referred to an independent educational tribunal for appeal since academies were introduced. [53911]

Jacqui Smith: This information is not collected centrally.

Active Citizenship

Huw Irranca-Davies: To ask the Secretary of State for Education and Skills what steps the Government are taking to promote active citizenship among young people. [53504]

Jacqui Smith: Citizenship became a statutory subject in the National Curriculum in 2002. Promoting the development of skills of participation and responsible action is a fundamental part of the citizenship curriculum. Local education authorities and school governing bodies are now legally obliged to take account of guidance from the Secretary of State on consulting pupils when making decisions that affect them. Similarly, we have legislated to allow governing bodies to appoint young people as associate members. In addition, the Government are actively promoting school councils and mock elections in all schools, and encouraging schools to engage pupils as peer mentors and mediators. Young people are also engaged in the school inspection process as Ofsted now seek pupils' opinions when writing inspection reports. We are also funding the dissemination of guidance to help schools implement Active Citizens in Schools, which extends the principles of the successful Millennium Volunteers to 13 to 16-year-olds through citizenship lessons.

Adult Education

Dr. Kumar: To ask the Secretary of State for Education and Skills how much funding has been allocated to adult education in *(a)* England, *(b)* the Tees Valley and *(c)* the area corresponding as closely as possible to Middlesbrough South and East Cleveland constituency in each year since 1997. [45116]

Bill Rammell: The Department allocates funds for the post-16 education and training sector to the Learning and Skills Council (LSC) working through 47 local offices. The LSC was established in 2001 bringing the planning and funding of post-16 education together under one body within a framework set by Government. In 2001–02 the LSC spent £2,236 million on adult programmes including further education, work based learning, adult and community learning and other programmes. This increased to £2,427 million in 2002–03 and to £2,866 million in 2003–04. These figures are available from the LSC's published accounts. Figures for adult education for the years prior to 2001 are not comparable as the budget was split between a range of different organisations. My Department does not hold figures for adult education funding at local or regional levels. Mark Haysom, the council's chief executive has written to my hon. Friend and a copy of his reply has been placed in the House Library.

Letter from Mark Haysom, dated 2 February 2006:

I write in response to your recent Parliamentary Question to the Secretary of State for Education and Skills referred to the Learning and Skills Council (LSC) by Bill Rammell regarding the funding allocated to adult education in *(a)* England, *(b)* the Tees Valley and *(c)* the area corresponding as closely as possible to Middlesbrough South and East Cleveland constituency in each year since 1997.

Prior to the establishment of the Learning and Skills Council (LSC) in 2001 funding for further education in England was provided by the Further Education Funding Council (FEFC).

The FEFC allocated funding to a different cohort of providers using a different funding methodology to the LSC and therefore it is not possible for us to provide information on the funding allocated for adult education between 1997 and 2001.

I attach therefore a breakdown of the funding allocated by the LSC to FE providers in *(a)* England and *(b)* The Tees Valley from 2002/03–2005/06. It is not possible for us to provide figures for providers in the constituency areas you have requested because we do not have the detail of which providers are located with parliamentary constituencies. The figures show the total FE allocation for the academic year, the proportion of adult funding allocated and the percentage change.

I hope you find this helpful.

Mr. Hands: To ask the Secretary of State for Education and Skills what funds have been made available in 2005–06 for adult education courses in the

borough of Hammersmith and Fulham; and what percentage change this represents over the previous year. [45259]

Bill Rammell: The Department does not hold figures for adult education funding at local or regional levels. The Department allocates funds for the post-16 education and training sector to the Learning and Skills Council (LSC) working through 47 local offices. Some of the information you require is available on the LSC's website. The LSC was established in 2001 bringing the planning and funding of post-16 education together under one body within a framework set by Government. Mark Haysom, the Council's chief executive has written to the hon. Member and a copy of his reply has been placed in the House Library.

Letter from Mark Haysom, dated 13 February 2006:

I write in response to your recent Parliamentary Question to the Secretary of State for Education and Skills referred to the Learning and Skills Council (LSC) by Bill Rammell, Minister of State for Lifelong Learning, Further and Higher Education, regarding the funding allocated in 2005–06 for adult education courses in the Borough of Hammersmith and Fulham and the percentage change this represents over the previous year.

The LSC allocates funds for further education through the 47 Local learning and Skills Councils. The funds are allocated on an academic year basis.

The attached spreadsheet shows the total FE allocation and the proportion of funding allocated for adult education to FE providers in the Borough of Hammersmith and Fulham. It also shows the percentage change over the previous year. Overall the Borough had in excess of a 6% increase between 2004/05 and 2005/06 for FE provision. Of this, £208k was for adult education.

I hope you find this helpful.

2004/05 adult allocation vs 2005/06 adult allocation

Local council	*Provider*	*2004/05 adult FE allocation (£)*	*2005/06 adult FE allocation (£)*	*Variance cash (£)*	*Variance percentage*
London West	Ealing, Hammersmith and West London college	20,179,651	20,338,000	158,349	1
London West	London borough of Hammersmith and Fulham	1,295,847	1,346,000	50,153	4
Total		21,475,498	21,684,000	208,502	1

2004/05 total allocation vs 2005/06 total allocation

Local council	*Provider*	*2004/05 total FE allocation (£)*	*2005/06 total FE allocation (£)*	*Variance cash (£)*	*Variance percentage*
London West	Ealing, Hammersmith and West London college	37,714,000	40,063,000	2,349,000	6
London West	London borough of Hammersmith and Fulham	1,353,000	1,416,000	63,000	5
Total		39,067,000	41,479,000	2,412,000	6

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills what funds have been made available for adult education courses in *(a)* Coventry, South and *(b)* the West Midlands region in 2005–06; and how much was allocated in 2004–05 for those courses. [46880]

Bill Rammell *[holding answer 1 February 2006]:* In 2001–02 the Learning and Skills Council (LSC) spent £2,236 million on adult programmes including further education, work based learning, adult and community learning and other programmes. This increased to £2,427 million in 2002–03 and to £2,866 million in 2003–04. The Department does not hold figures for adult education funding at local or regional levels. The Department allocates funds for the post-16 education and training sector to the Learning and Skills Council (LSC) working through 47 local offices. Some of the information about allocations for adult provision is available on the LSC's website. The LSC was established in 2001 bringing the planning and funding of post-16 education together under one body within a framework set by Government. Mark Haysom, the Council's chief executive has written to my hon. Friend and a copy of his reply has been placed in the House Library.

Letter from Mark Haysom, dated 1 March 2006:

I am writing to follow up the written answer given by the Minister of State, Bill Rammell, in response to your recent Parliamentary Question regarding funding for adult education courses in Coventry and the West Midlands.

I understand that you have recently met with Mike Bell, the Executive Director for Coventry and Warwickshire, and at that meeting you clarified the fact that your interest is in budgets for adults in general, not just those undertaking courses designated as adult education courses.

In the academic year 2004–05, the West Midlands was allocated a budget of £266.2m for adults. In addition, a further £38.8m was allocated to Additional Learner Support.

In the academic year 2005–06, the West Midlands was allocated a budget of £246.3m for adults, with an additional £40m for Additional Learner Support.

I am unable to give you specific figures for Coventry South, as we allocate funds to individual institutions, which do not confine their recruitment to only part of the city.

I can, however, tell you that in 2004–5 Colleges in Coventry as a whole were allocated £21.4m for adults, and £20.5m in 2005–06.

As a whole, Coventry and Warwickshire LSC was allocated £36.7m for adults in 2004–05, plus £6.6m for Additional Learner Support, and £36.6m in 2005–06, plus an additional £6.7m for Additional Learner Support.

Budgets are allocated to individual colleges and institutions based on their performance in previous years. Overall the LSC's budget has increased significantly since we were created in 2001 and has risen again this year. We welcome this increase in resources provided for post-16 learning by Government year-on-year but we also recognise that there will never be enough public money to meet all needs. Therefore we are seeking to encourage individuals and employers to engage in learning, but also make an appropriate contribution to the costs as I will explain below.

The reason for the slight drop in adult budgets between 2004–05 and 2005–06 is because of our focus on our priorities, as agreed with Government, We are committed to providing a place for every 16 to 18 year old, and Coventry and Warwickshire saw

growth in participation by young people between 2004–05 and 2005–06. Our funding allocations to individual institutions in 2005–06 sought to recognise and address this achievement.

Our adult budgets are therefore increasingly focused on fully-funding those adults who lack basic literacy and numeracy skills—'Skills for Life'—and those who lack a first Level 2 qualification, without which entering the labour market is very difficult.

We continue to part-fund adults who already have a first level 2, and a wide range of Level 3 qualifications as our contribution to meeting skills needs at all levels.

We do, however, expect adults outside our fully-funded priority groups to make a contribution towards the cost of their learning as there will be beneficiaries economically. In 2005–06 we increased our expectations regarding the proportion of the cost of learning to be met by individual learners from 25%, where it had been fixed for some time, to 27.5%.

This increase in what we expect adults to pay will continue, by 2007–08 we expect adults to contribute 37.5% of the cost of learning. This will still mean that the public purse will subsidise 62.5% of the cost of adult learning, outside our fully-funded priority groups.

This clear focus of the LSC's resources on what we should fully-fund and part-fund is essential if we are to ensure that we make the greatest impact with public money, while encouraging others to recognise and invest in the true costs and benefits of learning.

I know that you are meeting Mike Bell again shortly for a briefing on Coventry and Warwickshire LSC's plans. Mike will be happy to go into more detail on both the policy issues and budget issues if you wish.

A-levels

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills (1) what guidance her Department issues to encourage more girls to undertake A-Level science subjects; [56427]

(2) how many *(a)* girls and *(b)* boys undertook A-Level physics in each of the last four years; what assessment she has made of the reasons for the difference in take up of such courses between boys and girls; and if she will make a statement. [56428]

Jacqui Smith: The Department has not issued guidance to encourage more girls to undertake A-Level science subjects. Through the new programme of study for science at key stage 4 which will be introduced in September 2006, we will ensure the science taught in schools inspires learners to pursue further study.

We are working closely with the Institute of Physics to consider what can be done in schools to change this, including the role that the Science Learning Centres can play.

The following table shows GCE A-level entries in physics by candidates aged 16–18 in all schools and Further Education institutions 2002–05.

Candidates attempting GCE A-level Physics [1]

	Number of candidates	*As a percentage of all GCE A-level candidates*
Male		
2001/02	21,541	20.5
2002/03	20,369	17.2
2003/04	19,223	17.2
2004/05	18,920	16.7
Female		
2001/02	6,319	5.2
2002/03	5,908	4.7
2003/04	5,383	4.2
2004/05	5,174	3.9

[1] Ages are taken at the start of the academic year i.e. 31 August.

BBC Digital Curriculum

Mr. Vaizey: To ask the Secretary of State for Education and Skills what assessment she has made of the impact of the BBC digital curriculum on the commercial market for educational software; and if she will make a statement. [56011]

Jacqui Smith: The BBC digital curriculum, now BBC Jam, was launched at the end of January this year. It is therefore too early to tell the impact the service will have on the commercial market.

The BBC was given the go ahead for the service on the basis of 18 conditions. These conditions included requirements to ensure the content was separate, distinctive from, but complimentary to that offered by the commercial sector.

Bologna Process

Mr. Boswell: To ask the Secretary of State for Education and Skills what *(a)* secretariat and *(b)* follow-up resources her Department has provided toward implementation of commitments made under the Bologna Process. [56336]

Bill Rammell: The UK is responsible for providing a Secretariat to the Bologna Process from July 2005 until June 2007. The Secretariat is based in my department and consists of three officials including one from the Scottish Executive. Its purpose is to provide administrative and operational support for the Bologna Follow Up Group leading up to the next meeting of Bologna Ministers in London in May 2007. The Department is working closely with the devolved UK Administrations and with the UK higher education sector to ensure effective implementation across the UK of commitments made under the Bologna Process.

Building Schools for the Future

John Cummings: To ask the Secretary of State for Education and Skills whether approval of the bid from Durham county council under building schools for the future is conditional on incorporating an academy as part of the overall scheme. [55822]

Jacqui Smith: It is an absolute requirement for building schools for the future (BSF) proposals that local authorities (LAs) come forward with hard-edged proposals for how their BSF project will raise standards in all secondary schools in the area. In doing that, we require all LAs to give serious consideration to whether the establishment of an academy would benefit one or more schools. It is only right that when we are making unprecedented levels of capital investment in schools, rising from £5.5 billion in 2005–06 to £6.3 billion in 2007–08, all LAs have robust plans in place.

Care Leavers

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills how many young people leaving care in Coventry, South in 2004–05 received a leaving care grant of *(a)* less than £500, *(b)* over £500, *(c)* over £1,000 and *(d)* over £2,000. [55990]

Maria Eagle: This information is not collected centrally.

Ed Balls: To ask the Secretary of State for Education and Skills what support services are available to young people leaving care in *(a)* West Yorkshire and *(b)* Wakefield district to help them deal with the financial and practical aspects of independent living. [54798]

Maria Eagle: Each of the five local authorities in West Yorkshire has a pathway/leaving care service, which offers support to young people 16 to 24 who have left care. The services are delivered either directly by the local authority or by a voluntary organisation contracted by the authority to offer leaving care support. The West Yorkshire Connexions service contributes to all five leaving care teams, having staff based in each one.

Every care leaver must have a personal 'pathway plan', which should record specific arrangements to provide financial advice and support. Where young people are living in independent accommodation, these services will be responsible for ensuring that they have the support necessary to manage the financial and practical requirements of living.

Services to care leavers in Wakefield are provided through Signpost—a partnership between Wakefield social services and Barnardo's. The Signpost annual report for 2004–05 reports that the service employs two teams:

(1) The Leaving Care Team—providing support and making plans for all care leavers registered with Signpost; and

(2) The Accommodation and Employability Team—consisting of housing support workers, accommodation recruitment workers, and employability workers.

This latter team has a remit to provide specific and additional support around care leavers employability and accommodation needs.

Ed Balls: To ask the Secretary of State for Education and Skills how many young people in *(a)* West Yorkshire and *(b)* Wakefield district who left care in 2005 stayed in (i) their own house, (ii) with friends and (iii) in hostel or bed-and-breakfast accommodation. [54799]

Maria Eagle: The Department will be releasing national and local authority level figures on looked-after children in a statistical volume on 30 March 2006. Figures for looked-after children aged 16 and over will be available on the Department's website http://www.dfes.gov.uk/rsgateway/DB/VOL/index.shtml National and local authority figures for all children looked after will be available after this date.

I will write to my hon. Friend and provide him with the information he has requested by 7 April 2006.

Ed Balls: To ask the Secretary of State for Education and Skills how many *(a)* leaving care workers and *(b)* personal advisers are available to young people leaving care in (i) the Wakefield district and (ii) Normanton constituency; and how regularly they have contact with individuals. [54800]

Maria Eagle: Services to care leavers in Wakefield are provided through Signpost—a partnership between Wakefield social services and Barnardo's. The Signpost annual report for 2004–05 reports that the service employs two teams:

(1) The Leaving Care Team—consisting of 10 personal advisors (PAs) providing support and making plans for all care leavers registered with Signpost; and

(2) The Accommodation and Employability Team—consists of three housing support workers, two accommodation recruitment workers, and three employability workers.

This latter team has a remit to provide specific and additional support in relation to care leavers employability and accommodation needs.

The frequency of contact between PAs and individual care leavers will be an operational matter that should depend on the specific needs of each young person.

Ed Balls: To ask the Secretary of State for Education and Skills how many young people leaving care in 2004–05 received a leaving care grant of *(a)* less than £500, *(b)* over £500, *(c)* over £1,000 and *(d)* over £2,000. [54801]

Maria Eagle: This information is not collected centrally.

Child Protection

Chris Grayling: To ask the Secretary of State for Education and Skills whether there is an equivalent to List 99 for school bus drivers. [47462]

Ruth Kelly: Children travelling to school by bus may travel on public service buses alongside the general public; buses provided under contract by the local authority; or buses owned and operated by the local authority. Drivers of school buses may be self-employed, employed by private bus companies, or directly by local authorities. The Department for Education and Skills currently advises that employers should carry out Criminal Records Bureau checks on anyone working with children, including drivers of contracted school buses and those operated by local authorities. These checks will disclose whether or not a bus driver is included in List 99.

Under the proposed new vetting and barring scheme which implements the Bichard inquiry report, bus drivers who work within school premises during hours when children are present must be checked to ensure that they are suitable to work with children. Bus drivers who do not work within school premises, but who care for or have a supervisory role over children, must also be checked. Checks will not be required for bus drivers where a vehicle is for general public use.

City Academy (Middlesbrough)

Mr. Gibb: To ask the Secretary of State for Education and Skills what steps the Unity City Academy in Middlesbrough is taking to raise standards; and if she will make a statement. [55045]

Jacqui Smith: In December 2005, a number of experienced new governors and a new chief executive officer were appointed to strengthen the leadership and management of Unity City Academy. The new chief executive officer has completed a review of the academy and now has overall responsibility for implementing an action plan to raise standards of attainment. The Department is working closely with the academy to support it in raising standards and providing the best possible education for young people in the local area.

Class Sizes

Mr. Jenkins: To ask the Secretary of State for Education and Skills what the average class size is in *(a)* primary schools and *(b)* secondary schools in (i) England, (ii) Staffordshire and (iii) Tamworth constituency. [51414]

Jacqui Smith: The information requested has been placed in the House Library.

Mrs. Hodgson: To ask the Secretary of State for Education and Skills what the average class size is in *(a)* primary and *(b)* secondary schools in Gateshead, East and Washington, West constituency. [54581]

Jacqui Smith: The information requested has been placed in the Library.

Data on class sizes at national, local authority and parliamentary constituency level can also be found at the following link: Schools and Pupils in England: January 2005 (Final) in the "additional information" sections 4, 6 and 7.

Communication Aids Project

Mr. Hancock: To ask the Secretary of State for Education and Skills (1) whether she plans to continue to support funding for communication equipment under the Communication Aids Project for *(a)* children and *(b)* adults; and if she will make a statement; [56229]

(2) what recent representations she has received about continued funding for the Communication Aids Project; [56230]

(3) what recent research she has *(a)* initiated and *(b)* evaluated on the need for communication aids equipment for (i) children and (ii) adults. [56231]

Maria Eagle: Funding for the Communication Aids Project comes to an end in March 2006. This DfES-funded initiative for school-age children has been successful but we have always made it clear, through the referral process and otherwise, that CAP was there to supplement, not replace, provision made locally. With other pressures on funding arising from the Government's ambitious agenda for education, it has not been possible to extend the funding for CAP.

The Department has received a number of representations about funding for CAP, mainly approaches from hon. Members on behalf of constituents. These have been prompted either by the SCOPE "Speak for Yourself" campaign or a circular letter from the Manager of the ACE Centre North, one of the centres working within CAP.

The Department has not recently initiated or evaluated any research on children who may require communication aids. We have, however, published an independent evaluation of the Communication Aids Project, work undertaken by University College London in conjunction with the University of York. The report was published in October 2004 as DfES Research Report 580 and it confirmed that CAP had positive benefits for the children being assisted and those working with them.

Local service providers have a central role in meeting needs, including the needs of individuals with severely impaired communication. Where children are concerned, we would be looking to children's services, through children's trusts, to provide appropriate support and equipment to all disabled children. Adult needs would be met by local authorities and primary care trusts working together through their integrated community equipment services.

Questions relating to research on adult needs, and funding associated with same, would be for my right hon. Friend the Secretary of State for Health. I understand there has been no recent research on adults needing communication aids. However, guidance on communication aids is available on the Department of Health's Care Service Improvement Partnership Integrating Community Equipment Services (ICES) website. "Getting Started" is intended to support local commissioning and provision of appropriate services.

Content Advisory Board

Mr. Vaizey: To ask the Secretary of State for Education and Skills what assessment she has made of the recommendations of the Content Advisory Board; and if she will make a statement. [56009]

Phil Hope: On the whole I have been supportive of the recommendations, with the exception of the recommendation to review the 'BBC' jam learning service for five-16 year-olds. I feel that it is too soon to review the service, given the limited amount of material available, and the fact that it has only recently been launched.

A published version of the Content Advisory Board's report and my response is available in hard copy as well as online at the British Educational Communications and Technology Agency (Becta) website and I will therefore not be making any further statement.

Correspondence

Sarah Teather: To ask the Secretary of State for Education and Skills when she will reply to the letter sent to her by the hon. Member for Brent East dated 21 November 2005, regarding Mr. M. A. Meerabux. [54694]

Jacqui Smith: I responded to the hon. Member's letter on 27 February. Mr. Meerabux received a response in November 2005.

Day Nurseries

Mr. Paul Goodman: To ask the Secretary of State for Education and Skills how many day nurseries have *(a)* closed and *(b)* opened since 2003. [56790]

Beverley Hughes: The number of full day care child care places opening and closing in England since 2003, drawn from Ofsted registration data is shown in the following table:

	Full day care places:		
	Opening	*Closing*	*Net growth*
April 2003 to March 2004	113,249	38,502	74,747
April 2004 to March 2005	127,256	65,577	61,679
April 2005 to December 2005	71,200	36,095	35,105

Deaf Children

Mr. Gibb: To ask the Secretary of State for Education and Skills how many and what proportion of deaf 11-year-olds achieved level 4 at Key Stage 2 in *(a)* reading, *(b)* writing and *(c)* mathematics in each year since 1996. [54830]

Maria Eagle: We cannot provide information relating specifically to deaf children. However, in 2004 information on type of Special Educational Need (SEN) was collected for the first time via the Pupil Level Annual School Census for those pupils at "School Action Plus" and with statements of SEN. The "type of SEN" indicator includes a category for those pupils with Hearing Impairment and information for the pupils who have Hearing Impairment listed as their primary SEN is provided in the following table. Other statemented and "School Action Plus" children who may have a hearing impairment but for whom this is not listed as their primary SEN are not included in this table.

KS2 achievements for 11-year-old pupils[1] at School Action Plus and with statements of SEN, with hearing impairments as their Primary SEN, in all maintained schools, 2003/04—2004/05[2]

	2004/05	*2003/04*
Number of eligible 11-year-old pupils in Reading	1,493	970
Number achieving level 4+ in Reading	913	478
Percentage achieving level 4+ in Reading	61.2	49.3
Number of eligible 11-year-old pupils in Writing	1,493	970
Number achieving level 4+ in Writing	566	309
Percentage achieving level 4+ in Writing	37.9	31.9
Number of eligible 11-year-old pupils in Maths	1,510	975
Number achieving level 4+ in Maths	795	426
Percentage achieving level 4+ in Maths	52.6	43.7

[1] Number of KS2 eligible pupils with a valid result.
[2] Including attempts and achievement in previous academic years.
Note:
Attainment data for 2004/05 are based on revised figures, for 2003/04 are based on final figures.

Mr. Gibb: To ask the Secretary of State for Education and Skills how many and what proportion of deaf 15 year-olds achieved five or more GCSEs or equivalent at grades *(a)* A* to C and *(b)* A* to G in each year since 1996. [54831]

Jacqui Smith: We cannot provide information relating specifically to deaf children. However, in 2004 information on type of special educational need (SEN) was collected for the first time via the pupil level annual school census for those pupils at school action plus and with statements of SEN. The "type of SEN" indicator includes a category for those pupils with hearing impairment and information for the pupils who have hearing impairment listed as their primary SEN is provided in the following table. Other statemented and school action plus children who may have a hearing impairment but for whom this is not listed as their primary SEN are not included in this table.

GCSE and equivalent achievements for 15 year-old pupils[1] at school action plus and with statements of SEN, with hearing impairments as their primary SEN, in all maintained schools, 2003/04–2004/05[2]

	2004/05	*2003/04*
Number of 15 year-old pupils	1,108	1,008
Number achieving 5+A*-C at GCSE and equivalents	364	310
Percentage achieving 5+A*-C at GCSE and equivalents	32.9	30.8
Number achieving 5+A*-G at GCSE and equivalents	847	792
Percentage achieving 5+A*-G at GCSE and equivalents	76.4	78.6

[1] Number of pupils on roll aged 15 at the start of the academic year.
[2] Including attempts and achievement in previous academic years.
Note:
Figures for 2004/05 are revised, figures for 2003/04 are revised as this is what was used in the Statistical First Release.

Dental Training

Keith Vaz: To ask the Secretary of State for Education and Skills how many university students studying dentistry worked in *(a)* Leicester and *(b)* England for their compulsory year's training with an NHS dentist in each year between 1997 and 2005. [49598]

Ms Rosie Winterton: I have been asked to reply.

Newly qualified dental graduates are required to undertake one year's vocational training before they may practise independently in the national health service. These vocational dental practitioners (VDPs), none of whom would have started specialist training in orthodontics at this stage, undergo the training in approved vocational training dental practices distributed across the country.

In 2005, there were 14 training places in the Leicester area, 24 in Surrey and 624 in England as a whole. In 2005, 598 VDPs were appointed to these vocational training practices including 14 in the Leicester area. Information for earlier years is not held centrally. Given that the number of VDPs is largely determined by the number of dental undergraduates and there had been no significant increase in admissions to dental schools until we funded a major expansion from autumn 2005, it may, however, be assumed that these figures have remained fairly constant since 1997.

Departmental Energy Costs

Mrs. Villiers: To ask the Secretary of State for Education and Skills how much was spent by her Department on *(a)* gas and *(b)* electricity in 2004–05. [51777]

Bill Rammell: The amount spent in 2004–05 on gas was £118,729 and on electricity £1,029.119.

Departmental Staff

Kate Hoey: To ask the Secretary of State for Education and Skills what plans her Department has to change the London allowance of its staff; and if she will make a statement. [50003]

Maria Eagle: The Department has no plans to change pay arrangements for London staff.

Dr. Cable: To ask the Secretary of State for Education and Skills how many people were employed by *(a)* her Department and *(b)* the Office for Standards in Education in each of the last 12 months for which information is available; and how many and what percentage of posts were vacant in each region in each month. [51170]

Maria Eagle: The figures requested are published in civil service statistics. I would refer the hon. Member to Table A which covers staff numbers (FTE and headcount basis) for each organisation. Civil service statistics are available in the Library and at the following address on the Cabinet Office statistics website: http://www.civilservice.gov.uk/management/statistics/index.asp

The Department does not hold centrally details of vacant posts. This information could be obtained only at disproportionate cost.

HM chief inspector, Maurice Smith, has written to the hon. Member in so far as the question relates to Ofsted, and a copy of his letter has been placed in the House Libraries.

Letter from Maurice Smith, dated 13 February 2006:

Your recent parliamentary question has been passed to me, as Her Majesty's Chief Inspector, for reply.

You asked how many people were employed by the Office of Standards in Education in each of the last 12 months for which information is available; and how many and what percentage of posts were vacant in each region in each month.

Ofsted has undergone a substantial reorganisation over the last twelve months and moved towards a regional structure with a leaner HQ presence in London. In total, we have reduced the number of regional offices from 12 to 4. It is therefore not possible to provide an answer, by region or by month, as requested.

Our establishment figure for 2004–05 was 2814 however our actual staffing did not reach this figure because we immediately implemented reductions once the Government's efficiency plans became clear. Ofsted does not operate an "establishment" figure now as we seek to manage by operational demand and budget rather than pre-determined staffing numbers, thus it is not possible to identify the number of posts vacant at this time.

Our total full time equivalent staffing figure as of 31 December 2005 was 2280. The equivalent figure at 31 December 2004 was 2490.

A copy of this reply has been sent to Maria Eagle and will be placed in the library of both Houses.

Education (Peterborough)

Mr. Stewart Jackson: To ask the Secretary of State for Education and Skills how many places are available at pupil referral units in *(a)* Peterborough and *(b)* Cambridgeshire; what their occupancy rate is; and if she will make a statement. [54861]

Jacqui Smith: The Department does not collect data on the number of places that pupil referral units (PRUs) have available or on their occupancy rate. However, we collect data on the number of pupils who were being educated in PRUs at the time of the annual school census. The table sets out the number of pupils who were attending PRUs in Peterborough and Cambridgeshire only at the time of the census, as well as those who were attending both a PRU and another educational institution for their education.

Number

Local authority	*Pupils attending PRUs only*	*Pupils attending a PRU and another institution*
Peterborough	20	30
Cambridgeshire	230	320

Note:

Figures have been rounded to the nearest 10.

Source:

Annual School Census—Pupil Referral Units (January 2005).

Mr. Stewart Jackson: To ask the Secretary of State for Education and Skills how many *(a)* primary and *(b)* secondary school age children normally resident in the Peterborough city council area are being educated outside the Peterborough local education authority area. [54862]

Jacqui Smith: The information requested has been provided in the following table.

Children[1] resident in Peterborough local authority attending schools outside of the authority

	Number and percentage
Primary[2]	
Number of resident pupils	12,877
Number of resident pupils educated outside of the LA	132
Percentage of resident pupils educated outside of the LA	1.0
Secondary[2]	
Number of resident pupils	10,517
Number of resident pupils educated outside of the LA	397
Percentage of resident pupils educated outside of the LA	3.8
Special	
Number of resident pupils	302
Number of resident pupils educated outside of the LA	13
Percentage of resident pupils educated outside of the LA	4.3

[1] Includes pupils aged 5–15-years-old.

[2] Includes middle schools as deemed.

Source:

Annual Schools Census 2005.

Mr. Stewart Jackson: To ask the Secretary of State for Education and Skills how many children in the Peterborough local education authority area have a first language other than English; and what the figures were for *(a)* 2001–02, *(b)* 2002–03 and *(c)* 2003–04. [54864]

Jacqui Smith: The requested information is given in the table.

Maintained primary and secondary schools[1]: number and percentage of pupils by first language[2] Position in January each year: 2002 to 2005 Peterborough local authority area

	Primary			
	2002	2003	2004	2005
Number of pupils whose first language is known or believed to be other than English	1,967	2,040	2,140	2,302
Percentage of pupils whose first language is known or believed to be other than English[3]	14.7	15.4	16.2	17.6
Total number of pupils[4]	13,396	13,212	13,181	13,094

	Secondary			
	2002	2003	2004	2005
Number of pupils whose first language is known or believed to be other than English	1,774	1,760	1,770	1,807
Percentage of pupils whose first language is known or believed to be other than English[3]	13.8	13.6	13.8	14.0
Total number of pupils[4]	12,882	12,973	12,759	12,918

[1] Includes middle schools as deemed.
[2] Excludes dually registered pupils.
[3] Number of pupils whose first language is known or believed to be other than English expressed as a percentage of the total number of pupils of compulsory school age and above.
[4] Pupils of compulsory school age and above.
Source:
Annual Schools Census

Mr. Stewart Jackson: To ask the Secretary of State for Education and Skills how many admissions appeals were heard in the Peterborough local education authority area in respect of *(a)* primary schools and *(b)* secondary schools in each of the last five years; and how many were successful. [54865]

Jacqui Smith: This table provides the information for the last five years for which figures are available.

	Primary		
	Appeals heard	Appeals decided in parents' favour	Percentage
1999/2000	58	18	31.0
2000/01	65	30	46.2
2001/02	60	25	41.7
2002/03	42	14	33.3
2003/04	60	29	48.3

	Secondary		
	Appeals heard	Appeals decided in parents' favour	Percentage
1999/2000	163	65	39.9
2000/01	147	59	40.1
2001/02	235	93	39.6
2002/03	125	27	21.6
2003/04	140	47	33.6

Mr. Stewart Jackson: To ask the Secretary of State for Education and Skills what the funding per pupil is for 2005–06 in Peterborough constituency. [55026]

Jacqui Smith: The available information for total funding per pupil aged 3–19 for 2005–06 in the Peterborough LEA was £4,420.

Notes:
1. Figures reflect relevant sub-blocks of Education Formula Spending (EFS) settlements and include the pensions transfer to EFS and the Learning and Skills Council.
2. Total funding also includes all revenue grants in DfES Departmental Expenditure Limits relevant to pupils aged 3–19 and exclude Education Maintenance Allowances (EMAs) and grants not allocated at LEA level.
3. The pupil numbers used to convert £ million figures to £ per pupil are those underlying the EFS settlement calculations.
4. Figures are rounded to the nearest £10 and reported in cash terms.

Mr. Stewart Jackson: To ask the Secretary of State for Education and Skills which schools in the Peterborough local education authority area were rated *(a)* Grade 1, *(b)* Grade 2, *(c)* Grade 3 and *(d)* Grade 4 when last assessed by the Office for Standards in Education. [55027]

Jacqui Smith: This is a matter for Ofsted. HM Chief Inspector, Maurice Smith has written to the hon. Member and a copy of his reply has been placed in the Library.

Letter from Maurice Smith, dated 2 March 2006:

Your recent parliamentary question has been passed to me, as Her Majesty's Chief Inspector, for reply.

You asked which schools in the Peterborough local education authority area were rated *(a)* grade 1, *(b)* grade 2, *(c)* grade 3 and *(d)* grade 4 when last assessed by the Office for Standards in Education.

Inspectors have made a judgment about schools' overall effectiveness since January 2000. Until July 2005 this judgment was made using a seven point scale: excellent (1), very good (2), good (3), satisfactory (4), unsatisfactory (5), poor (6) and very poor (7). Since September 2005 the judgement has been made using a four point scale: outstanding (1), good (2), satisfactory (3) and inadequate (4). This response relates to schools' most recent inspection after January 2000. Four new schools were not inspected during that period.

The information is in the two tables attached. The first shows results from inspections in the period January 2000 to July 2005 and the second for inspections since September 2005.

A copy of this reply has been sent to Jacqui Smith and will be placed in the Library of both Houses.

School name	Type of school	Overall effectiveness	Inspection year
Inspections from January 2000 to July 2005			
Caverstede Early Years Centre	Nursery	Very good	2000/01

Mr. Stewart Jackson: To ask the Secretary of State for Education and Skills how many pupils were permanently excluded from *(a)* primary and *(b)* secondary schools in the Peterborough local education authority area in each of the last five years for which figures are available. [55029]

Jacqui Smith: The requested information is given in the table.

Maintained primary and secondary schools[1]: number of permanent exclusions: 1999/2000 to 2003/04
Peterborough local authority area

	Primary		Secondary	
	Number	Percentage[2]	Number	Percentage[2]
1999/2000	4	0.03	34	0.26
2000/01[3]	7	0.04	19	0.15
2001/02	11	0.07	16	0.12
2002/03[3]	7	0.04	15	0.12
2003/04[3]	3	0.02	36	0.28

[1] Includes middle schools as deemed.
[2] The number of permanent exclusions expressed as a percentage of the number (headcount) of pupils, excluding dually registered pupils.
[3] Figures are as confirmed by local authorities via the data checking exercise

Education (Staffing)

Dan Norris: To ask the Secretary of State for Education and Skills (1) how many *(a)* full-time teachers and *(b)* school support staff were employed in South Gloucestershire in each year since 1992; [54396]

(2) how many *(a)* full-time teachers and *(b)* school support staff were employed in Bath and North East Somerset for each year since 1992. [54399]

Jacqui Smith: The following table provides the full-time and full-time equivalent number of regular teachers and the full-time equivalent number of support staff employed in South Gloucestershire and Bath and North East Somerset local authorities in each January since 1997. Support staff data can only be provided on a full-time equivalent basis.

South Gloucestershire and Bath and North East Somerset local authorities were created on 1 April 1996. Figures are not available prior to April 1996.

Full-time and full-time equivalent number of teachers and full-time equivalent support staff employed in maintained schools in South Gloucestershire and Bath and North East Somerset local authorities

	South Gloucestershire			Bath and North East Somerset		
	Teachers			Teachers		
January	Full-time	FTE	Support staff	Full-time	FTE	Support staff
1997	1,790	1,970	600	1,240	1,370	410
1998	1,780	1,980	620	1,200	1,350	430
1999	1,810	2,050	650	1,210	1,350	440
2000	1,860	2,090	700	1,220	1,360	500
2001	1,880	2,120	800	1,240	1,390	530

Education Maintenance Allowance

Dr. Cable: To ask the Secretary of State for Education and Skills when institutions whose students are eligible for education maintenance allowance were first informed that the administrative costs would be covered by the individual institutions in academic year 2007–08. [48934]

Maria Eagle: Institutions were first formally notified of the arrangement for EMA administrative payments to schools and colleges on 30 January 2006.

Mr. Drew: To ask the Secretary of State for Education and Skills what plans she has to ensure that those who are entitled to Education Maintenance Allowance from April, but who do not live with parents or are of no fixed abode, continue to receive support to continue their studies, with particular reference to those who are not eligible for a bank account. [55410]

Maria Eagle: Education Maintenance Allowance (EMA) is not designed to provide support for a young person's living costs. It is an incentive to encourage learning post compulsory education.

Where a young person in full time non advanced education is estranged from their parent or guardian, income support is available (subject to satisfying the other qualifying conditions). EMA is paid in addition to income support in these circumstances.

In response to its stakeholder consultation, the Learning and Skills Council (LSC), who have operational responsibility for EMA, has been supporting learners to open bank accounts. LSC have been working with the British Bankers Association (BBA) to publicise basic bank accounts. These bank accounts are easier to obtain than a full current account. The BBA has also agreed to act as an intermediary if learners experience specific problems.

Mr. Drew: To ask the Secretary of State for Education and Skills what plans she has to provide funding for individuals between payments of Education Maintenance Allowance and those made to trainees undertaking work-based learning courses including E2E. [55411]

Maria Eagle: The Learning and Skills Council (LSC) who have operational responsibility for Education Maintenance Allowance (EMA), is putting in place transitional arrangements for those learners starting an LSC funded E2E/Programme Led Pathway (PLP) Programme before 10 April 2006. Learners starting provision before that date will continue to receive Minimum Training Allowance (MTA) until the end of their course, or 31 December 2006, whichever is the sooner.

For learners beginning their programme after 10 April 2006, the LSC has been able to secure £1.8 million of funding for a Hardship Fund in 2006/07 for E2E/PLP learners replicating the Learner Support Fund available to Learners in Further Education.

The LSC has been undertaking a range of activities to maximise EMA take up and to minimise the risk of payment delays to learners who are eligible for EMA

payments. This includes making the EMA application more user friendly and spreading good practice to try to help households get applications right the first time.

Education Provision (Hendon)

Mr. Dismore: To ask the Secretary of State for Education and Skills (1) if she will make a statement on progress with Sure Start in Hendon; [56748]

(2) how many *(a)* Sure Start and *(b)* under fives places are available in Hendon; and if she will make a statement. [56749]

Beverley Hughes: Sure Start Underhill and West Hendon, a sixth wave local programme has been offering services to under fours and their families since 2003. The number of children under four in the programme catchment area is 722. The latest figure for the percentage of children 'reached' by the programme was 33 per cent. at March 2005. This compares well with the national average of 23 per cent. of children 'reached' at March 2005.

Sure Start Underhill and West Hendon will form part of a purpose built children's centre on the site of Parkfield School in West Hendon, to be opened by September 2006. Wingfield Children's Centre in Colindale is due to open at the end of March 2006. The two centres will create an additional 91 child care places and will reach around 2,192 children. The London borough of Barnet has a target to create a further 15 children's centres by March 2008. These centres are in the initial planning stages, but early indications are that eight of these children's centre will be in the Hendon constituency.

According to the Ofsted register, there were 4,208 childcare places available for children aged under eight in the London borough of Barnet at December 2005. Information on places by constituency and places for under fives is not available.

Mr. Dismore: To ask the Secretary of State for Education and Skills how many children in Hendon participated in the Bookstart programme in the last year for which figures are available; and if she will make a statement. [56751]

Beverley Hughes: The Government are providing funding of £27 million to Bookstart from 2005–08. The aim of the Bookstart Programme is to support children's early communication and language development and social and emotional development by encouraging parents to share books, story telling and rhymes with their babies and toddlers. A total of 371 Bookstart packs were issued in the Hendon area during 2005. The figure for the number of Bookstart Plus vouchers issued in Hendon in 2005 is not yet available, but 197 vouchers for Bookstart Treasure Chest packs have been distributed in Hendon since October 2005.

Mr. Dismore: To ask the Secretary of State for Education and Skills what steps her Department is taking to support school sport in Hendon. [56758]

Jacqui Smith: The Department for Education and Skills and the Department for Culture, Media and Sport are jointly implementing the national PE, School Sport and Club Links strategy in England. In the five years to 2008 over £1.5 billion is being invested (including £686 million lottery funding) to implement the strategy.

The strategy is delivering an ambitious public service agreement target to increase the percentage of 5–16 year olds who spend a minimum of two hours a week on high quality PE and school sport within and beyond the curriculum to 75 per cent. by 2006 and then 85 per cent. by 2008. The long-term ambition, by 2010, is to offer all children at least four hours of sport every week. The 2004/05 school sport survey results found that overall, 69 per cent. of pupils in the 11,498 schools taking part were participating in at least two hours of high quality PE and school sport a week. In 2003/04 this figure was 62 per cent.

Spearheading this strategy is the creation of a national PE/sports infrastructure, by establishing a network of Sports Colleges and School Sport Partnerships (families of schools which work together). Hendon is in the London borough of Barnet, which currently has 85 schools within a School Sport Partnership. By September this year all maintained schools in the borough will be included within a partnership.

Mr. Dismore: To ask the Secretary of State for Education and Skills how many schools in Hendon had *(a)* computer suites and *(b)* classroom interactive whiteboards in (i) 2005 and (ii) 1997; and if she will make a statement. [56826]

Phil Hope: Data on ICT resources in schools are available nationally but not on a constituency or authority basis. In 2005, the average pupil to computer ratio was 6.7 pupils per computer in primary schools and 4.1 pupils per computer in secondary. There was no comparable survey in 1997, but in 1998 there were 17.6 pupils per computer in primary schools and 8.7 pupils per computer in secondary.

In 2005, 76 per cent. of primary and 95 per cent. of secondary schools had interactive whiteboards. Data on interactive whiteboards (or equivalent technologies) were not collected in 1998 but in 2001, when data were first collected, 9 per cent. of primary and 40 per cent. of secondary schools had interactive whiteboards.

Mr. Dismore: To ask the Secretary of State for Education and Skills how much her Department has made available for capital expenditure in Hendon schools since 1997; and if she will make a statement. [56827]

Jacqui Smith: Capital allocations for Hendon are made to Barnet Local Authority and its schools. Details of annual capital allocations made to Barnet local authority since 1997–98 are set out in the table.

	£ million
1997–98	1.8
1998–99	3.6
1999–2000	3.9
2000–01	11.9
2001–02	7.5
2002–03	15.9
2003–04	12.0
2004–05	18.5
2005–06	15.1

Capital allocations to local authorities and schools are higher than ever before. In 2005–06 they are £5.5 billion and they are planned to rise to £6.3 billion in 2007–08, an increase from £683 million in 1996–97.

It is the responsibility of schools and local authorities to determine how they allocate these funds, taking account of local needs and priorities.

Educational Attainment

Mr. Gibb: To ask the Secretary of State for Education and Skills what proportion of *(a)* children in receipt of free school meals, *(b)* pupils with special educational needs and *(c)* all children aged 15 years at the end of the 2004–05 academic year achieved (i) five or more A*-C grades at GCSE and equivalent including mathematics and English and (ii) no A*-C grades at GCSE and equivalent, broken down by type of school, excluding grammar school. [55070]

Jacqui Smith: The information requested can be found in the following table.

GCSE and equivalent results of 15-year-old pupils[1] in maintained schools (excluding grammar schools), 2004/05

	Number of pupils	Percentage achieving 5+A*-C inc. English and Mathematics	Percentage achieving no passes
Pupils receiving free school meals			
Comprehensive[2]	72,984	18.4	7.0
Modern	3,063	13.7	4.6
Other maintained[3]	3,485	0.0	33.0
Total	79,532	17.4	8.1
Pupils with special educational needs[4]			
Comprehensive[2]	84,148	7.7	9.7
Modern	5,980	5.8	6.6
Other maintained[3]	9,435	0.1	35.1
Total	99,563	6.9	11.9
All pupils[5]			
Comprehensive[2]	526,319	41.4	2.7
Modern	26,472	30.7	2.1
Other maintained[3]	9,578	0.1	33.7
Total	562,369	40.2	3.2

[1] Age at the start of the academic year
[2] Including city technology colleges and academies
[3] Including community and foundation special schools
[4] Including statemented and non-statemented SEN pupils
[5] Includes pupils who have not completed the Pupil Level Annual School Census (as in national figures)

Educational Needs

John Bercow: To ask the Secretary of State for Education and Skills if she will make a statement on the proposed pathfinder project to assist the identification of children whose needs could be met by appropriate boarding provision. [53583]

Maria Eagle: We made a commitment in the White Paper, "Higher Standards, Better Schools for All", to work with a sample of local authorities and boarding schools to develop tools for identifying and assessing those children whose needs could best be met by appropriate boarding provision. These tools would then be embedded within the needs assessment and commissioning systems of the participating local authorities, who would apply to place children in vulnerable circumstances in one of the participating boarding schools, where a careful assessment of a child's individual needs indicated that this would be beneficial.

The Department for Education and Skills hosted a conference on 20 January with some boarding schools and local authorities that has helped to highlight some of the issues that need to be addressed. The conference confirmed that there is certainly enough interest and support amongst schools and local authorities to continue to develop the policy. The Department is currently working up more detailed proposals for consultation with those boarding schools and authorities who are interested.

Efficiency Savings

Mrs. Villiers: To ask the Secretary of State for Education and Skills what baseline figures she is using for assessing progress on her Department's targets to *(a)* enable frontline professionals in schools, colleges and higher education institutions to use their time more productively through (i) workforce reform, (ii) investment in ICT and (iii) reducing administrative burdens, *(b)* improve procurement of goods, services and new buildings, *(c)* streamline the delivery system through improvements in policy, funding and regulation, *(d)* free up resources from the cost of (A) her Department, (B) her Department's non-departmental public bodies and (C) the Office for Standards in Education by reducing overlaps, simplifying systems, better procurement and rationalisation of back office functions and *(e)* pursue additional efficiency gains, including improvements in school-level financial management; what progress has been made towards these targets to date; and what the total efficiency savings achieved to date are for these targets. [52920]

Ruth Kelly: The information requested has been placed in the House Libraries.

e-Government

Margaret Moran: To ask the Secretary of State for Education and Skills if she will list the internet access points funded by Government Departments; and what the *(a)* location and *(b)* postcode is of each. [55697]

Phil Hope: The information is as follows.

UK online centres

To date there are over 6,000 UK online centres, including around 3,000 non-library centres. Colleagues in the Communications and Media Team at Ufi have created a detailed spreadsheet, giving full contact details for each of these centres, including e-mail and website addresses.

This spreadsheet includes centres across three groupings, including:

Public library—As these are based in public libraries they are therefore open to the general public; and the access points in the libraries were funded through government money from the Capital Modernisation Fund (CMF) via the People's Network project.

Funded non library centres—These centres were funded through public money via the CMF, the vast majority of these are open to the public but some are restricted to specific user groups. The spreadsheet indicates whether they are open to the public or not.

Non funded—These centres did not receive government money. They were approved to use the UK online brand through one of three sponsor organisations, (Becta, Niace or e-skills), but received no public money. Most of these are open to the public, but some are not. Again the spreadsheet identifies these.

Those centres not open to the public are likely to be for use for people in specific workplaces, residential care or community specific organisations.

The data on funding provided is not necessarily comprehensive, but are based on the information gathered since Ufi took on the management responsibility of UK online centres.

All address details can be found on the Ufi website at www.ufi.co.uk/ukol/.

Enterprise Advisor Service

Dr. Cable: To ask the Secretary of State for Education and Skills whether the Enterprise Advisor Service will continue to be funded after July 2006; and if she will make a statement. [55667]

Phil Hope: The Learning and Skills Council (LSC) is currently evaluating the impact, effectiveness and efficiency of the Service. The Department will consider jointly with the LSC how best to continue to promote and support enterprise in schools in the light of that evaluation.

Ethnic Pupils

Mr. Khan: To ask the Secretary of State for Education and Skills what research she has conducted into under-achievement in schools by ethnic minority pupils. [56442]

Jacqui Smith: The Department has an active research and analysis programme on the attainment of pupils from minority ethnic backgrounds. In addition to our annual publication on the attainment of pupils by ethnicity across the Key Stages we have published a series of topic papers on minority ethnic pupils and education, the most recent of which was published in January 2005. These include statistics and research on the attainment of under-achieving minority ethnic groups. current and recently completed research projects include an evaluation of the "Aiming High: Raising the Achievement of African-Caribbean Pupils" project and an analysis of the attainment of minority ethnic pupils in Excellence in Cities areas. All of the Department's research on minority ethnic pupils can be accessed from www.dfes.gov.uk/research

Lynne Featherstone: To ask the Secretary of State for Education and Skills what steps the Government are taking to monitor the collective achievement and progress of pupils with *(a)* Turkish and *(b)* other ethnic backgrounds that are not Census ethnic group categories; and if she will make a statement. [56021]

Jacqui Smith: Data from the Annual Schools Census, linked to the national pupil data base, allows the Department to collect and analyse on an annual basis on the achievement of pupils by ethnic group. Data on pupils' ethnicity is currently collected using the codes from the national population Census. The "any other white background" category includes Turkish pupils. However, Turkish as a separate ethnic code is included in an extended list which contains 70 additional categories which can be used by schools and local authorities to meet their local data collection needs.

From 2007 schools and authorities will be able to collect information on pupils' languages by selecting from an extensive list. This will help with the planning of inclusion and equality strategies, at both national and local level. Turkish will be one of the languages that will be available to record from 2007.

Foundation Schools

Mr. Willetts: To ask the Secretary of State for Education and Skills how many schools have applied for foundation status since the fast track scheme was introduced; and how many of these applications have been successful. [54358]

Jacqui Smith: The fast track arrangements were introduced on 1 August 2005 for community and voluntary controlled secondary schools to change category to foundation. Under these arrangements proposals are decided by the governing body itself. Since then the Department has been informed that proposals have been published by 14 community secondary schools to change category to foundation. To date we have been notified that the governing bodies of seven of these schools have determined that they should be implemented. We are awaiting notification of the decisions on the other seven.

Lynne Jones: To ask the Secretary of State for Education and Skills how many applications for foundation school status were received in each year since 1997. [55963]

Jacqui Smith: The category of foundation school was established by the School Standards and Framework Act 1998. There was a moratorium on changes of category following the introduction of the new schools framework, and no proposals were published until 2001. The number of proposals for maintained schools to change category to foundation schools is as follows:

	Number
2001	16
2002	12
2003	6
2004	4
2005	11
2006	6

In August 2005 a fast-track to foundation status was introduced. Under this the governing bodies of community and voluntary controlled secondary schools may determine their own proposals to change category to foundation status, following consultation, publication of the proposals and a period during which representations may be made. There have been 14 proposals published to change category to foundation school since 1 August 2005, all for secondary schools under the fast track arrangements.

School Meals

Jeff Ennis: To ask the Secretary of State for Education and Skills what percentage of children at *(a)* all (i) primary and (ii) secondary schools and *(b)* the (A) top and (B) bottom 100 performing (1) primary and (2) secondary schools (x) have special educational needs and *(y)* are eligible for free school meals. [37354]

Maria Eagle: The figures for maintained primary and secondary schools in England in 2005 are shown in the following table. Top and bottom schools are calculated on the basis of Value Added scores, more detail about which can be found on the Achievement and Attainment tables website:

http://www.dfes.gov.uk/performancetables/primary_05/p8.shtml

http://www.dfes.gov.uk/performancetables/schools_05/sec4.shtml

	Percentage pupils with statements of SEN[1]	*Percentage pupils with SEN, without statements*[1]	*Percentage pupils eligible for FSM*[1, 2]
Primary schools	1.6	16.5	17.0
Top 100 Primary schools[3]	1.6	17.5	27.0
Bottom 100 Primary schools[3]	1.7	25.2	36.4
Secondary schools	2.3	14.3	14.0
Top 100 Secondary schools[4]	1.4	8.3	12.4
Bottom 100 Secondary schools[4]	2.9	23.6	31.6

[1] These figures are derived from the Annual School Census in 2005.

[2] The percentage of pupils known to be eligible for Free School Meals (FSM) is expressed as a proportion of the number of pupils on roll.

[3] Top and bottom schools on the basis of Key Stage 1-Key Stage 2 Value Added measures. Note that the list of top schools contains 121 schools and the list of bottom schools contains 109 schools as the value added measure (centred on 100) is rounded to 1 decimal place and schools below the cut-off may have equal values to those at the lower end of the list.

[4] Top and bottom schools on the basis of Key Stage 2-Key Stage 4 Value Added measures. There are 100 schools in each list as the measure is centred on 1,000 and so rounding does not present the same issue as in [3].

Dr. Cable: To ask the Secretary of State for Education and Skills what action may be taken by *(a)* a school and *(b)* a social worker if a parent refuses to provide the relevant income information necessary for a child to obtain free school meals but it is clear that they are malnourished. [55931]

Jacqui Smith: Schools and local authorities have the discretion to decide whether or not to provide a child with a free school meal, despite a parent refusing to provide the relevant income information.

Schools can seek advice from their children's services colleagues within the local authority (LA) and request them to make an assessment of the child. The LA as well as the school has wide discretion to provide what the child needs, such as a free school meal.

Government guidance, 'What To Do If You're Worried A Child Is Being Abused' was produced in 2003 to assist practitioners, including those working in social care and education, to work together to promote children's welfare and safeguard them from harm.

Dr. Cable: To ask the Secretary of State for Education and Skills what analysis she has made of the reasons for failure to take up entitlement to free school meals. [55936]

Jacqui Smith: The Department is aware that there is a gap between eligibility and take up of free school meals and has funded research commissioned by the Child Poverty Action Group into the reasons children fail to take up their free school meal entitlement. The findings were published in a report entitled "Improving the Take-Up of Free School Meals" in May 2001. The report shows that pupils and parents considered that the quality and choice of food on offer can discourage take up.

Mr. Dismore: To ask the Secretary of State for Education and Skills (1) how many schools in Hendon serve healthy school meals; and if she will make a statement; [56743]

(2) what additional funding has been made available to Barnet to improve school meals; and if she will make a statement. [56744]

Jacqui Smith: The Department for Education and Skills does not collect information on how many schools in Hendon serve healthy school meals.

The Government are determined to transform the quality of food in schools and supports the work local authorities and schools are doing to raise the nutritional standards of school meals.

In March 2005 the Secretary of State for Education and Skills, Ruth Kelly, announced a £235 million package to transform the quality of school meals. In October 2005, as part of a three year package and paid as part of their Standards Fund Allocations, schools received a share of £30 million to enable them to fund local improvements such as increased training and working hours for school cooks. A further £60 million (£30 million/£30 million) will be paid in 2006 and 2007. Over the same period, local authorities will receive, £130 million (£30 million/£50 million/£50 million).

Barnet local authority received £176,529 from the Targeted School Meals Grant for 2005–06. In addition, schools were each awarded a lump sum of £1,070 per primary school and £1,500 per secondary school, with an additional amount per pupil. The per pupil amount for PRUs and all schools except nursery schools is 50p; for nursery schools it is 50p for half of FTE pupils, to reflect the fact that fewer pupils in nursery schools take school meals.

GCSEs

Mr. Gibb: To ask the Secretary of State for Education and Skills what proportion of 15-year-olds attending *(a)* faith schools and *(b)* other maintained schools achieved five or more grades A* to C at GCSE or equivalent (i) in any subject and (ii) including GCSEs in English and mathematics in each year since 1996. [52556]

Jacqui Smith: The information requested is not readily available and can be obtained only at disproportionate cost. However, figures for 2005 have been provided in the table.

GCSE and equivalent results of 15-year-old pupils in maintained mainstream schools, 2005

	Pupils	% achieving 5+ A*-C	% achieving 5+ A*-C inc. English and mathematics
Faith schools	85,824	62.6	49.9
Other schools	489,301	54.3	41.8
Total	575,125	55.5	43.0

Mr. Gibb: To ask the Secretary of State for Education and Skills what proportion of 15-year-olds in receipt of free school meals attending *(a)* faith schools and *(b)* other maintained schools achieved five or more grades A*-C at GCSE or equivalent (i) in any subject and (ii) including GCSE in English and mathematics in each year since 1996. [52558]

Jacqui Smith: The information requested is not readily available and can only be obtained at disproportionate cost. However, figures for 2005 have been provided as follows.

GCSE and equivalent results of 15-year-old pupils in receipt of free school meals in maintained mainstream schools, 2005

	Pupils	Percentage achieving 5+ A*-C	Percentage achieving 5+ A*-C inc. English and mathematics
Faith schools	10,229	37.4	23.3
Other schools	66,269	30.1	17.9
Total	76,498	31.1	18.6

John Bercow: To ask the Secretary of State for Education and Skills which schools have taken steps to address under-performance in GCSEs of white working-class boys in receipt of free school meals. [53550]

Jacqui Smith: The Department does not hold information to be able to identify all the schools that have, or are, tackling this issue. It does support programmes which target underperformance, such as the Specialist Schools and Academies Trust's project for Raising Achievement Transforming Learning, which aims to challenge and empower schools to review their current practice and look at how to move this forward through engaging with mentor schools. In addition, the National Education Breakthrough Programme has successfully used rapid cycle change management to help schools raise the motivation, attendance and attainment of cohorts of underachieving boys.

The Department also encourages schools to identify where there is underperformance, for example by using the Pupil Achievement Tracker, and to offer appropriately targeted support to those pupils. The introduction of School Improvement Partners for all schools will provide a further opportunity for schools to analyse and reflect on the progress made by all groups of pupils and to develop targeted improvement strategies to support those pupils whose progress has fallen behind expectations. Advice, guidance and resources are also available to schools and teachers from the Secondary National Strategy.

Mr. Gibb: To ask the Secretary of State for Education and Skills what proportion of the marks in GCSE history are awarded by each examination board for *(a)* course work, *(b)* historical knowledge and *(c)* skills-based knowledge. [53882]

Jacqui Smith: The information requested is set out in the following table for the three unitary awarding bodies in England.

Awarding Body and their Full Course history GCSE specifications	Percentage of the marks allocated to coursework (internal assessment)	Percentage of the marks allocated to Historical Skills[1]	Percentage of the marks allocated to Historical Knowledge and Understanding[2]
AQA Specification A	25	40	60
AQA Specification B	25	40	60
AQA Specification C	25	40	60
EDEXCEL Specification A	25	40	60
EDEXCEL Specification B	25	40	60
EDEXCEL Specification C	25	40	60
OCR Specification A	25	40	60
OCR Specification B	25	40	60
OCR Specification C	25	39.5	60.5

[1] Historical Skills
The criteria permit between 20 per cent. and 40 per cent. of the total marks to be allocated to the following two assessment objectives:
Assessment 1: Candidates demonstrate their ability to use historical sources critically in their content, by comprehending, analysing, evaluating and interpreting them;
Assessment 2: Candidates demonstrate their ability to comprehend, analyse, and evaluate, in relation to the historical context, how and why historical events, people, situations and changes have been interpreted and represented in different ways.
[2] Historical Knowledge and Understanding
The criteria permit between 60 per cent. and 80 per cent. of the total marks to be allocated to this assessment objective, as follows:
Candidates demonstrate their ability to recall, select, organise and deploy knowledge of the specification content to communicate it through description, analysis and explanation of:
the events, people, changes and issues studied;
the key features and characteristics of the periods, societies or situations studied.
[3] Coursework is optional—candidates can take a written paper instead.

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills how many *(a)* boys and *(b)* girls in England gained five or more GCSE grades A* to C in each of the last three years. [56425]

Jacqui Smith: The information requested can be found in the following table.

GCSE and equivalent attempts and achievements, 2002/03–2004/05[1]

	Number of 15-year-old pupils[2]			Number achieving 5+ A*-C[3]			Percentage achieving 5+ A*-C		
Academic year	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
2002/03	317,494	304,628	622,122	152,088	177,294	329,382	47.9	58.2	52.9
2003/04	327,410	316,150	643,560	159,751	186,042	345,793	48.8	58.8	53.7
2004/05	324,013	312,783	636,796	166,442	191,971	358,413	51.4	61.4	56.3

[1] Figures for 2002/03 include GCSEs/ GNVQs. Figures from 2003/04 include GCSE and other equivalent qualifications approved pre-16.
[2] Age at start of academic year i.e. 31 August.
[3] Includes achievements for these pupils in other academic years.

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills how many girls undertook GCSE courses in England in 2005; and what proportion did not achieve a graded result. [56426]

Jacqui Smith: The information requested can be found in the following table.

GCSE attempts and achievements of pupils at the end of Key Stage 4 in all schools by the end of 2004/05

Academic year 2004/05	
Number of pupils at the end of Key Stage 4[1] attempting GCSE	
Boys	310,898
Girls	305,868
Total	616,766
Number achieving A-G[2]*	
Boys	4,952
Girls	3,561
Total	8,513
Percentage not achieving A-G*	
Boys	1.6
Girls	1.2
Total	1.4

[1] Pupils at the end of Key Stage 4 in 2004/05 academic year.
[2] Includes achievements for these pupils in other academic years.

Grafton Village School

Daniel Kawczynski: To ask the Secretary of State for Education and Skills (1) if she will meet parents of children from Grafton Village School to discuss its possible closure; [50054]

(2) on what basis the decision was made to close the Grafton Village School in Shrewsbury and Atcham constituency. [50088]

Jacqui Smith: Since September 1999 decisions on school closures have been determined by either *(a)* the relevant local authority (for proposals it published where there were no objections), *(b)* the local School Organisation Committee (SOC) or, *(c)* where the SOC has been unable to agree a unanimous decision, the independent school adjudicator. Provisions contained within the School Standards and Framework Act 1998 do not allow Ministers to intervene in such cases.

At their meeting on 15 September, Shropshire SOC unanimously agreed to approve the proposal submitted by Shropshire county council and the Governing Body of Bicton Primary school to discontinue Grafton Primary school and enlarge Bicton Primary school. Approval being conditional upon planning permission being granted for an enlargement to Bicton school.

As they were already reported, their reasons were:

significant deficiencies in the present premises at both schools;

the children of both schools would benefit from education provided in 21st century surroundings;

implications of further travel to school did not outweigh the clear benefits of the new provision;

the proposal did not reduce denominational provision and admissions and the admissions policy was not based on denominational criteria.

Overall, the Committee considered that the evidence presented was strongly in favour of the proposals and that the best interests of both staff and pupils would be met by SOC approval. Shropshire county council are now under a statutory duty to implement the proposal as approved by the SOC. Given this statutory position the Secretary of State is unable to meet the parents of children from Grafton school.

Grammar Schools

Mr. Chaytor: To ask the Secretary of State for Education and Skills (1) what percentage of pupils who are being educated in a grammar school live outside the school's local education authority boundary; [53545]

(2) what proportion of pupils who live inside the local education boundary are being educated at a grammar school within that local education authority. [53546]

Jacqui Smith *[holding answer 6 March 2006]:* The information requested has been provided in the following table.

England

	Number and percentage
Number of resident pupils attending secondary schools within local authroity[1]	749,148
Number of resident pupils attending grammar schools within local authority	87,257
Percentage of resident pupils attending grammar schools within local authority	11.6
Total grammar school pupils	110,983
Grammar school pupils residing outside school local authority	23,377
Percentage of grammar school pupils residing outside school local authority	21.1
Grammar school pupils with unknown residence	349

[1] Includes secondary, middle deemed secondary, academies and city technology colleges.
[2] Includes pupils aged 15 and under.

Annual Schools Census 2005

Grange School, Shrewsbury

Daniel Kawczynski: To ask the Secretary of State for Education and Skills if she will visit Grange School in Shrewsbury to meet teachers and pupils. [55941]

Ruth Kelly: I have no plans to visit Grange School in Shrewsbury at present.

Higher Education

Lynne Jones: To ask the Secretary of State for Education and Skills how many students who entered higher education in each year since 1996 went to universities that are members of *(a)* the Russell Group, *(b)* the 1994 Group and *(c)* the Coalition of Modern Universities; and what proportion in each category were from each socioeconomic group. [43021]

Bill Rammell: Information on the social background of entrants to higher education is published annually by the Higher Education Statistics Agency (HESA) in "Performance Indicators in Higher Education". For every higher education institution in the UK, the figures show the numbers and proportions of young, full-time entrants to first degree courses from social classes HIM, IV and V (for 2001/02 and earlier) and socio-economic groups 4, 5, 6 and 7 (from 2002/03). This gives a partial picture due to the exclusion of entrants to other

undergraduate courses, part-time and mature students from the figures. The aggregate figures for the various institutional groupings are summarised in the table.

Young entrants to full-time first degree courses 1997/98 to 2001/02

Total young entrants	*Russell Group*	*1994 group*	*CMU*	*All HEIs*
1997/98	50,205	17,610	57,135	216,210
1998/99	51,610	17,640	57,575	216,130
1999/2000	53,110	18,250	57,215	219,790
2000/01	53,265	19,045	55,670	221,140
2001/02	56,885	20,500	56,360	229,750
of which:				
Percentage from social classes HIM, IV, V[1]				
1997/98	15.8	16.6	33.3	25.0
1998/99	15.6	17.4	33.2	25.0
1999/2000	16.0	17.2	33.7	25.3
2000/01	16.5	17.7	33.7	25.4
2001/02	16.4	17.5	34.6	25.8

[1] The percentages are based on students who provided details of their background, and exclude non-respondents. Social classes HIM, IV and V cover students from skilled manual, semi-skilled and unskilled backgrounds.

Note:
Numbers are rounded to the nearest 5 and percentages are rounded to 1 decimal place.

HESA

Young entrants to full-time first degree courses 2002/03 to 2003/04

Total young entrants	*Russell Group*	*1994 group*	*CMU*	*All HEIs*
2002/03	58,480	21,890	56,945	239,180
2003/04	61,370	22,355	56,755	241,445
of which:				
From socio-economic groups 4–7[1]				
2002/03	19.1	19.1	36.7	28.4
2003/04	19.0	20.3	36.7	28.6

[1] The percentages are based on students who provided details of their background, and exclude non-respondents. National Statistics socio-economic classifications (NS-SEC) 4–7 cover students from small employers and own account workers, lower supervisory and technical, semi-routine and routine occupational backgrounds.

Note:
Numbers are rounded to the nearest 5 and percentages are rounded to 1 decimal place.

Home Teaching

Mr. Gibb: To ask the Secretary of State for Education and Skills what estimate she has made of the proportion of children of school age who are being educated at home. [55439]

Jacqui Smith: I refer the hon. Member to the reply given on 23 January 2006, *Official Report*, column 1916W.

Home-School Agreements

John Bercow: To ask the Secretary of State for Education and Skills if she will list the schools which use home-school agreements in each local education authority. [53493]

Jacqui Smith: We do not collect information centrally on which schools use Home-School Agreements in each local authority area. However, we expect all maintained schools to have a Home-School Agreement in place as this has been a legal requirement since 1 September 1999.

John Bercow: To ask the Secretary of State for Education and Skills if she will list the maintained schools in each local education authority which do not give information on pupils' progress to parents at least three times a year. [53494]

Jacqui Smith: The Department does not collect information on how frequently maintained schools give information on pupils' progress to parents.

There is currently a legal requirement for maintained schools to provide a written pupil report to parents once a year and an opportunity for face-to-face discussion of that report with the pupil's teacher.

The White Paper, "Higher Standards, Better Schools For All", sets out our plans for providing information to parents. We want all schools to provide information to parents on the progress of their child at least three times a year with regular opportunities to discuss with teachers how they can support their child's learning.

Industrial Design Courses

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills if she will list the universities which provide industrial design-related programmes; and how many are *(a)* undergraduate programmes and *(b)* specifically industrial design courses. [44968]

Bill Rammell: The latest available information covers academic year 2006–07, and is taken from the UCAS website. This covers full-time first degree, HND and foundation degree courses only. Comparable information for part-time undergraduate courses, and postgraduate courses, are not available centrally.

Institutions offering Industrial Design courses[1] in 2006/07:

Basingstoke College of Technology
Bedford College
The University of Bolton
Bournemouth University
The University of Bradford
University of Brighton
University of the West of England, Bristol
Brunel University
University of Wales Institute, Cardiff
Carmarthenshire College
University of Central England in Birmingham
University of Central Lancashire
Coventry University
De Montfort University
University of Dundee
University of Glamorgan
Great Yarmouth College
University of Hertfordshire
Hopwood Hall College
Kent Institute of Art and Design
Kingston University
University of Lincoln
London South Bank University
Loughborough University

University of Luton
Middlesex University
The North East Wales Institute of Higher Education
Northumbria University
Nottingham Trent University
University of Plymouth
Plymouth College of Art and Design
The Robert Gordon University
The University of Salford
Sheffield Hallam University
South Nottingham College
Staffordshire University
The Surrey Institute of Art and Design, University College
Swansea Institute of Higher Education
University of Teesside
University of the Arts London
University of Wolverhampton

[1] Listed as industrial design on the UCAS course search website.

UCAS website course search

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills how many people graduated from design-related courses in each year since 2001. [44969]

Bill Rammell: The latest figures are given in the following table:

First degree qualifiers in design studies from UK HE institutions

	Domicile			
	Home	*EU*	*Overseas*	*Total*
2000/01	9,410	640	750	10,800
2001/02	9,765	705	655	11,125
2002/03	10,560	690	755	12,005
2003/04	11,090	645	910	12,645
2004/05	11,565	650	895	13,110

Note:
1. igures are rounded to the nearest 5.
2. igures for 2001/02 and earlier are based upon the major subject of the qualification. For 2002/03 onwards, figures by subject are apportioned between the subjects studied.

Intelligent Accountability Framework

Mr. Gauke: To ask the Secretary of State for Education and Skills what progress she has made in replacing accountability requirements on schools for departmental skills programmes with the intelligent accountability framework of the New Relationship with Schools; and if she will make a statement. [53535]

Jacqui Smith: Good progress is being made in putting in place intelligent accountability arrangements as part of the New Relationship with Schools. These arrangements now include self-evaluation by each school to identify strengths and areas for development, which plays an important part in Ofsted's new inspection framework; production of a school profile to replace the governor's annual report, to inform parents and the public about the school, in particular its achievements and priorities for improvement; from April 2006 the removal of the application process for many streams of funding and the use of a school plan annex to bid for others from the Department; and the introduction of school improvement partners for secondary schools by September 2006 and for primary schools by April 2008, acting on behalf of local authorities to provide effective challenge and support to schools, much of this from serving and former head teachers.

International Initiatives

Mr. Boswell: To ask the Secretary of State for Education and Skills if she will make a statement on recent international initiatives involving her Department, with particular reference to *(a)* India, *(b)* China and *(c)* Africa. [56325]

Bill Rammell: The Department is providing funding for the establishment of a new Africa Unit at the Association of Commonwealth Universities which will facilitate and promote sustainable collaborative partnerships between African and UK universities.

In September 2005, the Prime Minister announced a £10 million initiative over five years to re-vitalise links between educational institutions in the UK and India. The development of sustainable, long-term partnerships between institutions will be key to the success of this initiative. I expect to announce details of this initiative in April.

The UK has made substantial progress in strengthening its educational links with China. A new scholarship programme, jointly funded by the Chinese and UK Governments, to enable PhD students from China to study in the UK was launched in February 2005. Both Governments have agreed to review progress on an annual basis at a ministerial education summit meeting. The next meeting will be held on 4 April in London.

There are more than 160 Higher Education partnerships between UK and Chinese institutions including the setting up of a campus by the University of Nottingham in Ningbo. 73 new school links were created in 2004/05. In December 2005, my right hon. Friend the Chancellor of the Exchequer announced an additional £4 million over the next two financial years to support scholarships and encourage academic exchanges and collaboration between UK and Chinese centres of excellence.

We are also engaging with partners in the Middle East. The Department is proposing to support a UK/Iraq initiative for the development of the vocational education system in Iraq through partnership with the UK Further Education sector.

In addition, we are working with the British Council and Foreign Office to develop programmes for education collaboration with Saudi Arabia and Libya.

International Students

Mr. Sheerman: To ask the Secretary of State for Education and Skills how many international students were studying in the United Kingdom in each of the last 10 years. [48601]

Bill Rammell: The latest information is given in the following table:

Enrolments in UK Higher Education Institutions 1995/96 to 2004/05

Academic year	*UK domiciled*	*Non UK domiciled*	*Total*
1995/96	1,497,185	184,625	1,681,810
1996/97	1,533,050	187,000	1,720,050
1997/98	1,558,590	200,965	1,759,555
1998/99	1,598,945	207,130	1,806,075
1999/2000	1,604,520	211,840	1,816,360
2000/01	1,643,865	219,725	1,863,590
2001/02	1,699,885	227,275	1,927,160
2002/03	1,764,950	255,235	2,020,185
2003/04	1,832,975	275,480	2,108,455
2004/05	1,870,715	288,430	2,159,145

Note:
Figures are rounded to the nearest 5, and are on a snapshot basis as at 1 December, to maintain a consistent time series across all years.

Higher Education Statistics Agency (HESA) student record

Keith Hudson

Mr. Gibb: To ask the Secretary of State for Education and Skills if she will list the individuals and organisations consulted in helping her reach a decision in the case of the Keith Hudson List 99 determination. [43406]

Ruth Kelly: Representatives from the following organisations were consulted in reaching a decision:

More House school
Surrey Social Services Department
National Identification Service, New Scotland Yard
Croydon Law Courts
HM Customs and Excise
Lewes Crown court
East Sussex county council
The Care Standards Tribunal
Sussex police
A consultant Forensic Psychiatrist

The Department does not release the names of individuals who supply information or evidence.

Local Education Authority Funding

Mr. Graham Stuart: To ask the Secretary of State for Education and Skills how much each local education authority in England has received in each year since 1997. [54590]

Jacqui Smith: The information requested is contained within the table as follows:

Total funding for pupils aged 3–19

£ million

LEA name	*1997–98*	*1998–99*	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*2003–04*	*2004–05*	*2005–06*

Notes:

1. Data reported using Real terms figures at 2004–05 prices, based on GDP deflators as at 23 December 2005.
2. Figures reflect relevant sub-blocks of Standard Spending Assessment / Education Formula Spending (EFS) settlements and exclude the pensions transfer to EFS and LSC.
3. Total funding also includes all revenue grants in DfES Departmental Expenditure Limits relevant to pupils aged 3–19 and exclude Education Maintenance Allowances (EMAs) and grants not allocated at LEA level. For those authorities in receipt of advance of grant under the transitional support arrangements for 2004–05, advance grant funding is included in the year of payment (2004–05). There will be a consequential reduction in DfES grant for these LEAs in future years (either 2006–07 and 2007–08 or 2006–07 to 2008–09, depending on the terms on which the advance was given to the LEA).
4. Where responsibility for funding a school has transferred from an authority, related funding no longer appears in the series.
5. Figures are rounded to the nearest £0.1 million.
6. 1997–98 figures for authorities subject to Local Government Reorganisation in that year have been estimated, pro-rata to their post LGR figures.

Learning and Skills Council

Mr. Jenkins: To ask the Secretary of State for Education and Skills what discussions she has had on the future of the Learning and Skills Council in Tamworth; and if she will make a statement; [43468]

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills what discussions she has had on the future of the Learning and Skills Council in Coventry; and if she will make a statement. [42781]

Bill Rammell: The LSC is embarking upon a major transformation programme that will make it a smaller, more dynamic and more customer-focused organisation. This will build upon its existing strengths; further develop its relationships with providers and with its partners, and help push the highest proportion of its funding out through colleges and providers into front line delivery. At local level, the LSC will develop small teams of professional staff who will support the delivery of its priority objectives through strategic relationships with colleges, providers and other key stakeholders and so ensure that the needs of local employers and learners are met. I fully support the changes the LSC is making as I believe it will help bring about an organisation that is fit for purpose.

The LSC continues to consult widely on the detail of the restructuring proposals. The effects on organisation and staffing are matters for the LSC. Mark Haysom, the LSC's chief executive, has written to my hon. Friends with further information. And a copy of his reply has been placed in the House Library.

Letter from Mark Haysom dated 14 February 2006:

I write in response to your Parliamentary Question on the future of the Learning and Skills Council in Coventry.

As we have previously discussed the LSC has embarked on our agenda for change this is a radical and transformational programme of six themes to change the further education sector to better meet the needs of employers, to continue to raise quality of provision, simplify funding, share data collection, build business excellence within the sector, and to build the sector's reputation.

If we are to do this, the LSC must change too. We have introduced a seventh theme of transformation of the LSC itself, strengthening our ability to work locally, while sharing a number of common functions at the regional level. I believe that we can achieve this at a cost saving of approximately £40m and with around 1,300 fewer posts.

Across the country there will be some 183 local partnership and economic development teams. These teams of highly skilled and experienced education and training professionals will be responsible for developing strategic relationships with colleges, schools and training providers and with our key local stakeholders.

To support them, we will provide more efficient and effective services at regional level. Building on our experience of regional working to date, we want to create centres in each region from which operational services will be delivered. We will also strengthen the regional level in order that we can respond to regional skills priorities.

With a stronger regional tier, we have the opportunity to reduce the size of out National Office, We will only do nationally that which must be done nationally-for example, building relationships with national stakeholders and providing clear frameworks to ensure consistency across the LSC.

These changes will mean that for the Coventry and Warwickshire LSC area we will have approximately 27 people working in two local partnership teams-one for Coventry and one for Warwickshire-and a single economic development team. The new arrangements will provide a closer working relationship between the employers, the LSC, colleges and providers, and other local stakeholders, making the system more responsive to local needs and better able to work for the local community.

Please do not hesitate to contact me if there is any further information you require.

Mr. Denham: To ask the Secretary of State for Education and Skills what the *(a)* allocated and *(b)* actual Learning and Skills Council funding distributed to each relevant educational institution in (i) Hampshire, (ii) Southampton, (iii) Portsmouth and (iv) the Isle of Wight has been in each of the last four years, broken down by *(a)* 16 to 18 and *(b)* 19 plus age groups. [56029]

Bill Rammell: My Department allocates funds for the post-16 education and training sector to the Learning and Skills Council (LSC) working through 47 local offices. The LSC was established in 2001 bringing the planning and funding of post-16 education together under one body within a framework set by Government.

On 21 October the Government set out its priorities for post-16 education and training. I set out the Government's priorities for the learning and skills sector and the impact on funding in 2006–07 and 2007–08. Full details can be found in Priorities for Success' on the LSC's website. In 2004–05 the LSC spent £9.2 billion in total on delivering post-16 education and training.

The Department does not hold figures for post-16 education funding at local level. Some of the information my right hon. Friend requires is available on the LSC's website. I am therefore copying this letter to Mark Haysom, the Council's Chief Executive so that he can respond with the detailed information my right hon. Friend has requested. A copy of his reply will be placed in the Library.

Jon Cruddas: To ask the Secretary of State for Education and Skills what assessment she has made of the performance against targets of London's learning and skills councils in each year since 2001. [46430]

Bill Rammell: My hon. Friend and I receive regular performance reports and have regular meetings with the LSC to discuss performance. The LSC leads on delivering four PSA targets: skills for life, apprenticeships, level 2 at 19 and adult level 2. Since its inception in 2001, the LSC has had a strong record of success. It has delivered two key PSAs: the 2004 skills for life target and the 2005 apprenticeship target. It is leading on delivery of the level 2 at 19 target set for 2006 and 2008—current indications are that the 2006 target is likely to be met. The LSC also lead on the adult level 2 target for 2010 and current estimates show that the 2007 milestone will be met.

As well as reporting to Ministers, the LSC has its own internal performance management system. This includes performance reporting and review by its council and management group on a regular basis and a six monthly scrutiny by the chief executive of each of the nine regions, including London, through a formal performance review with the regional directors. In addition, the LSC's annual report includes details of the performance against targets of each of the local LSCs.

In line with overall performance the LSC is performing well in London. Mark Haysom, the LSC's chief executive, has written to my hon. Friend with an assessment of the LSC's performance in London and a copy of his reply has been placed in the House Libraries.

Letter from Mark Haysom, dated 14 February 2006:

I write in response to your recent Parliamentary Questions where you asked the Secretary of State for Education and Skills, a) what assessment she has made of the performance of London's Learning and Skills Council against targets in each year since 2001 and b) what the total budget of London's learning and skills councils was in each year since 2001, broken down by spending on *(a)* school sixth forms, *(b)* the further education sector, *(c)* work-based training for young people, *(d)* workforce development, *(e)* adult and community learning, *(f)* information and advice for adults, *(g)* education- business links and *(h)* administrative costs. I can provide the following information.

The table below shows the total expenditure of the Learning and Skills Council relating to the Greater London region during the financial years* 2001–02 to 2004–05.

	Financial year			
Description	*2001–02*	*2002–03*	*2003–04*	*2004–05*
FE Participation	605,100,086	651,193,843	738,714,345	752,176,462
Workbased Learning Young People (inc. E2E)	47,064,248	44,138,691	61,228,381	66,245,333
Workbased Learning Adult	11,986,005	13,482,109	17,855,659	15,206,987
School Sixth Forms	0	229,928,529	264,500,174	291,560,395
Workforce Development (inc. ETP)	8,949,942	8,919,641	13,827,253	17,330,033
Adult Community Learning	34,247,880	41,080,676	45,109,226	45,951,998
Information Advice and Guidance.	3,331,577	4,569,073	4,789,067	4,773,610
Education Business Links	3,141,476	3,558,673	4,026,088	3,928,837
Administration	22,644,467	18,615,552	18,461,617	15,583,134
Other programmes and apportioned costs	107,214,320	210,672,212	278,410,883	300,035,591
Greater London total	843 680,000	1,226,159,000	1,446,922,692	1,512,792,380

The LSC is a national unitary organisation and performance is monitored and assessed at a national level, through formal quarterly performance reviews between Ministers and the LSC's Chair and Chief Executive. The quarterly reviews give an opportunity to give feedback, advice and guidance in a timely manner ensuring performance targets continue to be achieved.

To corroborate the effectiveness of this process, the following is recent evidence of improving performance, actively supported by the LSC:

Participation for 16 and 17 year olds is now much higher than the national average and is the highest when compared to other regions. 78% of 16 year olds are in full time education

(compared to 72% nationally) and 67% of 17 year olds (compared to 59% nationally). Young people in school sixth forms have increased by 6% in 2003/04 against a national increase of 3%.

Success rates in Further Education have risen to 68% in London during 2003/04; an improvement of 7% compared to an increase of 6% nationally.

All 13 General FE and sixth form colleges inspected in 2004–05 were found to be at least satisfactory—six of which were graded as outstanding.

8 FE colleges have been awarded Beacon Status.

47% of LSC ESOL provision is delivered in London.

London exceeded its contribution by 25% towards the Skills for Life milestone.

London exceeded its contribution towards Apprenticeship starts in 2003/04 by 5%.

There has been a 10% fall in NEETs in London.

Other key facts about the LSC in London For Young People

Over 161,000 young people aged 16–19 were able to benefit from education and training last year (RSP)

The regional apprenticeship target was exceeded by over 8 percent with 10,932 new entrants starting Apprenticeships by Dec 2005

The number of young people succeeding at further education colleges has increased from 53.5% in 2000/01 to 65.8% in 2003/04, a 12.5 percentage point increase

For Adults

Last year over 510,000 adults took part in learning funded by the LSC

The number of people undertaking Skills for Life training increased by 12%

To date this year 05/06 over 45,000 people achieved a basic skills qualification that counted towards the LSC target

Exceeded their target for Skills for Life, with more than 200,000 learners achieving transferable qualifications by the end of 2004/05

By the end of September 2005, 12,702 employees have benefited from the NETP in London East

£16 million has been invested in Level 3 qualifications at COVEs across the region, the equivalent of 121,000 qualifications.

The LSC has two new Regional Directors in post, one focussing on pan-London regeneration/skills issues such as the Olympics and Paralympics Games, Terminal 5, Stratford City and the Thames Gateway, the other focusing on overall regional performance, excellence, partnerships and capability. The remit of the Regional Skills Partnership is being recommended for review to strategically focus on major London issues making certain the influence of its members are used more effectively.

I hope this information is satisfactory, please do not hesitate to contact me should you require further clarification.

Learning Mentors

John Bercow: To ask the Secretary of State for Education and Skills how many learning mentors there are in each local education authority. [53587]

Jacqui Smith: Learning mentors are one of the strands of the Excellence in Cities (EiC) and Excellence Clusters (EC) initiative. Data relating to the numbers of learning mentors are not collected centrally but figures collected from local sources are shown in the following table. The Department does not hold figures of the numbers of learning mentors outside of this project.

Lisbon Agenda

Keith Vaz: To ask the Secretary of State for Education and Skills what policies her Department has adopted to assist the United Kingdom's fulfilment of the Lisbon Agenda criteria. [55604]

Bill Rammell: The Government strongly supports the renewed Lisbon focus on "jobs and growth" as the best way to meet the challenges of globalisation and boost prosperity and living standards for all. The UK national reform programme details our policy response to these challenges.

We expect the spring council in March to emphasise the importance of implementation of national commitments to reform.

London Academy, Edgware

Mr. Dismore: To ask the Secretary of State for Education and Skills what assessment she has made of the academic results of the London Academy, Edgware since it became a city academy; and if she will make a statement. [56810]

Jacqui Smith: The London Academy opened in September 2004 and has already made excellent progress in improving educational opportunities for young people in the Barnet area. The proportion of pupils gaining 5 or more good GCSEs increased in 2005 to 48 per cent. up nine percentage points from the 39 per cent. achieved in the last year of the predecessor school.

Ofsted have recently made a monitoring visit to London Academy and reported that "Pupils' rapid progress is a testimony to the positive ethos for learning." The Academy has risen to the top five per cent of schools nationally for progress for 11 to 14 year olds, and the top three per cent for 14 to 16 year olds.

This is a particularly impressive achievement given that the Academy serves some of the most socially deprived wards in the country. Over 45 per cent. of the pupils in Years 7 to 10 are entitled to free school meals, increasing to 57 per cent. in Year 11; over half of the pupils are from minority ethnic groups; well over a third of the pupils have a language other than English; and a similar percentage have a special educational need. The Academy is also a local authority-designated base for 30 pupils with speech and communication difficulties.

Looked-after Children

John Bercow: To ask the Secretary of State for Education and Skills if she will make a statement on the proposed consultation on proposals for transforming outcomes for looked-after children. [53584]

Maria Eagle: We announced in the Schools White Paper, "Higher Standards, Better Schools for All" that we would be consulting on a wide-ranging set of proposals for transforming outcomes for looked-after children. We are currently developing these proposals, including taking views from a range of stakeholders on the nature of the problem. We expect to publish the document for wide consultation within the next few months.

Modern Apprenticeships

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills what plans her Department has to increase the number of women undertaking Modern Apprenticeships in 2006. [56272]

Phil Hope: Overall 40 per cent. of apprentices are female but we recognise there are gender imbalances in different occupations. We are working with the Equal Opportunities Commission, the LSC and sector bodies to promote and improve access to apprenticeships by improving information, broadening choice and exploring more flexible learning opportunities. This includes mailing non-traditional tasters for young people making choices at 14; and evaluating how well trials of apprenticeships for more mature workers tackled under-representation in shortage sectors.

Alongside this work to tackle stereotyping at work and in training, we will consider over the coming months the recommendations of the Women and Work Commission published on 27 February 2006.

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills if her Department will assess the merits of extending the age limit to 24 years for modern apprenticeships. [56275]

Phil Hope: Government-supported apprenticeships are currently available to learners between the ages of 16 and 24. We are also currently trialling apprenticeships for more mature workers in engineering, construction, health and social care and IT. The final evaluation is being undertaken and will be ready by September 2006.

National Academy for Gifted and Talented Youth

John Bercow: To ask the Secretary of State for Education and Skills what the expenditure of the National Academy for Gifted and Talented Youth was in each year since 1999. [53572]

Jacqui Smith: The National Academy for Gifted and Talented Youth was established in 2002; its annual expenditure is set out in the following table. The figures represent 100 per cent. expenditure against the Department's annual core grant to the National Academy for Gifted and Talented Youth, plus philanthropic and other income provided through private sponsorship. The 2005–06 figures are projected spend based on latest figures available.

Annual expenditure for the National Academy for Gifted and Talented Youth

£

	2002-03	2003-04	2004-05	2005-06
DfES Core Grant	1,500,000	3,000,000	4,750,000	4,750,000
Philanthropic and other income	374,391	419,554	808,256	1,220,000
Total	1,874,391	3,419,554	5,558,256	5,970,000

National Parents Helpline

John Bercow: To ask the Secretary of State for Education and Skills what resources have been made available for *(a)* the National Parents' helpline and *(b)* the Parents' Centre web service; and if she will make a statement. [53574]

Maria Eagle: DfES currently funds five voluntary sector organisations to deliver a national helpline for parents. Parentline Plus is the first contact point, and can refer parents to four other helplines for specialist advice. In 2006–07, £2.6 million has been made available for the helplines through the Parenting Fund, an increase of £200,000 from 2005–06. This includes £1.95 million for Parentline Plus, £225,000 for Young Minds, £133,000 for the Children's Legal Centre, £121,000 for ACE and £165,000 for One Parent Families.

In 2005–06 £200,000 was made available for the Parents' Centre web service. Funding for 2006–07 has yet to be determined.

Ofsted

John Bercow: To ask the Secretary of State for Education and Skills if she will make a statement on the use of the contractual value added measure by Ofsted. [53499]

Jacqui Smith: The Department for Education and Skills and Ofsted have worked together to develop Contextual Value Added models, to give us better ways of assessing school effectiveness, in terms of the progress pupils make between National Curriculum Key Stages.

Simple value added (VA) measures are based solely on pupils' outcomes relative to their prior attainment, the biggest single predictor of pupil results. A number of other factors outside a school's control, such as pupils' gender or their level of deprivation, have been observed to affect pupil results, even after allowing for prior attainment. Contextual Value Added (CVA) measures aim also to take into account other pupil and school factors which have a significant effect on pupils' progress. CVA measures, by adjusting for these intake differences, reflect more realistically the impact each school makes.

Contextual Value Added information has been included—alongside other information—in Ofsted's Performance and Assessment (PANDA) reports since September 2005. The PANDA Reports inform school inspections, but data do not determine the judgements made by inspectors. The reports can also be used by schools to help their own self-evaluation.

Parental Engagement

John Bercow: To ask the Secretary of State for Education and Skills when the campaign to *(a)* develop further and *(b)* share schools' experience of parental engagement will be launched. [53487]

Jacqui Smith: The national campaign 'Engaging Parents to Raise Achievement' will be led by the Specialist Schools and Academies Trust, working in partnership with the Association of School and College Leaders (formerly the Secondary Heads Association). The campaign will stimulate school-parental engagement, enabling schools to generate and share innovative practice and effective strategies in parental engagement.

As part of the campaign, a range of parenting organisations will also be involved in working with schools, including School-Home Support, Fathers Direct, Parentline Plus and Parenting UK.

The campaign's inaugural event will be held in London on 26 April.

Parenting Orders

John Bercow: To ask the Secretary of State for Education and Skills which organisations run the parenting programmes which parents subject to a parenting order must attend; and what the cost to public funds is of the programmes since they were introduced. [53571]

Jacqui Smith: The information requested is not collected centrally by my Department and can be obtained only at disproportionate cost. Parenting programmes, and the costs associated with them, are matters for the local authority. I understand that, typically, these programmes may be delivered by local authority staff, youth offending teams and the voluntary sector and that costs vary according to circumstance and provider.

John Bercow: To ask the Secretary of State for Education and Skills how many court-imposed parenting orders for parents of excluded pupils have been *(a)* applied for and *(b)* issued in each local authority since they were introduced. [53586]

Jacqui Smith: The Department started to collect data regarding parenting orders in the case of exclusions from school from September 2004. Between 1 September 2004 and 31 July 2005 local authorities in England did not report any applications to the courts for parenting orders in the case of exclusions. However, 410 parenting contracts with parents of excluded pupils were reported as being agreed in the same period. Data for autumn 2005 will be published in March 2006.

Parliamentary Questions

David T.C. Davies: To ask the Secretary of State for Education and Skills (1) how many parliamentary questions tabled in the last 12 months for answer by her on a named day *(a)* were transferred and *(b)* received a substantive answer (i) on the day named and (ii) after the day named; [49889]

(2) how many ordinary written parliamentary questions tabled for answer by her in the last 12 months have been answered *(a)* within 14 days, *(b)* between 14 and 28 days, *(c)* between 28 days and two months and *(d)* in excess of two months after the date of tabling; and if she will make a statement. [49904]

Bill Rammell: The Department's Parliamentary Question Tracking System is unable to break the data down as requested. The answer could be supplied only at a disproportionate cost.

Departments aim to ensure that Members receive a substantive response to their Named Day question on the named day, and endeavour to answer Ordinary Written questions within a working week of being tabled.

Pension Liabilities

Mr. Philip Hammond: To ask the Secretary of State for Education and Skills if she will estimate the net present value of accrued pension liabilities in respect of *(a)* present and *(b)* former employees of her Department and its predecessors. [52114]

Maria Eagle: The Principal Civil Service Pension Scheme is an unfunded multi-employer defined benefit scheme and individual departments' pension liabilities are not available. The Cabinet office: Civil Superannuation Resource Accounts for 2004–05 showed that the total pension liability at 31 March 2005 was £84.1 billion. The value of pension liabilities was assessed as follows:

Liabilities for current members still contributing to the scheme—£37 billion;

Deferred pensions and contingent pensions for dependants in respect of members no longer contributing—£12.7 billion;

Current pensions for members and contingent pensions for dependants—£34.4 billion.

As a result of a change in the discount rate used for calculating pension liabilities with effect from 1 April 2005, the total pension liability at 1 April 2005 increased by £10.6 billion to £94.7 billion.

Performance Targets

Keith Vaz: To ask the Secretary of State for Education and Skills how many *(a)* national learning targets and *(b)* public service agreement targets have been (i) revised downwards since their launch and (ii) achieved. [55603]

Bill Rammell: 11 National Learning Targets were launched in 1998, with a completion date of 2002. My Department's current suite of Public Service Agreement (PSA) targets were agreed as part of the 2004 and 2002 Spending Reviews. None of these targets were or have been revised downwards. Progress is published on an annual basis through the Departmental Report and Autumn Performance Report, copies of which are available in the House Library.

Personalised Learning (Barnet)

Mr. Dismore: To ask the Secretary of State for Education and Skills what allocation the London borough of Barnet has received for personalised learning from the dedicated schools grant since its introduction; and if she will make a statement. [56767]

Jacqui Smith: The Dedicated Schools Grant (DSG) is being introduced from 2006–07. The data I placed in the Library to accompany my written statement of 7 December 2005 on the School Funding Settlement for 2006–07 and 2007–08, set out how much DSG each authority will receive for those years, including their allocation for personalised learning. That statement and more detailed information may be found on the Teachernet website at: www.teachernet.gov.uk/management/schoolfunding/2006–07 funding arrangements/.

Private Finance Initiative Contracts

Ms Keeble: To ask the Secretary of State for Education and Skills how many *(a)* secondary and *(b)* primary schools in each local authority area are involved in private finance initiative contracts. [55973]

Jacqui Smith: Set out in the following table is the breakdown by local authority area of primary and secondary schools involved in private finance initiative contracts. For clarity I have further separated out those schools that are now deemed as "all through", namely covering both primary and secondary provision in the one establishment.

Number

Local authority	*Primary*	*Secondary*	*All-through*
Barking and Dagenham	0	2	—
Barnsley	13	0	—

Post-Graduate Certificate in Education

Mr. Gibb: To ask the Secretary of State for Education and Skills (1) what guidance is issued by her Department on the interviewing of applicants for post-graduate certificate in education courses; [55334]

(2) what steps her Department is taking *(a)* to monitor and *(b)* standardise interviews for admission to post-graduate certificate in education courses. [55333]

Jacqui Smith: The entry requirements for Initial Teacher Training (ITT) are contained in "Qualifying to teach", the Secretary of State's Standards for the award of qualified teacher status and Requirements for Initial Teacher Training. These apply to all routes into teaching—not only PGCE. Comprehensive guidance on all of the ITT requirements, including those that relate to entry and interview requirements, are provided in the TDA's accompanying "Handbook of Guidance". Requirement 1.8 states that:

> "All providers must ensure that, as part of the selection procedures, candidates admitted for training have taken part in a group or individual interview."

Guidance is provided on pages 70 and 71 of the "Handbook" and provides examples of the kinds of evidence that would be used in order to assess whether candidates have the full range of qualities needed to be a successful teacher. Guidance also notes the requirement for partnership schools to be involved in the selection process.

The monitoring of selection and entry procedures is undertaken by Ofsted. Every Ofsted inspection of an accredited ITT provider will provide a judgement about the quality of the management and quality assurance of training provision Through interview and other mechanisms, all providers must make judgments of every applicant in accordance with the Requirements. These include judgments relating to:

- Capability of an applicant to meet the Standards
- GCSE or equivalent entry criteria
- Physical and mental fitness to teach
- Criminal background
- Communication skills
- Degree held (in the case of PGCE)

However, providers may set their own entry requirements additional to those prescribed by the Secretary of State.

Primary Schools (Radstock)

Dan Norris: To ask the Secretary of State for Education and Skills how much the Government contributed to the establishment of Trinity Primary and St. Nicholas Primary schools in Radstock. [54367]

Jacqui Smith: The Radstock Primary Renaissance project which resulted in the opening of two new primary schools, Trinity Church of England Primary, and St. Nicholas Church of England Primary, was supported by £4.6 million of Targeted Capital Funding.

Pupil Funding (Barnet)

Mr. Dismore: To ask the Secretary of State for Education and Skills what spending changes there were in *(a)* cash and *(b)* percentage terms in funding per pupil in the London borough of Barnet (i) in total, (ii) for primary schools and (iii) for secondary schools in 1996–97 to 2006–07; and if she will make a statement. [56882]

Jacqui Smith: The data I placed in the Library to accompany my written statement of 7 December 2005 on the School Funding Settlement for 2006–07 and 2007–08, sets out each authority's Dedicated Schools Grant (DSG) increases for those years. My statement and more detailed information may be found on the Teachernet website at: www.teachernet.gov.uk/management/schoolfunding/2006-07_funding_arrangements/

The DSG is not broken down into funding per pupil for primary and secondary pupils: that is a matter for local authorities.

Figures for 2008–09 to 2010–11 will not be available until after the next Spending Review, due to be announced during the summer 2007.

Pupil Health

Dr. Stoate: To ask the Secretary of State for Education and Skills what steps her Department is taking to ensure that schools devise strategies for pupils with *(a)* asthma and *(b)* other long-term conditions to help them to manage their conditions. [55228]

Maria Eagle: The Department for Education and Skills and the Department of Health guidance 'Managing Medicines in Schools and Early Years Settings' (2005) has been written to help schools and their employers to develop their local policies on managing medicines and supporting pupils with medical needs including those with long term conditions such as asthma. The guidance is, however, advisory only and it is for school and employers to develop their own policies in the light of local needs and resources.

Dr. Stoate: To ask the Secretary of State for Education and Skills what training teachers of physical education receive to ensure that they are qualified to work with children and young people with *(a)* asthma and *(b)* other long-term conditions. [55229]

Jacqui Smith: Most children with medical conditions can participate in physical activities and extra-curricular sport. Any restrictions on a child's ability to participate in physical education should be recorded in their individual health care plan including any precautionary measures before or during exercise and access to their medicines such as asthma inhalers. The advice given in the Department for Education and Skills and the Department of Health guidance 'Managing Medicines in Schools and Early Years Settings' (2005) recommends that all staff, particularly PE teachers, should have training or be provided with information about asthma once a year. It is for teachers employers to arrange appropriate training in collaboration with local health services.

Queen's Birthday

Anne Main: To ask the Secretary of State for Education and Skills what plans her Department has to celebrate Her Majesty's 80th birthday; what advice she has issued to her Department's executive agencies on celebrations for the birthday; and if she will make a statement. [54192]

Bill Rammell: The Department's buildings, in common with all other Government offices, will fly the Union Jack to mark the Queen's Birthday. No other formal celebrations are planned.

Racism

Dr. Kumar: To ask the Secretary of State for Education and Skills how many racist incidents among pupils were recorded in *(a)* primary schools, *(b)* secondary schools and *(c)* further education institutions in (i) England, (ii) the Tees Valley and (iii) Middlesbrough South and East Cleveland in each year since 1997. [53533]

Jacqui Smith: Data on racist incidents are best collected, analysed and acted on at the local level. The Department does not therefore collect information on racist incidents at a national level. Schools are required to record all racist incidents and report them to their local authorities at least annually.

The requirement to record and report all racist incidents in schools came into force in November 1999. Therefore there are no data available for the years 1997–99. Until 2004, Middlesbrough included data on racist incidents in schools in their consolidated racist incidents reporting scheme. On the basis of information provided by Middlesbrough, in 2004–05 there were 37 racist incidents in primary schools and 68 in secondary.

Information in relation to racist incidents among students in further education institutions in England is unavailable as statistics are not routinely collated by the Department or by the Learning and Skills Council (LSC), the main funding body for further education, although individual colleges and some local LSCs may do so. On the basis of information supplied by the LSC, Tees Valley LLSC recorded two racist incidents in 2003–04, one in 2004–05, and nine in 2005–06.

Reading

John Bercow: To ask the Secretary of State for Education and Skills if she will list the sponsors of the Every Child a Reader project; and what the results of the project were. [53553]

Jacqui Smith: Every Child a Reader (ECAR) is a three-year programme which aims to help 5,000 five- and six-year-olds learn to read by placing specialist literacy teachers, trained in 'Reading Recovery', into schools to provide intensive one-to-one support to children most in need. The programme will also explore the potential for those teachers to support tailored literacy teaching more broadly within a school. ECAR is currently funded by the KPMG Foundation, the Esmee Fairbairn Foundation, the Indigo Trust, JJ Charitable Trust, and the SHINE Trust in partnership with the DfES. Further sponsors are being sought. The KPMG Foundation are also funding the appointment of an experienced educationalist to manage the programme, working with the Primary National Strategy and the Institute of Education.

Every Child a Reader began in September 2005. It is too early to say what the overall results of the programme will be. ECAR has commissioned an evaluation study to compare the progress of 200 children in London schools supported in 2005–06 through the ECAR programme with the progress of 200 children in schools not involved. The study will also evaluate the impact of the ECAR programme on overall standards in the schools involved. The results of the evaluation study will be available in autumn 2006.

Religious Education

Lynne Jones: To ask the Secretary of State for Education and Skills if she will list the signatories to the joint statement of 22 February between faith leaders and

the Department on teaching religious education; and whether this commitment will include the teaching of secular ethical perspectives contained in the National Framework. [55240]

Jacqui Smith: The signatories to the joint statement are:

Cardinal Cormac Murphy O'Connor—Archbishop of Westminster

The Rt Rev Dr. Kenneth Stevenson—Bishop of Portsmouth, Chair of Church of England Board of Education

Jon Benjamin—Chief Executive, Board of Deputies of British Jews

Munisha—Network of Buddhist Organisations

Sarah Lane—Free Churches Association

Anil Bhanot—Hindu Council of UK

Kathleen Wood—Methodist Church

Sir Iqbal Sacranie—Muslim Council of Britain

Dr. Indarjit Singh OBE—Network of Sikh Organisations

The joint statement signed by senior members of the faith groups represented in England sets out the importance of inclusive religious education and pledges their support for the use of the Non-Statutory National Framework for Religious Education in their schools and colleges.

Launched by the Department in October 2004, the Non-Statutory National Framework for Religious Education provides opportunities to develop pupils' knowledge and understanding of Christianity, other principal religions and religious traditions, and secular world views.

Mr. Allen: To ask the Secretary of State for Education and Skills whether a decision has been made on whether to retract her Department's guidance in paragraph 104 of DfES circular 1/94 that humanists should not be appointed as members of Group A of Standing Advisory Councils for Religious Education. [55525]

Jacqui Smith: The current policy regarding religious education and collective worship is set out in the Department for Education and Skills Circular 1/94. There are no current plans to revise this circular.

Safeguarding Children's Boards

John Bercow: To ask the Secretary of State for Education and Skills how many local safeguarding children's boards have been set up. [53578]

Maria Eagle: The most recent data come from DfES investigations in October 2005 to find out how local areas were putting in place the various reforms in the Government's Every Child Matters programme. 26 Local Safeguarding Children Boards had been established at that point while in a further 94 local areas, transition arrangements to move from Area Child Protection Committees to Local Safeguarding Children Boards by the deadline of 1 April 2006 had been agreed by the Local Authority. Based on these figures and informal contacts with local authorities we expect all English local authorities to have LSCBs in place by 1 April 2006.

School Attendance
